# Protecting the Ever-Increasing Endpoints in Higher Education

### Webinar

The last several months have resulted in significant changes for all sectors, and for higher education more than most. Institutions now operate in a different way that is much less centralized having many more endpoints in information systems. While cybersecurity concerns have been front and center for years, the current environment makes that even more true and much more complex.

Please join us in examining the cybersecurity issues in the new environment for higher education. Ben Auton of SpearTip Cyber Counterintelligence will join Jim Shreve, Katie Wendel and Luke Sosnicki to explore the nature of new and expanded risks, some controls to prevent and mitigate risks and some of the legal and regulatory issues presented by the cyber threats. We will also discuss the current cybersecurity efforts of the U.S. Department of Education.

#### CLE

The live presentation of this webinar was approved for 1.0 hours of general CLE credit in California and Illinois and 1.2 hours of general CLE credit in Missouri. 1.0 hour of general CLE credit in Texas is pending. CLE credit is no longer available for this recording.

#### Presenters

**Ben Auton**, VP of Operations and Security Services, SpearTip
