- American Bar Association
- American Public Power Association
- California Municipal Utilities Association
- Energy Bar Association, Past Chair of the FERC Practice Committee
- Women's Council on Energy and the Environment

Rebecca represents municipal and cooperative electric utilities in complex electric rate proceedings before FERC.

Rebecca guides clients through the Federal Energy Regulatory Commission (FERC) regulatory landscape, with a focus on electric transmission rate proceedings. She negotiates and litigates on behalf of municipally-owned electric utilities and rural electric cooperatives primarily located in the California Independent System Operator Corporation (CAISO) and Southwest Power Pool (SPP) regions. Drawing on her deep knowledge of FERC regulatory proceedings, Rebecca counsels her clients on cost-based rates, return on equity, formula rates and open access transmission tariffs.

In addition to practicing before FERC, Rebecca monitors and advises clients regarding the North American Electric Reliability Corporation (NERC) Reliability standards development process. Rebecca also guides clients on issues arising under the Federal Power Act and the Public Utility Regulatory Policies Act (PURPA).

Before joining Thompson Coburn, Rebecca served as a law clerk in the Office of Administrative Law Judges at FERC, where she handled electric, natural gas, oil pipeline and enforcement hearing and settlement proceedings.
