interest and principal on the debt.⁴⁷²⁴ The latter is consistent with Letter Rulings that held that loans from a partner to a partnership did not trigger debt-financed income.⁴⁷²⁵

The TAM was not clear how the UBI was computed. To me, the better view of the TAM's analysis is that one looks through the partnership to see the extent to which the debt constituted acquisition indebtedness with respect to the partnership's assets,⁴⁷²⁶ which may extend to

⁴⁷²⁴ The TAM reasoned:

Even though the properties of Z are collateral on the prior loan of Y's, the payment of the loan is not an obligation of Z, nor was it an obligation of Venture or a previous obligation of any of the other ventures. Y personally makes the payments and neither the loan nor the payments on it are considered in calculating partnership income. However, even though this is not a debt of Z, X could be at risk of loss of its share of the value of the property if the property should be foreclosed upon. Thus, X, in that case, though not contractually obligated, would in effect be paying on the loan. This risk is eliminated by the creation of the independently trustee, fully funded, escrow account solely for the purpose of paying the loan should Y default. Therefore, the loan, although collateralized by Z property, is not an obligation or liability of Z or X, and the escrow account, which must at all times be maintained a level sufficient to pay off the loan, ensures that even if Y should default neither Z nor X would be at risk of any loss or be required to make any payments. Because neither Z nor X are obligated on the loan, and are not at risk to suffer any loss because of the loan, it is not a debt of either and can be excluded in calculating acquisition indebtedness.

⁴⁷²⁵ Letter Ruling 8415105 included the following facts:

In those instances in which the Partnership invests indirectly in a Project through a Joint Venture, the Partnership's investment may, in some transactions, consist of both a capital contribution and a loan to the particular Joint Venture. The monies invested by the Partnership in the Joint Venture will consist solely of the capital contributions received by the Partnership from Y {the corporate general partner} and the Limited Partners, including your capital contribution. Neither Y nor the Limited Partners will borrow any portion of their respective capital contributions. The Partnership's capital contribution and loan to the Joint Venture, together with the capital contribution, if any, of the developer, will be used by the Joint Venture to acquire the Project. Any funds used by the Joint Venture to acquire a Project will be obtained solely from the Partnership or the developer/co-venturer, and no part of the acquisition price will be financed by a third-party lender or the seller of a particular Project. The terms of the joint venture agreement to be entered into by the Partnership and a developer will provide that any such loan by the Partnership will be entitled to certain priorities established by the agreement or the laws of the jurisdiction under which the particular Joint Venture is formed, including for example, the repayment of the loan from any available liquidation proceeds prior to the return of either joint venturer's capital contribution.

Letter Ruling 8415105 concluded:

The loans from the Partnership to any Joint Venture in which it is a co-venturer will be funded by each Limited Partner from each partner's capital, rather than by borrowing from third party sources. Accordingly, the properties acquired would not be considered to be debt-financed property within the meaning of section 514 of the Code. It follows that section 512(b)(4) would not apply in these situations.

Letter Ruling 8414066 appeared identical to Letter Ruling 8415105 in this respect.

⁴⁷²⁶ Andersen Tax LLC, ¶ 20.02[2][c] Sources of UBTI and Exceptions From UBTI Characterization, *Tax Economics of Charitable Giving*, said in a footnote:

To reach its conclusion, the IRS applied an aggregate (*i.e.*, not an entity) approach, so it looked through the partnership to determine if there was debt financing, and treated the situation the same as if the partnership itself sold the assets that had been debt financed.

591 T.M. *Real Estate Transactions by Tax-Exempt Entities*, part II.G.3.f., Sale of Partnership Interests, states:

treatment as UBI of a portion of other assets held by the partnership as well,⁴⁷²⁷ but would also mean that debt incurred merely to fund operations after the CRT acquires the partnership

Applying an aggregate view of partnerships, the National Office advised that an interest in a partnership that holds debt-financed property is effectively an interest in the partnership's underlying assets and liabilities. Thus, the National Office deemed the charity to have received unrelated debt-financed income from the sale of its interest in the first partnership.

⁴⁷²⁷ 723 T.M. *Publicly Traded Partnerships*, part III.D.2.c. Sale of a Partnership Interest, states: Based on the rationale expressed in TAM 9651001,⁸⁴⁹ the IRS may attempt to include in a tax-exempt organization's UBTI any gains recharacterized as ordinary income under § 751(a) to the extent those gains are attributable to excluded property. In TAM 9651001, the IRS relied in part on § 751(a) to justify its application of the aggregate view of partnerships.⁸⁵⁰ The IRS also stated that the aggregate view of partnerships is consistent with the treatment of partnerships under § 512(b). This position also would be consistent with the IRS's apparent belief that the same result should occur regardless of whether the tax-exempt organization sold its interest in the partnership or the partnership sold its assets.⁸⁵¹

⁸⁴⁹ Cf. Rev. Rul. 89-108, 1989-2 C.B. 100 (gain from sale of partnership interest that is attributable to inventory is not eligible to be reported under installment sale rules because installment method would not be available if selling partner had sold its share of underlying inventory); CCA 200722027 (applying rationale of Rev. Rul. 89-108 to gain attributable to unrealized receivables). See also Rev. Rul. 91-32 (gain on sale of foreign partner's interest in partnership was ECI to extent attributable to U.S. trade or business property of partnership). [Gorin note: The Tax Court has repudiated Rev. Rul. 91-32. See fn. 4734.]

⁸⁵⁰ It is not clear from the memorandum whether the IRS asserted that § 751(a) treats the transferor as selling an undivided interest in partnership assets rather than a partnership interest. Section 751(a) is merely an income recharacterization rule and should not constitute a basis for deeming a selling partner to have sold an interest in the underlying property of the partnership. The legislative history to the rules regarding transfers of partnership interests is consistent with this approach. See, e.g., H.R. Rep. No. 83-1337, at 4096-7 (1954) (stating that § 751(a) was adopted to prevent the conversion of potential ordinary income into capital gain by virtue of transfers of partnership interests, but that [t]he general rule that the sale of an interest in a partnership is to be treated as the sale of a capital asset is retained).

⁸⁵¹ See TAM 9651001 ([a]n anomalous result would occur if ownership of debt-financed property through a partnership would result in one tax treatment when direct ownership would result another). For example, if a partnership conducting an unrelated trade or business recognized income from the sale of inventory, § 512(b)(5) would not exclude from a tax-exempt organization's UBTI its distributive share of that income. § 512(b)(5)(A). If, instead, the tax-exempt organization sold its partnership interest, § 751(a) would recharacterize any gain or loss recognized by the organization from the sale that is attributable to the inventory as ordinary income, which then would be included in the tax-exempt organization's UBTI.

Carman, "Contract Units' As A Work-Around For UBTI," *Journal of Real Estate Taxation* (4th Quarter 2011), stated:

If an exempt organization is a partner in a partnership that borrows money to make an investment, the unrelated debt-financed income rules are applied to the exempt organization as if the organization borrowed the money and owned the property directly.⁹

⁹ Rev. Rul. 74-197, 1974-1 CB 143, TAM 9651001.

In Rev. Rul. 74-197, an exempt organization invested in a general partnership, which borrowed money to acquire investment property. The ruling held that the partnership's borrowing constituted acquisition indebtedness and, accordingly, the exempt trust's investment activity may result in UBTI.

Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests, also approaches the issue on an aggregate basis [footnotes citing to TAM omitted]:

Importantly, the Service has also ruled that a partner of a partnership is treated as having unrelated debt-financed income on the disposition of a partnership interest that was not acquired with funds borrowed by the tax-exempt organization directly if the partnership itself had

interest would not generate debt-financed income.⁴⁷²⁸ One article suggests that the TAM may be wrong⁴⁷²⁹ but would apply the TAM by referring to the partnership interest rather than looking

acquisition indebtedness with respect to partnership assets. The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (e.g., section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

⁴⁷²⁸ Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] Indebtedness Incurred by Pass-Through Entities, commented on the TAM:

In this technical advice memorandum, the Service also made an important distinction with regard to unsecured debt incurred by the partnership pursuant to a revolving line of credit: namely, that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner. However, the Service also ruled that increases in debt on the revolving line of credit after the exempt organization acquires its partnership interest would constitute acquisition indebtedness only to the extent that the increases were incurred to acquire or improve property within the meaning of Section 514(c)(1)(A), Section 514(c)(1)(B) or Section 514(c)(1)(C). In other words, if the partnership drew down on its line of credit to fund operating expenses, rather than to fund acquisitions of property, increases in the debt incurred on the revolving line of credit after the exempt organization acquires its interest in the partnership would not constitute acquisition indebtedness.

⁴⁷²⁹ Woodhull, *Selling A Partnership Interest Means Complexity For Tax-Exempt Partners*, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated that a number of practitioners have questioned whether the IRS position would be upheld if this issue were to be litigated and later argued:

The IRS also noted that Example 4 of Reg. 1.514(c)-1(a)(2) provides further support for debt-financed UBTI characterization.... According to the IRS, the debt/basis percentage thus calculated for the partnership interest is the same whether the partnership sells the property or the partner sell its partnership interest.

Notwithstanding the Service's statement in the TAM, Example 4 does not actually state that the debt/basis percentage is the same whether the partnership sells the property or the partner sells the partnership interest. Example 4 in fact provides that in 1972, X's average acquisition indebtedness is \$7 million and X's average adjusted basis is \$8 million for such year. Therefore, X's debt/basis percentage *with respect to its share of partnership income* [emphasis added] for 1972 is 87.5 percent. The conclusion that should be drawn from this example is that portfolio income (interest, rental income, and capital gains) that is reported to a tax-exempt partner on the partner's Schedule K-1 is debt-financed income to the extent of its entire debt/basis percentage. This conclusion in Example 4 is also consistent with Sections 512(c)(1) and 702(b). Both sections, as noted above, attribute the character of the income earned by the partnership to the partners. Furthermore, if the partnership sells its own debt-financed assets, it is clear under Sections 702(b), 512(c)(1), and 512(b)(4) that a portion of the realized gain will be characterized as debt-financed gain to the extent of the debt/basis percentage and that the debt portion of this percentage includes debt incurred to acquire the partnership interest as well as debt incurred by the partnership.

at the underlying assets,⁴⁷³⁰ the latter seeming to be supported by a statement made by a treatise that in other places looks to the aggregate theory.⁴⁷³¹ It's difficult to reconcile the TAM's

Again, in this situation, the debt-financed gain is reported on the Schedule K-1 issued to the tax-exempt partner. The distinction that appears to be missing from the IRS interpretation of Example 4 in TAM 9651001 is that the above Code sections all relate to income that is earned by the partnership and then allocated and reported on a Schedule K-1 as part of the partner's distributive share. The gain on the sale of a partnership interest is not earned by the partnership and is neither allocated nor reported on the partner's Schedule K-1. Thus, if one looks strictly at the Code and regulations, there is an argument that the gain from the sale of the partnership interest that was not acquired with debt should be excluded from characterization as debt-financed UBTI in that the partnership interest is not property subject to acquisition indebtedness. The fact that debt is used by the partnership to acquire underlying assets, and that this debt is used to determine the debt/basis percentage of the tax-exempt partner's distributive share of portfolio income allocated by the partnership, does not mean that the proceeds of the partner's sale of its ownership interest are subject to the debt-financed UBTI rules.

The Service's conclusion in TAM 9651001 is that whether X sells its interests in the partnerships or the partnerships sell the real estate, X is accomplishing economically the same result of realizing its share of any appreciation in the debt-financed property. This may be true economically, but, as discussed above, the Code and regulations do not necessarily support that conclusion. Even when the IRS appears to acknowledge that the aggregate view is not clearly supported by Section 514, it still maintains that this approach is suggested by Example 4 and Sections 751 and 512(b), and notes that Congress could not have intended that Section 512(b)(4) could be so easily subverted.

⁴⁷³⁰ Woodhull, *Selling A Partnership Interest Means Complexity For Tax-Exempt Partners*, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated:

Assuming that [the TAM] is a correct interpretation, calculating debt-financed UBTI with respect to the tax-exempt partner's capital gain or loss on the sale of its interest in the partnership will require the partner to:

- (1.) Calculate the highest amount of the partnership's indebtedness during the 12-month period ending on the date of the sale, including the partnership's allocable share of any indebtedness in lower-tier partnerships.
- (2.) Calculate the tax-exempt partner's allocable share of that indebtedness. Assuming that the debt is nonrecourse debt secured only by the partnership assets, this may be determined by reference to the partner's overall interest in the partnership unless the partnership agreement provides otherwise. If the debt is recourse with respect to one or more partners, it would affect this determination.
- (3.) Divide the tax-exempt partner's share of the partnership's indebtedness by the partner's average adjusted basis in the partnership. The partner's average adjusted basis in the partnership is the average of the partner's adjusted basis as of the first day during the tax year of the partner during which it held the interest in the partnership and its adjusted basis as of the date of the sale.
- (4.) Multiply the tax-exempt partner's share of the partner's capital gain or loss on the sale of its interest in the partnership by the percentage calculated above. The resulting amount will be debt-financed UBTI to that partner.

It later concluded:

To determine the portion of the partner's capital gain or loss that is debt-financed UBTI, the tax-exempt partner should multiply its capital gain realized from the sale of the partnership interest as calculated above by the debt/basis percentage, the numerator of which is the partner's share of the highest amount of the partnership's debt during the 12-month period preceding the sale, and the denominator of which is the partner's average adjusted basis in the partnership during the tax year in which the sale took place.

⁴⁷³¹ Compare from fn. 4728 & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] *Indebtedness Incurred by Pass-Through Entities*, stating that:

looking at the aggregate approach and then seeming to turn around and apply an entity approach.⁴⁷³² This uncertainty is not the only way in which the TAM's position creates serious tax issues for exempt organizations that acquire partnership interests for investment purposes.⁴⁷³³

On the other hand, the burden now appears to be on the IRS to point to a specific provision overriding the general rule that a partnership interest is taxed as a single asset, viewing the partnership as a single entity, rather than viewing the partnership interest as an aggregate of the underlying interests.⁴⁷³⁴ In other words, even though Code § 702 preserves the character of income flowing through a partnership's K-1 and runs those items through a Code § 512 analysis, Code § 512(b)(5) does not look through the partnership interest in applying its exclusion from UBI to gain on sale of the interest (subject of course to the debt-financed override provided by Code § 512(b)(4)⁴⁷³⁵). Thus, although Code § 751 may recharacterize gain on sale of a partnership interest,⁴⁷³⁶ Code § 751 does not purport to override

the Service [took the position] that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner.

with fn. 4727, Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests:

The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (e.g., section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

⁴⁷³² The IRS might have been uncomfortable applying only an entity approach, in light of GCM 39486 (1986), described in detail in fn. 4690, in which debt from a wraparound mortgage was not deemed assumed by the tax-exempt partner.

⁴⁷³³ Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 29.05. Taxation of Pass-Through Income, made that observation, commenting:

First, the sale of a partnership interest is not a sale of the underlying asset of the partnership, so the result is not necessarily economically the same. Second, the exempt organization may have no control over the timing of the incurrence or repayment of debt by the partnership. This position is problematic because Section 514 uses a twelve-month lookback rule.

⁴⁷³⁴ *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32), discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5673.

⁴⁷³⁵ See fn. 4711.

⁴⁷³⁶ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

Code § 512(b)(5),⁴⁷³⁷ so that ordinary income would not constitute UBI.⁴⁷³⁸ Furthermore, merely holding a partnership interest that was donated and then selling it does not mean that the owner was engaged in a trade or business even though the partnership itself was, so selling the partnership interest does not constitute engaging in a business and therefore would not be captured by Code § 511, the latter being the underpinning of all UBI taxation. A similar argument would apply for tax-exempt investors that hold partnership interests as part of their investment strategy, so long as they are not dealers and the partnership interests themselves (without looking inside the partnerships) qualify under Code § 512(b)(5).

All of the above assumes that any business activity is unrelated to the exempt organization's exempt function. Gross income is UBI only if the trade or business producing the income is not substantially related (other than through the production of funds) to the purposes for which exemption is granted.⁴⁷³⁹ Thus, one must examine the relationship between the business activities which generate the particular income in question—the activities, that is, of producing or distributing the goods or performing the services involved—and the accomplishment of the organization's exempt purposes.⁴⁷⁴⁰ The collection of accounts receivable as part of the continuing day to day operation of exempt activities is not UBI.⁴⁷⁴¹ See also [Advertising Unrelated Business Taxable Income and 3rd Party Contractor Issues | Internal Revenue Service \(irs.gov\)](#).

II.Q.6.d.ii. UBTI Related to an S Corporation

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified retirement plan (other than an ESOP) or a Code § 501(c)(3) charity.⁴⁷⁴²

⁴⁷³⁷ Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain “shall be considered as an amount realized from the sale or exchange of property other than a capital asset.” Other than expressly not protecting certain noncapital assets such as inventory and property held for sale to customers, Code § 512(b)(5) does not require that property be a capital asset to qualify for its exclusion from UBI.

⁴⁷³⁸ However, Woodhull, *Selling A Partnership Interest Means Complexity For Tax-Exempt Partners*, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), expressed a view that is inconsistent with my conclusion (footnotes omitted):

In general, the portion of a partner's gain or loss on the sale of a partnership interest that is attributable to Section 751 assets is treated as ordinary income or loss, and is subject to tax as UBTI to tax-exempt partners.

I called the author, and he said that he had not considered the point I raised above. In an informal conversation on November 10, 2017, he said that he agrees with my conclusion.

⁴⁷³⁹ Reg. 1.513-1(d)(1).

⁴⁷⁴⁰ Reg. 1.513-1(d)(1).

⁴⁷⁴¹ Letter Ruling 9005068.

⁴⁷⁴² Code § 512(e), which was added by P.L. 104-188 in 1996, effective for taxable years beginning after December 31, 1997.

A charitable remainder trust may not hold stock in an S corporation.⁴⁷⁴³ Even if it could, the imposition of unrelated business income tax would be disastrous.⁴⁷⁴⁴

Suppose a trust's remainder passes to charity, and the trust holds S corporation stock. Every day the trust holds the stock after the primary beneficiary's death generates more and more UBTI. Consider converting the S corporation into an LLC taxed as an S corporation in a tax-free Code § 368(a)(1)(F) reorganization⁴⁷⁴⁵ as early as one can (if converting is not more expensive than selling to an unrelated third party),⁴⁷⁴⁶ then when the primary beneficiary dies the LLC has 75 days to convert to partnership or disregarded entity status retroactive to the date of death.⁴⁷⁴⁷

II.Q.6.d.iii. Charitable Deduction Against UBTI

If the charity is a trust, it may deduct up to 50%-60% of UBTI for gifts made to another charity.⁴⁷⁴⁸ For 2020 and 2021, this is increased to 100% for certain cash contributions.⁴⁷⁴⁹

If the charity is a corporation, it may deduct up to 10% of UBTI for gifts made to another charity.⁴⁷⁵⁰

⁴⁷⁴³ For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

⁴⁷⁴⁴ See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust especially fns. 4687-4688.

⁴⁷⁴⁵ See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

⁴⁷⁴⁶ If the S corporation holds assets that are depreciable or amortizable in the hands of the buyer, conversion might trigger ordinary income on the entire gain from sale of those assets, whereas sale to a third party might generate ordinary income only to the extent of recapture of amortization or accelerated depreciation deductions. Compare part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill) to part II.G.6.b Code § 1245 Property.

⁴⁷⁴⁷ See parts II.P.3 Conversions (timing of election to convert) and II.P.3.a From Corporations to Partnerships and Sole Proprietorships (effect of election to convert).

⁴⁷⁴⁸ See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, especially fn 4957. Code § 170(b)(1)(G)(i) provides:

In general. In the case of any contribution of cash to an organization described in subparagraph (A), the total amount of such contributions which may be taken into account under subsection (a) for any taxable year beginning after December 31, 2017, and before January 1, 2026, shall not exceed 60 percent of the taxpayer's contribution base for such year.

⁴⁷⁴⁹ See part II.G.4.g.i Charitable Deduction vs. Business Expense, including the increase of 50% to 100% for certain 2020 and 2021 contributions.

⁴⁷⁵⁰ Code § 512(b)(1) provides:

In the case of any organization described in section 511(a), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), but shall not exceed 10 percent of the unrelated business taxable income computed without the benefit of this paragraph.

Reg. § 1.512(b)-1(g)(3) provides:

The contribution, whether made by a trust or other exempt organization, must be paid to another organization to be allowable. For example, a university described in section 501(c)(3) which is exempt from tax and which operates an unrelated business, shall be allowed a deduction... for

CCA 202027003 concluded:⁴⁷⁵¹

Section 265(a)(1) may not be applied to disallow a section 170 charitable contribution deduction allowed under section 512(b)(10) in calculating unrelated business taxable income under section 512(a)(1). This is because a charitable contribution is not

gifts or contributions to another university described in section 501(c)(3) for educational work but shall not be allowed any deduction for amounts expended in administering its own educational program.

Code § 511(a) provides:

- (1) *Imposition of tax.* There is hereby imposed for each taxable year on the unrelated business taxable income (as defined in section 512) of every organization described in paragraph (2) a tax computed as provided in section 11. In making such computation for purposes of this section, the term “taxable income” as used in section 11 shall be read as “unrelated business taxable income”.
- (2) *Organizations subject to tax.*
 - (A) Organizations described in sections 401(a) and 501(c). The tax imposed by paragraph (1) shall apply in the case of any organization (other than a trust described in subsection (b) or an organization described in section 501(c)(1)) which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a).
 - (B) *State colleges and universities.* The tax imposed by paragraph (1) shall apply in the case of any college or university which is an agency or instrumentality of any government or any political subdivision thereof, or which is owned or operated by a government or any political subdivision thereof, or by any agency or instrumentality of one or more governments or political subdivisions. Such tax shall also apply in the case of any corporation wholly owned by one or more such colleges or universities.

Code § 11 imposes tax on corporations.

⁴⁷⁵¹ CCA 202027003 reasoned:

Other than UBTI, Organization’s income generally is not subject to tax under section 501(a) and therefore falls within the classes of income considered tax-exempt income for purposes of section 265(a)(1). In order to determine if expenses are allocable to tax-exempt income for purposes of section 265(a)(1), courts have looked to whether the expenses were “intended to be covered” by tax-exempt income or whether the expenses would not exist “but for” the tax-exempt income. See *Induni v. Commissioner*, 990 F.2d 53 (1993); *Dalan v. Commissioner*, T.C. Memo. 1988-106. Similarly, Rev. Rul. 83-3 disallows expenses under section 265(a)(1) that were incurred for the purpose of earning or otherwise producing tax-exempt income and expenses that were incurred in carrying out the specific purpose to which the tax-exempt income is earmarked. 1983-1 C.B. 72, modified by Rev. Rul. 87-32, 1987-1 C.B. 131.

In order to establish that a “contribution or gift” has been made under section 170, a taxpayer must show a voluntary and irrevocable transfer of ownership of money or property without the receipt of adequate consideration or a substantial return benefit. See *United States v. American Bar Endowment*, 477 U.S. 105, 116 (1986); see also *Transamerica Corp. v. United States*, 902 F.2d 1540 (Fed. Cir. 1990); *Singer Co. v. United States*, 449 F.2d 413 (Ct. Cl. 1971). In determining whether a taxpayer has made a contribution without the expectation of any return benefit or quid pro quo, the “external features of the transaction in question” are examined. *Hernandez v. Commissioner*, 490 U.S. 680, 690 (1989). In addition, the taxpayer is required to have charitable intent in making the contribution. See *American Bar Endowment*, 477 U.S. at 118.

A charitable contribution is, by its nature, not allocable to any source of income, but instead arises from a donor’s charitable intent to voluntarily transfer money or property without receiving any benefit in return. Consequently, section 265(a)(1) may not be applied to disallow Organization’s charitable contribution deduction claimed in computing UBTI under section 512(a)(1).

allocable to tax-exempt income, but instead arises from a donor's charitable intent to voluntarily transfer money or property without receiving any benefit in return.

A charity that spends donations it receives on programs (as opposed to using donations for grants to other charities) should consider not receiving directly a gift that would generate UBTI, because the charity will be taxed on all of the UBTI:

- Instead, the gift should be made to a trust that is a Type I supporting organization or donor advised fund, so that the UBTI can be reduced by the trust's up to 50% deduction for distributions to the ultimate charity.
- The trust should consider forming a single member LLC that is disregarded for income tax purposes, to accept the donation; the LLC should have significant other assets. Contributions to the LLC will be deductible as if made directly to the trust.⁴⁷⁵² Forming the LLC may avoid a trap that applies when the flow-through entity does not distribute to the trust before yearend at least as much cash as the amount of the trust's expected charitable contribution deduction.⁴⁷⁵³ The LLC would use cash from its other assets to distribute to the trust cash at least equal in amount to the gross income flowing through the LLC to the trust. That way, the trust's receipts from the LLC will equal or exceed the gross income passing through the LLC, allowing the trust to meet the rules requiring its contribution to charity to be from gross income that the trust actually received. However, that concern applies to charitable distributions not made from unrelated business income (UBI) and therefore deductible under Code § 642(c)⁴⁷⁵⁴ and presumably does not apply to charitable distributions made from UBI and therefore deductible under Code § 681 applying the Code § 170 rules.⁴⁷⁵⁵

II.Q.6.e. Assignment of Income on Property Being Sold

The IRS has attacked the donation to charity of property that the charity then quickly sells as instead constituting a sale of that property by the donor.

More generally, Reg. § 1.671-1(c) discusses the assignment of income theory, distinguishing certain aspects from the grantor trust rules:⁴⁷⁵⁶

Except as provided in such subpart E, income of a trust is not included in computing the taxable income and credits of a grantor or another person solely on the grounds of his dominion and control over the trust. However, the provisions of subpart E do not apply in situations involving an assignment of future income, whether or not the assignment is to a trust. Thus, for example, a person who assigns his right to future income under an employment contract may be taxed on that income even though the assignment is to a trust over which the assignor has retained none of the controls specified in sections 671 through 677. Similarly, a bondholder who assigns his right to interest may be taxed on interest payments even though the assignment is to an uncontrolled trust. Nor are the rules as to family partnerships affected by the provisions of subpart E, even though a partnership interest is held in trust. Likewise, these sections have no application in

⁴⁷⁵² See fn. 335, found in part II.B Limited Liability Company (LLC).

⁴⁷⁵³ See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, describing the issue and a similar strategy in fns. 4947-4950.

⁴⁷⁵⁴ See fn. 4753.

⁴⁷⁵⁵ See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction.

⁴⁷⁵⁶ See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

determining the right of a grantor to deductions for payments to a trust under a transfer and lease-back arrangement. In addition, the limitation of the last sentence of section 671 does not prevent any person from being taxed on the income of a trust when it is used to discharge his legal obligation. See § 1.662(a)-4. He is then treated as a beneficiary under subparts A through D or treated as an owner under section 677 because the income is distributed for his benefit, and not because of his dominion or control over the trust.

The Humacid Company v. Commissioner, 42 T.C. 894, 912-913 (1964) (*Humacid*), held.⁴⁷⁵⁷

The fact that at the time he delivered the notes to the exempt organizations on December 2, 1958, Huntsinger controlled petitioner and contemplated that petitioner would redeem the notes prior to the end of the year does not put him in constructive receipt of the redemption proceeds. Respondent has proffered no evidence that petitioner had credited or set aside any funds for the redemption of the notes prior to Huntsinger's contribution of the notes to the exempt organizations on December 2, 1958. Cf. sec. 1.451-2(a), Income Tax Regs. This Court has, upon numerous occasions, noted that the doctrine of constructive receipt is not to be lightly applied but is to be invoked only in situations where it is clearly justifiable. *Robert J. Dial*, 24 T.C. 117, 124 (1955); *Hal E. Roach*, 20 B.T.A. 919 (1930); *C.E. Gullett*, 31 B.T.A. 1067, 1069 (1935). The mere fact of Huntsinger's control of petitioner is not sufficient to constitute constructive receipt. *Hyland v. Commissioner*, 175 F.2d 422, 424 (C.A. 2, 1949), affirming a Memorandum Opinion of this Court; *Robert J. Dial*, *supra*; *Basil F. Basila*, 36 T.C. 111, 116-117 (1961). Since respondent has failed to prove that petitioner ever set aside any funds with which to redeem the notes donated by Huntsinger to the exempt organizations prior to such transfer, Huntsinger cannot be found to have been in constructive receipt of the redemption proceeds.

We have found as a fact that Huntsinger made valid gifts of notes in the principal amount of \$41,000 on December 2, 1958, giving up all right, title, and interest therein at that time. Respondent, moreover, has failed to establish that the notes so transferred by Huntsinger included any element of ordinary income thereon. Huntsinger's donation of those notes to the three organizations is not a case of anticipatory assignment of income (cf. *Helvering v. Horst*, 311 U.S. 112 (1940), and *S. M. Friedman*, 41 T.C. 428 (1963), on appeal (C.A. 6, May 5, 1964)), for Huntsinger was not transferring the right to receive earned income.

The law with respect to gifts of appreciated property is well established. A gift of appreciated property does not result in income to the donor so long as he gives the property away absolutely and parts with title thereto before the property gives rise to income by way of a sale. *Stuart A. Rogers*, 38 T.C. 785, 788-789 (1962); *Elizabeth H. Potter*, 38 T.C. 951 (1962); *Campbell v. Prothro*, 209 F.2d 331 (C.A. 5, 1954); *Estate of W. G. Farrier*, 15 T.C. 277 (1950); *Elsie SoRelle*, 22 T.C. 459, 475-479 (1954); *South Lake Farms, Inc.*, 36 T.C. 1027 (1961), *affd.* 324 F.2d 837 (C.A. 9, 1963). On the basis of the facts before us, it is our opinion that Huntsinger did this. Therefore, he should not be regarded as having received income upon petitioner's redemption of the notes from the three charitable or educational organizations.

⁴⁷⁵⁷ For more on constructive receipt, see fns 4226-4227 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation.

Although the IRS does not attack the donation of marketable securities that a charity sells immediately after the contribution,⁴⁷⁵⁸ it has attempted to treat, as a sale by the donor, the contribution of closely-held stock to a charity, followed by a redemption. After losing,⁴⁷⁵⁹ the IRS ruled:⁴⁷⁶⁰

In *Palmer*, the taxpayer had voting control of both a corporation and a tax-exempt private foundation. Pursuant to a single plan, the taxpayer donated shares of the corporation's stock to the foundation and then caused the corporation to redeem the stock from the foundation....The Service will treat the proceeds of a redemption of stock under facts similar to those in *Palmer* as income to the donor only if the donee is legally bound, or can be compelled by the corporation, to surrender the shares for redemption.

An enforceable cause of action under the promissory estoppel theory counted as a legally binding commitment to sell stock.⁴⁷⁶¹ So did the tender of shares sufficient to bind the shareholders of a corporation being acquired by a taxable merger, even though the acquiring corporation had not legally bound itself to acquire the shares.⁴⁷⁶²

Until recently, taxpayers who fall within the no-binding-agreement safe harbor of Rev. Rul. 78-197 are protected from the IRS, even if the sale appears certain to occur. *Rauenhorst v.*

⁴⁷⁵⁸ Rev. Rul. 74-53 (no assignment of income where no express or implied obligation imposed upon the trustee to sell or exchange). For the origin of the assignment of income rule, see *Lucas v. Earl*, cited in fn. 1899, found in part II.G.24 Taxing Entity or Individual Performing Services.

⁴⁷⁵⁹ *Palmer v. Commissioner*, 62 T.C. 684 (1974), *aff'd* on another issue, 523 F.2d 1308 (8th Cir. 1975).

⁴⁷⁶⁰ Rev. Rul. 78-197, followed by Letter Rulings 8623007, 9413020, 9452020, 9452026, 9611047, and 200230004.

⁴⁷⁶¹ *Blake v. Commissioner*, T.C. Memo 1981-579, *aff'd* 697 F.2d 473 (2nd Cir. 1982).

⁴⁷⁶² *Ferguson v. Commissioner*, 108 T.C. 244 (1997), *aff'd* 174 F.3d 997 (9th Cir. 1999), *followed Gail Vento, LLC v. U.S.*, 111 A.F.T.R.2d 2013-1505 (D.C. V.I. 2013). *Ferguson* included some contingencies that the court disregarded. In *Ferguson*, the gift was made September 9, 1988. Here is the timeline for the tender:

On July 28, 1988, AHC, CDI Holdings, Inc. (CDI), and DC Acquisition entered into the merger agreement. According to the merger agreement, DC Acquisition would be merged into AHC, and AHC would thereupon become a wholly owned subsidiary of CDI as soon as practicable after DC Acquisition had purchased the stock of AHC pursuant to the tender offer. The merger agreement provided that each outstanding share of AHC stock, following the purchase of AHC stock pursuant to the tender offer, would be converted into the right to receive \$22.50 a share in cash. On August 3, 1988, DC Acquisition made a tender offer for the stock of AHC at \$22.50 a share. By the close of business on August 31, 1988, more than 50 percent of the outstanding shares of AHC stock had been tendered or guaranteed. At that time, despite the various contingencies to be discussed infra, we believe the reality and substance of the merger agreement and the tender offer indicate that the stock of AHC was converted from an interest in a viable corporation to a fixed right to receive cash.

The tender or guarantee of more than 50 percent of the outstanding shares of AHC stock was the functional equivalent to a vote by the shareholders of AHC approving the merger. The terms of the tender offer provided that DC Acquisition, with the acquisition of a majority of AHC stock, could assure that the requisite number of affirmative votes in favor of the merger would be received even if no other shareholder voted in favor of the merger. Therefore, with the exception of the hypothetical possibility that a sufficient number of tendered or guaranteed shares of AHC stock could be withdrawn, DC Acquisition was positioned to proceed unilaterally with consummation of the merger by the close of business on August 31, 1988.

So the conditions to effectuate the merger had been satisfied before the gift, with the chance of the conditions being undone being viewed as remote.

Commissioner, 119 T.C. 157 (1993), focused exclusively on legally binding commitments.⁴⁷⁶³ In that case, the court faulted the IRS' nonspecific allegations of an informal agreement or understanding between the donees and other parties, accepting on their face affidavits the taxpayer produced. The court also rejected the IRS' contentions that certain facts caused the assignment of income doctrine to apply:

In support of respondent's position that the right to sale proceeds had ripened to a practical certainty at the time of the contributions, he cites: (1) The September 28, 1993, letter of intent from WCP expressing its intention to purchase all the issued and outstanding stock of NMG; (2) the October 22, 1993, resolution by WCP's board of directors, which authorized its officers to negotiate and enter into the agreement for the purchase of all the issued and outstanding capital stock of NMG; and (3) a valuation report prepared by Houlihan, Lokey, Howard, & Zukin (Houlihan Lokey), which was attached to petitioners' 1993 return and which opined that, as of November 12, 1993, there was little chance the transaction involving WCP would not close on or before December 31, 1993. Those items might be particularly relevant for determining whether the stock warrant purchase ripened to a practical certainty; however, none of those items alone, or in combination, show that the donees were legally bound, or could be compelled, to sell their stock warrants.

Given that the probability of sale affects valuation, a taxpayer might maximize the charitable deduction by waiting to make the donation until the date before the sale closes. However, the Tax Court looks at the facts, and *Chrem v. Commissioner*, T.C. Memo. 2018-164, which was a sale between related parties, included some unfortunate language when denying summary judgment for the taxpayer, misstating the conclusion of *Rauenhorst*.⁴⁷⁶⁴ *Chrem* involved sloppy

⁴⁷⁶³ See fn 4658 regarding why letters of intent are tightly drafted to avoid any legally binding agreement before closing.

⁴⁷⁶⁴ See the highlighted language in this except:

Another relevant question is whether the charity is obligated, or can be compelled by one of the parties to the transaction, to surrender the donated shares to the acquirer. Rev. Rul. 78-197, 1978-1 C.B. 83 (1978); see *Rauenhorst v. Commissioner*, 119 T.C. 157, 166 (2002) (finding "the donee's control to be ... an important factor"). The existence of an "understanding" among the parties, or the fact that transactions occur simultaneously or according to prearranged steps, may be relevant in answering that question. See, e.g., *Blake v. Commissioner*, 697 F.2d 473, 480 (2d Cir. 1982) (stating that an "understanding" among the parties need not be "legally enforceable under state law"), *aff'g* T.C. Memo. 1981-579; *Ferguson v. Commissioner*, 108 T.C. 244 (1997) (finding assignment of income with respect to proceeds of merger that occurred contemporaneously with charitable contribution), *aff'd*, 174 F.3d 997 (9th Cir. 1999). We conclude that there exist genuine disputes of material fact that prevent us from resolving the assignment of income issue summarily. Comtrad and SDI were related by common management, the interests of both companies appear to have been aligned, and both companies seemingly desired that the stock acquisition be completed. If so, these facts may support the conclusion that the acquisition was virtually certain to occur. Respondent also points to emails and an alleged exchange of documents between JCF and petitioners on November 12, 2012. This evidence may support respondent's contention that JCF agreed in advance to tender its shares to SDI and that all steps of the transaction were prearranged. The parties also dispute the dates on which relevant events occurred. Petitioners assert that they transferred their shares to JCF on December 5 and there appears to be documentary evidence arguably supporting that assertion. Respondent contends that JCF did not acquire ownership of its 900 shares until (at the earliest) December 10, allegedly after JCF unconditionally agreed to sell the 900 shares to SDI. That contention derives arguable support from other documentary

taxpayers who did not obtain appraisals of the donated interests and had to argue substantial compliance in their effort to get a charitable deduction, so this may be a case of sloppiness being punished on many levels.

Dickinson v. Commissioner, T.C. Memo. 2020-128, demonstrates that *Chrem* was an outlier. *Dickinson* provides much comfort to taxpayers regarding donations of illiquid assets or concentrated positions when the charity has a policy of liquidating such donations. *Dickinson's* facts were:

Petitioner husband was the chief financial officer and a shareholder of Geosyntec Consultants, Inc. (GCI), a privately held company, during the years at issue. The GCI board of directors (Board) authorized shareholders to donate GCI shares to Fidelity Investments Charitable Gift Fund (Fidelity), an organization tax exempt under section 501(c)(3), through written consent actions in 2013 and 2014. In both consent actions the Board stated that Fidelity “has a donor advised fund program which incorporates procedures requiring ... [Fidelity] to immediately liquidate the donated stock” and “seeks an imminent exit strategy and, therefore, promptly tenders the donated stock to the issuer for cash”. The Board approved a third round of donations at a Board meeting by unanimous vote in 2015; the Board members signed the written minutes of the meeting. After each Board authorization, petitioner husband donated appreciated GCI shares to Fidelity. Petitioner husband remained a full-time GCI employee following each donation.

GCI confirmed in letters to Fidelity that its books and records reflected Fidelity as the new owner of the shares. For each stock donation, petitioner husband signed a letter of understanding (LOU) to Fidelity, indicating that the transferred stock was “exclusively owned and controlled by Fidelity”, and that Fidelity “maintains full discretion over all conditions of any subsequent sale” of the stock and “is not and will not be under any obligation to redeem, sell, or otherwise transfer” the stock. Petitioners received confirmation letters from Fidelity, which explained that Fidelity had “exclusive legal

evidence, as well as from Empire’s description of the proposed transaction, which recited that petitioners would transfer 900 shares to JCF “[s]imultaneously with SDI’s acquisition of the 6,100 shares.”

There are also genuine disputes of material fact concerning the extent to which JCF, having received the 900 shares, was obligated to tender them to SDI. Empire stated in its report that petitioners would use “all reasonable efforts to cause [JCF] to agree to sell the shares to SDI.” At this juncture the record includes little if any evidence concerning petitioners’ ability to sway JCF’s actions or JCF’s separate negotiations (if any) with SDI. Respondent contends that JCF had no meaningful discussions with SDI at all but was “simply informed by petitioners” that the 900 shares should be tendered at once. A trial will be necessary to determine whose version of the facts is correct.

One fact potentially relevant to this question concerns JCF’s fiduciary duties as a custodian of charitable assets. If JCF tendered its Comtrad shares, it would immediately receive \$4,050,000 in cash. If it refused to tender its shares and the entire transaction were scuttled, JCF would apparently be left holding a 13% minority interest in a closely held Hong Kong corporation, the market value of which might be questionable.

In sum, viewing the facts and the inferences that might be drawn from the facts in the light most favorable to respondent as the nonmoving party, we find that there exist genuine disputes of material fact that prevent summary adjudication of the assignment of income issue. To the extent petitioners seek summary judgment on this question, we will deny their motion.

control over the contributed asset". Shortly after each donation, Fidelity redeemed the GCI shares for cash.

Dickinson reasoned and held:

In the notice of deficiency, respondent determined that each donation of the GCI shares, followed by Fidelity's exchange of the shares for cash, should be treated in substance as a redemption of the shares for cash by petitioner husband, followed by petitioners' donation of the cash redemption proceeds to Fidelity. Per *Humacid Co. v. Commissioner*, 42 T.C. 894, 913 (1964), we respect the form of this kind of transaction if the donor (1) gives the property away absolutely and parts with title thereto (2) before the property gives rise to income by way of a sale. See also *Grove v. Commissioner*, 490 F.2d 241, 246 (2d Cir. 1973), *aff'g* T.C. Memo. 1972-98; *Carrington v. Commissioner*, 476 F.2d 704, 708 (5th Cir. 1973), *aff'g* T.C. Memo. 1971-222; *Behrend v. United States*, 31 A.F.T.R.2d (RIA) 73-406, 1972 WL 2627, at *3 (4th Cir. 1972); *Rauenhorst v. Commissioner*, 119 T.C. 157, 162-163 (2002).

The first *Humacid* prong requires us to determine whether the donor transferred all his rights in the donated property. See, e.g., *Grove v. Commissioner*, 490 F.2d at 246; *Carrington v. Commissioner*, 476 F.2d at 708; *Behrend*, 1972 WL 2627, at *3. To defeat petitioners' motion on this point, respondent must set forth specific facts showing that there is a genuine dispute for trial as to whether petitioner husband made an absolutely perfected gift of the GCI stock before the redemption. See Rule 121(d); *Sundstrand Corp. v. Commissioner*, 98 T.C. at 520.

GCI's letters to Fidelity confirming ownership transfer, Fidelity's letters to petitioners explaining that Fidelity had "exclusive legal control" over the donated stock, and the LOUs to the same effect all support petitioners' claim that petitioner husband transferred all his rights in the shares. Respondent makes much of the fact that Fidelity regularly redeemed the GCI shares shortly after each donation, according to what the Board understood to be Fidelity's internal procedures. Respondent argues that these facts suggest petitioner husband, GCI, and Fidelity could have arranged the redemptions in advance of the gifts, but a preexisting understanding among the parties that the donee would redeem donated stock does not convert a postdonation redemption into a predonation redemption. See *Behrend*, 1972 WL 2627, at *3. Furthermore, neither a pattern of stock donations followed by donee redemptions, a stock donation closely followed by a donee redemption, nor selection of a donee on the basis of the donee's internal policy of redeeming donated stock suggests that the donor failed to transfer all his rights in the donated stock. See, e.g., *Grove v. Commissioner*, 490 F.2d at 242-245 (respecting form of transaction where donee needed to fundraise to support its operations, and over a decade consistently redeemed annual donations of stock for which donor remained entitled to dividends); *Carrington v. Commissioner*, 476 F.2d at 705-706 (respecting form of transaction where donee redeemed stock eight days after it was donated); *Palmer v. Commissioner*, 62 T.C. 684, 692-693 (1974), (respecting form of transaction where, pursuant to a single plan, the taxpayer donated stock to a foundation and then caused the corporation to redeem the stock from the foundation the day after the donation), *aff'd*, 523 F.2d 1308 (8th Cir. 1975). Petitioners' contemporaneous documentary evidence of an absolute gift, and respondent's failure to assert facts indicating any genuine controversy on this point, lead us to conclude that petitioner husband's donations satisfy the first *Humacid* requirement.

The second *Humacid* requirement, that the taxpayer make the donation before the stock gives rise to income by way of sale, implements the assignment of income doctrine: A taxpayer who has earned income cannot escape taxation by assigning his right to receive payment. See *Helvering v. Horst*, 311 U.S. 112, 116 (1940). *Humacid* prong two ensures that if stock is about to be acquired by the issuing corporation via redemption, the shareholder cannot avoid tax on the transaction by donating the stock before he receives the proceeds.

Where a donee redeems shares shortly after a donation, the assignment of income doctrine applies only if the redemption was practically certain to occur at the time of the gift, and would have occurred whether the shareholder made the gift or not. See *Palmer v. Commissioner*, 62 T.C. at 694-695; see also *Ferguson v. Commissioner*, 174 F.3d 997, 1003-1004 (9th Cir. 1999) (finding that the shareholder recognizes income from a stock sale where acquisition is “practically certain to occur”, rather than the subject of “a mere anticipation or expectation”, before the shareholder donates stock), *aff’g* 108 T.C. 244 (1997). In *Hudspeth v. United States*, 471 F.2d 275, 276 (8th Cir. 1972), for example, the court recast a stock donation as a taxable stock sale and donation of the sale proceeds where the taxpayer donated stock after the issuing corporation’s directors and shareholders had adopted a plan of complete liquidation. See also *Jones v. United States*, 531 F.2d 1343, 1343-1344 (6th Cir. 1976); *Allen v. Commissioner*, 66 T.C. 340, 347 (1976).² By contrast, there was no assignment of income in *Palmer v. Commissioner*, 62 T.C. at 687-688, 695, even though all parties were related and anticipated the redemption before the donation, because “no vote for the redemption had yet been taken” when the shareholder donated the stock. As in *Palmer*, the redemption in this case was not a *fait accompli* at the time of the gift. As noted above, respondent argues that the parties may have prearranged for Fidelity to redeem the stock. Even if that was the case, it would not affect the analysis under the second *Humacid* requirement. Rather, we respect the form of the transaction because petitioner husband did not avoid receipt of redemption proceeds by donating the GCI shares.

² The Court of Appeals for the Ninth Circuit has gone a step further, asserting in dicta that stock sale proceeds are taxable to a shareholder who donates stock absent a binding obligation to sell if the facts and circumstances indicate that a tender offer and merger are “practically certain to proceed” in the immediate future. See *Ferguson v. Commissioner*, 174 F.3d 997, 1004 (9th Cir. 1999), *aff’g* 108 T.C. 244 (1997).

The parties point us to Rev. Rul. 78-197, 1978-1 C.B. 83, a “bright-line” rule the IRS applies in cases like *Palmer*, which focuses on the donee’s control over the disposition of the appreciated property. See *Rauenhorst v. Commissioner*, 119 T.C. at 165.³ This Court has not adopted Rev. Rul. 78-197, *supra*, as the test for resolving anticipatory assignment of income issues, see *Rauenhorst v. Commissioner*, 119 T.C. at 166, and does not do so today. The ultimate question, as noted in *Palmer*, is whether the redemption and the shareholder’s corresponding right to income had already crystallized at the time of the gift. See *Palmer v. Commissioner*, 62 T.C. at 694-695. Regardless of whether the donee’s obligation to redeem the stock may suggest the donor had a fixed right to redemption income at the time of the donation, see *Rauenhorst v. Commissioner*, 119 T.C. at 166-167, respondent does not allege that petitioner husband had any such right in this case. Accordingly, respondent’s resort to Rev. Rul. 78-197, *supra*, is unavailing.

³ Rev. Rul. 78-197, 1978-1 C.B. 83, 83, announces that the IRS “will treat the proceeds as income to the donor under facts similar to those in the Palmer decision only if the donee is legally bound, or can be compelled by the [issuing] corporation, to surrender the shares for redemption.”

Conclusion

As required by *Humacid* and its progeny, petitioner husband made an absolute gift of the GCI shares in each taxable year before the stock gave rise to income by way of a sale. We will therefore grant petitioners’ motion for summary judgment, and deny respondent’s motion for partial summary judgment.

Based on all of the above, I believed that the “practical certainty” test is whether the legal requirement for the owner to sell the donated property was practically certain, not whether as a matter of the parties’ actions the sale was practically certain and not whether the buyer was compelled to buy if the owner decided to sell. At least I did until *Estate of Hoensheid v. Commissioner*, T.C. Memo. 2023-34, decided to the contrary:

While we consider a donee’s legal obligation to sell as “significant to the assignment of income analysis,” *Ferguson*, 108 T.C. at 259, it “is only one factor to be considered in ascertaining the ‘realities and substance’ of the transaction,” *Allen*, 66 T.C. at 348 (quoting *Jones*, 531 F.2d at 1345). Instead, “the ultimate question is whether the transferor, considering the reality and substance of all the circumstances, had a fixed right to income in the property at the time of transfer.” *Ferguson*, 108 T.C. at 259; see *Dickinson*, T.C. Memo. 2020-128, at *10. We thus look to several other factors that bear upon whether the sale of shares was virtually certain to occur at the time of petitioners’ gift. In this case the relevant factors include (1) any legal obligation to sell by the donee, (2) the actions already taken by the parties to effect the transaction, see *Ferguson*, 106 T.C. at 264, (3) the remaining unresolved transactional contingencies, see *Robert L. Peterson Irrevocable Tr. #2 v. Commissioner*, T.C. Memo. 1986-267, 51 T.C.M. (CCH) 1300, 1316, *aff’d sub nom. Peterson v. Commissioner*, 822 F.2d 1093 (8th Cir. 1987), and (4) the status of the corporate formalities required to finalize the transaction, see *Estate of Applestein*, 80 T.C. at 345–46.

A. Fidelity Charitable’s Obligation to Sell

We turn first to whether Fidelity Charitable did in fact have an obligation to sell the CSTC shares. We conclude that respondent has not established that Fidelity Charitable had any legal obligation to sell the shares.²³ As petitioners point out, the terms and conditions of Fidelity Charitable’s Letter of Understanding expressly disclaimed any such obligation. In addition, respondent has not sufficiently established the existence of any informal, prearranged understanding between petitioners and Fidelity Charitable that might otherwise constitute an obligation. See *Greene v. United States*, 13 F.3d 577, 583 (2d Cir. 1994); see also *Chrem*, T.C. Memo. 2018-164, at *13. This factor weighs against an anticipatory assignment of income but is not dispositive. See *Ferguson*, 108 T.C. at 259.

²³ In *Chrem v. Commissioner*, T.C. Memo. 2018-164, we suggested that a donor-advised fund’s sponsoring organization may be subject to fiduciary duties that might impose a legal obligation to sell contributed shares constituting a small minority interest in a closely held corporation. *Id.* at *15 (“If it refused to tender its shares and

the entire transaction were scuttled, [the sponsoring organization] would apparently be left holding a 13% minority interest in a closely held Hong Kong corporation, the market value of which might be questionable.”); see also *Grove v. Commissioner*, 490 F.2d 241, 248 (2d Cir. 1973) (Oakes, J. dissenting) (looking to New York trust law and observing that offering donated shares for redemption was “the only practice which a university treasurer could correctly take and still meet his own statutory obligations as a fiduciary”), *aff’d* T.C. Memo. 1972-98. Respondent did not present arguments or testimony as to what, if any, fiduciary duties Fidelity Charitable might have owed that would compel it to sell the CSTC shares to HCI. Accordingly, lacking the benefit of meaningful briefing on the subject, we cannot find that Fidelity Charitable was in fact legally obligated to sell the contributed shares by way of fiduciary duty.

B. Bonuses & Shareholder Distributions

Next, we look to what acts CSTC and HCI took to effect the transaction before the July 13, 2015, gift. As of that date, a number of acts had already taken place that may suggest the transaction was a virtual certainty. One week before the gift, HCI had caused the incorporation of a new holding company subsidiary to acquire the CSTC shares. Three days before the gift, CSTC had amended its Articles of Incorporation to allow for written shareholder consent, an action requested by HCI. Most significantly, however, the “cash sweeping” actions taken by CSTC strongly suggest that the transaction with HCI was a virtual certainty before the gift on July 13.

On July 7, 2015 petitioner amended CSTC’s Change in Control Bonus Plan in order to specify that CSTC “desire [sic] that the consummation of the Investment Transaction result in payments to eligible Grantees under the Plan.” That same day, petitioner stated in an email that CSTC would “sweep the cash from the company prior to closing and distribute it to the brothers.” As of July 7, CSTC and petitioner thus considered the transaction with HCI so certain to occur that they took action to trigger the bonus payouts, consistent with the plan to sweep CSTC’s cash before closing. On July 10, 2015, CSTC then paid out approximately \$6.1 million in employee bonuses and, a few days later on July 14, distributed approximately \$4.7 million to petitioner and his two brothers as shareholders. While the July 14 distribution took place the day after the gift, petitioner’s statement on July 7 evidences that the decision to make the distribution had already been made as of that date, if not well formally authorized by CSTC. See Mich. Comp. Laws § 450.1345(1) and (2). We thus find that, before July 13, CSTC and petitioner had distributed and/or determined to distribute over \$10 million out of the corporation.

Moreover, we consider it highly improbable that petitioner and his two brothers would have emptied CSTC of its working capital if the transaction had even a small risk of not consummating. Absent its working capital, CSTC was no longer a going concern until the transaction was finalized. See *Cook*, 5 T.C. at 911 (finding assignment of income where donor of shares was “well aware that the corporate activities had all but ceased except for the actual distribution in liquidation”); see also *Apt v. Birmingham*, 89 F.Supp. 361, 393 (N.D. Iowa 1950) (stating that gain may be realized when “for all practical purposes corporate stock had no further purposes to fulfill” aside from underlying transaction). The bonus payouts and distributions do not appear from the record to have been in any way contingent on the final execution of the purchase agreement. Accordingly, we conclude that, once made, the bonus payouts and

distributions could not be clawed back and had tax consequences upon receipt for the participating employees and shareholders, including petitioner himself.

In the reality of the transaction, the cash sweeps were thus highly significant conditions precedent to consummating the transaction with HCI. *Cf. Kinsey v. Commissioner*, 58 T.C. 259, 265–66 (1972) (finding right to income on shares from liquidation was fixed where “a substantial portion of [corporation’s] assets were distributed prior to the date of the gift”), *aff’d*, 477 F.2d 1058 (2d Cir. 1973). As of July 13, 2015, the CSTC shares were essentially “hollow receptacles” for conveying proceeds of the transaction with HCI, “rather than an interest in a viable corporation.” *Estate of Applestein*, 80 T.C. at 345-46; see *Hudspeth v. United States*, 471 F.2d 275, 279 (8th Cir. 1972) (describing donated shares as “merely empty vessels by which the taxpayer conveyed the liquidation proceeds”). The cash sweep strongly weighs in favor of a conclusion that the sale was a virtual certainty and thus petitioners’ right to income from the shares was fixed as of July 13, 2015.

C. Unresolved Sale Contingencies

Next, we look to what unresolved sale contingencies remained between the parties as of the July 13, 2015, gift. See *Robert L. Peterson Irrevocable Tr. #2*, 51 T.C.M. (CCH) at 1316–19 (focusing on various contingencies that taxpayers argued precluded their right to sale proceeds from becoming fixed before a gift). Petitioners argue that the transaction with HCI was still being negotiated up until the closing on July 15. Petitioners rely on petitioner’s trial testimony, where he identified several negotiated issues, including an environmental liability, employee compensation arrangements, and excess real estate. At trial petitioner testified that he and HCI “basically negotiated right up until the day before we closed” - i.e., July 14, 2015.

However, the record does not bear out the substance of petitioner’s characterization. The identified employee compensation and excess real estate issues appear to have been resolved in drafts of the agreement prepared before July 13, 2015. At trial, a representative of HCI characterized the environmental liability issue as “the one probably biggest item of negotiation” resolved before closing. On July 10, 2015, HCI’s counsel prepared a draft with a new seller indemnity provision addressing the environmental liability issue. By 4:38 a.m. on [*32] the morning of July 13, when HCI’s counsel next ran a redline comparison of a new draft, the environmental liability provision had already been accepted into the draft agreement. Given that the written drafts memorialized the negotiations between the parties, we find that the parties had resolved the environmental liability issue before the contribution to Fidelity Charitable.

Moreover, the only substantive change made to the drafts after the contribution to Fidelity Charitable was a minor revision to the provision for ongoing compensation to Mark and Kurt to cover the cost of their health insurance. We thus find that none of the unresolved contingencies remaining on July 13, 2015, were substantial enough to have posed even a small risk of the overall transaction’s failing to close. See *Robert L. Peterson Irrevocable Tr. #2*, 51 T.C.M. (CCH) at 1319 (concluding that remaining contingencies “at best...represent remote and hypothetical possibilities that the stock purchase would be abandoned”); *cf. Martin v. Machiz*, 251 F. Supp. 381, 389 (D. Md. 1966) (finding no assignment of income where, at time of gift of shares, parties had “substantial” disagreements about closing date and buyer’s insistence on a surety bond as security for breach of warranty). We find that petitioner, consistent with his “99% sure”

statement, waited until all material details had been agreed to with HCI before he transferred the shares to Fidelity Charitable. See *Malkan*, 54 T.C. at 1314 (“Even though [the taxpayer] had discussed creating the trusts for several months, he did not establish them until the parties had agreed upon the details of the sale.”). The absence of significant unresolved contingencies also weighs in favor of the sale of shares to HCI being a virtual certainty.

D. Corporate Formalities

Finally, we look to the status of the corporate formalities necessary for effecting the transaction. See *Estate of Applestein*, 80 T.C. at 345-46 (finding that taxpayer’s right to sale proceeds from shares had “virtually ripened” upon shareholders’ approval of proposed merger agreement). Under Michigan law, a proposed plan to exchange shares must generally be approved by a majority of the corporation’s shareholders. See Mich. Comp. Laws § 450.1703a(2)(d); *id.* § 450.1407(1). Formal shareholder approval of a transaction has often proven to be sufficient to demonstrate that a right to income from shares was fixed before a subsequent transfer. See *Ferguson*, 108 T.C. at 262; see also *Hudspeth*, 471 F.2d at 279. However, such approval is not necessary for a right to income to be fixed, when other actions taken establish that a transaction was virtually certain to occur. See *Ferguson*, 104 T.C. at 262-63 (rejecting taxpayer’s “attempt to impose formalistic obstacle[]” of formal shareholder approval); see also *Hudspeth*, 471 F.2d at 280 (describing final resolution to dissolve corporation as a “mere formality” where shareholders and board had already approved plan of liquidation, despite “remote, hypothetically possible abandonment[]” of that plan); *Kinsey*, 58 T.C. at 265–66.

On June 11, 2015, petitioner and his two brothers (the sole shareholders of CSTC) unanimously approved pursuing a sale of all outstanding stock of CSTC to HCI. On July 15 they provided written consent to the final Contribution and Stock Purchase Agreement with HCI. However, viewed in the light of the reality of the transaction, the record shows that final written consent was a foregone conclusion. As a practical matter, finalizing the transaction with HCI presented petitioner and his two brothers with the opportunity to partially (or fully, as in Kurt’s case) cash out of CSTC at a significant premium over their initial target price of \$80 million. See *Ferguson v. Commissioner*, 174 F.3d at 1004–05 (considering formal shareholder approval to be unnecessary where shareholders were receiving substantial premium). From HCI’s perspective, it also believed it was acquiring CSTC at a fair price and, as of July 13, had resolved the environmental liability issue, its final significant due diligence concern. See *id.* at 1005. All three Hoensheid brothers, and particularly petitioner, were involved in negotiating the transaction, making their approval all but assured as of July 13, 2015. *Cf. Perry v. Commissioner*, T.C. Memo. 1976-381, 35 T.C.M. (CCH) 1718, 1724 (concluding that shareholder approval of sale was not just a “rubber stamp” where corporation was not “a closely held corporation controlled by the same individuals who negotiated the [a]greement”). We conclude that formal shareholder approval was purely ministerial, as any decision by the brothers not to approve the sale was, as of July 13, “remote and hypothetical.” *Jones*, 531 F.2d at 1346; see *Allen*, 66 T.C. at 347 (finding assignment of income despite parties not completing “purely ministerial act of executing quitclaim deed” before transfer). This factor is neutral as to whether petitioners’ right to income was fixed.

E. Conclusion

To avoid an anticipatory assignment of income on the contribution of appreciated shares of stock followed by a sale by the donee, a donor must bear at least some risk at the time of contribution that the sale will not close. On the record before us, viewed in the light of the realities and substance of the transaction, we are convinced that petitioners' delay in transferring the CSTC shares until two days before closing eliminated any such risk and made the sale a virtual certainty. Petitioners' right to income from the sale of CSTC shares was thus fixed as of the gift on July 13, 2015. We hold that petitioners recognized gain on the sale of the 1,380 appreciated shares of CSTC stock.

We echo prior decisions in recognizing that our holding does not specify a bright line for donors to stop short of in structuring charitable contributions of appreciated stock before a sale. See *Allen*, 66 T.C. at 346 (rejecting proposed bright-line rule approach and noting that "drawing lines is part of the daily grist of judicial life"); see also *Harrison v. Schaffner*, 312 U.S. 579, 583–84 (1941). However, as petitioners' tax counsel seems to have recognized in her advice to petitioner, "any tax lawyer worth [her] fees would not have recommended that a donor make a gift of appreciated stock" so close to the closing of a sale. *Ferguson v. Commissioner*, 174 F.3d at 1006; see *Allen*, 66 T.C. at 346 (recognizing that realities and substance approach puts "a premium on consulting one's lawyer early enough in the game"). By July 13, 2015, the transaction with HCI had simply "proceeded too far down the road to enable petitioners to escape taxation on the gain attributable to the donated shares." *Allen*, 66 T.C. at 348.

I find this case difficult to reconcile with the *Rauenhorst* statement: "Those items might be particularly relevant for determining whether the stock warrant purchase ripened to a practical certainty; however, none of those items alone, or in combination, show that the donees were legally bound, or could be compelled, to sell their stock warrants."⁴⁷⁶⁵ In *Rauenhorst*, the court faulted the IRS' nonspecific allegations of an informal agreement or understanding between the donees and other parties, accepting on their face affidavits the taxpayer produced. However, in *Hoensheid*, the IRS proved exactly how far along the sale was. To me, the court seems to be moving away from *Rauenhorst* and instead saying to taxpayers, "You can't get a deal totally worked out, take all of the economic steps consistent with being totally ready to close, pause for a day to figure out who you want to be taxed on the sale, rearrange ownership, then the next day close with new owners who will be taxable instead of you." For more about the gift's timing, see excerpt in part II.Q.6.f.i Completed Gift Requirement.

II.Q.6.f. Incomplete Gift and Charitable Partial Interest Prohibitions

II.Q.6.f.i. Completed Gift Requirement

The Tax Court has held that a Code § 170 deduction is allowed "only if the transfer at issue satisfies the six essential elements of a bona fide inter vivos gift:"⁴⁷⁶⁶

⁴⁷⁶⁵ See fn 4763.

⁴⁷⁶⁶ *Fakiris v. Commissioner*, T.C. Memo. 2017-126, fn. 12, citing: *Goldstein v. Commissioner*, 89 T.C. 535, 541-542 (1987) (quoting *Weil v. Commissioner*, 31 B.T.A. 899, 906 (1934), *aff'd*, 82 F.2d 561 (5th Cir. 1936)); *Guest v. Commissioner*, 77 T.C. 9, 15-17 (1981); *Stjernholm v. Commissioner*, T.C. Memo. 1989-563.

Before that quote, the footnote stated:

- (1) a donor competent to make the gift;
- (2) a donee capable of taking the gift;
- (3) a clear and unmistakable intention on the part of the donor to absolutely and irrevocably divest himself of the title, dominion, and control of the subject matter of the gift, in praesenti;
- (4) the irrevocable transfer of the present legal title and of the dominion and control of the entire gift to the donee, so that the donor can exercise no further act of dominion or control over it;
- (5) a delivery by the donor to the donee of the subject of the gift or the most effectual means of commanding the dominion of it; and
- (6) acceptance of the gift by the donee.

Thus, a retained right to require the donee to transfer ownership to another nonprofit made the gift conditional and therefore nondeductible.⁴⁷⁶⁷

On the other hand, if the charity voluntarily sells donated stock to the issuer, the donor's control over the issuer does not prevent the gift from being complete.⁴⁷⁶⁸

It is well settled that the term "charitable contribution" as it is used generally in sec. 170 and the regulations thereunder is synonymous with the term "gift". See *Collman v. Commissioner*, 511 F.2d 1263, 1267 (9th Cir. 1975), *aff'g in part, rev'g in part, and remanding* T.C. Memo. 1973-93; *Seed v. Commissioner*, 57 T.C. 265, 275 (1971); *Sutton v. Commissioner*, 57 T.C. 239, 242 (1971); *Wolfe v. Commissioner*, 54 T.C. 1707, 1713 (1970); *Murphy v. Commissioner*, 54 T.C. 249, 252 (1970); *McLaughlin v. Commissioner*, 51 T.C. 233, 234 (1968), *aff'd*, 23 A.F.T.R.2d (RIA) 69-1763 (1st Cir. 1969); *Perlmutter v. Commissioner*, 45 T.C. 311, 316-317 (1965); *DeJong v. Commissioner*, 36 T.C. 896, 899 (1961), *aff'd*, 309 F.2d 373, 376-379 (9th Cir. 1962); *Stjernholm v. Commissioner*, T.C. Memo. 1989-563, *aff'd*, 933 F.2d 1019 (10th Cir. 1991).

In light of *BC Ranch II, L.P. v. Commissioner*, 867 F.3d 547 (5th Cir. 2017), T.C. Memo. 2020-157 supplemented *Fakiris v. Commissioner*, T.C. Memo. 2017-126.

⁴⁷⁶⁷ *Fakiris v. Commissioner*, T.C. Memo. 2017-126, mentioning Reg § 1.170A-1(e) (see fn. 4769) but also noting *Graev v. Commissioner*, 140 T.C. 377, 390 (2013), and *Briggs v. Commissioner*, 72 T.C. at 656-659. In light of *BC Ranch II, L.P. v. Commissioner*, 867 F.3d 547 (5th Cir. 2017), T.C. Memo. 2020-157 supplemented *Fakiris v. Commissioner*, T.C. Memo. 2017-126.

⁴⁷⁶⁸ *DeWitt v. U.S.*, 204 Ct.Cl. 274 (1974), holding:

Defendant does not affirmatively challenge DeWitt's donative intent, nor the actual delivery of the stock to the Academy; but it does contend that DeWitt did not relinquish dominion and control over the stock since it views the transfer of the stock as conditional based on an agreement between DeWitt and the Academy that the Academy would retain the stock until such time as DeWitt, through his controlled corporation, Mortgage Co., offered to repurchase the stock. Since DeWitt subsequently repurchased the stock through his controlled corporation, defendant sees in this fact substance for its view that a conditional agreement did exist when the stock was given to the Academy. This fact, however, is not particularly persuasive here, nor have similar facts had any determinative effect in analogous cases. See *Sheppard v. United States*, *supra*; *Carrington v. Commissioner*, *supra*; *Behrend v. United States*, decided December 14, 1972 (4th Cir.), 31 AFTR.2d 73-406; *Makoff v. Commissioner*, 26 Tax Ct. Mem. 83, 90 (1967); *Fox v. Commissioner*, 27 Tax Ct. Mem. 1001 (1968). Since the eight shares of stock were in a closely-

If a transfer for charitable purposes depends on the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible.⁴⁷⁶⁹

Estate of Hoensheid v. Commissioner, T.C. Memo. 2023-34, analyzed the timing of the transfer of stock in a closely-held corporation:

“Ordinarily, a contribution is made at the time delivery is effected.” Treas. Reg. § 1.170A-1(b). The regulations further provide that “[i]f a taxpayer unconditionally delivers or mails a properly endorsed stock certificate to a charitable donee or the donee’s agent, the gift is completed on the date of delivery.¹⁵ *Id.* However, the regulations do not define what constitutes delivery. See, e.g., *Dyer v. Commissioner*, T.C. Memo. 1990-51, 58 T.C.M. (CCH) 1321, 1323; *Brotzler v. Commissioner*, T.C. Memo. 1982-615, 44 T.C.M. (CCH) 1478, 1480; *Alioto v. Commissioner*, T.C. Memo. 1980-360, 40 T.C.M. (CCH) 1147, 1154, *aff’d*, 692 F.2d 762 (9th Cir. 1982). Accordingly, we must first look to state law for the threshold determination of whether petitioners divested themselves of their property rights via gift.¹⁶ See *United States v. Nat’l Bank of Com.*, 472 U.S. 713, 722 (1985) (concluding that state law determines property rights and federal law classifies them for appropriate tax treatment); *Jones*, 129 T.C. at 150 (“In order to make a valid gift for Federal tax purposes, a transfer must at least effect a valid gift under the applicable State law.”); *Greer v. Commissioner*, 70 T.C. 294, 304 (1978) (applying state gift law requirements to charitable contribution of property), *aff’d* on another issue, 634 F.2d

held company, there was little, if any, market for them. Indeed, the only potential buyer was Mortgage Co., DeWitt’s corporation. Thus, it is not surprising that the offer to purchase the stock came from the only likely source available.⁶

⁶ Defendant attempts to make much of DeWitt’s candid uncertainty that, if the policies of the Academy were such as to preclude any effort on his part to repurchase the stock, he doesn’t know whether he would have made the gift of stock to the Academy. This pre-delivery speculation adds little to resolution of the matter at hand. DeWitt realized some risk existed, once he donated the stock to the Academy, that he might not be able to repurchase the stock from the Academy. He acknowledged that the risk was small since there was little, if any, market for the stock. However, even if the Academy sold the stock to another party, DeWitt would have sought to repurchase it from that party since the stock was worth more to him than anybody else. The important fact is that after delivery of the stock, DeWitt no longer had dominion and control over the stock. The presence of this risk factor supports the view that a bona fide gift of stock was given. See *Sheppard v. United States*, *supra*, 176 Ct.Cl. at 253-56, 361 F.2d at 977-78; *Apt v. Birmingham*, 89 F.Supp. 361, 392 (N.D. Iowa, 1950). The fact that DeWitt and the Academy may have expected and anticipated that the shares would be repurchased by Mortgage Co. does not invalidate the gift made. *Fox v. Commissioner*, *supra*, 27 Tax Ct. Mem. At 1013.

⁴⁷⁶⁹ Reg § 1.170A-1(e), which provides:

Transfers subject to a condition or power. If as of the date of a gift a transfer for charitable purposes is dependent upon the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible. If an interest in property passes to, or is vested in, charity on the date of the gift and the interest would be defeated by the subsequent performance of some act or the happening of some event, the possibility of occurrence of which appears on the date of the gift to be so remote as to be negligible, the deduction is allowable. For example, A transfers land to a city government for as long as the land is used by the city for a public park. If on the date of the gift the city does plan to use the land for a park and the possibility that the city will not use the land for a public park is so remote as to be negligible. A is entitled to a deduction under section 170 for his charitable contribution.

1044 (6th Cir. 1980); *Kissling v. Commissioner*, T.C. Memo. 2020-153, at *22 (“Whether delivery is effected is a question of state law.”). In doing so, we apply state law in the manner in which the highest court of the state has indicated that it would apply the law. See *Commissioner v. Estate of Bosch*, 387 U.S. 456, 465 (1967). Where the state’s highest court is silent, we must discern and apply the state law, giving “proper regard” to the state’s lower courts. See *Julia R. Swords Tr. v. Commissioner*, 142 T.C. 317, 342 (2014) (quoting *Commissioner v. Estate of Bosch*, 387 U.S. at 465).

¹⁵ The regulations alternatively provide, in relevant part, that “[i]f the donor delivers the stock certificate to his bank or broker as the donor’s agent, or to the issuing corporation or its agent, for transfer into the name of the donee, the gift is completed on the date the stock is transferred on the books of the corporation.” Treas. Reg. § 1.170A-1(b).

¹⁶ This Court has at times applied its own longstanding test for a valid inter vivos gift. See *Guest*, 77 T.C. at 16 (quoting *Weil v. Commissioner*, 31 B.T.A. 899, 906 (1934), *aff’d*, 82 F.2d 561 (5th Cir. 1936)). This test, while more extensive on its face than what is required under Michigan law, shares the same core elements: “donative intent, delivery by the donor and acceptance by the donee.” *Goldstein v. Commissioner*, 89 T.C. 535, 542 (1987) (distilling the *Weil* test); see *Estate of Sommers v. Commissioner*, T.C. Memo. 2013-8, at *43 n.20 (analyzing validity of gift under principles consistent with both federal and state law); *Estate of Dubois v. Commissioner*, T.C. Memo. 1994-210, 1994 WL 184393, at *2 (reaching conclusion that no valid gift was made under both federal and state law).

As to the choice of state law, both parties focused their state law briefing on Michigan law, and we cannot discern a choice of law principle that would suggest the parties’ understanding is incorrect. Accordingly, we apply the law of the state of petitioners’ domicile, Michigan, with respect to whether and when petitioners made a valid gift of the CSTC shares. See *Macatawa Bank v. Wipperfurth*, 822 N.W.2d 237, 238 (Mich. Ct. App. 2011) (“The longstanding rule in Michigan is that ‘the situs of intangible assets is the domicile of the owner unless fixed by some positive law.’” (quoting *Brown v. O’Donnell (In re Rapoport’s Est.)*, 26 N.W.2d 777, 781 (Mich. 1947))); see also *Malkan v. Commissioner*, 54 T.C. 1305, 1314 n.3 (1970) (applying law of the situs to determine validity of gift of shares of stock).

In determining the validity of a gift, Michigan law requires a showing of (1) donor intent to make a gift; (2) actual or constructive delivery of the subject matter of the gift; and (3) donee acceptance.¹⁷ See *Davidson v. Bugbee*, 575 N.W.2d 574, 576 (Mich. Ct. App. 1997) (citing *Molenda v. Simonson*, 11 N.W.2d 835, 836 (Mich. 1943)); see also *United States v. Four Hundred Seventy Seven (477) Firearms*, 698 F. Supp. 2d 894, 902 (E.D. Mich. 2010) (applying Michigan law).

¹⁷ Petitioners alternatively direct us to Article 8 of the Uniform Commercial Code (UCC), as adopted by Michigan, which on its face is applicable to gift transfers of certificated securities. See Mich. Comp. Laws § 440.1201(2)(cc) (2015) (“Purchase’ means taking by sale, lease, discount, negotiation, mortgage, pledge, lien, security interest, issue or reissue, gift, or any other voluntary transaction creating an interest in property.” (Emphasis added.)); *id.* (dd); *id.* § 440.8301(1)(a) and (b) (delivery of certificated security occurs when purchaser or third party acting on their behalf “acquires possession of the security certificate”). While the Michigan Supreme Court

does not appear to have expressly addressed the issue, we do not read the UCC provisions as disturbing the longstanding Michigan common law test. See *id.* § 440.8302 cmt. 2 (“Article 8 does not determine whether a property interest in certificated or uncertificated security is acquired under other law, such as the law of gifts, trusts, or equitable remedies.”); *id.* § 440.1103(2) (stating that “principles of law and equity” supplement UCC provisions); see also *Young v. Young*, 393 S.E.2d 398, 401 (Va. 1990) (“The common law requirements of delivery and acceptance are not removed by those provisions of the [UCC] pertaining to the transfer of securities.”).

Petitioners and respondent each advance different dates for when petitioners made a gift to Fidelity Charitable of the CSTC shares. Petitioners argue that a gift was made on June 11, 2015, and they point to petitioner’s testimony and Fidelity Charitable’s corrected contribution confirmation letter, which both claim June 11 as the date of the gift. Respondent argues that a valid gift was not made until at least July 13, 2015, when Fidelity Charitable first received a stock certificate from petitioners’ representatives.¹⁸ We will examine each of three required elements for a valid gift in turn.

¹⁸ Respondent raises a separate issue with regard to the dividend paid out by CSTC on July 14 to petitioner and the two brothers, but not paid to Fidelity Charitable, speculating that petitioners did not make a valid gift of the shares. Respondent’s contention appears to be foreclosed by Michigan law, which provides that retention of a dividend does not preclude a valid gift of the underlying shares. See *Cook v. Fraser*, 299 N.W. 113, 114 (Mich. 1941) (citing *Ford v. Ford*, 259 N.W. 138 (Mich. 1935)); *In re Estate of Prinstein*, No. 252682, 2005 WL 1459575, at *1 (Mich. Ct. App. June 21, 2005) (“[T]he fact that a donor collects dividends on a security does not make an inter-vivos gift of that security invalid.”).

A. Present Intent

The determination of a party’s subjective intent at some historical point is necessarily a highly fact-bound issue. When deciding such an issue, we must determine “whether a witness’s testimony is credible based on objective facts, the reasonableness of the testimony, the consistency of statements made by the witness, and the demeanor of the witness.” *Ebert v. Commissioner*, T.C. Memo. 2015-5, at *5-6; see also *Estate of Kluener v. Commissioner*, 154 F.3d 630, 636 (6th Cir. 1998), *aff’d in relevant part* T.C. Memo. 1996-519. If contradicted by the objective facts in the record, we will not “accept the self-serving testimony of [the taxpayer]...as gospel.” *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986); see *Davis v. Commissioner*, 88 T.C. 122, 143 (1987), *aff’d*, 866 F.2d 852 (6th Cir. 1989).

We start with petitioner’s contemporaneous emails and the contemporaneous transactional documents, which we consider to be especially probative evidence with respect to his intent. On June 1, petitioner first expressed in an email that he wanted to wait to make the gift of the shares to Fidelity Charitable until the last possible moment, when he was “99% sure” that the sale to HCI would close. Petitioner’s subsequent actions and communications were consistent with that intent. On June 11, petitioner and his two brothers executed the Consent to Assignment agreement, an act that demonstrated petitioner’s generalized future intent to make a gift. However, the Consent to Assignment cannot establish that, as of June 11, such an intent was sufficiently present and specific. See *Czarski v. Bonk*, 124 F.3d 197, 1997 WL 535773, at *4 (6th Cir. 1997) (unpublished table decision) (applying Michigan law and finding no evidence

establishing purported donor's "specific intent" with respect to the particular property). On its face, the Consent to Assignment agreement failed to specify a number of shares to be contributed, suggesting that petitioner had not yet decided that key detail. Similarly, the original stock certificate, which was prepared on or sometime after June 11, failed to specify an effective date, again suggesting that a date would be decided upon later.¹⁹ On July 6, petitioner stated in an email that he was still "not totally sure of the shares being transferred to the charitable fund yet." That email confirms that, as of July 6, the details of the contribution were still in flux. Indeed, three days later, on July 9, Mr. Bear emailed Mr. Boland to inform him that "it looks like Scott has arrived at 1380 shares."

¹⁹ We note that copies of the Consent to Assignment agreement and stock certificate that were produced to the Commissioner during the examination appear to have been modified and backdated to specify, respectively, a number of shares and an effective date that were not originally present at the time of the transaction. We find such inconsistencies to be significant in evaluating petitioners' claim that the gift was made on June 11. *Cf. Ferguson v. Commissioner*, 174 F.3d 997, 1000 (9th Cir. 1999) (questioning purported date of contribution where "the original handwritten date in a printed box entitled 'date of donation'...had been completely scratched out" and a new date written next to it), *aff'g* 108 T.C. 244 (1997).

At trial, petitioner testified that he believed the number of shares to be donated was set at 1,380 on June 11. That testimony is squarely contradicted by the Consent to Assignment agreement, petitioner's July 6 email, and Mr. Bear's July 9 email. See, e.g., *Richardson v. Commissioner*, T.C. Memo. 1984-595, 49 T.C.M. (CCH) 67, 73-74 (concluding that taxpayer's characterization of date of contribution was not credible where in conflict with "documents written contemporaneously with the donation"). Petitioner also testified that his July 6 email was referring to a potential donation of a second tranche of shares, a theoretical event which apparently never took place. The record contains no evidence supporting the claim that petitioners attempted to make (or even contemplated) two separate gifts of CSTC shares. We find petitioner's self-serving testimony as to his intent to be incredible.

The record does not support a finding of present intent to make a gift until July 9 when petitioner settled on a number of 1,380 shares. From that point on, petitioner took a number of actions that confirmed his present intent to transfer. On July 9 or 10 petitioner delivered the physical stock certificate to Ms. Kanski's office. Similarly, on July 10 petitioner created an online giving account with Fidelity Charitable. Taken together, these actions provide sufficient credible evidence of petitioner's intent. We conclude that, as of July 9, petitioner had present intent to make a gift.

B. Delivery

At bottom, the delivery requirement generally contemplates an "open and visible change of possession" of the donated property. *Shepard v. Shepard*, 129 N.W. 201, 208 (Mich. 1910); *Davis v. Zimmerman*, 40 Mich. 24, 27 (1879). As the term itself suggests, manually providing tangible property to the donee is the classic form of delivery. See, e.g., Restatement (Second) of Property § 31.1 cmt. b (Am. L. Inst. 1992) (describing the "simplest" form of delivery as the donor's "plac[ing] the subject matter of the gift in the hands of the intended donee"). Similarly, manually providing to the donee a stock certificate that represents intangible shares of stock is traditionally sufficient delivery. See Philip Mechem, Gifts of Corporation Shares, 20 Ill. L. Rev. 9, 15-16 (1925-1926)

(collecting cases). However, the determination of what constitutes delivery is inherently context-specific and depends upon the “nature of the subject-matter of the gift” and the “situation and circumstances of the parties.” *Shepard*, 129 N.W. at 208 (“[N]o absolute rule can be laid down as to what will constitute a sufficient delivery....”).

Delivery need not necessarily be actual. Constructive delivery may be effected where property is delivered into the possession of another on behalf of the donee. *See, e.g., In re Van Wormer's Estate*, 238 N.W. 210, 212 (Mich. 1931) (finding constructive delivery where stock certificate was issued in the name of donee and deposited at bank). Whether constructive or actual, delivery “must be unconditional and must place the property within the dominion and control of the donee” and “beyond the power of recall by the donor.” *In re Casey Estate*, 856 N.W.2d 556, 563 (Mich. Ct. App. 2014) (citing *Osius v. Dingell*, 134 N.W.2d 657, 659 (Mich. 1965)); *see Geisel v. Burg*, 276 N.W. 904, 908 (Mich. 1937) (finding no valid gift where certificates of deposit were never placed beyond donor’s control). If constructive or actual delivery of the gift property occurs, its later retention by the donor is not sufficient to defeat the gift. *See Estate of Morris v. Morris*, No. 336304, 2018 WL 2024582, at *5 (Mich. Ct. App. May 1, 2018) (citing *Jackman v. Jackman*, 260 N.W. 769, 770 (Mich. 1935)); *see also Garrison v. Union Tr. Co.*, 129 N.W. 691, 692 (Mich. 1911).

With respect to delivery, neither Mr. Hoensheid nor Ms. Kanski was able to credibly identify a specific action taken on June 11 that placed the shares within Fidelity Charitable’s dominion and control.²⁰ *See Czarski*, 1997 WL 535773, at *4 (finding no evidence that donor took any action that would constitute delivery or place gift property in donee’s dominion and control); *see also Reed Smith Shaw & McClay v. Commissioner*, T.C. Memo. 1998-64, 1998 WL 62393, at *8 (declining to credit uncorroborated self-serving testimony regarding actions purportedly taken to effect transfer of shares to trust). Instead, petitioner’s and Ms. Kanski’s trial testimony suggested that the physical, partially completed stock certificate remained on petitioner’s desk until July 9 or 10, 2015, at which point it was dropped off at Ms. Kanski’s office. Consequently, delivery to Fidelity Charitable could not have taken place before July 9 or 10, because petitioner retained dominion and control of the shares while the physical certificate was sitting on his desk. *Cf. In re Casey Estate*, 856 N.W.2d at 563 (finding no delivery where donor retained property in his safe and could thus change the combination at any time to preclude access by purported donee).

²⁰ In his testimony, petitioner implied a belief that the execution of the Consent to Assignment agreement had effected a transfer. Execution of the Consent to Assignment agreement did not purport to transfer ownership of any portion of petitioner’s shares; instead, it merely allowed him the ability to transfer shares in the future.

The same principle is applicable to the three or four days when the physical certificate was in Ms. Kanski’s office, before the forwarding of the PDF share certificate to Fidelity Charitable. The Minority Stock Purchase Agreement’s seller representative clause, as executed, named Ms. Kanski’s firm, Clark Hill, as the seller’s representative of Fidelity Charitable. That designation raises the question of whether Ms. Kanski’s possession of the certificate constituted delivery to Fidelity Charitable. However, we cannot conclude that providing the certificate to Ms. Kanski removed the shares from petitioner’s power of recall. Petitioners have not provided any evidence to indicate that Ms. Kanski could have disregarded an instruction from petitioner - her client - to return or simply discard the

stock certificate before July 13. See *Osius*, 134 N.W.2d at 656 (stating that a valid gift “must invest ownership in the donee beyond the power of recall by the donor”); *Snyder v. Snyder*, 92 N.W. 353, 354 (Mich. 1902) (“The retaining of any control in the hands of the donor over the subject of the gift renders it invalid.”); see also *Londen v. Commissioner*, 45 T.C. 106, 109 (1965) (finding it “unlikely” that corporation’s secretary “would have refused to honor a countermand of the transfer instructions issued by [the taxpayer]”); *Morrison v. Commissioner*, T.C. Memo. 1987-112, 53 T.C.M. (CCH) 251, 255 (finding no evidence that if taxpayer had “countermanded her instructions to transfer the stock, [her broker] would have refused to halt the transfer”). Thus, we conclude that the stock certificate, while in the possession of Ms. Kanski, was subject to recall by petitioner at any time and was not within the dominion and control of Fidelity Charitable, precluding delivery. See *Londen*, 45 T.C. at 109; *Zipp v. Commissioner*, 28 T.C. 314, 324-25 (1957) (finding retention of stock certificates by donor’s attorney to preclude a valid gift), *aff’d*, 259 F.2d 119 (6th Cir. 1958); *Bucholz v. Commissioner*, 13 T.C. 201, 204 (1949) (finding no valid gift where taxpayer instructed custodian of corporate books to prepare stock certificates but remained undecided about ultimate gift).

In some jurisdictions, transfer of shares on the books of the corporation can, in certain circumstances, constitute delivery of an inter vivos gift of shares. See, e.g., *Wilmington Tr. Co. v. Gen. Motors Corp.*, 51 A.2d 584, 594 (Del. Ch. 1947); *Chi. Title & Tr. Co. v. Ward*, 163 N.E. 319, 322 (Ill. 1928); *Brewster v. Brewster*, 114 A.2d 53, 57 (Md. 1955). However, the Michigan Supreme Court does not appear to have addressed whether transfer on the books of a corporation alone can constitute delivery of a valid gift of certificated shares of stock. In several older tax cases, the U.S. Court of Appeals for the Sixth Circuit - to which an appeal in this case would lie, absent stipulation to the contrary - has stated that transfer on the books of a corporation constitutes delivery of shares of stock, apparently as a matter of federal common law. See *Lawton v. Commissioner*, 164 F.2d 380, 384 (6th Cir. 1947), *rev’g* 6 T.C. 1093 (1946); *Bardach v. Commissioner*, 90 F.2d 323, 326 (6th Cir. 1937), *rev’g* 32 B.T.A. 517 (1935); *Marshall v. Commissioner*, 57 F.2d 633, 634 (6th Cir. 1932), *aff’g in part, rev’g in part* 19 B.T.A. 1260 (1930). We have previously observed that, in this line of cases, the transfers on the books of the corporation were bolstered by other objective actions that evidenced a change in possession and thus a gift. See *Jolly’s Motor Livery Co. v. Commissioner*, T.C. Memo. 1957-231, 16 T.C.M. (CCH) 1048, 1073 (distinguishing *Bardach* and *Marshall* and instead concluding that taxpayer failed to make a valid gift under Tennessee law); see also *Bucholz*, 13 T.C. at 204; *Campbell v. Commissioner*, T.C. Memo. 1979-411, 39 T.C.M. (CCH) 287, 289. We would thus be hesitant to conclude that transfer on the books of CSTC would be sufficient here as a matter of law, given the apparent split of authorities on the issue and lack of state law precedent. See Fletcher Cyclopedia of the Law of Corporations § 5684 (West 2022) (“Generally, a transfer of stock from the donor to the donee on the corporate books, standing alone, is not sufficient to constitute a valid gift, at least with regard to a close corporation where the donor is in control[.]”); Mark S. Rhodes, Transfer of Stock § 6:3 (7th ed. 2021) (“There is a division of authority as to whether a mere transfer on the books of the corporation without delivery of the certificate constitutes a valid gift of stock.”); Mechem, Gifts of Corporation Shares, *supra*, at 25-26 (describing view that transfer on the books of the corporation effects only the relationship between new shareholder and corporation, while delivery of certificate separately transfers ownership of shares as property between persons).

However, even assuming *arguendo* that a transfer on the corporate books is sufficient to constitute delivery of certificated shares of stock in Michigan, we are still unable to find

on the record before us that such a transfer occurred. The primary relevant evidence produced by petitioners is the printout of a purported stock ledger. The printout, which has a report date of July 13, shows an entry issuing 1,380 shares to Fidelity Charitable on July 10. At trial, however, petitioner testified that the printout was not from CSTC's official stock ledger but appeared to him instead to have been prepared by one of CSTC's attorneys. Indeed, petitioners themselves have at no point asserted that a gift occurred on July 10 and have not produced any evidence to corroborate such a transfer on the books of CSTC. We thus attribute little weight to the printout, given petitioners' failure to corroborate it with credible evidence. See *Sellers v. Commissioner*, T.C. Memo. 1977-70, 36 T.C.M. (CCH) 305, 312 (observing that self-serving corporate records are relevant evidence but "the weight to be accorded them is dependent upon their completeness and credibility"), *aff'd*, 592 F.2d 227 (4th Cir. 1979). Consequently, the record is insufficient to support a conclusion that delivery of the shares was made on July 10 via transfer on the books of CSTC.

Finally, we look to Mr. Bear's July 13 email of the PDF stock certificate to Fidelity Charitable. That email provides the strongest documentary evidence of the shares' leaving petitioner's dominion and control. Providing Fidelity Charitable with a copy of a stock certificate issued in its name was an objective act evidencing an "open and visible change of possession." *Shepard*, 129 N.W. at 208. Further, we find that this act placed the shares of CSTC in Fidelity Charitable's dominion and control, by providing Fidelity Charitable with an instrument that it could present to CSTC and exercise its rights as shareholder. Nor did any postdelivery retention by petitioner of a stock certificate render delivery ineffectual. See *id.* (stating that donor's postdelivery retention of stock certificates was "immaterial" to validity of gift). On the basis of the foregoing, we conclude that delivery of the shares of CSTC did not occur before July 13.

C. Acceptance

Donee acceptance of a gift is generally "presumed if the gift is beneficial to the donee." *Davidson*, 575 N.W.2d at 576; see *Osius*, 134 N.W.2d at 660; *Dunlap v. Dunlap*, 53 N.W. 788, 790 (Mich. 1892) ("The donation being for [the donees'] advantage, they will be deemed to have accepted it, unless the contrary appears."). Petitioners seek to reinforce that presumption by relying on the corrected contribution confirmation letter and yearend account statement from Fidelity Charitable, both of which stated that the shares were contributed (and thus presumably accepted by Fidelity Charitable) on June 11. Both Fidelity Charitable's guidelines and the year end account statement note that donors are able to request corrections of both contribution confirmation letters and account statements. Petitioners did not produce a copy of the original contribution confirmation letter, dated July 15, 2015, that they received from Fidelity Charitable. Such evidence could have confirmed whether Fidelity Charitable consistently understood the date of contribution to be June 11 and what errors were present in the original letter. Petitioners' failure to produce such evidence within their control gives rise to a presumption that it would be unfavorable to their case. See *Wichita Terminal Elevator Co. v. Commissioner*, 6 T.C. 1158, 1165 (1946), *aff'd*, 162 F.2d 513 (10th Cir. 1947). Given our conclusions above that neither the present intent nor the delivery requirement was met on June 11, we do not consider the corrected documentation from Fidelity Charitable to be reliable evidence with respect to the date of acceptance.

In contrast, Mr. Boland's July 13 email is the more convincing evidence and rebuts any presumption that acceptance took place on an earlier date. In that email Mr. Boland

represented that he would need the stock certificate before he could take action with respect to the sale of shares to HCI. As Mr. Boland later testified, Fidelity Charitable typically required receipt of a stock certificate as a precondition to its acceptance of a gift when dealing with a contribution of closely held, certificated securities. Later on July 13, after receiving the stock certificate, Mr. Boland on behalf of Fidelity Charitable executed the Minority Stock Purchase Agreement under warranty of good title. That act is sufficient to establish acceptance by Fidelity Charitable. We conclude that acceptance occurred on July 13.

D. Conclusion

Petitioners have failed to establish that any of the elements of a valid gift was present on June 11, 2015. Instead, as a matter of state law, we find that petitioners made a valid gift of CSTC shares by effecting delivery on July 13. We thus conclude that petitioners divested themselves of title to the shares on July 13. See *Humacid Co.*, 42 T.C. at 913.

As is described in part II.Q.6.e Assignment of Income on Property Being Sold, the court in this case viewed the donor as holding and controlling the stock until all necessary steps to prepare for the sale had been completed, making signatures at closing a meaningless formality.

This uncertainty regarding gifts is less likely to occur when transferring an interest in a partnership or LLC than when transferring stock. Usually the partnership/operating agreement and applicable state law impose specific requirements regarding the transfer of the economic interest (which may require consent of other owners), admission as a partner/member (which may require consent of other owners), and the donee's acceptance of the terms of the partnership/operating agreement.

II.Q.6.f.ii. Forced Sale to Related Party for Note

CCA 201507018 disallowed a deduction of a partnership interest (referred to as Units) that the charitable organization immediately sold for a note to a related party for a note:

In the present case, Partner has claimed a deduction under § 170 for a donation of Units to Organization. However, after Transaction, and within a day of Partner's assignment of Units to Organization, Organization does not hold any rights to Units. Organization holds Note. Further, Partner, through Partner's power to approve of Partnership distributions to Corp, controls when in fact interest payments will be made on Note. Had Partner or Corp contributed Note directly to Organization, a deduction under § 170 would not be allowed because payment of the donation would not have been made within the year and, under Rev. Rul. 68-174, Note would have been treated as a promise to make a donation, but not an actual donation....

Under the terms of the Partnership Agreement, Organization is required to surrender its right as an assignee of Units to Partner on Partner's terms. Further, under the Partnership Agreement, Organization had to obtain the approval of Partner to transfer its interest in Units. Partner, in Partner's sole discretion, could approve or disapprove any transfer. Partner, in exercising this discretion, had no fiduciary duty at the time of Transaction to Organization. If Organization attempted to transfer its interest in Units to a third party, Partner had the power to nullify the transfer. Further, the Special Call Price would become active and the call price provision limits the call price to Organization's contributions which are zero. Accordingly, Partner had the power to nullify the donation

to Organization if Organization attempted to transfer its interest in Units without Partner's approval. Further, Organization could not retain its interest in Units without violating its representations to the Service that it would not hold an interest in a Partnership with nonexempt taxpayers. Partnership could call Organization's interest in Units at any time. Based on the above elements of Transaction, Organization was essentially compelled to engage in Transaction.

A possibly required forced sale for a bargain price also violated the S corporation prohibition on a second class of stock.⁴⁷⁷⁰

However, when one donates property to charity and buys it back because the donor very much wanted the property and the charity very much needs cash, the sale is not considered

⁴⁷⁷⁰ See text accompanying and preceding fn 289 in part II.A.2.i.ix Warrants Designed to Restore Original Shareholders' Equity Position.

forced.⁴⁷⁷¹ Even if the charity is required sign a right-of-first-refusal⁴⁷⁷² in connection with the donated stock that pays no dividends,⁴⁷⁷³ the donor-controlled corporation's redemption of the donated stock is not concerned forced.⁴⁷⁷⁴

⁴⁷⁷¹ *DeWitt v. U.S.*, 204 Ct.Cl. 274 (1974), discussed in fn 4768, was along these lines, following *Sheppard v. United States*, 176 Ct.Cl. 244, 252, 361 F.2d 972, 976 (1965), which upheld a donation, involved the following:

On June 16, 1959, plaintiff carried out his plan. He wrote letters to the Sisters and to the University offering to each, as a gift absolute, one-third of his right, title, and interest in Star's Pride, which he described as a one-sixth interest in the horse with a current market value of \$50,000. He attached no conditions or obligations to these offers. However, on the same day, in the case of the University, and on the following day, in the case of the Sisters, he sent each donee a letter from The Farms, signed by him as president, by which The Farms offered to purchase the interest of each donee for the sum of \$50,000. Each letter contained a paragraph advising that, if the offer was found acceptable, the proper officers of the respective donees should execute and return an enclosed form of bill of sale, upon receipt of which The Farms would make immediate payment.... On June 17 each donee accepted The Farms' offer, executed and delivered the bill of sale, and later received payment from The Farms in due course. As the recited facts demonstrate, the record is clear that neither donee acted under any legal obligation, express or implied, to accept The Farms' offer of purchase as a condition to accepting plaintiff's gift. However, neither donee "looked the gift horse in the mouth." They made no independent investigation of the value or earnings potential of Star's Pride, nor did they solicit offers from any other sources. Instead, they relied implicitly on plaintiff's integrity and international reputation for expertise in the field of standardbred horses.

As for plaintiff, he had no real doubt that, despite the absence of any prior commitment by the charities, The Farms would be able to acquire the donated interests for cash. He was aware that, because of their construction programs, they wanted money, not an interest in a breeding stallion. He was also aware that, once the interest was beyond his effective control, there was a possibility that either donee (particularly the University) might shop around for a better offer from other persons interested in standardbred horses. He was willing to assume that risk, however, because he was ready to have The Farms outbid any possible competitor.

On June 17, plaintiff also sold his own remaining one-sixth interest in Star's Pride to The Farms for \$50,000 and reported the same on his 1959 income tax return as capital gain. On the same return he claimed a charitable contribution deduction of \$50,000 for his gift to the Sisters and a like deduction for his gift to the University. The Commissioner of Internal Revenue disallowed both deductions in their entirety as not being valid gifts.

The court held:

The proof is clear and convincing that there were no prearrangements or commitments entered into between taxpayer and the two charities, nor did he place any conditions upon, or tie any strings to, his gifts. Legally speaking, the charities were as free to deal with their donated interests as any other owner would be. As a matter of fact, the Mother Superior testified that the Academy would have sold to someone else had the bid price been higher, after Mr. Sheppard had been notified. She testified she relied on his judgment in the matter and felt she owed him, as the donor of the gift, this respect.

Indeed, the defendant does not appear to controvert this, but it points vigorously to the taxpayer's candid testimony to the effect that, in his own mind, he felt confident The Farms' offer to purchase the interests from the charities would be accepted by them. That the reasoning which led him to this unilateral conviction was entirely sound is perhaps best demonstrated by the alacrity with which both charities accepted The Farms' offer.

The fact remains, despite defendant's refusal to face it, that following the gifts there was a period of time, albeit short in duration, when plaintiff had lost control of two-thirds of his interest in Star's Pride. During that period he was exposed to the possibility, however remote he might have

considered it, that The Farms might not succeed in purchasing the donated interests short of increasing the amount of its offers....

The court is not unmindful of the tax benefits which flow from affording full recognition to the plaintiff's admittedly tax-motivated transactions in this case. Such motivation demands special analysis and scrutiny, but its presence is essentially immaterial except as an eye-opening mechanism or interpreter of equivocal conduct. [footnote omitted]

⁴⁷⁷² *Grove v. Commissioner*, 490 F.2d 241 (2nd Cir. 1973), described the right-of-first-refusal:

RPI agreed not to "sell, transfer, give, pledge or hypothecate, or in any way dispose of the whole or any part of the common stock of the Corporation now or hereafter owned ... until [RPI] shall have first offered the Corporation the opportunity to purchase said shares upon the terms and conditions hereinafter provided." The redemption price was established at book value of the shares as noted on the Corporation's most recent certified financial statement prior to the offer. Pursuant to the contract, the Corporation was "entitled (but not obligated) to purchase all or any part of the shares of stock so offered." If the Corporation did not exercise its option to purchase within sixty days, RPI could transfer the shares to any other party and the Corporation's right of first refusal would not subsequently attach to such transferred shares.³

³ Other minority shareholders of the Corporation signed similar agreements, which, in effect put in writing the Corporation's practice of redeeming, when financial conditions permitted, any minority-owner shares offered to it, for example, by a departing employee or a deceased employee's widow.

⁴⁷⁷³ *Grove v. Commissioner*, 490 F.2d 241 (2nd Cir. 1973), explained:

The Corporation's business is building airfields, highways, tunnels, canals, and other similar heavy construction projects in both the United States and foreign countries. These projects usually involve the investment of large sums of money over an extended period of time and involve a high degree of risk. Since, in this industry, contract payments normally are made only after specified levels of progress are achieved, a firm must always commit substantial amounts of its own funds, whether borrowed or internally generated, to a project. Moreover, a company can determine an acceptable contract price based only on its best estimate of the cost to complete the project. A bad "guess" or unforeseen contingency may require a firm to complete a project while incurring a loss. Not surprisingly, the mortality rate in this industry is high. To protect against such adverse developments, successful firms seek to maintain liquidity by holding ample cash or other assets easily converted to cash. One method of conserving cash, adopted by the Corporation, is to retain all earnings and refrain from paying dividends.

⁴⁷⁷⁴ Affirming *Grove v. Commissioner*, T.C. Memo. 1972-98, in a 2-to-1 decision the Second Circuit, 490 F.2d 241 (1973), allowed a charitable deduction for a deduction for stock in exchange for a charitable gift annuity, citing *Behrend v. United States*, ___ F.2d ___ (4th Cir. 1972), holding:

Grove, of course, owned a substantial majority of the Corporation's shares. His vote alone was sufficient to insure redemption of any shares offered by RPI. But such considerations, without more, are insufficient to permit the Commissioner to ride roughshod over the actual understanding found by the Tax Court to exist between the donor and the donee....

Nothing in the December, 1954, minority shareholder agreement between the Corporation and RPI serves as a basis for disturbing the conclusion of the Tax Court. Although the Corporation desired a right of first refusal [on minority shares—understandably so, in order to reduce the possibility of unrelated, outside ownership interests—it assumed no obligation to redeem any shares so offered. In the absence of such an obligation, the Commissioner's contention that Grove's initial donation was only the first step in a prearranged series of transactions is little more than wishful thinking grounded in a shaky foundation. See *Carrington v. Commissioner of Internal Revenue*, *supra*, at ___; *Behrend*, *supra*, at ___, 73-1 USTC ¶9123 at 80,067; *Sheppard v. United States*, *supra*, at 978; *Robert L. Fox*, 27 TCM 1001, 1013 (1968).

We are not so naive as to believe that tax considerations played no role in Grove's planning. But foresight and planning do not transform a non-taxable event into one that is taxable. Were we to adopt the Commissioner's view, we would be required to recast two actual transactions—a gift by Grove to RPI and a redemption from RPI by the Corporation—into two completely fictional transactions—a redemption from Grove by the Corporation and a gift by Grove to RPI. Based upon the facts as found by the Tax Court, we can discover no basis for elevating the Commissioner's "form" over that employed by the taxpayer in good faith.

II.Q.6.f.iii. Charitable Partial Interest Prohibition

Generally, if a taxpayer contributes less than the taxpayer's entire interest in such property, for individual income tax purposes⁴⁷⁷⁵ a charitable income⁴⁷⁷⁶ tax deduction is allowed only to the extent that the value of the interest contributed would be allowable as a deduction if that interest had been transferred in trust:

- This rule does not apply if the donation is of "the taxpayer's entire interest in the property, such as an income interest or a remainder interest."⁴⁷⁷⁷
- However, if "the property in which such partial interest exists was divided in order to create such interest and thus avoid" the partial interest prohibition, the deduction is not allowed.⁴⁷⁷⁸ Where the creation of the partial interest was 4 years before the charitable gift and was for reasons unrelated to a future charitable gift, the deduction is allowed.⁴⁷⁷⁹

⁴⁷⁷⁵ This provision applies for purposes of Code § 170, which is contributions deducted on a personal income tax return (including contributions through an S corporation or a partnership). It does not apply for the fiduciary income tax deduction under Code § 642(c); see part II.J.4.c Charitable Distributions. However, if and to the extent that the trust has unrelated business taxable income, Code § 170 would apply to calculate the percentage limitations of the deduction; I have not formed an opinion on whether the UBTI rules makes the charitable partial interest prohibition not apply for income tax purposes. See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 4953-4959. See also part II.Q.6.d Unrelated Business Taxable Income.

⁴⁷⁷⁶ Code § 170(f)(3)(A). However, Code § 170(f)(3)(B) excludes from this rule a contribution of a remainder interest in a personal residence or farm, a contribution of an undivided portion of the taxpayer's entire interest in property, and a qualified conservation contribution.

⁴⁷⁷⁷ Reg. § 1.170A-7(a)(2)(i), which further provides:

Thus, if securities are given to A for life, with the remainder over to B, and B makes a charitable contribution of his remainder interest to an organization described in section 170(c), a deduction is allowed under section 170 for the present value of B's remainder interest in the securities.

⁴⁷⁷⁸ Reg. § 1.170A-7(a)(2)(i), which further provides:

Thus, for example, assume that a taxpayer desires to contribute to a charitable organization an income interest in property held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer transfers the remainder interest in such property to his son and immediately thereafter contributes the income interest to a charitable organization, no deduction shall be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the retained income interest. In further illustration, assume that a taxpayer desires to contribute to a charitable organization the reversionary interest in certain stocks and bonds held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer grants a life estate in such property to his son and immediately thereafter contributes the reversionary interest to a charitable organization, no deduction will be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the reversionary interest.

⁴⁷⁷⁹ In allowing a deduction for gifts made in 1975, Rev. Rul. 76-523 reasoned:

In the instant case, the 1960 trusts were set up long before the revision of section 170 of the Code by the enactment of the Tax Reform Act of 1969. Thus, the taxpayers' purpose in setting up these trusts could not have been the avoidance of the provisions of section 170(f)(3)(A). Further, in view of all of the above circumstances, the taxpayer's purpose in setting up the 1971 trust was not the avoidance of the provisions of section 170(f)(3)(A), but to provide financial security to an old friend and valued former employee, while insuring their future financial security and protecting their interests in the family corporation from outside incursions. Only when these concerns were no longer relevant, because of the merger of the family corporation, did the taxpayers donate their remainder interests, which were their entire interests, to a charitable organization.

- On the other hand, the partial interest prohibition does not apply to a contribution of a partial interest in property if the contribution constitutes part of a charitable contribution not in trust in which all interests of the taxpayer in the property are given to a charitable organization.⁴⁷⁸⁰
- Nor does it apply “merely because the interest which passes to, or is vested in, the charity may be defeated by the performance of some act or the happening of some event, if on the date of the gift it appears that the possibility that such act or event will occur is so remote as to be negligible.”⁴⁷⁸¹
- Also, the prohibition does not apply to an undivided portion of a donor’s entire interest in property, which “must consist of a fraction or percentage of each and every substantial interest or right owned by the donor in such property and must extend over the entire term of the donor’s interest in such property and in other property into which such property is converted.”⁴⁷⁸²

⁴⁷⁸⁰ Reg. § 1.170A-7(a)(2)(ii), which continues:

Thus, if on March 1, 1971, an income interest in property is given not in trust to a church and the remainder interest in the property is given not in trust to an educational organization described in section 170(b)(1)(A), a deduction is allowed for the value of such property.

⁴⁷⁸¹ Reg. § 1.170A-7(a)(3), referring to Reg § 1.170A-1(e), which is reproduced in fn. 4769, found in part II.Q.6.f.i Completed Gift Requirement.

⁴⁷⁸² Reg. § 1.170A-7(b)(1)(i).

Although the preceding bullet points describe income tax rules, similar rules apply for gift tax⁴⁷⁸³ and estate tax⁴⁷⁸⁴ purposes, except that, where the initial division results in an interest being transferred to a noncharitable person, any later contribution of the donor's entire remaining interest in the property "will not be considered the donor's entire interest in the property" for estate and gift tax purposes.⁴⁷⁸⁵ Donating 20% of the taxpayer's unitrust interest in a charitable remainder trust six years after the trust's formation did not trigger the partial interest prohibition.⁴⁷⁸⁶ Donating all of one's annuity interest in a charitable remainder annuity trust did not violate the prohibition,⁴⁷⁸⁷ nor did donating all of one's unitrust in a charitable remainder unitrust trust.⁴⁷⁸⁸

Rev. Rul. 76-143 held that the partial interest prohibition denied charitable deductions when the taxpayer donated the cash surrender value and retained the right to the death benefit, even if all

⁴⁷⁸³ Code § 2522(c)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 4776; see Reg. § 25.2522(c)-3(c).

⁴⁷⁸⁴ Code § 2055(e)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 4776; see Reg. § 20.2055-2(e)(2). Code § 2055(e)(3) may allow a post-mortem reformation.

⁴⁷⁸⁵ Reg. §§ 25.2522(c)-3(c)(2)(i) and 20.2055-2(e)(2)(i). The former illustrates this rule:

For example, if the donor gave a life estate in an office building to his wife for her life and retained a reversionary interest in the office building, the gift by the donor of one-half of that reversionary interest to charity while his wife is still alive will not be considered the transfer of a deductible interest; because an interest in the same property has already passed from the donor for private purposes, the reversionary interest will not be considered the donor's entire interest in the property. If, on the other hand, the donor had been given a life estate in Blackacre for the life of his wife and the donor had no other interest in Blackacre on or before the time of gift, the gift by the donor of one-half of that life estate to charity would be considered the transfer of a deductible interest; because the life estate would be considered the donor's entire interest in the property, the gift would be of an undivided portion of such entire interest.

⁴⁷⁸⁶ Letter Ruling 9550026 involved a joint-and-survivor net-income charitable remainder unitrust. The transaction involved the following steps:

- (a) Taxpayer A will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer A disclaims his contingent right to receive Taxpayer B's unitrust interest after Taxpayer B's death. Taxpayer B will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer B disclaims her contingent right to receive Taxpayer A's unitrust interest after Taxpayer A's death.
- (b) Taxpayers will make a gift of a twenty percent undivided interest in the Unitrust Payment to University, by execution and delivery of an irrevocable assignment valid under State A law.
- (c) The income interest in Trust which University receives in this gift will merge with its remainder interest in Trust, leaving University with a twenty percent undivided interest in the entire trust and an eighty percent undivided interest in the remainder of the trust.
- (d) Taxpayers and University will consent to the partial termination of Trust in their respective capacities as grantors and beneficiaries so that all of the grantors and beneficiaries will have consented to termination of twenty percent of the trust.
- (e) The trustee of Trust will distribute to University twenty percent of the trust assets. The distributed assets will be fairly representative of the relative bases of the various assets in the trust. The trustee will continue to hold the balance of the Trust assets in accordance with the terms of the trust.

The ruling concluded:

- (1) Taxpayers will be entitled to an income tax deduction under section 170 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.
- (2) Taxpayers will be entitled to a gift tax deduction under section 2522 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.

of the rights were fixed (including making the beneficiary designation irrevocable). The denial applied whether the cash value was fully paid⁴⁷⁸⁹ or was for cash value build-up due to the current year's premium.⁴⁷⁹⁰ Now, Code § 170(f)(10) also prohibits various split-dollar and similar arrangements from qualifying for the charitable deduction.

- (3) The value of Taxpayers' gift under sections 170 and 2522 of the Code will be the present value of the right to receive annual payments equal to nine percent of the value of twenty percent of the Trust assets determined annually for a term starting on the date of the transfer of the gift to University and ending on the date of death of the survivor of Taxpayers.
- (4) The gift of the undivided part interest in Trust will not cause the trust to cease to be a trust described in 664(d)(2) of the Code.
- (5) To the extent that in prior years, Trust had capital gain income, and that income was not realized or included in the income of Taxpayers, such capital gain shall not be included in the income of, or realized by, Taxpayers solely because of the transfer of the undivided interest in the Unitrust Payment to University.

⁴⁷⁸⁷ Rev. Rul. 86-60 involved the following facts:

Situation 1. In 1980, A created a charitable remainder annuity trust (hereinafter, CRAT) described in section 664(d)(1) of the Code. A retained the annuity interest in the trust for life. The remainder beneficiary was X, a charitable organization described in sections 170(c) and 2522(a). In 1984 A transferred the annuity interest in the trust to X.

Situation 2. In 1980, A created a CRAT described in section 664(d)(1) of the Code. The trust instrument provides that the trustee shall pay the annuity amount annually to A for life and upon A's death to B, the successive life interest beneficiary, for such time as B survives. Upon the death of the survivor of A and B, the corpus is to be distributed to X, a charitable organization that meets the requirements of sections 170(c) and 2522(a). In 1984, A and B assigned their interests in the trust to the charitable remainder beneficiary.

No property interests were created for the purpose of avoiding the rules of section 170(f)(2) and (f)(3)(A).

The ruling held:

In *Situation 1*, the gift by A, the grantor, to the remainder beneficiary of A's retained life annuity interest in a charitable remainder annuity trust qualifies for an income tax charitable deduction under section 170 of the Code and a gift tax charitable deduction under section 2522.

In *Situation 2*, where A has created a charitable remainder annuity trust with life annuity interest to A and survivor life annuity interest to B, the gifts by A and B of their life annuity interests in the trust to the charitable remainder beneficiary qualify for an income tax charitable deduction and a gift tax charitable deduction. A's gift of the life annuity, however, qualified for the gift tax charitable deduction only because the interest that was transferred was in one of the forms set out in section 25.2522(c)-3(c)(2) of the regulations.

⁴⁷⁸⁸ Letter Ruling 9721014, citing Rev. Rul. 86-60. However, "X and Y represent that when Trust was created in 1986, there was no intention to divide the income and remainder interests in order to avoid the partial interest rules in section 170(f)." With a representation like that, I don't understand what the ruling accomplished.

⁴⁷⁸⁹ The ruling reasoned:

In *Situation 1*, the gift made by the taxpayer of the right to the cash surrender value of the policy was a gift of less than an entire interest in the property. Furthermore, a gift of this kind is not a gift of a fraction or percentage of each and every substantial interest owned by the donor in such property since the taxpayer retained the right to designate the beneficiary. Even if the taxpayer irrevocably designated the beneficiary prior to making the gift in order to create a remainder interest that would then constitute the taxpayer's entire interest in the property, such division would be regarded as having been made to avoid section 170(f)(3)(A) of the Code and the deduction would not be allowed.

⁴⁷⁹⁰ The ruling reasoned:

Before we delve further into what violates the partial interest prohibition, let's consider the consequences other than denying the charitable deduction. *Keefe v. U.S.*, 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022), reasoned:

“The assignment of income doctrine holds that one who earns income cannot escape tax upon the income by assigning it to another.” *Caruth Corp. v. United States*, 865 F.2d 644, 648 (5th Cir. 1989). Instead, “if one, entitled to receive [income] at a future date...makes a grant of it by anticipatory assignment, he realizes taxable income as if he had collected [it]...and then paid it over.” *Id.* (quoting *Comm’r v. P.G. Lake, Inc.*, 356 U.S. 260, 267 (1958)). “Ultimately, the question is whether the taxpayer himself ever earned income, or whether it was earned instead by the assignee,” or, in the terms of Justice Holmes’s famous metaphor for this doctrine (set out in *Lucas v. Earl*, 281 U.S. 111, 115 (1930)), “whether the fruit has been attributed to a different tree, or whether instead the entire tree has been transplanted.” *Id.* at 649.

Applied to a taxpayer’s gift of “earnings derived from an income-producing asset, the crucial question is whether the asset itself, or merely the income from it, has been transferred.” *Id.* at 648. “If the taxpayer gives away the entire asset, with accrued earnings, the assignment of income doctrine does not apply.” *Id.* at 648-49 (first citing *Blair v. Comm’r*, 300 U.S. 5, 14 (1937); and then citing *United States v. Ga. R.R. & Banking Co.*, 348 F.2d 278, 285 (5th Cir. 1965)). But, it does apply “[i]f the taxpayer carves income or a partial interest out of the [granted] asset, and retains something for himself.” *Id.* at 649 (quoting *P & G Lake*, 356 U.S. at 265 & n. 5).

“Per *Humacid Co. v. Commissioner*, 42 T.C. 894, 913 (1964), [courts will] respect the form of [a donation of appreciated stock shares] if the donor (1) gives the property away absolutely and parts with title thereto (2) before the property gives rise to income by way of a sale.” *Dickinson v. Comm’r*, 2020 WL 5249242, at *3 (T.C. Sept. 3, 2020) (first citing *Grove v. Comm’r*, 490 F.2d 241, 246 (2d Cir. 1973); then citing *Carrington v. Comm’r*, 476 F.2d 704, 708 (5th Cir. 1973); then citing *Behrend v. United States*, 1972 WL 2627, at *3 (4th Cir. 1972); and then citing *Rauenhorst v. Comm’r*, 119 T.C. 157, 162–163 (2002)).

Keefe v. U.S., 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022),⁴⁷⁹¹ held:

Based on this evidence, the Court finds that no genuine issue of material fact exists as to whether the Keefers carved out a portion of the 4% partnership interest before donating it to Pi. They did. After the assignment, Pi did not have the right that other partners had to share in a distribution of Available Cash Flow as described in the Partnership Agreement, but only had a right to share in the net proceeds of the Hotel sale. See *id.* at 35; Doc. 69-1, Appraisal, 209 (noting that “the Foundation would only share in the proceeds from Seller’s Closing Statement; the Foundation would not receive its *pro rata* share in other net assets of the Partnership”). Or, in the unlikely event the Hotel sale had not been completed as planned, Pi would not have shared equally with the other limited partners in the duty to contribute funds for renovation, should additional

In *Situation 2*, the gift made by the taxpayer of the right to the cash surrender value of a nonpaid-up life insurance policy was also a gift of less than the taxpayer’s entire interest in the property. Since the taxpayer retains the right to designate the beneficiary, and the right to surrender the policy and defeat the college’s interest, the gift is not a gift of a fraction or percentage of each and every substantial interest in the property.

⁴⁷⁹¹ Motion for reconsideration denied, 130 A.F.T.R.2d 2022-5406 (N.D. TX 8/10/2022).

funds be required to fulfill the partnership's obligations under the loan or franchise agreements. See Doc. 69-1, Keefer Dep., 34 (noting that the pre-assignment reserves were needed because "the Pi Foundation could not obviously contribute capital for the renovation"). Reflecting this carve out, the Appraisal calculated a lower value for the donated interest than for a full 4% interest in all of the partnership's assets. Doc. 69-9, Appraisal, 594 ("All assets not included in the \$54 million [sale price] have been excluded."); *id.* at 595 (calculating 4% of net sale proceeds without reserves). Accordingly, the Keefers did not donate their full 4% partnership interest on June 18, 2015, but donated only a portion thereof. They did not transplant the *whole* tree.

The anticipatory assignment of income doctrine therefore applies to this transaction.

If a donor transfers voting stock but retains the voting rights, Rev. Rul. 81-282 asserted that retaining the voting rights violated the partial interest prohibition.⁴⁷⁹² However, when a donor kept voting and donated nonvoting restricted⁴⁷⁹³ stock, the donation did not constitute a partial interest,⁴⁷⁹⁴ this reasoning also applied to an estate.⁴⁷⁹⁵ Furthermore, when the donated voting

⁴⁷⁹² The ruling reasoned:

The right to vote stock is inherent in the ownership of common stock and, as such, is a property right. This right gives the holder a voice in the management of the corporation and is crucial in protecting the stockholder's financial interest. Therefore, the right to vote the stock of X is a substantial right in that stock. See *Brown v. McLanahan*, 148 F.2d 703 (4th Cir. 1945); and *DuVall v. Moore*, 276 F.Supp. 674 (N.D. Iowa 1967).

While A's retention of the right to vote the stock will not defeat Y's right to dividends or the right to dispose of the stock, and, while the right retained by the donor will not defeat the donee's interest in the transferred property, nevertheless, A has not transferred all substantial rights in the stock to Y. Therefore, A has transferred a partial interest in property to Y within the meaning of section 170(f)(3) of the Code. See Rev. Rul. 76-143.

⁴⁷⁹³ Comparing Class A voting to Class B nonvoting:

The rights of the Class A shares are freely transferable. In contrast, the Class B shares are not transferable except: (1) to the Corporation; (2) in connection with an acquisition of the Corporation; (3) in the case of natural persons, upon death or pursuant to a valid and binding court order mandating transfer; or (4) with the consent of the Corporation's Board of Directors.

⁴⁷⁹⁴ Letter Ruling 201129033, holding:

In the present case, Donor and Donor's Spouse propose to transfer Class B common stock to Charity. The Class B common stock is a separate property interest apart from the other class of stock in Corporation. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock. Therefore, we conclude that for gift tax purposes the plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes within the meaning of § 2522(c)(2).

⁴⁷⁹⁵ Letter Ruling 9022010 reasoned:

In the present case, [four separate charities] will receive, in effect, under the terms of the will and the Trust, the residue of A's estate, which may include a portion of the Class A nonvoting shares of V. The outright distribution of the Class A nonvoting shares to [the charities] while the Class B voting shares are held in trust for the benefit of individuals will not be a distribution of property for both charitable and noncharitable purposes under section 2055(e)(2) of the Code.

Each class of stock represents a separate property interest. Further, considering that the dividend rights and liquidation preferences of the respective classes are identical and considering the currently issued and outstanding shares in the various classes, each distributee of the respective classes of stock will receive all the property rights and economic benefits inherent in the equity interests represented by those shares. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock.

stock was subject to a voting agreement created eight years previously for business purposes, the lack of voting rights did not make the gift a nondeductible partial interest.⁴⁷⁹⁶ However, when the terms of the bequest required the executor to retain the stock and pay the dividends to an individual during the period of administration and to distribute the stock to the charity after administration is completed, Rev. Rul. 83-45 asserts that the dividend payment violates the partial interest rule. On the other hand, when a charity separated a debt obligation it issued into principal and income receipts that were legally separate rights, the partial interest prohibition did not apply when holders donated those rights.⁴⁷⁹⁷

Rev. Rul. 75-373 allowed a charitable contribution deduction in the manner and to the extent provided by Code § 170 for the value of the restricted easement granted in the following situation:

An individual conveyed an easement in a tract of 50 acres of vacant, beachfront property to the county in which the property was located to be used solely as a public bathing beach and recreational area operated and maintained by the county. The land is located in a rapidly expanding urban area. The county is a political subdivision of state X.

The deed from the taxpayer to the county granted the easement in gross in perpetuity but reserved to the taxpayer certain rights, including the right of access to and from the open water by boat from the remainder of the land owned by the grantor or his heirs, the right to have an open and usable channel connecting the open sea with the lands retained by the grantor, and the retention of all mineral rights in the land underlying the easement. Any prospective drilling and/or mining is to be done by slant from adjacent property so that the surface of the land will not be disturbed. The donor is responsible for all taxes, levies, and assessments of any kind to which the conveyed property is or

Therefore, we conclude that the estate plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes, within the meaning of section 2055(e)(2) of the Code.

⁴⁷⁹⁶ Letter Rulings 200108012, 200108013 and 200108014 included the following facts and holding: In 1992, Taxpayer and other Company shareholders entered into a voting agreement. The purpose of the voting agreement was to facilitate any future negotiations to sell Company. Pursuant to the voting agreement, Taxpayer transferred to Individual her voting rights with respect to corporate events affecting change of ownership or control of Company. The voting agreement required Taxpayer to agree to vote as directed by Individual. Recently, the voting agreement was amended to provide that the votes would be directed by a person who is not Individual and is not related to Taxpayer....

When Taxpayer contributes her shares in Company stock to Foundation, she will not contribute all interests in the shares. Certain voting rights have already been transferred to a third party. The voting rights are substantial rights. See Rev. Rul. 81-282. However, because those rights had been transferred eight years ago for a business purpose, the interests were not divided in order to avoid section 170(f)(3)(A). Thus, section 1.170A-7(a)(2)(i) of the Regulations does not cause disallowance of the charitable contribution deduction in this case.

⁴⁷⁹⁷ Letter Ruling 8939014 described the approved rights as follows:

Each debenture receipt represents, in form, the right to receive specific future interest or principal payments on the debenture. Accordingly, the debenture receipts will be denominated as coupon receipts and principal receipts. Each coupon receipt will represent the right to receive a single payment at the date of a specific interest payment on the debenture. Each principal receipt will represent the right to receive a specific payment of principal on the debenture. No payments, however, will be made on any debenture receipt prior to the date on which the specific payment of interest or principal, respectively, is made on the debenture.

shall be subject, but the assessment will be reduced to reflect the value of the easement conveyed....

Under the law of state X, an easement in gross in perpetuity is a valuable property right or interest in favor of the party for whose benefit the easement is created and is enforceable by that party.

In the instant case, the easement in gross in perpetuity is an open space easement within the meaning of section 1.170A-7(b)(1)(ii) of the regulations.

Rev. Rul. 76-253 disallowed a deduction for the contribution of land when the taxpayer retained timber-cutting rights. *Sells v. Commissioner*, T.C. Memo. 2021-12, also denied a deduction for donating timber:

Although we find that the donation of Burning Bush's timber is at issue, we agree with the members that the Commissioner's analysis of it is quite confusing. He argues in his posttrial briefs that the timber donation violates section 170(h) - the subsection that addresses contributions of qualified conservation easements. He specifically argues that the timber donation doesn't have a conservation purpose since the clearcutting of land can't possibly be for a conservation purpose.

As we search through the record, we find next to no other mention of the timber donation from either party. The only evidence that we have (besides the disallowance of the timber donations in the notices of deficiency) is the initial claiming of the deduction by the partners on their tax returns. Those returns each have two separate Forms 8283 attached - one for the donation of the conservation easement and one for the donation of "Timber". And attached to each form were separate appraisals - one of the value of the conservation easement and one of the value of the timber. The appraisal of the timber donation describes the value of eight timber products that were "growing on [the] property" but makes no mention of a conservation easement. When we look at the entire record, we find it more likely than not that the timber donation was not a donation of a conservation easement but rather just a separate noncash donation. Section 170(h) and its regulations that govern the donation of conservation easements just don't apply.

But that doesn't mean the partners are out of the woods just yet. According to the appraisal, Burning Bush acquired the land on which it placed the easement on the very same date that it reported it had acquired the timber - August 6, 2002. And Burning Bush contributed both the easement and the timber to the same donee, COLT. Because of this, we find it more likely than not that the timber donated by Burning Bush is the same standing timber on which it had placed a conservation easement.

That is a problem. The value that Burning Bush placed on the standing timber is its value as timber products. One can see this on the Form 8283 - which describes the donation of "Pulp, Chip N Saw, Saw Timber" - products that result from timber's harvest. And the attached appraisal - which described eight products - would require the timber's harvest.

The problem here is that Alabama law¹⁵ makes timber that hasn't been severed from the land the property of the land owner, and as a general rule not even a life tenant has the right to cut and sell it. See *White v. Watts*, 812 So.2d 328, 331 (Ala. 2001); *Wilder v. Scott*, 89 So.2d 682, 685 (Ala. 1956). There are exceptions to this general rule - if the property was a tree farm, *White*, 812 So.2d at 331; *Robinson v. Robinson*,

215 So.2d 585, 590-91 (Ala. 1967), or the timber cutting was an incident to clearing land for cultivation, *Westmoreland v. Birmingham Tr. & Sav. Bank*, 108 So. 536, 538 (Ala. 1926) - but none of these could conceivably apply here.

¹⁵ State law defines property interests. See, e.g., *Case v. United States*, 633 F.2d 1240, 1246 (6th Cir. 1980); *Oakbrook*, T.C. Memo. At *34.

The cutting of timber and its conversion into lumber and other wood products is not a conservation purpose. See sec. 170(h)(4)(A); sec. 1.170A-14(e), Income Tax Regs. The deed forbids it.¹⁶ That makes Burning Bush's donation of the timber either a nondeductible gift of a partial interest in real estate other than a conservation easement, or a future interest in tangible personal property. If it's the first, the Code says it's never deductible, see sec. 170(f)(3)(A); if it's the second, section 170(a)(3) says that it's not deductible until the timber is severed from the real property. Either way, the members of Burning Bush don't get deductions for donating standing timber to COLT for their 2003 tax year.

¹⁶ That makes these cases different from *Butler Land Holdings, LLC v. Commissioner*, T.C. Memo. 2012-72, 2012 WL 913695, at *42-*43, because there the deed explicitly allowed the harvesting of timber as part of an approved plan.

Rev. Rul. 76-331 applied the partial interest rule to disallow the following contributions:

Situation 1. A corporation transferred a tract of land to an organization described in section 170(c)(2) of the Code. However, it retained all mineral rights with respect to the property, including the sole right to exploit and sell any minerals obtained from the property.

Situation 2. An individual, aged 50 and in good health, owned timberland that the individual leased to a corporation in 1975 for a term of 60 years. In 1976, the individual transferred this land to an organization described in section 170(c)(2) of the Code, subject to the individual's receiving, during the individual's lifetime, all the payments due under the lease. Upon the individual's death, all rights under the lease will pass to the charitable organization.

However, if the retained mineral interest cannot ever interfere with the charity's interest, the retained interest might be too insubstantial to invoke the partial interest disallowance.⁴⁷⁹⁸ Donating land to the U.S. did not trigger the prohibition when the donor reserved the right to train a hunting dog and maintain paths for that purpose.⁴⁷⁹⁹ Also, a donation of undivided

⁴⁷⁹⁸ *Stark v. Commissioner*, 86 T.C. 243 (1986).

⁴⁷⁹⁹ Rev. Rul. 75-66 involved the following facts and holding:

An individual donated his entire interest in 800 acres of land to the United States and retained the right during his lifetime to train his personal hunting dog, and any other hunting dog he may subsequently own, on trails extending over the entire tract, including the right to maintain paths and lanes relating to the reserved use. The individual was informed by the United States Department of the Interior that the reservation would not interfere with the Government's use and enjoyment of the donated property. The trails for training the dog are used in accordance with the Department of the Interior's regulations on such use.

the instant case, the retained right during the taxpayer's lifetime to train his personal hunting dog on the entire tract, in accordance with the regulations of the Department of the Interior on such use, is not substantial enough to affect the deductibility of the property contributed.

interests in real estate subject to leases was not subject to the partial interest disallowance when it conveyed all of the donor's rights and duties and substantial interests with respect to the leases and the undivided interests in the property.⁴⁸⁰⁰ (Additional rulings regarding easements need to be reviewed.) But taxpayers who granted a fire department the right to conduct training exercises on their property and destroy a building thereon during the exercises were held not to donate any ownership interest in property to the fire department, and the partial interest rule prohibit deducting the value of the use of the property. *Patel v. Commissioner*, 138 T.C. 395 (2012), the official syllabus mentioning the following:

At the end of May 2006, Ps purchased property in Vienna, Virginia (Vienna property), with the intention to demolish the house situated thereon (house) and construct a new one on the site. Their realtor told them about the Fairfax County Fire and Rescue Department (FCFRD) Acquired Structures Program, where a property owner allows FCFRD to conduct live fire training exercises on his or her property. As part of the exercises, FCFRD destroys, by burning, the designated building on the owner's property. Within a few weeks of purchasing the Vienna property, Ps contacted FCFRD and obtained information about the requirements for participating in the program. After Ps obtained a demolition permit and completed all of the other requirements, they executed documents granting FCFRD the right to conduct training exercises on the Vienna property and to destroy the house by burning during the exercises. During October 2006, FCFRD, along with six other fire departments, used the Vienna property to conduct live fire training exercises, during which the house was destroyed.

Mann v. U.S., 984 F.3d 317 (4th Cir. 2021), disallowed a deduction where the charity selected parts of a house it was given to demolish and the taxpayer later disposed of parts that the charity did not take. The appraisal valued everything that the charity could have taken, rather than what the charity actually did take. But the appraisal being flawed was only part of the story. The court reasoned:

Thus, in the end, some components of the Manns' house were salvaged by Second Chance for resale; some components were destroyed as part of the deconstruction process; and the remaining components were left by Second Chance for demolition and removal by the Manns' contractor. In these circumstances, Linda's entire interest in the house was not donated to Second Chance, and the value of the house was therefore not deductible under 26 U.S.C. §§ 170(f)(3).

While the Manns read the donation agreement more narrowly, focusing only on the conveyance language of all of her "right, title and interest" in the house, nonetheless when matters of taxation are involved, "substance rather than form prevails." *W. Va. N. R.R. Co. v. Comm'r*, 282 F.2d 63, 65 (4th Cir. 1960). Thus, "the taxability of a transaction is determined by its true nature rather than by the name which the parties may use in describing it." *Id.*; see also *Comm'r v. Ct. Holding Co.*, 324 U.S. 331, 334 (1945) ("To permit the true nature of the transaction to be disguised by mere formalisms, which exist solely to alter tax liabilities, would seriously impair the effective administration of the tax policies of Congress"); *BB&T Corp. v. United States*, 523 F.3d 461, 471, 474 (4th Cir. 2008) (noting that "the doctrine of 'substance over form' recognizes that the substance of a transaction, rather than its form, governs for tax purposes" and that the doctrine thus "serves to prevent taxpayers from manipulating the tax code"). Moreover, "the transaction must be viewed as a whole." *Ct. Holding Co.*,

⁴⁸⁰⁰ Letter Ruling 8639019.

324 U.S. at 334.; *cf. Volvo Cars of N. Am. v. United States*, 571 F.3d 373, 379 (4th Cir. 2009) (recognizing that “in applying federal law to determine the tax consequences of a transaction defined by state law, we look to the intention of the parties as evidenced by the written agreements read in light of the attendant facts and circumstances” (cleaned up)).

Focusing on substance over form, Linda donated some components of the house for salvage, which were in fact removed from the house and taken by Second Chance for resale. And some of the house’s components were destroyed onsite, either for work-force training or as necessary to remove salvageable components. But, Linda maintained the benefits and burdens of ownership of the remaining components which she ultimately paid her contractor to demolish. Thus, she did not donate, as personal property, her entire interest in the house to Second Chance, making the Manns’ attempt to claim the value of the entire house as a charitable deduction improper.

If the owner of the working interest under an oil and gas lease⁴⁸⁰¹ gives an overriding royalty interest⁴⁸⁰² or a net profits interest⁴⁸⁰³ to a charitable organization, Rev. Rul. 88-37 asserts that the partial interest rule bars the deduction. The ruling viewed the right to control or to participate

⁴⁸⁰¹ The ruling describes a working interest:

A working interest is the operating interest under an oil and gas lease. It is typically created by a transaction in which the owner of a tract of land, or the owner of the mineral rights to a tract of land, grants the right to exploit the oil and gas under the land, while at the same time retaining a royalty interest in production. Alternatively, the owner of a tract of land, or the owner of mineral rights to a tract of land, may, as in the instant case, retain the working interest and grant a royalty interest to another person. The owner of the working interest has the exclusive right to exploit the oil and gas resources. For federal tax purposes, a working interest is defined as an interest in oil and gas in place that is burdened with the cost of development and operation of the property.

Brooks v. Commissioner, 424 F.2d 116 (5th Cir. 1970).

After defining an overriding royalty interest (see fn. 4802) and a net profits interest (see fn. 4803), the ruling comments:

The right to exploit the oil and gas resources under the land is a right inherent in the ownership of a working interest. Even an owner of only a percentage of the working interest has the right to participate in decisions on the exploitation of the oil and gas resources. The owner of an overriding royalty interest or a net profits interest does not have this right.

⁴⁸⁰² The ruling describes an overriding royalty interest:

An overriding royalty interest is an economic interest in oil and gas in place, created from the working interest. An overriding royalty entitles its owner to a specified fraction of gross production, free of operating and developing costs. The term of an overriding royalty interest is coextensive with the term of the working interest from which it was created. The transfer of an overriding royalty is an assignment of a property interest and is not an anticipatory assignment of income. See Rev. Rul. 67-118, 1967-1 C.B. 163.

⁴⁸⁰³ The ruling describes a net profits interest:

A net profits interest is, for federal tax purposes, an interest in oil and gas in place that is defined as a share of gross production measured by net profits from operation of the property. It is created out of the working interest and has the same duration. Unlike the income accruing to an overriding royalty, the income accruing to the net profits interest is reduced by specified operating and development costs, but the interest bears these expenses only to the extent of its share of the income. Unlike the working interest, the net profits interest is not required to pay out, advance, or become liable for such costs. *Burns v. Commissioner*, 78 T.C. 185, 209 (1982). Like a transfer of an overriding royalty, the transfer of such a net profits interest conveys, for federal tax purposes, a depletable property interest in oil and gas in place. See *Kirby Petroleum Co. v. Commissioner*, 326 U.S. 599 (1946), 1946-1 C.B. 69; *Burton-Sutton Oil Co., Inc. v. Commissioner*, 328 U.S. 25 (1946), 1946-1 C.B. 237.

in control, which a working interest has but which neither an overriding royalty interest nor a net profits interest has, as a substantial right, the retention of which prevents the donated interest from being considered an undivided interest in the donor's property rights.⁴⁸⁰⁴

On the other hand, separate bequests of preferred stock and common stock did not trigger the partial interest prohibition.⁴⁸⁰⁵

Rev. Rul. 2003-28 asserted that the partial interest prohibition applies to patents:

- (1) A taxpayer's contribution to a qualified charity of a license to use a patent is not deductible under § 170(a) if the taxpayer retains any substantial right in the patent.⁴⁸⁰⁶
- (2) A taxpayer's contribution to a qualified charity of a patent subject to a conditional reversion is not deductible under § 170(a), unless the likelihood of the reversion is so remote as to be negligible.

⁴⁸⁰⁴ The IRS reasoned:

... the donor did not contribute the donor's entire interest in the property but carved out and contributed only a portion of that interest. Further, the portion contributed was not an undivided portion of the donor's interest because it did not convey a fraction of each and every substantial interest or right owned by the donor in the property. By transferring an overriding royalty interest or a net profits interest, the donor has retained the right inherent in the ownership of a working interest to control, or, in the case of ownership of a part of the working interest, to participate in the control of, the development and operation of the lease. This right to control or to participate in control, similar to the retained voting rights in Rev. Rul. 81-282, is a substantial right, the retention of which prevents the donated interest from being considered an undivided portion.

After the transfer, ... the contributed interest is a separate property interest for federal tax purposes. However, if the charitable interest is created by dividing a greater interest held by the donor, the application of section 170(f)(3) to deny the charitable contribution deduction is not precluded merely because the contributed interest is a separate property in the hands of the donee and the incidence of taxation on income from the contributed interest is shifted from the donor to the donee. Rev. Rul. 70-477, 1970-2 C.B. 62, for example, holds that for years after the effective date of section 170(f)(3), a contribution of rent-free use of property, even if recognized as a conveyance of property under local law, does not give rise to a deduction under section 170. In both Situation 1 and Situation 2, therefore, the contributed interest is less than the taxpayer's entire interest within the meaning of section 170(f)(3) of the Code, and is not an undivided portion of the taxpayer's entire interest. In each case, the partial interest was not transferred in trust and was not in a form that would have resulted in an allowable deduction under section 170(f)(2) had it been transferred in trust.

⁴⁸⁰⁵ Letter Ruling 8950071.

⁴⁸⁰⁶ The ruling reasoned:

In *Situation 1*, X contributes a license to use a patent, but retains a substantial right, i.e., the right to license the patent to others. The license granted to University is similar to the rent-free lease described in § 1.170A-7(a)(1) and the partial interest in motion picture films described in § 1.170A-7(b)(1)(i), in that it constitutes neither X's entire interest in the patent, nor a fraction or percentage of each and every substantial interest or right that X owns in the patent. As a result, the contribution in Situation 1 constitutes a transfer of a partial interest, and no deduction under § 170(a) is allowable. The result would be the same if X had retained any other substantial right in the patent. For example, no deduction would be allowable if X had contributed the patent (or license to use the patent) solely for use in a particular geographic area while retaining the right to use the patent (or license) in other geographic areas.

- (3) A taxpayer's contribution to a qualified charity of a patent subject to a license or transfer restriction is deductible under § 170(a), assuming all other applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170, but the restriction reduces what would otherwise be the fair market value of the patent at the time of the contribution, and therefore reduces the amount of the charitable contribution for § 170 purposes.⁴⁸⁰⁷

Generally, all the rights to a partnership are considered a single property interest.⁴⁸⁰⁸ It would not appear to be susceptible to being split up as separate assets the way that corporate stock would be. Thus, a donor should transfer a vertical slice of all of the donor's interest in the partnership. Suppose one wants to control a donated business interest or other property that requires special handling. One might target one's donation, divide it by 49%, and put that among into an LLC in which a majority vote of the members can direct the manager to sell the LLC's assets:

- For example, one owns a 20% partnership interest and wants to give away 5%. Transfer a 10.2% partnership interest (5% divided by 49%) into the LLC and then donate a 49% interest in the LLC to the charity. To encourage the charity – especially a donor-advised fund or supporting organization – to use any distributions from the LLC,⁴⁸⁰⁹ one might also consider obligating the non-charitable member of the LLC to pay any expenses (such as from a seller's representations and warranties) either through its share of sale proceeds or by paying the expenses directly. Also, to minimize valuation discounts, require that all cash the LLC receives must be distributed, except for a very small amount required to pay expenses that are expected to occur in the near future; no reserve would be made for the expenses described in the preceding sentence, because the donor would be obligated to fund those as they arise. If the sale is imminent, the appraiser might very well apply a relatively small valuation discount.
- Suppose assets the donor wants to sell would be awkward to be held by a private foundation or would receive a reduced deduction if contributed to the private foundation, but the donor needs to control their sale. The donor could instead use the above LLC mechanism to donate to a donor-advised fund (DAF), and the private foundation could be the adviser if the DAF's procedures so permit. The DAF could not accept the asset to be sold with restrictions on control over the sale of the underlying asset, and the DAF might not

⁴⁸⁰⁷ The ruling reasoned:

In *Situation 3*, Z transfers to University all of Z's interests in the patent with the restriction that University cannot transfer or license the patent for a period of 3 years after the transfer. Unlike the conditional reversion in *Situation 2*, the restriction on transfer or license is not a condition that can defeat the transfer. Thus, Z's contribution is deductible under § 170(a), assuming all other applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170. See Publication 526, Charitable Contributions (describing other requirements for, and limitations on, the deductibility of charitable contributions). Under § 1.170A-1(c), however, the restriction reduces what would otherwise be the fair market value of the patent, and therefore reduces the amount of Z's charitable contribution. If Z had received a benefit in exchange for the contribution, the value of the benefit would further reduce the amount of Z's charitable contribution. See § 1.170A-1(h); Rev. Rul. 67-246, 1967-2 C.B. 104. See also *Singer Co. v. United States*, 449 F.2d 413, 423-424 (Ct. Cl. 1971).

⁴⁸⁰⁸ See part II.Q.8.e.ii.(a) Unitary Basis, citing Rev. Rul. 84-53.

⁴⁸⁰⁹ See part II.Q.6.d.iii Charitable Deduction Against UBTI, pointing out that a donor-advised fund or supporting organization may generate a deduction against unrelated business income (UBI) by making distributions to a charity in the same calendar year that the entity receives the UBI.

want the responsibility for deciding when to sell and what the sales terms should be.⁴⁸¹⁰ Meanwhile, the donor would get the full deduction, subject to any reduction due to the LLC's control mechanism.

Donating an assignee interest and retaining the voting rights might be comparable to Rev. Rul. 81-282⁴⁸¹¹ and violate the split-interest prohibition. However, when taxpayers donated all of their interest, which was an interest as a limited partner, but the donees received only an interest as an assignee, the Tax Court⁴⁸¹² and Fifth Circuit in *McCord* allowed a charitable gift tax deduction for an interest as an assignee.⁴⁸¹³ On the other hand, Judge Swift's concurring opinion in the Tax Court argued that the partial interest prohibition applied to assignee interests. Judge Swift pointed out that the donor transferred the economic rights but not the voting and other noneconomic rights⁴⁸¹⁴ to charity. The majority and Fifth Circuit did not address the issue, being content with the donor having transferred all of the donor's rights.⁴⁸¹⁵ Both arguments are correct, but neither pointed out what happened to the donor's voting rights. When a partner transfers all of the partner's interest in a partnership and the transferee is not admitted as a partner, the transferor's voting rights lapse. This lapse then gives others who have the right to vote on those matters a higher proportionate vote. Judge Swift, although pointing out that that the charity did not receive noneconomic rights, did not articulate that the donor's voting rights essentially shifted to the other limited partners. Neither the majority nor the Fifth Circuit addressed this shift; their written opinions did not indicate whether they understood that the shift occurred. Thus, one can point to *McCord* as support for the proposition that one does not need to transfer one's noneconomic rights to a charity to avoid the partial interest prohibition, if one does not retain any noneconomic rights, but the strength of this support is unclear, given the lack of analysis of what happened to the voting rights. To avoid any doubt, one might suggest transferring voting rights as well. On the other hand, in self-dealing letter rulings, the IRS did

⁴⁸¹⁰ See Fox, "Recent Court Decision in Donor Advised Fund Lawsuit Against Fidelity Investments Charitable Gift Fund Provides Lessons for Sponsors and Donors Alike," *Estate Planning Journal* (6/2021). This case involved a December 2017 donation to Fidelity's DAF, which the donors alleged had promised to give the donors input into the sale of stock that had blockage discount issues. The court held that the donors did not prove their case against Fidelity's DAF. My full sympathy is with Fidelity's DAF. In December 2016, at Fidelity's DAF's recommendation, I used the LLC mechanism described in the text above to help donors control the sale of their interests in a private company and received great service from Fidelity's DAF.

⁴⁸¹¹ See fn. 4792.

⁴⁸¹² *McCord v. Commissioner*, 120 T.C. 358 (2003) (reviewed opinion).

⁴⁸¹³ *Succession of McCord, Jr. v. Commissioner*, 461 F.3d 614 (5th Cir. 2006), allowing the deduction without even mentioning the partial interest rule.

⁴⁸¹⁴ The majority described certain rights:

Limited partners generally do not participate in the management of the partnership's affairs. However, limited partners do have veto power with respect to certain major decisions, most notably relating to voluntary bankruptcy filings. In addition, if any two of the children are not serving as managing partners, class B limited partners have voting rights with respect to certain large dollar managerial decisions. Limited partners also have access to certain partnership financial information.

⁴⁸¹⁵ See fn. 4782, providing that transferring an undivided interest in all of the donor's rights is an exception to the partial interest rules. In *McCord*, the assigned interests also carried with them the right to sell their interests at fair market value for cash, which sale took place shortly after the transfer. Perhaps this quick liquidation made the court more sympathetic to allowing the charitable deduction?

not comment about the partial interest prohibition when approving the transfer of nonvoting interests in LLCs.⁴⁸¹⁶

Finally, suppose neither an income nor an estate tax deduction is needed; rather, the donor is making a gift and does not want the partial interest prohibition to result in gift tax. In that case, consider instead donating to a Code § 501(c)(4) organization. See part II.Q.6.g Gift Tax Exclusion for Gifts to Certain Noncharitable Organizations.

II.Q.6.g. Gift Tax Exclusion for Gifts to Certain Noncharitable Organizations

Code § 2501(a)(6), “Transfers to certain exempt organizations,” provides:⁴⁸¹⁷

Paragraph (1) shall not apply to the transfer of money or other property to an organization described in paragraph (4), (5), or (6) of section 501(c) and exempt from tax under section 501(a), for the use of such organization.

Code § 501(c)(4) describes:

(A) Civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees, the membership of which is limited to the employees of a designated person or persons in a particular municipality, and the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes.

(B) Subparagraph (A) shall not apply to an entity unless no part of the net earnings of such entity inures to the benefit of any private shareholder or individual.

Thus, a person who is charitably inclined who does not need the income tax deduction and would like to make a gift without complying with the charitable income tax deduction requirements may very well be able to achieve his or her goals through a donation to a Code § 501(c)(4) organization.

See [Life Cycle of a Social Welfare Organization \(irs.gov\)](https://www.irs.gov).

Code § 501(c)(5) refers to “labor, agricultural, or horticultural organizations.”

Code § 501(c)(6) refers to:

Business leagues, chambers of commerce, real-estate boards, boards of trade, or professional football leagues (whether or not administering a pension fund for football players), not organized for profit and no part of the net earnings of which inures to the benefit of any private shareholder or individual.

⁴⁸¹⁶ See fn 4984 in part II.Q.7.c.ii Private Foundations, Etc. Some of the rulings cautioned that charitable deduction valuation issues may apply.

⁴⁸¹⁷ Code § 2501(a)(1), “General rule,” provides:

A tax, computed as provided in section 2502, is hereby imposed for each calendar year on the transfer of property by gift during such calendar year by any individual, resident or nonresident.

T.D. 9873 (7/23/2019), which promulgated Reg. § 1.506-1, explains:

1. *Section 501(c)(4) Organizations*

Section 501(a) of the Code generally provides that an organization described in section 501(c) is exempt from federal income tax. Section 501(c)(4) describes certain civic leagues or organizations operated exclusively for the promotion of social welfare and certain local associations of employees. An organization is described in section 501(c)(4) and exempt from tax under section 501(a) if it satisfies the requirements applicable to such status. Subject to certain exceptions, section 6033, in part, requires organizations exempt from taxation under section 501(a) to file annual information returns or notices, as applicable.

Although an organization may apply to the IRS for recognition that the organization qualifies for tax-exempt status under section 501(c)(4), there is no requirement to do so (except as provided in section 6033(j)(2), which requires organizations that lose tax-exempt status for failure to file required annual information returns or notices and want to regain tax-exempt status to apply to obtain reinstatement of such status). Accordingly, a section 501(c)(4) organization that files annual information returns or notices (Form 990, "Return of Organization Exempt From Income Tax," or, if eligible, Form 990-EZ, "Short Form Return of Organization Exempt From Income Tax," or Form 990-N (e-Postcard)), as required under section 6033, need not seek an IRS determination of its qualification for tax-exempt status in order to be described in and operate as a section 501(c)(4) organization.

2. *The PATH Act*

Section 405(a) of the PATH Act added section 506 to the Code, requiring an organization to notify the IRS of its intent to operate as a section 501(c)(4) organization. In addition, section 405(b) and (c) of the PATH Act amended sections 6033(f) and 6652(c), relating to information that section 501(c)(4) organizations may be required to include on their annual information returns and penalties for certain failures by tax-exempt organizations to comply with filing or disclosure requirements, respectively.

Section 506(a) requires a section 501(c)(4) organization, no later than 60 days after the organization is established, to notify the Secretary of the Department of the Treasury (Secretary) that it is operating as a section 501(c)(4) organization (the notification). Section 506(b) provides that the notification must include: (1) The name, address, and taxpayer identification number of the organization; (2) the date on which, and the state under the laws of which, the organization was organized; and (3) a statement of the purpose of the organization. Section 506(c) requires the Secretary to send the organization an acknowledgment of the receipt of its notification within 60 days. Section 506(d) permits the Secretary to extend the 60-day notification period in section 506(a) for reasonable cause. Section 506(e) provides that the Secretary shall impose a reasonable user fee for submission of the notification. Section 506(f) provides that, upon request by an organization, the Secretary may issue a determination with respect to the organization's treatment as a section 501(c)(4) organization and that the organization's request will be treated as an application for exemption from taxation under section 501(a) subject to public inspection under section 6104.¹

¹ The separate procedure by which an organization may request a determination of tax -exempt status is currently prescribed in Rev. Proc. 2019-5, 2019-1 IRB 230 and will be set forth in successor annual updates of that Revenue Procedure.

In addition, the PATH Act amended section 6033(f) to require a section 501(c)(4) organization submitting the notification to include with its first annual information return after submitting the notification any additional information prescribed by regulation that supports the organization's treatment as a section 501(c)(4) organization.

The audit technique guide (ATG) at https://www.irs.gov/pub/irs-tege/atg_501c4_orgs.pdf (downloaded 3/1/2024), includes, "Operational Requirements - Social Welfare Organizations":

To qualify as a social welfare organization under IRC Section 501(c)(4), an organization must be operated exclusively for the promotion of social welfare. This is met if it's primarily engaged in activities which in some way promote the common good and general welfare of the community.

□ Activities that don't promote social welfare include political activities, operating a social club for members, and the conducting business with the general public in a manner generally similar to for-profit organizations. Therefore, an organization which is primarily engaged in these non-qualifying activities, doesn't qualify as a social welfare organization under IRC Section 501(c)(4).

- Social activities for the benefit, pleasure, or recreation of members don't promote social welfare purposes and therefore, aren't qualifying social welfare activities. However, these social activities don't preclude exemption under IRC Section 501(c)(4) if they, along with any other activities that don't promote social welfare purposes, are not the organization's primary activities.
- An organization doesn't qualify for exemption as a civic organization described in IRC Section 501(c)(4) if its primary activity is the operation of a social club for the benefit, pleasure, or recreation of its members. See Treas. Reg. 1.501(c)(4)-1(a)(2)(ii).
- Conducting business with the general public in a manner similar to for-profit organizations doesn't promote accomplishing social welfare purposes. However, conducting business with the general public on a for profit basis, doesn't prevent exemption under IRC Section 501(c)(4), if this business with the general public, along with any other activities that don't promote social welfare purposes, aren't the organization's primary activities.

To determine if an organization is operated exclusively for the promotion of social welfare, identify, review, and analyze:

- Organizing document and bylaws for stated purposes which are inconsistent with the furtherance of social welfare purposes.
- Minutes of meetings, publications, disbursements, and other available documentation to determine the organization's activities, and whether these activities promote the common good and general welfare of the community.

Also, determine whether the organization:

- Conducts activities that benefit a private group of individuals, as opposed to promoting the general welfare of the community
- Carries on a business with the general public in a way similar to for-profit organizations
- Operates a social club for the benefit, pleasure or recreation of its members
- Intervenes or participates in political campaigns for or in opposition to a candidate for public office
- Lobbies to influence legislation which is not germane to, or in furtherance of qualifying social welfare purposes
- Conducts their activities primarily to promote the social welfare of the community as a whole.
- Has unrelated business income, and if so, whether it reported it on Form 990-T, Exempt Organization Business Income Tax Return.

Review the organizing document and bylaws to determine if the organization is a membership organization, and if so, what rights, privileges, services, and activities are offered to members.

- Determine if membership benefits includes nonexempt social club type services, for example, including a bar and restaurant for members.
- Review the minutes, pamphlets, brochures and cash receipts to determine the types of activities, and income from activities the organization carries on for its members.

Review fund-raising activities to determine the extent to which the organization carries on business activities with the general public in a manner similar to for-profit organizations.

If the organization continues to qualify under IRC Section 501(c)(4), for any activities determined not to further social welfare purposes, determine whether it properly reported the activities' income and directly connected expenses on Form 990-T.

In "Legislative and Political Activities," the ATG explains:

An IRC Section 501(c)(4) organization's attempts to influence legislation are considered to be activities that further IRC Section 501(c)(4) social welfare purposes if that legislation is germane to accomplishing its social welfare purposes.

In contrast, an organization whose primary activity is lobbying to advance the financial interests of its members, as opposed to promoting the social welfare of the community, doesn't qualify for IRC Section 501(c)(4) status.

The promotion of social welfare doesn't include participation or intervention in political campaigns of candidates for public office. See Rev. Rul. 2004-6 and Rev. Rul. 2007-41 for information on political intervention activity.

However, an IRC 501(c)(4) organization may intervene in political campaigns without jeopardizing its exempt status if it's primarily engaged in other activities which further the promotion of social welfare. See Rev. Rul. 81-95.

- Review minutes, publications, activities, and disbursements to identify any political or legislative activities or expenditures.
- If the organization has any legislative activities, determine whether the activities further social welfare purposes as opposed to a particular industry or profession's specific interests, or serve other nonexempt purposes.
- If the organization has any political activities or expenditures, analyze all activities to determine if the primary activity is the promotion of social welfare as opposed to nonexempt political activities.
- If the organization has any political expenditures, determine whether it filed and reported all required information for Form 1120-POL, U.S. Income Tax Return for Certain Political Organizations.

In "Legislative and Political Activities," the ATG explains:

An organization can't qualify under IRC Section 501(c)(4) as a social welfare organization or as a "local association of employees" unless no part of its net earnings inures to any private shareholders' or individuals' (insiders) benefit. See IRC Section 501(c)(4)(B).

- Review minutes, expenditures, and financial records for indications of questionable transactions with insiders, officers, trustees, and key employees, which may result in prohibited inurement.
- Determine whether IRC Section 4958 excess benefit transaction provisions apply to questionable insider transactions. See IRM 7.27.30, Taxes on Excess Benefit Transactions for information on IRC Section 4958.

II.Q.6.h. Donation of Goodwill

Generally, goodwill must be sold at the same time the business is sold. See part II.Q.1.c Personal Goodwill and Covenants Not to Compete.

Suppose taxpayer wishes to donate an S corporation's goodwill to a charitable remainder trust: The CRT cannot hold the goodwill separately while S corporation runs the business; otherwise, prohibited self-dealing would occur. Consider the following:

1. Do a Code § 368(a)(1)(F) reorganization, in which an identical corporation is formed to serve as the parent of the existing corporation, and the existing corporation converts or merges into a single member, disregarded LLC. See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

2. Presumably one is selling only some of the S corporation's assets, because contributing substantially all of the S corporation's assets to the CRT would be a deemed taxable liquidation.⁴⁸¹⁸ Move the retained assets to a separate LLC or otherwise separate them from the LLC to be donated.
3. Cleanse the LLC to be donated, to avoid the 100% CRT tax on UBTI. Letter Ruling 9340043 is a sample roadmap described in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship.
4. Donate the LLC to the CRT, keeping a 20-year fixed term interest. See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.
5. Complete the sale.

If you can use *Rauenhorst* to avoid step transaction,⁴⁸¹⁹ steps 3, 4 and 5 may be close together in time, but step 5 cannot be legally binding when you do step 3 or 4, so you may need a very understanding buyer.

II.Q.7. Exiting from or Dividing a Corporation

If selling less than all of a corporation's assets, see part II.Q.7.o Reorganizing to Sell a Business That Is Less Than All of a Corporation's Assets.

Double taxation applies to C corporations: taxation when the corporation earns profits and taxation when it distributes the profits. To encourage corporations to distribute profits (triggering the second level of taxation), penalties are imposed for accumulating excessive profits. Before discussing these concepts, consider strategies to avoid future double taxation.

Although dividends are taxed at the same rates as capital gains, taxation of dividends might be less favorable, in that the recipient of a dividend generally cannot use his or her basis to reduce the gain on sale and would not be able to defer tax (with respect to the amount treated as a dividend) if a note is used in the redemption.⁴⁸²⁰ A majority shareholder who waives a dividend that is paid to other shareholders does not recognize income if done for a bona fide business reason but does recognize income if the waiver is primarily to benefit family members.⁴⁸²¹ The

⁴⁸¹⁸ See fn 4997 in part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

⁴⁸¹⁹ See fn 4763 in part II.Q.6.e Assignment of Income on Property Being Sold.

⁴⁸²⁰ Code § 301(c)(1) states that the amount distributed as a dividend is ordinary income. Code § 316 generally provides that distributions are taxable as dividends to the extent of the corporation's current and accumulated earnings and profits. However, if and to the extent that a distribution is not a dividend, it is treated more favorably than a sale, in that such distributions first reduce the stock's basis, without any portion of the distribution considered to be a profit, until basis is exhausted. Code § 301(c)(2).

⁴⁸²¹ Rev. Rul. 56-431, holding:

On the basis of facts in the instant case it is deemed that the benefits to be afforded the taxpayer's relatives by the waiver of his right to share in the dividend payments was the primary purpose for signing the waiver. The alleged business purpose to be served, namely, the payment of a larger dividend to minority stockholders who are key employees to maintain their good will, is merely incidental. No opinion is expressed whether such a purpose might be appropriate in other circumstances. Since the amounts distributed to the minority stockholders do not impair the capital by any greater amount than if distributed pro rata to all stockholders, the waiver is not considered necessary to protect the working capital of the corporation. Thus, the taxpayer's disposition of his power to receive his pro rata share of any dividends declared by the

IRS will consider a ruling request approving a waiver when the amounts benefitting family members are relatively incidental.⁴⁸²² When a subordinated note's value became an issue relating to a merger with an unrelated third party, the IRS waived dividend treatment when the note was disposed of in a disproportionate manner.⁴⁸²³

Once commonly used strategy is to distribute the profits to owners through wages to owners (subject to immediate income and FICA taxation at individual rates) or through contributions to qualified retirement plans (subject to income taxation upon distribution from the plans).⁴⁸²⁴ However, note that a corporation may not deduct unreasonably high compensation. This issue applies primarily when profits come from the sale of goods (rather than services) or from the efforts of non-owners. Generally, a professional should be able to justify compensation based on profits derived directly from the professional's work.

When a shareholder takes money out of a corporation without declaring compensation, the transfer constitutes a distribution unless the shareholder can prove that it was a bona fide loan

corporation, through effecting payment of such pro rata share to his relatives (including his minor children) as well as to his employees by the signing of a waiver must be considered the realization of income by him to the extent of dividend payments waived.

For example, if the corporation in the instant case declared dividends of \$1000 on January 31, 1955, and, in accordance with the waiver previously executed by the majority stockholder, it paid the total of such dividends, pro rata, to the minority stockholders, the taxpayer, or majority stockholder, will be considered to have realized income to the extent of 65 percent of the total dividends paid, or \$650, since he owned 65 percent of the capital stock of the corporation. The minority stockholders will be considered to have received, as dividends, only \$350.

The above conclusion is not in conflict with Revenue Ruling 45, C. B. 1953-1, 178, which holds that the declaration of a dividend upon minority shares did not result in the receipt of income by the majority stockholder who had waived his right to share in the dividend. That ruling was based upon a factual situation in which no family or direct business relationship existed between the majority and minority stockholders and the arrangement was entered into only for bona fide business reasons, situations which do not exist in the instant case.

⁴⁸²² Section 3 of Rev. Proc. 67-14 provides that the IRS will consider a ruling request if all of the following conditions exist:

- .01. A bona fide business reason must exist for the proposed waiver of dividends.
- .02. The relatives of the stockholder proposing to waive his right to future dividends must not be in a position to receive more than 20 percent of the total dividends distributed to the nonwaiving shareholders. For this purpose the relatives of a waiving stockholder include his brother and sister (whether by the whole or half blood), spouse, ancestors, and lineal descendants, the spouses of his brothers and sisters (whether by the whole or half blood) and the spouses of his lineal descendants.
- .03. A ruling issued on a proposed waiver of dividends transaction will clearly indicate that the ruling will no longer be applicable if any change in the stock ownership during the waiver period enables nonwaiving relatives to receive more than 20 percent of a dividend, unless the change occurs because of death.
- .04. A ruling issued on a proposed waiver of dividends transaction will not be effective for a period longer than three years from the date of the ruling.
- .05. A request for a ruling on a proposed waiver of dividends transaction must be submitted to the National Office in accordance with Revenue Procedure 67-1, page 544, this Bulletin.

⁴⁸²³ Letter Ruling 201636037.

⁴⁸²⁴ See part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.

to the shareholder⁴⁸²⁵ or perhaps a repayment of a loan the shareholder made to the corporation.⁴⁸²⁶ Payments by the majority shareholder of a corporation may also constitute income to the recipient, notwithstanding the recipient's practically unsupported allegations that the payments were loan repayments.⁴⁸²⁷

Any assets that could appreciate may be held by the owners directly and rented to the corporation. The owners should hold these assets in one or more LLCs.

II.Q.7.a. Corporate Redemption

II.Q.7.a.i. Redemption Compared to Cross-Purchase

The remaining parts of this part II.Q.7.a and part II.Q.7.b Redemptions or Distributions Involving S Corporations describe various issues involved in corporate redemptions.

How might one compare a redemption to a purchase by a new or existing shareholder (a cross-purchase)? One should consider the reliability (or lack thereof) of the corporation as a purchaser compared with a shareholder as a purchaser. A cross-purchase generally avoids the tax issues that involve redemptions. If C corporation stock is involved, one might consider preserving for the buyer the possibility that \$10 million or more⁴⁸²⁸ of future gain might be excluded from income,⁴⁸²⁹ that benefit applies only to stock issued by the corporation, and a redemption that occurs to close to a stock issuance can disqualify the stock issuance.⁴⁸³⁰ The special rule for ordinary loss treatment of up to \$50,000 on the sale of stock also applies only to stock issued to the holder.⁴⁸³¹

⁴⁸²⁵ *Zang v. Commissioner*, T.C. Memo. 2017-55, which held that the payments constituted income, without specifying the type of income. The court set forth the law:

Objective factors are considered to determine the parties' intent and whether a bona fide loan occurred, and no single factor is dispositive. See *Welch v. Commissioner*, 204 F.3d 1228, 1230 (9th Cir. 2000), *aff'g* T.C. Memo. 1998-121; *Friedrich v. Commissioner*, 925 F.2d 180, 182 (7th Cir. 1991), *aff'g* T.C. Memo. 1989-393. We examine the following factors to determine whether the additional checks and cash withdrawals that petitioners received were loans:

- (1) the ability of the borrower to repay;
- (2) the existence or nonexistence of a debt instrument;
- (3) security, interest, a fixed repayment debt, and a repayment schedule;
- (4) how the parties' records and conduct reflect the transaction;
- (5) whether the borrower has made repayments;
- (6) whether the lender had demanded repayment;
- (7) the likelihood that the loans were disguised compensation for services; and
- (8) the testimony of the purported borrower and lender.

Welch v. Commissioner, 204 F.3d at 1230; see also *Kaider v. Commissioner*, T.C. Memo. 2011-174.

⁴⁸²⁶ See part II.G.20.b When Debt Is Recharacterized as Equity.

⁴⁸²⁷ *Dufresne v. Commissioner*, T.C. Memo. 2019-93, citing the factors from *Welch v. Commissioner* in fn 4825. Ironically, the taxpayer and his mother (to whom he had purportedly loaned money) made their living doing psychic readings, must not have been able to see far enough in the future to know to keep better records to satisfy the IRS or to keep her out of bankruptcy.

⁴⁸²⁸ Or ten times the stock's basis, if greater. Code § 1202(b)(1)(B).

⁴⁸²⁹ See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

⁴⁸³⁰ See text accompanying fns. 5242-5245 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁴⁸³¹ See part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244.

II.Q.7.a.ii. Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders

Instead of a shareholder selling all of his or her C corporation stock to a buyer, consider selling some of the stock and having the corporation redeem the rest. That way, instead of the buyer having to pay tax on dividends used to buy the stock, the buyer pays tax only on dividends the buyer uses to buy the seller's stock, and corporation completes the rest of the purchase, reducing the corporation's earnings and profits.⁴⁸³² This imposes double taxation (the corporation paying tax on its earnings used to buy the seller's stock, and the seller paying capital gain tax) instead of triple taxation (the corporation paying tax on its earnings used to pay a dividend to the buyer, then the buyer paying dividend tax, and the seller paying capital gain tax).⁴⁸³³

The redemption reduces the corporation's earnings and profits,⁴⁸³⁴ thereby reducing potential dividend treatment and facilitating an S election.⁴⁸³⁵ If the corporation does not make an S election, consider whether the buyer should first buy the stock directly from the corporation, which may make the stock eligible for a certain capital gain exclusion,⁴⁸³⁶ followed by the seller being redeemed after a waiting period that is generally at least two years.⁴⁸³⁷

This method, however, does not provide the buyer with basis except to the extent that the buyer, rather than the corporation, buys the seller's stock.

⁴⁸³² In *Zenz v. Quinlivan*, 213 F.2d 914 (6th Cir. 1954):

Prospective buyer did not want to assume the tax liabilities which it was believed were inherent in the accumulated earnings and profits of the corporation. To avoid said profits and earnings as a source of future taxable dividends, buyer purchased part of taxpayer's stock for cash. Three weeks later, after corporate reorganization and corporate action, the corporation redeemed the balance of taxpayer's stock, purchasing the same as treasury stock which absorbed substantially all of the accumulated earnings and surplus of the corporation.

The IRS and lower court did not like this tax-motivated structure. The Sixth Circuit said that taxpayers can use the structure that is most favorable, holding:

Since the intent of the taxpayer was to bring about a complete liquidation of her holdings and to become separated from all interest in the corporation, the conclusion is inevitable that the distribution of the earnings and profits by the corporation in payment for said stock was not made at such time and in such manner as to make the distribution and cancellation or redemption thereof essentially equivalent to the distribution of a taxable dividend.

The IRS agreed to follow *Zenz* in Rev. Ruls. 54-458 (1939 Code) and 55-745 (1954 Code), which was followed (although in a different context) by Rev. Ruls. 75-447, 77-226, 79-273, 81-186, and 84-114.

⁴⁸³³ For triple taxation, see parts II.Q.1.a.i.(b) C Corporation and II.Q.1.a.ii.(b) C Corporation Redemption (California).

⁴⁸³⁴ See fn. 4930, found in part II.Q.7.b.iv.(b) S Corporation Redemptions Using Life Insurance Proceeds.

⁴⁸³⁵ The main issue is avoiding possible termination of an S election described in part II.P.3.b.iii Excess Passive Investment Income, which is not difficult to avoid if one is attuned to the issue. See also parts II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds and II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

⁴⁸³⁶ See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

⁴⁸³⁷ See the text accompanying fns. 5242-5254 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

II.Q.7.a.iii. Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When

In a redemption by an entity taxed as a corporation, the seller generally is taxed on the extent to which the redemption proceeds exceed the seller's tax basis.⁴⁸³⁸ However, if the seller retains an interest in the corporation, or other family members also retain an interest, the redemption might be considered a distribution rather than a sale of the stock.⁴⁸³⁹ In other words, what for state law purposes is a redemption is not necessarily treated as a redemption for income tax purposes.⁴⁸⁴⁰

A redemption for a promissory note that is recast as a dividend⁴⁸⁴¹ is immediately taxed; installment sale deferral does not apply – not even to the capital gain portion.⁴⁸⁴²

On the other hand, taxing as a distribution the redemption of S corporation stock might be more favorable than taxing it as the sale of the stock, because generally the former allows basis to apply first to all of the proceeds⁴⁸⁴³ and the latter would use only the basis attributable to the block redeemed.

II.Q.7.a.iv. Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303

The rules are in part II.Q.7.a.iv.(a) Actual Payments.

For when transactions between corporations and shareholders constitute distributions, see part II.Q.7.a.iv.(b) Constructive Dividends.

⁴⁸³⁸ Code §§ 302(a), 1001.

⁴⁸³⁹ Code §§ 302(b)(2)(C) and 302(c) provide that family attribution can cause redemptions to be treated as distributions that might be taxed as dividends rather than as sales.

⁴⁸⁴⁰ However, since Code § 302(a) looks to the Code § 317(b) definition of redemption, generally a transaction must be a redemption for state law purposes before it might be considered a redemption for tax purposes.

⁴⁸⁴¹ See fn. 4820 in part II.Q.7 Exiting from or Dividing a Corporation.

⁴⁸⁴² Reg. §§ 1.301-1(b), 1.301-1(f); *Cox v. Commissioner*, 78 T.C. 1021 (1982); *Brams v. Commissioner*, 734 F.2d 290 (6th Cir. 1984), *aff'g* T.C. Memo. 1983-25. *Cox* held at 1028-1029:

Section 453(b) requires a sale. Section 301(c)(3)(A) is intended to tax distributions which impair a corporation's capital as capital gains (*Cloutier v. Commissioner*, 24 T.C. 1006, 1013 (1955)). We can see no reason why a taxpayer should be allowed to account for section 301(c)(3)(A) gain differently from income under section 301(c)(1), especially since the applicability of section 301(c)(3)(A) depends, to a large extent, upon the combination of a fortuitous lack of corporate earnings and profits and a small stock basis. We find no intent in section 301(c)(3)(A) to afford shareholders access to a more desirable method of accounting. Section 301(c)(3)(A) merely characterizes the gain as gain from a sale or exchange, it does not provide the sale needed for section 453(b).

⁴⁸⁴³ See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially the text accompanying fns. 4900-4901.

II.Q.7.a.iv.(a). Actual Payments

The amount of cash (or fair market value of property)⁴⁸⁴⁴ that a C corporation distributes to its shareholders:⁴⁸⁴⁵

- (1) Is included in income to the extent that it is a dividend.
- (2) Is applied against the adjusted basis of their stock, to the extent it is not a dividend and basis is available.
- (3) Constitutes “gain from the sale or exchange of property” to the extent (1) and (2) do not apply.

“Dividend” means any distribution of property⁴⁸⁴⁶ made by a corporation to its shareholders out of its earnings and profits accumulated after February 28, 1913, or out of its earnings and profits (E&P) of the taxable year (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year), the latter without regard to the amount of the E&P at the time the distribution was made.⁴⁸⁴⁷

Although qualified dividends are taxed at the same rate as capital gains,⁴⁸⁴⁸ redemptions have an advantage in that the shareholders may deduct tax basis against redemption proceeds. For stock passing from a decedent, the basis adjustment at death might eliminate any tax on redemption. Also, tax deferral using the installment method is not available if the state law redemption is treated for tax purposes as a dividend.⁴⁸⁴⁹ Furthermore, to the extent that a redemption recharacterized as a distribution is treated as a return of capital (because it exceeds earnings and profits and the excess is not treated as a dividend), presumably the distribution would be a return of basis pro rata, which could create unexpected capital gain if some shares have high basis and others have low basis.⁴⁸⁵⁰

Code §§ 302 and 303 set forth two methods by which a stock redemption can be qualified to avoid dividend treatment.

Code § 303 provides a way for the estate of a deceased shareholder to obtain cash from a closely held corporation to pay estate taxes and expenses while obtaining the favored tax

⁴⁸⁴⁴ Code § 301(b)(1). Fair market value is determined as of the date of the distribution.

Code § 301(b)(3).

⁴⁸⁴⁵ Code § 301(c).

⁴⁸⁴⁶ Reg. § 1.316-1(a)(1) refers to “any distribution of property as defined in section 317 in the ordinary course of business, even though extraordinary in amount.” Code § 317(a) provides:

For purposes of this part, the term “property” means money, securities, and any other property; except that such term does not include stock in the corporation making the distribution (or rights to acquire such stock).

However, cases tax as a constructive dividend either the value or the out-of-pocket costs of goods or services a corporation provides to a shareholder in that person’s capacity as such. See 764(3d) T.M. IV.F. (detailed discussion); *Federal Tax Coordinator* ¶J-2701 Distribution made for shareholder’s benefit in his capacity as a shareholder; Bittker & Eustice, ¶8.06. Constructive Distributions, *Federal Income Taxation of Corporations & Shareholders* (WG&L).

⁴⁸⁴⁷ Code § 316(a).

⁴⁸⁴⁸ Code § 1(h)(11).

⁴⁸⁴⁹ See Regs. §§ 1.301-1(d)(1)(ii), 1.301-1(h)(2)(i) and 1.301-1(l) and Code § 312(a)(2).

⁴⁸⁵⁰ See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially the text accompanying fn. 5118.

treatment of an exchange. To qualify for Code § 303, the estate's total stock holdings in the closely held corporation must exceed 35% of the total adjusted gross value of the estate, and the distribution must occur within 90 days after the expiration of the three-year limitations period for the assessment of estate tax set forth in Code § 6501(a) (subject to extension in Tax Court proceedings or if a Code § 6166 election is in place). The amount eligible for Code § 303 redemption cannot exceed the total administration expenses allowable under Code § 2053, including estate taxes and interest.

For amounts exceeding estate taxes and expenses, one of the following four exceptions must apply to qualify as an exchange under § 302:

- (a) The redemption is not essentially equivalent to a dividend. This applies on a case-by-case basis, based on whether the redemption results in a "meaningful" reduction in ownership.⁴⁸⁵¹
- (b) The redemption is substantially disproportionate. A substantially disproportionate redemption is one that decreases the shareholder's voting stock interest below 80% and the shareholder's ownership of outstanding stock below 50% immediately following the redemption. Attribution make this exception difficult to satisfy.⁴⁸⁵²
- (c) The redemption is a complete termination of the shareholder's interest. If the shareholder completely terminates his or her interest in the corporation, the redemption may qualify under Code § 302.⁴⁸⁵³ A gift of stock to a family member, followed by a redemption of the donor's remaining stock, qualified as a complete termination.⁴⁸⁵⁴
- (d) The redemption is a partial liquidation distribution. A distribution is a partial liquidation⁴⁸⁵⁵ if:⁴⁸⁵⁶
 - (1) it is not essentially equivalent to a dividend (determined at the corporate level rather than the shareholder level);
 - (2) the distribution is pursuant to a plan and occurs within the taxable year in which the plan is adopted or within the succeeding taxable year;
 - (3) the distribution is attributable to the distributing corporation's ceasing to conduct, or consists of the assets of, a qualified trade or business which the corporation has actively conducted for the five years immediately prior to the distribution; and

⁴⁸⁵¹ *U.S. v. Davis*, 397 U.S. 301 (1970); Rev. Ruls. 75-502, 75-512, and 78-401; in ruling favorably for the taxpayer, Letter Ruling 201918009 also cited Rev. Ruls. 75-502, 76-385, and 77-726 but not 78-401. The transaction should also have a business purpose. See footnote 31 of *H.J. Heinz Company & Subs. v. U.S.*, 99 AFTR 2d 2007-2940, 76 Fed. Cl. 570 (2007).

⁴⁸⁵² Code §§ 302(c)(1), 318. See Harris & Kessler, Constructive Ownership under Section 318, *Business Entities* (WG&L), Mar/Apr 2016.

⁴⁸⁵³ Reg. §§ 1.302-4, 1.302-4T. When a beneficiary grantor trust owns stock in a corporation, the beneficiary is the owner whose complete termination must be tested. Rev. Rul. 72-471, cited with approval in Rev. Rul. 85-13.

⁴⁸⁵⁴ Letter Ruling 200939011.

⁴⁸⁵⁵ Code § 302(b)(4) provides that redemption treatment applies if the distribution is:

- (A) in redemption of stock held by a shareholder who is not a corporation, and
- (B) in partial liquidation of the distributing corporation.

⁴⁸⁵⁶ Code § 302(e).

- (4) the distributing corporation is actively engaged in the conduct of a qualified trade or business.

However, a buy-sell agreement might convert what appears to be a redemption above into a deemed dividend followed by a deemed cross-purchase. The IRS takes this position if a shareholder has the primary, unconditional obligation to enter into a cross-purchase and the corporation redeems the stock instead.⁴⁸⁵⁷ However, the IRS does not take this position if a shareholder has a mere option to cross-purchase, if a shareholder's purchase obligation is contingent on the corporation not redeeming the stock, if a shareholder has the right to assign the purchase obligation to the corporation, or if the agreement is amended before a shareholder's purchase obligation became unconditional.⁴⁸⁵⁸

Also, certain Code § 302(d) redemptions and other transactions might be recharacterized if any of the company's stock "is structured so that dividends (as defined in section 316) paid by the corporation with respect to the stock are economically (in whole or in part) a return of the holder's investment (as opposed to only a return on the holder's investment)."⁴⁸⁵⁹

II.Q.7.a.iv.(b). Constructive Dividends

"A constructive dividend occurs when a corporation confers an economic benefit on a shareholder without the expectation of repayment." *Povolny Group, Inc. v. Commissioner*, T.C. Memo. 2018-37, in which payment to a related corporation was a dividend from the payor to the shareholder, followed by a contribution to capital from the shareholder to the recipient. The case was cited in fn 1164 in part II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt and fn. 1841 in part II.G.20.b When Debt Is Recharacterized as Equity. The case reasoned:

A *constructive* dividend occurs when "a corporation confers an economic benefit on a shareholder without the expectation of repayment." *Magnon v. Commissioner*, 73 T.C. 980, 993-94 (1980). A transfer between related corporations can be a constructive dividend to common shareholders even if those shareholders don't personally receive the funds. See, e.g., *Benson v. Commissioner*, T.C. Memo. 2004-272, 2004 WL 2698858, at *18-*22 (payments for purported royalties and nonexistent services between related entities were constructive dividend), supplemented by T.C. Memo. 2006-55, *aff'd*, 560 F.3d 1133 (9th Cir. 2009); *Shedd*, 2000 WL 1337177, at *6-*7 (advance between shareholder's entities was constructive dividend). That type of transfer is a constructive dividend if the common shareholder has direct or indirect control over the transferred property and the transfer wasn't made for a legitimate business purpose but instead primarily benefited the shareholder. *Shedd*, 2000 WL 1337177, at *6-*7; see also *Stinnett's Pontiac Serv., Inc. v. Commissioner*, 730 F.2d 634, 641 (11th Cir. 1984), *aff'g* T.C. Memo. 1982-314. Povolny had complete control over the transferred funds - he was and is the sole shareholder of PG and Archetone International and he owns 49% of Archetone Limited. And there was no discernible business reason for PG to make the transfer - as we found above, there was no hope of repayment or contemplation of interest. The transfer was undeniably bad for PG, but it was good for Povolny because it reduced his other entities' liabilities. PG's

Most planning for dividends and earnings & profits (E&P) under Code §§ 312 and 316 is beyond the scope of my materials.

payment of \$70,000 of Archetone International's and Archetone Limited's expenses was therefore a constructive dividend to Povolny.

When a corporation performs services for a shareholder without the expectation of repayment, the corporation cannot deduct its costs of performing those services, and that cost constitutes a dividend. *Magnon v. Commissioner*, 73 T.C. 980, 993-94 (1980), holding:

The provision of services by a corporation has been held to be "property" within the meaning of section 1.317-1, Income Tax Regs. *Loftin & Woodard, Inc. v. United States*, 577 F.2d 1206, 1214 (5th Cir. 1978); *Benes v. Commissioner*, 42 T.C. 358, 379 (1964), *affd.* 355 F.2d 929 (6th Cir. 1966).

Where a corporation confers an economic benefit on a shareholder without the expectation of repayment, that benefit becomes a constructive dividend, taxable to the shareholder, even though neither the corporation nor the shareholder intended a dividend. However, "not every corporate expenditure which incidentally confers economic benefit on a shareholder is a constructive dividend." The crucial test of the existence of a constructive dividend is whether "the distribution was primarily for the benefit of the shareholder". *Loftin & Woodard, Inc. v. United States*, *supra* at 1214; *Crosby v. United States*, 496 F.2d 1384, 1388 (5th Cir. 1974); *Sammons v. Commissioner*, 472 F.2d 449 (5th Cir. 1972), *affg., revg.*, and remanding a Memorandum Opinion of this Court.

In the instant case, Magnon Service performed the electrical contracting services in issue primarily for Magnon's benefit as sole shareholder. All of the properties on which the corporation did work were owned by Magnon either in his own name or with partners. Moreover, there is no evidence in the record that Magnon ever intended that Magnon Service would acquire any interest in the properties on which it was working. See *Benes v. Commissioner*, *supra* at 379. Rather, the main purpose for the agreement between the corporation and Magnon, as recorded in the corporation's minutes for December 7, 1970, was to provide the sole shareholder with needed services at a low cost and with loose terms for repayment. Given that Magnon Service's agreements to perform jobs for unrelated customers usually provided for higher profit margins and more definite terms for repayment than did its agreement with Magnon, any business purpose for the corporation entering into the transaction with Magnon would be inadequate to disturb our conclusion that the corporation's services were performed primarily for the sole shareholder's benefit. *Sammons v. Commissioner*, *supra* at 453.

Magnon Service also performed the services herein for Magnon without any expectation of being repaid for them. In *Benes v. Commissioner*, *supra*, we held (42 T.C. at 379) that where a taxpayer-shareholder has a corporation build property on his behalf, the costs incurred constitute a constructive dividend to the shareholder if: (1) He intends the property to be his from the very beginning, and (2) the shareholder has no intention of repaying the corporation either during or upon completion of the construction. Since Magnon apparently intended that the properties on which Magnon Service did work would remain his own from the start, he attempts to escape the result in *Benes* by arguing that he always intended to repay the corporation for its services. Based on the facts herein, however, we conclude that Magnon never intended to repay the corporation either during or upon the completion of its services and that Magnon's receipt of those services therefore constituted dividends to him during the years that the work was performed.

Elaborating on this test, *Palmarini, Inc. v. Commissioner*, T.C. Memo. 2022-119, explained:

Thus, there is a two-part test to determine a constructive dividend: (1) the expense must be nondeductible to the corporation, and (2) it must represent some economic gain, benefit, or income to the shareholder. See, e.g., *Dobbe v. Commissioner*, T.C. Memo. 2000-330, 80 T.C.M. (CCH) 577, 587, *aff'd*, 61 F. App'x 348 (9th Cir. 2003).

Palmarini, Inc. v. Commissioner, T.C. Memo. 2022-119, held:

Mr. Palmarini argues that Palmarini Inc. uses his personal rental properties for the business purpose of storing its equipment, and that therefore its payments related to these properties are deductible business expenses of Palmarini Inc. in the nature of rent, rather than a constructive dividend to him. Although we accept that Palmarini Inc. may have made some use of these properties for business purposes, there is no documented rental agreement between Palmarini Inc. and Mr. Palmarini for the corporation's use of the properties, nor are there any recurring payments from which to infer that anything like a rental arrangement existed. Furthermore, these payments by Palmarini Inc. are to third parties, rather than to Mr. Palmarini, and the description lines simply state the address of the property and specify neither the work done nor its business purpose. Palmarini Inc.'s expenses for maintenance and improvements to Mr. Palmarini's personal rental properties represent a constructive dividend to him, see, e.g., *Magnon*, 73 T.C. at 994; and, to the extent set out in the Commissioner's revised examination report and the parties' stipulation of settled issues, Mr. Palmarini may deduct the third parties' expenditures as rental expenses on Schedule E.

Mr. Palmarini further asserts that Palmarini Inc.'s corporate bylaws provide for paying the cost of medical care and of a vacation for officers and their families. No copy of Palmarini Inc.'s corporate bylaws was produced in these cases; but even if we assume their existence, a corporation's bylaws do not overrule the federal income tax consequences of a corporation's distributions to its shareholders. Financial benefits to be paid to officers have their federal tax consequences even if bylaws authorize those benefits to be paid. Palmarini Inc.'s payment of personal expenses for Mr. Palmarini and his family must be included in his income as a constructive dividend. See, e.g., *Dobbe*, 80 T.C.M. (CCH) at 587-88.

In *Starer v. Commissioner*, T.C. Memo. 2022-124, the shareholder played fast and loose with distributions in a few areas, including this one:

Respondent determined that petitioners' rent-free use of the home owned by Bayview during the years in issue constituted a constructive dividend from Bayview to petitioners equal to the \$24,000 per year fair rental value of the property. It is well settled that a shareholder's use of corporate property can result in a constructive dividend to him measured by the fair market rental value of the property. *Nicholls, North, Buse Co. v. Commissioner*, 56 T.C. 1225, 1240-42 (1971). Petitioners concede to residing in the home during that time without paying rent to Bayview and do not argue against the determination that their residence there constitutes a constructive dividend. Instead, they argue that an 87% reduction should be applied to the stipulated value of the constructive dividend on the basis of their self-serving testimony that they lived in only 13% of the home. We do not find this argument persuasive, and we have no obligation to accept uncorroborated self-serving testimony. *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986). In addition, petitioners have stipulated the amount of the constructive dividend and

Rule 91(e) requires that we bind them to this stipulation absent clearly contrary evidence.¹⁴ See *Jasionowski v. Commissioner*, 66 T.C. 312, 318 (1976) (holding that the Court has discretion not to be bound by the stipulation of facts where clearly contrary evidence is presented at trial). Consequently, we conclude petitioners' rent-free use of the home constitutes a constructive dividend from Bayview to petitioners in the amount stipulated by the parties.

¹⁴ The parties have also stipulated the resulting tax consequences if the Court determined petitioners' rent-free use of the home constitutes a constructive dividend.

A constructive dividend also applies when a corporation overpays shareholders. *Plentywood Drug, Inc. v. Commissioner*, T.C. Memo. 2021-45, analyzed rent a corporation paid to its shareholders. First, it discussed the principles:

The rules we apply today are well settled. Section 162(a) allows a taxpayer to deduct the "ordinary and necessary" expenses he pays in carrying on a trade or business. The Code specifically lists the rent paid by a business as one of these deductible expenses. Sec. 162(a)(3). But for an expense like rent to be ordinary and necessary, it must also be reasonable in amount. *United States v. Haskel Eng'g & Supply Co.*, 380 F.2d 786, 788 (9th Cir. 1967). Any part of rent that is unreasonable is not ordinary and necessary and thus not deductible. *Velvet Horn, Inc. v. Commissioner*, 41 T.C.M. (CCH) 1445, 1449 (1981).

The Commissioner does not often question the reasonableness of a rent agreed to by parties at arm's length. But he does sometimes look closely to the fairness of rent charged when landlord and tenant might not have an incentive to drive a hard bargain:

When there is a close relationship between lessor and lessee and in addition there is no arm's length dealing between them, an inquiry into what constitutes reasonable rental is necessary to determine whether the sum paid is in excess of what the lessee would have been required to pay had he dealt at arm's length with a stranger...

Place v. Commissioner, 17 T.C. 199, 203 (1951), *aff'd*, 199 F.2d 373 (6th Cir. 1952); see also *Safway Steel Scaffolds Co. of Ga. v. United States* 590 F.2d 1360, 1362 (5th Cir. 1979). The Commissioner sometimes suspects that a corporation might call a payment to its shareholders something like rent, which is deductible, when the economic reality is that it's a distribution of profits. If his suspicion turns out to be true, the seemingly deductible expense is actually a nondeductible dividend. Tax law calls such a dividend a "constructive" dividend because the corporation itself doesn't call it that on its books. See *Rosser v. Commissioner*, 99 T.C.M. (CCH) 1035, 1039 (2010); *Benson v. Commissioner*, 88 T.C.M. (CCH) 520, 534 (2004). Shareholders have to include constructive dividends in their taxable income under section 61(a)(7).⁷ These kinds of cases are disputes about value, and as in any valuation dispute we may use testimony from experts, see *Harmon City, Inc. v. United States*, 733 F.2d 1381, 1383-84 (10th Cir. 1984), and may look at all the circumstances of the case and the entire history of transactions between the parties, *Safway Steel Scaffolds*, 590 F.2d at 1362.

⁷ *Plentywood Drug* contends that the Commissioner may not recharacterize the rent that it pays as qualified dividends under section 482. But the Commissioner did not rely on section 482 to reclassify the rent. Section 482 caselaw is not relevant here.

Plentywood Drug contends that the Commissioner may not recharacterize the rent that it pays as qualified dividends under section 482. But the Commissioner did not rely on section 482 to reclassify the rent. Section 482 caselaw is not relevant here.

Plentywood Drug, Inc. v. Commissioner, T.C. Memo. 2021-45, determined that the rent paid was excessive:

A fair market rent is one at which “the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts.” Sec. 1.170A-1(c)(2), Income Tax Regs. The parties in these cases quickly realized that finding comparable properties in a town of 1,700 people in frontier Montana and then using them to come up with a fair market rent would be difficult. One problem right out of the chute is that Montana is a nondisclosure state. This means that real-estate data such as sales prices that appraisers can typically find in other states is legally confidential and simply not available. This issue is magnified in a town the size of Plentywood, which already has a limited number of even potentially comparable buildings. We heard entirely credible testimony that Montanans - perhaps especially Montanans in small communities - don’t commonly share details of their financial lives very readily with strangers. The Commissioner’s expert was particularly credible in his statement that when he tried to find information in Plentywood he did not identify himself as an IRS agent.

The court evaluated the competing experts’ views and determined that rent paid in two years exceeded fair rent by approximately 12% but declined to impose penalties, given the difficulty the valuation entailed.

II.Q.7.a.v. Redemptions and Alternative Minimum Tax

Before 2017 tax reform, life insurance proceeds received by a C corporation may have been taxed under the corporate alternative minimum tax (AMT) because insurance proceeds increase a corporation’s book earnings, but are not included in the taxable income of the corporation.⁴⁸⁶⁰ AMT did not apply to corporations whose average annual gross receipts did not exceed a threshold⁴⁸⁶¹ or to S corporations.⁴⁸⁶²

That version of corporate AMT has been repealed. However, a corporation with more than \$1 billion of annual income is subject to corporate AMT. Notice 2023-64 imposes more unfavorable rules regarding book earnings than the old corporate AMT did, but of course only to a selected few C corporations.

II.Q.7.a.vi. Redemptions and Accumulated Earnings Tax

Generally, a C corporation that accumulates funds could also be subject to the 20% accumulated earnings tax.⁴⁸⁶³ The tax applies to every corporation “formed or availed of for the purpose of avoiding the income tax with respect to its shareholders or the shareholders

⁴⁸⁶⁰ Code § 56(g).

⁴⁸⁶¹ Code § 55(e)(1).

⁴⁸⁶² Code § 56(g)(6).

⁴⁸⁶³ Code § 531.

of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed,⁴⁸⁶⁴ except:⁴⁸⁶⁵

- (1) a personal holding company (as defined in section 542),
- (2) a corporation exempt from tax under subchapter F (section 501 and following), or
- (3) a passive foreign investment company (as defined in section 1297).

Thus, it complements the personal holding company tax, which is also designed to force C corporations to declare dividends. See part II.A.1.e Personal Holding Company Tax.

The tax is on “accumulated taxable income.”⁴⁸⁶⁶ “Accumulated taxable income” means the adjusted taxable income,⁴⁸⁶⁷ minus the sum of the dividends paid deduction⁴⁸⁶⁸ and the accumulated earnings credit.⁴⁸⁶⁹

The accumulated earnings credit works as follows:

- “If the corporation is a mere holding or investment company, the accumulated earnings credit is the amount (if any) by which \$250,000 exceeds the accumulated earnings and profits of the corporation at the close of the preceding taxable year.”⁴⁸⁷⁰
- Otherwise, the accumulated earnings credit is equal to such part of the earnings and profits for the taxable year as are retained for the business’ reasonable needs, minus a certain deduction relating to U.S.-source capital gains.⁴⁸⁷¹ The dividends paid deduction⁴⁸⁷² reduces retained earnings and profits.⁴⁸⁷³ The accumulated earnings credit for such a corporation is no less than the amount by which \$250,000 exceeds the corporation’s accumulated earnings and profits at the close of the preceding taxable year.⁴⁸⁷⁴ The \$250,000 amount is reduced to \$150,000 for a corporation the principal function of which is the performance of services in the field of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.⁴⁸⁷⁵

Let’s examine how the \$250,000 credit would work for a mere holding or investment company. Suppose the accumulated earnings and profits at the close of the preceding taxable year were \$250,000 or more. The credit would be zero, because \$250,000 did not exceed the accumulated earnings and profits at the close of the preceding taxable year. Suppose the accumulated earnings and profits at the close of the preceding taxable year were \$200,000.

⁴⁸⁶⁴ Code § 532(a).

⁴⁸⁶⁵ Code § 532(b).

⁴⁸⁶⁶ Code § 531.

⁴⁸⁶⁷ Code § 535(b) adjusts taxable income, including to deduct federal income and certain other taxes, deduct charitable contributions with modifications, disallow the dividends-received deductions, allow capital losses subject to modifications, and deduct U.S.-source capital gains.

⁴⁸⁶⁸ Code § 561.

⁴⁸⁶⁹ Code § 535(b).

⁴⁸⁷⁰ Code § 535(c)(3).

⁴⁸⁷¹ Code § 535(c)(1).

⁴⁸⁷² Code § 561.

⁴⁸⁷³ Code § 535(c)(1).

⁴⁸⁷⁴ Code § 535(c)(2)(A).

⁴⁸⁷⁵ Code § 535(c)(2)(B).

The credit would be \$50,000, leaving \$200,000 subject to the tax. The sweet spot would seem to be \$125,000 accumulated earnings and profits at the close of the preceding taxable year, where a credit of \$125,000 (\$250,000 minus \$125,000) would offset the \$125,000 accumulated earnings and profits at the close of the preceding taxable year. Of course, that assumes that the corporation is not a personal holding company, which is exempt from the accumulated earnings tax.⁴⁸⁷⁶

Earnings and profits of a corporation accumulating beyond the business' reasonable needs is determinative of the purpose to avoid the income tax with respect to shareholders, unless the corporation by the preponderance of the evidence proves otherwise.⁴⁸⁷⁷ A corporation being a mere holding or investment company is prima facie evidence of the purpose to avoid income tax with respect to shareholders.⁴⁸⁷⁸ If the corporation does not have the liquidity to pay a cash distribution, it should consider declaring a Code § 565 consent dividend,⁴⁸⁷⁹ being extra careful about the consent dividend if a trust that makes charitable contributions is a shareholder.⁴⁸⁸⁰

However, reasonable business needs include the business' reasonably anticipated needs, funding a redemption to pay estate tax or expenses of estate administration, or is being used to fund certain redemptions of charitable shareholders.⁴⁸⁸¹ Consider documenting the business purposes for accumulating earnings in annual meeting minutes. If the earnings get too high and cannot be reduced through high but reasonable compensation (especially qualified retirement plans) or rent, consider making an S election.⁴⁸⁸²

II.Q.7.a.vii. Corporate Liquidation

When a corporation liquidates completely:

- Generally, the liquidating corporation recognizes gain or loss on the distribution of property in complete liquidation as if such property were sold to the distributee at its fair market value.⁴⁸⁸³ Code § 337 (liquidation of an 80%-owned corporate subsidiary) and other provisions of Code § 336 provide exceptions. The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).⁴⁸⁸⁴

⁴⁸⁷⁶ See fn 4865 and part II.A.1.e Personal Holding Company Tax.

⁴⁸⁷⁷ Code § 533(a).

⁴⁸⁷⁸ Code § 533(a).

⁴⁸⁷⁹ CCA 201653017 asserted accumulated earnings tax on a holding company and would not accept lack of liquidity as an excuse, pointing to the consent dividend procedure and relying on the discussion of that procedure's purpose in TAM 9124001.

⁴⁸⁸⁰ See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, including the paragraph accompanying fn. 4943.

⁴⁸⁸¹ Code § 537(a)(1), (2).

⁴⁸⁸² Although S corporations cannot have excessive income from investments, that prohibition is easy to avoid using a modest amount of oil and gas investments. See part II.P.3.b.iii Excess Passive Investment Income, especially fn. 3972.

⁴⁸⁸³ Code § 336(a).

⁴⁸⁸⁴ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

- The shareholder's proceeds are considered to be proceeds from selling the shareholder's stock.⁴⁸⁸⁵ Such proceeds are reduced by any liabilities the shareholders assume.⁴⁸⁸⁶ Subject to a particular exception, dividend taxation does not apply to the deemed sale proceeds.⁴⁸⁸⁷

Rather than applying installment sale rules to the gain on sale, basis is applied to each receipt until basis runs out, and then gain is recognized for proceeds in excess of basis.⁴⁸⁸⁸

"As a general rule, losses resulting from a complete liquidation will be recognized only after the corporation has made its final distribution."⁴⁸⁸⁹ However, if at least 99% of the proceeds have been paid to the shareholders, they can recognize loss on the liquidation at that time.⁴⁸⁹⁰ Furthermore, "certain exceptions to the general rule have been recognized by the courts where the stock is shown to have been worthless prior to complete liquidation, such as, for example, where the corporation's liabilities exceeded its assets,"⁴⁸⁹¹ or "where the losses are so reasonably certain in fact and ascertainable in amount as to justify their deductions before they were absolutely realized."⁴⁸⁹²

Suppose a corporation transfers assets to a trust for the benefit of the shareholders to take of post-liquidation winding-up issues, such as contingent liabilities. In such a case, the shareholders are considered the "owners" of the trust under the grantor trust rules.⁴⁸⁹³ If in a

⁴⁸⁸⁹ *Schmidt v. Commissioner*, 55 T.C. 335, 340 (1970), citing *Dresser v. United States*, 55 F.2d 499, 511-512 (Ct. Cl. 1932), *certiorari denied* 287 U.S. 635 (1932); *Turner Construction Co. v. United States*, 364 F.2d 525 (2nd Cir. 1966); and Rev. Rul. 68-348.

⁴⁸⁹⁰ Rev. Rul. 69-334.

⁴⁸⁹¹ *Schmidt v. Commissioner*, 55 T.C. 335, 340-341 (1970), citing *Dresser v. United States*, 55 F.2d 499, 512 (Ct. Cl. 1932), *certiorari denied* 287 U.S. 635 (1932); *Industrial Rayon Corp. v. Commissioner*, 94 F.2d 383 (6th Cir. 1938); *Gowen v. Commissioner*, 65 F.2d 923 (6th Cir. 1933), *affirming* 24 B.T.A. 1028, *certiorari denied* 290 U.S. 687 (1933); *Weintraub v. United States*, 26 A.F.T.R. 1183 (E.D. Pa. 1939).

⁴⁸⁹² *Schmidt v. Commissioner*, 55 T.C. 335, 341 (1970), citing *Lucas v. American Code Co.*, 280 U.S. 445 (1930); *Commissioner v. Winthrop*, 98 F.2d 74 (2nd Cir. 1938), *affirming* 36 B.T.A. 314 (1937), *acq.* 1940-1 C.B. 5. Further discussing *Winthrop*, *Schmidt* stated:

The *Winthrop* case was held to be controlling in *Palmer v. United States*, an unreported case (D. Conn. 1958, 1 A.F.T.R. 2d 863, 58-1 U.S.T.C. par. 9288). In that case, a corporation contracted to sell all of its assets, except cash, to another corporation and adopted a resolution to liquidate and dissolve. The purchase price was paid, 70 percent in cash and 30 percent in notes secured by a first mortgage on the property sold. The District Court held that the taxpayer sustained a loss in 1952, the year of the sale, since there was no uncertainty as to the amount of cash and the notes, secured by the mortgage, could reasonably be valued at par.

⁴⁸⁹³ Rev. Rul. 72-137. Rev. Proc. 82-58 which specifies the conditions that must be present before the IRS will consider issuing advance rulings whether a liquidating trust is treated as such or as a business entity under Reg. § 301.7701-4, and Rev. Proc. 91-15 provides a checklist that must accompany all such requests. For rules governing liquidating trusts generally, see part II.D.4.b Liquidating Trusts. For grantor trusts generally, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

subsequent year, the shareholders or the trust discharge a contingent liability of the corporation, such discharge will give rise to a capital loss in the year of discharge.⁴⁸⁹⁴

One might decide that the above constitutes substantial authority for taking the following position:

1. When shareholders liquidate a corporate at a loss and some of the liquidating proceeds are escrowed to cover contingent liabilities, the loss is recognized at the time the proceeds are escrowed based on the amount of the escrow.
2. Any payments from the escrow for contingent liabilities are recognized as capital losses when paid. Any amounts escrowed for known liabilities would constitute liabilities assumed, reducing the net sale proceeds and causing or increasing the loss.

It has been suggested to me that the IRS might take a rigid position that losses are not allowed until all contingencies are finally resolved and that the above position is stronger when a liquidating trust is used rather than an escrow account. However, the language quoted in the analysis persuades me enough to take the deduction as described above.

II.Q.7.a.viii. Code § 318 Family Attribution under Subchapter C

Code § 318(a), "General rule," provides that, for purposes of those provisions of Subchapter C ("Corporate Distributions and Adjustments," which is Code §§ 301-386) to which the rules contained in Code § 318 are expressly made applicable:

(1) *Members of family.*

(A) *In general.* An individual shall be considered as owning the stock owned, directly or indirectly, by or for—

- (i) his spouse (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance), and
- (ii) his children, grandchildren, and parents.

(B) *Effect of adoption.* For purposes of subparagraph (A)(ii), a legally adopted child of an individual shall be treated as a child of such individual by blood.

(2) *Attribution from partnerships, estates, trusts, and corporations.*

(A) *From partnerships and estates.* Stock owned, directly or indirectly, by or for a partnership or estate shall be considered as owned proportionately by its partners or beneficiaries.

(B) *From trusts.*

- (i) Stock owned, directly or indirectly, by or for a trust (other than an employees' trust described in section 401(a) which is exempt from tax under

⁴⁸⁹⁴ Rev. Rul. 72-137.

section 501(a)) shall be considered as owned by its beneficiaries in proportion to the actuarial interest of such beneficiaries in such trust.

- (ii) Stock owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such person.

(C) *From corporations.* If 50 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such person shall be considered as owning the stock owned, directly or indirectly, by or for such corporation, in that proportion which the value of the stock which such person so owns bears to the value of all the stock in such corporation.

(3) *Attribution to partnerships, estates, trusts, and corporations.*

(A) *To partnerships and estates.* Stock owned, directly or indirectly, by or for a partner or a beneficiary of an estate shall be considered as owned by the partnership or estate.

(B) *To trusts.*

- (i) Stock owned directly or indirectly, by or for a beneficiary of a trust (other than an employees' trust described in section 401(a) which is exempt from tax under section 501(a)) shall be considered as owned by the trust, unless such beneficiary's interest in the trust is a remote contingent interest. For purposes of this clause, a contingent interest of a beneficiary in a trust shall be considered remote if, under the maximum exercise of discretion by the trustee in favor of such beneficiary, the value of such interest, computed actuarially, is 5 percent or less of the value of the trust property.

- (ii) Stock owned, directly or indirectly, by or for a person who is considered the owner of any portion of a trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by the trust.

(C) *To corporations.* If 50 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such corporation shall be considered as owning the stock owned, directly or indirectly, by or for such person.

(4) *Options.* If any person has an option to acquire stock, such stock shall be considered as owned by such person. For purposes of this paragraph, an option to acquire such an option, and each one of a series of such options, shall be considered as an option to acquire such stock.

(5) *Operating rules.*

(A) *In general.* Except as provided in subparagraphs (B) and (C), stock constructively owned by a person by reason of the application of paragraph (1), (2), (3), or (4),

shall, for purposes of applying paragraphs (1), (2), (3), and (4), be considered as actually owned by such person.

- (B) *Members of family.* Stock constructively owned by an individual by reason of the application of paragraph (1) shall not be considered as owned by him for purposes of again applying paragraph (1) in order to make another the constructive owner of such stock.
- (C) *Partnerships, estates, trusts, and corporations.* Stock constructively owned by a partnership, estate, trust, or corporation by reason of the application of paragraph (3) shall not be considered as owned by it for purposes of applying paragraph (2) in order to make another the constructive owner of such stock.
- (D) *Option rule in lieu of family rule.* For purposes of this paragraph, if stock may be considered as owned by an individual under paragraph (1) or (4), it shall be considered as owned by him under paragraph (4).
- (E) *S Corporation treated as partnership.* For purposes of this subsection —
 - (i) an S corporation shall be treated as a partnership, and
 - (ii) any shareholder of the S corporation shall be treated as a partner of such partnership.

The preceding sentence shall not apply for purposes of determining whether stock in the S corporation is constructively owned by any person.

Code § 318(b) refers to provisions applying Code § 318.

See Harris & Kessler, “Constructive Ownership under Section 318,” *Business Entities* (WG&L), Mar/Apr 2016.

Note that Code § 318(a)(2)(B)(ii) expressly recognizes the deemed owner of the trust under the grantor trust rules as an owner of the trust’s stock.⁴⁸⁹⁵ Letter Rulings have applied this provision for purposes of avoiding a deemed transfer that might have limited net operating losses under Code § 382,⁴⁸⁹⁶ for purposes of determining whether a redemption constituted a dividend instead of a sale under Code § 302,⁴⁸⁹⁷ or certain tests relating to a real estate investment trust (REIT) under Code § 856.⁴⁸⁹⁸

⁴⁸⁹⁵ See part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation; fn 6571.

⁴⁸⁹⁶ Letter Ruling 199918051.

⁴⁸⁹⁷ Code § 302 is described in part II.Q.7.a.iii Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When. Code § 318 is applied in Letter Rulings 9035038, 9224036, 9810020, 201328025, and 201805011.

⁴⁸⁹⁸ Letter Ruling 200132008.

II.Q.7.b. Redemptions or Distributions Involving S Corporations

II.Q.7.b.i. Redemptions or Distributions Involving S corporations - Generally

An S corporation shareholder's taxation depends on whether the corporation has any accumulated earnings and profits ("E&P") from any part of its prior existence as a C corporation.⁴⁸⁹⁹

When reviewing this part II.Q.7.b.i, see parts:

- II.Q.7.b.i.(a) IRS View of Estimating Accumulated Earnings & Profits, and
- II.Q.7.b.i.(b) IRS View of Taxing Distributions When S Corporation Has Accumulated Earnings & Profits.

Code § 1368(a), "General rule," provides:

A distribution of property made by an S corporation with respect to its stock to which (but for this subsection) section 301(c) would apply shall be treated in the manner provided in subsection (b) or (c), whichever applies.

Code § 1368(b), "S corporation having no earnings and profits, provides:

In the case of a distribution described in subsection (a) by an S corporation which has no accumulated earnings and profits -

- (1) *Amount applied against basis.* The distribution shall not be included in gross income to the extent that it does not exceed the adjusted basis of the stock.
- (2) *Amount in excess of basis.* If the amount of the distribution exceeds the adjusted basis of the stock, such excess shall be treated as gain from the sale or exchange of property.

Code § 1368(c), "S corporation having earnings and profits, provides:

In the case of a distribution described in subsection (a) by an S corporation which has accumulated earnings and profits -

- (1) *Accumulated adjustments account.* That portion of the distribution which does not exceed the accumulated adjustments account shall be treated in the manner provided by subsection (b).
- (2) *Dividend.* That portion of the distribution which remains after the application of paragraph (1) shall be treated as a dividend to the extent it does not exceed the accumulated earnings and profits of the S corporation.

⁴⁸⁹⁹ For how E&P affects taxation of distributions from a C corporation, see fn 4847 in part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

- (3) *Treatment of remainder.* Any portion of the distribution remaining after the application of paragraph (2) of this subsection shall be treated in the manner provided by subsection (b).

Except to the extent provided in regulations, if the distributions during the taxable year exceed the amount in the accumulated adjustments account at the close of the taxable year, for purposes of this subsection, the balance of such account shall be allocated among such distributions in proportion to their respective sizes.

Thus, if the corporation has an S election in place, then taxation as a distribution generally is favorable, in that distributions generally reduce basis,⁴⁹⁰⁰ without any part of the distribution being treated as profit on the sale of stock.⁴⁹⁰¹ Redemptions might very well be taxed as distributions,⁴⁹⁰² so long as they are not partial liquidations.⁴⁹⁰³ This can help when a corporation wants to make a distribution to a QSST without the QSST having to pay the beneficiary.⁴⁹⁰⁴

The accumulated adjustments account (AAA) is an account of the S corporation and is not apportioned among shareholders.⁴⁹⁰⁵ AAA is increased for the taxable year of the corporation by the sum of the following items with respect to the corporation for the taxable year:⁴⁹⁰⁶

- (i) The items of income described in section 1366(a)(1)(A) other than income that is exempt from tax;
- (ii) Any nonseparately computed income determined under section 1366(a)(1)(B); and
- (iii) The excess of the deductions for depletion over the basis of property subject to depletion unless the property is an oil or gas property the basis of which has been allocated to shareholders under section 613A(c)(11).

AAA is decreased for the taxable year of the corporation by the sum of the following items with respect to the corporation for the taxable year:⁴⁹⁰⁷

- (A) The items of loss or deduction described in section 1366(a)(1)(A);
- (B) Any nonseparately computed loss determined under section 1366(a)(1)(B);

⁴⁹⁰⁰ Note, however, that distributions from a Qualified Subchapter S Subsidiary to its parent are ignored. See Reg. § 1.1361-4(a)(1)(ii), the principles of which were adopted in Reg. § 1.1361-5(a)(4), Example (4).

⁴⁹⁰¹ See Rev. Rul. 95-14. However, life insurance and other nontaxable income will increase stock basis but will not increase the accumulated adjustments account (AAA). Code § 1368(e)(1). Similarly, premiums paid on life insurance owned by the S corporation do not reduce AAA. Rev. Rul. 2008-42. If the S corporation has prior C corporation earnings and profits, then a distribution in excess of AAA will constitute a taxable dividend rather than merely being applied against the basis acquired by that life insurance or other nontaxable income. Code §§ 1368(c)(2), 301(c).

⁴⁹⁰² See part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

⁴⁹⁰³ See fns. 4855-4856 and accompanying text.

⁴⁹⁰⁴ See part III.A.3.e.i.(a) QSSTs Generally.

⁴⁹⁰⁵ Reg. § 1.1368-2(a)(1).

⁴⁹⁰⁶ Reg. § 1.1368-2(a)(2).

⁴⁹⁰⁷ Reg. § 1.1368-2(a)(3)(i).

(C) Any expense of the corporation not deductible in computing its taxable income and not properly chargeable to a capital account, other than -

(1) Federal taxes attributable to any taxable year in which the corporation was a C corporation; and

(2) Expenses related to income that is exempt from tax; and

(D) The sum of the shareholders' deductions for depletion for any oil or gas property held by the corporation described in section 1367(a)(2)(E).

The above reductions may decrease AAA below zero.⁴⁹⁰⁸ Distributions under Code § 1368(b) or (c)(1) reduce AAA, but not below zero.⁴⁹⁰⁹

In corporations with accumulated C corporation earnings and profits, consider electing to treat the distribution first as a dividend coming from C corporation earnings and profits (E&P),⁴⁹¹⁰ if the taxation is comparable, to try to cleanse the S corporation of the E&P taint.⁴⁹¹¹

In *Sarvak v. Commissioner*, T.C. Memo. 2018-68, a taxpayer who received an excess distribution argued that applicable state law required him to return the distribution, converting the excess distribution into a debt he owed the corporation.⁴⁹¹² The court rejected his argument. Certainly a properly advised taxpayer could borrow using a bona fide loan, and I consider this case a warning that taxpayers who skirt near the edge on distributions have appropriate documentation to support any borrowing they purport to have made.

See also part II.Q.7.a.vii Corporate Liquidation. Any activity for the year that affects basis is applied in determining the basis of the liquidated stock.⁴⁹¹³

For the termination of the S election wiping out AAA, see part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

⁴⁹⁰⁸ Reg. § 1.1368-2(a)(3)(ii), which further provides:

The AAA is decreased by noncapital, nondeductible expenses under paragraph (a)(3)(i)(C) of this section even though a portion of the noncapital, nondeductible expenses is not taken into account by a shareholder under § 1.1367-1(g) (relating to the elective ordering rule). The AAA is also decreased by the entire amount of any loss or deduction even though a portion of the loss or deduction is not taken into account by a shareholder under section 1366(d)(1) or is otherwise not currently deductible under the Internal Revenue Code. However, in any subsequent taxable year in which the loss, deduction, or noncapital, nondeductible expense is treated as incurred by the corporation with respect to the shareholder under section 1366(d)(2) or § 1.1367-1(g) (or in which the loss or deduction is otherwise allowed to the shareholder), no further adjustment is made to the AAA.

⁴⁹⁰⁹ Reg. § 1.1368-2(a)(3)(iii).

⁴⁹¹⁰ Code § 1368(e)(3). See part II.P.3.b Conversion from C Corporation to S Corporation, for special considerations involving S corporations that used to be C corporations.

⁴⁹¹¹ In addition to E&P causing taxation of distributions, E&P can generate a tax or even terminate the S election if the corporation has too much "passive" income. See part II.P.3.b.iii Excess Passive Investment Income.

⁴⁹¹² His argument was a bit more confused and convoluted than that, but that ultimately was the essence.

⁴⁹¹³ Letter Ruling 200106009.

For the effect of a transfer on the allocation of income reported on the involved shareholders' K-1s, see part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, within part III.B.2.j Tax Allocations upon Change of Interest.

II.Q.7.b.i.(a). IRS View of Estimating Accumulated Earnings & Profits

This part II.Q.7.b.i.(a) describes the view set forth in the IRS' LB&I Concept Unit, "General Overview of Distributions and Accumulated Earnings & Profits," Document Control Number (DCN) SCO-C-009 (6/18/2020), which is referred to in this part as "the resource."

The resource explains generally how to estimate accumulated earnings & profits (AE&P):

Neither the Code nor the Treasury regulations define earnings and profits (E&P) but for purposes of this practice unit, E&P and AE&P are synonymous.

AE&P starts with taxable income. It is increased or decreased by the items described in IRC 312 and the regulations (money, principal amount of corporate debt, and the adjusted basis of other property distributed by the corporation). Generally, there is little difference between the AE&P of a C corporation and the accumulated retained earnings of that C corporation. As a result, a C corporation's retained earnings are sometimes used as an estimate of its AE&P....

Before continuing the analysis, determine whether the tax return is reliable by reconciling the corporation's balance sheet and Schedule M-2. Complete both worksheets in the "Reconciliation" Excel workbook.

The workbook should be prepared for the year under examination. But since the taxability of Adjustments Account, Shareholders' distributions is cumulative over the life of the S corporation, the examiner may want to prepare the worksheet for multiple years. If there is a difference between the balance sheet and Schedule M-2, ask the taxpayer to explain. Generally, there are three possible explanations:

- The numbers on the balance sheet are incorrect and cannot be relied upon.
- An entry was made directly to "Retained Earnings" thereby skipping the income statement and tax return. Examine all such entries to determine if taxable income is under-reported.
- The distribution sections of the Schedule K and Schedule M-2 are incomplete or incorrect.
- The above analysis of the reconciliation workbook should detect if Schedule K and Schedule M-2 are incorrect. If no entries were made directly to the retained earnings other than actual distributions, then this analysis yields the distribution amount. Always reconcile any differences.

The resource mentions IRM 4.10.3.9.4.23 as helpful in implementing the above. Then it explains how to discern AE&P from 2018 Form 1120S:

There are several ways to determine if an S corporation has AE&P. An S corporation reports dividend distributions on Form 1120S, Schedule K, line 17c and non-dividend

distributions on Form 1120S, Schedule K, line 16d. If the S corporation reports a dividend distribution on line 17c or on Schedule M-2, column (c), then it's reporting it has AE&P....

Per the Instructions for Form 1120S, the taxpayer may estimate the AE&P amount based on retained earnings of the last year of the C corporation. If an amount is on Schedule M-2, line 1(c), ask how the amount was determined and request documentation to support the computation.

DECISION POINT: If there is a dividend distribution reported on Form 1120S, Schedule K, line 17c, or AE&P amount reported on Form 1120S, Schedule M-2, then the S corporation has AE&P. Use this Practice Unit to calculate the AE&P. Next, use the Distributions with AE&P Practice Unit to calculate how much of the distribution is a dividend.

CAUTION: If Form 1120S, Schedule M-2 is blank, don't automatically assume the S corporation does not have AE&P. S corporations sometimes fail to report AE&P on the return.

If the return does not report a dividend distribution or AE&P on Schedule M-2, then gather additional facts to determine if AE&P exists. Since an S corporation does not accumulate AE&P once it becomes an S corporation, determine how such AE&P was acquired.

An S corporation can accumulate or acquire AE&P in the following situations:

1. The S corporation has AE&P from years before the S election was made and it reported in those prior years as a C corporation.
2. The S corporation merges with a C corporation that has AE&P and the S corporation is the surviving corporation.
3. A wholly owned C corporation that has AE&P liquidates tax-free into the S corporation. The most common scenario is when an S corporation makes a QSub election for its wholly owned C corporation.

The resource then explains how to identify if one of these situations caused the S corporation to accumulate or acquire AE&P:

The S Corporation Has AE&P from Years When It Reported as a C Corporation

Look at page 1 of the Form 1120S. If the S corporation effective date (Box A) is later than the incorporation date (Box E), the S corporation may have AE&P from when it reported as a C corporation. However, the C corporation could have operated at a loss, resulting in no net AE&P.

The S Corporation Merges With a C corporation That Has AE&P and the S Corporation Is the Surviving Corporation

A tax-free merger of a C corporation into an S corporation results in the AE&P of the C corporation being carried over to the surviving S corporation. The balance sheet of the C corporation is added to the balance sheet of the S corporation

The S Corporation Merges With a C corporation That Has AE&P and the S Corporation Is the Surviving Corporation In a tax-free merger, the S election date reported on Form 1120S, Page 1, Box A is the same as the date incorporated reported on Form 1120S, Page 1, Box E. Changes in commonly controlled entities on yK1 from year to year can also be used to identify merged entities. If there are indications that a merger took place, interview an officer or shareholder with knowledge of the company's history, capital structure, and operations to identify such merger transactions.

A wholly Owned C Corporation That Has AE&P Liquidates Tax-free into the S Corporation

A common scenario of a tax-free liquidation is when an S corporation makes a qualified subchapter S (QSub) election for its wholly owned C corporation. If a valid QSub election is filed for the C corporation, then the C corporation is deemed to liquidate into the S corporation and treated as its division at the close of the day before the QSub election is effective. The liquidation of a corporation into the parent is generally a tax-free liquidation where the S corporation takes a carryover basis in the QSub's assets.

A significant difference between the retained earnings and the Accumulated Adjustment Account (AAA) is an indication of AE&P. Interview an officer or shareholder with knowledge of the company's history, capital structure, and operations to identify such liquidation transactions. Consider requesting IDRS information to identify QSub elections. yK1 can also be used to identify Qsubs. The S election and date incorporated may be the same.

The resource mentions IRM 4.10.3 as helpful for the above. Then it continues:

DECISION POINT: Determine the amount of AE&P if at least one of the three events exists:

- The S corporation has AE&P from previous C corporation years,
- The S corporation merged with a C corporation with AE&P, or
- A C corporation with AE&P liquidates tax-free into the S corporation.

If not, then you should analyze distributions without AE&P. See the Taxability of Distributions Not From Accumulated Earnings & Profits Practice Unit for more information.

CAUTION: If there are no identifiable corporate events in which AE&P may have been accumulated or acquired, but there is a significant unexplained difference in beginning retained earnings and beginning AAA, request that the taxpayer reconcile the two amounts, as there may be another issue.

Determining the Amount of AE&P

There are simple ways to estimate an S corporation's amount of AE&P:

1. Use the amount reported on Form 1120S, Schedule B, line 9.
2. Obtain a copy of the entity's last C corporation return, just before it made its S election, and use the amount reported as retained earnings.
3. Using Form 1120S, take the difference between Beginning Retained Earnings (Schedule L, line 24b) less Beginning AAA (Schedule M-2, line 1a) less Beginning OAA (Schedule M2, line 1d) (RE>AAA+OAA)

Once the estimated amount of AE&P is determined, adjust as discussed below.

CAUTION: The return available closest in time to the AE&P acquisition event identified should be used for the most accurate estimate of AE&P.

CONSULTATION: If none of the above estimates are viable, then you should contact the Corporate Distributions & Adjustments Practice Network for guidance on the actual computation of AE&P.

Adjustments to AE&P – General Rule

When a C corporation elects S status, AE&P is frozen at the start of the first S corporation year and can only be reduced by the following:

- Distributions treated as dividends;
- Payment of tax by the S corporation for the recapture of investment tax credits claimed during a C corporation year (rare); or
- Certain redemptions, liquidations, reorganizations, and divisions.

If a C corporation is audited after it converts to an S corporation, and additional taxable income is determined, the additional taxable income will increase the corporation's AE&P while the payment of the tax will decrease the AE&P. Any resulting tax paid during an S corporation year will not affect AAA.

The resource mentions Code §§ 1371 and 1379(c) as helpful for the above. Then it continues:

Adjustments to AE&P – Unreported Dividends

AE&P is reduced by reported dividend distributions but is not reduced by unreported dividend distributions. The S corporation has the burden to establish that the dividend amount was reported by the shareholders before AE&P is reduced. The duty of consistency precludes an S corporation from changing the character of distributions reported in closed statute years from non-dividend to dividend. Such a change would improperly reduce AE&P by reported non-dividend distributions.

The resource mentions Code § 1371(c)(1), *Welch v. Helvering*, 290 U.S. 111 (1933), and 15 *Mertens Law of Fed. Income Tax'n* Section 60:5. Quasi-Estoppel or Duty of Consistency, as helpful for the above. Then it continues:

Adjustments to AE&P – Percentage of Completion Method of Accounting

A C corporation's AE&P is frozen as of the date of the S election, even if the C corporation's AE&P was estimated under the percentage of completion method. Any adjustments made to this estimate after the S election is in place will apply to the AAA rather than the AE&P. The courts strictly interpreted IRC 1371(c)(1); that is, no adjustment shall be made to the AE&P of an S corporation, except for certain items noted in the Code.

The resource mentions Code §§ 1371(c)(1) and 312(h), (n)(7) as helpful for the above. Then it continues:

Adjustments to AE&P – Not Affected by Reversal of Timing Differences Subsequent to S Election

AE&P is not adjusted for the reversal of timing differences that occur between C corporation years and S corporation years.

Adjustments to AE&P - Corporate Transactions

AE&P is adjusted up or down based upon various corporate transactions such as certain redemptions, liquidations, reorganizations, divisions, etc. The rules of subchapter C are applied.

When a redemption is treated as a sale or exchange, the corporation's AAA and AE&P are reduced in proportion to the stock redeemed. However, when the redemption is treated as a distribution, the AAA and AE&P are computed in the same way as any other distribution from an S corporation and it does not reduce AE&P unless it is reported as a dividend distribution.

In a complete liquidation of the S corporation, the distribution of the property is not subject to dividend treatment. In addition, all of the AE&P is reduced to zero as a result of the liquidation. Note that a partial liquidation is treated in the same manner as a redemption.

A spin-off, split-off, or split-up transaction requires the allocation of the AE&P between the entities. See Treas. Reg. 1.312-10, Treas. Reg. 1.312-11, and the Corporate Distributions & Adjustments Practice Network resources in the Corporate/Business Issues & Credits Knowledge Base for additional information.

The resource mentions Code § 1371(c)(1) and *Broadaway v. Comm'r*, 111 F.3d 593 (8th Cir 1997), *aff'g Cameron v. Comm'r*, 105 T.C. 380 (1995), as helpful for the above. After discussing shareholders' requirement to track basis, it concludes with a series of examples:

Determine AE&P Using the Final C Corporation Return

Example 1: The retained earnings on the final C corporation return, just before making the S election, is \$400,000. Thus, the estimated AE&P for the corporation is \$400,000.

Example 2: The tax return for the final year of the C corporation is not available, but the tax return for the initial year S corporation is available and it reported beginning retained earnings of \$400,000. This is the estimated AE&P for the corporation.

How to Determine AE&P Using the Current S Corporation Return

Example 3: An S corporation that previously reported as a C corporation is under examination. The balance sheet reflects beginning retained earnings of \$450,000, beginning AAA of \$35,000, and beginning OAA of \$0. Estimated C corporation AE&P is \$415,000 [which is beginning RE of \$450,000 less \$35,000 combined AAA and OA].

Example 4: Same facts as Example 3, except there are accumulated net timing differences of tax in excess of book deductions of \$5,000 in depreciation and \$7,000 in nondeductible travel and entertainment expenses. The estimated AE&P is reduced by the \$5,000 of depreciation timing differences but the permanent difference in nondeductible travel and entertainment expenses does not reduce the estimated amount of AE&P. Therefore, there is \$410,000 of estimated AE&P. The nondeductible travel and entertainment expenses already reduced retained earnings (as a deductible expense for book purposes) and AAA (as a nondeductible expense for tax purposes). Consequently, it is not an adjustment to arrive at AE&P.

Common Transactions Resulting in an S Corporation Acquiring AE&P Through a Merger or Liquidation

Example 5: Shareholder A wholly owns an S corporation and a C corporation. The S corporation and the C corporation are neither banks nor insolvent. There are no intercompany transactions.

The balance sheet of each entity reflects the following: [chart showing that the S corporation has \$3,000 of AAA and \$15,000 of retained earnings, the latter also representing estimated AE&P]

Shareholder A contributes the C corporation's stock into the S corporation in an IRC 368(a)(1)(A) tax-free merger transaction. The S corporation is the surviving entity. The tax attributes of the C corporation, including any AE&P, carry over into the S corporation. Therefore, the estimated AE&P of the C corporation is \$15,000 based upon the ending retained earnings immediately before the merger transaction. The balance sheet of the S corporation immediately after the merger transaction is reflected in the combined column. Using the combined balance sheet immediately after the merger transaction, AE&P is estimated as retained earnings less the AAA balance.

Example 6: Shareholder A wholly owns an S corporation and a C corporation. The S corporation and the C corporation are neither banks nor insolvent. There are no intercompany transactions.

The shareholder contributes the C corporation stock into the S corporation in a tax-free reorganization under IRC 368(a). The S corporation then makes a QSub election under IRC 1361(b)(3)(B) for the C corporation, resulting in a deemed liquidation of the C corporation into the S corporation (Treas. Reg. 1.1361-4(a)(2)). Using the same balance sheet as Example 5, the same results occur as the AE&P of the C corporation is carried over to the S corporation upon the deemed liquidation of the C corporation when the Qsub election is effective. The AE&P is still estimated as \$15,000 and AAA is still \$3,000.

The main difference between Example 5 and Example 6 is the C corporation no longer exists in Example 5 while the C corporation still exists in Example 6 but as a QSub of the S corporation. A QSub is disregarded for Federal income tax purposes but is not disregarded for other taxes like payroll and certain excise taxes, or for assessment of tax incurred in taxable years when it was a separate entity.

II.Q.7.b.i.(b). IRS View of Taxing Distributions When S Corporation Has Accumulated Earnings & Profits

This part II.Q.7.b.i.(a) describes the view set forth in the IRS' LB&I Transaction Unit, "Distributions with Accumulated Earnings & Profits," Document Control Number (DCN) SCO-T-008 (6/18/2020), which is referred to in this part as "the resource." The resource explains:

A C corporation has two levels of taxation, one at the corporate level and one at the shareholder level when the corporation distributes its earnings and profits to the shareholder(s) (i.e. a dividend). The S corporation income, loss and deduction items pass through to the shareholder(s) and are taxed or deducted at the shareholder level. One advantage of an S corporation is a single level of taxation, however there are situations where an S corporation distribution is taxable to the S corporation shareholder creating a second level of tax similar to a dividend distribution for a C corporation shareholder. Distributions from an S corporation can be either in cash or property; the tax effect of which to the shareholder can be non-taxable, long-term or short-term capital gain income, or ordinary or qualified dividend income.

Sourcing the Distribution - General

The taxability of S corporation distributions is covered primarily by IRC 1368. The distribution must be sourced by the S corporation to determine its taxability as a dividend or non-dividend distribution.

IRC 1368(c), 1379(c) and the Instructions for Form 1120S state that a distribution made by an S corporation with AE&P is made (or sourced) from the following items (in the order listed):

1. Accumulated Adjustments Account (AAA),
2. Previously Taxed Income (PTI) under IRC 1379(c),

3. Accumulated Earnings & Profits (AE&P) (i.e. a dividend distribution),
4. Tax Exempt Income in the Other Adjustments Account (OAA),
5. Non-taxable up to the shareholder's stock basis (i.e. a return of capital),
6. Any distributions in excess of the shareholder's stock basis will be taxed as a capital gain (i.e. a deemed sale of stock with no basis).

IRC 1368(c)(3) provides that any portion of a distribution remaining after the application of item 3 is treated consistently with IRC 1368(b), which states that all distributions made by an S corporation that do not have any AE&P will be:

1. Non-taxable up to the shareholder's stock basis (i.e. a return of capital), and
2. Any distributions in excess of the shareholder's stock basis will be taxed as a capital gain (i.e. a deemed sale of stock with no basis).

Sourcing the Distribution - Elections to Change the Sourcing from AAA, PTI, AE&P, OAA

An S corporation can make one or more of four possible elections, with the consent of all affected shareholders, to change the distribution source as described in Treas. Reg. 1.1368-1. The S corporation can elect to:

- Distribute AE&P before AAA,
- Forego sourcing distributions from PTI,
- Create a deemed dividend distribution to the extent of AE&P followed by a deemed capital contribution for the same amount,
- Report separate tax years for purpose of the first three elections if there is a qualifying disposition.

Sourcing From AAA

Thus, for S corporations with AE&P, verify its AAA, as any distribution in excess of AAA may be taxed as a dividend. AAA first came into existence for taxable years beginning after 1982. It represents the cumulative total of pass-through items generated by the S corporation, which have been taxed to the shareholders, and that remain undistributed by the S corporation. The AAA is a corporate account and does not belong to any particular shareholder. Thus, when an S corporation shareholder sells their stock, the AAA is unaffected. Unlike stock basis, the AAA can have a negative balance. The negative balance can be created by the pass through of loss and deduction items. Treas. Reg. 1.1368-2(a)(3)(ii). Distributions sourced from AAA are reported as non-dividend distributions by the S corporation to the shareholder. Keep in mind that non-dividend distributions can still be taxable to the shareholder as a capital gain to the extent the non-dividend distribution exceeds shareholder stock basis.

Sourcing from PTI

If the distribution is not sourced from AAA it can still be treated as a non-dividend distribution if the distribution is sourced from the PTI account. S corporation income, losses and deductions from before 1983 are recorded in PTI accounts. Any amount in these accounts apply to specific shareholders and can't be transferred to another shareholder. It is rare for an S corporation to have PTI since the election must have been made before 1983 and the current shareholder must have continuously owned S corporation stock from prior to 1983.

Sourcing from AE&P

If the distribution is not sourced from AAA or PTI, then the distribution is a dividend to the extent of AE&P. AE&P is generally the cumulative C corporation taxable income that is increased or decreased by the items described in IRC 312 and the Regulations. Generally, there is little difference between the AE&P of a C corporation and the accumulated retained earnings of that C corporation.

Sourcing from OAA

As discussed later in this Practice Unit, the AAA computation does not include tax-exempt income and the expenses related to the tax-exempt income. Tax-exempt items of income and expense are recorded in the OAA. All distributions after the AE&P is exhausted are non-dividend distributions. Therefore, the only purpose of the OAA account is to help the S corporation determine the source of the distribution that is not from S corporation taxable earnings (AAA or PTI), or C corporation taxable earnings (AE&P).

S Corporation Reporting

Once the S corporation has properly sourced the dividend distributions from AE&P and exhausted its AE&P, all other distributions are non-dividend distributions regardless of their source. Dividend and non-dividend distributions are reported separately. The S corporation reports all dividends on Form 1120S, Schedule K, line 17c and issues a Form 1099-DIV to the shareholders to report their individual dividends. Non-dividend distributions are reported on Form 1120S, Schedule K, line 16d, and on Schedule K-1, line 16d to the shareholders.

If the non-dividend distribution exceeds the shareholder's stock basis, the non-dividend distribution may still be taxable to the shareholders as a long-term or short-term capital gain. Please see the Taxability of Distributions Not From Accumulated Earnings and Profits Practice Unit for additional information on the taxability of non-dividend distributions.

CAUTION: If the distribution is part of a stock redemption transaction or a complete liquidation of the S corporation, the distribution might not be reportable as a dividend distribution even though it otherwise would be a dividend distribution according to the sourcing rules above. Please see the Taxability of Distributions Not From Accumulated Earnings and Profits Practice Unit for additional information on stock redemption transactions and complete liquidations of the S corporation.

AAA Ordering Rules – Regular Ordering

Since both losses and distributions are used in the computation of the AAA, it is important to understand the ordering rules of items that adjust the AAA. The ordering rules for the AAA are not the same as the ordering rules for stock basis. Distributions are applied to stock basis after current period income items but before non-deductibles and current period losses and deductions. This will result in more tax-free distributions, along with more deferred S corporation losses due to a lack of stock basis.

Per Treas. Reg. 1.1368-2(a)(5), the AAA ordering rules are:

1. Increased for income items and excess depletion;
2. Decreased for non-deductible, non-capital expenses and depletion;
3. Decreased for items of loss and deduction; and
4. Decreased for non-dividend distributions without making AAA negative.

Any distribution in excess of AAA is sourced from the next category of PTI, AE&P, then OAA as described in IRC 1368(c). The Sch. M2 row items follow the AAA ordering rules.

[picture of Form 1120S, Schedule M-2]

AAA Ordering Rules – Net Negative Adjustment Ordering

The AAA ordering rules are modified if the S corporation has a “net negative adjustment.” IRC 1368(e)(1)(C). A “net negative adjustment” occurs when the S corporation’s current year income items less the loss, deduction and non-deductible expenses (includable in the AAA computation) results in a negative number. The “net negative adjustment” rule allows distributions to be taken from beginning AAA, if the S corporation has a net loss for the year. Under the Small Business Job Protection Act of 1996, for tax years starting after December 31, 1996 when the S corporation has a net negative adjustment then per IRC 1368(e)(1)(C), the net negative adjustment AAA ordering rules are:

1. Decreased for non-dividend distributions to the extent of be
2. Increased for income items and excess depletion;
3. Decreased for non-deductible, non-capital expenses and depletion; and
4. Decreased for items of loss and deduction.

CAUTION: The distributions sourced from the beginning AAA will cause the AAA balance to become more negative. Any distributions in excess of the beginning AAA balance will not be sourced from AAA. The line items on Sch. M-2 do not follow the net negative adjustment AAA ordering rules; thus, the examiner needs to remember the above ordering rules when a net negative adjustment exists.

The resource then describes how to examine a distribution, setting forth the following facts:

- S corporation makes a distribution to the shareholder.
- S corporation has AE&P.
 - Form 1120S, Schedule M-2, line 1(c)
- The S corporation should reflect the distribution on:
 - Schedule K, line 16d (non-dividend) or 17c (dividend),
 - Schedule K-1, Box 16, Code D (non-dividend),
 - Schedule M-2, line 7 and
 - Schedule L, Balance Sheet, as a reduction of Retained Earnings, line 24.
- If any amount of the distribution is a dividend, the S corporation should issue the shareholder a Form 1099-DIV for the dividend amount.

CAUTION: An S corporation may not properly report its amount of AE&P on Form 1120S, Schedule M-2, line 1(c). Even if reported, the amount of AE&P is allowed to be an estimate.

The resource then instructs, “Gather all the necessary facts to determine the correct amount of AE&P and AAA in order to properly compute the amount of dividend versus non-dividend distributions,” describing the following fact elements:

- Use the Reconciliation Workbook to verify the reliability of the tax return information as discussed in the *General Overview of Distributions and Accumulated Earnings & Profits Practice Unit*.
- Determine the amount of AE&P at the beginning of the exam year. Use the *General Overview of Distributions and Accumulated Earnings & Profits Practice Unit* to determine the existence of AE&P and compute or estimate the amount of AE&P.
- For purpose of verifying or recomputing AAA, review the current and previous year form 1120S returns to determine the corrected items of income, loss, deduction, non-deductible expenses and distribution for the current and all prior S corporation years. Corrected items include any adjustments to income, loss, deduction or distribution items through an amended return or as adjusted through an examination.

The resource then sets forth, “**Issue 1** In general, computing the amount of taxable dividend distributions,” providing the following explanations of the issue:

S corporations must properly compute AAA, PTI, AE&P and OAA in order to accurately source and report dividend versus non-dividend distributions to shareholders. If the S corporation does not report the dividend, then in most cases the shareholder will not pick up the proper amount of income on their return. The issue is to ensure that the dividend distribution is taxed at the proper time during the corporation’s life cycle.

The first step is to allocate the items of income, loss and deduction between AAA and OAA. The PTI and AE&P accounts are not affected by current year income, loss or deduction items. Most income, loss or deduction items included in the computation are reported on Schedule K. Some, however, are only reported on Schedule K-1 or an attachment to Schedule K-1. These should also be included in the computation. For instance, the sale or other disposition of property for which a section 179 expense deduction was previously passed through to its shareholders is reported on Schedule K-1, Box 17, Code K and should be included in the AAA computation.

This chart shows where the Schedule K items are reflected in the AAA, PTI, AE&P or OAA. Verify the AAA reported on the S corporation's Schedule M-2 is accurate. If it is not accurate, recompute AAA using the Schedules K beginning with the first S corporation year.

Schedule M-2 Analysis of Accumulated Adjustments Account, Shareholders' Undistributed Taxable Income Previously Taxed, Accumulated Earnings and Profits, and Other Adjustments Account (see instructions)				
	(a) Accumulated adjustments account	(b) Shareholders' undistributed taxable income previously taxed	(c) Accumulated earnings and profits	(d) Other adjustments account
1	Balance at beginning of tax year	\$0 first year of S corp	Balance from pre-1983	C corp earnings
2	Ordinary income from page 1, line 21	Sch K line 1 (if income)		\$0 first year of S corp
3	Other additions	Sch K line 2-10		Sch K line 16a & 16b
4	Loss from page 1, line 21	(Sch K line 1 (if loss))		
5	Other reductions	(Sch K line 2-12d, 14i, 16c)		(related to tax exempt)
6	Combine lines 1 through 5	Subtotal	Subtotal	Subtotal
7	Distributions	Subtotal Sch K line 16d	Sch K line 17c	Sch K line 16d
8	Balance at end of tax year. Subtract line 7 from 6	Total	Total	Total

Once the allocation is made to AAA and OAA, the distributions can be sourced. Distributions are sourced first from AAA to the extent of positive AAA after considering the income, loss and deduction items for the year unless the net negative adjustment rule applies or an election discussed in Issue 3 is elected.

To the extent the distributions are not sourced from AAA, the distributions are next sourced from PTI unless the election discussed in Issue 3 is made. The distributions are sourced from PTI to the extent of positive PTI.

To the extent not sourced from PTI, the distributions are next sourced from AE&P to the extent of positive AE&P and reported as dividend distributions to the shareholders. Any distributions not sourced from AE&P, regardless of their sourcing, are reported as nondividend distributions.

To determine the amount of distributions reportable as dividends versus non-dividends, use the Distributions with AE&P Worksheet to source them from AAA, PTI, AE&P or OAA.

Distributions from AAA to the extent of positive AAA after considering the income, loss and deduction items.

PTI

AE&P

OAA

- Review current and prior year returns for statements regarding reorganizations, liquidations and corporate division transactions that will impact the AE&P, AAA or PTI amounts. If an S corporation was previously a C corporation or received assets with a carryover basis from a C corporation, an amount should be included on Form 1120S, Schedule B lines 8 and 9. Also, review the balance sheet for any significant changes to owner's equity accounts to identify these transactions. Interview a corporate officer or review the board of director's minutes to verify your conclusions.

CAUTION: When a new S corporate entity is formed and a C corporation is merged into the S corporation in a tax-free transaction, the C corporation's AE&P carries over to the S corporation. However, the S corporation's date of incorporation and S election effective date remain the same. Review the newly formed S corporation's return for significant assets or sales. This may indicate a reorganization with a preexisting entity.

- Verify if any prior dividend distributions reported by the S corporation were actually reported as dividend distributions by the shareholder(s).

Correct the S corporation's AAA, OAA, AE&P, and PTI computation. Then reduce these accounts by the distribution (per ordering rules) to determine the correct amount of dividend versus non-dividend distribution required to be reported. The S corporation's AAA, OAA, AE&P, and PTI can be corrected for improper computations from prior years. Recompute AAA, OAA, AE&P and PTI if there were any errors identified in the computations in the current or prior years.

- Common errors in the computation of AAA include failure to:
 - Use the amended or exam adjusted items of income, loss, deduction and distribution in the computation.
 - Reconcile AAA current year increases and decreases to Schedule K. These reconciliation errors may be caused by:
 - Including book-tax differences in the AAA computation.
 - Neglecting to reduce AAA by loss and deduction items.
 - Source distributions from AAA, OAA, AE&P, or PTI in prior years.

- Account at the S corporation-level for the impact of any redemption, merger, acquisition, split-up or split-off transactions on the account balances.
- Include tax-exempt income or expenses in AAA.
- Consider the Net Negative Adjustment rule.
- Reduce AAA for non-deductible expenses
- Exclude from AAA disallowed losses such as from related party sales and distributions of property when the Fair Market Value (FMV) is less than the adjusted tax basis.

The resource then sets forth, “**Issue 2** More than one distribution and part of the distribution exceeds the AAA,” providing the following explanations of the issue:

When an S corporation makes multiple distributions during the year that exceed the AAA balance at the close of the tax year, then the AAA balance is allocated among the distributions in proportion to the distributions’ respective sizes. Therefore, each distribution made during the year could be partially a non-dividend distribution from AAA and partially a taxable dividend distribution from AE&P. However, AE&P is not prorated among the distributions, rather each distribution to which AAA (or PTI) is not allocated is from AE&P until AE&P is exhausted.

Further, the allocation of AAA among various distributions can affect the shareholder’s timing of income recognition and the amount of tax owed if the:

- S corporation is on a different year end from the shareholders,
- There are stock ownership changes during the year,
- Shareholders receive disproportionate distributions during the year, or
- The timing of distributions to each shareholder is different and AE&P will be exhausted.

For example, calendar-year shareholders of a fiscal-year S corporation may not know until the next year whether any of the current year’s distributions are taxable because they are taxed on dividends in the year received. In this situation, an extension or amended return is required for the shareholder’s income tax return.

The resource mentions as helpful to the above Code §§ 444, 1368, 1378 and Reg. §§ 1.301-1(b) and 1.1368-2(b), then describes various fact elements:

- Determine if there is more than one distribution during the year and to whom the different distributions were made by reviewing the S corporation’s General Ledger or through an interview of a corporate officer. The timing of each distribution to the different shareholders can make a tax difference even if the distributions are proportionate. Consider verifying the information by requesting the banking information for the timing of the distributions as appropriate.

- Review the Schedules K-1 for a year over year percentage change in stock ownership. If there are distributions before and after a change in ownership then the computation of dividend versus non-dividend distributions is more complicated. Depending on how ownership changed (i.e. stock sale, stock redemption, etc.), consider consulting with a specialist.
- Compare the shareholder's percentage of the total distributions for the year to the stock ownership percentages. If the percentages don't match, there is a distribution that is disproportionate to stock ownership. [Total distributions include the sum of dividend and non-dividend distributions reported on Schedule K.]
- Review tax returns to determine if the S corporation and shareholder file using different fiscal year ends.

The resource then explains potential adjustments:

When an S corporation makes multiple distributions during the year that exceed the AAA balance at the close of the tax year, then the AAA balance is allocated among the distributions in proportion to the distributions' respective sizes. If you have determined the dividend versus non-dividend distributions will make a tax difference based upon one of the following circumstances:

- The S corporation is on a different year end from the shareholders,
- There are stock ownership changes during the year,
- Shareholders receive disproportionate distributions during the year, or
- AE&P will be exhausted and the timing of the distributions to the shareholders is different, then recompute the dividend versus non-dividend distribution allocation among the shareholders.

Note that S Corporations are required to have a single class of stock by IRC 1361(b)(1)(D). Generally, this means that each share of S Corporation has equal rights to receive distributions. If an S corporation makes distributions that are disproportionate with respect its stock, it may mean that the S Corporation has violated the single class of stock rule. Contact your local counsel if you identify such a situation.

Before going further, I want to make sure the reader does not overstate the consequences of disproportionate distributions. Although the organizational documents must provide each share with equal rights to distributions,⁴⁹¹⁴ distributions that violate that provision do not bust the S election⁴⁹¹⁵ (although they should be corrected when discovered).

⁴⁹¹⁴ See part II.A.2.i Single Class of Stock Rule.

⁴⁹¹⁵ See parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences and II.A.2.i.iii Disproportionate Distributions.

The resource then provides examples:

Example 1 – Allocating AAA and AE&P to Multiple Distributions

S corporation is owned 50-50 by shareholders A and B. The S corporation has \$3,000 of beginning AAA and earns \$7,000 of income. The S corporation has \$60,000 of AE&P and distributes \$80,000 cash to Shareholder A on 3/31 and \$20,000 cash to Shareholder B on 6/30.

	Date	Distribution	AAA	Dividend	Return of Capital
Shareholder A	3/31	80,000	8,000 (1)	60,000 (3)	12,000
Shareholder B	6/30	<u>20,000</u>	<u>2,000</u> (2)	<u>0</u>	<u>18,000</u>
		<u>100,000</u>	<u>10,000</u>	<u>60,000</u>	<u>30,000</u>

(1) $80,000/100,000 \times 10,000 = 8,000$

(2) $20,000/100,000 \times 10,000 = 2,000$

(3) There is no rule that the AE&P be allocated proportionately to the distributions, so it is allocated to the distributions issued first until exhausted.

AAA before distributions is computed as 10,000 [$10,000 = 3,000 + 7,000$]. The distribution is sourced \$10,000 as a non-dividend distribution and \$60,000 is a dividend distribution with the remaining \$30,000 being a return of capital. The AAA must be allocated to the shareholders in proportion to their distributions during the year. See the discussion on the previous slide with respect to the prohibition on multiple classes of stock.

Generally, S corporations and their shareholders will use a calendar year. Therefore, the year in which the dividend distribution is reported by the S corporation and the shareholder will be the same. However, an S corporation is allowed to have a different year end if it establishes a business purpose for the fiscal year to the satisfaction of the Secretary, or if the corporation elects a corporate year covered by IRC 444. The permitted year-ends for an IRC 444 election are September 30, October 31, or November 30.

Whenever an S corporation and any shareholder have different year ends, determine the timing of the distributions. The year in which the dividend distribution takes place for the shareholder will determine the year in which it is includable in the shareholder's taxable income. This is correct even if the S corporation is unable to determine if the distribution is taxable as a dividend until the end of the S corporation's year.

Adjust the shareholder's return for the proper year of dividend reporting. Note that the shareholder may have to file an amended return to report the dividend distribution.

CAUTION: This Practice Unit does not address the impact on the allocation of dividend versus non-dividend distributions if there is a stock sale or stock redemption transaction during the year. Please contact the S Corporations & Cooperatives Practice Network if

there are dividend and non-dividend distributions in the same year as a stock redemption transaction.

Example 2 – Fiscal Year Distributions Exceeding AAA

S corporation’s fiscal year ends October 31st. The shareholder is on a calendar year end of December 31st. For FY2 S corporation made the following distributions:

Date	Distribution
11-01-CY1	50,000
01-30-CY2	45,000
05-01-CY2	55,000
	\$150,000

At the end of FY2, the corporation showed the following:

AAA at 10-31-FY2 Before Distributions	100,000
AE&P	20,000
Initial Stock Investment	250,000

Since the FY2 distributions exceeded the fiscal year-end AAA, AAA needs to be allocated based on the respective sizes of the distributions. The AAA is allocated as follows:

Date	Distribution	AAA		Dividend		Return of Capital
11-01-CY1	50,000	33,333	(1)	16,667	(3)	0
01-30-CY2	45,000	30,000	(2)	3,333		11,667
05-01-CY2	<u>55,000</u>	<u>36,667</u>		<u>0</u>		<u>18,333</u>
	150,000	100,000		20,000		30,000

(1) $50,000/150,000 \times 100,000 = 33,333$

(2) $45,000/150,000 \times 100,000 = 30,000$

(3) There is no rule that the AE&P be allocated proportionately to the distribution, so it is allocated to the distributions issued first until it is exhausted.

The shareholders would have to report \$16,667 and \$3,333 of dividend income in CY1 and CY2, respectively.

It should be noted that the shareholders will not know the amount of their CY1 dividend income until after FY2 closes when the S corporation’s books are closed and the FY2 income tax return is completed. This would require the shareholders to estimate their FY1 dividend income when they file their CY1 return. They would then have to amend the CY1 return when the final figures are determined.

The resource then sets forth, “**Issue 3** Elections effecting distributions,” providing the following explanations of the issue:

The general sourcing rule is AAA, PTI, AE&P then OAA. However, an S corporation is allowed to make certain elections that will impact the general sourcing rule with the consent of all affected shareholders. The four elections are:

- Election 1: Distribute AE&P Before AAA
- Election 2: Forego PTI
- Election 3: Deemed Dividend
- Election 4: Separate Tax Years

More than one election can be made in a given year. Each election is irrevocable once made and is effective only for the tax year of the election. There is no limit on the number of times an election can be made.

The resource cites in support of the above Reg. §§ 1.1368-1(f)(2), 1.1368-1(f)(4), 1.1368-1(f)(3), 1.1368-1(g), 1.1368-1(f)(5)(iv), and 1.1368-1(g)(2)(iii), then continues:

Election 1: Distribute AE&P Before AAA

An S corporation can elect to change the distribution sourcing rules to source distributions from AE&P before AAA. The election applies to all distributions for the year. The election does not provide that AE&P is distributed before PTI; therefore, the new sourcing of the distribution order is PTI, AE&P, AAA then OAA.

The resource cites in support of the above Code § 1368(e)(3) and Reg. § 1.1368-1(f)(2), then continues:

Election 2: Forego PTI

An S corporation can elect to forgo considering distributions from PTI. This is not the same as Election 1 where it is changing the ordering rules but rather the taxpayer does not consider PTI as a part of the computation. The election applies to all distributions for the year. This election by itself does not provide that AE&P is distributed before AAA; therefore, the ordering with the election is AAA, AE&P, OAA.

The resource cites in support of the above Reg. § 1.1368-1(f)(4), then continues:

Election 3: Deemed Dividend

An S corporation that lacks the assets to make a distribution can make an election to deem a dividend distribution followed by a corresponding deemed capital contribution. The deemed dividend distribution amount is limited to the amount of AE&P after considering any actual distributions from AE&P. The deemed dividend distribution is allocated pro-rata to the shareholders according to their stock ownership.

The resource cites in support of the above Reg. § 1.1368-1(f)(3), then continues:

Election 4: Separate Tax Years

The S corporation can elect to have two separate tax years for purposes of making Elections 1-3 if there is a qualifying disposition during the year. Qualifying dispositions include (i) certain dispositions of 20% or more of the stock by a shareholder, (ii) certain redemption transactions and (iii) certain new stock issuances. Qualifying dispositions do not include a complete termination of the shareholder's interest in which case an election under IRC 1377(a)(2) and Treas. Reg. 1.1377-1(b) must be made. The election requires separate taxable years for purposes of allocating items of income and loss, making adjustments to AAA, earnings and profits, and basis.

The resource cites in support of the above Code § 1377(a)(2) and Reg. §§ 1.1377-1(b) and 1.1368-1(g)(ii), then continues:

Who Must Consent to Each Election

An S corporation makes an election for a taxable year by attaching a statement to a timely filed (including extensions) original or amended return. The election must receive consent from each "affected shareholder." An affected shareholder is any shareholder to whom a distribution is made by the S corporation during the S corporation's taxable year. For purposes of Election 4, the affected shareholders are all shareholders during the year. Therefore, all shareholders must consent.

Statements Required to Be Attached to the Return

- The S corporation must attach a statement to an original filed return (including extensions) or an amended return. The statement must identify the election, state the shareholder(s) consent to the election and signed under penalty of perjury by a corporate officer (note that signing the return suffices the penalty of perjury signature requirement).
- If Election 3, the deemed dividend election, is made, the statement must also include the amount of the deemed dividend allocated to each shareholder.
- If Election 4, separate tax years, is made, the statement must provide facts regarding the qualifying disposition.

The resource cites in support of the above Code § 1368(e)(3) and Reg. § 1.1368-1(f)(5), (g)(iii) and (g)(5), then continues with the following fact elements:

- Review the S corporation tax return for any statements regarding elections.
- Request a copy of the S corporation's work papers allocating AAA, PTI, AE&P and OAA to its various distributions if the Schedule M-2 is not reconcilable. Normally, it's easy to reconcile the Schedule M-2 to the return; however, certain corporate transactions can occur that make it irreconcilable. For example, if there is a redemption, liquidation, split-up, split-off, merger or acquisition transaction, obtain additional information and workpapers.

- Request supporting documentation for the timing and amounts of any adjustments to AAA, PTI, AE&P, or OAA if the elections were part of a series of transactions that include a redemption, liquidation, split-up, split-off, merger or acquisition transaction.

The resource then continues with the following explanations of adjustments:

- Each of the elections can be made on an original filed return (including extensions) or an amended return. Therefore, the elections can be made during an examination.
- An S corporation can make Election 1, Distribute AE&P before AAA, and Election 2, Forego PTI, in the same year causing distributions to be sourced from AE&P, AAA then OAA. There are a variety of reasons an S corporation may make the elections including trying to avoid the Tax on Excessive Net Passive Investment Income, expiring shareholder net operating losses requiring income to offset the loss, or the distribution will be in excess of stock basis. Therefore, the shareholder may prefer to reduce AE&P instead, among other reasons.
- Election 1, Distribute AE&P before AAA, and Election 3, Deemed Dividend, are frequently requested on examinations when the issue involved is the tax on excessive net passive investment income, as the tax can result in a termination of the S election if there is excessive passive income and AE&P for 3 consecutive years. By making the election, the S corporation prevents the S election from terminating and reports a deemed dividend distribution in lieu of paying the additional tax on the passive investment income.
- An S corporation that does not have the cash to make the distributions may make Election 3 to: create basis to claim losses, to allow the shareholder to claim an expiring net operating losses, or because a new shareholder does not want AE&P and requires the old shareholder to recognize the dividend income.

Example 3 – Elections to Avoid Net Passive Investment Income Tax

At the end of CY3, S corporation has \$1 million of AE&P and \$5 million of AAA, and for years 1 through 4 the S corporation has passive income exceeding 25 percent of the corporation's gross receipts for each year as provided for under IRC 1375. The S corporation does not have PTI. The S corporation did not report the IRC 1375 tax in years 1 through 4 despite a legal requirement to do so.

If the statute of limitation for assessment on year 3 is open, the taxpayer can file elections 1 and 3 to have a deemed dividend distribution of \$1 million effective on 12/31/CY3. The election eliminates the S corporation's AE&P and prevents the termination of the S corporation under IRC 1362(d)(3). The election has the effect of eliminating the IRC 1375 tax in years 3 and 4 and the S election won't terminate, but results in the shareholder reporting a \$1 million dividend distribution in CY3.

Example 4 – Inadvertent Termination Relief and Elections

Same facts as Example 3 except, if the statute of limitations for assessment on years 1 through 3 are closed, the S election will terminate on the first day of CY4. The taxpayer can request inadvertent termination relief through a Private Letter Ruling (PLR) to

prevent the S election from terminating. The PLR may require the S corporation to pay any IRC 1375 taxes.

The resource cites in support of the above Code § 1362(f) and 1375 and Reg. § 1.1368-1(f)(2), (3), then continues with a bibliography. Among the sources it cites are:

II.Q.7.b.ii. Redemptions or Distributions Involving S Corporations Compared with Partnerships

Presumably any payment for stock treated as a distribution instead of a redemption would be applied pro rata to the owner's shares, which might cause premature taxation if some shares have much lower basis than other shares.⁴⁹¹⁶ However, if all shares have the same adjusted basis, this would not be a concern.

The owner of a partnership interest, however, treats all of the owner's interest in the partnership as a single holding,⁴⁹¹⁷ allowing the entirety of the owner's basis to be applied against any distribution before triggering gain.⁴⁹¹⁸ For more about partnership redemptions compared with installment sales of stock, see parts II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale and II.Q.8.b.ii.(e) Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet; be cautious, however, about property distributions,⁴⁹¹⁹ especially those within seven years of any contribution to a partnership in exchange for a partnership interest.⁴⁹²⁰

Partial liquidations would not receive this favorable distribution treatment for an S corporation,⁴⁹²¹ but classifying a pro rata distribution as a partial liquidation would not change

⁴⁹¹⁶ See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially fn. 5118.

⁴⁹¹⁷ See part II.Q.8.e.ii.(a) Unitary Basis.

⁴⁹¹⁸ See part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions.

⁴⁹¹⁹ See part II.Q.8.b.i Distribution of Property by a Partnership.

⁴⁹²⁰ See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, including a warning that a partner contributing cash in exchange for a partnership interest also causes these issues to arise, as described in the text accompanying fn. 5466.

⁴⁹²¹ See fns. 4855-4856 and accompanying text.

its treatment under Code § 736 as described above, so partnership treatment allows more rapid use of basis.

Also, suppose the corporation redeemed stock in exchange for a promissory note, and the redemption was treated as a distribution. Installment treatment is not permitted in a corporate setting for notes that are treated as distributions,⁴⁹²² thereby accelerating income, whereas a naked promise to pay a partner in redemption of a partnership interest does not count until cash is paid.⁴⁹²³

II.Q.7.b.iii. S Corporation Receipt of Life Insurance Proceeds

In Letter Ruling 200409010, upon the death of the key person, the S corporation (presumably using the accrual method of accounting) would immediately redeem the stock held by the key person at the time of death by issuing a promissory note to the key person's estate. After the redemption, the remaining shareholders would elect to cut off the taxable year.⁴⁹²⁴ By terminating the taxable year after the redemption but before submitting a claim on the life insurance policy, the remaining shareholders sought to have all of the insurance proceeds allocated to their stock for purposes of increasing their tax basis. The IRS ruled that the life insurance death benefit will be required to be recognized as of the date of death. Notwithstanding needing to go through the claims submission and evaluation process, death would establish the corporation's rights to the proceeds as a beneficiary of the insurance policy.

Thus, the basis increase due to the receipt of the life insurance death benefit would not be allocated solely to the surviving shareholders. By using a redemption, they would have received a smaller basis increase than if they had received the life insurance proceeds directly and bought the decedent's stock. In fact, if and to the extent that an accounting cut-off cannot be made, a portion of the basis increase would be allocated to the decedent's stock and perhaps subsumed (and, as a practical matter, lost) in the basis step-up of that stock upon death. If the accounting cut-off places date of death events into the decedent's hands, then perhaps the decedent's portion of basis from nontaxable income would be allocated to the decedent's stock and subsumed (and, as a practical matter, lost) in the basis step-up of that stock upon death.

Although cash basis taxpayers should be able to avoid these issues, be careful to see how the accounting cut-off would apply, because it can be quite tricky.

Of course, a C corporation's remaining shareholders receive no basis step-up as a result of a redemption (whether or not funded by life insurance).

To avoid these issues, I tend to prefer the planning in part II.Q.4.i Life Insurance LLC.

⁴⁹²² See fn. 4842.

⁴⁹²³ See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

⁴⁹²⁴ Code § 1377(a)(2); for more details, see part III.B.2.j.ii.(c) Transfer of Shareholder's Entire Interest.

II.Q.7.b.iv. S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds

II.Q.7.b.iv.(a). S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations

Below is a variation of the theme of part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

In Rev. Rul. 2008-42,⁴⁹²⁵ an S corporation purchased an employer-owned life insurance contract on the life of one of its employees in order to cover expenses the company would incur as a result of the death of the employee (also known as a key-man policy). The employee was a highly compensated employee of the corporation. The corporation paid all of the premiums for the policy and was the beneficiary of the policy. At the end of the taxable year, the corporation had earnings and profits ("E&P"). The IRS reminded us that Code 101(j) imposes notice and reporting requirements regarding employer-owned life insurance to preserve the Code § 101 exclusion of life insurance proceeds from income taxation.⁴⁹²⁶

The IRS ruled that premiums paid did not reduce the S corporation's AAA. It also ruled that the death benefit received does not increase the S corporation's AAA. What the IRS does not point out is the general ordering rules of Code § 1368, which are that distributions from an S corporation are treated as the following:⁴⁹²⁷

1. A tax-free distribution to the extent of the lesser of stock basis or AAA, then
2. A taxable dividend to the extent of E&P, then
3. Return of principal to the extent of remaining basis, and finally
4. Capital gain.

Suppose, for example, that the shareholders contributed \$10,000 to the corporation at its inception, and no stock has been transferred since inception. It operated as a C corporation and earned \$1,000,000 of E&P. Then it elects S status and has \$250,000 of AAA. A key employee dies, and the corporation receives \$1,500,000 of life insurance proceeds from a term policy and then distributes \$700,000 to the shareholders. The consequences are:

- Immediately before the employee died, the shareholders had tax basis in their stock of \$260,000, which is the sum of the initial \$10,000 contribution and the \$250,000 of AAA. Immediately after the death, this tax basis is increased to \$1,760,000 due to the receipt of death benefits.
- Of the \$700,000 the shareholders receive, \$250,000 is a tax-free return of AAA that they could have pulled out tax-free before the employee died; their stocks' tax basis is reduced to \$1,510,000 by reason of the \$250,000 tax-free distribution. The remaining \$450,000 is a taxable dividend out of the \$1,000,000 E&P, even though it can be traced to the tax-free life insurance proceeds and even though the shareholders have ample basis to receive

⁴⁹²⁵ See New Ruling Provides Guidance on AAA of S corporations, *Business Entities* (WG&L) (Jan./Feb. 2009).

⁴⁹²⁶ See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

⁴⁹²⁷ See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally.

distributions if the corporation had never been a C corporation. E&P is reduced to \$550,000, since \$450,000 out of the \$1,000,000 E&P has been distributed.

Turning tax-free life insurance proceeds into taxable dividends – not a good deal!

Suppose instead that the shareholders had owned the policy, had been the beneficiaries, and had received distributions from the corporation to pay premiums:

- Each year, AAA would have been reduced to the extent of the distributions that were used to pay premiums.
- The shareholders receive the life insurance proceeds tax-free, assuming they complied with Code § 101(j) as in the Revenue Ruling.
- When the shareholders invest into the company the \$800,000 that, under the above example was retained in the corporation, their stock basis increases by that \$800,000 to \$1,060,000 from the pre-death \$260,000 used in the example.
- Thus, the shareholders have lower basis than in the first example, which is the price they pay for not having dividend income.
- If future distributions exceed AAA, they could have dividend income up to the full \$1,000,000 of E&P.

Thus, this alternative defers dividend taxation but does not avoid it if future distributions significantly exceed AAA. However, if future distributions in excess of AAA are in the form of redemptions that are taxed as such, then this alternative might very well avoid dividend taxation.

A more tax-efficient way to structure this alternative would be for the shareholders to contribute their \$800,000 investment of the life insurance proceeds to a new limited liability company taxed as a partnership. Then either:

- The new LLC loans the proceeds to the S corporation as needed, documenting the loan with interest at the applicable federal rate, or
- The S corporation then contributes all of its business assets to the LLC. Later, when the LLC does not need part or all of the \$800,000 anymore, it can distribute that excess money to the shareholders as a tax-free return of their capital contribution. This might or might not be a practical alternative, depending on the non-tax issues caused by transferring the S corporation's assets, as well as the annual expense of filing two business income tax returns instead of one. This is more cumbersome than the loan alternative, but it might have the positive effect of shifting a significant portion of the business operations to a partnership income tax model, which is more tax-efficient when changing the composition of the business' equity ownership, as discussed at the beginning of part II.M Buying into a Business, as well at part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules, of these materials.

Finally, to protect the life insurance from various business exigencies inherent in the shareholders owning life insurance under the alternative, the shareholders should consider forming a limited liability company to hold the life insurance.

These issues could be avoided if the corporation had an S election in place from inception or to the extent it had distributed all of its E&P in the past. Owners of S corporations with E&P might consider cleansing the corporation's E&P while dividend rates are low. Code § 1368(e)(3) allows taxpayers to elect to reverse the normal distribution rules and have distributions come first from E&P and then from AAA to implement this strategy.⁴⁹²⁸

Finally, owners of limited liability companies or other entities taxed as partnerships would not need to even consider this issue.

II.Q.7.b.iv.(b). S Corporation Redemptions Using Life Insurance Proceeds

When an S corporation redeems stock under Code § 302(a) or 303(a):

- AAA is reduced by an amount equal to the AAA multiplied by the number of shares redeemed and divided by the number of shares of stock in the corporation immediately before the redemption.⁴⁹²⁹
- E&P is reduced by a ratable share of post-2/28/1913 E&P.⁴⁹³⁰
- These reductions in AAA and E&P are independent of each other.⁴⁹³¹

If an S corporation is a former C corporation with significant E&P, then a disadvantage of a redemption relative to a cross-purchase is that AAA is reduced in a redemption, whereas in a cross-purchase AAA is not affected. (It could be an advantage if the goal is to cleanse the corporation of E&P to avoid worrying about the passive investment income rules, but those rules are easy to work around by investing in oil and gas partnerships; see part II.P.3.b.iii Excess Passive Investment Income.)

II.Q.7.b.v. Donation of Stock to Charity Followed by S Corporation Redemption

See part II.Q.6.d.ii UBTI Related to an S Corporation for the fact that gain on sale of S corporation stock and any S corporation K-1 items are per se UBTI.

If the donee is not an eligible shareholder (for example, a government),⁴⁹³² consider donating to a donor advised fund and then having the proceeds go to the charity. If the donor advised fund is organized as a trust, any UBTI can be offset by the charitable tax deduction that individuals generally receive.⁴⁹³³

⁴⁹²⁸ See part II.P.3.b, for issues relating to S corporations that have E&P.

⁴⁹²⁹ Code § 1368(e)(1)(B); Reg. § 1.1368-2(d)(1)(i).

⁴⁹³⁰ Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

⁴⁹³¹ Reg. § 1.1368-2(d)(1)(iii).

⁴⁹³² See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fn. 138.

⁴⁹³³ See part II.Q.6.d.iii Charitable Deduction Against UBTI.

II.Q.7.c. S Corporation Owned by a Trust Benefitting Charity

S corporation stock is a challenging asset for a charity to hold. Not only the K-1 the charity receives from the S corporation but also gain on the sale of S corporation stock constitute unrelated business income; see part II.Q.6.d.ii UBTI Related to an S Corporation.

Note that a charitable remainder trust can own a partnership but not an S corporation;⁴⁹³⁴ however, an S corporation may donate property to a charitable remainder trust.⁴⁹³⁵

Also see parts II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership and II.Q.6 Contributing a Business Interest to Charity. For a discussion of S corporation contributions to charity, see C. Hoyt, "Charitable Gifts by Subchapter S corporations and by Shareholders of S corporation Stock," *ALI-ABA Estate Planning Course Materials Journal* (April 2006).⁴⁹³⁶

The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.⁴⁹³⁷

⁴⁹³⁴ For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

⁴⁹³⁵ See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

⁴⁹³⁷ Letter Ruling 201441018.

II.Q.7.c.i. Income Tax Trap - Reduction in Trust's Charitable Deduction

II.Q.7.c.i.(a). Contribution Must Be Made from Gross Income

Although trusts can deduct amounts of gross income⁴⁹³⁸ paid to charity, the trust must actually receive the income in the current or a prior year⁴⁹³⁹ and must be authorized to make the payment to charity.⁴⁹⁴⁰ Gain recognized on the in-kind satisfaction of a pecuniary distribution to

⁴⁹³⁸ The amount must be payable out of gross income and not out of corpus. Rev. Rul. 2003-123 pointed out the requirement to trace gross income:

Under section 642(c), a trust is generally allowed an unlimited charitable deduction for amounts that are paid from gross income for charitable purposes pursuant to the terms of the governing instrument. Because section 642(c) specifically requires that a charitable deduction is available only if the source of the contribution is gross income, tracing of the contribution is required in determining its source. *Van Buren v. Commissioner*, 89 T.C. 1101, 1109 (1987); *Riggs National Bank v. United States*, 352 F.2d 812 (Ct. Cl. 1965); *Mott v. United States*, 462 F.2d 512 (Ct. Cl. 1972), *cert. denied*, 409 U.S. 1108 (1973); see also *Crestar Bank v. Internal Revenue Service*, 47 F. Supp.2d 670 (E.D. Va. 1999).

However, various conventions apply to this tracing rule. Satisfaction of a formula pecuniary bequest that is not allocated income does not qualify for this charitable deduction. Rev. Rul. 68-667. On the other hand, if the trust instrument is silent, a charitable deduction is allowed when applicable state law provides that, where the trust instrument is silent, payments are required to be made first from income of the trust and, if the income is not sufficient, then from its principal. Rev. Rul. 71-285. Thus, the IRS is not looking to trace dollars mechanically but rather looks to whether the income was first earned and then allocated to the contribution.

⁴⁹³⁹ *Green v. U.S.*, 880 F.3d 519 (10th Cir. 2018), upheld as reasonable the allowance in Reg. § 1.642(c)-1(a)(1) for a deduction:

for an amount paid during the taxable year in respect of gross income received in a previous taxable year, but only if no deduction was allowed for any previous taxable year to the estate or trust, or in the case of a section 645 election, to a related estate, as defined under § 1.645-1(b), for the amount so paid.

⁴⁹⁴⁰ Rev. Rul. 2004-5 stated:

For a trust to claim a charitable deduction under § 642(c) for amounts of gross income that it contributes for charitable purposes, the governing instrument of the trust must give the trustee the authority to make charitable contributions. This requirement is an essential element to qualify the trust to claim a deduction for a charitable contribution made directly by the trust. In the case of a trust's investment in a partnership, the partnership may make a charitable contribution from the partnership's gross income, and that income is never available to the trust. For federal tax purposes, however, the trust must take into account its distributive share of the partnership's income, gain, loss, deductions (including charitable contributions), and credits. Under these circumstances, a trust's deduction for its distributive share of a charitable contribution made by a partnership will not be disallowed under § 642(c) merely because the trust's governing instrument does not authorize the trustee to make charitable contributions.

FSA 200140080 reached the same conclusion, pointing out that the UBTI concerns described below must also be addressed. CCA 200928029 (which appears to have been a quick email) asserted:

Rev. Rul. 2004-5 does permit trusts to claim charitable contributions made by a partnership of which the trust is a partner, even if the trust instrument does not provide for charitable contributions. However, the Rev. Rul. does not eliminate a second requirement that this charitable contribution be made out of the trust's gross income. Therefore, the contribution of the easement does cannot be claimed as a charitable contribution.

Gross income distributed to charity under an inter vivos power of appointment to distribute to charity satisfies the requirement that the charitable distribution be authorized under the trust agreement. Letter Ruling 200906008.

charity meets this test,⁴⁹⁴¹ however, if gain is not recognized on an in-kind distribution, only the adjusted basis of the property may count.⁴⁹⁴² As to the latter, let's compare and contrast some scenarios:

- A trust's charitable contribution of appreciated marketable securities avoids capital gain tax on the sale of those securities but generates only a contribution deduction equal to basis.
- If the trust distributes the securities to its beneficiaries, the beneficiaries may deduct the full fair market value when contributing them to charity, but the beneficiaries' income and other itemized deductions (relative to the standard deduction) may or may not support that much of a deduction.
- If the trust has significant income taxed at ordinary rates, the trust might consider selling the securities for a long-term capital gain, then distributing the cash to charity. If the trust makes no distributions to noncharitable beneficiaries, then as a practical matter the contribution will reduce the trust's ordinary income subject to tax, because capital gains are always taxed first; thus, the sale and contribution may have the practical effect of converting ordinary income to capital gain, which may save substantial tax (at least that's how it works for individuals). On the other hand, if distributions are made to noncharitable beneficiaries, the charitable deduction may need to be allocated partly to capital gain on their K-1s; see fn 2837 in part II.J.8.f.i.(a) Allocating Deductions to Various Income Items.

Income included on an estate's K-1 from an S corporation does *not* support a Code § 642(c) deduction unless the S corporation distributes that income to the estate; this issue can also

⁴⁹⁴¹ Rev. Rul. 83-75 (fn 2803), holding that the distribution by a trust of corpus consisting of appreciated securities in satisfaction of its obligation to pay a fixed annuity to a qualified charitable organization is a sale or exchange of the securities that results in taxable gain to the trust, but the trust is entitled to a charitable deduction equal to the amount of gain recognized upon the distribution of appreciated securities (after making adjustment for any deduction of capital gain provided under the tax law at that time). Letter Ruling 9044047 provided a similar result.

⁴⁹⁴² *Green v. U.S.*, 880 F.3d 519 (10th Cir. 2018), held:

As an initial matter, the IRS asserts, and the Trust agrees, that the statutory phrase "any amount of the gross income" means that charitable donations must be made out of a trust's gross income, but that real property purchased with gross income can also be treated as the equivalent of gross income for purposes of the deduction outlined in § 642(c)(1). This, we conclude, is an entirely reasonable interpretation of the statutory language. More specifically, this interpretation is consistent with the statutory language, and also encourages charitable donations to a greater degree than an interpretation that fails to include a sourcing component, *i.e.*, an interpretation that limits the deduction to donations made exclusively from gross income.⁴ See *Old Colony*, 301 U.S. at 384 ("Congress sought to encourage donations out of gross income").

⁴ In reaching this conclusion, we note that the Government has not cited to any section of the Code, any regulation, or even any treatise or basic accounting principle that directly supports its proposed interpretation.

That still leaves open the question of the allowable amount of a deduction for donated real property that was purchased with a taxpayer's gross income. The IRS has consistently asserted, both in addressing the Trust's claim for a refund and in this litigation, that the deduction amount is limited to the taxpayer's adjusted basis in the donated real property, *i.e.*, the amount of gross income the taxpayer originally paid for the real property. Without granting any deference to the IRS's position, we conclude that it is the most reasonable interpretation of the statutory language, particularly when considered in light of the Code as a whole.

arise with consent dividends⁴⁹⁴³ and partnership income.⁴⁹⁴⁴ The latter problem does not apply if an electing small business trust election is made;⁴⁹⁴⁵ so, instead of electing to be taxed as an estate,⁴⁹⁴⁶ a qualified revocable trust might want to make an ESBT election. This policy is so strong that, in *Sid Richardson*,⁴⁹⁴⁷ the Fifth Circuit held an estate was not permitted a charitable set-aside deduction with respect to undistributed S corporation income even though the estate was the sole owner of the S corporation and the charity ultimately received all of the estate's income, including the S corporation stock.⁴⁹⁴⁸ The court reasoned:

... to qualify for the charitable deduction, the amount here in question must have been (1) part of the Estate's gross income, and (2) pursuant to the terms of the governing instrument (here the Will) must have been (3) paid or permanently set aside or properly designated to be used exclusively for legitimate charitable purposes.

In considering the Foundation's contentions it is important to understand in fact the undistributed income at issue never left the coffers of the Subchapter S corporation. Undaunted by this apparently insurmountable obstacle, the Foundation doggedly insists that the amounts in question have met the requirements of 642(c) and that the Estate is entitled to the claimed deduction. The Foundation explains that because Oils was a Subchapter S corporation, its undistributed income was a part of the Estate's gross income; and, under the terms of the Will, all of the income of the Estate was set aside for

⁴⁹⁴³ A consent dividend is a deemed (not actually distributed) dividend from a corporation to avoid accumulated earnings tax; see fn. 4879, found in part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax. *Estate of Esposito v. Commissioner*, 40 T.C. 459 (1963), denied a charitable set-aside deduction for consent dividends, even though the entire residue was set aside for charity.

⁴⁹⁴⁴ In *Estate of Freund v. Commissioner*, 35 T.C. 629, *aff'd* 303 F.2d 30 (2nd Cir. 1962), the estate received a K-1 for all of the partnership's earnings, some of which decedent withdrew before death and some of which the estate withdrew after death. The charitable deduction was allowed only with respect to the amount the partnership to the estate distributed after death.

⁴⁹⁴⁵ Under 2017 tax reform, Code § 642(c) does not apply to an ESBT; see fn 6078 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview and also note that fn 6077 allows an ESBT to deduct charitable contributions against its S corporation income only to the extent they are on the K-1 from the S corporation.

⁴⁹⁴⁶ See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

⁴⁹⁴⁷ *Sid W. Richardson Foundation v. U.S.*, 430 F.2d 710 (5th Cir. 1970), *reh. den.* 430 F.2d 710 [the decision and the denial of rehearing were published together], *cert. den.* 4/5/1971, *reh. den.*, 403 US 912 (1971). The tax years in question were 1960 and 1961 – before Code § 681 moved UBTI items from Code § 642(c) into Code § 170. Generally, Code § 512(e) treats as unrelated business income S corporation K-1 items and gain from the sale of S corporation stock, even if the S corporation never engaged in any business or debt-financed activities.

⁴⁹⁴⁸ In this case involving 1960 and 1961 tax returns, the Fifth Circuit noted:

Richardson's will (Will) provided that all of the income of the Estate which accrued during its administration would be included in the residue of his estate. The following residuary clause governed the final distribution of this income:

I give devise and bequeath ... all of the residue of my estate wherever situated which shall remain after the payment of debts and obligations, taxes and similar charges, the expenses of administering my estate and the satisfaction of the bequests and devises made in Article III hereof, to Sid W. Richardson Foundation....

All of the specific bequests in the Will were satisfied in property except for \$256,060.36 and a monthly provision for a sister payable out of corpus. None of the Estate's income was used to pay cash bequests. The residue of the Estate, including all outstanding capital stock of Oils and all income was transferred to the Foundation as of January 1, 1962.

and “actually” did go to the Foundation, a charitable institution. Thus, it concludes that the requirements of § 642(c) have been met and the Estate is entitled to the deduction.

We must reject this conjuration on two grounds. First, the undistributed income of Oils was never subject to the charitable provisions of the Will. Second, the amounts in question were not paid or permanently set aside or otherwise properly designated for charitable purposes.

Although the undistributed income of Oils was considered in computing the gross income of the Estate, it was never a part of the Estate; it never came within the dominion and control of the executors as distinguished from the corporate entity; and it was never subject to the charitable provisions of decedent’s Will. The Foundation’s argument assumes that because the undistributed income of Oils was included in computing the Estate’s gross income, it actually became a part of the Estate and was subject to the terms of the Will. We find no support for such an assumption.

After discussing other cases, Fifth Circuit concluded:

The Foundation attempts to distinguish *Freund* and *Esposito* by arguing that in the instant case, the funds in question were “actually distributed by Oils to the Estate in the two years involved, all of which was under the complete control of the executors, who were required to see, and did see, that it went with the residue of the remainder to Foundation.” This argument grossly misstates the facts. It could only be correct if the corporate existence of Oils were totally ignored. The Foundation supports its position by explaining that all of the stock of Oils was part of the corpus of the Estate and was duly transferred to the Foundation. In essence, the Foundation is arguing that ownership of the stock is ownership of the income and transfer of the stock is transfer of the income. The Foundation erroneously disregards the fact that Oils is a separate entity, and as such the undistributed profits could be used by Oils in any legitimate way it saw fit. The rule is well-settled that the fact that taxpayers exercised complete dominion and control over the corporation, were in charge of its administration and management, and fully directed its policies, does not justify disregarding the corporate entity for tax purposes.⁶ The district court correctly rejected Foundation’s claimed deduction for amounts equivalent to the undistributed income of Oils.⁷

⁶ *National Carbide v. Commissioner*, 336 U.S. 422 (1949); *Skarda v. Commissioner*, 250 F.2d 429 (10th Cir. 1957). One of the more perplexing aspects of this case is that the Foundation never argued that the corporate entity should be disregarded; such an argument would seem to be logically necessary to support its contention that the amount in question “actually” went to the Foundation. In any event, the above cited authorities seem conclusive on this point.

⁷ See the district court’s opinion, 306 F.Supp. at 761. The court correctly and cogently concluded:

The capital stock of Richardson Oils came within the control of the provisions of the will, but the corporation’s undistributed profits did not. Until a dividend was declared, the corporation had the right to use those profits in any legitimate way it saw fit, without regard to the provisions of the will which governed the Estate. Under those circumstances, Sec. 642(c) did not become applicable to such undistributed profits.

306 F. Supp at 762.

An S corporation was able to satisfy this requirement by distributing accounts receivable, which would first be used to satisfy remaining estate liabilities and then either be distributed to or set aside for the estate's sole beneficiary, a private foundation.⁴⁹⁴⁹ If there is a disconnect between cash flow and K-1 items, it has been suggested that one consider creating an LLC that holds plenty of cash and also holds the partnership or S corporation. That way, the K-1 from the partnership or S corporation can be accompanied by cash. In other words, if the K-1 is \$100,000, the LLC distributes \$100,000 to the trust. If the pass-through entity is an S corporation, the estate must be the LLC's sole owner so that the LLC can be disregarded for income tax purposes; an LLC taxed as a partnership would not be an eligible S corporation shareholder.⁴⁹⁵⁰ I am not confident that works, because the distribution is deemed to have come from the trust, not the S corporation, for income tax purposes.

The extent to which gross income the trust received during the year must be traced to a distribution from the trust to charity is unclear; the IRS appears to believe that, the distribution to charity can be deducted to the extent that the distributed property itself constituted gross income in the current or in any prior year, which means that only the basis of property distributed can be deducted.⁴⁹⁵¹

⁴⁹⁴⁹ Letter Ruling 201246003.

⁴⁹⁵⁰ See part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity, especially fns. 146-150, the latter which makes me very confident that a disregarded entity treated as owned by one qualified individual can hold stock in an S corporation so long as the entity continues to be disregarded in that manner.

⁴⁹⁵¹ CCA 201042023 (trust's charitable contribution deduction should be limited to the adjusted basis of the properties purchased from accumulated gross income). Contradicting the CCA and holding in the taxpayer's favor is *Green v. United States*, 116 A.F.T.R.2d 2015-6668 (W.D. Okla. 2015 (trust's charitable contribution deduction are *not* limited to the adjusted basis of the properties purchased from accumulated gross income), but the Tenth Circuit reversed, 880 F.3d 519 (1/12/2018), holding that only the basis of contributed property was deductible under Code § 642(c). *U.S. v. Benedict*, 338 U.S. 692 (1950) (capital gains which expressly is not to be taken into account in computing taxable net income as also excluded from statutory gross income) denied a deduction under for a contribution of certain capital gains because those gains were excludable from gross income under another provision. The CCA cited that case and *W.K. Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (3d Cir. 1944), both of which the *Green* judge rejected as controlling.

See also fn. 4938 (tracing requirement applies but uses accounting conventions rather than actual tracing); Fox, ¶12.04 Requirement That Source of Contribution Be From Gross Income, *Charitable Giving: Taxation, Planning, and Strategies* (WG&L); WTAS LLC, ¶31.09 Source of Payment: Gross Income Only, *Tax Economics of Charitable Giving* (WG&L), citing *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937) (charitable contributions by a trust need not be shown to have been paid out of income received in the year in which they were made if, by the terms of the trust, no limitation was prescribed on the source of payment), and its progeny.

Jonathan Blattmachr's 2015 Heckerling materials stated:

It seems that if the partnership's gross income is used to acquire another asset, the contribution to charity of the asset, so acquired with the trust's gross income, should be treated as a contribution of gross income for purposes of Section 642(c).²³

²³ See, e.g., *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937), dealing with the predecessor to current Section 642(c) and in which the Court deferred to the fiduciary's accounting treatment to answer the question whether a certain payment was made from gross income or principal. See, also, Chief Counsel Advice (CCA) 201042023 (the Service ruled that a property bought with accumulated income of a trust was deductible under Section 642(c) when

II.Q.7.c.i.(b). Business Income Limiting Trust Income Tax Deduction

Although normally trusts may deduct all of their gross income that they pay to charity,⁴⁹⁵² this deduction is eliminated to the extent that the trust has unrelated business taxable income (UBTI).⁴⁹⁵³ However, in computing the UBTI causing this disallowance, a charitable contribution deduction is allowed, using the percentages that apply to contributions by an individual.⁴⁹⁵⁴ Thus, a partial charitable contribution is allowed to be made out of unrelated business income.⁴⁹⁵⁵ The contribution must be made during the taxable year; the one-year delay permitted by Code § 642(c)(1) does not apply to this deduction.⁴⁹⁵⁶ Furthermore, consider whether the trust also becomes subject to an individual's restrictions⁴⁹⁵⁷ regarding substantiation⁴⁹⁵⁸ and identity of donee.⁴⁹⁵⁹

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified

distributed to charity because it was out of gross income. However, the charitable deduction was limited to the trust's adjusted basis in the property. (Not precedent.) Cf. *Crestar Bank v. Internal Revenue Service*, 47 F.Supp.2d 670 (E.D. Va. 1999); *Freund's Estate v. Commissioner*, 303 F.2d 30 (2nd Cir. 1962); *Sid W. Richardson Foundation v. U.S.*, 430 F.2d 710 (5th Cir. 1970); *Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (1944); *Estate of Joseph Esposito v. Commissioner*, 40 TC 459 (1963).

⁴⁹⁵² Code § 642(c).

⁴⁹⁵³ Code §§ 642(c)(4) and 681. See part II.Q.6.d Unrelated Business Taxable Income.

⁴⁹⁵⁴ Code § 512(b)(11); Reg. § 1.512(b)-1(g).

⁴⁹⁵⁵ Reg. § 1.681(a)-2(b).

⁴⁹⁵⁶ Reg. § 1.681(a)-2(a).

⁴⁹⁵⁷ Reg. § 1.681(a)-2(a) provides:

While the charitable contributions deduction under section 642(c) is entirely disallowed by section 681(a) for amounts allocable to unrelated business income, a partial deduction is nevertheless allowed for such amounts by the operation of section 512(b)(11), as illustrated in paragraphs (b) and (c) of this section.

Code § 512(b)(11) provides:

In the case of any trust described in section 511(b), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), and for such purpose a distribution made by the trust to a beneficiary described in section 170 shall be considered as a gift or contribution. The deduction allowed by this paragraph shall be allowed with the limitations prescribed in section 170(b)(1)(A) and (B) determined with reference to the unrelated business taxable income computed without the benefit of this paragraph (in lieu of with reference to adjusted gross income).

Tying in the final piece of statutory authority, Code § 511(b) provides:

- (1) *Imposition of tax.* There is hereby imposed for each taxable year on the unrelated business taxable income of every trust described in paragraph (2) a tax computed as provided in section 1(e). In making such computation for purposes of this section, the term taxable income as used in section 1 shall be read as unrelated business taxable income as defined in section 512.
- (2) *Charitable, etc., trusts subject to tax.* The tax imposed by paragraph (1) shall apply in the case of any trust which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a) and which, if it were not for such exemption, would be subject to subchapter J (sec. 641 and following, relating to estates, trusts, beneficiaries, and decedents).

⁴⁹⁵⁸ See part II.J.4.c Charitable Distributions.

⁴⁹⁵⁹ See part II.J.4.c Charitable Distributions, fn. 2590.

retirement plan (other than an ESOP) or a Code § 501(c)(3) charity;⁴⁹⁶⁰ as mentioned in fn. 4957 above, Code § 681(a) takes away the Code § 642(c) deduction from trusts (and instead applies the individual percentage limitations) to the extent that they have unrelated business income, determined as if the trust were a Code § 501(c)(3) charity. This is yet another disadvantage of S corporations compared to partnerships, the income from which is unrelated business income only to the extent it fits within the usual unrelated business income (UBI) categories; see part II.Q.6.d Unrelated Business Taxable Income. If a trust that owns S corporation stock that is includible in the income beneficiary's estate and has a charitable remainderman, the S corporation might liquidate immediately after the beneficiary's death, to minimize UBTI; one easy way might be to convert the S corporation to an LLC taxed as an S corporation during the planning stage,⁴⁹⁶¹ then revoke the election to be taxed as a corporation as of the beneficiary's death. On the other hand, an ESBT might be in a better position to deduct charitable contributions flowing from an S corporation's K-1 than any other fiduciary entity holding an interest in a pass-through entity.⁴⁹⁶²

This partial deduction means that the trustee should not distribute all of the UBI to charity, because the trust will need to pay income tax on the UBI that cannot be fully offset by the charitable deduction.⁴⁹⁶³ If the trust mandates that all of the income be paid to charity, the trustee may still allocate the taxes as an expenditure charged against income so that the trustee can pay the taxes.⁴⁹⁶⁴

Fortunately, these rules do not apply to estates.⁴⁹⁶⁵ If a qualified revocable trust elects to be taxed as an estate, then it should escape this limitation.⁴⁹⁶⁶ These rules also would not apply to QSSTs, because the beneficiary is treated as the owner of the S corporation stock for income tax purposes;⁴⁹⁶⁷ of course, the beneficiary would have the overall charitable deduction contribution limitations, which limitations do not apply to trusts that do not have unrelated business income. An ESBT cannot deduct contributions it makes but can, subject to the rules of this part II.Q.7.c.i, deduct its distributive share of contributions the S corporation makes.⁴⁹⁶⁸

Once all of this analysis regarding unrelated business income is done at the trust level, presumably it will not be repeated at the charity's level, because the trust does not give the

⁴⁹⁶⁰ Code § 512(e), some of which was added by P.L. 104-188, effective for taxable years beginning after December 31, 1997.

⁴⁹⁶¹ See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Instead of doing a merger or former conversion, the S corporation might transfer all of its assets to the LLC and then liquidate, trying to use the statute of limitations for claims against liquidated companies to avoid claims by creditors from when the S corporation operated a business or otherwise subjected itself to tort liabilities; see part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.

⁴⁹⁶² See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, especially fn 4945 and the text preceding it.

⁴⁹⁶³ For example, in Reg. § 1.681(a)-2(c), Ex. 3, the trust paid the charity all \$31K of its UBI, but it still had \$24K of taxable income (based on a 20% charitable deduction limitation). It reserved no cash to pay that tax, a fact not pointed out by the Example.

⁴⁹⁶⁴ Section 506(a)(2) of the Uniform Principal and Income Act.

⁴⁹⁶⁵ Code § 681 and the regulations thereunder apply to trusts; they does not mention estates. Letter Ruling 201246003 authorized a full Code § 642(c) deduction for income from an S corporation set aside for the estate's sole beneficiary, which was a private foundation.

⁴⁹⁶⁶ See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI).

⁴⁹⁶⁷ See fn. 6015.

⁴⁹⁶⁸ See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview, especially fns. 6077.

charity a K-1.⁴⁹⁶⁹ When deciding whether to have a business run by a charity itself or by a trust that benefits charity, consider the following:

- If the activity definitely would generate UBTI, run it through the trust. Instead of all of the UBTI being taxed, the trust will be taxed on only the excess UBTI over the charitable deduction.
- If there is substantial authority for the activity not generating UBTI, for example because it is related to the charity's exempt purpose, then perhaps the charity should undertake the activity and report it as not being subject to UBTI.

II.Q.7.c.ii. Private Foundations, Etc.

A private foundation may hold only limited amounts of an S corporation⁴⁹⁷⁰ (or similar amounts for other entities, including C corporations and partnerships),⁴⁹⁷¹ and any excess amounts may be held for only five or so years.⁴⁹⁷² However, if the business entity does not operate a business and instead merely generates investment income, it will not be subject to this rule.⁴⁹⁷³

Code § 4941 imposes a modest penalty on each act of self-dealing between a disqualified person and a private foundation.⁴⁹⁷⁴ The tax applies to each participating disqualified person⁴⁹⁷⁵

⁴⁹⁶⁹ Consistent with Code § 663(a)(2), Reg. § 1.663(a)-2 provides:

Any amount paid, permanently set aside, or to be used for the charitable, etc., purposes specified in section 642(c) and which is allowable as a deduction under that section is not allowed as a deduction to an estate or trust under section 661 or treated as an amount distributed for purposes of determining the amounts includible in gross income of beneficiaries under section 662.

Amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c). For purposes of this section, the deduction provided in section 642(c) is computed without regard to the provisions of section 508(d), section 681, or section 4948(c)(4) (concerning unrelated business income private foundations).

See fn 2881 in part II.J.9.a.ii Separate Share Rule.

Notice 2004-35 provides:

The Treasury Department and the Internal Revenue Service intend to propose regulations modifying Treas. Reg. § 53.4940-1(d)(2) to provide that a private foundation's net investment income for purposes of section 4940 does not include distributions from trusts and estates. Until further guidance is promulgated, income distributions from trusts and estates will not retain their character in the hands of a distributee private foundation for purposes of determining the foundation's net investment income under section 4940(c).

⁴⁹⁷⁰ See Potter, "Using S Corporation Stock to Fund an Individual Shareholder's Private Foundation," *Estates, Gifts & Trusts Journal* (BNA) 5/11/2017, saved as Thompson Coburn LLP document number 6561372.

⁴⁹⁷¹ Reg. § 53.4943-3(c) applies these rules to partnerships, sole proprietorships, trusts, etc. See Wilson, Better Late than Never: Incorporating LLCs into Section 4943 (3/31/2015), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2587781 or Thompson Coburn LLP document number 6174131; I am not expressing an opinion on the article's recommendations.

⁴⁹⁷⁵ Code § 4941(a)(1).

and foundation manager,⁴⁹⁷⁶ which becomes punitive if not corrected within the taxable period.⁴⁹⁷⁷ “Self-dealing” means any direct or indirect:⁴⁹⁷⁸

- (A) sale or exchange, or leasing, of property between a private foundation and a disqualified person;
- (B) lending of money or other extension of credit between a private foundation and a disqualified person;
- (C) furnishing of goods, services, or facilities between a private foundation and a disqualified person;
- (D) payment of compensation (or payment or reimbursement of expenses) by a private foundation to a disqualified person;
- (E) transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a private foundation; and
- (F) agreement by a private foundation to make any payment of money or other property to a government official (as defined in section 4946(c)), other than an agreement to employ such individual for any period after the termination of his government service if such individual is terminating his government service within a 90-day period.

In applying the above rules, Code § 4941(d)(2), “Special rules,” provides:

- (A) the transfer of real or personal property by a disqualified person to a private foundation shall be treated as a sale or exchange if the property is subject to a mortgage or similar lien which the foundation assumes or if it is subject to a mortgage or similar lien which a disqualified person placed on the property within the 10-year period ending on the date of the transfer;
- (B) the lending of money by a disqualified person to a private foundation shall not be an act of self-dealing if the loan is without interest or other charge (determined without regard to section 7872) and if the proceeds of the loan are used exclusively for purposes specified in section 501(c)(3);
- (C) the furnishing of goods, services, or facilities by a disqualified person to a private foundation shall not be an act of self-dealing if the furnishing is without charge and if the goods, services, or facilities so furnished are used exclusively for purposes specified in section 501(c)(3);
- (D) the furnishing of goods, services, or facilities by a private foundation to a disqualified person shall not be an act of self-dealing if such furnishing is made on a basis no more favorable than that on which such goods, services, or facilities are made available to the general public;
- (E) except in the case of a government official (as defined in section 4946(c)), the payment of compensation (and the payment or reimbursement of expenses) by a

⁴⁹⁷⁶ Code § 4941(a)(2).

⁴⁹⁷⁷ Code § 4941(b).

⁴⁹⁷⁸ Code § 4941(d)(1).

private foundation to a disqualified person for personal services which are reasonable and necessary to carrying out the exempt purpose of the private foundation shall not be an act of self-dealing if the compensation (or payment or reimbursement) is not excessive;

- (F) any transaction between a private foundation and a corporation which is a disqualified person (as defined in section 4946(a)), pursuant to any liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, shall not be an act of self-dealing if all of the securities of the same class as that held by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value;
- (G) in the case of a government official (as defined in section 4946(c)), paragraph (1) shall in addition not apply to -
 - (i) prizes and awards which are subject to the provisions of section 74(b) (without regard to paragraph (3) thereof), if the recipients of such prizes and awards are selected from the general public,
 - (ii) scholarships and fellowship grants which would be subject to the provisions of section 117(a) (as in effect on the day before the date of the enactment [10/22/86] of the Tax Reform Act of 1986) and are to be used for study at an educational organization described in section 170(b)(1)(A)(ii),
 - (iii) any annuity or other payment (forming part of a stock-bonus, pension, or profit-sharing plan) by a trust which is a qualified trust under section 401,
 - (iv) any annuity or other payment under a plan which meets the requirements of section 404(a)(2),
 - (v) any contribution or gift (other than a contribution or gift of money) to, or services or facilities made available to, any such individual, if the aggregate value of such contributions, gifts, services, and facilities to, or made available to, such individual during any calendar year does not exceed \$25,
 - (vi) any payment made under chapter 41 of title 5, United States Code, or
 - (vii) any payment or reimbursement of traveling expenses for travel solely from one point in the United States to another point in the United States, but only if such payment or reimbursement does not exceed the actual cost of the transportation involved plus an amount for all other traveling expenses not in excess of 125 percent of the maximum amount payable under section 5702 of title 5, United States Code, for like travel by employees of the United States; and
- (H) the leasing by a disqualified person to a private foundation of office space for use by the foundation in a building with other tenants who are not disqualified persons shall not be treated as an act of self-dealing if -
 - (i) such leasing of office space is pursuant to a binding lease which was in effect on October 9, 1969, or pursuant to renewals of such a lease;

(ii) the execution of such lease was not a prohibited transaction (within the meaning of section 503(b) or any corresponding provision of prior law) at the time of such execution; and

(iii) the terms of the lease (or any renewal) reflect an arm's-length transaction.

The IRS' web page provides an "an introduction to self-dealing, specifically IRC 4941(d)(1)(C), Furnishing of goods, services, or facilities between a private foundation and a disqualified person," which includes a basic summary and a link to IRS audit techniques.⁴⁹⁷⁹

Below is a brief review of some aspects of self-dealing issues; my materials are intended to provide only limited coverage.

Applying Code § 4941(d)(2)(E), Letter Ruling 201937003 reasoned:

Treas. Reg. § 53.4941(d)-3(c)(1) provides, in part, that under § 4941(d)(2)(E), the payment of compensation by a private foundation to a disqualified person for personal services which are reasonable and necessary to carry out the exempt purpose of the private foundation shall not be an act of self-dealing if the compensation is not excessive. This rule applies without regard to whether the person who receives the compensation is an individual.

Treas. Reg. § 53.4941(d)-3(c)(2) provides examples of "personal services" for purposes of Treas. Reg. § 53.4941(d)-3(c)(1). These include legal services, investment counseling services, and general banking services.

In *Madden v. Commissioner*, 74 T.C. Memo. 1997-395, the Tax Court ruled that maintenance, janitorial, and security services provided by a disqualified person to a private foundation are not "personal services" that are necessary to carrying out the exempt purposes of a private foundation for purposes of the exception to self-dealing. Citing the legislative history of § 4941, the Court noted that one of Congress's stated goals in enacting § 4941 was to minimize the need for an arm's-length standard by generally prohibiting self-dealing transactions between private foundations and disqualified persons and that any exceptions to the self-dealing transaction rules should be construed narrowly. The Court characterized the services described in the regulations under § 4941 as essentially professional and managerial in nature, and concluded that maintenance, janitorial, and custodial services do not meet the definition of "personal services" allowed under § 4941.

Founder is a substantial contributor, as defined in § 507(d)(2), and therefore, is a disqualified person with respect to Foundation as described in section 4946(a)(1)(A). Thus, any direct or indirect payment of compensation to Founder by Foundation will constitute an act of self-dealing unless an exception applies. Because A and B are disregarded as entities separate from their owners within the meaning of Treas. Reg. § 301.7701-3, any payments of compensation by Foundation to either of them are considered to be payments to Founder. [Redacted Text]. Founder, through A, which is a disregarded entity, employs individuals who provide a variety of services to Foundation. In order to carry out its exempt purposes, Foundation requires the services

⁴⁹⁷⁹ <https://www.irs.gov/government-entities/private-foundations-self-dealing-irc-4941d1c>.

of individuals such as those employed by Founder through A, who provide the services described above to Foundation.

Payment of compensation by a private foundation to a disqualified person generally is an act of self-dealing under § 4941(d)(1)(D). However, § 4941(d)(2)(E) provides an exception to self-dealing for the payment of compensation by a private foundation to a disqualified person for personal services which are reasonable and necessary to carrying out the exempt purposes of the private foundation if the compensation is not excessive.

Treas. Reg. § 53.4941(d)-3(c)(2) provides examples of allowable personal services that consist of legal services, investment counseling services, and general banking services. Additionally, *Madden v. Commissioner, supra*, indicates that services that are professional and managerial in nature are types of personal services that are permitted under § 4941.

Foundation will enter into a services agreement to hire A to perform certain charitable program, grant-making and consulting services. Unlike the maintenance, janitorial, and custodial services described in *Madden v. Commissioner, supra*, the grant-making, consulting, investment, and management services that directly further charitable purposes are provided to Foundation by Founder through A (a disregarded entity) and are professional and managerial services. The programmatic, grant-making and consulting services are reasonable and necessary services that enable Foundation to carry out its charitable purposes. As such, they fall within the exception to the self-dealing rules for “personal services” described in § 4941(d)(2)(E) as long as the compensation is not excessive in relation to the services provided.

The services agreement also will include a provision that permits A to hire B to provide investment services. This situation is similar to the example in Treas. Reg. § 53.4941(d)-3(c)(2), Example (2), in which a manager of a private foundation who owned an investment counseling business provided investment services directly to the private foundation and was paid compensation for those services. Consequently, payments by Foundation to A for B’s investment services provided to Foundation will be payment for reasonable expenses necessary to carry out the exempt purposes of Foundation as long as the compensation is necessary and reasonable to carrying out Foundation’s investment program and not excessive under § 4941(d)(2)(E).

Accordingly, payment to A by Foundation of a reasonable fee for the described services will not constitute a prohibited act of self-dealing within the meaning of § 4941 as long as the amount of the payment is not excessive.

The sale or exchange of property between a private foundation and a disqualified person constitutes self-dealing, including the transfer of real or personal property by a disqualified person to a private foundation shall be treated as a sale or exchange if the foundation assumes a mortgage or similar lien which was placed on the property prior to the transfer, or takes subject to a mortgage or similar lien which a disqualified person placed on the property within the 10-year period ending on the date of transfer.⁴⁹⁸⁰ The Code § 4941(d)(2)(F) exception for corporate transactions is quite important, in that it allows a corporation to redeem stock issued

⁴⁹⁸⁰ Reg. § 53.4941(d)-2(a).

to a private foundation if everyone receives the same offer. Reg. § 53.4941(d)-3(d), "Certain transactions between a foundation and a corporation," provides:

(1) In general. Under section 4941(d)(2)(F), any transaction between a private foundation and a corporation which is a disqualified person will not be an act of self-dealing if such transaction is engaged in pursuant to a liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, so long as all the securities of the same class as that held (prior to such transaction) by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value. For purposes of this paragraph, all of the securities are not subject to the same terms unless, pursuant to such transaction, the corporation makes a bona fide offer on a uniform basis to the foundation and every other person who holds such securities. The fact that a private foundation receives property, such as debentures, while all other persons holding securities of the same class receive cash for their interests, will be evidence that such offer was not made on a uniform basis. This paragraph may apply even if no other person holds any securities of the class held by the foundation. In such event, however, the consideration received by holders of other classes of securities, or the interests retained by holders of such other classes, when considered in relation to the consideration received by the foundation, must indicate that the foundation received at least as favorable treatment in relation to its interests as the holders of any other class of securities. In addition, the foundation must receive no less than the fair market value of its interests.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). Private foundation X owns 50 percent of the class A preferred stock of corporation M, which is a disqualified person with respect to X. The terms of such securities provide that the stock may be called for redemption at any time by M at 105 percent of the face amount of the stock. M exercises this right and calls all the class A preferred stock by paying 105 percent of the face amount in cash. At the time of the redemption of the class A preferred stock, it is determined that the fair market value of the preferred stock is equal to its face amount. In such case, the redemption by M of the preferred stock of X is not an act of self-dealing.

*Example (2).*⁴⁹⁸¹ Private foundation Y, which is on a calendar year basis, acquires 60 percent of the class A preferred stock of corporation N by will on January 10, 1970. N, which is also on a calendar year basis, is a disqualified

⁴⁹⁸¹ [My footnote:] Letter Ruling 9731034 held:

In your letter dated June 24, 1992, you were concerned with the tax consequences of a redemption of shares of common stock from B following the donation of such shares to B by C. Redemption was to be accomplished through extensions of credit by A, a disqualified person with respect to B. On August 31, 1993, we issued a favorable ruling to B (PLR #9347035) on this request. Subsequent to the issuance of the ruling it was discovered that the ruling was contrary to Example 2 of section 53.4941(d)-3(d)(2) of the Foundation and Similar Excise Taxes Regulations. When B was informed of our intent to revoke the ruling, B indicated that the transaction was never entered into and asked that the ruling request be withdrawn. On October 27, 1994, we acknowledged the withdrawal of B's ruling request. This letter formally revokes PLR #9347035.

person with respect to Y. In 1971, N offers to redeem all of the class A preferred stock for a consideration equal to 100 percent of the face amount of such stock by the issuance of debentures. The offer expires January 2, 1972. Both Y and all other holders of the class A preferred stock accept the offer and enter into the transaction on January 2, 1972, at which time it is determined that the fair market value of the debentures is no less than the fair market value of the preferred stock. The transaction on January 2, 1972, shall not be treated as an act of self-dealing for 1972. However, because under § 53.4941(e)-1(e)(1)(i) an act of self-dealing occurs on the first day of each taxable year or portion of a taxable year that an extension of credit from a foundation to a disqualified person goes uncorrected, if such debentures are held by Y after December 31, 1972, except as provided in § 53.4941(d)-4(c)(4), such extension of credit shall not be excepted from the definition of an act of self-dealing by reason of the January 2, 1972, transaction. See § 53.4941(d)-4(c)(4) for rules indicating that under certain circumstances such debentures could be held by Y until December 31, 1979.

That applies only to corporations. As to partnerships, FSA 200015007 is reproduced in full:

ISSUES

1. Whether the self-dealing penalties of section 4941 would apply have if:
 - a. all of the partners agreed to sell the partnership;
 - b. the foundation were to sell its interest to a third party, either separately or as part of a transaction involving the sale of all partnership interests;
 - c. if the other partners were to purchase the foundation's interest at fair market value to facilitate a sale of all interests to a third party?
2. Whether the exception found in section 4941(d)(2)(F) regarding liquidation of corporations would apply if all of the partners agreed to dissolve or liquidate the partnership.
3. What are the maximum penalties under section 4941 in any of the above situations.
4. Whether a private letter ruling could be obtained by the foundation covering any of the above situations.

CONCLUSIONS

1. Assuming that the foundation managers or other disqualified persons receive no benefit from the sale, the sale of the foundation's interest to a third party either separately or as part of a transaction involving the sale of all partnership interests, would not give rise to an act of self-dealing. Similarly, the sale of a disqualified person's interest in the partnership to anyone other than the foundation would not be an act of self-dealing. On the other hand, the sale by the foundation of its partnership interest at fair market value to a disqualified person would be an act of self-dealing.

2. If the procedure followed in dissolving or liquidating the partnership is in accord with Treas. Reg. section 53.4941 (d)-3(d), then the dissolution or liquidation of the private foundation's interest would not be self-dealing.
3. Section 4941 contains a two-tier series of sanctions. The first tier tax is a tax of 5% of the transaction amount which is imposed on the disqualified person regardless of intent, and a tax of 2 1/2% of the transaction amount imposed on a foundation manager who knowingly participates in the act of self-dealing. In the event that the self-dealing transaction is not corrected, a second tier tax of 200% of the transaction amount is imposed on the disqualified person and a tax of 50% of the transaction amount is imposed on a foundation manager who refuses to agree to the correction.
4. A ruling could be obtained on the sales transactions described above, or whether a liquidation or dissolution met the requirements of section 4941(d)(2)(F) of the Code.

FACTS

On date 1, decedent executed a revocable trust. The trust has two trustees, decedent's son, and employee, an unrelated individual who serves as the family's business advisor. The beneficiaries of the trust are son (50%) and decedent's grandsons, grandson 1 (25%) and grandson 2 (25%), the children of decedent's predeceased child.

On date 2, the trustees established a limited liability company. Son was designated as president and employee was designated as vice president and tax matters partner. The trust contributed \$w in exchange for a 99% interest and son contributed \$x for a 1% interest. On that same day, the trust and the company formed a limited partnership. The trust contributed \$y in liquid assets and realty for a 99% limited partnership interest, while the company contributed its assets for a 1% general partnership interest. The trust then assigned .065% of its interest to the foundation, a tax- exempt private foundation.

Under the terms of the partnership agreement, the general partner has exclusive responsibility for the management, operations and control of the partnership's affairs. Unanimous consent of all partners is required to terminate the partnership prior to the expiration of its 50 year term or to amend the partnership agreement.

The foundation is a non-profit corporation founded by decedent's family more than thirty years earlier. Decedent was the president of foundation, and had made a substantial contribution to it. Son is now the president and employee is now the vice-president of foundation. The fair market value of all assets in foundation at the close of the taxable year which included decedent's date of death was \$z.

Decedent died five days after the creation of the partnership. As of that date, the partnership interests were held as follows:

Partner	Partnership Interest
Company (General Partner)	1.000%
Revocable trust (Limited Partner)	98.935%
Foundation (Limited Partner)	0.065%
Total	100.000%

In valuing decedent's 98.935% limited partnership interest, decedent's executor reduced the net asset value of the partnership to reflect the minority status and lack of marketability of the interests. The minority interest discount was based in part on the opinion of the estate's attorney that the presence of the foundation as a partner, which implicates the self-dealing provisions of IRC section 4941, would limit the ability of the hypothetical purchaser of decedent's 98.935% interest to maximize the return on that investment. Secondly, the estate argues that despite the existence of actual family control at all relevant times, section 4941 would effectively eliminate the family's ability to liquidate the partnership, thereby precluding the application of section 2704.

LAW AND ANALYSIS

OVERVIEW

Section 2031(a) of the Code provides that the value of the gross estate is to be determined for Federal estate tax purposes "by including ... the value at the time of his death of all property, real or personal, tangible or intangible, wherever situated." Value is determined at the moment of death. *Ahmanson Found. v. United States*, 674 F.2d 761, 767 (9th Cir. 1981). The standard for valuation is fair market value, defined as "the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts." *United States v. Cartwright*, 411 U.S. 546, 551 (1973) (quoting Treas. Reg. section 20.3031-1(b); *Collins v. Commissioner*, 3 F.3d 625, 633 (2d Cir. 1993). This objective test requires property to be valued from the viewpoint of a hypothetical buyer and seller, each of whom would seek to maximize his or her profit from any transaction involving the property. *Estate of Watts v. Commissioner*, 823 F.2d 483, 486 (11th Cir. 1987); *Estate of Bright v. United States*, 658 F.2d 999, 1005-1006 (5th Cir. 1981).

Section 2704 of the Code is part of a set of special valuation rules designed to mitigate the effect of Treas. Reg. section 20.3031-1(b) in certain intra-family contexts. Section 2704(b)(1) provides, in part, that in the case of a transfer of an interest in a

partnership to a member of the transferor's family, if the transferor and members of the transferor's family hold, immediately before the transfer, control of the entity, then an applicable restriction will be disregarded in valuing the transferred interest. An applicable restriction is one which limits the ability of the partnership to liquidate, but which the transferor or the family, either alone or collectively, has the right to remove after the transfer. Stated another way, in the case of a transfer subject to a liquidation restriction, if the family holds control both before and after the transfer, the transfer is valued without regard to the restriction. Section 2704 differs from section 2031 in that it looks to the actual parties to the transfer, and not to a hypothetical third party.

As noted above, the estate has argued that the presence of the foundation as a partner, which implicates the self-dealing provisions of IRC section 4941, would limit the ability of the hypothetical purchaser of decedent's partnership interest to maximize the return on that investment. Secondly, the estate argues that despite the existence of actual family control at all relevant times, section 4941 would effectively eliminate the family's ability to liquidate the partnership, thereby precluding the application of section 2704. For the reasons discussed below we believe that there are realistic sales transactions and liquidation transactions which would not subject the hypothetical purchaser, the foundation managers, the general partner or any disqualified persons to self-dealing taxes. Secondly, under certain circumstances, the foundation could join with the family in voting to liquidate the partnership without subjecting the foundation managers, the general partner or any disqualified persons to self-dealing taxes. Accordingly, we agree that the presence of the foundation in the transaction does not affect the application of either section 2031 or 2704. We will now answer the specific questions that you have posed.

Issue 1

Section 4941(a)(1) of the Code imposes a tax upon any act of self-dealing between a private foundation and any of its disqualified persons as defined in section 4946.

Section 4941(d)(1)(A) of the Code defines the term self-dealing to mean any direct or indirect sale or exchange, or leasing of property between a private foundation and a disqualified person. Section 4941(d)(1)(D) defines the term self-dealing to mean any direct or indirect payment of compensation (or payment or reimbursement of expenses) between a private foundation and a disqualified person. Section 4941(d)(1)(E) defines the term self-dealing to mean any direct or indirect transfer to, or use by or for the benefit of a disqualified person of the income or assets of a private foundation.

Section 4946(a)(1) of the Code provides, in pertinent part, that the term "disqualified person" means with respect to a private foundation, a person who is -

- (A) a substantial contributor to the foundation;¹
- (B) a foundation manager (within the meaning of subsection (b)(1));²
- (C) an owner of more than 20 percent of -- (i) the total combined voting power of a corporation, (ii) the profits interest of a partnership, or (iii) the beneficial interest of a trust or unincorporated enterprise, which is a substantial contributor to the foundation;

- (D) a member of the family (including a spouse, children, and grandchildren) of any individual described in sub-paragraph (A), (B), or (C);
- (E) a corporation in which persons described in subparagraph (A), (B), (C), or (D) own more than 35 percent of the total combined voting power;
- (F) a partnership in which persons described in subparagraph (A), (B), (C), or (D) own more than 35 percent of the profits interest;
- (G) a trust or estate in which persons described in subparagraph (A), (B), (C), or (D) hold more than 35 percent of the beneficial interest.

¹ Section 507(d)(2)(A) of the Code defines “substantial contributor” as any person who contributed or bequeathed an aggregated amount of more than \$5,000 to a private foundation, if such amount is more than 2 percent of the total contributions and bequests received by the foundation before the close of the taxable year of the foundation in which the contribution or bequest is received by the foundation from such person. In the case of a trust, the term “substantial contributor” also means the creator of the trust. Section 507(d)(2)(B)(iv) provides that any person who is a substantial contributor on any date shall remain a substantial contributor for all subsequent periods.

² A “foundation manager” is an officer, director, or trustee of a foundation, as well as an employee having responsibility with respect to a specific act or failure to act. Section 4946(b).

Here, decedent’s estate, the trust, the company, decedent’s family, employee and the members of employee’s family are “disqualified persons” for purposes of section 4941. An unrelated third party is not a disqualified person. For self-dealing to take place, there must be a disqualified person engaging in a transaction with a private foundation. Therefore, any transaction between the foregoing parties and the foundation could be an act of self-dealing. The sale by the foundation of its partnership interest at fair market value to another one of the pre-death partners would be an act of self-dealing. Furthermore, if the managers of the foundation sell the foundation’s interest to a third party but receive some inappropriate benefit the sale would result in self-dealing by the managers. For example, Treas. Reg. section 53.4941(d)-2(f)(1) states that “the purchase or sale of stock or other securities by a private foundation shall be an act of self-dealing if such purchase or sale is made in attempt to manipulate the price of the stock or other securities to the advantage of a disqualified person.” On the other hand, the sale by the foundation of its interest to a third party would not give rise to an act of self-dealing unless the managers or other disqualified persons received some benefit from the sale. Similarly the sale of a disqualified person’s interest in the partnership to any one other than the foundation would not be an act of self-dealing. Thus, it is clear that sales can be hypothesized that do not constitute acts of self-dealing.

If all the partners including the foundation were to enter into an agreement to sell their interests as a unit to a third party, this agreement could result in an act of self-dealing. Depending upon the particular facts concerning such agreement the joint sale could be a prohibited use by the disqualified persons of the foundation’s assets, within the meaning of section 4941(d)(1)(E). Similarly if the foundation managers were to sell the foundation’s interest in conjunction with their own interests in order to get a personal

benefit, questions could be raised about whether the foundation's assets were being used by the managers. On the other hand, and with regard to section 4941(d)(2)(F) of the Code, in *Deluxe Corp v. United States*, 885 F. 2d 848 (Fed. Cir. 1989), the circuit court held that a redemption offer was a bona fide offer within the meaning of Treas. Reg. section 53.4941(d)-3(d)(1) despite the exclusion of officers and directors, who were shareholders, because to include them in the offer would create a potential conflict with the securities laws restrictions applying to them. Thus, assuming that a sale of the foundation's interest did not constitute a prohibited use of the foundation's assets by disqualified persons, it would not constitute an act of self-dealing.

Issue 2

Section 4941(d)(2)(F) of the Code provides that any transaction between a private foundation and a corporation which is a disqualified person pursuant to any liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, shall not be an act of self-dealing if all the securities of the same class held by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value.

Treas. Reg. section 53.4941(d)-3(d)(1) provides, in part, that securities are not 'subject to the same terms' unless, pursuant to such transaction, the corporation makes a bona fide offer on a uniform basis to the foundation and every other person who holds such securities. Treas. Reg. section 53.4941(e)-1 (f) provides that for purposes of sections 53.4941(a)-1 through 53.4941(f)-1, fair market value shall be determined pursuant to the provisions of section 53.4942(a)-2(c)(4).

Section 4941(d)(2)(F) of the Code contains an exception to the general prohibition against transactions between private foundations and disqualified persons to permit certain essential transactions. The prohibitions against self-dealing were enacted in 1969 to protect private foundations from improper acts by those who control the foundation, and to curtail possible abuse of the foundation's tax-exempt status. H.R. Rep. No. 413, 91st Cong., 1st Sess. 20-21, reprinted in 1969 U.S. Code Cong. Admin. News 1645, 1665; S.Rep. No. 552, 91st Cong., 1st Sess. 28-29, reprinted in 1969 U.S. Code Cong. & Admin. News 2027, 2055. Nevertheless, as the Treasury explained when it endorsed the bill, see Hearings Before the Committee on Ways and Means, 91 Cong., 1st Sess. On the Subject of Tax Reform, pt 14 at 5059 (1969), an exception to the self-dealing rules "would be made to permit essential donor-foundation transactions." *Id* at 5322.

In enacting section 4941(d)(2)(F), Congress expressly rejected an absolute prohibition against transactions between private foundations and disqualified persons, but replaced the standard of the prior law, which had permitted arm's-length transactions with disqualified persons with one that requires that the foundation must be dealt with on the same terms as other parties to the transaction. The purpose of this requirement is to assure that a foundation's status is not abused, whether the transaction is a "liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization or reorganization", so that a foundation does not receive less advantageous terms than any other shareholder when dealing with a disqualified person. See S. Rep. No 552, *supra* at 28-29, 31 reprinted at 2055-58.

Section 4941(d)(2)(F) of the Code and Treas. Reg. section 53.4941(d)-3(d)(1) speak in terms of a corporation. We believe that in some situations these provisions provide guidance in the disposition of a private foundation's interest in a partnership. See, e.g., PLR 9237032. Accordingly, if the procedure followed in dissolving or liquidating a partnership is in accord with Treas. Reg. section 53.4941(d)-3(d) then the dissolution or liquidation of the private foundation's interest would not be an act of self-dealing within the meaning of section 4941 of the Code. Cf. TAM 9205001, concluding on its facts that a stock redemption did not meet the criteria of section 4941(d)(2)(F).

Issue 3

Should a private foundation and a disqualified person engage in an act of self-dealing, a two-tier series of sanctions may be triggered. As to the first tier tax, a tax of 5% of the greater of the amount of money given or received or of the fair market value of the property given or received is automatically imposed on the disqualified person, regardless of the inadvertence of the transaction. Section 4941(a)(1). With regard to the sale of one of the current partners' partnership interest to the foundation the excise tax would be calculated on the higher of the fair market value of the partnership interest or the amount of money paid for it by the foundation. If the foundation's partnership interest were sold to the partnership or any one of the current partners the excise tax would be calculated on the higher of the fair market value of the partnership's interest or the amount of money paid for it. A liquidation or dissolution of the foundation's partnership interest would be equivalent to a sale to the partnership and the excise tax would be calculated in the same way unless the requirements of section 4941(d)(2)(F) were satisfied. If it were determined that the foundation managers or other disqualified persons improperly used the foundation's assets in arranging a sale of the entire partnership to a third party, the excise tax would be applied to the fair market value of that use. Treas. Reg. section 53.4941(e)-1(b)(2)(ii).

Not only is the 5% tax imposed for the taxable year of the transaction, but the 5% tax is applied again for each taxable year, or part of a year (within the taxable period as defined in section 4941(e)(1)), from the date on which the act of self-dealing occurs to the earlier of either the date of mailing of a deficiency notice regarding the tax imposed, the date on which the tax imposed by section 4941(a)(1) is assessed, or the date on which correction of the act of self-dealing is completed. To correct the transaction, the disqualified person must do one of two things, i.e. undo the transaction, to the extent possible, or, if rescission is not possible, then the disqualified person must place the foundation in at least the position in which it would have been had the disqualified person met the highest fiduciary standards of dealing in the original transaction. Section 4941(e)(3).

Under the first tier tax of sanctions, when the 5% tax is imposed on the disqualified person, a tax of 2 1/2% of the transaction amount may be imposed on the foundation manager. This may occur, however, only if the manager knowingly participates in the act of self-dealing. On the other hand, if the act of participation is not willful and arises from a reasonable cause, the sanction is inapplicable. Section 4941(a)(2). This tax on the manager has a limit of \$10,000 for each act of self-dealing. Section 4941(c)(2).

Should the disqualified person fail to correct the self-dealing transaction within the correction period, a second tier tax is triggered and an additional tax of 200% of the transaction amount is imposed on the disqualified person. Section 4941(b)(1). An

additional tax of 50% of the transaction amount is imposed on the foundation manager if the manager has refused to agree to part or all of the correction. Section 4941(b)(2). This tax on the manager has a limit of \$10,000 for any one act of self-dealing. Section 4941(c)(2). The transaction amount under the second tier tax is the highest fair market value of the property during the taxable period. Section 4941(e)(2)(B).

Issue 4

A ruling could be obtained on the above sales transactions or on whether a liquidation or dissolution meets the requirements of section 4941(d)(2)(F) of the Code. The time it would take to obtain such a ruling would depend on the workload at the time.

Another self-dealing exception is Reg. § 53.4941(d)-1(b)(3), "Transactions during the administration of an estate or revocable trust," which provides:

The term "indirect self-dealing" shall not include a transaction with respect to a private foundation's interest or expectancy in property (whether or not encumbered) held by an estate (or revocable trust, including a trust which has become irrevocable on a grantor's death), regardless of when title to the property vests under local law, if -

- (i) The administrator or executor of an estate or trustee of a revocable trust either -
 - (a) Possesses a power of sale with respect to the property,
 - (b) Has the power to reallocate the property to another beneficiary, or
 - (c) Is required to sell the property under the terms of any option subject to which the property was acquired by the estate (or revocable trust);
- (ii) Such transaction is approved by the probate court having jurisdiction over the estate (or by another court having jurisdiction over the estate (or trust) or over the private foundation);
- (iii) Such transaction occurs before the estate is considered terminated for Federal income tax purposes pursuant to paragraph (a) of § 1.641(b)-3 of this chapter (or in the case of a revocable trust, before it is considered subject to sec. 4947);⁴⁹⁸²
- (iv) The estate (or trust) receives an amount which equals or exceeds the fair market value of the foundation's interest or expectancy in such property at the time of the transaction, taking into account the terms of any option subject to which the property was acquired by the estate (or trust); and
- (v) With respect to transactions occurring after April 16, 1973, the transaction either -
 - (a) Results in the foundation receiving an interest or expectancy at least as liquid as the one it gave up,

⁴⁹⁸² [My footnote:] The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2578 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced after fn 2747 in part II.J.8.

(b) Results in the foundation receiving an asset related to the active carrying out of its exempt purposes, or

(c) Is required under the terms of any option which is binding on the estate (or trust).

Also important is the Code § 4941(d)(2)(B) prohibition against any direct or indirect lending of money or other extension of credit between a private foundation and a disqualified person, with the Code § 4941(d)(2)(B) exception that a disqualified person may loan to a foundation if the foundation uses the loan for its exempt purposes. Reg. § 53.4941(d)-2(c), "Loans," provides.⁴⁹⁸³

(1) *In general.* Except as provided in subparagraphs (2), (3), and (4) of this paragraph, the lending of money or other extension of credit between a private foundation and a disqualified person shall constitute an act of self-dealing. Thus, for example, an act of self-dealing occurs where a third party purchases property and assumes a mortgage, the mortgagee of which is a private foundation, and subsequently the third party transfers the property to a disqualified person who either assumes liability under the mortgage or takes the property subject to the mortgage. Similarly, except in the case of the receipt and holding of a note pursuant to a transaction described in § 53.4941(d)-1(b)(3), an act of self-dealing occurs where a note, the obligor of which is a disqualified person, is transferred by a third party to a private foundation which becomes the creditor under the note.

(2) *Loans without interest.* Subparagraph (1) of this paragraph shall not apply to the lending of money or other extension of credit by a disqualified person to a private foundation if the loan or other extension of credit is without interest or other charge.

(3) *Certain evidences of future gifts.* The making of a promise, pledge, or similar arrangement to a private foundation by a disqualified person, whether evidenced by an oral or written agreement, a promissory note, or other instrument of indebtedness, to the extent motivated by charitable intent and unsupported by consideration, is not an extension of credit (within the meaning of this paragraph) before the date of maturity.

Reg. § 53.4941(d)-2(c)(4) discusses the foundation's commercial banking relationships.

A bequest to a foundation of debt owed by a disqualified person constitutes self-dealing.⁴⁹⁸⁴ One may avoid the foundation making decisions by bequeathing nonvoting interests in an LLC to it, such as occurred in Letter Ruling 201907004, which involved a charitable lead trust treated as a private foundation for these purposes. The facts were:

Trustor transferred certain business interests to trusts established for the benefit of Trustor's descendants (Beneficiary Trusts) in exchange for promissory notes that pay interest only for a term of 30 years, with the total principal amount due at the end of the term. The sole beneficiary or all of the beneficiaries of each Beneficiary Trust are Trustor's descendants.

Trustor assigned the promissory notes to LLC, a State limited liability company. The members of LLC are Trustor, who holds all of the nonvoting interests in LLC, and LLC 2,

⁴⁹⁸³ A hold-harmless provision does not seem to cure the problem. See fn 4689 in part II.Q.6.a

⁴⁹⁸⁴ GCMs 37731 (10/26/1978) and 37037 (3/9/1977).

which holds all of the voting interests in LLC. The members of LLC 2 are Trustor's descendants and each holds interests as individuals.

LLC will hold and administer the promissory notes and receive payments of interest and principal on the promissory notes. Aside from the cash initially contributed by LLC 2 for the voting interests in LLC (which will fund LLC expenses), LLC's sole assets and source of income will be the promissory notes.

Power to manage the affairs of LLC is vested in the manager, who is selected and may be removed by a vote of the members holding at least a majority of the voting interests in LLC (currently LLC 2, which holds 100 percent of such voting interests). Daughter, who is also the trustee of Trust, is the initial manager of LLC. Daughter holds interests in LLC only in an individual capacity indirectly through her interests in LLC 2, not in her capacity as trustee of Trust.

The members holding nonvoting interests (currently Trustor, who holds 100 percent of such nonvoting interests) possess no management rights or rights to vote on who will be the manager of LLC. LLC may be dissolved only with written approval of all members, whether holding voting or nonvoting interests.

Letter Ruling 201907004 reasoned and held:⁴⁹⁸⁵

As a split-interest trust described in section 4947(a)(2), Trust is subject to the requirements of section 4941 as if it were a private foundation. Trustor is a disqualified person under section 4946(a)(1)(A) with respect to Trust as a "substantial contributor" because Trustor is the creator of Trust. Daughter is a disqualified person under section 4946(a)(1)(B) with respect to Trust as a "foundation manager."

Beneficiary Trusts are disqualified persons under section 4946(a)(1)(G) with respect to Trust because they are trusts in which Trustor's descendants, who are disqualified persons under section 4946(a)(1)(D) with respect to Trust, hold more than a 35-percent beneficial interest. Beneficiary Trusts are the obligors of promissory notes given to Trustor in exchange for certain business interests. An act of self-dealing would occur if Trustor transferred the promissory notes to Trust, which would become creditor under the notes. See Treas. Reg. § 53.4941(d)-2(c)(1).

Instead, Trustor assigned the promissory notes to LLC and proposes to transfer nonvoting interests in LLC to Trust. Trust will acquire the nonvoting interests in LLC by gift rather than through a self-dealing transaction. However, if Trust would be considered to "control" LLC within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5), then Trust would be considered to be the creditor, indirectly, under the note by reason of its ownership interest in LLC. See Treas. Reg. § 53.4941(d)-1(b)(8), Example (1).

As holder of the nonvoting interests, Trust will have no management rights or right to vote on the manager of LLC. LLC 2 will own all of the voting interests, giving LLC 2 the

⁴⁹⁸⁵ To similar effect, see Letter Rulings 201723006 (which also approved the LLC as not being a "business enterprise" subject to the excess business holdings prohibition), 201723005, 201446024 (approved post-mortem formation of LLC and approved the LLC as not being a "business enterprise" subject to the excess business holdings prohibition; ruling obtained by Turney Berry's law firm), 201407023, and 201407021 (which also approved the LLC as not being a "business enterprise" subject to the excess business holdings prohibition).

right to select and remove the manager LLC. As a holder of nonvoting interests, Trust will have a right to receive distributions only if LLC dissolves or chooses to make current distributions, but the timing and amount of such distributions will be uncertain and could not be compelled by Trust. Only LLC 2, as the holder of the voting interests, may elect or remove the manager of LLC, and such manager will have the sole power to manage the affairs of LLC and determine the timing and amount of distributions. Thus, Trust and Trust's trustees (acting only in such capacity) will not have sufficient votes or positions of authority to cause LLC to engage in a transaction.

Additionally, Trust will not have the power to compel dissolution of LLC since LLC may only be dissolved with written approval of all members, including LLC 2. The power associated with the nonvoting interests of LLC as a necessary party to vote on the liquidation of LLC is not considered equivalent to a "veto power" within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5) because the power cannot be exercised over an action relevant to any potential act of self-dealing. Consequently, Trust will not "control" LLC within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5).

Accordingly, Trust's receipt of nonvoting interests in LLC from Trustor will not constitute a loan or extension of credit between a "private foundation" and a "disqualified person" within the meaning of section 4941(d)(1)(B) and Treas. Reg. § 53.4941(d)-2(c) because Trust will not acquire an interest in the promissory note; instead, Trust will acquire nonvoting interests in LLC, with respect to which it will not have any management rights or control over distributions.

Thus, Trustor's proposed transfer of nonvoting interests in LLC to Trust will not constitute an act of self-dealing described in section 4941.

Note that nonvoting interests will be subject to valuation discounts, reducing the charitable deduction.⁴⁹⁸⁶

Letter Ruling 200635017 approved the following involving options and LLC holding notes:

B had three children: C, married to D, E, married to F, and G. C, E, D, and G are now deceased. D, F and G are each referred to as a "Taxpayer" and collectively as the "Taxpayers."

C, F and G entered into a business transaction with family members (including trusts or other entities controlled by, or created for the benefit of, family members). Pursuant to these transactions, C, F and G acquired a promissory note as consideration, each referred to as a "Note." Each Note provides for annual interest at the mid-term Applicable Federal Rate, with principal due at the end of the note term.

Each Taxpayer created a single member limited liability company of which the Taxpayer is the sole member. Each of these entities is referred to as a "Company" and collectively as the "Companies." Each Taxpayer contributed his or her Note to his or her Company, in exchange for which the Taxpayer received all of the voting units ("Voting Units") and nonvoting units ("Nonvoting Units") of his or her respective Company. Pursuant to C's and D's estate plans, D's estate currently owns the Voting and Nonvoting Units in C's Company. In addition, F (through her revocable trust) currently owns the Voting and

⁴⁹⁸⁶ See part II.O.3 Effect of Buy-Sell on Charitable Estate Tax Deduction.

Nonvoting Units in F's Company, and G's estate currently owns the Voting and Nonvoting Units in G's Company. Each taxpayer entered into a limited liability company agreement ("Company Agreement") to govern his or her respective Company.

Taxpayers state that each Company will be engaged solely in passive investment activities; will not engage in the operation of any business enterprise; and at least 95 percent of the gross income of each Company will be derived from passive investments that will include, for example, interest and dividends.

Each Taxpayer created a charitable trust to be funded at his or her death. Each of these trusts is referred to as a "CT" and collectively as the "CTs." Each CT has a 20-year term commencing at the Taxpayer's death, during which term the CT will annually pay a guaranteed annuity to one or more charitable organizations.

Each Taxpayer has also created a revocable trust, separate and distinct from the Taxpayer's CT. Taxpayers state that each Taxpayer has provided in his or her revocable trust that at the Taxpayer's death, the Nonvoting Units owned by the Taxpayer will be allocated to the CT created by that Taxpayer. As a Nonvoting Unit holder, the CT cannot be required by the Company or its members, under the Company Agreement, to make any capital contributions or take any other actions. Nor does the CT have a right to force any distributions from the Company. Rather, under the Company Agreement the CT only has a right to receive distributions (in proportion to its ownership interest) when the Company dissolves or otherwise chooses to make distributions. The Taxpayer's Voting Units will be bequeathed to or in trust for the benefit of the Taxpayer's descendants.

Pursuant to an agreement (the "Option Agreement"), each Taxpayer (and his or her revocable trust) granted his or her children and a business entity controlled by the Taxpayers and their families (collectively, the "Option Holders") an option (the "Option") to purchase one or more specific assets (including the Note and any of the Nonvoting Units) (collectively, the "Option Assets") from the then current owner of the Option Assets, including the Company or the Taxpayer's estate or revocable trust. The Option Assets will not include any of the Voting Units. The Option Agreement provides that the Option Holders may purchase some or all of the Option Assets for a purchase price equal to the fair market value of such Option Assets as determined for federal estate tax purposes in the Taxpayer's estate at any time within nine months of the Taxpayer's death (the "Option Term"). The Option Holders will be required to pay the purchase price for the Option Assets in cash, marketable securities, or a combination of both.

With respect to any Option Assets to be purchased from the Taxpayer's estate or revocable trust, before the expiration of the Option Term, Taxpayers state that their estates or revocable trusts will petition a court of competent jurisdiction for approval of both the Option Holders' exercise of their options, as well as the tendering and receipt of consideration pursuant to each Option Agreement. Taxpayers state that the exercise of the Options by the Option Holders, the sale and purchase of Option Assets, and the tendering and receipt of consideration related thereto, will occur before the end of the period reasonably required by the executors or trustees to perform the ordinary duties of administration necessary for the settlement of the Taxpayers' estates and before the Taxpayers' revocable trusts are treated as trusts under section 4947 of the Code. Taxpayers state that the purchase of the Option Assets owned by the Taxpayers'

estates or revocable trusts pursuant to each Option Agreement will be contingent upon receipt of approval from a court of competent jurisdiction.

Letter Ruling 200635017 concluded:

1. The exercise of the Option and the purchase of Option Assets from a Taxpayer's estate or revocable trust by the Option Holders, the tendering of consideration by the Option Holders to the Taxpayer's revocable trust or estate, the receipt of such consideration by the Taxpayer's revocable trust or estate, and a distribution of such consideration from the Taxpayer's revocable trust or estate to the CT, will satisfy the requirements for the exception to indirect self-dealing described in section 53.4941(d)-1(b)(3) of the regulations, and therefore will not constitute impermissible acts of self-dealing under section 4941 of the Code.
2. Neither (i) the exercise of an Option and related sale and purchase of the Option Assets between one or more disqualified persons as to a Taxpayer's CT and the Taxpayer's Company nor (ii) the retention by that Company of a Note following the Taxpayer's death, will constitute indirect acts of self-dealing pursuant to section 53.4941(d)-1 of the regulations, and will not violate section 4941 of the Code.

We are expressly not ruling as to whether any subsequent transactions between a CT and a Company would constitute an act of self-dealing under section 4941 of the Code.

3. A CT's ownership of Nonvoting Units will not constitute a violation of the prohibition against ownership of excess business holdings under section 4943 of the Code because the Company is not a "business enterprise" within the meaning of section 4943(d)(3).

Letter Ruling 9312024 applied Reg. § 53.4941(d)-1(b)(3) to approve a redemption and related note payments to M, a private foundation, ruling:⁴⁹⁸⁷

1. The sale by A's estate and the purchase by N and O or B of the shares pursuant to the terms of the Redemption Agreement for the consideration specified in the Redemption Agreement will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.
2. The acceptance by A's estate and the delivery by N and O or B of the note of N and O or B in payment for the shares of N and O owned by A's estate will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.
3. The distribution by A's estate to M of the note of N and O or of B will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.

⁴⁹⁸⁷ Consistent with this result (but not including all of the rulings) include Letter Rulings 200729043 (notes owed by disqualified persons to a corporation that liquidated into a revocable trust that distributed the notes to the foundation), 199924069, 9350038, 9108024, and 9042030 (the latter approving the foundation's "exercise of any rights granted it under the note and any deed of trust, security agreement or similar instrument that secures payment of the note").

4. After distribution of the note by A's estate to M, payments on the note by N and O or B will not be acts of self-dealing under section 4941 of the Code by N and O or B as payor or M as payee.
5. The determination whether, for purposes of section 4941 of the Code and the regulations promulgated thereunder, A's estate will receive an amount which equals or exceeds the fair market value of M's interest or expectancy in the shares, will be determined after taking into account the terms of the Redemption Agreement to which the shares acquired by A's estate will be subject.

Letter Ruling 9112012 approved the following arrangement:

You were established by A and B to carry on certain charitable endeavors. A and B are members of your seven member board of directors. In addition to other property interests, you have a remainder interest in certain nonresidential rental real estate. You have been recognized as exempt under section 501(c)(3) of the Code and are a private foundation within the meaning of section 509(a).

A and B also established two revocable inter-vivos trusts which are controlled and operated by their two sons. The sons have never made contributions to you, nor have they been members of, nor served as your trustees. The trusts in turn have established a partnership. The partnership has the option to purchase the real estate you have the remainder interest in. A and B have also given quit claim deeds to the partnership transferring their current life estate in the property to the partnership. Your remainder interest has not vested because A and B are still living. Furthermore, as stated above the two inter-vivos trusts are revocable.

The option agreement provides that the partnership has an exclusive option to purchase the property, or any part thereof, for a period of five years from the date of death of the survivor of A and B. The option price shall be equal to the fair market value of the property as determined by a mutually agreed appraiser. The purchase price shall be amortized over thirty years and the rate of interest shall be the prevailing prime interest rate at a named bank. It also states that no brokerage fee shall be due as a result of this transaction.

Letter Ruling 9112012 reasoned:

Example (4) in Section 53.4941(d)-1(b)(8) of the regulations describes a situation where a substantial contributor to a private foundation bequeaths one-half of his estate to his spouse and one-half to the private foundation. The estate includes a one-third interest in a partnership, the remaining two-thirds of the partnership are owned by a disqualified person to the private foundation. The one-third interest was subject to an option agreement when it was acquired by the estate. The sale of the one-third interest in the partnership to the disqualified person did not constitute an act of self-dealing because the transaction satisfied the requirements set forth in section 53.4941(d)-1(b)(3).

The sons of A and B are disqualified parties and the partnership is controlled by them. You are the holder of the remainder interest in the property that the partnership has the option to buy. Therefore, unless otherwise excluded, any transaction between you and the partnership is an indirect act of self-dealing. The option agreement may be exercised within 5 years from the death of the grantors. The agreement provides that

you will receive fair market value for your interest in the property. You have represented that a probate court with jurisdiction over this matter will approve the transaction and that the option agreement is legally binding upon the trust.

Accordingly, we have concluded that if the option is exercised under the conditions represented and if all of the requirements set forth in section 53.4941(d)-1(b)(3) of the regulations are satisfied, exercising the described option will not be an act of self-dealing.

Letter Ruling 201448023 applied Reg. § 53.4941(d)-1(b)(3) in its conclusion number 5 approving debt that otherwise would have constituted self-dealing, where “M” was a private foundation:

None of the following will constitute an act of direct or indirect self-dealing under § 4941:

- a. The distribution from a decedent’s Estate to a QTIP Trust, and the receipt by such Trust of a Note which was received by such Estate during the administration thereof in a transaction meeting all the requirements of § 53.4941(d)-1(b)(3), such Trust’s holding of such Note during the lifetime of the surviving spouse, or the receipt by such Trust of any payments under such Note; or
- b. The distribution from such QTIP Trust to M of any Note which was received by such Trust either from a decedent’s Estate during the administration thereof or during the administration of the QTIP Trust after the surviving spouse’s death in a transaction meeting all of the requirements of § 53.4941(d)-1(b)(3), and M’s receipt of the same, its holding of any such Note, or its receipt of any payments under any such Note.

As to the interest rate for the debt, Franklin and Goode, “The Intermediary CLAT Alternative to the Residuary Estate Family Foundation Gift,” 39 *ACTEC Law Journal* 355, 361, note 15 comments:

Some planners believe that a promissory note issued under the estate administration exception to the self-dealing rules could simply carry an interest rate at the applicable Federal rate (“AFR”), and that would make the fair market value of the promissory note equal its face amount. In support for this position, I.R.C. § 7872 cites the AFR as the floor for a market rate loan. Moreover, in several existing PLRs, the IRS has blessed purchase transactions under the estate administration exception where the purchase price was provided through a promissory note bearing interest at the AFR. PLR 201206019 (Nov. 15, 2011); PLR 201129049 (Apr. 26, 2011); PLR 200124029 (Mar. 22, 2001). Attention should be paid, however, to the fact that in each PLR the taxpayer made a blanket representation that the promissory note in question had a fair market value equal to that of the property purchased without providing any further explanation. Additionally, the IRS made specific reference to such representation in reaching its conclusion despite having already established the note’s rate of interest. Third-party loans, however, often carry much higher rates of interest. Given the near historically low AFRs, the government may view an AFR loan for purposes of the estate administration exception as being abusive. Pursuant to Treas. Reg. § 53.4941(d)-1(b)(3)(iv), the estate or trust must receive from the disqualified person property that “equals or exceeds the fair market value of the foundation’s interest or expectancy” Therefore, consider whether the value of an AFR note is equal to its face value for purposes of the estate administration exception. Treas. Reg. §53.4941(e)-1(f) provides

that “fair market value” under the estate administration exception should be determined pursuant to Treas. Reg. § 53.4942(a)-2(c)(4). This provision in turn makes reference to the principles stated in I.R.C. § 2031. Clearly, on the seller’s side, the principles of § 2031 control how the property sold by the estate or trust would need to be valued. On the purchaser’s side, it would seem odd if the promissory note being exchanged by the purchaser could be valued pursuant to different rules, such as § 7872, which might allow an AFR note to have a value equal to its face value. I.R.C. § 2031 provides for an all-inclusive view of a promissory note’s value (*i.e.*, the note’s value is not merely a factor of its principal amount and interest rate but also its terms of payment and enforceability, etc.). Treas. Reg. § 20.2031-4. The basic idea of the self-dealing rules is to prohibit a disqualified person from gaining an advantage at the foundation’s expense. To construe the estate administration exception as allowing a disqualified person to garner a bargain rate of interest using the current low AFRs would seemingly violate the spirit of the self-dealing rules. For purposes of this paper, the assumption is that any promissory note issued under the estate administration exception must carry a market rate of interest, as well as other reasonable terms relating to enforceability, to enable the promissory note’s value (*i.e.*, by appraisal) to equal its face value.

See [Private Foundations: Amount Involved - Self-Dealing Lending of Money to Disqualified Persons IRC Section 4941\(e\)\(2\) | Internal Revenue Service \(irs.gov\)](#).

II.Q.7.c.iii. Cleansing Earnings and Profits from a Prior C Corporation

As discussed above, dividend treatment applies to the extent that a distribution exceeds AAA and is made out of C corporation earnings and profits. This treatment would not apply on liquidation of the corporation.⁴⁹⁸⁸ What happens when a trust that owns an interest in an S corporation has a charity as its beneficiary?

The charitable income tax deduction should offset dividend income received by the trusts from the corporation.⁴⁹⁸⁹ Making an ESBT election should not affect the charitable income tax deduction, because the dividend is not considered part of the S portion.⁴⁹⁹⁰ If the trust’s basis in the S corporation stock was determined by reason of purchase, the dividend income reduces the basis of the S stock in determining the gain or loss on the sale that constitutes unrelated business taxable income.⁴⁹⁹¹

⁴⁹⁸⁸ See Letter Ruling 200402003 regarding an S corporation that merges into a nonprofit corporation.

⁴⁹⁸⁹ Code § 642(c). Code § 512(e)(1) characterizes S corporation items as unrelated business income; however, those items are just items on the K-1 issued by the S corporation, together with any gain or loss on the disposition of the stock in the S corporation. Congress appeared to recognize that distributions of C corporation earnings and profits would escape this tax when it provided for basis reductions with respect to some of that dividend income, as described in the text accompanying fn. 4991; this basis reduction provision was enacted at the same time as the tax K-1 items and gain on the sale of stock. See Conference Report 104-737, reproduced in *RIA Checkpoint* at COMREP ¶13,611.001 S corporations permitted to have 75 shareholders. (Small Business Job Protection Act of 1996, PL 104-188, 8/20/96), P.L. 104-188, Sec. 1316(c), and P.L. 105-34, Sec. 1523(a).

⁴⁹⁹⁰ Reg. §§ 1.641(c)-1(g)(2), 1.641(c)-1(l), Example (1)(iii).

⁴⁹⁹¹ Code § 512(e)(2). This rule would not apply if the trust acquired its stock by reason of death, since that provision (by way of Code § 1361(e)(1)(C)) refers to Code § 1012, not Code § 1014.

If distributions exceed AAA and earnings & profits, that excess would be treated as a return of capital,⁴⁹⁹² reducing basis.⁴⁹⁹³ Any amount that exceeds basis would be treated as a gain from the sale of stock,⁴⁹⁹⁴ which would be treated as part of the S portion and, if an ESBT election is in effect, would not be offset by the charitable income tax deduction.

If an amount is intended to be accumulated in the trust, then using AAA is the easiest way.

If an amount is intended to be distributed to charity and it's possible that future distributions will need to be accumulated, then a Code § 1368(e)(3) election should be made to treat the distribution as a dividend from earnings and profits so that AAA is used only for future accumulated distributions.

II.Q.7.c.iv. Using a Charitable Remainder Trust to Avoid Built-in Gain Tax

If an S corporation contributes built-in gain property to a term-of-years (typically 20 years) charitable remainder trust ("CRT") for the benefit of the corporation⁴⁹⁹⁵ and that property is sold for a capital gain, then the sale will not trigger immediate tax. Instead, the CRT's distributions will come first from ordinary income and not from any built-in gain, and during the recognition period distributions will be subject to built-in gain tax only to the extent that capital gain constituting built-in gain is distributed to the S corporation.⁴⁹⁹⁶ The contributed assets must not constitute substantially all of the corporation's assets, since a corporation recognizes gain if it conveys substantially all of its assets to a tax-exempt entity.⁴⁹⁹⁷ See also part II.D.2 Business Entity as Grantor of Tru.

Also, if and to the extent that sale (or holding) of the asset constitutes unrelated business taxable income (UBTI), this strategy will not work. Any UBTI a CRT earns is subject to a 100% excise tax, in addition to being taxable when distributed to the beneficiary, resulting in an ultimate tax well in excess of 100%.⁴⁹⁹⁸ For example, a so-called "negative basis asset"⁴⁹⁹⁹

⁴⁹⁹² Code § 1368(c)(3).

⁴⁹⁹³ Code § 1368(b)(1).

⁴⁹⁹⁴ Code § 1368(b)(2).

⁴⁹⁹⁵ The term interest must benefit the corporation; if it benefits the shareholders, then the gratuitous transfer will be treated as a constructive distribution to such partners or shareholders for tax purposes and the partners or the shareholders will be treated as the grantors of the trust. Letter Ruling 200203034, citing Reg. § 1.671-2(e)(4), and also holding that the trust would not qualify as a charitable remainder trust.

⁴⁹⁹⁶ Letter Ruling 200644013 focused on whether a contribution of property that had built-in gain accumulated from prior C corporation years would trigger Code § 1374 built-in gain tax. In that ruling, the corporation contributed real estate to a 20-year CRT. Later, but before the end of the Code § 1374 recognition period, the CRT would sell the property and use the sale proceeds to invest in stocks, bonds, and other securities that pay interest and dividends. The IRS declined to rule on whether the corporation would have recognized built-in gain under Code § 1374 on unitrust amounts received by it after the recognition period. The donor corporation was required to represent that the donation did not constitute "substantially all" of the donor's assets; see fn 4997.

⁴⁹⁹⁷ Reg. § 1.337(d)-4(a)(1). Note the last sentence in fn 4996.

⁴⁹⁹⁸ See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, especially fns. 4687-4688.

⁴⁹⁹⁹ See fn. 6638 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

generally has significant debt-financed income, and debt-financed income/gain and ordinary business income are UBTI.⁵⁰⁰⁰

II.Q.7.d. Special Rules for Certain Sales of Stock in an S corporation

The sale of stock in an S corporation can be treated as a sale of the corporation's assets, followed by the corporation's liquidation. See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.7.e. Bequest to a Corporation

A bequest to a corporation is treated as a bequest to the remaining shareholders, followed by a contribution of capital to the corporation.⁵⁰⁰¹ Thus, the remaining shareholders receive an increased basis in their stock in the corporation.

If the bequest is of stock in the corporation, a bequest to the remaining shareholders directly would be cleaner from an income tax perspective, in that the remaining shareholders may specifically identify lots of stock when they sell or otherwise transfer their stock. However, a bequest to the corporation might be simpler, in that ownership might vary over time, and a "transfer on death" designation to the corporation will accomplish the objective in a simple manner.

Naming a corporation as the beneficiary of a life insurance policy might generate some challenging disclosures on the estate tax return.⁵⁰⁰²

⁵⁰⁰⁰ Code §§ 512, 513, and 514. Consider whether Code § 514(c)(2)(B) might address that concern.

⁵⁰⁰¹ Rev. Rul. 74-329.

⁵⁰⁰² Reg. § 20.2031-2(f) provides:

In addition to the relevant factors described above, consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent such nonoperating assets have not been taken into account in the determination of net worth, prospective earning power and dividend-earning capacity.

If the decedent gratuitously named the corporation as the beneficiary of a life insurance policy, arguably the death benefits' inclusion under Code § 2042 should be the only inclusion under the principle that it is really a bequest to the other shareholder and not to the corporation. Consideration of the death benefit should not equate to required inclusion in value in a situation such as that. However, the result is not nearly as clean as when the corporation itself owns the policy, which Reg. § 20.2042-1(c)(6) provides generally does not result in incidents of ownership even if the decedent controls the corporation.

Reg. § 20.2042-1(c)(6), which is reproduced in part II.Q.4.i.ii.(b) Corporate Ownership of Policy. So a business owner who wants the business entity to hold insurance on the owner's life should consider instead having the entity own the policy. Consider Code § 2035 if transferring an existing policy. A tax-efficient way to move the policy might involve part II.Q.4.i Life Insurance LLC. When an entity owns a life insurance policy, consider part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

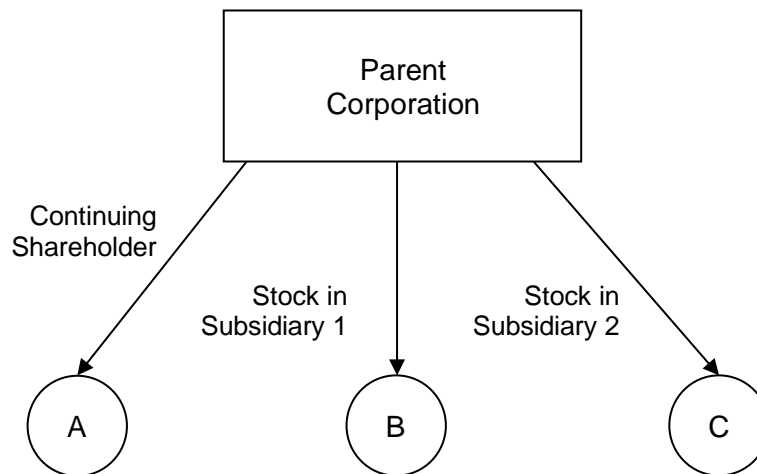

II.Q.7.f. Corporate Division into More Than One Corporation

II.Q.7.f.i. Overview

Step 1

Step 2

If a corporation owns another corporation, the parent corporation has no earnings and profits, and the subsidiary's value equals the parent's basis in its stock, then distributing the subsidiary might not have much tax effect. However, that is often not the case, and one wants to look for a way to do a tax-free corporate division, as described below.

In a spin-off, split up, etc., a corporation transfers one or more active businesses into one or more subsidiaries:

- "Active business" includes active real estate rental.
- It also includes an interest in an LLC that conducts an active business – 20% if the corporation performs management functions and 33-1/3% if not.

The active business needs to be at least 5 years old.

The transaction needs a business purpose that could not be accomplished in another nontaxable transaction.

- Estate planning is not a valid reason to split up a business.

- Differences in management objectives generally constitute a valid reason.
- Personal dislike is not enough; resolving disputes over business strategy generally is.

Rev. Proc. 2024-24, Section 2.01, “Section 355 Transactions,” explains:

- (1) *In general.* A transaction intended to qualify under § 355 and related provisions of the Code may occur either as a separate Section 355(c) Distribution or as part of a Divisive Reorganization. Distributing may distribute all of its Controlled stock and securities (if any) or may retain some Controlled stock or securities after the Control Distribution Date. Section 355 Transactions may occur without recognition of gain or loss to Distributing, and without gain, loss, or income to Distributing’s shareholders, if the requirements of § 355 and other relevant provisions of the Code and Treasury Regulations are satisfied.
- (2) *Section 355(c) Distributions.* A Section 355(c) Distribution is not in pursuance of a plan of reorganization. Therefore, unlike a Divisive Reorganization, a Section 355(c) Distribution does not permit Distributing to satisfy Distributing Debt by distributing Section 361 Consideration to its creditors without recognition of gain or loss.
- (3) *Divisive Reorganizations.* In a Divisive Reorganization, Distributing transfers assets to Controlled in exchange for Section 361 Consideration. Controlled also may Assume Distributing Liabilities, generally without Distributing recognizing gain or loss (subject to possible application of § 357(b) (the principal purpose for the Liability Assumption is to avoid Federal income tax or there is no bona fide business purpose) and § 357(c) (Assumption of an amount of Liabilities greater than the total adjusted basis of assets transferred)). To complete the Divisive Reorganization, Distributing distributes Controlled stock (or Controlled stock and securities) to its shareholders. Distributing also may distribute other Section 361 Consideration to its shareholders, or to Distributing’s creditors in satisfaction of Distributing Debt held by those creditors, without recognition of gain or loss (subject to requirements and limitations in § 361(b) (possible gain but no loss recognition on asset transfer) and § 361(c) (possible gain but no loss recognition on distribution of Section 361 Consideration other than Controlled stock or other Qualified Property)).
 - (a) *Section 361(b)(1)(A).* Under § 361(b)(1)(A), if Distributing receives money or Other Property from Controlled in exchange for Distributing assets in a Divisive Reorganization, Distributing does not recognize gain on the exchange if Distributing distributes the money or Other Property in pursuance of the plan of reorganization. For example, § 361(b)(1)(A) provides that, if Distributing receives money or Other Property from Controlled (for example, a Controlled note), Distributing would need to transfer that Controlled note to its shareholders or creditors, rather than cash or property other than the Controlled note, to qualify for nonrecognition treatment under § 361(b)(1)(A). Consistent with the legislative history of § 361(b), Distributing does not qualify for nonrecognition treatment on the receipt of money or Other Property under the statutory language of § 361(b)(1)(A) unless Distributing “acts merely as a conduit in passing the proceeds” (that is, the money or Other Property) to its shareholders. S. Rep. No. 398, 68th Cong., 1st Sess. 16 (Apr. 10, 1924). The statutory requirements mandated by § 361(b) help ensure that Distributing is not permitted to convert money or Other Property for any period of time into a discretionary fund that is

invested in Distributing's business, thereby achieving the economic result of a sale of Controlled (in whole or in part) without recognition of gain or loss.

(b) *Enactment of § 361(b)(3) and (c)(3)*. Congress enacted § 361(b)(3) and (c)(3) to overrule the U.S. Supreme Court's holding in *Minnesota Tea Co. v. Helvering*, 302 U.S. 609 (1938), and therefore permit Distributing to qualify for nonrecognition treatment on the transfer of assets to Controlled even if Distributing transfers the money, Other Property, or Controlled securities received in the transaction from Controlled to Distributing's creditors in connection with the Divisive Reorganization. See S. Rep. No. 445 (Aug. 3, 1988), at 393 ("The bill amends prior law by providing that transfers of property to creditors in satisfaction of *the corporation's indebtedness* in connection with the reorganization are treated as distributions pursuant to the plan of reorganization for this purpose.... This overrules the holding in *Minnesota Tea*.... The bill also provides that the transfer of qualified property *by a corporation to its creditors in satisfaction of indebtedness* is treated as a distribution pursuant to the plan of reorganization." (emphasis added)). Based on this legislative history, this revenue procedure reflects the views of the Department of the Treasury (Treasury Department) and the IRS, that the phrases "pursuant to the plan of reorganization" and "in connection with the reorganization" are coextensive in scope.

(i) *Obligations pursuant to contingent payment debt instruments are indebtedness for Federal income tax purposes*. Distributing's obligations pursuant to "contingent payment debt instruments" (subject to § 1.1275-4) are Distributing Debts and not Distributing Contingent Liabilities, because they constitute Debt under general principles of Federal income tax law.

(ii) *Contingent Liabilities are not indebtedness for Federal income tax purposes*. Distributing's Liabilities of the type described in Rev. Rul. 95-74, 1995-2 C.B. 36 (held, transferor's environmental liabilities assumed in a § 351 transfer of business assets were not "liabilities" for § 357(c) purposes and, therefore, were deductible by transferee as incurred) and in *Pacific Transport Co. v. Commissioner*, 483 F.2d 209 (9th Cir. 1973) (claim for cargo lost at sea pending against seller of shipping business; buyer's payment to settle claim held capitalized; the fact that "liability was contingent and unliquidated...is of no significance") are Distributing Contingent Liabilities and not Distributing Debt, because they are not Debt under general principles of Federal income tax law.

(4) *Retention of Controlled stock or securities.*

(a) *Qualification for nonrecognition treatment*. If Distributing distributes an amount of stock in Controlled constituting control within the meaning of § 368(c), but retains Controlled stock or securities, under § 355(a)(1)(D)(ii), the distribution does not qualify for nonrecognition treatment under § 355 unless Distributing establishes to the satisfaction of the Secretary of the Treasury (through the IRS by delegation) that the retention by Distributing was not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax, which effectively creates a rebuttable presumption that any retention evidences a plan to achieve a Federal income tax avoidance purpose. Accordingly, if a

principal purpose of a retention was to avoid Federal income tax, the retention could violate the requirements of § 355(a)(1)(D)(ii) even if the taxpayer established that a business purpose existed for the retention.

- (b) *Business purpose ordinarily requires distribution of all Controlled stock and securities.* Section 1.355-2(e)(2) provides that “[o]rdinarily, the corporate business purpose or purposes for the distribution will require the distribution of all of the stock and securities of the controlled corporation.”
- (c) *Factors for determining whether Retention is not a tax-avoidance purpose.*
 - (i) *Primary indicia.* Long-standing revenue rulings indicate that the IRS will not view a Retention to be in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax if the following requirements are satisfied: (1) a genuine separation of the corporate entities will be effected; (2) the Retention will not enable Distributing to maintain practical control of Controlled; and (3) a sufficient business purpose for the Retention is established. See generally Rev. Rul. 75-321, 1975-2 C.B. 123 (retention of five percent of Controlled’s stock to ensure Distributing has sufficient collateral to obtain short-term financing for its business was not in pursuance to a plan having as one of its principal purposes the avoidance of Federal income tax; no overlapping directors, officers, or key employees, and no continuing arrangements between Distributing and Controlled) (emphasis added); Rev. Rul. 75-469, 1975-2 C.B. 126 (retention of Controlled security to be held by bank as collateral for a loan to Distributing on behalf of Controlled was not in pursuance to a plan having as one of its principal purposes the avoidance of Federal income tax; no retained Controlled stock, no overlapping directors, officers, or key employees, and no continuing arrangements between Distributing and Controlled).
 - (ii) *Continuing relationships.* Based on the factors described in section 2.01(4)(c)(i) of this revenue procedure, the degree of continuing relationships between Distributing and Controlled will significantly inform a determination of whether a Retention would be in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax. See generally Rev. Rul. 75-321; Rev. Rul. 75-469.
- (d) *Plan of reorganization.* Treasury Regulations provide guidance regarding the meaning and scope of the term “plan of reorganization.” First, § 1.368-2(g) provides the following:

The term plan of reorganization has reference to a consummated transaction specifically defined as a reorganization under section 368(a). The term is not to be construed as broadening the definition of reorganization as set forth in section 368(a), but is to be taken as limiting the nonrecognition of gain or loss to such exchanges or distributions as are directly a part of the transaction specifically described as a reorganization in section 368(a). Moreover, the transaction, or series of transactions, embraced in a plan of reorganization must not only come within the specific language of section 368(a), but the readjustments involved in the exchanges or distributions effected in the consummation thereof must be undertaken for reasons germane to the

continuance of the business of a corporation a party to the reorganization. Section 368(a) contemplates genuine corporate reorganizations which are designed to effect a readjustment of continuing interests under modified corporate forms.

Second, § 1.368-1(c) provides the following additional guidance:

A plan of reorganization must contemplate the bona fide execution of one of the transactions specifically described as a reorganization in section 368(a) and for the bona fide consummation of each of the requisite acts under which nonrecognition of gain is claimed. Such transaction and such acts must be an ordinary and necessary incident of the conduct of the enterprise and must provide for a continuation of the enterprise. A scheme, which involves an abrupt departure from normal reorganization procedure in connection with a transaction on which the imposition of tax is imminent, such as a mere device that puts on the form of a corporate reorganization as a disguise for concealing its real character, and the object and accomplishment of which is the consummation of a preconceived plan having no business or corporate purpose, is not a plan of reorganization. (Emphasis added.)

The Treasury Department and the IRS are of the view that, for purposes of this revenue procedure and the private letter ruling program, this guidance determines compliance with the plan of reorganization requirement. For purposes of this revenue procedure and the private letter ruling program, the Treasury Department and the IRS are of the view that the case law addressing the satisfaction of the plan of reorganization requirement, taken together, fails to provide sufficient consistency or clarity necessary for the administration and enforcement of the requirements that govern Divisive Reorganizations and related transactions.

Rev. Proc. 2024-24, Section 2.02, "Prior Revenue Procedures," explains:

- (1) *Distributing Debt issued in close temporal proximity to the Divisive Reorganization.*
 - (a) *No-rule position of Rev. Proc. 2013-3.* In 2013, the Treasury Department and the IRS stated that private letter rulings no longer would be issued on whether § 355 or § 361 applies to Distributing's distribution of Controlled stock or securities in exchange for, and in retirement of, putative Distributing Debt, if such Debt was issued in anticipation of the distribution. See section 5.01(10) of Rev. Proc. 2013-3, 2013-1 I.R.B. 113. In particular, the Treasury Department and the IRS published the no-rule position due to the significant potential that Distributing Debt issued in close temporal proximity to the Divisive Reorganization could fail to qualify for nonrecognition treatment under § 361 (for example, because of a failure of the substance of the transaction to comply with the statutory requirements of § 361).
 - (b) *Modification of no-rule position.* Rev. Proc. 2017-38, 2017-22 I.R.B. 1258, modified Rev. Proc. 2017-3, 2017-1 I.R.B. 130, the successor to Rev. Proc. 2013-3, to remove this no-rule position because it was determined that issuing rulings in this area would be in the interest of sound tax administration, while noting that the IRS continued to study matters concerning issues in this

area. See section 3 of Rev. Proc. 2017-38. The Treasury Department and the IRS continue to be of the view that entertaining ruling requests on such transactions will facilitate the IRS's ability to administer all relevant provisions of the Code with regard to Section 355 Transactions. Consistent with section 3 of Rev. Proc. 2017-38, the Treasury Department and the IRS are continuing to study the application of the Code, as well as general principles of Federal income tax law (including substance over form, agency, or other relevant theories), to the issuance of Debt in close temporal proximity with a Divisive Reorganization. The Treasury Department and the IRS are of the view that Distributing Debt issued in close temporal proximity of the Divisive Reorganization raises the concerns that resulted in the publication of the 2013 no-rule position. See section 3.05(5)(d)(iii) of this revenue procedure.

(2) *Significant issue rulings.*

- (a) *Rev. Proc. 2013-32.* Rev. Proc. 2013-32, 2013-28 I.R.B. 55, provided that private letter rulings no longer would be issued on the Federal income tax consequences of various corporate transactions, including transactions intended to qualify as Section 355 Transactions, but instead would be issued only on significant issues presented in those transactions. The IRS's current ruling policies in this area are described in Rev. Proc. 2024-1, 2024-1 I.R.B. 1, and Rev. Proc. 2024-3, 2024-1 I.R.B. 143.
- (b) *Rev. Proc. 2024-1 and Rev. Proc. 2024-3.* Rev. Proc. 2024-1, 2024-1 I.R.B. 1, and Rev. Proc. 2024-3, 2024-1 I.R.B. 143, removed the no-rule position on the Federal income tax consequences of various corporate transactions and eliminated the issuance of rulings on significant issues, including with respect to Section 355 Transactions. See section 16 of Rev. Proc. 2024-1; section 1.02 of Rev. Proc. 2024-3. The Treasury Department and the IRS determined that a broader-scoped private letter ruling program would increase taxpayer certainty regarding the Federal income tax consequences of corporate transactions, enhance the visibility of the Treasury Department and the IRS with regard to current market practices, and ultimately result in a better-informed guidance process. In addition, the IRS determined that providing such rulings would be in the interest of sound tax administration.

(3) *Procedures for requesting private letter rulings regarding Section 355 Transactions.*

- (a) *Rev. Proc. 2017-52.* Rev. Proc. 2017-52 provides procedures for requesting private letter rulings regarding Section 355 Transactions and superseded Rev. Proc. 96-30, 1996-1 C.B. 696. Rev. Proc. 2017-52 established a pilot program to issue private letter rulings that address the general Federal income tax consequences of a Section 355 Transaction. Rev. Proc. 2017-52 also provides procedures for requesting rulings that address the general Federal income tax consequences of a Section 355 Transaction and clarifies procedures for requesting rulings on significant issues presented in those transactions. This revenue procedure modifies Rev. Proc. 2017-52. See generally section 4.01(1) of this revenue procedure.
- (b) *Rev. Proc. 2018-53.* Rev. Proc. 2018-53, 2018-43 I.R.B. 667, described the procedures for requesting rulings on issues relating to the assumption or

satisfaction of Distributing Debt (as defined therein) in Divisive Reorganizations and the representations, information, and analysis to be submitted in those requests. Section 2 of Rev. Proc. 2018-53 reiterated that the Treasury Department and the IRS continue to study issues relating to the assumption and satisfaction of Distributing's obligations in Divisive Reorganizations. This revenue procedure supersedes Rev. Proc. 2018-53.

Rev. Proc. 2024-24 provides various rules for private letter rulings. Notice 2024-38 requests input on Rev. Proc. 2024-24 and provides in Section 2.02, "Views and Concerns Relating to Certain Matters Addressed by Rev. Proc. 2024-24," "the Treasury Department's and IRS's views and concerns relating to certain matters addressed by Rev. Proc. 2024-24":

- (1) *Distinction between Delayed Distributions of Controlled stock and securities and Retentions.* The Code provides separate and distinct treatment for three types of instances in which Distributing temporarily continues to hold Controlled stock or securities following the Control Distribution Date. These three instances occur with regard to: (a) a Delayed Distribution of Controlled stock or securities that is "part of the distribution" (within the meaning of § 355(a)(1)(D)); (b) a Delayed Distribution of Controlled stock or securities that is "in pursuance of the plan of reorganization" (within the meaning of § 361); and (c) a Retention. The Treasury Department and the IRS have provided required representations, information, and analysis in Rev. Proc. 2024-24 to reflect the discrete application of the Code to each of these instances.
- (2) *Degree of connection between Distributing and Controlled that prevents genuine separations.* The Treasury Department and the IRS are considering the degree to which connections between Distributing and Controlled (and, as appropriate, the DSAG and CSAG) after the Control Distribution Date would prevent a transaction from qualifying under § 355. In particular, the Treasury Department and the IRS are considering the impact of (i) overlapping key employees between the DSAG and CSAG (determined immediately after the Control Distribution Date), (ii) overlapping directors or officers between Distributing and Controlled (determined immediately after the Control Distribution Date), and (iii) the existence of continuing contractual agreements between the DSAG and CSAG that include provisions that are not arm's-length. Section 1.355-2(e)(2) provides that, "[o]rdinarily, the corporate business purpose or purposes for the distribution will require the distribution of all of the stock and securities of the controlled corporation." If Distributing distributes an amount of stock in Controlled constituting control (within the meaning of § 368(c)) but retains Controlled stock or securities, the Distribution does not qualify for nonrecognition treatment under § 355(a)(1)(D)(ii) unless Distributing establishes to the satisfaction of the Secretary of the Treasury (through the IRS by delegation) that the Retention was not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax. Therefore, the statute effectively creates a rebuttable presumption that any Retention evidences a plan to achieve a Federal income tax avoidance purpose. In addition, it is the view of the Treasury Department and the IRS that overlapping directors or officers between Distributing and Controlled, overlapping key employees between the DSAG and CSAG, and the existence of continuing contractual agreements between the DSAG and CSAG that include provisions that are not arm's-length, weigh against a determination of § 355 qualification—particularly, for example, if the purported business purpose for the Section 355 Transaction is to achieve a fit-and-focus business purpose. Solely for

reference to examples of fit-and-focus business purposes, see generally Rev. Rul. 2003-75, 2003-2 C.B. 79; Rev. Rul. 2003-74, 2003-2 C.B. 77.

- (3) *Solvency and continued viability of Distributing and Controlled.* The Treasury Department and the IRS are of the view that § 355 qualification is limited to Divisive Reorganizations after which Distributing and Controlled are capable of carrying on sustained businesses after the reorganization, and that § 355 and related Code provisions were not enacted to provide nonrecognition treatment for Divisive Reorganizations that burden Controlled with excessive leverage, jeopardizing its ability to continue as a viable going concern. See, for example, S. Rep. No. 82-781, at 58 (1951) (providing, in relevant part, that the predecessor statute to § 355 was drafted “so as to limit its benefits to reorganizations in which all of the new corporations as well as the parent are intended to carry on a business after the reorganization”, and emphasizing that “all of the new corporations as well as the parent [must] carry on a business”).
- (4) *Plan of Reorganization requirement for Divisive Reorganizations.* The required representations, information, and analysis in Rev. Proc. 2024-24 are intended to ensure that Plans of Reorganization for purported Divisive Reorganizations provide adequate specificity and clarity to satisfy the requirements set forth in current Treasury Regulations. The Treasury Department and the IRS understand that confusion and disagreement exists regarding the application of the Plan of Reorganization requirement to Divisive Reorganizations. For instance, it is the understanding of the Treasury Department and the IRS that some tax advisors incorrectly view the applicability of the Plan of Reorganization requirement to be potentially obviated by the temporal requirements that were set forth in section 3.04(6) of Rev. Proc. 2018-53. The Treasury Department and the IRS view the Plan of Reorganization requirement as incorporating a degree of transactional flexibility, a view consistent with feedback received from tax advisors. However, the Treasury Department and the IRS also are of the view that such flexibility is limited by the current Treasury Regulations. See §§ 1.368-1(c); 1.368-2(g). In particular, the Treasury Department and the IRS view the Plan of Reorganization requirement as helpful to ensure that Delayed Distributions are not used to avoid the application of the repeal of *General Utilities & Operating Co. v. Helvering*, 296 U.S. 200 (1935).
- (5) *Application of substance over form, agency, and other relevant theories to intermediated exchanges and direct issuance transactions.* The Treasury Department and the IRS are considering the application of the Code, as well as general principles of Federal income tax law (including substance over form, agency, or other relevant theories), to intermediated exchanges and direct issuance transactions (as those terms are described in Rev. Proc. 2024-24). With regard to a so-called direct issuance transaction in which Distributing Debt is issued to an Intermediary and redeemed in close temporal proximity, it is the view of the Treasury Department and the IRS that general principles of Federal income tax law could recast the transaction such that the Intermediary (that is, the direct holder) is not treated as a creditor described in § 361(b)(3) or (c)(3). Similarly, general principles of Federal income tax law potentially could recast an intermediated exchange, or treat the Intermediary engaged in that exchange as an agent of Distributing, such that Distributing likewise would not be treated as exchanging Section 361 Consideration for Distributing Debt. The Treasury Department and the IRS would welcome feedback from Intermediaries to help ensure that future guidance is responsive to the

business and market-risk considerations that inform the mechanics of intermediated exchanges and direct issuance transactions, as opposed to mere differences in transaction costs (with the understanding that differences in transaction costs are one consequence of such business and market risk considerations).

- (6) *Federal income tax treatment and consequences of Post-Distribution Payments.* The Treasury Department and the IRS are considering the application of the Code to Post-Distribution Payments. It is the view of the Treasury Department and the IRS that a Post-Distribution Payment is treated for Federal income tax purposes as Section 361 Consideration only if the taxpayer establishes that (i) the character of the Post-Distribution Payment is Section 361 Consideration, (ii) as of the First Distribution Date, the fair market value of Distributing's right to receive the Post-Distribution Payment was not (or will not be) reasonably ascertainable (within the meaning of that phrase as used in *Burnet v. Logan*, 283 U.S. 404, 413 (1931)), and (iii) the Post-Distribution Payment will be properly accounted for when the Post-Distribution Payment is received. For the avoidance of doubt, the Treasury Department and the IRS view *Arrowsmith v. Commissioner*, 344 U.S. 6 (1952), as applying solely to the requirement described in clause (i) of the preceding sentence (that is, the characterization of the Post-Distribution Payment for Federal income tax purposes). See generally sections 3.05(10)(b) and (c) of Rev. Proc. 2024-24.
- (7) *Effect of transaction related to Divisive Reorganization on Controlled securities.* The Treasury Department and the IRS are considering the impact of Controlled's modification (including refinancing) of any of its securities or other Debt on the qualification of those securities or other Debt as Section 361 Consideration. In particular, the Treasury Department and the IRS are considering the impact of the application of general principles of Federal income tax law (including substance over form and other relevant theories) to acquisitions of Controlled following the Control Distribution Date that result in a modification of Controlled's securities. For example, the Treasury Department and the IRS have considered such application to a merger of Controlled into an acquiring corporation following the Control Distribution Date for transactions in which Controlled had issued Controlled securities that were treated by the taxpayer as purported Section 361 Consideration in an exchange for Distributing Debt. It is the view of the Treasury Department and the IRS that general principles of Federal income tax law (including substance over form and other relevant theories) could apply to recast such a situation for Federal income tax purposes to preclude qualification under § 361(c)(3). As noted in section 3.05(11)(b) of Rev. Proc. 2024-24, Rev. Rul. 98-27, 1998-1 C.B. 1159, is not relevant to determine whether any such transaction or series of transactions should cause the Divisive Reorganization to be recast, because that revenue ruling addresses solely whether Controlled was a "controlled corporation" under § 355(a) immediately before the Distribution. See also generally Rev. Rul. 98-44, 1998-2 C.B. 315.
- (8) *Replacement of Distributing Debt.* The Treasury Department and the IRS are considering the application of the Code to borrowings by Distributing that replace Distributing Debt satisfied with Section 361 Consideration in a Divisive Reorganization. As one example, the Treasury Department and the IRS are considering situations in which Distributing, as of the date of the contribution of assets to Controlled, anticipates entering into a borrowing that reverses the de-leveraging that Distributing effectuated through the use of Section 361 Consideration as part of the Divisive Reorganization—effectively rendering such de-leveraging as

merely transitory and without real economic effect. The Treasury Department and the IRS are of the view that, in certain circumstances, the replacement of Distributing Debt satisfied with Section 361 Consideration can be used as an artifice for increasing the aggregate Debt and other Liabilities of Distributing and Controlled. That result, in effect, replicates a tax-free sale of a portion of Controlled, which the Treasury Department and the IRS are of the view should not qualify for nonrecognition treatment under § 361. Tax advisors have provided feedback consistent with this view following the publication of Rev. Proc. 2018-53, in particular with regard to section 3.04(7) of that revenue procedure.

- (9) *Separate and distinct relevance and application of §§ 357 and 361.* Section 357, which addresses the assumption by Controlled of a Liability of Distributing, generally functions to provide that the assumption is not treated as the receipt by Distributing of money or Other Property from Controlled. See generally § 357(a); H.R. Rep. No. 76-855, 18-19 (1939) (Conf. Rep.) (“The practical effect of [*United States v. Hendler*, 303 U.S. 564 (1938)] is to say that an assumption of a liability is property in the sense that it may be taxable immediately to the first corporation. . . . [W]e have, therefore, recommended that bona fide transactions of this type shall be carried on hereafter without the recognition of immediate gain taxable to the corporation going through reorganization.”) (emphasis added). In contrast, § 361 generally permits Distributing to qualify for nonrecognition treatment on the transfer to Distributing’s creditors in connection with a Divisive Reorganization of money, Other Property, or Controlled securities received from Controlled in the transaction. See generally § 361(b)(3) and (c)(3); S. Rep. No. 445, at 393 (1988) (“The bill amends prior law by providing that transfers of property to creditors in satisfaction of the corporation’s indebtedness in connection with the reorganization are treated as distributions pursuant to the plan of reorganization for this purpose. . . . This overrules the holding in [*Minnesota Tea Co. v. Helvering*, 302 U.S. 609 (1938)].”) (emphasis added). It is the understanding of the Treasury Department and the IRS that there is confusion and disagreement among some tax advisors regarding the interaction and separate operations of §§ 357 and 361 in situations, for example, in which Section 361 Consideration is used to satisfy Distributing Liabilities that do not qualify as Debt. Some tax advisors mistakenly believe that, in such a situation, the Section 361 Consideration would qualify for nonrecognition treatment under § 361. It is the understanding of the Treasury Department and the IRS that some tax advisors also incorrectly contend that Distributing would enjoy nonrecognition treatment under § 361 through the use of Section 361 Consideration to satisfy Distributing Contingent Liabilities, which are not subject to an adjusted basis limitation under § 357(c)(3) (and, therefore, would not be subject to an adjusted basis limitation under § 361(b)(3)). The Treasury Department and the IRS view such assertions as contrary to the plain language of the Code and violative of the text and policy of §§ 357 and 361, in general, and the adjusted basis limitations of § 357(c)(3) and 361(b)(3), in particular.

Letter Ruling 200842003 was a creative estate planning technique:⁵⁰⁰³

- Parent split corporation into 5 different entities.

⁵⁰⁰³ See part II.Q.7.f.iii.(g) Combining Split Up with Sale to Irrevocable Grantor Trust.

- Parent sold an interest in each entity to a different irrevocable grantor trust for a different child.
- Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes.

Also, a transaction in which (1) a parent corporation transfers all of the interests in its limited liability company that is taxable as a corporation to the first subsidiary in exchange for additional stock, (2) the first subsidiary transfers all of the interests in the limited liability company to the second subsidiary in exchange for additional stock, (3) the second subsidiary transfers all of the interests in the limited liability company to the third subsidiary in exchange for additional stock, and (4) the limited liability company elects to be disregarded as an entity separate from its owner for federal income tax purposes effective after it is owned by the third subsidiary, is properly treated for federal income tax purposes as two transfers of stock in Code § 351 exchanges followed by a Code § 368(a)(1)(D) reorganization.⁵⁰⁰⁴

Eustice, Kuntz & Bogdanski, *Federal Income Taxation of S Corporations* (WG&L), ¶ 3.03. Types of Shareholders,⁵⁰⁰⁵ describes Letter Ruling 201949013 as:

distributing corporation's "momentary ownership" of stock of controlled corporation distributed in split-off that was Type D reorganization did not cause controlled corporation to have ineligible shareholder for any portion of its first taxable year; thus, controlled corporation could be S corporation from its inception.

Bloomberg BNA's Tax Management Weekly Report (12/9/2019) described Letter Ruling 201949013:

The IRS issued 15 rulings on an S corporation's ("Distributing") reorganization in which Distributing created Controlled as a subsidiary in order to facilitate a proposed transaction to resolve differences of opinion among its shareholders about how one of its lines of business, Business C, should be operated. Ruling (1) Upon the distribution, Controlled will no longer be a qualified subsidiary (QSub). Ruling (2) The contribution followed by the distribution will qualify as a reorganization under tax code Section 368(a)(1)(D), with Distributing and Controlled each "a party to a reorganization" within the meaning of Section 368(b). Rulings (3), (4), (7), (8) No gain or loss will be recognized by relevant entities in the contribution or the distribution. Rulings (5), (9) The basis of assets transferred in the Contribution and in the Distribution won't change upon the moment of transfer. Rulings (6), (10) The holding period for the recipient for a given asset will include that of the previous owner in the contribution and in the Distribution. Rulings (11),(12) Any earnings and profits will be allocated between Distributing and Controlled in accordance with Section 312(h) and regulations, and Distributing's accumulated adjustments account will be allocated between Distributing and Controlled in a similar manner. Ruling (13) Distributing's momentary ownership of Controlled stock won't cause Controlled to have an ineligible shareholder for any portion of its first taxable year under Section 1361(b)(1)(B); therefore Controlled will be permitted to elect to be an S corporation for its first taxable year provided it otherwise qualifies and makes such

⁵⁰⁰⁴ Rev. Rul. 2015-10.

⁵⁰⁰⁵ As to Letter Ruling 201930011, the treatise says:
same as to multiple stocks distributed in split-up that was Type D reorganization.

election effective immediately upon its QSub termination. Ruling (14), (15) Payments made by and between Distributing and Controlled will be treated as occurring immediately before the distribution.

Letter Ruling 201949013 involved the following facts and rulings:

Summary of Facts

Distributing was formed on Date 1 as a State A corporation. On Date 2, Distributing elected under § 1362(a) of the Code to be treated as a subchapter S corporation for Federal income tax purposes. Distributing is engaged in Business A, Business B, and Business C. Business A is operated by QSub 1, a State A corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business B is operated by QSub 2, a State A limited liability corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business C is operated by QSub 3, a State A limited liability corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business C consists of assets including Asset A, Asset B, and Asset C. Distributing also owns a percent of LLC 1, a State A limited liability company which has elected to be disregarded for federal income tax purposes.

Distributing has both voting and non-voting shares of stock outstanding. Distributing's Series A stock represents a percent of the vote and b percent of the value. Distributing's Series B stock represents c percent of the vote and d percent of the value. Grantor Trust 1 owns e percent of the outstanding Series A stock. Grantor Trust 2 owns f percent of the outstanding Series A stock. Irrevocable Trust 1 owns g percent of the outstanding Series B stock. Irrevocable Trust 2 owns h percent of the outstanding Series B stock. Irrevocable Trust 3 owns i percent of the outstanding Series B stock. Distributing is managed and operated by the beneficiaries of Grantor Trust 1, Grantor Trust 2, Irrevocable Trust 1, Irrevocable Trust 2, and Irrevocable Trust 3.

On Date 3, Irrevocable Trust 1 elected to be treated as an electing small business trust under § 1361(e) of the Code. Irrevocable Trust 1 was created for the benefit of Beneficiary 1, Beneficiary 2, Beneficiary 3, and Beneficiary 4. Beneficiary 1, Beneficiary 2, Beneficiary 3, and Beneficiary 4 are siblings.

Beneficiary 1 is the beneficiary of Irrevocable Trust 4. Beneficiary 2 is the beneficiary of Irrevocable Trust 5. Beneficiary 3 is the beneficiary of Irrevocable Trust 6. Beneficiary 4 is the beneficiary of Irrevocable Trust 7.

Financial information has been submitted indicating that each of Business A and Business C have had gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years.

To resolve differences of opinion among the shareholders as to how Business C should be operated, Distributing proposes the following transaction (the "Proposed Transaction"):

Proposed Transaction

To achieve the business purposes described above, the following series of steps are proposed:

1. The assets of Irrevocable Trust 1 will be divided into j equal shares and be contributed to Irrevocable Trust 4, Irrevocable Trust 5, Irrevocable Trust 6, and Irrevocable Trust 7. Irrevocable Trust 4 will receive k Series B shares of Distributing representing l percent of the outstanding Series B Shares. Irrevocable Trust 5, Irrevocable Trust 6, and Irrevocable Trust 7 will receive m Series B shares of Distributing representing n percent of the outstanding Series B Shares.
2. On Date 4, Controlled was formed as a subsidiary of Distributing. Distributing will file an election to treat Controlled as a qualified subchapter S subsidiary for federal income tax purposes under § 1361(b)(3)(B) of the Code. On Date 5, Controlled formed o State A single member limited liability companies (each a “Controlled SPE”).
3. Distributing will contribute Asset A, Asset B, and Asset C (the “Contribution” and collectively, the “Controlled Business”), Asset D, and p percent of LLC 1 to Controlled in exchange for Controlled common stock and the assumption of liabilities described in Step 4. Each asset of the Controlled Business and Asset D will be transferred to a separate Controlled SPE.
4. Distributing will cause Controlled to enter into a credit agreement with Bank, which will establish a line of credit with a maximum aggregate principal amount of $\$q$ prior to the Split-off and $\$r$ after the Split-off (the “Controlled Credit Line”). Prior to the Split-off, Controlled will draw down $\$q$ on the Controlled Credit Line, which will be evidenced by a promissory note (the “Controlled Loan”) and the outstanding principal of Distributing’s loan with Bank (the “Bank Loan”) will be reduced by a corresponding amount.
5. Any obligations (not otherwise settled or resolved in other steps) that would result in obligations between Distributing immediately following the Split-off (defined below) will be settled in cash, other than obligations under the Continuing Relationships (defined below).
6. Distributing will distribute all of the Controlled common stock to Irrevocable Trust 4 in exchange for all of the shares of Series B stock of Distributing owned by Irrevocable Trust 4 (the “Split-off” or the “Distribution”). Irrevocable Trust 4 may receive a cash distribution from Distributing equal to the Tax Cover Price, if that amount is positive, and Irrevocable Trust 4 will be required to pay the Negative Tax Cover to Distributing, if that amount is negative.
7. Contemporaneous with Step 6, Distributing will redeem for cash s shares of its Series A stock held by Grantor Trust 1 to reduce the percentage of Series A stock owned by Grantor Trust 1 to t percent of the outstanding Series A stock.
8. After the Split-off, Controlled will elect under § 1362(a) of the Code to be treated as an S corporation on the first available date, effective as of the date of the Split-off.

Controlled's sole owner, Irrevocable Trust 4, will file a timely election to be treated as an electing small business trust under § 1361(e) of the Code.

9. Following the Proposed Transaction, Distributing will engage in certain continuing business relationships with Controlled, Irrevocable Trust, and Beneficiary 1 (collectively, the "Continuing Relationships"). All such relationships will be based on arm's length terms and conditions and will not be inconsistent with the overall separation of Business A and the Controlled Business.

Representations

With respect to the Distribution, except as set forth below, Distributing has made all of the representations in Section 3 of the Appendix to Rev. Proc. 2017-53, 2017-41 I.R.B. 283 in the form set forth therein.

Distributing has made the following alternative representations set forth in Section 3 of the Appendix to Rev. Proc. 2017-53:

Representations 3(a), 8(a), 11(a), 15(a), 22(a), 31(a), and 41(b).

Distributing has not made the following representations, which do not apply to the Proposed Transaction:

Representations 5, 6, 19, 20, 24, 25, 35, 36, 37, 38, 39, and 40.

In addition, except as set forth below, Distributing has made all of the representations in Section 3.04 of Rev. Proc. 2018-53, 2018-43 I.R.B. 667.

Distributing has made the following modified representation:

Representation 4: The Controlled Loan was obtained to substitute for an equivalent amount of Distributing Debt (the Bank Loan). Distributing incurred the Distributing Debt that will be satisfied with the Controlled Loan (a) before the request for any relevant ruling is submitted and (b) no later than 60 days before the earliest of the following dates: (i) the date of the first public announcement (as defined in § 1.355-7(h)(10)) of the Divisive Reorganization or a similar transaction, (ii) the date of the entry by Distributing into a binding agreement to engage in the Divisive Reorganization or a similar transaction, and (iii) the date of approval of the Divisive Reorganization or a similar transaction by the board of directors of Distributing.

Rulings

Based solely on the information submitted and representations made, we rule as follows:

1. The Split-off will cause a termination of Controlled's QSub election because Controlled will cease to be a wholly-owned subsidiary of an S corporation. For federal income tax purposes, Controlled will be treated as a new corporation acquiring all of its assets and assuming all of its liabilities from distributing immediately before the termination of Controlled's QSub election in exchange for the stock of Controlled (the Contribution), pursuant to Treas. Reg. § 1.1361-5(b)(1)(i) (§ 1361(b)(3)(B) and (C)).

2. The Contribution followed by the Split-off will qualify as a “reorganization” within the meaning of section 368(a)(1)(D). Distributing and Controlled will each be “a party to the reorganization” within the meaning of section 368(b).
3. Distributing will recognize no gain or loss on the Contribution. Sections 357 and 361(a).
4. Controlled will recognize no gain or loss on the Contribution. Section 1032(a).
5. Controlled’s basis in each asset received in the Contribution will be the same as the basis of that asset in the hands of Distributing immediately prior to the Contribution. Section 362(b).
6. Controlled’s holding period in each asset received in the Contribution will include the period during which Distributing held such asset. Section 1223(2).
7. Distributing will recognize no gain or loss on the Split-off. Section 361(c)(1).
8. Irrevocable Trust 4 will recognize no gain or loss (and no amount will be includable in its income) on the receipt of the stock of Controlled in the Split-off. Section 355(a).
9. The basis of the Controlled stock in the hands of Irrevocable Trust 4 immediately after the Split-off will be the same as the basis of the Distributing stock held by Irrevocable Trust 4 immediately before the Split-off. Section 358(a)(1).
10. Irrevocable Trust 4’s holding period of the Controlled stock received in the Split-off will include the holding period of Irrevocable Trust 4’s Distributing stock exchanged, provided that Irrevocable Trust 4 holds such Distributing stock as a capital asset on the date of the Split-off. Section 1223(1).
11. As provided in section 312(h), proper allocation of earnings and profits among Distributing and Controlled will be made in accordance with Treas. Reg. § 1.312-10(a).
12. Distributing’s accumulated adjustments account immediately before the transaction will be allocated between Distributing and Controlled in a manner similar to the manner in which earnings and profits are allocated under § 312(h) in accordance with Treas. Reg. § 1.1368-2(d)(3) (§§ 1.312-10(a) and 1.1368-2(d)(3)).
13. Momentary ownership by Distributing of the stock of Controlled, as part of the reorganization, will not cause Controlled to have an ineligible shareholder for any portion of its first taxable year under section 1361(b)(1)(B). Controlled may, without requesting the Commissioner’s consent, make a valid S corporation election before the expiration of the five-year period described in section 1361(b)(3)(D) and Treas. Reg. § 1.1361-5(c)(1), provided that (i) immediately following the distribution of the Controlled stock, Controlled is otherwise eligible to make an S corporation election, and (ii) the election is made effective on the date of the Split-off.
14. Payments made by and between Distributing and Controlled under the Continuing Relationships regarding liabilities, indemnities, or other obligations that (i) relate to periods ending on or before the Split-off, and (ii) do not become fixed and

ascertainable until after the Split-off, will be treated as occurring immediately before the Split-off. See *Arrowsmith v. Commissioner*, 344 U.S. 6, 8 (1952); Rev. Rul. 83-73, 1983-1 C.B. 84.

15. Payments of Tax Cover Price made by Distributing to Irrevocable Trust 4 and payments of Negative Tax Cover Price made by Irrevocable Trust 4 to Distributing that do not become fixed and ascertainable until after the Split-off, will be treated as occurring immediately before the Split-off. See *Arrowsmith v. Commissioner*, 344 U.S. 6, 8 (1952); Rev. Rul. 83-73, 1983-1 C.B. 84.

Letter Ruling 202211009 approved a spin-off of Business A into a new corporation that was distributed to Family B in exchange for all of Family B's stock:

Distributing is a State A corporation engaged in Business A which has a single class of voting common stock issued and outstanding (the "Distributing Stock"). Distributing Stock is owned equally by three families, Family A, Family B, and Family C. Distributing has outstanding debt, including the Related Party Note.

Distributing has submitted financial information indicating that Business A has had the gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years.

If the corporation has a complex corporate structure implicating Code § 2701, one can prevent gift tax problems by making sure that the shareholders' rights in each corporation are identical to those they held in the parent corporation.⁵⁰⁰⁶

II.Q.7.f.ii. Code § 355 Requirements

Code § 355 provides seven requirements that must be met for a tax-free corporate division. The main corporation to be divided may be referred to as the distributing corporation. A corporation, stock in which is being distributed, may be referred to as the controlled corporation.

If a corporation cannot satisfy these rules, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division.

Letter ruling procedures and various current IRS concerns are discussed in part II.Q.7.f.i Overview.

II.Q.7.f.ii.(a). Distribution to a Shareholder with Respect to the Shareholder's Stock

The first requirement Code § 355 sets out for a tax-free corporate division is that a distribution is made to a shareholder with respect to the shareholder's stock.⁵⁰⁰⁷

The distribution can be made in the following ways:

- First, the distribution could be a disproportionate distribution, where some of the shareholders receive a distribution and some do not. This type of division, a "split-off," is most often used when all of a company's stock is owned by the second generation of a

⁵⁰⁰⁶ See Letter Ruling 9843010, discussed in fn. 7333.

⁵⁰⁰⁷ Code § 355(a)(1)(A)(i). A distribution with respect to other securities is beyond the scope of these materials.

family. One group of shareholders will receive a distribution of stock in the controlled corporation in exchange for their stock in the distributing corporation. The distribution could also be a pro-rata distribution.⁵⁰⁰⁸ However, in family business succession planning, the pro-rata distribution scheme can be hard to use, since tax-free treatment might not be allowed if the distribution's stated purpose was to end shareholder dispute.

- Another option for distributions under Code § 355 would be a partially disproportionate distribution that involves a shareholder or group of shareholders leaving the distributing corporation completely, as in the disproportionate distribution, but one shareholder keeps his stock in the distributing corporation and receives some stock in the controlled corporation. This is another “split-off” scenario and is usually used when the corporate separation occurs before the death of the business founder or family patriarch and that person holds the ownership interest in both corporations.

II.Q.7.f.ii.(b). Distribute Stock of a “Controlled Corporation” Which Distributing Corporation Controls Immediately Before the Distribution

The second requirement for a tax-free division under Code § 355 is that the distributing corporation must distribute stock of a “controlled corporation” which it controls immediately before the distribution.⁵⁰⁰⁹

Additionally, the distributing corporation must distribute all of the stock of the controlled corporation that it owns or at least must distribute enough of the stock to meet the Code § 368 control requirements.⁵⁰¹⁰ Under Code § 368, a corporation controls another if it owns at least 80% of the total combined voting power of the controlled corporation and at least 80% of the total number of shares of all other classes of stock of the controlled corporation. If the distributing corporation retains any of the controlled corporation's stock, it must establish that the retention was not in pursuance of a plan to avoid taxes.⁵⁰¹¹

Determining whether an acquisition of control has substance for federal tax purposes can be difficult and fact-intensive.⁵⁰¹² The government became concerned that, in some cases, taxpayers may not be able to determine whether such an acquisition has substance with sufficient certainty to proceed with transactions that otherwise satisfy the requirements of

⁵⁰⁰⁸ Code § 355(a)(2)(A).

⁵⁰⁰⁹ Code § 355(a)(1)(A).

⁵⁰¹⁰ Code § 355(a)(1)(D); Reg. § 1.355-2(e)(1).

⁵⁰¹¹ Reg. § 1.355-2(e)(2).

⁵⁰¹² Rev. Proc. 2016-40, Section 2.10. In describing the background for this concern, various parts of Section 2 pointed to Rev. Rul. 56-117, Rev. Ruls. 63-260, 69-407, and 98-27 (limiting the application of *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945), the limitation being based, in part, on § 1012(c) of the Taxpayer Relief Act of 1997, Pub. L. No. 105-34, 111 Stat. 788, 916-17, which added Code § 355(e)). Rev. Proc. 2016-40, Section 2.09 explained:

Although the § 355(e) legislative history states, and Rev. Rul. 98-27 provides, that post-distribution events are not to be taken into account in determining whether a distributing corporation has control of the distributed corporation, this interpretation of § 355 applies only after it has been determined that, at the time of the distribution, the distributing corporation otherwise had control of the distributed corporation in substance. Thus, the § 355(e) legislative history and Rev. Rul. 98-27 do not prevent the step transaction doctrine from applying to determine if, taking into account all facts and circumstances (including post-distribution events), a pre-distribution acquisition of control has substance such that a distributing corporation has control of a corporation within the meaning of § 355(a)(1)(A) immediately prior to a distribution of the stock of that corporation.

Code § 355.⁵⁰¹³ Rev. Proc. 2016-40 provides a safe harbor⁵⁰¹⁴ for the following transactions that meet certain requirements:⁵⁰¹⁵

- (1) D owns C stock not constituting control of C;
- (2) C issues shares of one or more classes of stock to D and/or to other shareholders of C (the issuance), as a result of which D owns C stock possessing at least 80 percent of the total combined voting power of all classes of C stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of C;
- (3) D distributes its C stock in a transaction that otherwise qualifies under § 355 (the distribution); and
- (4) C subsequently engages in a transaction that, actually or in effect, substantially restores
 - (a) C's shareholders to the relative interests, direct or indirect, they would have held in C (or a successor to C) had the issuance not occurred; and/or
 - (b) the relative voting rights and value of the C classes of stock that were present prior to the issuance (an unwind).

The IRS will not assert that such a transaction lacks substance, and that therefore D lacked control of C immediately before the distribution, within the meaning of Code § 355(a)(1)(A), if the transaction is also described in one of the following safe harbors:⁵⁰¹⁶

- .01 No Action Taken Within 24 Months. No action is taken (including the adoption of any plan or policy), at any time prior to 24 months after the distribution, by C's board of directors, C's management, or any of C's controlling shareholders (as defined in § 1.355-7(h)(3)) that would (if implemented) actually or effectively result in an unwind.
- .02 Unanticipated Third Party Transaction. C engages in a transaction with one or more persons (for example, a merger of C with another corporation) that results in an unwind, regardless of whether the transaction takes place more or less than 24 months after the distribution, provided that--
 - (1) There is no agreement, understanding, arrangement, or substantial negotiations (within the meaning of § 1.355-7(h)(1)) or discussions (within the meaning of § 1.355-7(h)(6)) concerning the transaction or a similar transaction (applying the principles of § 1.355-7(h)(12) and (13), relating to similar acquisitions), at any time during the 24-month period ending on the date of the distribution; and
 - (2) No more than 20 percent of the interest in the other party, in vote or value, is owned by the same persons that own more than 20 percent of the stock of C.

⁵⁰¹³ Rev. Proc. 2016-40, Section 2.10.

⁵⁰¹⁴ Rev. Proc. 2016-40, Section 5 describes scope and effect of being within or not being within the safe harbors.

⁵⁰¹⁵ Rev. Proc. 2016-40, Section 3.

⁵⁰¹⁶ Rev. Proc. 2016-40, Section 4.

For purposes of this section, ownership is determined by application of the constructive ownership rules of § 318(a) as modified by § 304(c)(3), except that for purposes of applying § 318(a)(3)(A) and (B), the principles of § 304(c)(3)(B)(ii) (without regard to § 304(c)(3)(B)(ii)(I)) apply.

For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

II.Q.7.f.ii.(c). Cannot Be Used Principally as a Device to Distribute the Earnings and Profits of either the Distributing or Controlled Corporations or Both

The third requirement is that the corporate division cannot be used principally as a device to distribute the earnings and profits of either the distributing or controlled corporations or both.⁵⁰¹⁷

This rule prevents a corporation from helping its shareholders avoid dividend treatment by abusing Code § 355 and enabling shareholders to avoid immediate tax consequences, and to get capital gains treatment when one of the divided corporations is eventually sold. Although changes in the tax law since 2003 diminished the incentive to transform dividends into capital gains by lowering the tax rate on dividend income, sale treatment remains more beneficial than dividend treatment, because sale treatment allows the seller to use the seller's basis to offset gain and to defer tax using the installment method.⁵⁰¹⁸

The determination that a division is being used as a device to avoid taxes is a facts and circumstances based test, but a number of "device factors" are strong evidence of tax avoidance. For example, when a distribution is pro-rata and no stock is surrendered back to the corporation, the IRS will take a close look at the transaction and make sure the distribution is not in fact a dividend.⁵⁰¹⁹ Another factor that may indicate abuse is when stockholders "cash-out" shortly after the division.⁵⁰²⁰ The purpose of the Code § 355 tax-free provisions is to allow a corporation to continue its business in the form of two corporations instead of one, not to allow stockholders a quick tax-free way out of the company. The IRS will take into consideration significant changes in economic conditions that may have caused a stockholder to cash-out shortly after a distribution,⁵⁰²¹ but it is a situation the IRS will examine closely. The IRS will also examine the "nature, kind, amount, and use of the assets" of both the distributing and controlled corporations immediately after the transaction.⁵⁰²² This examination prevents a company from attempting to distribute assets unrelated to the corporation's business under a guise of splitting the corporation's active business. Another questionable situation arises when the controlled corporation and the distributing corporation have an exclusionary post-division relationship where one corporation is the secondary corporation that essentially serves the other.⁵⁰²³ When such a relationship exists and the secondary corporation could be sold without adversely affecting the other corporation's business, the IRS considers this to be evidence of a tax-

⁵⁰¹⁷ Code § 355(a)(1)(B).

⁵⁰²¹ PLR 9030037 (approving later trades when publicly traded stock was to be sold, but not by insiders), PLR 8932038 (approving post-division gift of 10% of corporation), PLR 9041078 (approving later trades when publicly traded stock was to be sold, but not by insiders).

⁵⁰²² Reg. § 1.355-2(d)(2)(iv)(A).

⁵⁰²³ Reg. § 1.355-2(d)(2)(iv)(C).

avoidance device.⁵⁰²⁴ Proposed regulations would modify the nature and use of assets device factor.⁵⁰²⁵

In addition to listing numerous “device factors” in the Regulations, the IRS also provides a number of “nondevice factors” that are evidence of no tax avoidance purpose. Again, this determination is based on facts and circumstances, but the presence of one of these factors can help a corporation defend its division. These “nondevice factors” include having a strong business purpose of the transaction, having a distributing corporation that is publicly traded and widely held, and having a distribution to shareholders that are domestic corporations eligible for the dividends-received deduction.⁵⁰²⁶ Proposed regulations would modify the corporate business purpose nondevice factor.⁵⁰²⁷

Proposed regulations would add a per se device test to the device determination.⁵⁰²⁸

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.⁵⁰²⁹

II.Q.7.f.ii.(d). Active Business

The fourth requirement of Code § 355 is the “active business” test. For what is an “active business,” see part II.Q.7.f.iii Active Business Requirement for Code § 355.

Both the distributing corporation and the controlled corporation must be engaged in an active trade or business for five years before the distribution. Thus, it may not always be easy for a business owner to separate the business into two distinct corporations, and sometimes it may be more costly for the business owner to do so than it would be for him to maintain the business as a whole and use less tax-advantageous business separation techniques when such separation becomes necessary. For example, two divisions could be separated into two wholly owned limited liability companies.

Code § 355(b)(1) requires that either (A) immediately after the division the distributing and controlled corporations are engaged in the active conduct of a trade or business, or (B) immediately before the distribution, the distributing corporation has no assets other than stock or securities of the controlled corporation and the controlled corporation is engaged in an active business immediately after the distribution. Four specific requirements must be met in order for a corporation to be treated as engaged in an active business. First, the corporation

⁵⁰²⁴ Reg. § 1.355-2(d)(2)(iv)(C).

⁵⁰²⁵ REG-134016-15 (7/15/2016).

⁵⁰²⁶ Reg. § 1.355-2(d)(3).

⁵⁰²⁷ REG-134016-15 (7/15/2016).

⁵⁰²⁸ REG-134016-15 (7/15/2016), providing:

Under proposed § 1.355-2(d)(5), if designated percentages of Distributing’s and/or Controlled’s Total Assets are Nonbusiness Assets, the transaction would be considered a device, notwithstanding the presence of any other nondevice factors, for example, a corporate business purpose or stock being publicly traded and widely held. By their nature, these transactions present such clear evidence of device that the Treasury Department and the IRS have determined that the nondevice factors can never overcome the device potential. The only exceptions to this per se device rule would apply if the distribution is also described in § 1.355-2(d)(3)(iv) (distributions in which the corporate distributee would be entitled to a dividends received deduction under section 243(a) or 245(b)) or in redesignated § 1.355-2(d)(6) (§ 1.355-2(d)(5) of the current regulations, relating to transactions ordinarily not considered as a device).

⁵⁰²⁹ Rev. Proc. 2016-45.

must be engaged in the active conduct of a trade or business, or, immediately after the distribution, substantially all of its assets are stock and securities of a corporation controlled by it which is engaged in such a trade or business.⁵⁰³⁰ “Active trade or business” for purposes of Code § 355 is defined as a specific group of activities of the corporation being carried on for purposes of earning income or profit and the activities included in such group include all operations that form any part of, or step in, the process of earning income or profit.⁵⁰³¹ Next, such trade or business is required to have been actively conducted throughout the five-year period ending on the date of the distribution.⁵⁰³² The trade or business also must not have been acquired within that five-year period in a transaction in which gain or loss was recognized either in whole or in part.⁵⁰³³ Finally, the control of a corporation conducting an active trade or business must not have been acquired in a taxable transaction in the same five year period.⁵⁰³⁴ Additional details are further below.

Rev. Rul. 2019-9 provides:

This revenue ruling suspends Rev. Rul. 57-464, 1957-2 C.B. 244, and Rev. Rul. 57-492, 1957-2 C.B. 247, pending the completion of a study by the Department of the Treasury (Treasury Department) and the Internal Revenue Service (Service) regarding the active trade or business (ATB) requirement under sections 355(a)(1)(C) and (b) of the Internal Revenue Code.

Revenue Rulings

In Rev. Rul. 57-464, the Service considered the section 355 qualification of a corporation’s separation of a manufacturing business from a group of real estate assets consisting of an old factory building used for storage and four other buildings: a duplex apartment building rented to employees of the corporation, a small office building rented to a single tenant, and two houses, one of which was occupied by a sister-in-law of the president of the corporation. The use of the old factory building for storage “was not in itself the active operation of a business as defined in the regulations.” The rental activities “produced only a nominal rental” and “negligible” net income, and the properties “were acquired either as an investment or as a convenience to employees of

⁵⁰³⁰ Code § 355(b)(2)(A).

⁵⁰³¹ Reg. § 1.355-3(b)(2)(ii). Specifically excluded from the definition of an active trade or business are activities such as holding of stock, securities, land or other property for investment purposes. Reg. § 1.355-3(b)(2)(iv). Additionally, owning or operating real or personal property used in a trade or business is not considered an active trade or business unless the owner also performs significant services with respect to the operation and management of the property. Reg. § 1.355-3(b)(2)(iv). Rev. Rul. 2007-42 approved a real estate rental activity that included certain services. The corporate parent of the LLC that engaged in those activities was deemed engaged in an active trade or business when the corporation owned 1/3 (but not 20%) of the LLC. Note also that proposed regulations have been issued that the author has not undertaken to study; see Cummings, *The New Section 355(b) Active Trade or Business Proposed Regulations*, *Journal of Taxation*, August 2007, page 74.

⁵⁰³² Code § 355(b)(2)(B). See Rev. Ruls. 2002-49 and 2007-42 regarding business conducted through an LLC.

⁵⁰³³ Code § 355(b)(2)(C).

⁵⁰³⁴ Code § 355(b)(2)(D). Letter Ruling 201551005 approved the target shareholders’ receipt of cash boot and consequential recognition of gain when all of the target corporation’s assets had a carryover basis. Letter Ruling 201551009 approved the recognition of income under Code §§ 481 (change of accounting method) and 751 (relating to differing interests in hot assets – see part II.Q.8.b.i.(g) Code § 751 – Hot Assets).

the manufacturing business.” The Service held that the separation did not satisfy the ATB requirement.

In Rev. Rul. 57-492, a corporation engaged in refining, transporting, and marketing petroleum products began a separate operation to explore for and produce oil. The exploration and production operation incurred substantial expenditures but “did not include any income producing activity or any source of income” until less than five years preceding its separation from the primary refining, transportation, and marketing operation. The Service held that the exploration and production operation failed to qualify as an ATB because, “[b]efore oil was discovered in commercial quantities ..., the venture ... did not include any income producing activity or any source of income.”

Law

Section 355(a)(1) provides that, if certain requirements are met, a corporation may distribute stock and securities of a controlled corporation to its shareholders and security holders without recognition of gain or loss or income to the recipient shareholders or security holders. Among those requirements, both the distributing corporation and the controlled corporation must be engaged in an ATB immediately after the distribution. Sections 355(a)(1)(C) and (b), and § 1.355-3(a)(1)(i). Each trade or business must have been actively conducted throughout the five-year period ending on the date of the distribution. Section 355(b)(2)(B) and § 1.355-3(b)(3).

Section 1.355-3(b)(2)(ii) describes a “trade or business” as “a specific group of activities [that] are being carried on by the corporation for the purpose of earning income or profit, and the activities included in such group include every operation that forms a part of, or a step in, the process of earning income or profit.” In particular, “[s]uch group of activities ordinarily must include the collection of income and the payment of expenses.” Section 1.355-3(b)(2)(ii).

Analysis

The Treasury Department and the Service are conducting a study to determine, for purposes of section 355, “whether a business can qualify as an ATB if entrepreneurial activities, as opposed to investment or other non-business activities, take place with the purpose of earning income in the future, but no income has yet been collected.” See IRS statement regarding the active trade or business requirement for section 355 distributions, dated September 25, 2018, available at <http://www.irs.gov/newsroom/statements-from-office-of-the-chief-counsel>. The ATB analysis underlying the holdings in Rev. Rul. 57-464 and Rev. Rul. 57-492 focuses, in significant part, on the lack of income generated by the activities under consideration. Consequently, these rulings could be interpreted as requiring income generation for a business to qualify as an ATB.

Accordingly, Rev. Rul. 57-464 and Rev. Rul. 57-492 are suspended pending completion of the study. See IRM 32.2.2.8.1, para. 9 (Aug. 11, 2004) (providing that a revenue ruling can be suspended “only in rare situations to show that previously published guidance will not be applied pending some future action, such as ... the outcome of a Service study”).

“Letter ruling addresses Section 355 ATOB requirement,” *Journal of Taxation* (4/2020), reports:

Ltr. Rul. 201948001 (the PLR) focuses on whether a company satisfies the active trade or business (ATOB) requirement in a Section 355 transaction based on the business of a corporate subsidiary it indirectly owned through a foreign partnership. The IRS ruled that the acquisition of subsidiaries through a partnership termination did not preclude the businesses conducted by the subsidiaries from qualifying as an ATOB within the meaning of Section 355(b)....

Observations and implications. Although a PLR may not be relied on as precedent, this ruling indicates that in certain cases and when structured properly, a company may be able to rely on the ATOB of a corporate subsidiary of a partnership in order to satisfy the ATOB requirement in a Section 355 transaction. This ruling goes beyond previously issued PLRs as well as proposed regulations that the Treasury and the IRS issued in 2007 under Section 355(b) (the 2007 Proposed Regulations).

The 2007 Proposed Regulations permit a distributing corporation to rely on an ATOB of a partnership in which the distributing corporation either holds a “substantial interest” or a “meaningful interest,” as applicable, depending upon whether the distributing corporation performs active and substantial management functions for the partnership. The regulations do not specifically permit a distributing corporation to look through a partnership to the partnership’s corporate subsidiary in order to rely on the corporate subsidiary’s ATOB for purposes of satisfying the ATOB requirement under Section 355(b). However, the 2007 Proposed Regulations provide that a partnership may distribute the stock of a subsidiary to a distributing corporation and the distributing corporation may rely on the subsidiary’s ATOB, notwithstanding that the distributing corporation acquired the stock of the subsidiary within five years of the Section 355 transaction date (See Prop. Reg. 1.355(b)(4)(ii)(B) and 1.355-3(d)(2), Example 35.)

While the IRS also had previously issued at least one PLR that permitted a distributing corporation to rely on ATOB assets acquired from a partnership termination (Ltr. Rul. 201827008), Ltr. Rul. 201948001 appears to be the first PLR that permits a taxpayer to rely on a subsidiary’s ATOB if that subsidiary was acquired from a partnership in a non-liquidating or a liquidating distribution within five years of the date of the Section 355 transaction. Although limited to its facts, the PLR illustrates that if an ATOB is held by a corporate subsidiary of a partnership, a taxpayer-partner intending to make a distribution in a Section 355 transaction may terminate the partnership prior to the Section 355 transaction and bring that subsidiary into its separate affiliated group and rely on the ATOB conducted by such subsidiary to satisfy the ATOB requirement under Section 355.

Letter Ruling 202033005, when a family business divided when a trust holding it terminated, is reproduced in part II.Q.7.f.ii.(f) Continuity of Interest.⁵⁰³⁵

Letter Ruling 202340015 approved a Code § 355 separation for the following (highlighting mine):

Distributing is a publicly traded corporation engaged in non-pharmaceutical Business A and non-pharmaceutical Business B through its direct and indirect subsidiaries (the

⁵⁰³⁵ Beginning with the text accompanying fn 5050.

“Distributing Worldwide Group”) which includes conducting research and development activities for the production of Product. Before Product can be marketed and sold to the public, it must go through a series of steps in order to receive approval from the Regulatory Agency. The operations associated with Business A and Business B are conducted in Country B and Country C, respectively.

Distributing directly owns 100 percent of the stock of FSub 1 and FSub 2, which are each corporations organized under the laws of Country A. FSub1 and FSub 2, in turn, collectively own 100 percent of the stock of FSub 3, a corporation organized under the laws of Country B. FSub 3 owns the assets associated with Business A. Distributing acquired 100 percent of the stock of FSub 1 on Date A in a transaction intended to qualify as a tax-free reorganization under § 368(a).

Distributing owns 100 percent of the stock of FSub 4, which is organized under the laws of Country A and classified as a corporation for federal income tax purposes. FSub 4 owns 100 percent of the stock of Sub 1, a corporation organized under the laws of Country C. Sub 1 directly owns 100 percent of the equity interests in LLC1, a limited liability company organized under the laws of Country C that is classified as an entity disregarded as separate from its owner for federal income tax purposes. Sub 1 and LLC1 collectively own the assets associated with Business B.

For more than five years, the Distributing Worldwide Group’s employees have engaged in regular, continuing operational and managerial activities with respect to each of Business A and Business B. **The Distributing Worldwide Group has not yet collected income** associated with either Business A or Business B but submitted information in accordance with Rev. Proc. 2017-52 indicating that it had incurred substantial, continuing operating expenses representing the active conduct of a trade or business with respect to Business A and Business B for each of the past five years.

II.Q.7.f.ii.(e). Transaction Must Have At Least One Corporate Business Purpose

The fifth requirement is that the transaction must have at least one corporate business purpose.⁵⁰³⁶

The predecessor to this regulation provided that “a distribution by a corporation of stock of a controlled corporation will not qualify under section 355 of the Code where carried out for purposes not germane to the business of the corporations, and that the distribution must be incident to a readjustment of corporate structures required by business exigencies.”⁵⁰³⁷ Under that regulation, retaining a “franchise vital to the business of the distributing corporation” was a “valid business purpose.”⁵⁰³⁸

⁵⁰³⁶ Reg. § 1.355-2(b).

⁵⁰³⁷ Rev. Rul. 75-337, summarizing then-Reg. § 1.355-2(c).

⁵⁰³⁸ Rev. Rul. 75-337 involved the following facts:

X corporation operated an automobile dealership. Its franchise for the sale and service of automobiles was in the name of individual A who managed X and owned 53 percent of its stock. A was 70 years old and this stock constituted the bulk of his estate. The balance of the stock was held by A’s five daughters in equal proportions. Three of the daughters were also actively employed in the X business. The other two daughters were not actively employed by X.

This requirement ensures that nonrecognition treatment is given only to distributions that are part of readjustments of corporate structures caused by business exigencies and to readjustments of continuing interests in property under modified corporate form.⁵⁰³⁹ The purpose must be a “real and substantial non Federal tax purpose.”⁵⁰⁴⁰ The distribution to

Y corporation, a wholly owned subsidiary of X, was engaged in the business of renting automobiles.

The franchise policy of the automobile manufacturer did not favor granting or continuing a franchise where there were inactive shareholders unless the manager holding the franchise owned a majority of the stock. As an alternative, the manufacturer’s policy permitted the granting or continuing of a franchise where there was no majority shareholder, provided the shareholders were few in number and all were active in the business. The manufacturer does not grant franchises to corporations, only to individuals or partnerships. The franchise was renewable periodically and was not transferable by inheritance or otherwise.

As the first step in a plan to insure that X’s shareholders would be able to renew the franchise upon the death or retirement of A, who was then 70 years old, X distributed three-fourths of the Y stock to the two inactive-daughter shareholders in exchange, value for value, for all of their X stock. The remaining one-fourth of the Y stock was distributed to A in exchange for shares of his X stock of equal value. A intended that upon his death the inactive-daughter shareholders would receive their inheritance in Y stock and assets other than stock of X.

The distribution of the Y stock to A furthered the objective of enabling X’s shareholders to retain the automobile franchise by increasing the percentage of ownership in X on the part of the active shareholders (other than A) and by providing A with Y stock which he could bequeath or gift to the inactive-daughter shareholders, leaving his remaining X stock available for bequests or gifts to the active shareholders.

Rev. Rul. 75-337 reasoned:

Upon the death or retirement of A, the present stock ownership of X with proportionate bequests or gifts to A’s daughters (because A’s X stock represented the bulk of his estate) would preclude the existence of a majority active shareholder of X or all active shareholders in X for the purpose of renewing the X shareholders’ franchise under the manufacturer’s dealership policy. In order to insure qualification under the alternate conditions of the franchise policy, it was necessary to set the stage for X shareholders to retain the franchise at A’s death or retirement, without chancing a potential interruption in the continuity of, or even the loss of, the franchise which might occur if nothing was done until after A’s death or retirement. This was accomplished by first causing the Y stock to be distributed and then having A provide in his will or by gift for only the active shareholders to receive his shares of X stock.

Thus, the distribution of Y stock is germane to the continuation of the X business in the reasonably foreseeable future. Execution of the plan will forestall an impending disruption to the X business by reason of the current active family group being unable to renew X’s franchise upon A’s death or retirement.

In *Rafferty v. Commissioner*, 452 F.2d 767 (1st Cir. 1971), it was held, under a plan to avoid any remote possibility of interference in a business by future sons-in-law, that the spin-off had no immediate business reason, involved a personal motive and had as its primary purpose a desire to make bequests in accordance with an estate plan. The difficulties anticipated were so remote that they might never come to pass. The daughters might never marry - thus eliminating completely any cause to worry about business interference by future sons-in-law. There was, at best, “only an envisaged possibility of future debilitating nepotism,” and the effect on the business was conjectural.

In the instant case, the problem was immediate due to the advanced age of A and was directly related to the retention of a franchise vital to the business of the distributing corporation.

Accordingly, the distribution by X of the Y stock to the inactive-daughter shareholders and to A in exchange for X stock is supported by a valid business purpose within the contemplation of section 1.355-2(c) of the regulations.

⁵⁰³⁹ Reg. § 1.355-2(b).

⁵⁰⁴⁰ Reg. § 1.355-2(b).

shareholders does not satisfy a corporate business purpose if the corporate business purpose can be achieved through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation and is neither impractical nor unduly expensive.⁵⁰⁴¹

The Regulations also note that a “shareholder purpose... is not a corporate business purpose.”⁵⁰⁴² However, sometimes a shareholder’s purpose is so coextensive with the corporate business purpose that no real distinction exists between the two, and in such cases, the transaction will be considered to have a corporate business purpose.⁵⁰⁴³ Clearly, not all shareholder disputes will rise to the level of a corporate business purpose. For example, a dispute between shareholders who are not part of management would have little effect on the business itself, thus, such a dispute would not be co-extensive with a business purpose:

- The Regulations provide an example of a shareholder dispute that would be coextensive with a corporate business purpose.⁵⁰⁴⁴ The example involves a corporation, owned by two shareholders, engaged in two businesses – manufacturing and selling furniture and selling jewelry. Shareholder A wants to continue the furniture business, and Shareholder B wants to continue the jewelry business. If A and B decide to split up the business and cut ties with one another, the transaction will be considered to have a corporate business purpose – the business will likely benefit from having the interested shareholder running the business – even though the separation was also driven by a shareholder purpose.
- Citing the above example, Rev. Rul. 2003-52 approved as having a business purpose the division of a farming corporation⁵⁰⁴⁵ where the “distribution will eliminate this disagreement

⁵⁰⁴¹ Reg. § 1.355-2(b)(3). Reg. § 1.355-2(b)(5), Example (3) provides:

Corporation X is engaged in the manufacture and sale of toys and the manufacture and sale of candy. The shareholders of X wish to protect the candy business from the risks and vicissitudes of the toy business. Accordingly, X transfers the toy business to new corporation Y and distributes the stock of Y to X’s shareholders. Under applicable law, the purpose of protecting the candy business from the risks and vicissitudes of the toy business is achieved as soon as X transfers the toy business to Y. Therefore, the distribution is not carried out for a corporate business purpose. See paragraph (b)(3) of this section.

⁵⁰⁴² Reg. § 1.355-2(b)(2).

⁵⁰⁴³ Reg. § 1.355-2(b).

⁵⁰⁴⁴ Reg. § 1.355-2(b)(5), Example (2).

⁵⁰⁴⁵ The facts were:

Corporation X is a domestic corporation that has been engaged in the farming business for more than five years. The stock of X is owned 25 percent each by Father, age 68, Mother, age 67, Son, and Daughter. Although Father and Mother participate in some major management decisions, most of the management and all of the operational activities are performed by Son, Daughter, and several farmhands. The farm operation consists of breeding and raising livestock and growing grain.

Son and Daughter disagree over the appropriate future direction of X’s farming business. Son wishes to expand the livestock business, but Daughter is opposed because this would require substantial borrowing by X. Daughter would prefer to sell the livestock business and concentrate on the grain business. Despite the disagreement, the two siblings have cooperated on the operation of the farm in its historical manner without disruption. Nevertheless, it has prevented each sibling from developing, as he or she sees fit, the business in which he or she is most interested.

Having transferred most of the responsibility for running the farm to the children, Father and Mother remain neutral on the disagreement between their children. However, because of the

and allow each sibling to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, with the expectation that each business will benefit.”⁵⁰⁴⁶

Real world businesses may not have such neatly separable businesses within one corporation, as in the example from the Regulations. But even in “single function” businesses, a shareholder purpose (shareholder dispute) can still rise to the level of a corporate business purpose. The IRS has approved a Code § 355 tax-free corporate division where the division was driven by friction that had developed between shareholders “regarding fundamental management policy and the expansion of the business” and the shareholders had been “unable to agree to a current fair market value of the stock.”⁵⁰⁴⁷

disagreement, Father and Mother would prefer to bequeath separate interests in the farm business to their children.

For reasons unrelated to X’s farm business, Son and Daughter’s husband dislike each other. Although this has not impaired the farms operation to date, Father and Mother believe that requiring Son and Daughter to run a single business together is likely to cause family discord over the long run.

To enable Son and Daughter each to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, to further the estate planning goals of Father and Mother, and to promote family harmony, X transfers the livestock business to newly formed, wholly owned domestic corporation Y and distributes 50 percent of the Y stock to Son in exchange for all of his stock in X. X distributes the remaining Y stock equally to Father and Mother in exchange for half of their X stock. Going forward, Daughter will manage and operate X and have no stock interest in Y, and Son will manage and operate Y and have no stock interest in X. Father and Mother will also amend their wills to provide that Son and Daughter will inherit stock only in Y and X, respectively. After the distribution, Father and Mother will still each own 25 percent of the outstanding stock of X and Y and will continue to participate in some major management decisions related to the business of each corporation.

Apart from the issue of whether the business purpose requirement of 1.355-2(b) is satisfied, the distribution meets all of the requirements of 368(a)(1)(D) and 355 of the Internal Revenue Code.

⁵⁰⁴⁶ After reviewing the 1989 preamble to the regulations, T.D. 8238, the ruling cited the example then reasoned:

The disagreement of Son and Daughter over the farms future direction has prevented each sibling from developing, as he or she sees fit, the business in which he or she is most interested. The distribution will eliminate this disagreement and allow each sibling to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, with the expectation that each business will benefit. Therefore, although the distribution is intended, in part, to further the personal estate planning of Father and Mother and to promote family harmony, it is motivated in substantial part by a real and substantial non-Federal tax purpose that is germane to the business of X. Hence, the business purpose requirement of 1.355-2(b) is satisfied.

⁵⁰⁴⁷ Letter Ruling 8943038. See also Letter Ruling 201411012, which, consistent with IRS ruling policy, declined to rule on business purpose:

Sibling 1 is President of Distributing, operating and managing the businesses with active input from Sibling 2 and both siblings’ adult children. In recent years, however, the Shareholders have disagreed significantly about the direction in which to take each of the businesses. Therefore, they propose the following transaction:

- (i) Distributing will form Controlled and transfer to it approximately c percent of Distributing’s active trade or business assets, including some of the separable tracts of land, in exchange for all of Controlled’s outstanding stock (the Contribution).

Thus, for a shareholder dispute to rise to the level of a corporate business purpose, the dispute must be one that will negatively affect the corporation's business if it is not carried out. Disputes between purely passive shareholders will not reach that threshold. But disputes between active shareholders on whether to grow the company or other differences in business philosophies would likely reach the necessary corporate business purpose threshold. Essentially, as long as the dispute is between active shareholders, as is usually the case in the standard family business model, it should be relatively easy to establish that the dispute would affect the corporation's operations, thus establishing that the shareholder purpose is co-extensive with a corporate business purpose.

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.⁵⁰⁴⁸

II.Q.7.f.ii.(f). Continuity of Interest

The sixth requirement is "continuity of interest." Reg. § 1.355-2(c)(1), "Requirement," provides:

Section 355 applies to a separation that effects only a readjustment of continuing interests in the property of the distributing and controlled corporations. In this regard section 355 requires that one or more persons who, directly or indirectly, were the owners of the enterprise prior to the distribution or exchange own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. This continuity of interest requirement is independent of the other requirements under section 355.

Reg. § 1.355-2(c)(2), "Examples," provides:

Example (1). For more than five years, corporation X has been engaged directly in one business, and indirectly in a different business through its wholly owned subsidiary, S. The businesses are equal in value. At all times, the outstanding stock of X has been owned equally by unrelated individuals A and B. For valid business reasons, A and B cause X to distribute all of the stock of S to B in exchange for all of B's stock in X. After the transaction, A owns all the stock of X and B owns all the stock of S. The continuity of interest requirement is met because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (2). Assume the same facts as in Example (1), except that pursuant to a plan to acquire a stock interest in X without acquiring, directly or indirectly, an interest in S, C purchased one-half of the X stock owned by A and immediately thereafter X

-
- (ii) Distributing will distribute to Sibling 2 all of the Controlled shares in exchange for all of Sibling 2's stock in Distributing (the Split-Off).

After the Split-Off, Sibling 1 will hold all of the outstanding stock of Distributing, which will remain actively engaged in its historic businesses using the remaining d percent of its historic business assets. Sibling 2 will hold all of the outstanding stock of Controlled, which will be actively engaged in Business E using the c percent of Distributing's historic business assets received in the Contribution.

Presumably the taxpayers request the ruling to approve Code § 355's other requirements (although the IRS also declined to rule on the device test or whether the split-off was part of a plan proscribed by Reg. § 1.355-7).

⁵⁰⁴⁸ Rev. Proc. 2016-45.

distributed all of the S stock to B in exchange for all of B's stock in X. After the transactions, A owns 50 percent of X and B owns 100 percent of S. The distribution by X of all of the stock of S to B in exchange for all of B's stock in X will satisfy the continuity of interest requirement for section 355 because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (3). Assume the same facts as in Examples (1) and (2), except that C purchased all of the X stock owned by A. After the transactions, neither A nor B own any of the stock of X, and B owns all the stock of S. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, own an amount of stock establishing a continuity of interest in each of X and S after the distribution, i.e., although A and B collectively have retained 50 percent of their equity interest in the former combined enterprise, they have failed to continue to own the minimum stock interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

Example (4). Assume the same facts as in Examples (1) and (2), except that C purchased 80 percent of the X stock owned by A. After the transactions, A owns 20 percent of the stock of X, B owns no X stock, and B owns 100 percent of the S stock. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, have a continuity of interest in each of X and S after the distribution, i.e., although A and B collectively have retained 60 percent of their equity interest in the former combined enterprise, the 20 percent interest of A in X is less than the minimum equity interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

The division really must be a division and not essentially a sale. One or more direct or indirect owners of the distributing corporation before the distribution must own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. Continuing ownership of 50% or more should be enough to establish a continuity of interest.⁵⁰⁴⁹ In most family business divisions, meeting this test will not be a problem, since both the distributing and controlled corporations will be owned by original shareholders.

Letter Ruling 202033005 involved the following facts:⁵⁰⁵⁰

Summary of Facts

Distributing, formed under the laws of State A, is an accrual basis Subchapter S corporation, which is engaged primarily in Business A. It was formed on Date 1. One of Distributing's founders was Settlor. Distributing has outstanding A shares of stock, all of

⁵⁰⁴⁹ See Reg. § 1.355-2(c)(2), Example (2) and Rev. Proc. 96-30, § 4.07.

⁵⁰⁵⁰ To explain some of the terms used below, see parts II.A.2.g Qualified Subchapter S Subsidiary (QSub) and III.A.3.e.ii Electing Small Business Trusts (ESBTs).

which are held by Trust as the sole shareholder. Sibling 1, Sibling 2, Sibling 3 and Sibling 4 (the “Siblings”) are the remaindermen beneficiaries of Trust.

Distributing owns all of the outstanding stock of Q Sub 1 and all of the outstanding interests in Q Sub 2, both disregarded entities for federal income tax purposes. Each of Q Sub 1 and Q Sub 2 owns land that is unrelated to Distributing’s Business A operations.

Controlled, formed under the laws of State A, is an accrual basis corporation formed to effectuate the proposed transaction. Controlled has outstanding B shares of stock, all of which are held by Distributing.

Distributing owns approximately C acres of land and leases another D acres of land. It is on this land that Distributing engages in Business A. Distributing has submitted financial and employment information indicating that it is actively engaged in Business A and represents that it has gross receipts and has documented operating expenses representing the active conduct of a trade or business for each of the past five years.

Settlor created Trust on Date 2 and funded it with all of the outstanding shares of Distributing. Trust elected to become an Electing Small Business Trust (“ESBT”) on Date 3, the same day Distributing made its Subchapter S corporation election. Settlor and Trustee A served as co-trustees of Trust until Settlor’s death, at which point Trust became irrevocable and Trustee A became the sole trustee.

Other than some cash in a bank account, Trust’s sole asset is all the outstanding shares of Distributing. Under the terms of Trust, Trust shall terminate upon: (a) the last to die of Settlor, Trustee A, and X; and (b) either: (i) the youngest of Trustee A’s children (Sibling 1, Sibling 2, Sibling 3 and Sibling 4, referred to in the aggregate as the Siblings) attains age 25; or (ii) the last survivor of Trustee A’s children dies before attaining age 25. Upon termination, Trust’s stock ownership in Distributing is to be transferred free of Trust in equal shares to each of the Siblings.

Trustee A died on Date 5. Settlor, Trustee A and X have passed away and the Siblings are all over age 25. Trust is terminating, and its ownership of Distributing’s stock has vested in the Siblings equally. Because of considerable disagreement amongst the Siblings regarding the operation of Business A, the Siblings requested that Trustee B facilitate a settlement amongst them with respect to Distributing before terminating Trust and distributing to each of them his/her equal interest in the corpus of Trust. The settlement devised by Trustee B and approved by the Siblings is as follows (the “Proposed Transaction”):

Proposed Transaction (some of the steps have already been consummated):

1. On Date 4, Distributing organized Controlled.
2. Distributing shall timely elect to have Controlled treated as its qualified Subchapter S Subsidiary, effective as of Controlled’s date of organization.
3. In exchange for all of Controlled’s stock, Distributing will contribute to Controlled approximately one-half of the C acres of land now owned by Distributing, including any and all buildings and improvements situated thereon (“Contributed Land”), as

well as certain assets and liabilities (in the aggregate, the "Contribution") pursuant to an Agreement and Plan of Reorganization ("Plan"), which will also provide -

- a. To the extent necessary, Controlled and Distributing will enter into an agreement or arrangement that would allow the Siblings access to their respective homes situated on the land to be distributed to Controlled. Alternatively, the homes may be moved.
- b. Any obligations for bank loans and mortgages affecting the land now divided between Distributing and Controlled shall be shared equally by Distributing and Controlled until refinanced by such corporations.
- c. Any existing mortgages or home equity lines of credit secured by the land now divided between Distributing and Controlled may be paid in full by Trust prior to the distribution or continue to be an obligation of the Siblings.
- d. Distributing may retain the right to continue to lease the D acres of land it currently leases for its operations.
- e. Distributing will have direct access to the water shed vital to the Business A operations of both corporations. Distributing and Controlled will enter into a water access and piping easement in connection with catching, storing and moving water from Distributing's land to Controlled's land via the existing water infrastructure. The cost to maintain the water infrastructure will be shared equitably.
- f. After the Distribution, Controlled will have direct access to a water reservoir. Distributing and Controlled will enter into an agreement permitting Distributing's representatives reasonable travel across Controlled's land to access the reservoir.
- g. Trustee B and the Siblings will outline an equitable percentage of Business A assets which will be retained by Distributing or transferred to Controlled.
- h. Distributing will transfer approximately one-half of outstanding receivables or the proceeds from such receivables to Controlled.
- i. Distributing will transfer to Controlled machinery and equipment, including office equipment, vehicles, furniture and fixtures, etc. not specifically identified with either Distributing or Controlled, as they agree, or if they are unable to agree, as Trustee B shall decide in Trustee B's sole discretion.
- j. Distributing will transfer a one-half interest in the assets of or one-half of the stock ownership in Q Sub 1 to Controlled. If Q Sub 1's assets are sold before the closing occurs, the net proceeds shall be added to cash.
- k. Distributing will transfer a one-half interest in the assets of or one-half of its membership interest in Q Sub 2 (after conversion to a multiple member LLC) to Controlled. If Q Sub 2's assets are sold before the closing occurs, the net proceeds shall be added to cash.

Shareholders Before and After Distribution:

The income beneficiaries of Trust have passed away. Trust is terminating. The remaindermen of Trust are currently entitled to receive the Trust corpus, which consists of both principal and income, and the remaindermen are entitled to receive such Trust corpus in equal shares. Trust holds mere legal title to the Distributing shares; the remaindermen (*i.e.*, the Siblings) are the vested owners, not Trust. Trust continues pursuant to court order solely at the behest of the Siblings.

Representations:

Except as set forth below,

1. Trustee B makes all the representations in section 3 of the Appendix to Rev. Proc. 2017-52 in the form set forth therein.
2. Trustee B does not make the following representations, which do not apply to the Proposed Transaction: 5, 6, 20, 24, 25, 35, 36, 37, 38, 39, and 40.
3. Trustee B makes the following alternative representations set forth in section 3 of the Appendix to Rev. Proc. 2017-52: 3(a), 8(a), 11(a), 15(a), 22(a), 31(a) and 41(b).

Letter Ruling 202033005 called the following the “Significant Issue Ruling”:

Based solely on the information submitted and the representations made, we rule that Sibling 1, Sibling 2, Sibling 3 and Sibling 4 are the shareholders of Distributing for purposes of satisfying the shareholder control requirement of IRC § 368(a)(1)(D), and the continuity of interest requirement of Treas. Reg. § 1.355-2(c)(1).

Letter Ruling 202033005 called the following the “Transactional Ruling”:

Based solely on the information submitted and the representations made, we rule as follows with respect to the Proposed Transaction:

1. The Contribution, followed by the Distribution, will qualify as a reorganization under IRC § 368(a)(1)(D) and Distributing and Controlled will each be “a party to a reorganization” within the meaning of IRC § 368(b).
2. No gain or loss will be recognized by Distributing on the Contribution (IRC §§ 361(a) and 357(a)) to Controlled.
3. No gain or loss will be recognized by Controlled on the Contribution (IRC § 1032(a)).
4. Controlled’s basis in each asset received from Distributing in the Contribution will be the same as the basis of such asset in the hands of Distributing immediately before the Contribution (IRC § 362(b)).
5. Controlled’s holding period for each asset received from Distributing in the Contribution will include the period during which Distributing held that asset (IRC § 1223(2)).

6. No gain or loss will be recognized by Distributing on the Distribution (IRC § 361(c)(1)).
7. No gain or loss will be recognized by (and no amount will otherwise be included in the income of) any shareholder of Distributing upon receipt of Controlled stock in the Distribution (IRC § 355(a)).
8. The basis of the shares of Controlled in the hands of its shareholders immediately after the Distribution will be the same as the basis of the Distributing shares surrendered in exchange thereof (IRC § 358(a)(1)).
9. The holding period of the Controlled shares received by each shareholder in the Distribution will include the holding period of the Distributing shares surrendered in exchange therefor, provided that the Distributing shares were held as a capital asset in the Distributee's hands on the date of the Distribution (IRC § 1223(1)).
10. Earnings and Profits, if any, will be allocated between Distributing and Controlled in accordance with IRC § 312(h) and Treas. Reg. § 1.312-10(a).
11. Distributing's accumulated adjustment account immediately before the transaction will be allocated between Distributing and Controlled in a manner similar to the manner in which Distributing's earnings and profits will be allocated under IRC § 312(h) in accordance with Treas. Reg. § 1.1368-2(d)(3) (Treas. Reg. §§ 1.312-10(a) and 1.1368-2(d)(3)).
12. Pursuant to Treas. Reg. § 1.1361-5(b)(1)(i) (and (C)), the Distribution will cause a termination of Controlled's Q-Sub election because Controlled will cease to be a wholly owned subsidiary of Distributing, an S corporation.
13. For federal income tax purposes, Controlled will be treated as a new corporation acquiring all of its assets and assuming all of its liabilities from Distributing immediately before the termination of Controlled's Q-Sub election in exchange for the stock of Controlled.
14. The momentary ownership by Distributing of the stock of Controlled, as part of the reorganization under IRC § 368(a)(1)(D), will not cause Controlled to have an ineligible shareholder for any portion of its first taxable year under IRC § 1361(b)(1)(B), and will not, in itself, render Controlled ineligible to elect to be an S Corporation for its first taxable year.
15. If Controlled otherwise meets the requirements of a small business corporation under IRC § 1361, Controlled will be eligible to make a subchapter S election under IRC § 1362(a) for its first taxable year, provided that such election is made effective immediately following the termination of the original Q-Sub election.

Letter Ruling 202033005 limited its rulings' scope:

This Office has made no determination regarding whether the Distribution (as defined below): (i) satisfies the business purpose requirement of Treas. Reg. § 1.355-2(b); (ii) is used principally as a device for the distribution of the earnings and profits of the Distributing corporation or the Controlled or both (see section 355(a)(1)(B) and Treas.

Reg. § 1.355-2(d)); or (iii) is part of a plan (or series of related transactions) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50-percent or greater interest in Distributing or Controlled, or any predecessor or successor of Distributing or Controlled, within the meaning of Treas. Reg. § 1.355-8T (see section 355(e)(2)(A)(ii) and Treas. Reg. § 1.355-7).

Letter Ruling 202244008 approved the split-up of subsidiaries in an affiliated group:

Parent directly owns all of the outstanding stock of Sub 1, a domestic corporation and a member of the Parent Group. Sub 1 engages in Business A1, Business A2, Business B, and Business C through its direct and indirect subsidiaries. Parent has submitted financial information in accordance with Rev. Proc. 2017-52 indicating that each of Business A1, Business A2, Business B, and Business C will have had gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years at the time of the Proposed Transaction. The direct and indirect subsidiaries of Sub 1 relevant to the Proposed Transactions are described below....

For what are represented to be valid business reasons, Sub 1 proposes to separate Business A1, Business A2, and Business B from Business C in the following steps, which will occur sequentially unless otherwise specified...

II.Q.7.f.ii.(g). The Active Trade or Business That Existed Five Years Before the Separation Must Exist After the Separation

The final requirement is that the active trade or business that existed five years before the separation must exist after the separation.⁵⁰⁵¹

This requirement will normally be easy to fulfill, as long as all other requirements are met, since corporations that meet the “active business” requirements will likely meet this requirement as well.

II.Q.7.f.iii. Active Business Requirement for Code § 355

The IRS and Treasury have provided significant guidance for what qualifies as an active business. Below is a history of some of the most important guidance.

II.Q.7.f.iii.(a). Farming

In Rev. Rul. 73-234, a corporation engaged in a farm operation as follows:

- The planting, raising, and harvesting of crops and the breeding and raising of livestock in the corporation’s farm operation are done by tenant farmers, acting as independent contractors. The tenant farmers are compensated by a share of the proceeds from the sale of all crops and livestock resulting from the farm operation. The corporation employs a general handyman to maintain the farm property and equipment.
- The corporation employs its sole shareholder and president to participate in the farm operation. He prefers to contract with tenant farmers who have experience with farm

⁵⁰⁵¹ Code § 355(b), Reg. § 1.355-2(h) and 1.355-3(b)(3). See also the last sentence of fn 5031 regarding proposed regulations under Reg. § 1.355-3.

machinery and livestock. He supplies all equipment and arranges for all financing necessary for the corporation's operation. With regard to the farm equipment, he engages a local mechanic for the maintenance and repair thereof that is not performed by the general handy-man or the tenant farmers.

- The president devotes significant time and effort to the corporation's farm business. He studies Federal price support and acreage reserve programs, plans all rotation, planting, and harvesting of crops, and purchases and plans the breeding of livestock. He hires seasonal workers and purchases farming equipment, is responsible for handling sales of all crops and livestock, and is responsible for accounting to the tenant farmers for their shares of the proceeds of the sales.

The IRS ruled that the corporation's farm activities included its direct performance of substantial management and operational functions, apart from those activities performed by the tenant farmers acting as independent contractors. Therefore, the corporation satisfied the active business requirements.

Rev. Rul. 86-126 explains that not all tenant farming qualifies as an active business. In that case:

- The sole officers and shareholders are both farmers who are engaged in the business of farming their own individual tracts of farmland not owned by the corporation, which holds title to large tracts of farmland elsewhere in the same state. Each tract of land held by the corporation is leased for one year at a time to a tenant farmer who has agreed with the corporation to share one-half of all income and expenses of the farm. Each party to the lease is responsible for securing the financing necessary to pay that party's share of expenses. In the case of each tract leased, the planting, raising, and harvesting of corn and soybeans (the only crops grown on these farms) are done by the tenant farmer. The tenant farmer also supplies the farm equipment used in these activities. The tenant farmer repairs and maintains the equipment, and also maintains the irrigation system, fences, and other fixtures located on the property. After consulting with the corporation's officers, the tenant farmer purchases all herbicides, insecticides, and fertilizers used on the property. Also after consulting with them, the tenant farmer contracts to sell the crops at a future date, or sells them when harvested. Each tenant farmer is responsible for accounting to the corporation's officers for the corporation's share of the proceeds.
- The officers each devote to substantial part of their time to the operation of their own respective farms which are unconnected with the farmland owned by the corporation. After completing work on their own properties, the officers occasionally inspect the crops and improvements located on each leased tract. If any corrective steps must be taken, an officer points out the problem to the tenant farmer, who makes the necessary corrections in the way the tenant farmer sees fit. The officers also decide each year what portion of each tract will be leased, in the light of soil conservation needs, market conditions, and federal price support and acreage reserve programs. They review each tenant farmer's accounting of operations and sales.

The IRS contrasted this situation with Rev. Rul. 73-234. In that case, the corporation was engaged in hiring seasonal workers, purchasing and supplying equipment, maintaining equipment, arranging financing, planning all rotation and planting and harvesting of crops, purchasing livestock, planning livestock breeding, selling all crops and livestock, and accounting to the tenant farmers for their shares of the proceeds. That corporate activity, carried on

through its own employees and constituting active and substantial managerial and operational activity, contrasts with the activity carried on by the employees of P in the present situation. Here, the IRS said, the corporation either did not engage in the above activities at all, or engaged in them only on a limited basis. At best, it said, the corporation could be considered to engage in some managerial and operational activity but not enough to “qualitatively distinguish its operations from mere investments.”

Because of the absence of active and substantial operational and managerial activities, the corporation did not satisfy the active business requirement.

II.Q.7.f.iii.(b). Rev. Rul. 79-394 – Commercial Real Estate

In this ruling, the stock of corporation P is owned by four unrelated individuals. For over five years, P has owned all the stock of corporations X and Y. During that period, P has acted solely as a holding company, X has been engaged in the general contracting business, and Y has been engaged in renting its commercial and residential real estate to unrelated third parties. X’s employees have performed all operational activities in connection with Y’s rental business. X has paid its employees for these services and has been reimbursed by Y. Y’s three officers, who are also officers of P and X, supervise, control and direct the employees of X performing work for Y. Y’s officers receive no compensation from Y for the amount of their time devoted to the management and supervision of Y’s affairs. These officers are paid only by P and X, and P and X have been reimbursed by Y for the services rendered by the officers to Y.

Y holds title to several commercial and residential rental buildings and associated realty. Y, through its officers and X’s employees, continuously seeks additional property of a similar nature for expansion of its rental business. When property is located, Y negotiates its purchase and required financing. Y is primarily obligated on the mortgages relating to its property and pays the principal and interest due thereon. Newly acquired buildings are renovated or altered to reflect the design by Y of custom floor plans that make the property suitable for rental. Y periodically repaints and refurbishes its existing property.

Y endeavors to keep its property rented at all times. When new property is available or when existing property is vacated, Y immediately advertises to attract new tenants. Y verifies the information contained in a prospective tenant’s application and negotiates the lease provisions.

Pursuant to the terms of its leases, Y provides and pays for gas, water, electricity, sewage, and insurance for the property and pays the taxes assessed thereon. Moreover, the lease agreements require Y to provide day-to-day maintenance and repair services. These services include insect control, janitorial service, trash collection, ground maintenance, and heating, air conditioning and plumbing maintenance. Y routinely inspects its properties.

Y maintains separate records and accounts to reflect income and expenses relating to each of Y’s rental properties as well as Y’s general expenses.

Y’s above described activity in acquiring, renovating, refurbishing, maintaining, servicing and leasing its rental property is accomplished under the supervision and control of Y’s officers using the employees of X.

For valid business reasons, P proposes to distribute all of the Y stock to one of its shareholders solely in exchange for all of that shareholder’s P stock in a transaction intended to be tax-free

under Code § 355(a). The fair market value of the Y stock to be distributed and the P stock to be surrendered in the exchange are equal.

After the proposed distribution, Y will continue its rental activities as discussed above, and will directly employ, on a full-time basis, most of those employees who have worked on its behalf before the distribution.

The IRS held that Y was engaged in the active conduct of a trade or business under Code § 355(b) for the five-year period preceding distribution of its stock, notwithstanding the fact that during that period it had no employees other than its officers. Moreover, Y will be engaged immediately after the distribution in the active conduct of a trade or business.

The IRS viewed the only factor tending to prove the lack of a pre-distribution active trade or business conducted by Y to be the absence of salaried employees of Y. The IRS reasoned that, given the nature of Y's conduct of its pre-distribution rental operations and the existence of substantial objective factors that otherwise adequately demonstrate the active conduct of a trade or business, Y's failure to have salaried employees should not, without more, result in failure to meet the Code § 355(b) active trade or business requirement. However, the IRS further stated that the presence or absence of formal employment of employees other than officers, in the distributing corporation or the controlled corporation, will be one factor for consideration in making this determination under Code § 355(b).

II.Q.7.f.iii.(c). Rev. Rul. 80-181 – Reimbursement for Services

The IRS amplified Rev. Rul. 79-394, ruling that the Code § 355(b) active trade or business requirement is satisfied even if Y does not reimburse P and X for the use of their employees and officers in the conduct of Y's real estate activities.

The IRS pointed out, however, that, if Y did not reimburse X and P for the services that X's employees and X's and P's officers rendered to Y, then the IRS would apply Code § 482 to allocate income to X and P in an amount equal to an arm's length charge for the services rendered by the employees of X and the officers of X and P to Y. Y would then deduct the amounts deemed paid by Y to X and P for the services rendered.

II.Q.7.f.iii.(d). Rev. Rul. 92-17 – Participation by Partners in Rental LP

For more than 5 years, limited partnership LP has owned several commercial office buildings that are leased to unrelated third parties. Corporation D has owned a 20% interest in LP for more than 5 years, and throughout that period of time D has been a general partner of LP. The partnership agreement requires that D, as a general partner, provide the managerial services to LP necessary to operate LP's rental business. For more than 5 years, D has owned all the stock of C, a corporation which has been actively engaged for more than 5 years in the conduct of a trade or business that is unrelated to D's activities.

LP continuously seeks additional properties to expand its rental business. When a property is located, LP negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LP periodically repaints and refurbishes its existing properties.

LP's leases require LP to provide day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing

repair, and insect control. Additionally, LP advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LP also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LP's general expenses.

LP has conducted these activities for more than five years. Officers of D form active and substantial management functions with respect to LP's activities, including making significant business decisions of the partnership (e.g., decisions with respect to significant renovations of partnership properties, the purchase and sale of properties, and significant financings and refinancings). In addition, D's officers regularly participate in the overall supervision, direction and control of LP's employees in their performance of LP's operational functions.

For a valid business purpose, D proposes to distribute all its C stock pro rata to D's shareholders in a transaction intended to satisfy Code § 355. After the distribution, officers of D will continue to provide LP with the services described above.

Except for the issue of whether the activities performed by D in connection with the operation of LP's rental business constitute an active trade or business, the transaction will otherwise meet all the requirements of Code § 355.

The IRS held that, if officers of a corporation that is a general partner in a limited partnership perform active and substantial management functions for the partnership, including making significant business decisions of the partnership and regular participation in the overall supervision, direction and control of the employees of the partnership in operating the partnership's rental business, the corporation is engaged in the active conduct of a trade or business under Code § 355(b) and the distribution of the stock of C by D to D's shareholders is tax-free to the D shareholders under section 355.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not mean that each partner in the partnership is considered to engage in the active conduct of a trade or business for purposes of Code § 355(b). It stated that whether a partner is considered to engage in the active conduct of a trade or business must be made with reference to the activities of the partner as well as the partnership.

It further reasoned that, D, like Y in Rev. Rul. 79-394, performs through its officers and the employees of LP significant services with respect to the operation and management of LP's rental business. The only factor tending to prove that D has not been engaged in the active conduct of a trade or business is D's lack of employees to perform the operational services necessary to operate LP's office buildings. However, this factor, standing alone, will not cause D to fail the Code § 355(b) active trade or business test.

II.Q.7.f.iii.(e). Rev. Rul. 2007-42 – Level of Participation in Rental LLC

The IRS contrasted two situations in which a corporation (D) owns a membership interest in an LLC taxed as a partnership, holding that in one case D was deemed engaged in the active conduct of a trade or business and the other case D was not deemed to be so engaged.

In Situation 1, D was deemed to be engaged in the active conduct of a trade or business. For more than five years, LLC owned several commercial office buildings that are leased to unrelated third parties. LLC has one class of membership interests outstanding. For more than five years, D has owned a 33.3% membership interest in LLC and has owned all the stock of a subsidiary (C), a corporation that has been engaged for more than five years in the active conduct of a trade or business that is unrelated to D's activities.

LLC continuously seeks additional properties to expand its rental business. When a property is located, LLC negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LLC periodically repaints and refurbishes its existing properties.

Pursuant to the terms of its leases, LLC provides day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing repair, and insect control. Additionally, LLC advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LLC also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LLC's general expenses.

The above described activities of LLC have been conducted for more than five years. The employees of LLC perform all management and operational functions with respect to LLC's rental business. Neither D nor any other member of LLC performs services with respect to LLC's business.

The IRS ruled that D is engaged in the active conduct of LLC's rental business for purposes of Code § 355(b) because D owns a significant interest in LLC and LLC performs the required activities that constitute an active trade or business under the regulations.

In Situation 2, the facts are the same as Situation 1 except that D owns a 20% membership interest in LLC. The IRS ruled that D was not engaged in the active conduct of LLC's rental business for purposes of Code § 355(b) because a 20% interest was not sufficiently significant.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not necessarily mean that each partner in the partnership is considered to be engaged in the active conduct of a trade or business for purposes of Code § 355(b). In such a case, the determination of whether a partner is considered to be engaged in the active conduct of a trade or business must be based on the requirements of Code § 355 and the regulations thereunder taking into account the activities of the partner (if any), the partner's interest in the partnership, and the activities of the partnership.

Although Rev. Rul. 92-17 viewed a 20% interest in a partnership to be sufficient, in that case the corporate partner performed management functions. The IRS pointed out that D's officers performed active and substantial management functions with respect to LP, including the significant business decision-making of the partnership, and regularly participated in the overall supervision, direction, and control of LP's employees in operating LP's rental business. Rev. Rul. 2002-49 reached a similar conclusion where D and another corporation (X) each own a 20% interest in a member-managed LLC and D and X jointly managed the LLC's business.

The IRS looked to Reg. § 1.368-1(d)(4)(iii)(B) to validate its position that a one-third interest was sufficient to impute activity to a partner that does not perform active and substantial management functions for the business of the partnership. That regulation, regarding the continuity of business enterprise requirement applicable to corporate reorganizations, provides that the issuing corporation will be treated as conducting a business of a partnership if members of the qualified group, in the aggregate, own an interest in the partnership representing a significant interest in that partnership business.

II.Q.7.f.iii.(f). Proposed Regulations on Active Conduct of Business

Recent proposed regulations would provide that, for purposes of the active conduct of a business rule, a partner in a partnership will be attributed the trade or business assets and activities of that partnership during the period that such partner satisfies the requirements; however: the stock of a corporation owned by the partnership is not attributed to a partner; for purposes of determining the activities that are conducted by the partnership that may be attributed to the partner, the activities of independent contractors, and partners that are not affiliates of the partner, are not taken into account; and, generally, the activities of partners that are affiliates of the partner are only taken into account during the period that such partners are affiliates of the partner.⁵⁰⁵² The trade or business assets and activities of a partnership will be attributed to a partner if the partner owns a **significant** interest in the partnership.⁵⁰⁵³ Generally, the trade or business assets and activities of a partnership will be attributed to a partner if the partner performs active and substantial management functions for the partnership with respect to the trade or business assets and activities (for example, makes decisions regarding significant business issues of the partnership and regularly participates in the overall supervision, direction, and control of the employees performing the operational functions for the partnership), and the partner owns a **meaningful** interest in the partnership.⁵⁰⁵⁴

Examples illustrate these concepts:⁵⁰⁵⁵

Example (8). Jointly owned partnership. For more than five years, D has owned all of the stock of C, and D and C each have owned a 17-percent interest in Partnership. Throughout this period, D and Partnership have engaged in the active conduct of ATB1 and ATB2, respectively. In year 6, D transfers its 17-percent interest in Partnership to C and distributes all of the C stock to the D shareholders. Because D owns Code § 1504(a)(2) stock of C, D and C are treated as one corporation for purposes of determining whether D and C are engaged in the active conduct of a trade or business.⁵⁰⁵⁶ Accordingly, throughout the pre-distribution period, D and C are each treated as owning a 34-percent interest in Partnership, and both D and C are treated as engaged in the active conduct of both ATB1 and ATB2 throughout the pre-distribution period.⁵⁰⁵⁷ The transfer of the Partnership interest is disregarded.⁵⁰⁵⁸ After the distribution, C owns 34% of Partnership and is therefore engaged in the active conduct of ATB2.⁵⁰⁵⁹ Therefore, both D and C satisfy Code § 355(b).

⁵⁰⁵² Prop. Reg. § 1.355-3(b)(2)(v)(A).

⁵⁰⁵³ Prop. Reg. § 1.355-3(b)(2)(v)(B).

⁵⁰⁵⁴ Prop. Reg. § 1.355-3(b)(2)(v)(C).

⁵⁰⁵⁵ Prop. Reg. § 1.355-3(d)(2).

⁵⁰⁵⁶ Prop. Reg. § 1.355-3(b)(1)(ii).

⁵⁰⁵⁷ Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).

⁵⁰⁵⁸ Prop. Reg. § 1.355-3(b)(1)(ii).

⁵⁰⁵⁹ Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).

Example (22). Partnership—meaningful but not significant. For more than five years, unrelated X and Y have owned a 20% and one-third interests, respectively, in Partnership. The remaining interests in Partnership are owned by unrelated parties. For more than five years, Partnership has manufactured power equipment. But for the performance of all its management functions by employees of X, Partnership would satisfy all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X and/or Y will be attributed the trade or business assets and activities of Partnership only if the corporation satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C).⁵⁰⁶⁰ While X does not satisfy the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) because X's interest in Partnership is not significant, under Prop. Reg. § 1.355-3(b)(2)(v)(C), X owns a meaningful interest in Partnership and performs active and substantial management functions for the trade or business assets and activities of Partnership. Therefore, X is attributed the trade or business assets and activities of Partnership. Accordingly, X is engaged in the active conduct of the business of manufacturing power equipment.⁵⁰⁶¹ In determining whether Y is engaged in the business of manufacturing power equipment, the management functions performed by X for Partnership are not taken into account.⁵⁰⁶² Therefore, although Y is attributed Partnership's trade or business assets and activities under Prop. Reg. § 1.355-3(b)(2)(v)(B) because Y owns a significant interest in Partnership, Y is not engaged in the business of manufacturing power equipment because neither Y nor Partnership perform any management functions for the business.⁵⁰⁶³

Example (23). Partnership—significant but not meaningful. The facts are the same as Example 22 except that all the management functions related to the business of Partnership are performed by employees of Partnership. Because employees of Partnership perform all of the management functions related to the trade or business assets and activities of manufacturing power equipment, Partnership itself satisfies all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X neither owns a significant interest in Partnership nor performs active and substantial management functions with respect to the trade or business assets and activities of Partnership. Accordingly, X does not satisfy the requirements Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C), X is not attributed the trade or business assets and activities of Partnership's business of manufacturing power equipment, and X is not engaged in the active conduct of the business of manufacturing power equipment. On the other hand, because Y owns a significant interest in Partnership, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B). Therefore, Y is attributed the trade or business assets and activities of Partnership's business. Accordingly, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(i) and is engaged in the active conduct of the business of manufacturing power equipment.

Example (24). Partnership—significant by many. The facts are the same as Example 23 except that X, Y, and Z each own a one-third interest in Partnership. Because X, Y, and Z each own a significant interest in Partnership, each of X, Y, and Z satisfies the requirements of Reg. § 1.355-3(b)(2)(v)(B). Accordingly, each of X, Y, and Z is attributed the trade or business assets and activities of Partnership, satisfies the requirements of Reg. § 1.355-3(b)(2)(i), and is engaged in the active conduct of the business of manufacturing power equipment.

⁵⁰⁶⁰ Prop. Reg. § 1.355-3(b)(2)(v)(A).

⁵⁰⁶¹ Prop. Reg. § 1.355-3(b)(2).

⁵⁰⁶² Prop. Reg. § 1.355-3(b)(2)(v)(A).

⁵⁰⁶³ Prop. Reg. § 1.355-3(b)(2)(iii).

II.Q.7.f.iii.(g). Combining Split Up with Sale to Irrevocable Grantor Trust

While we waited for those proposed regulations to be finalized, Letter Ruling 200842003 was issued, providing an excellent example of how a family business can be divided and then sold using a sale to a separate irrevocable grantor trust for each adult child. First, the parent split the corporation into five different entities. Then, the parent sold an interest in each entity to a different irrevocable grantor trust for a different child. Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes. Below are details excerpted from the ruling.

Distributing is a C corporation. Less than 10 years ago, Distributing elected taxation as an S corporation. Distributing has two classes of common stock that differ only by the number of votes per share. All of the Distributing stock is owned by one family. Shareholder 5 is the parent of each of Shareholders 1 through 4. The parent and the children own the Series A stock. The children own the Series B stock. The parent is the majority shareholder of Distributing.

Distributing has directly had gross receipts and operating expenses representative of the active conduct of a trade or business for each of the past five years.

For what are represented to be valid business reasons, Distributing has proposed the following transactions (the "Proposed Transactions"):

- (i) Distributing will create Controlled 1, Controlled 2, Controlled 3, and Controlled 4 (collectively, the "Controlled corporations").
- (ii) Distributing will transfer all of its assets to the Controlled corporations in exchange for all of the stock of each of the Controlled corporations and the assumption by each of the Controlled corporations of the liabilities associated with the assets transferred (collectively, the "Contributions").
- (iii) Distributing will distribute pro rata all of its stock in each of the Controlled corporations to Shareholders 1 through 5 in exchange for all of the stock of Distributing held by Shareholders 1 through 5 (collectively, the "Distributions"). Each of the Controlled corporations will make an S election on the first available date after the Distributions.
- (iv) Distributing will liquidate.

Shareholder 5 will establish four irrevocable grantor trusts: Trust 1, Trust 2, Trust 3, and Trust 4 (collectively, the "Trusts"). Distributing represents that Shareholder 5 will be the grantor of each of the Trusts and will be treated as the owner of each Trust's assets under Code § 671. Shareholder 1 will be the sole beneficiary of Trust 1, Shareholder 2 will be the sole beneficiary of Trust 2, Shareholder 3 will be the sole beneficiary of Trust 3, and Shareholder 4 will be the sole beneficiary of Trust 4.

Shareholder 5 will transfer e% of her stock in Controlled 1 to Trust 1, e% of her stock in Controlled 2 to Trust 2, e% of her stock in Controlled 3 to Trust 3, and e% of her stock in Controlled 4 to Trust 4 (the "Gift Transactions"). Shareholder 5 will sell f% of her stock in Controlled 1 to Trust 1, f % of her stock in Controlled 2 to Trust 2, f% of her stock in Controlled 3 to Trust 3, and f% of her stock in Controlled 4 to Trust 4 in exchange for promissory notes from

each Trust (the "Sale Transactions"). Distributing has represented that the Gift Transactions and the Sale Transactions are disregarded for federal income tax purposes.

Shareholder 5's estate plan provides that her ownership interests in each of the Controlled corporations will be separated, so that Shareholder 1 will only inherit the stock of Controlled 1, Shareholder 2 will only inherit the stock of Controlled 2, Shareholder 3 will only inherit the stock of Controlled 3, and Shareholder 4 will only inherit the stock of Controlled 4.

The taxpayer made the following representations regarding the Proposed Transactions:

- (a) Neither the business nor control of any entity conducting this business was acquired during the five-year period ending on the date of the Distributions in a transaction in which gain or loss was recognized (or treated as recognized) in whole or in part.
- (b) The fair market value of the stock of each of the Controlled corporations to be received by each shareholder of Distributing will be approximately equal to the fair market value of the Distributing stock surrendered by each shareholder in exchange therefor.
- (c) No part of the consideration to be distributed by Distributing will be received by a shareholder as a creditor, employee, or in any capacity other than that of a shareholder of the corporation.
- (d) Following the Proposed Transactions, the Controlled corporations will each continue, independently and with its separate employees, the active conduct of its share of all the integrated activities of Business D conducted by Distributing prior to consummation of the Proposed Transactions.
- (e) The distribution of the stock of each of the Controlled corporations is carried out for the following corporate business purposes: (1) to implement business succession planning; and (2) to avoid shareholder deadlock after implementation of the plan by allowing each shareholder in the post-transition structure to independently manage his or her portion of Distributing's business.
- (f) The Proposed Transactions are not used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations.
- (g) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of Distributing stock entitled to vote or 50% or more of the total value of shares of all classes of Distributing stock, that was acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.
- (h) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of any Controlled stock entitled to vote or 50% or more of the total value of the shares of all classes of any Controlled stock, that was either (i) acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distribution, or (ii) attributable to distributions on Distributing stock that was acquired by

purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.

- (i) Any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporations in the Proposed Transactions were incurred in the ordinary course of business and are associated with the assets being transferred.
- (j) With respect to each Contribution to a Controlled corporation, the total adjusted bases and the total fair market value of the assets transferred to the Controlled corporation by Distributing in the Proposed Transactions will exceed the sum of the amount of any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporation in the exchange.
- (k) No intercorporate debt will exist between Distributing and any of the Controlled corporations at the time of, or subsequent to, the Distributions.
- (l) Payments made in connection with all continuing transactions, if any, between any of the Controlled corporations will be for fair market value based on terms and conditions arrived at by the parties bargaining at arm's length.
- (m) No parties to the Proposed Transactions are investment companies as defined in Code § 368(a)(2)(F)(iii) and (iv).
- (n) The Distributions are not part of a plan or series of related transactions (within the meaning of Treas. Reg. § 1.355-7) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50% or greater interest (within the meaning of Code § 355(d)(4)) in either Distributing or any of the Controlled corporations (including any predecessor or successor of Distributing or any of the Controlled corporations).
- (o) Immediately after the Distributions, either (i) no person will hold a 50% or greater interest (within the meaning of Code § 355(g)) in the stock of Distributing or any of the Controlled corporations who did not hold such an interest immediately before the distribution, or (ii) neither Distributing nor any of the Controlled corporations will be a disqualified investment corporation (within the meaning of Code § 355(g)(2)).

The IRS ruled as follows:

- (1) Each Contribution, together with its respective Distribution, will be a reorganization within the meaning of Code § 368(a)(1)(D). With respect to each such reorganization, Distributing and the respective Controlled corporation will be "a party to a reorganization" within the meaning of Code § 368(b).
- (2) No gain or loss will be recognized by Distributing on the Contributions (Code § 357(a) and 361(a)).
- (3) No gain or loss will be recognized by any of the Controlled corporations on the Contributions (Code § 1032(a)).
- (4) The basis of each asset received by each of the Controlled corporations in the Contributions will equal the basis of that asset in the hands of Distributing immediately before the Contributions (Code § 362(b)).

- (5) The holding period of each asset received by each of the Controlled corporations in the Contributions will include the period during which Distributing held the asset (Code § 1223(2)).
- (6) No gain or loss will be recognized by (and no amount will be included in the income of) Shareholder 1, Shareholder 2, Shareholder 3, Shareholder 4, or Shareholder 5 on their receipt solely of the stock of the Controlled corporations in the Distributions (Code § 355(a)).
- (7) No gain or loss will be recognized by Distributing in connection with the Distributions (Code § 361(c)(1)).
- (8) With respect to each of Shareholders 1 through 5, the aggregate basis of the stock of the Controlled corporations in their hands after the Distributions will equal the aggregate basis of the Distributing stock surrendered in exchange therefor, and this aggregate basis will be allocated between the stock of the Controlled corporations in proportion to the fair market value of each immediately following the Distributions in accordance with Treas. Reg. § 1.358-2(a) (Code § 358(a) and (b)(2)).
- (9) The holding period of the stock in each of the Controlled corporations received by each of Shareholders 1 through 5 in the Distributions will include the holding period of the Distributing stock surrendered in exchange therefor, provided the Distributing stock was held as a capital asset on the date of the Distributions (Code § 1223(1)).
- (10) The earnings and profits of Distributing (if any) will be allocated to each of the Controlled corporations in accordance with Code § 312(h) and Treas. Reg. section 1.312-10(a).
- (11) Each of the Controlled corporations will be subject to Code § 1374 with respect to any asset transferred from Distributing to the Controlled corporations to the same extent Distributing was subject to Code § 1374 with respect to such asset. For purposes of Code § 1374, the recognition period of each of the Controlled corporations will be reduced by the portion of Distributing's recognition period that expires prior to Distributing's transfer of the assets (Code § 1374(d)(8) and IRS Ann. 86-128).

The IRS specifically expressed no opinion regarding:

- (i) Whether the Distributions satisfy the business purpose requirement of Treas. Reg. § 1.355-2(b);
- (ii) Whether the Distributions are used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations;
- (iii) Whether the Proposed Transactions are part of a plan (or series of related transactions) under Code § 355(e)(2)(A)(ii);
- (iv) Whether Distributing's election to be taxed as a subchapter S corporation is valid; whether the Controlled corporations are otherwise eligible to be taxed as subchapter S corporations; and whether the Controlled corporations' elections to be taxed as subchapter S corporations will be valid under Code § 1362(a);

- (v) The gift and estate tax treatment of the proposed transactions, including whether the Gift Transactions and the Sale Transactions constitute separate transactions for gift tax purposes and the extent to which the Gift Transactions and the Sale Transactions constitute transfers for adequate consideration in money or money's worth; and
- (vi) Whether the Trusts are trusts grantor trusts.

II.Q.7.f.iii.(h). Other Estate Planning Applications of Split Ups

Other letter rulings involving Code § 355 transactions in estate planning situations include:

- Letter Ruling 200850018 (Code § 303 redemption)
- Letter Ruling 200809017 (two families)
- Letter Ruling 200645010 (two locations)
- Letter Ruling 200645010 (three subsidiaries)

II.Q.7.f.iv. Tax Effects When Code § 355 Provisions Are Not Met

If a corporation might not be able to satisfy Code § 355, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division to avoid the consequences described in this part II.Q.7.f.iv.

II.Q.7.f.iv.(a). Distributing Corporation

In a number of situations, a distributing corporation may have to recognize gain on a distribution that would otherwise qualify as tax-free, Code § 355 distribution.⁵⁰⁶⁴ The first of these exceptions to the non-recognition rule is the “disguised sale” rule of Code § 355(c)(2), as modified by Code § 355(d). Code § 355(c)(2) requires the distributing corporation to recognize gain when it distributes property, other than stock of the controlled corporation, if the fair market value of the property exceeds its adjusted basis.⁵⁰⁶⁵ Code § 355(d) applies to certain distributions of the controlled corporation's stock, and requires that the distributing corporation recognize gain if any one person holds a 50% or greater interest in disqualified stock in either the distributing or controlled corporation after the distribution.⁵⁰⁶⁶ In family business situations, often the majority shareholder (usually the founder) has owned the business for more than five years. Additionally, even if the founder has transferred equity in the business within the past five years through gifts or through a transfer at death, the disguised sale rule still will not apply, since they only apply to purchase transfers.⁵⁰⁶⁷

⁵⁰⁶⁴ Code § 355(c)(2).

⁵⁰⁶⁵ Code § 355(c)(2)(A)(ii). The distributing corporation is taxed as if it had sold the property to the distributee at fair market value. Code § 355(c)(2)(A) (flush language).

⁵⁰⁶⁶ Code § 355(d)(2). Under Code § 355(d)(4), the 50% or greater interest means stock possessing at least 50% of the total combined voting power of all classes of stock entitled to vote or at least 50% of the total value of shares of all classes of stock. Disqualified stock is defined in Code § 355(d)(3) as any stock of the distributing corporation acquired by purchase during the five year period leading up to the distribution and as any stock in the controlled corporation that was acquired by purchase in the five years leading up to the distribution or by distribution on disqualified stock in the distributing corporation.

⁵⁰⁶⁷ Reg. § 1.355-6(d)(1)(i)(A).

Code § 355(e) is similar to Code § 355(d), but applies when distributions are part of a plan in which one or more persons will acquire 50% or greater interest in either the distributing or controlled corporation.⁵⁰⁶⁸ No five year requirement similar to Code § 355(d) applies, but if one or more persons acquires the 50% or greater interest in either corporation within two years before or after the distribution, then the transaction is considered to be “pursuant to a plan.”⁵⁰⁶⁹ Additionally, Code § 355(e) makes no distinction between transfers made for consideration and those made for no consideration. However, to prevent Code § 355(e) from making tax-free corporation division impossible, a number of exceptions limit what is considered an “acquisition” for Code § 355(e) purposes. For example, Code § 355(e)(3)(A)(i) states that the acquisition of stock in a controlled corporation by a distributing corporation will not be taken into account for Code § 355(e) purposes. Reg. § 1.355-8 fleshes out these rules some and describes the gain resulting from applying these rules.⁵⁰⁷⁰ Additionally, in most family businesses, Code § 355(e) will not be an issue because of a related party provision similar to the one present in Code § 355(d), causing all stock owned by family members to be treated as owned by one person.⁵⁰⁷¹ The only time that Code § 355(e) is likely to come into play in family business succession planning would be in cases where the founder plans to shift ownership to second generation family members who are not lineal descendants of the founder. In such cases, additional planning needs to be done to ensure the transfers and tax-free division will not be considered “pursuant to a plan.”

All of the above assumes that the distribution satisfies the requirements of Code § 355 but for the conditions described above. If a transaction does not fit above, consider whether other tax-free provisions apply; otherwise, consider whether the distributing corporation might be taxed on the distribution, as provided in part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

II.Q.7.f.iv.(b). Controlled Corporation

Regardless of whether Code § 355 is met, the controlled corporation will not recognize gain or loss on a corporate division.⁵⁰⁷² Thus, the controlled corporation’s basis in the property distributed to it by the distributing corporation before the distribution of the controlled corporation’s stock will be equal to the property’s basis in the hands of the distributing corporation, increased by any gain recognized by the distributing corporation on the transfer.⁵⁰⁷³ When such property distributions are made to the controlled corporation, the distributing corporation must allocate part of its earnings and profits to the controlled corporation.⁵⁰⁷⁴ This allocation will generally be made in proportion to the fair market value of the business and property interests retained by the distributing corporation and the business and property interests of the controlled corporation immediately after the distributions.⁵⁰⁷⁵

⁵⁰⁶⁸ Code § 355(e)(2)(A); see Reg. § 1.355-7.

⁵⁰⁶⁹ Code § 355(e)(2)(B).

⁵⁰⁷⁰ T.D. 9888 (12/17/2019).

⁵⁰⁷¹ Code § 355(e)(4)(C)(i).

⁵⁰⁷² Code § 118(a).

⁵⁰⁷³ Code § 362(b). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.

⁵⁰⁷⁴ Reg. § 1.312-10(a). However, a distributing corporation’s unused NOL carryover will not be allocated to the controlled corporation. Rev. Rul. 77-133.

⁵⁰⁷⁵ Reg. § 1.312-10(a).

II.Q.7.f.iv.(c). Shareholders

Generally speaking, shareholders of the distributing and controlled corporations will not recognize any gain or loss on the receipt of the controlled corporation's stock in a Code § 355 division. However, if the shareholders of the controlled corporation receive "boot" in addition to stock, then they will have to recognize some gain. This situation will arise when a controlled corporation's shareholder receives other property or money, in addition to the controlled corporation's stock, so that the amount received is equal to the fair market value of the stock the shareholder gave up in the distributing corporation. When this occurs, the shareholder must recognize gain, but not more than the sum of the fair market value of other property and money received.⁵⁰⁷⁶ This type of distribution could also lead to gift tax consequences if one of the shareholders receives more stock than he would have been entitled to, based on his original ownership in the distributing corporation. If the proper donative intent exists, the shareholder may be deemed to have received a gift from the other shareholders. Thus, it is important to make sure that when a shareholder receives more than he was entitled to (based on his ownership), the transfer is properly documented so that it is clear whether there was any intent to gift and the transfer can be properly taxed.

The total basis of all shareholders' stock in the distributing and controlled corporation after the division will be the same as the total basis of all shareholders' stock in the distributing corporation before the division, increased by gain or other income each shareholder recognized and reduced by returns of capital each shareholder received or loss recognized.⁵⁰⁷⁷ However, each individual shareholder's basis may be different before and after the division and must be recalculated after the division. The shareholder's basis is allocated among stock held after the distribution in based on each share's fair market value relative to the fair market value of all shares.⁵⁰⁷⁸

II.Q.7.g. Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill)

Generally, a sale or exchange of property, directly or indirectly,⁵⁰⁷⁹ between related persons, will treat as ordinary income any gain recognized to the transferor if such property is depreciable or amortizable property in the hands of the transferee.⁵⁰⁸⁰ Also beware similar issues relating to patents.⁵⁰⁸¹

In this context, "related persons" means:⁵⁰⁸²

- a person and all entities which are controlled entities with respect to such person,

⁵⁰⁷⁶ Code § 356(a)(1).

⁵⁰⁷⁷ Code § 358(a)(1).

⁵⁰⁷⁸ Reg. § 1.358-2(a)(2).

⁵⁰⁷⁹ Boot received in a Code § 351 transaction triggered Code § 1239 in *Fish v. Commissioner*, T.C. Memo. 2013-270 (QSSS status terminated when the subsidiary gained another shareholder, causing the parent to be deemed to have transferred the former QSSS' assets to the subsidiary in a Code § 351 transaction).

⁵⁰⁸⁰ Code § 1239(a).

⁵⁰⁸¹ See part II.G.18.c Patents, especially fn. 1693.

⁵⁰⁸² Code § 1239(b).

- a taxpayer and any trust in which such taxpayer (or his spouse) is a beneficiary, unless such beneficiary's interest in the trust is a remote contingent interest,⁵⁰⁸³ and
- except in the case of a sale or exchange in satisfaction of a pecuniary bequest, an executor of an estate and a beneficiary of such estate.

As used above, "controlled entity" means, with respect to any person:⁵⁰⁸⁴

- a corporation more than 50% of the value of the outstanding stock of which is owned (directly or indirectly) by or for such person,⁵⁰⁸⁵
- a partnership more than 50% of the capital interest or profits interest in which is owned (directly or indirectly) by or for such person, and
- any entity which is a related person to such person under certain attribution rules.⁵⁰⁸⁶

The Code § 267(c) constructive ownership rules apply in determining ownership,⁵⁰⁸⁷ including to attribute ownership between individuals⁵⁰⁸⁸ who are family members.⁵⁰⁸⁹ In addition, stock owned by a trust is considered as being owned proportionately by its beneficiaries.⁵⁰⁹⁰ However, nothing in Code § 267(c) attributes to a trust stock owned by its beneficiaries. Although stock owned by children would be attributed to each other,⁵⁰⁹¹ that ownership would flow to the trusts. Therefore, even though a corporation would be a controlled entity with respect to each of children, it would not be a controlled entity with respect to any trust owning no more than 50% of the value of its stock.

Therefore, if stock in an S corporation is distributed to separate taxpayer trusts for children after the surviving spouse's death so that no trust owns more than 50% of the value of its stock, the children's trusts can liquidate the corporation, and each trust can receive its own property (instead of a tenant-in-common interest in every corporate asset) so it can make its own investment decision separately after the liquidation. Depending on the situation,⁵⁰⁹² the trust may need to make an ESBT election.⁵⁰⁹³

⁵⁰⁸³ Within the meaning of Code § 318(a)(3)(B)(i). For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

⁵⁰⁸⁴ Code § 1239(c)(1).

⁵⁰⁸⁵ A requirement to elect an independent director does not cause the shareholder's voting power to drop below this threshold. *Fish v. Commissioner*, T.C. Memo. 2013-270.

⁵⁰⁸⁶ Code § 267(b)(3), (10), (11), or (12).

⁵⁰⁸⁷ Code § 1239(c)(2), applying Code § 267(c) (other than Code § 267(c)(3)) for purposes of Code § 1239. See part II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses.

⁵⁰⁸⁸ Code § 267(c)(2).

⁵⁰⁸⁹ Code § 1239(c)(2), which applies Code § 267(c) without applying Code § 267(c)(3).

⁵⁰⁹⁰ Code § 267(c)(1).

⁵⁰⁹¹ Code § 267(c)(2).

⁵⁰⁹² See part III.A.3.c.ii Flowchart of Testamentary Trusts (Trusts Created on Grantor's Death or Continued after QSST Beneficiary's Death).

⁵⁰⁹³ See part III.A.3.e.ii Electing Small Business Trusts (ESBTs). If a child's trust is a QSST, generally K-1 income is taxable to the child as the deemed owner (which would raise concerns about child-to-child attribution), but K-1 income counts as trust income (instead of beneficiary deemed-owned income) if and to the extent it is from the actual or deemed sale of assets in connection with a sale or liquidation of the corporation; see fns 6018 and 6019 in part III.A.3.e.i.(a) QSSTs Generally.

Code § 1239 applies not only to depreciable property but also to “an amortizable section 197 intangible.”⁵⁰⁹⁴ A “section 197 intangible” includes goodwill,⁵⁰⁹⁵ going concern value,⁵⁰⁹⁶ workforce in place,⁵⁰⁹⁷ any information base,⁵⁰⁹⁸ know-how,⁵⁰⁹⁹ customer-based intangibles,⁵¹⁰⁰ supplier-based intangibles,⁵¹⁰¹ any license, permit, or other right granted by a governmental unit (even if the right is granted for an indefinite period or is reasonably expected to be renewed for an indefinite period), any covenant not to compete, any franchise, trademark, or trade name, and any right under a license, contract, or other arrangement providing for the use of property described above.⁵¹⁰²

Does Code § 1239 apply to the sale of goodwill? This rule applies only if these assets are “amortizable.” However, amortizable section 197 intangibles do not include any intangible created by the taxpayer (a self-created intangible).⁵¹⁰³ On the other hand, the exception for self-created intangibles does not apply to any intangible created in connection with the purchase of a business.⁵¹⁰⁴ Does the sale of a business transform self-created intangibles into amortizable section 197 intangibles at the time of the sale, so that Code § 1239 applies?⁵¹⁰⁵ The Tax Court has held that Code § 1239 applies to gain if the property is an amortizable section 197 intangible in the transferee’s hands.⁵¹⁰⁶ (Also note that goodwill that is not being amortized and

⁵⁰⁹⁴ Code § 197(f)(7); Reg. § 1.197-2(g)(8) (which is also consistent with the Joint Committee of Taxation report).

⁵⁰⁹⁵ In this context, the value of a trade or business attributable to the expectancy of continued customer patronage, which expectancy may be due to the name or reputation of a trade or business or any other factor.

⁵⁰⁹⁶ In this context, the additional value that attaches to property by reason of its existence as an integral part of an ongoing business activity, including the value attributable to the ability of a business to continue functioning or generating income without interruption notwithstanding a change in ownership, as well as the use of the revenues or net earnings that otherwise would not be received during any period if the acquired trade or business were not available or operational.

⁵⁰⁹⁷ This includes the existence of a highly-skilled workforce, any existing employment contracts, or a relationship with employees or consultants.

⁵⁰⁹⁸ This includes the intangible value of technical manuals, training manuals or programs, data files, and accounting or inventory control systems, customer lists, subscription lists, insurance expirations, patient or client files, or lists of advertisers.

⁵⁰⁹⁹ This includes any patent, copyright, formula, process, design, pattern, know-how, format, package design, internally developed or modified computer software, or interest in a film, sound recording, video tape, book, or other similar property.

⁵¹⁰⁰ This includes the existence of a customer base, a circulation base, an undeveloped market or market growth, insurance in force, the existence of a qualification to supply goods or services to a particular customer, a mortgage servicing contract, an investment management contract, or other relationship with customers involving the future provision of goods or services.

⁵¹⁰¹ This includes the existence of a favorable relationship with persons providing distribution services (such as favorable shelf or display space at a retail outlet), the existence of a favorable credit rating, or the existence of favorable supply contracts.

⁵¹⁰² Reg. § 1.197-2(b).

⁵¹⁰³ Reg. § 1.197-2(d)(2)(i). See also fn. 4150 regarding amortization of purchased goodwill.

⁵¹⁰⁴ Reg. § 1.197-2(d)(2)(iii)(B).

⁵¹⁰⁵ One reading is that Reg. § 1.197-2(g)(8) would have omitted amortizable if this result had been intended. A contrary argument is that Code § 1239 looks to the property in the hands of the transferee, and the self-created goodwill becomes purchased goodwill in the transferee’s hands and is therefore amortizable. The contrary argument is more consistent with the purpose of Code § 1239, but Congress might have had other thoughts when it later enacted Code § 197.

⁵¹⁰⁶ *Fish v. Commissioner*, T.C. Memo. 2013-270.

is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.⁵¹⁰⁷)

However, Code § 1239 does not apply to depletable property that is not depreciable under Code § 167.⁵¹⁰⁸

Furthermore, when a husband and wife who own all of a partnership sell the partnership to a corporation they control, Rev. Rul. 72-172 asserted that Code § 1239 applies to the sale followed by the distribution of the partnership's depreciable property from the dissolved partnership to the corporation.⁵¹⁰⁹ However, Letter Ruling 8052086 declined to apply Code § 1239 to the sale of a partnership interest, without mentioning Rev. Rul. 72-172,⁵¹¹⁰ it has

⁵¹⁰⁷ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000, fn. 5706. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 5817 in part II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (**repealed by 2017 tax reform**).

⁵¹⁰⁸ Letter Ruling 8139052, reasoning:

Depletion is based upon the concept of the exhaustion of a natural resource, whereas depreciation is based upon the concept of exhaustion, wear and tear, and also obsolescence of property, not otherwise a natural resource, used in a trade or business or held for the production of income. Depletion and depreciation are made applicable to different types of assets and the method by which a depletion allowance is spread over the taxable years is different from that applied in the case of depreciation. 4 J. Mertens, *Law of Federal Income Taxation* 24.02 (1980 rev.).

Letter Ruling 200602018 held:

Though Individual B and Taxpayer are related persons under section 1239(b)(1), section 1239(a) applies to the sale or exchange of the Reserves only if the Reserves are subject to the allowance for depreciation provided in section 167. By claiming deductions for depletion under section 611 and for intangible drilling costs under section 263(c), Taxpayer has represented that the Reserves are mineral property and, therefore, not subject to the allowance for depreciation under section 167.

... we conclude that section 1239(a) does not apply to the Reserves, which are subject to the allowance for depletion under section 611(a). However, section 1239(a) does apply to any improvements which are subject to the allowance for depreciation under sections 611(a) and 167.

⁵¹⁰⁹ The ruling stated:

In the instant circumstances, the transaction had the effect of transferring to the corporation, the partnership assets attributable to the partners' interests in the partnership. See *United States v. R. T. and Gertrude Woolsey et al.*, 326 F.2d 287 (1963); *Edwin E. McCauslen v. Commissioner*, 45 T.C. 588 (1966); and Rev. Rul. 67-65, C.B. 1967-1, 168. Compare *Kimbell-Diamond Milling Company*, 14 T.C. 74 (1950), *affirmed per curiam* 187 F.2d 718 (1951) *certiorari denied*, 342 U.S. 827 (1951).

⁵¹¹⁰ Letter Ruling 8052086, issue 7, reasoned:

Section 1239(a) of the Code provides that in the case of a sale or exchange of property, directly or indirectly, between related persons, any gain recognized to the transferor shall be treated as ordinary income if such property is, in the hands of the transferee, of a character which is subject to the allowance for depreciation provided in Section 167.

Section 1.167(a) of the regulations provides, in pertinent part, that an intangible asset, the useful life of which is not limited, is not subject to the allowance for depreciation. Thus, since a partnership interest is an intangible asset of indefinite duration, a partnership interest is not property of a character which is subject to the allowance for depreciation provided in Section 167. Since the partnership interest being sold by Sub has a life of potentially indefinite duration, the partnership interest is not subject to the allowance for depreciation provided by Section 167 of the Code. Accordingly, Section 1239 of the Code will not operate to cause any portion of the gain recognized by Sub to be ordinary income.

been suggested that Rev. Rul. 72-172 is confined to cases when the partnership terminates as a result of the transfer.⁵¹¹¹ Furthermore, outside of the context of Code § 1239, *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (7/13/2017) explained that Code § 741, which governs the nature of gain on sale of a partnership interest, treats a partnership interest as an indivisible asset, unless a statute specifically overrides⁵¹¹² that treatment.⁵¹¹³

Although sales of partnership interests holding depreciable property trigger ordinary income taxation, that provision does so only to the extent of accumulated depreciation,⁵¹¹⁴ whereas Code § 1239 applies with respect to the entire gain. Thus, placing depreciable property into a limited partnership,⁵¹¹⁵ before liquidating the corporation or otherwise distributing the partnership interest, may avoid the full brunt of Code § 1239, subject to cautions about doing so too close to the liquidation.⁵¹¹⁶

The partnership provision most closely resembling Code § 1239 is part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

⁵¹¹¹ McKee, Nelson & Whitmire, ¶ 16.03[1] Aggregate-Entity Theory, found within ¶ 16.03 Transfers of Partnership Interests: *Transfers of Partnership Assets Compared of Federal Taxation of Partnerships & Partners* (WG&L). Letter Ruling 8048051 commented (when Code § 1239 did not apply because the corporation was not a controlled corporation):

Rev. Rul. 72-172, 1972-1 C.B. 265 holds that section 1239 of the Code applied upon the sale of all partnership interests, including depreciable property, totally owned by a man and wife to a corporation in which they owned all the capital stock. In this instance the transaction had the effect of transferring to the corporation, the partnership assets attributable to the partners' interest in the partnership.

Grace Kim, in "Redeeming a Partner with The Partnership's Note," *Tax Management Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740), says:

There is an argument that a partnership interest is not depreciable property and that therefore § 1239 does not apply to the sale or exchange of a partnership interest.⁴¹

⁴¹ See PLR 8052086 (explaining that since a partnership interest is an intangible asset of indefinite duration, a partnership interest is not property of a character which is subject to the allowance for depreciation provided in § 167, and thus § 1239 will not operate to cause any portion of the gain recognized by the seller of a partnership interest to be ordinary income). Cf. Rev. Rul. 72-172, 1972-1 C.B. 265, holding that § 1239 applies upon the sale of all partnership interests, including depreciable property, totally owned by a man and wife to a corporation in which they owned all the capital stock. Note that there have been legislative efforts to enact a provision that would subject partnership interests to § 1239. See, e.g., H.R. 1935, Bill to Provide for Tax Treatment of Partnership Interests Held by Partners Providing Services, Introduced by Rep. Sander Levin (D-Mich.), 111th Cong. 1st Sess. (2009). Arguably, such legislation would not have been needed if under current law partnership interests are subject to § 1239.

⁵¹¹² See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵¹¹³ See fn 5673 in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest.

⁵¹¹⁴ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

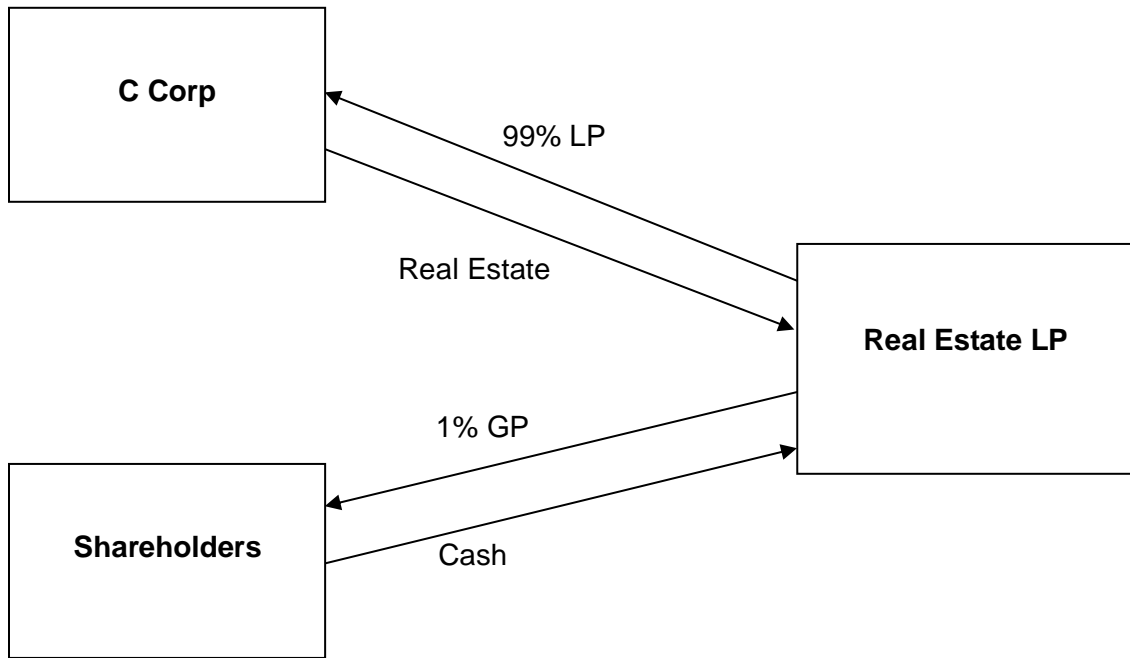

⁵¹¹⁵ See part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

⁵¹¹⁶ See part II.Q.7.h.iii.(a) Taxable Gain to Corporation When It Distributes Property to Shareholders, especially fn. 5126.

II.Q.7.h. Distributing Assets; Drop-Down into Partnership

II.Q.7.h.i. Structure

Step 1

Step 2

Step 1

General rule under Code § 721 is no gain or loss to contributing partner or receiving partnership when a partnership interest is issued in exchange for cash or other property.

Although real estate is illustrated here, this transaction could involve a line of business or marketable securities. However, if it involves marketable securities and the other partners contribute more than a de minimis amount, then one needs to consider additional issues to avoid gain recognition. Code § 721(b).

Step 2

The corporation recognizes gain as if it had sold the property that was distributed. Code § 311. Given that what is transferred is an interest as a limited partner, valuation discounts would reduce the transfer's value and therefore the gain that it triggers.

Shareholders recognize dividend income to the extent of the corporation's earnings and profits (E&P) if it is a distribution (or a state law redemption that does not qualify as an income tax redemption under Code § 302). The balance of the distribution simply reduces the stock's basis and is capital gain after that.

Step 2 could also be done as a taxable sale.

Step 2 might be done in stages to minimize step transaction attacks, including those mentioned in footnote 5126.

II.Q.7.h.ii. Taxation of Shareholders When Corporation Distributes Cash or Other Property

For taxation of distributions by S corporations, see part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

Distributions to shareholders of a C corporation are taxed as dividends to the extent of earnings and profits (E&P), then as return of basis, and then as gain on the sale of stock.⁵¹¹⁷ The distributions are applied to each block of share proportionately; if a block of stock has basis lower than other blocks of stock and runs out of basis, then distributions attributable to that block trigger gain, even if the shareholder has plenty of basis available in other blocks of stock that would otherwise have been available to absorb the distribution tax-free.⁵¹¹⁸

Redemptions reduce E&P.⁵¹¹⁹

II.Q.7.h.iii. Taxation of Corporation When It Distributes Property to Shareholders

The rules below apply to S corporations as well as C corporations.⁵¹²⁰

II.Q.7.h.iii.(a). Taxable Gain to Corporation When It Distributes Property to Shareholders Other Than in Liquidation of the Corporation

Code § 311(b)(1) taxes a corporation when it distributes appreciated assets to its shareholders in a distribution described in Code §§ 301-307 (note that corporate liquidations are described in Code §§ 331-346).⁵¹²¹ The corporation is deemed to have sold the assets to the distributee.⁵¹²²

⁵¹¹⁷ Code § 301(c).

⁵¹¹⁸ *Johnson v. United States*, 435 F.2d 1257 (4th Cir. 1971), *rev'g* 303 F.Supp. 1 (E.D. Va. 1969).

⁵¹¹⁹ Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

⁵¹²⁰ Code § 1371(a).

⁵¹²¹ For the latter, see part II.Q.7.a.vii Corporate Liquidation.

⁵¹²² Although a bargain sale of property to a shareholder is a deemed sale for full fair market value with the bargain element constituting a dividend, a corporation is not required to make a profit when it provides services to a shareholder – reimbursing the corporation for the costs it incurred is sufficient to avoid any sale or dividend treatment. *Welle v. Commissioner*, 140 T.C. 420 (2013) (services were incidental; business generally was conducted to make a profit in serving the general public).

If the corporation is a C corporation, then the deemed sale is taxed at ordinary income rates, just like any other corporation gain or loss would be. If the corporation is an S corporation, then it is taxed to the shareholders on their K-1s,⁵¹²³ subject of course to any applicable built-in gain tax under Code § 1374.⁵¹²⁴ The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).⁵¹²⁵

If the distribution is of all of the corporation's interest in the property, the IRS will attempt to disregard any valuation discounts that would not have applied if the corporation had distributed all of the corporation's interest in the property to one shareholder.⁵¹²⁶ Furthermore, if the IRS determines that a corporation's receipt of a partnership interest does not constitute adequate and full consideration for the property it transferred to the partnership, the IRS will argue that a dividend was made to the other partners and that the corporation recognized gain on the property deemed distributed to the other partners.⁵¹²⁷ However, in what might be the same case, the IRS lost that argument, when the taxpayer convinced the court of the taxpayer's business purpose, in *Cox Enterprises, Inc. & Subsidiaries v. Commissioner*.⁵¹²⁸

II.Q.7.h.iii.(b). Nondeductible Loss to Corporation When It Distributes Property to Shareholders

Under Code § 311(a), a corporation cannot deduct a loss when distributing property, the value of which is less than its basis.

CCA 201421015 concluded:⁵¹²⁹

Disallowed § 311(a) losses will be treated as non-deductible, non-capital expenses pursuant to § 1367(a)(2)(D). Thus, a § 311(a) loss will reduce shareholders' bases in S corporation stock, and the S corporation must reduce its accumulated adjustments account.

⁵¹²³ Code § 1366.

⁵¹²⁴ See part II.P.3.b.ii Built-in Gain Tax.

⁵¹²⁵ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

⁵¹²⁶ TAM 200443032; *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), *aff'd* 162 F.3d 1236 (9th Cir. 1999). See also *Robert E. Smith, III v. Commissioner*, T.C. Memo. 2017-218, in which an S corporation was formed and liquidated in the same year and claimed a loss on the deemed sale of the limited partnership interest it received when it also formed the partnership in the same year; the economic substance doctrine disallowed the loss and imposed penalties (see part II.G.17 Economic Substance Penalty and Doctrines, but the tax year was before Code § 7701(o) was enacted, so penalties applied even without that statute).

⁵¹²⁷ TAM 200239001 (property deemed distributed is based on the value of the property contributed to the partnership rather than the value of the partnership interests received by the partner).

⁵¹²⁸ T.C. Memo. 2009-134.

⁵¹²⁹ This disallowed loss nevertheless reduces the S stock's basis. See fn. 1202. Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally.

II.Q.7.h.iv. Taxpayer Win in *Cox Enterprises* When IRS Asserted That Contributing Property to Partnership Constituted Distribution to Shareholders (2009); *Dynamo Holdings*' Limitation on Using *Cox Enterprises* (2018)

Before discussing *Cox Enterprises*, let's review an important concept when entities owned by related parties conduct business. *Dynamo Holdings Ltd. Partnership v. Commissioner*, T.C. Memo. 2018-61, enunciated the issue of "constructive distribution":

It is well settled that a transfer of property from one entity to another for less than adequate consideration may constitute a constructive distribution to an individual who has ownership interests in both entities.⁵¹³⁰ A bargain sale, including a bargain sale based on competing property valuations, between related parties, however, does not automatically result in a constructive distribution.⁵¹³¹

Courts have outlined a two-prong analysis to determine whether a transfer resulted in a constructive distribution. The first prong, the objective test, asks whether the transfer caused "funds or other property to leave the control of the transferor corporation and ...[whether] it allow[ed] the stockholder to exercise control over such funds or property either directly or indirectly through some instrumentality other than the transferor corporation."⁵¹³² The second prong, the subjective test, a "crucial inquiry" in the constructive distribution determination, asks whether the transfer occurred primarily for the common shareholder's personal benefit rather than for a valid business purpose.⁵¹³³ Both prongs must be satisfied for a court to find a constructive distribution.⁵¹³⁴

As to the objective prong, "Because the common shareholder does not directly receive funds or property in a transfer between entities, such a transfer is a distribution if: (1) the transferred funds leave the control of the transferring entity and (2) the owner controls the funds, directly or indirectly, through some means other than the transferor."⁵¹³⁵ As to the subjective prong, *Dynamo Holdings* enunciated:

Sammons v. Commissioner, 472 F.2d at 453; *Davis v. Commissioner*, 69 T.C.M. (CCH) at 3007.

The subjective prong asks the Court to consider whether the transfer occurred primarily for the benefit of the common shareholder, rather than for a valid business purpose. In applying the subjective prong “the search for this underlying purpose usually involves the objective criterion of actual primary economic benefit to the shareholders as well”.⁵¹³⁶ The Court of Appeals for the Eleventh Circuit states the point as follows: “In determining whether the primary purpose test has been met, we must determine not only whether a subjective intent to primarily benefit the shareholders exists, but also whether an actual primary economic benefit exists for the shareholders.”⁵¹³⁷

If the primary purpose is a valid business purpose, then the primary purpose is not for the shareholder benefit.⁵¹³⁸ The benefit to the shareholder must be “direct”, a term broadly construed.⁵¹³⁹ For example, courts have found a benefit to the shareholder when the primary purpose of the transfer is to or for the benefit of a member of the shareholder’s family.⁵¹⁴⁰

The *Cox* court held that a corporation’s contribution of a television station to a partnership did not constitute a dividend even though the partnership interest it received was originally worth \$60.5 million less than the assets it contributed. The partners in the partnership were the remaindermen of certain trusts. These trusts, indirectly and collectively, owned 98% of the corporation’s stock.

The corporation contributed assets worth \$300 million, became the managing general partner, and received a majority partnership interest, which entitled it to 55% of partnership distributable profits and liquidation proceeds up to specified base amounts and 75% of distributable profits

Based on the *Dynamo Holdings* conclusion below, it’s not surprising that the court concluded:

Considering the control Mrs. Moog exercised over Beekman and Dynamo through 2020072 Ontario, Ltd., we conclude the first prong of the two-prong analysis for a constructive distribution is satisfied. Mrs. Moog had the ability to divert the value of the property to her chosen recipient because of her control.

Commissioner*, 53 T.C. 459, 474-475 (1969) (explaining that it is firmly established that when a corporation makes a transfer of property for no or insufficient consideration “to a member of the stockholder’s family, whether it be directly or in trust, the stockholder has enjoyed the use of such property no less than if it had been distributed to him directly”).

Based on the *Dynamo Holdings* conclusion below, it’s not surprising that the court held that the test for constructive distributions was satisfied.

and liquidation proceeds in excess of those base amounts. The other partners contributed assets worth \$62 million and received the balance of the rights to distributions. Thus, the corporation contributed nearly 83% (\$300 million divided by \$362 million) of the assets and received the right to profits of 55%-75%.

The IRS argued that the transfer to the partnership should be deemed an indirect distribution to the remaindermen of the trusts and therefore a distribution to the trusts. Judge Halpern rejected the IRS' contention. First, he held that the corporation's transfer to the partnership "was not intended to provide a gratuitous economic benefit to the other partners...." Second, he held that, even if the corporation had made such a gratuitous transfer, the transfer did not benefit the shareholder trusts.

In *Cox*, several factors demonstrated that the corporation's directors did not intend a gratuitous transfer:

1. The partnership's formation had nontax business reasons. As recommended by independent consultants, the corporation tried to sell these operating assets but was unable to do so. The partnership's formation allowed the corporation to retain, for use in other areas, the working capital it had previously needed for the television station.
2. The corporation's board's executive committee adopted a resolution that the other partners be required to make cash contributions to the partnership "in an amount corresponding to the fair market value of the partnership interests acquired by" those other partners. Furthermore, the other partners' acquisition of partnership interests was to "be on terms and conditions no less favorable to" the corporation "than the terms and conditions that would apply in a similar transaction with persons who are not affiliated with" the corporation.
3. The corporation retained an outside accounting firm "to render an opinion of appropriate marketability and minority interest discounts applicable to a minority interest" in the partnership as of the date of formation. The partners made contributions based on the appraised amount. Three years later, the corporation's management discovered errors in computing the other partners' interests in the partnership and obtained a new appraisal. The other partners made additional contributions to bring their contributions up to the appraised value.
4. The court relied on *United States v. Byrum*⁵¹⁴¹ to find that the controlling shareholders were subject to fiduciary duties to the minority shareholders. In the *Cox* case, two percent of the stock was owned by people who were not members of the controlling family; these minority shareholders were principally employees of the corporation. Judge Halpern pointed out that the minority shareholders did not own interests in the other partners and "would not be made financially whole for the likely shortfall in income and liquidation (or sale) proceeds" if the corporation's contribution to the partnership constituted a transfer to the other partners.

The court also found that any gratuitous transfer to the other partners would not have benefitted the shareholder trusts. The remaindermen of the trusts held significant interests in the partners, so a transfer to the other partners would have accelerated the remaindermen's interests in violation of the trust agreements. Because the trusts were the controlling shareholders (and the court assumed for the sake of argument that the trustees also controlled the actions of the other board members), the trustees would have violated their fiduciary duties by accelerating the

⁵¹⁴¹ 408 U.S. 135, 137-138 (1972).

interests of the remaindermen. Thus, a gratuitous transfer to the other partners would have been detrimental to the shareholder trusts as entities and would have violated the trustees' fiduciary duties.

The court concluded that any gratuitous transfer of an interest from the corporation to the other partners did not constitute a distribution to the shareholder trusts subject to Code § 311.⁵¹⁴²

Other issues relating to these parties were still before the court when Judge Halpern wrote this opinion, some of which involved the trusts themselves. Subject to any light shed by those cases, one may draw some planning tips from this case:

1. As usual, documenting a transaction very well is always advisable, particularly documentation demonstrating an intent to deal at arms-length.
2. Although the Tax Court seems to place little weight on the *Byrum* case in family limited partnership cases under Code § 2036, having nonfamily member employees hold 2% of the stock might do the trick.
3. Practitioners often wonder whether parties must contribute assets with fair market value to obtain capital accounts proportionate to their interests in profits when all partners are making their initial contributions on formation of the partnership. In this case, the majority partner (the corporation) contributed assets with value significantly in excess of the value of its partnership interest. However, the minority partners contributed assets equal to the value of their interests in the partnership. Thus, the majority partners received capital accounts that were higher relative to their interests in profits compared with the minority partners' capital accounts relative to their respective interests in profits. Judge Halpern did not seem to recognize this issue; if he did, he did not mention it in analyzing the dividend issue.⁵¹⁴³ It will be interesting to see whether the companion cases consider this issue to be of consequence.

However, *Dynamo Holdings Ltd. Partnership v. Commissioner*, T.C. Memo. 2018-61, which was a taxpayer win on other intra-family issues,⁵¹⁴⁴ contrasted its taxpayer's repeated bargain sales against *Cox Enterprises'* isolated transaction. *Dynamo Holdings* noted and reasoned (footnotes to *Cox Enterprises* omitted):

Petitioners argue that Beekman's directors held fiduciary duties to the beneficiaries of the Canadian trusts not to deplete the value of Beekman and therefore Beekman could not have underpriced the property. Petitioners rely on *Cox Enters.*, where we held that there was not a constructive distribution. In *Cox Enters.*, one corporation contributed an asset to a partnership in exchange for a partnership interest the value of which was lower than the value of the contributed asset, effectively transferring value to the other partners. The other partners were two family partnerships. We found that the primary

⁵¹⁴² For information on Code § 311, see part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

⁵¹⁴³ If this case is the same as TAM 200239001, then the IRS must have pressed this issue, because the TAM specifically addressed it. The judge did point out that the IRS argued, in the alternative, that the dividend was of the TV station or of a partnership interest. However, he still did not seem to notice the disproportionality on which the TAM focused.

⁵¹⁴⁴ See part III.B.1.a.i.(a) Loans Must be Bona Fide, text accompanying fns 6244-6260, excused defects in formalities of loans because, objectively, the parties treated the advances as loans, consistently reported them as such for tax purposes, and were intended to be - and actually were - repaid.

purpose was not to benefit the other partners, in part because the corporation's majority shareholder and directors would have had to breach their fiduciary duties. This would have resulted in a financial detriment to the minority shareholders who did not own any interest in the partnerships.

Petitioners ask that we follow this line of reasoning because the beneficiaries of the Canadian trusts are not identical to the beneficiaries of the U.S. trusts. Petitioners argue that the directors, officers, and controlling shareholders did not breach any duties to the Canadian trusts by depleting value from Beekman. We disagree. *Cox Enters.* involved a single instance of undervaluing an interest. In these cases, we have found five bargain sales exceeding \$200 million. Unlike *Cox Enters.*, we find that the directors, officers, and controlling shareholder acted for the benefit of the U.S. trusts and to the detriment of the Canadian trusts.

We agree with the Commissioner that the primary intent and benefit was for Dynamo and by extension, the dynasty trusts. The bargain sale properties went to Dynamo, enhancing its value. The properties put more equity in Dynamo and freed up its liquid assets. This allowed Dynamo to develop its Florida business and increased Dynamo's borrowing capability. All of this directly benefited the dynasty trusts for the benefit of Christine and Mr. Julien and furthered Mrs. Moog's estate planning. Accordingly, Beekman made deemed distributions.

II.Q.7.h.v. Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014)

In *Bross Trucking, Inc. v. Commissioner*,⁵¹⁴⁵ the IRS asserted that the existing corporation (Bross Trucking) distributed appreciated intangible assets to its sole shareholder, who then made a gift of the intangibles to his three sons, who organized their own⁵¹⁴⁶ corporation (LWK

⁵¹⁴⁵ T.C. Memo. 2014-107.

⁵¹⁴⁶ The sons were not actually the owners – it was their Roth IRAs, as the court explained: LWK Trucking was organized on October 1, 2003. Its stock was divided into two classes when it was organized: class A voting stock and class B nonvoting stock. Class A stock represented a 98.2% interest in LWK Trucking and class B stock represented the remaining 1.8%. In December of 2003 each of the three Bross sons established a self-directed Roth IRA. Later that month, each of the Bross sons directed his respective Roth IRA to acquire 2,000 shares of class A shares in LWK Trucking. Together, the 6,000 shares acquired by the three Roth IRAs represented all of the class A shares in LWK Trucking, giving the three sons a combined 98.2% interest in LWK Trucking.⁸ The remaining class B shares were acquired by an unrelated third party.

Footnote 8 commented:

As stated *infra* note 19, a discussion on the merits of this structure is not relevant to the issues in these cases and the Court does not address the validity of this transaction.

Footnote 19 stated:

Thus, Mr. Bross could not transfer Bross Trucking assets to his three sons, and it follows that the three Bross sons could not transfer Bross Trucking assets to each of their respective Roth IRAs. Accordingly, IRS Notice 2004-8, 2004-1, C.B. 333, is outside the scope of these cases because Bross Trucking and LWK Trucking never shared any assets. Further, a discussion on the structure of the Bross sons' ownership of LWK Trucking is outside the scope of this opinion.

My understanding is that the IRS initiated this audit to explore Roth IRA issues, then focused its attack on the corporate issues, trying to get more money from the taxpayers. For more on Roth IRAs owning businesses, see part II.G.22 IRA as Business Owner.

Trucking). The alleged value of the intangible assets would have required both filing a gift tax return and paying gift tax.

The court held:

there are two regimes of goodwill: (1) personal goodwill developed and owned by shareholders; and (2) corporate goodwill developed and owned by the company. Bross Trucking's goodwill was primarily owned by Mr. Bross personally, and the company could not transfer any corporate goodwill to Mr. Bross in tax year 2004.

Although a lack of non-compete agreements generally facilitates the lack of corporate goodwill,⁵¹⁴⁷ in this case regulatory action jeopardized Bross Trucking's business and

⁵¹⁴⁷ See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees? Focusing on the authority cited in fn. 4174, the *Bross Trucking* court held that any goodwill associated with Bross Trucking was personally owned by its shareholder:

The remaining attributes assigned to Bross Trucking's goodwill all stem from Mr. Bross's personal relationships. Bross Trucking's established revenue stream, its developed customer base, and the transparency of the continuing operations were all spawned from Mr. Bross's work in the road construction industry.

Any established revenue stream, developed customer base, or transparency of continuing operations was a direct result of Mr. Bross's personal efforts and relationships. Like the shareholder in *Martin Ice Cream Co.*, Mr. Bross developed the crucial relationships with the businesses' customers. Bross Trucking's customers chose to patronize the company solely because of the relationships that Mr. Bross personally forged. Mr. Bross had close, personal relationships with the owners of Bross Trucking's primary customers. For example, Mark Twain Redi-Mix, a substantial Bross Trucking customer, was owned by Mr. Bross's wife and two sons. As with the taxpayer in *Norwalk v. Commissioner*, T.C. Memo. 1998-279, it is safe to assume that Bross Trucking's customers sought Mr. Bross' personal ability and reputation when hiring Bross Trucking because he was a successful construction businessman who has been in the road construction industry since the 1960s.

Bross Trucking may have had a developed revenue stream, but only as a result of Mr. Bross' having personal relationships with the customers. It follows that Bross Trucking's developed customer base was also a product of Mr. Bross' relationships. Mr. Bross was the primary impetus behind the Bross Family construction businesses, and the transparency of the continuing operations among the entities was certainly his personal handiwork. [footnote omitted] His experience and relationships with other businesses were valuable assets, but assets that he owned personally.

A company does not have any corporate goodwill when all of the goodwill is attributable solely to the personal ability of an employee. See *MacDonald v. Commissioner*, 3 T.C. 720, 727 (1944); *Norwalk v. Commissioner*, T.C. Memo. 1998-279. Unlike the taxpayer's products in *Solomon v. Commissioner*, T.C. Memo. 2008-102, Bross Trucking's products did not contribute to developing the goodwill. This is demonstrated in part by the services performed by Bross Trucking. Bross Trucking's business model involved hiring independent contractors to haul equipment and supplies around the State. There were very few obstacles to obtaining authority and directly hiring the independent contractors who performed the actual work for Bross Trucking. The State of Missouri's deregulation of the trucking industry allows new entrants to easily begin trucking operations. In other words, it was not Bross Trucking's product which enticed customers to use its services because the services were not unique. Cf. *Schilbach v. Commissioner*, T.C. Memo. 1991-556 (holding that a single-shareholder-owned professional corporation possessed all of the goodwill because the corporation's services were unique and was not based on the ability of the shareholder). The expectation of continuing patronage must have been a result of the unique relationships between Mr. Bross and the customers.

....

necessitated forming a new company.⁵¹⁴⁸ Therefore, the court held that “the sole attribute of goodwill displayed by Bross Trucking was a workforce in place, and it is therefore the only

Mr. Bross did not transfer any goodwill to Bross Trucking through an employment contract or a noncompete agreement. A key employee [footnote omitted] who develops relationships for his or her employer may transfer goodwill to the employer through employment contracts or noncompete agreements. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207. The transfer is evidenced by the employee’s covenant to not use his or her goodwill to compete against the employer. *O’Rear v. Commissioner*, 28 B.T.A. 698, 700 (1933) ([I]t is at least doubtful whether a professional man can sell or dispose of any good will which may attach to his practice except perhaps by contracting to refrain from practicing.), *aff’d*, 80 F.2d 473 (6th Cir. 1935). In other words, an employee transfers the benefit of his or her relationships to an employer when the employee cannot benefit from the relationships without the employer.

An employer has not received personal goodwill from an employee where an employer does not have a right, by contract or otherwise, to the future services of the employee. See *MacDonald v. Commissioner*, 3 T.C. at 727-728. Mr. Bross did not have an employment contract with Bross Trucking and was under no obligation to continue working for Bross Trucking. A contractual duty to continue to use his or her assets for the benefit of the company may show that an employee transferred personal goodwill to an employer for the length of the obligation. Mr. Bross, however, was under no such obligation: he was free to leave the company and take his personal assets with him. Similarly, the lack of an employment contract shows that there was not an initial obligation for Mr. Bross to transfer any of his personal assets to Bross Trucking. Bross Trucking did not take an ownership interest in Mr. Bross’ goodwill from the beginning because Mr. Bross never agreed to transfer those rights. Thus, the lack of an employment contract between Mr. Bross and Bross Trucking shows that Bross Trucking did not expect to--and did not--receive personal goodwill from Mr. Bross. Accordingly, Mr. Bross’ personal goodwill remained a personal asset separate from Bross Trucking’s assets.

An employee may transfer personal goodwill to an employer through a covenant not to compete. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207-208; *H & M Inc. v. Commissioner*, T.C. Memo. 2012-290. In those cases the Court held an employee did not transfer personal goodwill to the employer because he or she did not sign a noncompete agreement. Similar to those taxpayers, Mr. Bross never transferred any personal goodwill to Bross Trucking by signing a noncompete agreement. Much in the same way that Bross Trucking did not have any contractual expectation of continued services from Mr. Bross while he was an employee, Bross Trucking could also not expect to benefit from Mr. Bross’s personal goodwill after he left the business. Mr. Bross’ freedom to use his personal goodwill in direct competition with Bross Trucking if he stopped working for the company shows that he did not transfer it to Bross Trucking.

⁵¹⁴⁸ The *Bross Trucking* court stated:

Bross Trucking might have had elements of corporate goodwill at some point but had lost most of it by the time of the alleged transfer. Specifically, through various regulatory infractions Bross Trucking lost any corporate goodwill because of an impending suspension and the negative attention brought by the Bross Trucking name. During the late 1990s and early 2000s Bross Trucking was investigated extensively by the DOT and the MCRS. As a result of the investigations, Bross Trucking faced a possible suspension of operations and several fines because the authorities gave Bross Trucking unsatisfactory safety ratings. Further, the various regulatory authorities were hounding Bross Trucking to the point that LWK Trucking wanted to immediately remove the Bross name from leased trucks to avoid their being spotted and stopped. The impending suspension would cause customers to reevaluate whether to trust Bross Trucking and continue to do business with it. Indeed, Mr. Bross expressed his concern to his attorney that Bross Trucking might not be able to perform necessary functions as a result of the suspension. Mr. Bross’s solution was to find or create another business to take over the trucking needs for the Bross family businesses. This is the antithesis of goodwill: Bross Trucking could not expect

continued patronage because its customers did not trust it and did not want to continue doing business with it.

Further, the lack of corporate goodwill is demonstrated by the necessity to separate LWK Trucking from Bross Trucking by hiding the Bross name on leased trucks. Trade names and trademarks are the embodiment of goodwill. *Canterbury v. Commissioner*, 99 T.C. 223, 252 (1992). LWK Trucking specifically chose to quickly remove the Bross Trucking name from any leased equipment to avoid confusion between the two companies. This shows that any transferred corporate goodwill was not valuable and may have actually been detrimental to LWK Trucking. In other words, LWK Trucking was trying to hide any relationship with Bross Trucking because association with the targeted company was seen in a negative light. A new company trying to use the transferred goodwill of another company would likely try to associate with the recognized company, not hide the company logo.

Mr. Bross credibly testified that Bross Trucking had relationships with several national suppliers for fuel and parts, but no evidence was submitted showing that LWK Trucking benefited from any transferred supplier relationships. Further, it is unclear whether Mr. Bross or Bross Trucking cultivated the supplier relationships.

....

Bross Trucking's customers had a choice of trucking options and chose to switch from Bross Trucking to LWK Trucking. Respondent's contention that Bross Trucking transferred a developed customer base and an established revenue stream is misleading because it suggests that the transfer was organized between Bross Trucking and LWK Trucking. It appears, however, that Bross Trucking's customers were interested in changing trucking providers because of the impending suspension, showing that the act was not a transfer of intangibles at the service provider level but a business choice made at the customer level. For example, forming LWK Trucking gave Mark Twain Redi-Mix, which shared ownership with LWK Trucking and one of Bross Trucking's primary customers, the option to use a trucking company with an untarnished reputation and clean service record. Thus, the facts support a finding that Bross Trucking did not transfer its customers but that the customers chose to use a new company because of Bross Trucking's troubled past.

attribute that the corporation could have distributed to Mr. Bross.” The court rejected the IRS’ assertion that Bross Trucking’s intangible workforce assets were transferred to LWK Trucking⁵¹⁴⁹ or that any other transfers occurred.⁵¹⁵⁰

II.Q.7.h.vi. IRS’ Conservative Roadmap: Letter Ruling 200934013

This ruling approved a corporation’s contribution of marketable securities to a partnership in exchange for a partnership interest.⁵¹⁵¹ Unlike *Cox Enterprises*, no value was shifted, although future appreciation would be effectively shifted out. This ruling followed the IRS’ position that one cannot create discounts by placing assets in a partnership and then distributing all of the corporation’s partnership interests to the shareholders. A family-owned S corporation (“Corp”) owned 100% of the membership interests in LLC, which was disregarded as an entity separate from Corp for federal tax purposes. LLC’s operations consist solely of investing in a diversified

⁵¹⁴⁹ The *Bross Trucking* court stated:

As discussed above, the only aspect of corporate goodwill that Bross Trucking displayed was a workforce in place, but Bross Trucking did not transfer an established workforce in place to Mr. Bross. Respondent repeatedly contends that most of the Bross Trucking employees became LWK Trucking employees. The evidence, however, shows that only about 50% of LWK Trucking’s employees formerly worked at Bross Trucking. The Court is unconvinced that most of a workforce in place was transferred when only 50% of the current employees were previously employees by the alleged transferor. Instead it appears that LWK Trucking assembled a workforce independent of Bross Trucking. This is demonstrated by the new key employees and services offered by LWK Trucking. Mr. Bross’s sons managed LWK Trucking and also engaged in services different from those performed at Bross Trucking. For instance, in 2004 LWK Trucking started One Star Midwest, which sold GPS services, and LWK Trucking later started performing truck maintenance for third parties. Bross Trucking did not perform these services and could not have provided employees to start the separate service lines. LWK Trucking may have hired former Bross Trucking employees, but there is no evidence that these employees were transferred to LWK Trucking rather than hired away on their own merit. It is also unclear whether any of the alleged transferred employees that moved to LWK Trucking were independent contract drivers. These drivers were not obligated to work solely for Bross Trucking and in fact were almost certainly expected to have contracts with companies outside of Bross Trucking. Independent contractors’ choosing to accept work from a different business is not a transfer of workers.

⁵¹⁵⁰ The *Bross Trucking* court stated:

In addition, Bross Trucking did not distribute any cash assets and retained all the necessary licenses and insurance to continue business. Further, Mr. Bross remained associated with Bross Trucking and was not involved in operating or owning LWK Trucking. He was free to compete against LWK Trucking and use every cultivated relationship in order to do so. In other words, the fact that Bross Trucking could have resumed its hauling business supports the view that it retained any corporate intangibles. Accordingly, there was no transfer of intangible assets because Bross Trucking’s customers chose to use a different company and Bross Trucking remained a going concern.

LWK Trucking did not benefit from any of Bross Trucking’s assets or relationships. LWK Trucking was independently licensed and developed a wholly new trucking company. LWK Trucking did not take a transferred basis in any assets such as property or purchased authority. There is no indication that LWK Trucking used any relationship that Mr. Bross personally forged. The Bross sons were in a similarly close capacity to Bross Trucking’s customers to develop relationships apart from Mr. Bross. Cultivating and profiting from independently created relationships are not, however, the same as receiving transferred goodwill. It is true that LWK Trucking’s and Bross Trucking’s customers were similar, but it does not mean that Bross Trucking transferred goodwill; instead the record shows that LWK Trucking’s employees created their own goodwill.

⁵¹⁵¹ For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

portfolio of passive investment assets, including hedge funds, mutual funds, and private equity funds. LLC has no outstanding liabilities. Shareholder A and Corp reached an agreement pursuant to which Shareholder A was admitted as a new member of LLC. Specifically, Shareholder A contributed cash to LLC in exchange for a newly issued, non-voting, preferred interest in LLC. The terms and pricing of the preferred interest were based on an independent appraiser's determination of market rate terms for similar equity investments.

For what have been represented to be valid business purposes, the following steps were proposed: (i) Corp will distribute some of its membership interests in LLC pro-rata to its stockholders (the "Distributed LLC Interests") and (ii) LLC's operating agreement will be amended to provide Corp with a share of LLC's profits disproportionate to capital in exchange for Corp providing future management services to LLC with respect to LLC's ongoing activities. Corp made the following representations with respect to this ruling request:

- (a) The principal purpose of the Shareholder A contribution to LLC in exchange for a preferred membership interest was to allow Shareholder A to invest his excess cash directly in a diversified portfolio of investment assets managed by a team of experienced professionals, in a manner that allows Shareholder A to enjoy a high rate of preferred return and a priority on distributions. The principal purposes of the Proposed Transaction are to: (1) increase flexibility with respect to the allocation of profits, losses, and cash distributions associated with the LLC asset pool through issuance of various classes of interests in LLC, (2) provide increased liability protection to the LLC asset pool from the ongoing business operations of Corp, (3) facilitate estate planning and charitable objectives of Corp shareholders with respect to their investment in LLC, and (4) facilitate continued co-investment amongst family members outside of Corp.
- b) Shareholder A cannot independently cause Corp to distribute its interest in LLC. Additionally, Shareholder A's contribution to LLC was not dependent upon the consummation of the Proposed Transaction and the Corp stockholders had not ratified the Proposed Transaction as of the date of the ruling request.
- (c) Following the Proposed Transaction, it is intended that LLC will continue to carry on the operations that were carried on by LLC before the Proposed Transaction.
- (d) At the time of the Proposed Transaction, there will be no amounts payable or receivable between LLC and Corp or LLC and Shareholder A.
- (e) For purposes of measuring the Code § 311(b) gain to Corp on the Proposed Transaction, if any, the Distributed LLC interests will be valued as a percentage of the value of the assets held by LLC.⁵¹⁵²
- (f) To the best of Corp's knowledge and belief, there is no plan or intention for any transferor to transfer assets to LLC other than cash and/or a diversified portfolio of stocks and securities.⁵¹⁵³

⁵¹⁵² Citing *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), aff'd 162 F.3d 1236 (9th Cir. 1999). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

⁵¹⁵³ For this representation, a portfolio of stocks and securities is diversified under Reg. § 1.351-1(c)(6)(i) if it satisfies the 25% and 50% tests of Code § 368(a)(2)(F)(ii), applying the relevant provisions of Code § 368(a)(2)(F)(ii), except that in applying Code § 368(a)(2)(F)(iv), government securities are

- (g) The assets of LLC immediately prior to the admission of Shareholder A consisted of a diversified portfolio of stocks and securities.⁵¹⁵⁴
- (h) There is no intention following the Proposed Transaction to dispose of any material assets of LLC (other than dispositions in the ordinary course of business).
- (i) To the best of Corp's knowledge and belief, the Corp stockholders have no plan or intention to dispose of any portion of the distributed LLC interests except for the potential transfer to irrevocable trusts which will be taxed as grantor trusts to the respective grantor.
- (j) LLC has not, and will not, elect to be classified as a corporation.
- (k) No property, other than cash, has ever been contributed by Corp to LLC, and LLC has never made a distribution of property to Corp.

The IRS ruled:⁵¹⁵⁵

- The admission of Shareholder A to LLC caused LLC to convert to a partnership for U.S. federal income tax purposes. Corp, as the sole owner of LLC prior to the admission of Shareholder A, is deemed to contribute the existing assets of LLC to the newly-formed LLC partnership in exchange for a membership interest in LLC.⁵¹⁵⁶ This deemed transaction is treated as a nontaxable contribution of property to LLC by Corp.⁵¹⁵⁷ Additionally, because the assets of LLC are represented to be a diversified portfolio of assets, Code § 721(b) does not cause taxation with respect to Shareholder A's contribution of cash and to Corp's deemed contribution of property to LLC.
- Corp's adjusted basis in the Distributed LLC Interests is equal to the product of (A) the amount of Corp's adjusted tax basis in its entire membership interest in LLC and (B) a fraction, the numerator of which is the fair market value of the Distributed LLC Interests on the date of the distribution, and the denominator of which is the fair market value of Corp's entire membership interest in LLC as of that date.
- Corp will recognize gain, if any, on the pro-rata distribution of the Distributed LLC Interests to its stockholders to the extent the fair market value of the Distributed LLC Interests exceeds their adjusted tax basis in the hands of Corp on the date of the distribution.⁵¹⁵⁸

II.Q.7.h.vii. What We Learned

The *Cox* case represented a significant shift in value from the corporation to the shareholders' family members. The corporation's contribution was based on a full pro-rata share of its interest in the partnership, but the family members' contribution was based on the discounted value of

included in determining total assets unless government securities are acquired to satisfy the requirements of Code § 368(a)(2)(F)(ii).

⁵¹⁵⁴ As defined under Reg. § 1.351-1(c)(6)(i).

⁵¹⁵⁵ The IRS also ruled regarding Code § 2701 – that a preferred payment right, the rate at which changes over time, was not a qualified payment right except to the extent that a qualified payment right election is made. Reg. § 25.2701-2(b)(6).

⁵¹⁵⁶ Rev. Rul. 99-5.

⁵¹⁵⁷ Code § 721(a).

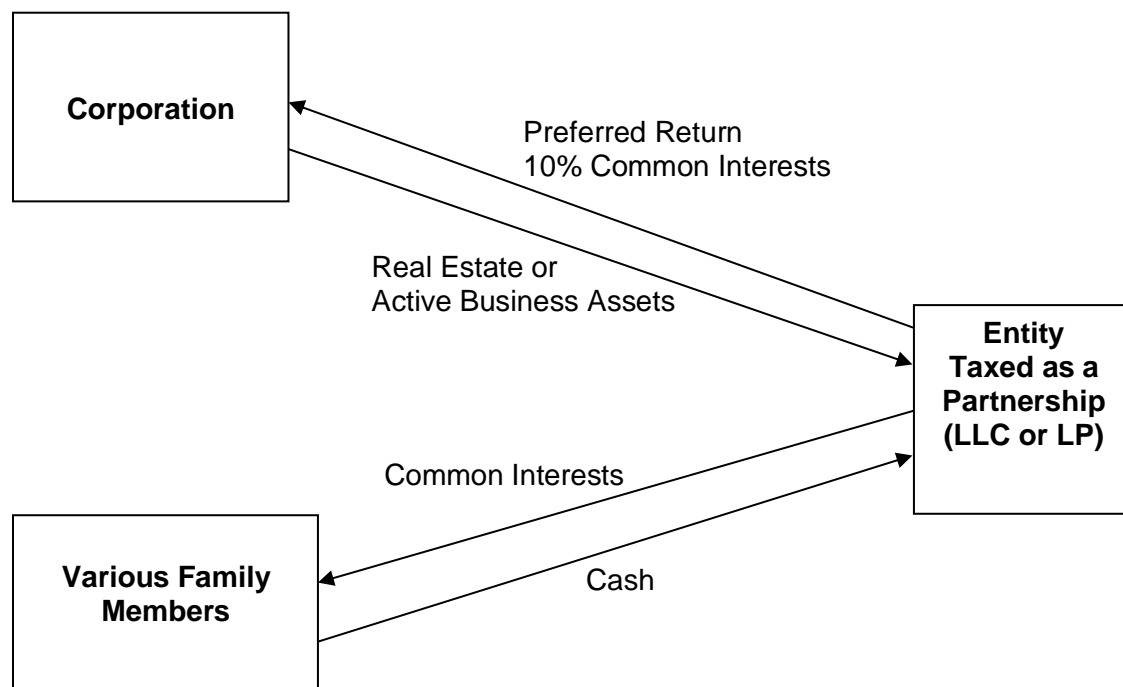

⁵¹⁵⁸ Code § 311(b). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

its interest in the partnership. The IRS argued that the value shift was a disguised dividend to the shareholders, who wanted to benefit their family members, but the taxpayer convinced the court of the transaction's strong business purpose. The IRS would probably attack similar transactions, so tax advisors should go to extra lengths to document a strong business purpose and warn clients of the risks.

The Letter Ruling shows what the IRS is willing to approve. The IRS continues to want to treat a distribution of a recently formed partnership to its shareholders as if the corporation owned and was distributing the partnership's underlying property. Corporations might want to consider waiting for a while after forming the partnership, then they might consider selling the partnership interests to shareholders at various times in separate minority blocks of the partnership, but again they should be prepared for an IRS attack.

II.Q.7.h.viii. Value Freeze as Conservative Alternative

Consider the following structure:

The corporation contributes the real estate or other business assets to a partnership,⁵¹⁵⁹ taking in return a large preferred partnership interest and an interest in the residue of the profits (a “common interest”) equal in value to at least 10% of the contributed equity, with the other partners receiving a common interest in the partnership for the balance. Thus, a large majority of the total return (appreciation plus cash flow) that exceeds the preferred interest will be

⁵¹⁵⁹ If the owners perceive difficulty in transferring all of its assets, the owners can form an identical corporation, contribute all of the stock in the old corporation to the new corporation, then merge or convert the old corporation into an LLC owned solely by the new corporation. This first step should constitute a nontaxable F reorganization; see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. The LLC can be the main organization in which the owners are separately admitted as members, but in most cases the corporation would just contribute its interest as the LLC's sole member to a limited partnership. See part II.E Recommended Structure for Entities.

outside of the corporation. Moving to this structure is discussed in part II.E.7.a Overview of How to Migrate into Desired Structure and diagrammed in part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure, culminating in the above structure, which is shown at part II.E.7.c.ii Moving New LLC into Preferred Structure.

The preferred return is to be satisfied out of the partnership's net cash flow and payable at the AFR or another appropriate fixed rate; we typically ask a qualified appraiser to tell us what the rate should be. The preferred return should be cumulative and payable on a periodic basis (at least annually) to constitute a qualified payment under Code § 2701.⁵¹⁶⁰ For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

If the corporation is receiving a return whose present value is equal to the value of the contributed goodwill (if any), it should not be treated as having distributed such goodwill to its shareholders. Using a preferred partnership adds safety, in that a corporation can easily escape the disguised sale rules. If the preferred profits distribution is payable at no more than 150% of the AFR or is limited to the extent of operating cash flow, each of two regulations⁵¹⁶¹ separately creates a presumption that a sale has not occurred.⁵¹⁶²

Investing at least 10% of equity in a common interest is our way of trying to provide the preferred partner with more economic risk than that undertaken by a lender, which is important under cases that held that complying with the disguised sale rules was not enough because the regulations create only a presumption.⁵¹⁶³ This 10%-of-equity-in-common approach is not a hard and fast rule but rather an exercise of judgment; much less than 10% may very well work.

⁵¹⁶⁰ Reg. § 25.2701-2(b)(6)(i)(B).

⁵¹⁶¹ Reg. §§ 1.707-4(a)(2) and 1.707-4(b), discussed further in part II.M.3.e Exception: Disguised Sale.

⁵¹⁶² As discussed in part II.M.3.e Exception: Disguised Sale, it is unlikely that the partnership anti-abuse rules would come into play. The transaction is consistent with the intent of the partnership income tax rules:

- The partnership must be bona fide, and each transaction must have a substantial business purpose. The proposed transaction splits income for generally around 5 years, and it provides the old owner with a way to take control over the business more quickly if the transaction does not work out than in a traditional sale. The new owner benefits by minimizing his risk, in that he is not personally liable. These are substantial, practical business issues.
- The form of each transaction must be respected under substance over form principles. No games are being played here: the parties have every incentive to ensure that the new entity's cash flow is distributed as promised in the transaction.
- Clear reflection of income. All distributions the old owner receives are being taxed. The new owner is not being taxed on income the new owner does not receive.

For more information on possible attacks, see fn. 3601.

⁵¹⁶³ *Chemtech Royalty Associates, L.P. v. U.S.*, 114 A.F.T.R.2d 2014-5940 (5th Cir 2014) (1% partnership interest by provider of capital was not sufficient to make provider a partner where partner's preferred return was virtually certain to be paid and 99% partner indemnified provider for any losses; partnership lacked economic substance). Dow provided the partnership with a stable revenue stream and indemnified the banks that provided the capital against any liabilities the partnership incurred:

First, the transactions were structured to ensure that Dow paid the foreign banks a fixed annual return on their investment regardless of the success of the [Chemtech] venture, just as in the transaction in *Castle Harbour II*....

Second, Dow agreed to bear all of the non-insignificant risks arising out of the Chemtech transactions, which further shows that the parties did not intend to share any possible losses....

Although one might be inclined to use an LLC, a limited partnership is better if the partnership engages in a trade or business, to help avoid self-employment tax.⁵¹⁶⁴ When using a limited partnership, consider using an entity taxed as an S corporation for the general partner and conducting business through various single-member LLCs that the limited partnership owns.⁵¹⁶⁵ For more description showing how to move in such a structure, see part II.E.7 Migrating into Partnership Structure, especially part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure.

Be careful about possible changes in accounting method. For example, if a cash method C corporation contributes its business to a partnership, the partnership might not be able to continue using the cash method,⁵¹⁶⁶ for example, if the corporation were a personal service corporation⁵¹⁶⁷ before the transaction and all of its personal service activities were moved to the partnership, the corporation might no longer qualify and therefore the partnership might not qualify as well. The corporation can avoid this limitation by making an S election⁵¹⁶⁸ but needs to plan around the built-in gain tax.⁵¹⁶⁹

If the corporation has subsidiaries, the subsidiaries could convert to single-member disregarded LLCs, then do a tax-free liquidation;⁵¹⁷⁰ if the parent and subsidiaries file a consolidated return, be sure that the subsidiaries do not have any excess loss accounts⁵¹⁷¹ or deferred intercompany transactions.⁵¹⁷² Before the liquidation, the parent might consider contributing to the subsidiary

Third, just as in *Castle Harbour II*, the foreign banks did not meaningfully share in any potential upside.

The court pointed out:

As a practical matter, payment of less than the full priority return was highly unlikely because (i) the minimum royalty payments from Dow sufficiently funded the priority return, and (ii) Chemtech could not incur more than \$1 million in annual expenses without the banks' approval.

Also, regarding penalties, the court held that:

the district court erred in foreclosing the applicability of both the substantial-valuation and gross-valuation misstatement penalties. We remand for the court to determine whether to impose either or both of those penalties. We express no opinion on whether the court erred in imposing the negligence and substantial-understatement penalties. On remand, the court should consider the extent to which imposing those penalties remains consistent with this opinion.

Although the court held that the partnership lacked economic substance, no consideration appears to have been given to the penalty described in part II.G.17 Economic Substance.

Also note that the *Castle Harbour* trial court refused to uphold negligence penalties on the taxpayer's actions, *TIFD III-E, Inc. v. U.S.*, 113 A.F.T.R.2d 2014-1557 (D.C. Conn.), which is analyzed by Lipton, *Castle Harbour V—The Government Loses (Again) in the District Court*, *Journal of Taxation* (Oct. 2014).

⁵¹⁶⁷ See part II.G.11 Personal Service Corporations.

⁵¹⁶⁸ See generally part II.P.3.b Conversion from C Corporation to S Corporation.

⁵¹⁶⁹ See part II.P.3.b.ii Built-in Gain Tax.

⁵¹⁷⁰ Code §§ 332, 337. See 784 T.M. *Corporation Liquidations*; Bittker & Eustice, *Federal Income Taxation of Corporations & Shareholders* (WG&L), Chapter 10: Complete Liquidations and Other Taxable Dispositions of Corporate Stock and Assets in Bulk, part B. Subsidiary Liquidations.

⁵¹⁷¹ Reg. § 1.1502-19. See Hennessey, Yates, Banks & Pellervo, *The Consolidated Tax Return* (WG&L), ¶13.04. Excess-Loss Accounts.

⁵¹⁷² Reg. § 1.1502-13 (intercompany transactions). I am not an expert in Code § 332 and consolidated returns; one of my partners told me to watch for excess loss accounts or deferred intercompany transactions. The concept is that certain transactions not recognized in a consolidated environment are recognized when a corporation leaves the consolidated group – in this case, by liquidating a subsidiary.

any obligations of the subsidiary that the parent holds or cancelling them outright,⁵¹⁷³ particularly as needed to cause them to have a positive net worth on liquidation.⁵¹⁷⁴ If the corporation has affiliated corporations, they might combine in a tax-free reorganization⁵¹⁷⁵ before forming the new entity, so that only one corporation remains as the general partner; each corporation that does not survive the merger as a corporation could survive as an LLC (disregarded for tax purposes) wholly owned by the surviving corporation and then contributed to the limited partnership intact as an LLC that is then wholly owned by the partnership. Generally, among other requirements, reorganizations require a continuity of business to be tax-free; this continuity can be satisfied when the acquired business is continued through the new partnership.⁵¹⁷⁶ Consider the effect of mergers on accounting methods, in that affiliated corporations using different accounting methods might need to change in some manner when combined into a single taxpayer.

If any owners are members of the same family or if any owner might split up his ownership in the corporate general partner from his interest as a limited partner when making transfers to family members, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Transferring the common interest in a preferred partnership is less tax-efficient than selling (to an irrevocable grantor trust)⁵¹⁷⁷ an interest in a partnership that just has one class of owners, because (appraisers tell us that) the return required on an equity interest in a partnership generally is significantly higher than the AFR. However, a traditional sale to an irrevocable grantor trust is not practical here, as the corporation would have to form the irrevocable grantor trust for its benefit,⁵¹⁷⁸ which would undermine the whole concept of getting the property out of corporate solution.

II.Q.7.h.ix. Value Freeze as Alternative to Code § 355 Division

Consider separately applying part II.Q.7.h.viii Value Freeze as Conservative Alternative to different lines of business or groups of assets to split up future growth in each line or group.

The common (non-preferred) interests might be owned by those who have the most interest in particular lines or groups.

⁵¹⁷³ See Reg. § 1.332-7 if the parent does not do this. In a consolidated return environment, the parent can take a bad debt deduction based on the partial or complete worthlessness of the debt. Reg. § 1.1502-13(g)(7), Example 3(iii). For more details, see 784 T.M. *Corporate Liquidations*, part IV Tax Treatment of Intercorporate Debt in a Liquidation of a Subsidiary.

⁵¹⁷⁴ See 784 T.M. *Corporate Liquidations*, III. Subsidiary Liquidations Not Qualifying Under §332, C. Insolvent Subsidiary. Reg. § 1.332-2(b) provides:

Section 332 applies only to those cases in which the recipient corporation receives at least partial payment for the stock which it owns in the liquidating corporation. If section 332 is not applicable, see section 165(g) relative to allowance of losses on worthless securities.

⁵¹⁷⁵ Code § 368.

⁵¹⁷⁶ Reg. § 1.368-1(d)(4)(iii)(A).

⁵¹⁷⁷ As described in part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

⁵¹⁷⁸ If a corporation makes a gratuitous transfer to a trust that is not for a business purpose of the corporation but is for the personal purposes of one or more of the shareholders, the gratuitous transfer will be treated as a constructive distribution to such shareholders under federal tax principles and the shareholders will be treated as the grantors of the trust. Reg. § 1.671-2(e)(4). See part II.D.2 Business Entity as Grantor of Tru.

Alternatively, each subsidiary depicted at the bottom of part II.E.6 Recommended Partnership Structure – Flowchart can remain wholly owned but might have a separate incentive plan, such as the partnership equivalent of a stock appreciation right.⁵¹⁷⁹

None of these alternatives provides the clean break, disentangling shareholders from each other, provided by part II.Q.7.f Corporate Division into More Than One Corporation.

II.Q.7.i. Distribution or Sale to Shareholder to Defer Gain on the Sale of Corporate Assets and Perhaps Avoid Double Taxation on Part

Consider forming a partnership, using one of the techniques described in part II.Q.7.h Distributing Assets; Drop-Down into Partnership, more than two years before selling property.

The corporation then might sell the partnership interest using an installment note to defer tax.⁵¹⁸⁰ If the corporation is an S corporation, be sure not to convert capital gain into ordinary income by using depreciable or amortizable assets.⁵¹⁸¹

The partnership's tax return for the year of the sale of the partnership interest (or before) would elect to step-up the basis of its underlying assets.⁵¹⁸²

If and to the extent that the corporation is a C corporation that can sell the partnership interest at a discount relative to the partnership's underlying assets, that discount reduces income subject to C corporation income tax.

Be careful if the corporation is an S corporation that was a C corporation within the past 5 years.⁵¹⁸³

II.Q.7.j. Prohibition Against Using Partnership to Circumvent Tax on Gain in Property Used to Redeem Stock

Promulgated under Code § 732(f), Reg. § 1.337(d)-3(b) provides that a corporate partner is required to recognize gain when a transaction has the effect of the corporate partner acquiring or increasing an interest in its own stock in exchange for appreciated property when a partnership, either directly or indirectly, owns, acquires, or distributes stock of the corporate partner. Furthermore, Code § 732(f) provides that, if (1) a corporate partner receives a distribution from a partnership of stock in another corporation (distributed corporation); (2) the corporate partner has control of the distributed corporation immediately after the distribution or at any time thereafter; and (3) the partnership's basis in the stock immediately before the distribution exceeded the corporate partner's basis in the stock immediately after the

⁵¹⁷⁹ See part II.M.4.g Options to Acquire Equity, especially the text accompanying fn. 3786. See also part III.B.7.c Code § 2701 Interaction with Income Tax Planning.

⁵¹⁸⁰ See parts II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future and II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.

⁵¹⁸¹ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

⁵¹⁸² See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

⁵¹⁸³ See part II.P.3.b.ii Built-in Gain Tax.

distribution, then the basis of the distributed corporation's property must be reduced by this excess.⁵¹⁸⁴

II.Q.7.k. Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation

Code § 1202 excludes part or all of the gain⁵¹⁸⁵ on the sale of stock in a qualified small business corporation originally issued to the seller (with some exceptions)⁵¹⁸⁶ and held for at least five years,⁵¹⁸⁷ be sure also to check for state income tax recognition of the exclusion.⁵¹⁸⁸ Many types of businesses are ineligible.⁵¹⁸⁹ Also, the corporation needs to have no more than \$50 million at all times before and immediately after stock issuance⁵¹⁹⁰ and needs to have conducted sufficient business activities at all times.⁵¹⁹¹ These business activities need to be either directly or through C corporation subsidiaries and require at least 80% of the assets being used for those activities (with additional restrictions on real estate ownership); they do not appear to be able to be done through partnership subsidiaries.⁵¹⁹² The corporation must have been a C corporation during substantially all of the taxpayer's holding period for such stock.⁵¹⁹³ Thus, stock in a former S corporation would not qualify, but an S corporation may form a C corporation subsidiary that would qualify,⁵¹⁹⁴ but beware of the mechanics.⁵¹⁹⁵

The exclusion for most taxpayers is the greater of \$10 million or 10 times the qualified small business stock's adjusted basis of the issued by the corporation and disposed of by the taxpayer during the taxable year.⁵¹⁹⁶ Adjusted basis used in the 10-times calculation includes the fair market value of property contributed to the corporation, but any built-in gain in contributed assets is not eligible for the exclusion, so running a business as a partnership and

⁵¹⁸⁴ T.D. 9833 (6/8/2018), promulgating Reg. § 1.732-3. T.D. 9833 further provides:

The amount of this reduction is limited to the amount by which the sum of the aggregate adjusted basis of property and the amount of money of the distributed corporation exceeds the corporate partner's adjusted basis in the stock of the distributed corporation.

⁵¹⁸⁵ See text accompanying fns 5210-5215 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation. CCA 200609024 took the position that, in determining whether the statute of limitations was extended by omitting more than 25% of gross income, any capital gain excluded by Code § 1202 is not included in the gross income calculation.

⁵¹⁸⁶ See text accompanying fns 5230-5254 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁸⁷ See text accompanying fn 5218 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁸⁸ See Exhibit 3 of Jenson & Kohn, "Maximize Qualified Small Business Stock Exclusion," *Estate Planning Journal* (WG&L), October 2018.

⁵¹⁸⁹ See text accompanying fns 5265-5270 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁹⁰ See text accompanying fns 5260-5264 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁹¹ See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵¹⁹² See fns 5277-5280 and 5290-5292 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵¹⁹³ See fn 5255 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁹⁴ See text accompanying fns 5234-5240 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁹⁵ See text accompanying fns 5257-5259 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵¹⁹⁶ See text accompanying fns 5210-5215 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

then converting to a C corporation has advantages and disadvantages for Code § 1202 purposes,⁵¹⁹⁷ as well as other tax considerations (beware of contributing too much debt; also consider forming a separate corporation for each business).⁵¹⁹⁸

In contrast to the Code § 1202 exclusion, which requires a five-year holding period, under Code § 1045 a taxpayer may roll over the gain on the sale of qualified small business stock (QSBS) held for only six months by investing in other QSBS. See part II.Q.7.k.iv Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS.

Here are some ideas when comparing the Code § 1202 exclusion to other tools:

- Purchasers of businesses want to get a new basis in the business' assets rather than just buying stock.
 - If they buy stock instead of assets, they tend to require the sellers to make a special election to treat the stock sale as an asset sale followed by a liquidation; for example, see part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold in part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
 - When an S corporation's assets are deemed sold, the gain or other income on the shareholders' K-1s increases the basis in their stock.⁵¹⁹⁹ This benefit is much better than suffering through the limitations of Code § 1202 described in this part II.Q.7.k, because it applies regardless of the type of business, wipes out all of the gain (not just gain protected by Code § 1202), applies for state income tax purposes (not all states recognize Code § 1202), and protects more than just the original owner; further, an S corporation provides for tax-free distributions of earnings, which is not available for a C corporation.⁵²⁰⁰ See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.
- A seller-financed sale of a partnership may be able to avoid capital gain tax on the sale of goodwill, making it more tax-efficient than a tax-free sale of stock. For how the Code § 1202 exclusion compares to other sales of business, see part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis. You will notice that a redemption (purchase by the C corporation) is less taxing than a cross-purchase (purchase by other shareholders). In a cross-purchase, the purchased stock will not be eligible for the Code § 1202 exclusion when the buyer later sells it, because it was not originally issued to the buyer.⁵²⁰¹ Similarly, if stock is issued too close to a redemption (within two years), the

⁵¹⁹⁷ See text accompanying fns 5335-5336 in part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

⁵¹⁹⁸ See text accompanying fns 5336-5337 in part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

⁵¹⁹⁹ Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.

⁵²⁰⁰ See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property

⁵²⁰¹ See text accompanying fns 5230-5233 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

transactions may be stepped together and the new stock treated as if it had been sold to the buyer instead of issued to the buyer.⁵²⁰²

Here is an example of Code § 1202, taken from an ABA Section of Taxation meeting:⁵²⁰³

- Tom Investor and Tammy Techy organize We Are Tech, LLC on 1/1/2016.
- Each provides capital contributions of \$2 million in exchange for 50% interest in the LLC, which is taxed as a partnership.
- During 2016, the LLC purchases a building for \$2 million cash and no debt, creates IP assets worth \$2 million, and sustains a \$1 million loss.
- Thus, each member's capital account and outside basis is \$1.5 million at the end of 2016.
- On January 1, 2017, the LLC incorporates as We Are Tech, Inc., a C corporation that would qualify as a qualified small business stock, in an assets-over transaction:
 - The LLC contributes all assets to the C corporation in exchange for stock, then distributes stock to each member in liquidation.
 - The transaction qualifies under Code § 351.⁵²⁰⁴ See also Rev. Rul. 84-111.⁵²⁰⁵
 - The fair market value of the LLC's assets was \$5 million at the time of transaction.
- Each shareholder receives a \$1.5 million carry-over basis for general tax purposes⁵²⁰⁶ and a \$2.5 million basis (50% of fair market value) in applying Code § 1202.⁵²⁰⁷
- On January 1, 2018, Tom sells his stock in We Are Tech, Inc. for \$10 million. Tom has realized an \$8.5 million long-term capital gain (\$10 million proceeds minus \$1.5 million adjusted basis).
- Within 60 days, Tom reinvests in Tech Savvy, Inc., a qualified small business, for \$8 million and elects rollover treatment under Code § 1045.⁵²⁰⁸ Consequences:

⁵²⁰² See text accompanying fns 5242-5254 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵²⁰³ May 2018 meeting of the Sales, Exchanges and Basis Committee II.Q.7.k.ii of the American Bar Association's Section of Taxation, program name "The Tax Exemption for Small Business Stock is Big Business," slides named "Section 1202 Qualified Small Business Stock," presented by Kohn, Friedman, Rappaport, and Kristall (the latter probably did not author, because the IRS does not author presentation materials at such meetings).

⁵²⁰⁴ See part II.M.2 Buying into or Forming a Corporation.

⁵²⁰⁵ See part II.P.3.c.ii Transfer of Partnership Assets and Liabilities to a Newly Formed Corporation in Exchange for All of its Stock.

⁵²⁰⁶ Code § 358(a).

⁵²⁰⁷ See fns 5213-5220 (overall limitation on amount of gain excluded and determination of gain subject to exclusion) of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵²⁰⁸ See part II.Q.7.k.iv Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS.

- Total recognition of \$3 million long-term capital gain (LTCG), consisting of:
 - Immediate recognition of \$1 million LTCG, which is the built-in gain deferred upon incorporation.⁵²⁰⁹
 - Immediate recognition of \$2 million LTCG, which under Code § 1045(a) is the \$10 million gross sales price minus the \$8 million gross purchase price of replacement qualified small business stock
- Adjusted basis under Code § 1045(b)(3) is \$2.5 million.
- On January 2, 2022, Tom sells all of his stock in Tech Savvy, Inc. for \$25 million without rolling over to another qualified small business:
 - Tom has realized an \$22.5 million long-term capital gain (\$25 million proceeds minus \$2.5 million adjusted basis).
 - The Code § 1202 exclusion limit is \$25 million, which is ten times the \$2.5 million basis under Code § 1202.
 - The \$22.5 million long-term capital gain is less than the Code § 1202 exclusion limit of \$25 million, so all of the gain is excluded.
- Contrast with Tom selling all We Are Tech, Inc. stock to purchase Tech Savvy, Inc. in a non-Code § 1045 rollover:
 - \$1 million total long-term capital gain recognition.
 - No need to recognize the other \$2 million under Code § 1045(a).
 - However, Tom would need to wait until January 2, 2023 to sell in order to meet his holding period requirement.

Other ideas when selling C corporation stock are covered in parts:

- II.G.7 Deferral or Partial Exclusion of Capital Gains (Even from Investment Assets) Invested in Opportunity Zones
- II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy
- II.Q.7.I Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244
- II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

⁵²⁰⁹ See fns 5213-5220 (overall limitation on amount of gain excluded and determination of gain subject to exclusion) of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

II.Q.7.k.i. Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation

This part II.Q.7.k applies to stock issued on or after August 11, 1993. The amount of gain that is subject to partial or complete exclusion from income cannot exceed the greater of:⁵²¹⁰

- (A) \$10 million (\$5 million for married filing separately)⁵²¹¹ reduced by the aggregate amount of eligible gain taken into account under this rule for prior taxable years and attributable to dispositions of stock issued by such corporation, or
- (B) 10 times the aggregate adjusted bases⁵²¹² of qualified small business stock issued by the corporation and disposed of by the taxpayer during the taxable year. The greater of basis or the fair market value of property contributed for Code § 1202 stock counts towards this basis limitation.⁵²¹³ The adjusted basis of any stock is determined without regard to any addition to basis after the date on which such stock was originally issued;⁵²¹⁴ therefore, to maximize the benefit of capital contributions, they should be made only in exchange for new stock when the company has assets with a basis (subject to unusual rules defining basis) of no more than \$50 million.⁵²¹⁵

The taxpayer must not be a corporation.⁵²¹⁶ However, an S corporation that holds qualified small business stock may be looked through to its owners who are taxed on the gain.⁵²¹⁷

Gain is eligible only if from the sale or exchange of qualified small business stock held for more than 5 years.⁵²¹⁸ Also:⁵²¹⁹

⁵²¹⁰ Code § 1202(b)(1).

⁵²¹¹ Code § 1202(b)(3).

⁵²¹² Only the basis on the date of issuance counts for purposes of this test. See the flush language at the end of Code § 1202(b)(1).

⁵²¹³ Code § 1202(i)(1) provides that, for purposes of Code § 1202:

Stock exchanged for property. In the case where the taxpayer transfers property (other than money or stock) to a corporation in exchange for stock in such corporation -

(A) such stock shall be treated as having been acquired by the taxpayer on the date of such exchange, and

(B) the basis of such stock in the hands of the taxpayer shall in no event be less than the fair market value of the property exchanged.

The legislative history quoted in the text accompanying fn 5219 makes me wonder whether this increase in the overall amount excluded was intended, but the statute's literal language appears to provide this result.

⁵²¹⁴ Code § 1202(b)(1) (flush language).

⁵²¹⁵ See fns 5260-5264.

⁵²¹⁶ Code § 1202(a)(1).

⁵²¹⁷ Code § 1202(g), discussed in the text accompanying fns 5234-5240 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵²¹⁸ Code § 1202(b)(2).

⁵²¹⁹ H. Rept. No. 103-111 (P.L. 103-66), p. 603. Code § 1202(i) provides that, for purposes of Code § 1202:

(1) *Stock exchanged for property.* In the case where the taxpayer transfers property (other than money or stock) to a corporation in exchange for stock in such corporation-

(A) such stock shall be treated as having been acquired by the taxpayer on the date of such exchange, and

If property (other than money or stock) is transferred to a corporation in exchange for its stock, the basis of the stock received is treated as not less than the fair market value of the property exchanged. Thus, only gains that accrue after the transfer are eligible for the exclusion.

Thus, contributing appreciated property in exchange for stock is a double-edged sword. On one hand, it provides an even greater amount of future gain that can be excluded. On the other hand, the built-in gain at the time of contribution is not eligible for the exclusion, whereas it would have been eligible if the property had been contributed earlier so that the appreciation occurred after contribution. Thus, if a partnership is considering converting to a C corporation, its owners should consider how long before they intend to sell (so that the 5-year holding period is satisfied) and whether appreciation while a partnership is good (to increase the 10-times-basis exclusion) or bad (pre-conversion appreciation ineligible for the exclusion).⁵²²⁰

A taxpayer who wishes to try to exceed these limitations might transfer stock to family members or others by gift before the stock appreciates, and presumably each donee would separately apply the limitation.⁵²²¹ If the taxpayer has insufficient lifetime gift tax exemption, consider transferring part of the stock to one or more incomplete gift nongrantor (ING) trusts;⁵²²² however, beware part II.J.9.c.i Multiple Trusts Created for Tax Avoidance. Another way to get more than \$10 million limitation would be to have a separate C corporation for each qualified business.

For “qualified small business stock” issued after September 27, 2010 and held for more than five years, Code § 1202 excludes from income all of the gain from its sale or exchange, within the limits set forth above.⁵²²³

For “qualified small business stock” issued before September 28, 2010 and held for more than five years, Code § 1202 excludes from income a portion of the gain from its sale or exchange (within the limits set forth above)⁵²²⁴:

- If the above and other requirements are satisfied, then the portion excluded from income is 50% for stock (60% for gain attributable to an empowerment zone business) acquired before February 18, 2009 and 75% for stock acquired on or before September 27, 2010.⁵²²⁵

(B) the basis of such stock in the hands of the taxpayer shall in no event be less than the fair market value of the property exchanged.

- (2) *Treatment of contributions to capital.* If the adjusted basis of any qualified small business stock is adjusted by reason of any contribution to capital after the date on which such stock was originally issued, in determining the amount of the adjustment by reason of such contribution, the basis of the contributed property shall in no event be treated as less than its fair market value on the date of the contribution.

⁵²²⁰ See fn 5336 in part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

⁵²²¹ See Code § 1202(h), discussed at fns. 5296-5297.

⁵²²² See text accompanying fns 2529-2531 in part II.J.3.e.i Strategic State & Local Tax Issues re: Residence, briefly mentioning the idea of an incomplete gift nongrantor (ING) trust.

⁵²²³ See text accompanying fn 5210.

⁵²²⁴ See text accompanying fn 5210.

⁵²²⁵ Code § 1202(a).

- Any gain that is not excluded is subject to 28% tax instead of the usual, lower capital gain rates.⁵²²⁶
- Note also that taxable gain from the sale of C corporation stock is subject to the 3.8% tax on net investment income,⁵²²⁷ whereas gain on the sale of a partnership or S corporation stock engaged in a trade or business is largely excluded from that tax.⁵²²⁸

For stock acquired after September 27, 2010, alternative minimum taxable income no longer applies to the amount excluded from regular taxable income.⁵²²⁹

An example combining Code §§ 1202 and 1045 is in the text following fn 5203 in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

“Qualified small business stock” means any stock in a C corporation which the taxpayer acquires on original issue by a qualified small business either in exchange for money or other property (not including stock)⁵²³⁰ or as compensation for services provided to such corporation (other than services performed as an underwriter of such stock).⁵²³¹ An option to acquire stock does not count as stock until the stock is actually issued to the taxpayer.⁵²³² The House Report for the 1993 Revenue Reconciliation Act, P.L. 103-66, included:

⁵²²⁶ Compare Code § 1(h)(4) (tax on Code § 1202 gain) to Code § 1(h)(1) (tax on capital gains generally).

⁵²²⁷ See part II.I 3.8% Tax on Excess Net Investment Income (NII).

⁵²²⁸ See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

⁵²²⁹ Code § 1202(a)(4)(C), eliminating the application of Code § 57(a)(7).

⁵²³⁰ But, if a corporate reorganization is involved, see fn 5301 of part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵²³¹ Code § 1202(c)(1).

⁵²³² *Natkunanathan v. Commissioner*, T.C. Memo. 2010-15, *aff'd* 479 Fed. Appx. 775 (9th Cir. 2012), held that, where the taxpayer had been issued options to buy stock in his employer and did not exercise those options, except to acquire shares in a corporation (Intel) that acquired his employer, the taxpayer could not apply Code § 1202:

Section 1202 itself does not define the term “stock” or otherwise specify what securities constitute stock for purposes of the qualified small business stock exclusion. By comparison, some provisions of the Code explicitly specify that the term “stock” includes options to acquire stock. See, e.g., sec. 305(d)(1) (“For purposes of this section, the term ‘stock’ includes rights to acquire such stock.”); sec. 1091(a) (same). We are unaware of any authority that has interpreted the term “stock” for purposes of section 1202. However, we have previously declined to extend the term “stock” beyond its plain meaning in a statutory provision and construe it expansively to include options to acquire stock. See *Gantner v. Commissioner*, 91 T.C. 713 (1988) (options to purchase stock are not “shares” of “stock or securities” under the plain language of section 1091, which was subsequently amended to explicitly provide otherwise), *aff'd*. 905 F.2d 241 (8th Cir. 1990). Moreover, the legislative history of section 1202 suggests that Congress did not intend section 1202 to cover options to acquire stock.

Section 1202 was added to the Code by the Omnibus Budget Reconciliation Act of 1993, Pub.L. 103-66, sec. 13113(a), 107 Stat. 422. The accompanying conference report included the following statement: “Stock acquired by the taxpayer through the exercise of options * * * is treated as acquired at original issue. The determination whether the gross assets test is met is made *at the time of exercise* * * * and the holding period of such stock is treated as beginning at that time.” H. Conf. Rept. 103-213, at 526 (1993), 1993-3 C.B. 393, 404 (emphasis added). The second sentence of the excerpt from the conference report quoted above, in the absence of any countervailing argument by petitioner, suggests to us that the original issuance contemplated by

Options, nonvested stock, and convertible instruments.

Stock acquired by the taxpayer through the exercise of options or warrants, or through the conversion of convertible debt, is treated as acquired at original issue. The determination whether the gross assets test is met is made at the time of exercise or conversion, and the holding period of such stock is treated as beginning at that time.

In the case of convertible preferred stock, the gross assets determination is made at the time the convertible stock is issued, and the holding period of the convertible stock is added to that of the common stock acquired upon conversion.

Stock received in connection with the performance of services is treated as issued by the corporation and acquired by the taxpayer when included in the taxpayer's gross income in accordance with the rules of section 83.

Offsetting short positions.

A taxpayer cannot exclude gain from the sale of qualified small business stock if the taxpayer (or a related person) held an offsetting short position with respect to that stock any time before the 5-year holding period is satisfied. If the taxpayer (or a related person) acquires an offsetting short position with respect to qualified small business stock after the 5-year holding period is satisfied, the taxpayer must elect to treat the acquisition of the offsetting short position as a sale of the qualified small business stock in order to exclude any gain from that stock.

An offsetting short position is defined to be (1) a short sale of property substantially identical to the qualified small business stock (including writing a call option that the holder is more likely than not to exercise or selling the stock for future delivery) or (2) an option to sell substantially identical property at a fixed price.

If any stock in a corporation is acquired solely through the conversion of other stock in such corporation which is qualified small business stock in the hands of the taxpayer, the stock so acquired is treated as qualified small business stock in the hands of the taxpayer and is treated as having been held during the period during which the converted stock was held.⁵²³³

Special rules apply to C corporation stock owned by certain pass-through entities.⁵²³⁴ A pass-through entity is any partnership, any S corporation,⁵²³⁵ any regulated investment company

section 1202 in petitioner's case would be the issuance of Intel stock to petitioner upon exercise of his options. This conclusion seems appropriate since both the application of the gross assets test and the commencement of the holding period would occur at the time of such exercise.

Reading the term "stock" as used in section 1202 to exclude petitioner's options to acquire stock, we hold that petitioner could not possibly have satisfied the 5-year holding period requirement of section 1202(a)(1). Petitioner concedes that he sold the Intel stock received upon exercise of his options on the same day that he had exercised the options. Therefore, the period during which petitioner could have held qualified small business stock would, at most, have lasted 1 day.

Moreover, for the stock underlying petitioner's options to constitute qualified small business stock under section 1202(d)(1), the aggregate gross assets of Intel on the date of exercise would have to have been less than or equal to \$50 million. Petitioner makes no such claims with respect to Intel's aggregate gross assets.

⁵²³³ Code § 1202(f).

⁵²³⁴ Code § 1202(g).

⁵²³⁵ Code § 1202(g)(4)(B).

(RIC),⁵²³⁶ or any common trust fund.⁵²³⁷ If any amount included in gross income by reason of holding an interest in a pass-through entity meets the requirements of the following sentence, the amount shall be treated as Code § 1202(a) gain and, for purposes of applying Code § 1202(b), that amount is treated as gain from a disposition of stock in the corporation issuing the stock disposed of by the pass-through entity and the taxpayer's proportionate share of the adjusted basis of the pass-through entity in such stock is taken into account.⁵²³⁸ The amount must be attributable to gain on the sale or exchange by the pass-through entity of stock which is qualified small business stock in the hands of such entity (determined by treating such entity as an individual) and which was held by such entity for more than 5 years, and such amount must be includible in the gross income of the taxpayer by reason of the holding of an interest in such entity which was held by the taxpayer on the date on which such pass-through entity acquired such stock and at all times thereafter before the disposition of such stock by such pass-through entity.⁵²³⁹ This gain exclusion does not apply to any amount to the extent such amount exceeds the amount to this rule would have applied if the amount were determined by reference to the interest the taxpayer held in the pass-through entity on the date the qualified small business stock was acquired.⁵²⁴⁰

The original issuance requirement means that stock bought from another shareholder would not qualify. May one avoid this prohibition by redeeming the seller and issuing stock to the buyer? Code § 1202(c)(3) imposes a waiting period related to redemption activity (including certain cross-purchases between related persons).⁵²⁴¹ Stock is disqualified if, at any time within 2 years before or after the issuance of such stock, the corporation issuing such stock purchased

⁵²³⁶ Code § 1202(g)(4)(C). Notice 97-64, § 8, contemplates that temporary regulations will provide guidance on how RICs may designate dividends as "section 1202 gain distributions," which guidance is: expected to provide that: (1) section 1202 gain distributions will be designated separately for different issuers of qualified small business stock; (2) the exclusion from income permitted by section 1202 will be determined at the shareholder level not the RIC level; and (3) the maximum distributable section 1202 gain for each issuer will be calculated separately from limitations on all other classes of capital gain dividends but in the aggregate will not exceed the RIC's net capital gain.

Notice 2015-41, § 5, provides that Notice 97-64, § 8, continues to apply. Notice 2015-41, § 3, requires that RICs must account for "section 1202 gain" in distributions. Code § 1202(g) applies to such distributions.

⁵²³⁷ Code § 1202(g)(4).

⁵²³⁸ Code § 1202(g)(1).

⁵²³⁹ Code § 1202(g)(2).

⁵²⁴⁰ Code § 1202(g)(3).

⁵²⁴¹ Code § 1202(c)(3)(C) refers to Code § 304(a), "Acquisition by related corporation (other than subsidiary)," which provides:

For purposes of sections 302 and 303, if -

(A) one or more persons are in control of each of two corporations, and

(B) in return for property, one of the corporations acquires stock in the other corporation from the person (or persons) so in control,

then (unless paragraph (2) applies) such property shall be treated as a distribution in redemption of the stock of the corporation acquiring such stock. To the extent that such distribution is treated as a distribution to which section 301 applies, the transferor and the acquiring corporation shall be treated in the same manner as if the transferor had transferred the stock so acquired to the acquiring corporation in exchange for stock of the acquiring corporation in a transaction to which section 351(a) applies, and then the acquiring corporation had redeemed the stock it was treated as issuing in such transaction.

(directly or indirectly) any of its stock from the taxpayer or from a person related⁵²⁴² to the taxpayer.⁵²⁴³ In applying the preceding sentence, one can ignore stock acquired from the taxpayer or a related person if the aggregate amount paid for the stock does not exceed \$10,000 and no more than 2% of the stock held by the taxpayer and related persons is acquired.⁵²⁴⁴ Also, stock is disqualified if, within the year before or after the issuance of such stock, the corporation made one or more purchases of its stock with an aggregate value (as of the time of the respective purchases) exceeding 5% of the aggregate value of all of its stock as of the beginning of that 2-year period.⁵²⁴⁵ The preceding sentence has a similar de minimis rule.⁵²⁴⁶ These rules are strict and do not exclude redemptions that are not tied to issuances. For example, two founders don't get along, and the departing founder could sell his stock to either the corporation or to the remaining founder. If the departing founder were the buyer, the corporation may need to issue a dividend to that buyer, causing the buyer to pay a dividend tax.⁵²⁴⁷ If the corporation were the buyer, this dividend tax could be avoided,⁵²⁴⁸ but under the above anti-abuse rule the redemption may taint any issuance to a related party, whether the continuing founder or a new investor.

Although generally a shareholder who transfers stock to an employee or independent contractor (or to a beneficiary of an employee or independent contractor) is treated as transferring the stock to the corporation and the corporation then transferring the stock to the employee or independent contractor,⁵²⁴⁹ any such deemed transfer to the corporation is not treated as such for purposes of the anti-redemption rules.⁵²⁵⁰ The anti-redemption rules also are not triggered by any of the following:

⁵²⁴² Within the meaning of Code § 267(b) or 707(b). For a description of Code § 267(b), see part II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses. For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

⁵²⁴³ Code § 1202(c)(3)(A).

⁵²⁴⁴ Reg. § 1.1202-2(a)(2), which further provides:

The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock held (directly or indirectly) by the taxpayer and related persons immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

⁵²⁴⁵ Code § 1202(c)(3)(B).

⁵²⁴⁶ Reg. § 1.1202-2(b)(2) provides that, for purposes of this exception:

... stock exceeds a de minimis amount only if the aggregate amount paid for the stock exceeds \$10,000 and more than 2 percent of all outstanding stock is purchased. The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of the stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock outstanding immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

⁵²⁴⁷ See part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, which is a variation of part II.Q.1.a.i.(a) C Corporation Triple Taxation.

⁵²⁴⁸ Contrast part II.Q.1.a.i.(b) C Corporation Redemption with part II.Q.1.a.i.(a) C Corporation Triple Taxation.

⁵²⁴⁹ Reg. § 1.83-6(d)(1).

⁵²⁵⁰ Reg. § 1.1202-2(c).

- The stock was acquired by the seller in connection with the performance of services as an employee or director and the stock is purchased from the seller incident to the seller's retirement or other bona fide termination of such services.⁵²⁵¹
- Before a decedent's death, the stock (or an option to acquire the stock) was held by the decedent or the decedent's spouse (or by both), by the decedent and joint tenant, or by a trust revocable by the decedent or the decedent's spouse (or by both), and the stock is purchased from the decedent's estate, beneficiary (whether by bequest or lifetime gift), heir, surviving joint tenant, or surviving spouse, or from a trust established by the decedent or decedent's spouse; and the stock is purchased within 3 years and 9 months from the date of the decedent's death.⁵²⁵²
- The stock is purchased incident to the disability or mental incompetency of the selling shareholder.⁵²⁵³
- The stock is purchased incident to the divorce (within the meaning of Code § 1041(c)) of the selling shareholder.⁵²⁵⁴

During substantially all of the taxpayer's holding period for such stock, the corporation must be a C corporation and use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses.⁵²⁵⁵ See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold. Therefore, the C corporation cannot have been an S corporation. However, an S corporation can contribute its assets to a C corporation, and the C corporation could then qualify for the exclusion.⁵²⁵⁶ To simplify this process, the owners of the S corporation form a parent S corporation, which new parent assumes all of the original S corporation's tax attributes;⁵²⁵⁷ this makes the original corporation a disregarded entity;⁵²⁵⁸ then the original corporation elects C corporation treatment. Although technically this reorganization works, it appears that the subsidiary would have the same tax ID as the parent S corporation,⁵²⁵⁹ making

⁵²⁵¹ Reg. § 1.1202-2(d)(1)(i).

⁵²⁵² Reg. § 1.1202-2(d)(2).

⁵²⁵³ Reg. § 1.1202-2(d)(3).

⁵²⁵⁴ Reg. § 1.1202-2(d)(4).

⁵²⁵⁵ Code § 1202(c)(2)(A), (e). The taxpayer must affirmatively prove what the business assets are and that they met this 80% test. *Holmes v. Commissioner*, T.C. Memo. 2012-251, held:

The record is again devoid of documentary evidence showing the amount of corporate assets owned during the years in which he held the stock and the amount of those assets used in its business of providing on demand physician practice management software. In fact, the only evidence in the record concerning LeonardoMD's business is a stipulated paragraph describing its business as providing on demand physician practice management software delivered over the Web, and petitioner's above-cited testimony. We cannot, on the basis of uncorroborated testimony and a stipulation that does not rule out inactive business assets and income, reasonably conclude that petitioner met his burden of proving that, during substantially all of his holding period for LeonardoMD stock, the corporation used at least 80% of its assets in the active conduct of one or more qualified trades or businesses.

⁵²⁵⁶ See fn 5235.

⁵²⁵⁷ See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fn 4096.

⁵²⁵⁸ See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

⁵²⁵⁹ See Reg. § 301.6109-1(i)(3) in the text accompanying fn 189 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

the C corporation appear on the IRS' records as a former S corporation, even though technically it is considered a new C corporation.

The corporation's aggregate gross assets cannot have a basis exceeding \$50 million.⁵²⁶⁰

- (A) the aggregate gross assets of such corporation (or any predecessor thereof) at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993, and before the issuance did not exceed \$50,000,000,
- (B) the aggregate gross assets of such corporation immediately after the issuance (determined by taking into account amounts received in the issuance) does not exceed \$50,000,000, and
- (C) such corporation agrees to submit such reports to the Secretary and to shareholders as the Secretary may require to carry out the purposes of this section.⁵²⁶¹

Although regulations have not been issued regarding reporting requirements, taxpayers will lose the deduction if they do not have records to substantiate that the stock met this requirement.⁵²⁶²

⁵²⁶⁰ Code § 1202(d). This applies to gross assets at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993 and before the issuance, as well as immediately after the issuance (determined by taking into account amounts received in the issuance).

⁵²⁶¹ [Footnote is mine and not in the statute:] Federal Tax Coordinator Analysis (RIA) ¶ S-4455 Reports With Respect to Exclusion of Gain From Qualified Small Business Stock (QSBS) reports:

IRS has yet to issue either any reporting requirements described in Code Sec. 1202(d)(1)(C) ... or any guidance as to the manner in which, as mandated by Code Sec. 1202(d)(1)(C), a corporation is to agree to meet these requirements. RIA understands that, until IRS provides guidance as to the manner in which a corporation is to agree, a corporation can issue QSBS without the necessity for the corporation to file any sort of agreement that it will comply with any reporting requirements, if and when issued. Presumably, if IRS ever does require reporting, it will prescribe procedures at that time for making the agreement called for in the Code.

⁵²⁶² *Natkunanathan v. Commissioner*, T.C. Memo. 2010-15, *aff'd* 479 Fed. Appx. 775 (9th Cir. 2012), held:

There are no balance sheets or other financial statements of Cognet in the record that establish the amounts of total assets, total liabilities, or owner's equity of Cognet at any time, and petitioner made no attempt to introduce any such evidence at trial.⁵ In the absence of any such evidence, we cannot determine the value of Cognet's gross assets at the time that it issued options to petitioner and, therefore, cannot conclude that Cognet constituted a qualified small business within the meaning of section 1202(d)(1) at that time.

⁵ After the trial petitioner attached to his reply brief a document purporting to be a statement by the chief executive officer of Cognet at the time of its acquisition by and merger with Intel declaring that "*To the best of my recollection*, the company's assets, including physical assets and total value of outstanding shares did not exceed \$50,000,000 before the acquisition." [Emphasis added.]

Subsequently, after the record had closed upon the filing of reply briefs, petitioner filed a motion for leave to reopen the record in order to introduce a notarized version of this and other documents. A notarized written statement from Cognet's chief executive officer, even if it were introduced at trial, could have been subject to a hearsay objection and, absent concessions or stipulation by respondent, would probably not have been admitted into evidence. But here, where the purported statement constitutes an affidavit attached to a brief, Rule 143(b) explicitly bars us from considering it as evidence. We have previously issued an order denying petitioner's motion to reopen the record as inappropriate because petitioner has not shown good cause for his failure to introduce such evidence at trial.

As used above, “aggregate gross assets” means the amount of cash and the aggregate adjusted bases of other property held by the corporation.⁵²⁶³ As used in (A) above:⁵²⁶⁴

The adjusted basis of any property contributed to the corporation (or other property with a basis determined in whole or in part by reference to the adjusted basis of property so contributed) shall be determined as if the basis of the property contributed to the corporation (immediately after such contribution) were equal to its fair market value as of the time of such contribution.

The following businesses are not eligible for this treatment:⁵²⁶⁵

- any trade or business involving the performance of services in the fields of health,⁵²⁶⁶ law, engineering, architecture, accounting, actuarial science, performing arts,⁵²⁶⁷ consulting,⁵²⁶⁸ athletics, financial services, brokerage services, or any other trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees,⁵²⁶⁹
- any banking, insurance, financing, leasing, investing, or similar business,
- any farming business (including the business of raising or harvesting trees),
- any business involving the production or extraction of products, such as oil, gas and mines, eligible for certain depletion deductions, or
- any business of operating a hotel, motel, restaurant, or similar business.

Issuing stock options does not necessarily qualify as issuing stock; however, the taxpayer did not hold actual stock for the five-year holding period, so that’s why the court looked at when the stock options were issued. See fn 5232 for more about these issues.

⁵²⁶³ Code § 1202(d)(2)(A).

⁵²⁶⁴ Code § 1202(d)(2)(B).

⁵²⁶⁵ Code § 1202(e)(3). Code § 1202(e)(3)(A) is discussed in part II.E.1.c.iv Specified Service Trade or Business (SSTB) If Taxable Income Exceeds Certain Thresholds. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202. CCA 202204007 is discussed after these bullet points.

⁵²⁶⁶ Letter Rulings 201436001 and 201717010 are discussed after these bullet points. For additional context, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(b) Health. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202.

⁵²⁶⁷ For additional context regarding performing arts, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(f) Performing Arts. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202.

⁵²⁶⁸ For additional context regarding consulting, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(g) Consulting. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202. Letter Ruling 202342015 is discussed after these bullet points.

⁵²⁶⁹ Letter Ruling 202319013 and *Owen v. Commissioner*, T.C. Memo. 2012-21, are discussed after these bullet points.

However, engaging in the above activities is not fatal, if it comprises a sufficiently small part of the business.⁵²⁷⁰

The corporation must be a domestic corporation other than a DISC or former DISC, corporation with respect to which an election under Code § 936 is in effect or which has a direct or indirect subsidiary with respect to which such an election is in effect, regulated investment company, real estate investment trust, REMIC, or cooperative.⁵²⁷¹

Below are some rulings elaborating on the bullet point disqualified businesses:

CCA 202204007 asserted:

We conclude that Corporation should be classified as a broker under the common meaning of the term and as it is defined under § 6045, rather than the more narrow definition that applies for purposes of § 199A.⁹ While Corporation states that it does not provide brokerage services but instead provides advertising services, it is our view that the actions and services provided by Corporation support our position that Corporation is a broker for purposes of § 1202(e)(3)(A).

⁹ It is important to emphasize that the §199A regulations' narrow interpretation of what constitutes brokerage services by its terms only applies for purposes of § 199A and no other Code section. Further, the examples in the section 448 regulations confirm the common meaning of the term brokerage services.

A broker serves as an intermediary between a buyer and a seller, and Corporation does this. Corporation does not just passively publish advertisements on its website that are provided to it from potential lessors desiring to lease property. Unlike a search engine that provides content to users and also sends targeted advertisements to those users based on their search history, Corporation's website is solely devoted to effectuating agreements between potential lessors and potential lessees of certain property.

Corporation charges a minimum flat fee to lessors irrespective of whether a potential lessor succeeds in entering into lease agreements as a result of the use of Corporation's website. However, Corporation is also compensated on a commission basis based on leasing transactions that are entered into as the result of the use of Corporation's website.

Corporation does not have the authority to enter into leasing agreements on behalf of lessors that use its services. Corporation only provides a vehicle for potential lessees to transmit non-binding reservation requests to potential lessors. Only the potential lessor and lessee have the authority to enter into a binding lease agreement. However, brokerage activity can include simply bringing a potential buyer and seller together to work out the transaction. See *American West Hotel Brokers v. Wu*, 697 P.2d 34, 36 (Colo. 1985).

The fact that Corporation's services are provided by software created by people rather than directly by people does not change the functional nature of the services. Because

⁵²⁷⁰ See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold, especially fns 5273-5275.

⁵²⁷¹ Code § 1202(e)(4).

Corporation provides brokerage services within the meaning of § 1202(e)(3)(A), taxpayer is not entitled to exclude any of the gain from the sale of stock in Corporation under § 1202.

Letter Ruling 201436001 held that the health service and related exclusion did not apply to the taxpayer:

Section 1202(e)(3) excludes various service industries and specified non-service industries from the term qualified trade or business. Thus, a qualified trade or business cannot be primarily within service industries, such as restaurants or hotels or the providing of legal or medical services. In addition, § 1202(e)(3) excludes businesses where the principal asset of the business is the reputation or skill of one or more of its employees. This works to exclude, for example, consulting firms, law firms, and financial asset management firms. Thus, the thrust of § 1202(e)(3) is that businesses are not qualified trades or businesses if they offer value to customers primarily in the form of services, whether those services are the providing of hotel rooms, for example, or in the form of individual expertise (law firm partners).

Company is not in the business of offering service in the form of individual expertise. Instead, Company's activities involve the deployment of specific manufacturing assets and intellectual property assets to create value for customers. Essentially, Company is a pharmaceutical industry analogue of a parts manufacturer in the automobile industry. Thus, although Company works primarily in the pharmaceutical industry, which is certainly a component of the health industry, Company does not perform services in the health industry within the meaning of § 1202(e)(3). Neither are Company's business activities within any of the prohibited categories set forth in § 1202(e)(3).

Letter Ruling 201717010 held that the health service and related exclusion did not apply to a lab:

Company provides laboratory reports to health care professionals. However, Company's laboratory reports do not discuss diagnosis or treatment. Company neither discusses with, nor is informed by, healthcare providers about the diagnosis or treatment of a healthcare provider's patients. Company's sole function is to provide healthcare providers with a copy of its laboratory report.

Company neither takes orders from nor explains laboratory tests to patients. Company's direct contact with patients is billing patients whose insurer does not pay all of the costs of a laboratory test.

In addition, you represent that the skills employees bring to Company are not useful in performing X tests and that skills they develop at Company are not useful to other employers.

Further, none of Company's revenue is earned in connection with patients' medical care. Other than the laboratory director [who federal law required to have certain qualifications], Company's laboratory technicians are not subject to state licensing requirements or classified as healthcare professionals by any applicable state or federal law or regulatory authority.

Although Company's laboratory reports provide valuable information to healthcare providers, Company does not provide health care professionals with diagnosis or treatment recommendations for treating a healthcare professional's patients nor is Company aware of the health care provider's diagnosis or treatment of the healthcare provider's patients. In addition, the skills that Company's employees have are unique to the work they perform for Company and are not useful to other employers.

Thus, based on the facts and representations submitted, we conclude that for purposes of § 1202(e)(3), Company is not in a trade or business (i) involving the performance of services in the field of health or (ii) where the principal asset of the trade or business is the reputation or skill of one or more of its employees.

Similarly, Letter Ruling 202418001 held that the health service and related exclusion did not apply to a lab:

FACTS

Taxpayer was a founder of Company, a C Corporation, in Year 1. Taxpayer has owned stock in Company since Year 1. Since its formation, the Company has operated as an independent facility performing x.

Company provides x to customers based on orders from the customers' physicians. The order specifies the type of test required and provides basic information about the customer. Company may not change or supplement the order. Company's employees use specialized equipment and software and follow specific Company procedures to conduct x. At the conclusion of x, Company prepares a report for a customer's physician. Further, customers cannot request x directly from Company, and Company cannot diagnose customers or provide medical advice to customers.

Company's employees exercise no independent judgment, as all employee actions are guided by proprietary procedures that Company has developed. Employees receive training on Company's equipment, software, and other proprietary procedures. Company has no education or experience requirements for new hires. Any skills or certifications that employees acquire at Company are not transferrable to other employers.

In addition, Company contracts with several physicians to serve as medical directors. As medical directors, the physicians help develop Company's policies and proprietary protocols, review quality assurance data, and review incoming orders to ensure that Company can accommodate requested tests. The medical directors do not interact with customers, and they provide no diagnoses, medical advice, or treatment on Company's behalf.

ANALYSIS

Company engages in x and provides physicians with a report of the results generated by x. Company's sole function is to conduct x and provide a report to its customers' physicians. Company does not treat or diagnose any customer, nor can Company provide medical advice.

Company employees exercise no independent judgment in conducting x, and follow specific Company procedures in conducting x. Although Company contracts with

medical physicians to serve as Company medical directors, the physicians' roles are to help develop Company policies and procedures, review quality assurance data, and review incoming orders to ensure that Company can accommodate the requested x. In their capacity as medical directors, the physicians do not interact with customers, and they provide no diagnoses, medical advice or treatment on Company's behalf.

CONCLUSION

We conclude that based on the facts and representations submitted, with respect to x, Company was engaged in a qualified trade or business as defined in section 1202(e)(3) and was not engaged in a trade or business involving the performance of services in the fields of health nor engaged in any trade or business where the principal asset of the trade or business is the reputation or skill of one or more of its employees.

Letter Ruling 202342015 involved a C corporation that provided the following services:

Company offers data migration and management services to businesses. It does not sell software or technical equipment as part of the services it provides. To understand its customers' needs, Company creates a transformation assessment plan. Its service delivery teams determine an optimized cloud and data transformation roadmap based on assessment outcomes. Company team members will integrate into the customer's team often on a full-time basis to orchestrate and troubleshoot the data migration and work to implement the data migration, as well as provide limited advice and counsel when working with a customer's team. Company also provides post-migration managed technical services, which include monitoring and resolving incidents.

The invoices provided to Company's clients for the services it performs represent billing for implementation services and embedded advice. Company does not separately bill for advice and counsel. Taxpayer represents that more than 80% of Company's assets are used in its data migration and management business.

Letter Ruling 202342015 reasoned and ruled:

Company's employees provide advice and counsel as part of the process of determining a client's data management needs but the advice and counsel is ancillary to and supports the sale of the implementation work Company's employees perform. Company does not separately bill for advice and counsel, but only for its final product of implementing data management solutions. Therefore, Company does not engage a trade or business involving the performance of services in the field of consulting....

We conclude that for the purposes of section 1202(e)(3), Company is engaged in a qualified trade or business as defined in section 1202(e)(3) and is not engaged in a trade or business involving the performance of services in the field of consulting within the meaning of section 1202(e)(3)(A).

Letter Ruling 202342013 seems the same as Letter Ruling 202342015. However, it involved the following additional fact:

On Date 1, Company elected to be classified as an S corporation but Company had more than one class of stock in violation of section 1.361-1(f)1 of the Regulations. Thus, Taxpayer represents that its S corporation election was immediately invalid.

See part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

Letter Ruling 202342013 commented about that fact:

Specifically, no opinion is expressed or implied concerning whether the Company made an invalid S corporation election on Date 1. However, this ruling is conditioned upon Taxpayer's representation that the S corporation election on Date 1 was invalid.

That's because a current or former S corporation cannot be qualified small business stock (although an S corporation can form a QSBS C corporation subsidiary).

Letter Ruling 202319013 had the following facts and conclusion:

Company is an enterprise cloud application services software company, which provides solutions tailored to the operating functions and industry-specific challenges of their clients. The Company's employees possess technical skills and knowledge which allow for effective implementation and the quality of the Company's services. However, they are trained on one or more of the Company's proprietary service delivery processes and methodology packages that are unique to the Company and may not be utilized by the employees at any other employers that may provide the same or similar service. The Company can recruit and train new employees with the required technical skillset to perform substantially identical services using its methodology packages....

The Company's employees possess technical skills and knowledge due to training received on one or more of the Company's proprietary service delivery processes and methodology packages. Such processes and packages are unique to Company and may not be utilized by the employees at other similar companies. The Company can recruit and train new employees with the required technical skillset to perform substantially identical services using its methodology packages. Therefore, the principal asset of the Company is not the reputation or skills of one or more employees, but the intellectual property held by the Company itself in its proprietary service delivery processes and methodology packages.

Also, a commission sales business was not disqualified under this provision. In *Owen v. Commissioner*, T.C. Memo. 2012-21, a company that sold prepaid legal service policies, including estate planning services, which were like insurance in that purchasers would get a reduced fee in legal cost by joining this prepaid legal membership, was a qualified small business. The court seemed to accept the taxpayer's testimony that, in the industry, independent contractors generally sold the products and services offered by the company. The taxpayer performed services as an executive and as a sales representative and his compensation was reported on Form W-2 (as an executive) and Form 1099-MISC (as an independent consultant who furnished services through his personal corporation that received commissions and in turn paid him using Form 1099-MISC). The court held:

Although respondent argues that FFAEP is not qualified because one of the principal assets is the skill of Mr. Owen, the Court disagrees. While we have no doubt that the success of the Family First Companies is properly attributable to Mr. Owen and Mr. Michaels, the principal asset of the companies was the training and organizational structure; after all, it was the independent contractors, including Mr. Owen and Mr. Michaels in their commission sales hats, who sold the policies that earned the premiums, not Mr. Owen in his personal capacity.

However, ultimately this holding was moot (which did not stop the court from opining on it), because the taxpayer was trying to do a Code § 1045 rollover of gain on sale from one company to another. Although the new company qualified as described above, the company being sold did not (fn. 5283), resulting in the taxpayer losing the case. So, keep in mind the IRS' lack of incentive to appeal this holding when viewing it as instructive.

II.Q.7.k.ii. Limitation on Assets a Qualified Small Business May Hold

During substantially all of the taxpayer's holding period for the qualified small business stock,⁵²⁷² the corporation must use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses and be an eligible corporation.⁵²⁷³ Assets used for certain start-up or research activities count as qualified.⁵²⁷⁴ A specialized small business investment company automatically meets the active business requirement.⁵²⁷⁵ Query whether the active business requirement of Code § 355⁵²⁷⁶ may inform this discussion, even though it does not literally apply to Code § 1202.

In applying the requirement that the corporation hold active business assets, stock and debt in any subsidiary corporation are disregarded and the parent corporation is deemed to own its ratable share of the subsidiary's assets and to conduct its ratable share of the subsidiary's activities;⁵²⁷⁷ no special rule applies to a subsidiary partnership.⁵²⁷⁸ The parent owns more than 50% of the combined voting power of all classes of stock entitled to vote, or more than 50% in value of all outstanding stock, of a corporation for the parent to be able to treat the corporation as a subsidiary.⁵²⁷⁹ If the holding falls below this threshold, then watch out – the parent fails the active business asset test for any period during which more than 10% of the value of its assets (in excess of liabilities) consists of stock or securities in other corporations which are not

⁵²⁷² Code § 1202(c)(2).

⁵²⁷³ Code § 1202(e)(1).

⁵²⁷⁴ Code § 1202(e)(2), "Special rule for certain activities," provides:

For purposes of paragraph (1), if, in connection with any future qualified trade or business, a corporation is engaged in—

(A) start-up activities described in section 195(c)(1)(A),

(B) activities resulting in the payment or incurring of expenditures which may be treated as research and experimental expenditures under section 174, or

(C) activities with respect to in-house research expenses described in section 41(b)(4),

assets used in such activities shall be treated as used in the active conduct of a qualified trade or business. Any determination under this paragraph shall be made without regard to whether a corporation has any gross income from such activities at the time of the determination.

⁵²⁷⁵ Code § 1202(c)(2)(B), referring to an eligible corporation licensed to operate under section 301(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993). As to "specialized small business investment company," see part II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

⁵²⁷⁶ See part II.Q.7.f.iii Active Business Requirement for Code § 355.

⁵²⁷⁷ Code § 1202(e)(5)(A). Code § 1202(d)(3)(A) provides that all corporations which are members of the same parent-subsidiary controlled group shall be treated as one corporation for purposes of the assets test. In determining what is a "parent-subsidiary controlled group," Code § 1202(d)(3)(B) refers to Code § 1563(a)(1), except that:

(i) "more than 50 percent" shall be substituted for "at least 80 percent" each place it appears in section 1563(a)(1), and

(ii) section 1563(a)(4) shall not apply.

⁵²⁷⁸ See fns 5290-5292 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵²⁷⁹ Code § 1202(e)(5)(C).

subsidiaries of such corporation (other than assets described under the “working capital” exception).⁵²⁸⁰

Under the “working capital” exception, active business assets include assets held as a part of the reasonably required working capital needs of a qualified trade or business of the corporation, or held for investment and are reasonably expected to be used within two years to finance research and experimentation in a qualified trade or business or increases in working capital needs of a qualified trade or business.⁵²⁸¹ However, for periods after the corporation has been in existence for at least two years, no more than 50% of the assets of the corporation may qualify as used in the active conduct of a qualified trade or business by reason of this rule.⁵²⁸² Be careful not to start the C corporation just accumulating cash for possible business operations, which will disqualify the corporation.⁵²⁸³ To avoid this issue and for other reasons as well, consider instead starting as an LLC taxable as a partnership then later converting to a corporation.⁵²⁸⁴

A corporation also fails the active business assets test for any period during which more than 10% of the total value of its assets consists of real property which is not used in the active conduct of a qualified trade or business.⁵²⁸⁵ In applying the preceding sentence, the ownership of, dealing in, or renting of real property is not treated as the active conduct of a qualified trade or business;⁵²⁸⁶ renting the property to the business may be better anyway.⁵²⁸⁷

In applying the active business asset test, rights to computer software which produces active business computer software royalties⁵²⁸⁸ are treated as an asset used in the active conduct of a trade or business.⁵²⁸⁹

⁵²⁸⁰ Code § 1202(e)(5)(B).

⁵²⁸¹ Code § 1202(e)(6).

⁵²⁸² Code § 1202(e)(6).

⁵²⁸³ *Owen v. Commissioner*, T.C. Memo. 2012-21. The court addressed the qualifications of two companies, one of which did not qualify (this footnote) and one of which did qualify (fn. 5269). In discussing why the company was not a qualified small business under Code § 1202 and therefore not eligible for a capital gain deferral under Code § 1045 (which rollover is not necessary for newer companies), the court imposed a 20% accuracy-related penalty:

We also find that the Owens did not act with good faith with respect to the section 1045 transaction. Mr. Owen explained that it was his vision to build up J&L Gems as he had the Family First Companies; yet even as late as 2 years after the money had been deposited in the company, J&L Gems had only 16 pieces of jewelry. Mr. Owen should not in good faith have believed that deferring income tax under section 1045, by operating a business, merely involved depositing a large amount of cash in an account. Nor could he reasonably believe that using less than 8 percent of that cash to purchase inventory and selling only a part of what little inventory he did buy to his friends and coworkers was sufficient to defer the tax. Even under Mr. Owen’s understanding of section 1045, that he had to operate the business in good faith and reasonably, he failed to meet that requirement.

⁵²⁸⁴ See part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S Corporation or a Partnership? (especially the text accompanying fns. 5331-5339).

⁵²⁸⁵ Code § 1202(e)(7).

⁵²⁸⁶ Code § 1202(e)(7).

⁵²⁸⁷ See parts II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up (which is even more of a concern for C corporations) and II.Q.1.b Leasing.

⁵²⁸⁸ Within the meaning of Code § 543(d)(1).

⁵²⁸⁹ Code § 1202(e)(7).

Although Code § 1202 authorizes qualified small business stock to be held by a partnership⁵²⁹⁰ and corporate subsidiaries,⁵²⁹¹ it does not discuss the corporation conducting its business through one or more partnerships. Accordingly, from a planning perspective, I would not recommend having a corporation seeking qualified small business status invest its assets in a partnership. However, if one is asked to advise an owner of a corporation that is already invested in a partnership, I would look to the active business rules for corporate split-ups, which describe when an interest in a partnership constitutes an active business asset.⁵²⁹²

In discussing Letter Ruling 202016013, which was a Code § 721(b) ruling, Banoff and Cohen comment:⁵²⁹³

We observe that Section 1202 has (at least at first glance) a similar disconnect between subsidiary corporations and subsidiary partnerships. See Shop Talk, “Is LLC Business Attributed to Corporate Member for Section 1045 Purposes?,” 93 *JTAX* 254 (October 2000). In that article, we hypothesized a taxpayer looking to roll over her sales proceeds from the sale of qualified small business stock (QSBS) within the meaning of Section 1045. (Coincidentally, Section 1045 (like the amendment to Section 351(e)) was enacted by The Taxpayer Relief Act of 1997.) Generally, under Section 1045(a), a noncorporate taxpayer may defer the recognition of otherwise taxable gain from the sale of QSBS that was held more than six months prior to the date of sale of the QSBS. In our 2000 Shop Talk article, we asked whether our hypothetical taxpayer could successfully invest those proceeds in a corporation that itself does not conduct a qualified small business but has an interest in a partnership or an LLC that engages in a business that otherwise would satisfy Section 1045 if the business were conducted by the corporation.

Section 1045 defines QSBS by incorporating the definition of QSBS contained in Section 1202. Stock will be treated as QSBS under Section 1202 if, among other things, during substantially all of the period during which the taxpayer holds the stock, the issuing corporation must be engaged in an active trade or business.

In order to satisfy the active business requirement, at least 80% of the issuer’s assets (as measured by their FMV) must be used in the active conduct of one or more qualified businesses. A special look-through rule applies when a parent corporation owns stock in a subsidiary corporation that is engaged in a qualified business. Specifically, the parent corporation will be deemed to own a ratable share of the subsidiary’s assets and to conduct its ratable share of the subsidiary’s activities. Section 1202(e)(5)(A). To get this look-through treatment, the parent corporation must own more than 50% of the combined voting power of all classes of stock or more than 50% of the value of all the outstanding stock of the subsidiary corporation. Section 1202(e)(5)(C).

Can the look-through rule that applies to parent and subsidiary corporations as described in Section 1202(e)(5) be extended to a corporation that owns an interest in a

⁵²⁹³ Shop Talk column, “Section 721(b)-A Partnership Issue, a Corporate Issue, or Just a Jumble?” *Journal of Taxation* (7/2020). For a reproduction of most of Letter Ruling 202016013 and their detailed discussion of it, see text preceding and accompanying fns 3592-3593 in part II.M.3.b Exception: Diversification of Investment Risk.

partnership or LLC, for purposes of Section 1202? Todd D. Golub, a Chicago CPA and attorney and author of a then-contemporaneous article on Section 1045 rollovers, provided Shop Talk in our 2000 article with these observations:

If the corporation is not the sole member and the LLC is taxable as a partnership, the look-through rule applicable to parent-subsidary corporations on its face does not apply. Further, Section 1045 provides special rules for persons who invest in a flow-through entity that invests in QSBS to obtain the benefits of Section 1045. See also Rev. Proc. 98-48, 1998-2 CB 367, providing further guidance for persons who invest in flow-through entities to get the benefits of Section 1045. Thus, both Congress and the IRS considered the application of the aggregate theory of partnerships when enacting Section 1045 but did not extend that theory to the determination of whether the qualified business requirement is met if a corporation invests in an LLC that engages in a qualified business. Thus, this omission may indicate that the look-through rule does not extend to a subsidiary LLC for purposes of Section 1045.

The 1997 Blue Book states at page 58 that Congress enacted Section 1045 with the hope that the deferral benefit would encourage investors to reinvest funds in qualified small businesses, making more capital available to new, small businesses that are important to the long-term growth of the economy. There is no indication of why Congress limited the deferral benefit to investors that provide funds to small businesses that operate only in corporate form. So long as Congress intended to provide such a benefit, there is no apparent reason why it should not be extended to flow-through entities. In fact, by limiting this benefit to parent-subsidary corporate relationships, Congress actually may have limited the funding that otherwise might be available to businesses that choose not to incorporate.

Accordingly, it would seem that [for purposes of Sections 1045 and 1202] a look-through rule should apply to corporations that have an interest in LLCs or other entities taxed as partnerships that are engaged in a qualified business....

Congress, however, did not go so far as to specifically provide for a look-through rule when a corporation invests directly in an LLC or partnership. So, if one looks solely to the statute [Section 1202], the business of the LLC arguably may not be attributable to the corporate member.

Golub's conclusion in our 2000 Shop Talk article is eerily and equally applicable to the corporate-partnership conundrum discussed in this article with respect to Section 721(b): "One can only hope that future guidance will clarify that the deferral benefit of Section 1045 should apply to the shareholders of corporations that invest directly in qualified businesses regardless of the form of entity that engages in the qualified business."

Golub's plea for guidance under Section 1045 (via Section 1202) published in Shop Talk 20 years ago apparently has gone unheard; there seems to have been no further guidance issued with respect to the attribution of a partnership's or an LLC's trade or business to a corporate member for purposes of Section 1045, notwithstanding strong policy reasons to support that result (just as there are under Sections 721(b) and 351(e)). Moreover, we are unaware of any letter rulings that provide relief to subsidiary partnerships and their corporate partners for purposes of Section 1045. On the other hand, Ltr. Rul. 202016013 (and the two predecessor letter rulings described

above) have created a niche where certain qualifying (majority interest) contributors to partnerships would apparently be able to apply a corporate look-through rule to subsidiary partnerships. And these Section 721(b) rulings by analogy may give some (albeit indirect) comfort to taxpayers and practitioners for purposes of Section 1045 that the Service would similarly apply a corporate look-through/attribution rule to subsidiary partnerships for purposes of attributing their trades or businesses to corporate partners holding majority interests in their partnerships.

Special rules apply to certain tax-free transfers.⁵²⁹⁴ If a transfer is by gift,⁵²⁹⁵ at death, or from a partnership,⁵²⁹⁶ the transferee is treated as having acquired such stock in the same manner as the transferor and having held such stock during any continuous period immediately preceding the transfer during which it was held (or treated as held under these rules) by the transferor.⁵²⁹⁷

- Presumably a taxpayer whose stock's value exceeds the cap of the exclusion of gain⁵²⁹⁸ by giving the stock to family members, each of whom could sell the stock separately.
- If the transfer is from a partnership, it must be to a partner of stock with respect to which requirements similar to the pass-through rules described above are met at the time of the transfer (without regard to the 5-year holding period requirement).⁵²⁹⁹

If a trust transfers Code § 1202 stock to a beneficiary, does that count as a permitted transfer by gift? Probably so.⁵³⁰⁰ However, I am unaware of any authority discussing Code § 1202(h)(2)(A) addressing this issue, so when in planning mode consider trying to avoid distributing the stock.

In a Code § 351 formation of a corporation or a Code § 368 reorganization, if qualified small business stock is exchanged for other stock which would not qualify as qualified small business stock but for this rule, that other stock shall be treated as qualified small business stock acquired on the date on which the exchanged stock was acquired.⁵³⁰¹ Unless the stock treated

⁵²⁹⁴ Code § 1202(h).

⁵²⁹⁵ See text accompanying fn 5222 regarding gifts to trusts.

⁵²⁹⁶ Code § 1202(h)(2).

⁵²⁹⁷ Code § 1202(h)(1).

⁵²⁹⁸ See fn. 5210.

⁵²⁹⁹ Code § 1202(h)(2)(C).

⁵³⁰⁰ The paradigm created by Reg. §§ 1.102-1(b), (c) and 1.663(a)-1(b)(2)(i) is that distributions from trusts are treated as gifts unless they satisfy a requirement to distribute income. See text accompanying fn 2795 in part II.J.8.d.i Distribution in Kind - Generally

⁵³⁰¹ Code § 1202(h)(4)(A). Letter Ruling 9810010 applied Code § 1202(h)(4) to a corporate split-up that was partly tax-free under Code §§ 355(a)(1) and 368(a)(1)(D). Letter Ruling 9810010 said that Code § 1202(h)(4)(A) necessarily means:

Thus, stock received in a section 368 reorganization may be treated as QSBS despite the prohibition in section 1202(c)(1)(B)(i) against stock received in exchange for other stock.

Letter Ruling 9810010 continued:

In the instant case, the taxpayers have represented that the portion of the Distributing stock given up by A through N in exchange for Controlled stock was qualified small business stock (QSBS) and that Controlled was a qualified small business at the time of the reorganization. As part of the section 368 reorganization, A through N received Controlled stock in exchange for a portion of their Distributing stock and thereafter sold their remaining Distributing stock to FX. Unless the specific shares of Distributing stock exchanged for Controlled stock can be adequately identified by each of the exchanging shareholders, it is assumed pursuant to section 1.1012-1(c)(1) that the Distributing stock exchanged will be charged against the earliest of such lots acquired in order to

as qualified small business stock by reason of the preceding sentence is issued by a corporation that (as of the time of that transfer) is a qualified small business, Code § 1202 applies to gain from the sale or exchange of stock treated as qualified small business stock by reason of the preceding sentence only to the extent of the gain which would have been recognized at the time of the transfer described in the preceding sentence if Code § 351 or 368 had not applied at that time.⁵³⁰²

To the extent provided in regulations, stock in a corporation, the basis of which (in the hands of a taxpayer) is determined in whole or in part by reference to the basis in his hands of stock in such corporation which meets certain requirements or which is received in a reorganization that is a mere change in form in exchange for stock which meets such requirements (and interests in an LLC that elected C corporation taxation qualify as stock),⁵³⁰³ is treated as meeting such requirements.⁵³⁰⁴ For more discussion, see “Section 351 Transactions and Section 368

determine cost or other basis and holding period. This rule also applies in determining whether the Distributing QSBS held by each of the exchanging shareholders at the time of the exchange was among the Distributing stock exchanged for Controlled stock.

Based on the assumption that the portion of the Distributing stock given up by A through N was QSBS in the hands of such shareholders as determined by applying the rules of section 1.1012-1, a portion of the Controlled stock received by such shareholders in exchange therefor will be treated as QSBS acquired on the date the exchanged Distributing QSBS was acquired (section 1202(h)(4)(A)). If the stock exchanged by a Distributing shareholder consists of both QSBS and non-QSBS, then only a proportionate amount of the Controlled stock received in exchange will be treated as QSBS.

Ruling 12 of Letter Ruling 9810010 held:

Based solely on the taxpayer’s representations that a portion of the Distributing stock owned by A through N was classified as qualified small business stock under section 1202 (Distributing QSBS), a proportionate amount of Controlled stock received by each of A through N in exchange for such individual’s Distributing QSBS will be treated as qualified small business stock (section 1202(h)(4)(A)). The holding period for the Controlled stock treated as qualified small business stock under section 1202(h)(4)(A) includes the holding period for which each of A through N held the Distributing QSBS. Further, based on the representation that Controlled was a qualified small business at the time of the reorganization, the limitation in section 1202(h)(4)(B) will not apply.

Ruling (12) only applies to the Controlled stock that was received in exchange for Distributing stock that was QSBS in the hands of the individual shareholders at the time of the exchange. We have not been asked, and we do not address, whether any stock issued by Distributing was qualified small business stock at any time or whether Controlled is a qualified small business within the meaning of section 1202(d).

⁵³⁰² Code § 1202(h)(4)(B). Letter Ruling 9810010 noted:

Section 1202(h)(4)(B) limits the amount of gain that can be excluded under section 1202(a) if the stock constitutes qualified small business stock by virtue of section 1202(h)(4)(A). However, the limitation does not apply if the stock is issued by a corporation that is itself a qualified small business as of the time of the reorganization.

Code § 1202(h)(4)(C) provides:

Successive application. For purposes of this paragraph, stock treated as qualified small business stock under subparagraph (A) shall be so treated for subsequent transactions or reorganizations, except that the limitation of subparagraph (B) shall be applied as of the time of the first transfer to which such limitation applied (determined after the application of the second sentence of subparagraph (B)).

⁵³⁰³ See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Converting a corporation into an LLC taxed as a corporation was such a change. Letter Rulings 201603010-201603014.

⁵³⁰⁴ Code § 1202(h)(3), incorporating by reference Code § 1244(d)(2).

Reorganizations” in RIA Checkpoint *Catalyst* ¶ 511:114 Original Issuance Requirement within ¶ 511:110 Qualified Small Business Stock: Definition.

If the taxpayer has an offsetting short position with respect to any qualified small business stock, Code § 1202(a) shall not apply to any gain from the sale or exchange of such stock unless the stock was held by the taxpayer for more than 5 years as of the first day on which there was such a short position, and the taxpayer elects to recognize gain as if such stock were sold on such first day for its fair market value.⁵³⁰⁵ For purposes of the preceding sentence, the taxpayer shall be treated as having an offsetting short position with respect to any qualified small business stock if the taxpayer has made a short sale of substantially identical property, the taxpayer has acquired an option to sell substantially identical property at a fixed price, or to the extent provided in regulations, the taxpayer has entered into any other transaction which substantially reduces the risk of loss from holding such qualified small business stock; in applying this rule, any reference to the taxpayer is treated as including a reference to any person who is related (within the meaning of Code § 267(b)⁵³⁰⁶ or 707(b)⁵³⁰⁷) to the taxpayer.⁵³⁰⁸

II.Q.7.k.iii. Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

Does the exclusion for the sale of certain stock make being a C corporation more attractive than an S corporation or a partnership? First, we will explore when the sale of such stock has advantages, when the sale does not have advantages, and operational income tax issues.

If and to the extent that the gain on the sale of a business relates to the sale of self-created goodwill, the basis of the ownership interest does not reflect that basis, no matter what kind of entity owns the business. To that extent, the sale of such stock is more favorable than the sale of stock in an S corporation⁵³⁰⁹ and the sale for cash of a partnership interest.⁵³¹⁰ However, the seller-financed sale of a partnership interest still produces better results than the sale of such stock.⁵³¹¹

⁵³⁰⁵ Code § 1202(j)(1).

⁵³⁰⁶ Code § 267(b) is reproduced in part II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses.

⁵³⁰⁷ For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

⁵³⁰⁸ Code § 1202(j)(2).

⁵³⁰⁹ Compare part II.Q.1.a.i.(c) with part II.Q.1.a.i.(d) (moderate tax states) and part II.Q.1.a.ii.(c) with part II.Q.1.a.ii.(d) (California).

⁵³¹⁰ The sale of a partnership interest for cash generally would have similar dynamics regarding goodwill as the sale of S corporation stock. The sale of a partnership interest would have a slight advantage, in that the goodwill could obtain a basis step-up (part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations and fn. 5699, unless the anti-churning rules apply per part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules, especially fn. 4193), but amortization would be over a 15-year period under Code § 197 (fn. 5583). Also, amortizing goodwill turns it into a hot asset, reducing opportunities for deferral on its sale; for more information on the sale of goodwill, including disadvantages of goodwill being amortized, see part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

⁵³¹¹ See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(g) Partnership Use of Same Earnings as C Corporation – Redemption (California).

In some situations, the exclusion for the sale of certain C corporation stock does not provide any particular advantage, if and to the extent that the owner of a pass-through interest would not have gain on sale. If and to the extent that the sale of the business interest arises from reinvested earnings, the basis of a partnership interest⁵³¹² or stock in an S corporation is increased.⁵³¹³ Furthermore, if a pass-through entity redeems only part of one's ownership, the reinvested earnings might offset part or all of the gain on the sale – perhaps even that attributable to self-created goodwill.⁵³¹⁴

Furthermore, the exclusion is available only for qualified stock that is issued, gifted, or bequeathed to the taxpayer,⁵³¹⁵ making it unavailable to subsequent purchasers of the stock. Some states, such as California,⁵³¹⁶ do not recognize the exclusion. Also, during substantially all of the taxpayer's holding period for the qualified small business stock, the corporation must use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses and be an eligible corporation.⁵³¹⁷ No rules explain how often one must evaluate the company's assets to see whether they satisfy that test; presumably testing whenever the qualified small business stock is issued⁵³¹⁸ and annually⁵³¹⁹ would suffice, to inject some reasonableness into the statute, but I am unaware of any authority addressing how frequently the corporation must evaluate its assets and their use to help its shareholders prove this element.

A stock sale tends to have a lower sale price than an asset sale, due to buyer's concerns about assuming undisclosed or unseen liabilities and perhaps not receiving a basis step-up in the corporation's assets. Because buyers want to depreciate or amortize business assets or may later sell them, buyers like to obtain a new basis in the entity's assets when they buy an interest in an entity. See Part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. This is especially important when an entity sells only a business line,⁵³²⁰ rather than the entire business. Therefore, many business sales are actual or deemed asset sales; for the latter, see part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold. When the entity sells all of its assets, it might as well liquidate to

⁵³¹² Code § 705. However, as described in part II.Q.8.e.ii.(a) Unitary Basis, a partner does not have the flexibility of a shareholder to pick and choose which shares to sell.

⁵³¹³ Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.

⁵³¹⁴ For S corporations, see part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially fns. 4900-4902. Of course, the basis resulting reduction basis reduces the ability to take distributions and increases future gains on the sale of the stock, the latter which might not be of concern if and to the extent the stock receives a new basis on the shareholder's death. See part II.H.9 Basis Step-Up In S Corporations That Had Been C Corporations. For partnerships, see part II.Q.8.b Partnership Redemption or Other Distribution.

⁵³¹⁵ See various requirements described in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵³¹⁶ Cal. Rev. & Tax. Cd. § 18152.5(n).

⁵³¹⁷ See text accompanying fns 5272-5273 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵³¹⁸ An example of what purported evidence does not work is described in fn 5262 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵³¹⁹ A taxpayer who did not even come close to hitting the target of investing cash quickly enough is in fn 5283 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

⁵³²⁰ One cannot easily divide a business tax-free, sell a business line, and liquidate the corporation owning just that business lines. See part II.Q.7.f.ii Code § 355 Requirements.

take full advantage of the exclusion on the gain on sale of the stock and let the shareholders move the sale proceeds outside of a potentially risky business environment.⁵³²¹

Until the 21% federal corporate income tax rate increases, a C corporation selling business assets tends to use a lower rate than does a pass-through entity. The latter generates income taxed at higher rates:

- Any equipment, amortizable (purchased) Code § 197 intangibles (including goodwill),⁵³²² certain intellectual property,⁵³²³ and various other property⁵³²⁴ is subject to taxation at high ordinary income tax rates. See part II.G.6.b Code § 1245 Property. Although ordinary income from the sale of business assets may be qualified business income eligible for the 20% deduction under Code § 199A,⁵³²⁵ not all businesses qualify,⁵³²⁶ and even those that do often won't be able to take advantage of large income from such sales because the deduction is limited to a formula based on wages paid, with possible adjustments for depreciable property held at the end of the year.⁵³²⁷
- Depreciable real estate may also trigger capital gain tax on depreciation recapture at higher rates.⁵³²⁸ Also, if and to the extent that selling business assets generated a prior Code § 1231 ordinary loss, later gain from selling business assets is taxed as ordinary income instead of capital gain.⁵³²⁹

I am a big fan of partnerships, as described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and diagrammed in part II.E.6 Recommended

⁵³²¹ See part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale. Levun's article, cited at fn. 5342, comments:

Note that the receipt of liquidation proceeds after a corporate asset sale also qualifies for the QSBC exclusion. However, because of the corporate-level tax exacerbated by the lack of a corporate capital gains rate, the scales would still tip in favor of flow-through taxation, notwithstanding no tax due on liquidation. In other words, assume all an entity owns is zero-basis self-created goodwill having a value of \$1 million. In the case of an asset sale as an LLC, there would be federal tax due of \$200,000 (assuming a 20-percent maximum capital gains rate). In the case of the same asset sale by a QSBC, while there would be no shareholder tax on the liquidation of the corporation, the corporate entity-level federal tax burden would be \$340,000 (or tax at a 35-percent rate, to the extent the corporation has taxable income in excess of \$10 million).

The reference to a 35% tax rate was before 2017 tax reform lowered the corporate tax rate.

⁵³²² Goodwill and other intangibles are not amortized and therefore not subject to this rule when they are self-created. When a business buys such assets, then they are amortizable. For how these rules work, see part II.G.18.d Amortization of Code § 197 Intangibles.

⁵³²³ See parts II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income and II.G.18.c Patents (the latter being subject to the former).

⁵³²⁴ Various assets that are not capital assets, such as inventory (see Code § 1221(a), reproduced in fn 6959 in part III.B.2.j.iii.(e) Allocation of Specific Items), and assets triggering the assignment of income, such as cash basis accounts receivable, are among them. For certain assets held by a partnership, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵³²⁵ See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

⁵³²⁶ See part II.E.1.c.iv Specified Service Trade or Business (SSTB) If Taxable Income Exceeds Certain Thresholds.

⁵³²⁷ See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

⁵³²⁸ See fn 1497 in part II.G.6.a Code § 1231 Property. If and to the extent accelerated depreciation applied, beware of ordinary income treatment under part II.G.6.b Code § 1245 Property.

⁵³²⁹ See text accompanying fn 1499 in part II.G.6.a Code § 1231 Property.

Partnership Structure – Flowchart, after starting more simply as an LLC as described in part II.E.3 Recommended Structure for Start-Ups. Partnerships that are not capital-intensive are great candidates for avoiding any tax on the seller-financed sale of a partnership interest;⁵³³⁰ that tool tends to apply to a sale to management or other owners, who care more about paying over time, in a manner than devotes less earnings to the buy-out, than they care about inside basis step-up. Furthermore, the death of a partner or sale or other qualified transfer of a partnership interest generates a new basis in the partnership’s assets attributable to the relevant partnership interest; see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

Furthermore, if one decides that a C corporation structure is ultimately desirable, one might consider instead starting as an LLC taxable as a partnership or sole proprietorship, which enables start-up losses to be deducted more easily anyway;⁵³³¹ then, if one determines that a C corporation is the ideal structure, convert⁵³³² to a qualified small business corporation⁵³³³ the earlier of five years before a sale is anticipated or shortly before the \$50 million gross asset limitation is exceeded.⁵³³⁴ Factors when considering this strategy include:

- The delay in forming the corporation can help avoid being disqualified for not deploying start-up capital quickly enough.⁵³³⁵
- During this initial operating period, the owners could build value in the business, and the greater of value or basis of the partnership’s assets when it converts to a C corporation is used in computing the exclusion of ten times the investment.⁵³³⁶ This is a double-edged

⁵³³⁰ See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(g) Partnership Use of Same Earnings as C Corporation – Redemption (California).

⁵³³¹ See part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner, especially part II.G.4.f Comparing C Corporation Loss Limitations to Those for Partnership and S Corporation Losses.

⁵³³² See part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations. One might simply file Form 8832 to elect corporate taxation, assign the LLC to a corporation, or convert or merge the LLC into a corporation. As to the former, Letter Ruling 201636003 held:

While ownership of a corporation is normally tied to stock ownership, and under state law LLC owners hold a member interest and not formal stock, the term “stock” for federal tax purposes is not restricted to cases where formal stock certificates have been issued. Rather, it has been consistent Service position that for federal tax purposes stock ownership is a matter of economic substance, *i.e.*, the right to which the owner has in management, profits, and ultimate assets of a corporation. The presence or absence of pieces of paper called “stock” representing that ownership is immaterial. See Rev. Rul. 69-591, 1969-2 C.B. 172.

Therefore, based on the facts and representations submitted, we rule that the Corporation stock meets the definition of qualified small business stock under §§ 1202(c), 1202(f) and 1202(h).

⁵³³³ See part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations.

⁵³³⁴ See fn. 5260.

⁵³³⁵ See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold, especially the text accompanying fns. 5281-5283.

⁵³³⁶ See part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation, especially fns. 5212-5220.

sword in that any value in excess of basis (in other words, built-in gain) at the time of the conversion is not eligible for the exclusion.⁵³³⁷

- The ability to deduct start-up losses may be good or bad, depending on whether the owner is in a high or low tax bracket. See part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. If the taxpayer is in a high tax bracket, then consider taking bonus depreciation⁵³³⁸ and generating a high-tax-rate deduction now, then paying tax at a lower rate when the assets are sold after conversion to C corporation taxation.
- If the entity accumulates debt in excess of basis, forming the corporation might be a taxable event.⁵³³⁹
- Before converting to a qualified small business corporation, consider whether the LLC might divide into separate entities, each of which conducts a separate business,⁵³⁴⁰ and then each separate business would become its own qualified small business corporation with a separate limitation on the amount of gain that is excluded. That may also help stay under the \$50 million gross asset limitation for each corporation.

For a case study on converting a partnership to a C corporation to accommodate a venture capital firm's desire for this exclusion, whether converting to a C corporation is a good idea, the Code § 1045 rollover, and issues facing recipients of profits interests on conversion,⁵³⁴¹ see Levun, "Using Partnerships to Leverage "Zero-Tax" Code Sec. 1202 Stock."⁵³⁴²

⁵³³⁷ See paragraph of text accompanying fn. 5220 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

⁵³³⁸ See part II.G.5 Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation, especially part II.G.5.b Bonus Depreciation.

⁵³³⁹ See parts II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities and II.M.2.c Contribution of Partnership Interest to Corporation.

⁵³⁴⁰ See part II.Q.8.d Partnership Division.

⁵³⁴¹ See part II.M.4.f Issuing a Profits Interest to a Service Provider. Levun, fn. 5342, points out: As a final observation, and somewhat of a frolic and detour, let's assume that the LLC being discussed in this column had a service provider that had been previously admitted as a partner (either by reason of (1) having received a fully vested LLC interest, (2) having received a profits interest subject to a substantial risk of forfeiture but for which the requirements of Rev. Proc. 2001-43, 2001-2 CB 191, had been satisfied or (3) having received a capital interest subject to a substantial risk of forfeiture for which a timely Code Sec. 83(b) election had been made. Also assume that, as part of the incorporation transaction contemplated above (to obtain QSBC stock), the service provider was required to agree to a substantial risk of forfeiture with respect to the C corporation stock he was now obtaining in the LLC to C corporation conversion transaction. Rev. Rul. 2007-49, 2007-2 CB 237, would require that a Code Sec. 83(b) election be made in order for the service partner to be treated as a shareholder in the corporation. This revenue ruling provides that the transfer of vested stock in exchange for nonvested stock in a tax-free corporate reorganization requires a Code Sec. 83(b) election in order for the service provider to be considered the tax owner of the shares received in the reorganization. While the revenue ruling addresses a tax-free reorganization under Code Sec. 368(a), there is no reason to believe that the result would be any different in a Code Sec. 351 transaction. Note that making a Code Sec. 83(b) election does not result in any tax to the service provider, as under the principles contained in Rev. Rul. 2007-49, the service provider would be considered to have paid an amount for the QSBC stock equal to its fair market value.

⁵³⁴² *Partnership Tax Watch Newsletter* (Current), No. 349, PARTNERSHIP TAX PLANNING and PRACTICE 11/22/2016, saved as Thompson Coburn LLP document no. 6486765.

II.Q.7.k.iv. Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS

Code § 1045 allows a taxpayer to roll over the gain into new qualified small business stock.⁵³⁴³

In the case of any sale of qualified small business stock held for more than 6 months⁵³⁴⁴ by a taxpayer other than a corporation and with respect to which the taxpayer elects to apply Code § 1045, gain from the sale is recognized only to the extent that the amount realized on such sale exceeds the cost of any qualified small business stock (QSBS) purchased by the taxpayer during the 60-day period beginning on the date of such sale, reduced by any portion of that cost previously taken into account under Code § 1045.⁵³⁴⁵

Code § 1045 does not apply to any gain which the Code treats as ordinary income.⁵³⁴⁶

QSBS has the meaning given such term by Code § 1202(c). See various explanations under other subparts of this part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. However, only the first 6 months of the taxpayer's holding period for the stock referred to in Code § 1045(a)(1) are taken into account for purposes of applying Code § 1202(c)(2).⁵³⁴⁷

⁵³⁴³ Rev. Proc. 98-48 explains how to elect Code § 1045 deferral, the deadline for which may be extended using Reg. § 301.9100-3 relief (see, e.g., Letter Ruling 201650010). Reg. § 1.1045-1 provides rules for partnerships and supersedes Rev. Proc. 98-48 to that extent (see T.D. 9353 8/14/2007). Letter Ruling 202244004 granted an extension of time until 60 days after the ruling to file an amended return to make a section 1045 election under Rev. Proc. 98-48, using the following reasoning:

Taxpayer in this case has represented that it requested relief before the failure to make the regulatory election was discovered by the Service and that it failed to make the election because Taxpayer did not receive necessary K-1s to file his Year 1 return by the extended due date for Year 1. Thus, under sections 301.9100-3(b)(1)(i) and (ii), Taxpayer will be deemed to have acted reasonably and in good faith. Taxpayer has also represented that none of the circumstances listed in section 301.9100-3(b)(3) apply...

... the interests of the government are not prejudiced in this case. Taxpayer has represented that granting relief would not result in a lower tax liability in the aggregate for all taxable years affected by the election than Taxpayer would have had if the election had been timely made (taking into account the time value of money). Furthermore, Taxpayer has represented that the taxable year in which the regulatory election should have been made and any taxable years that would have been affected had it been timely made, are not closed by the period of assessment.

⁵³⁴⁴ Code § 1045(b)(4)(A) provides, "the taxpayer's holding period for such stock and the stock referred to in subsection (a)(1) shall be determined without regard to section 1223."

⁵³⁴⁵ Code § 1045(a).

⁵³⁴⁶ Code § 1045(a).

⁵³⁴⁷ Code § 1045(b)(4)(B). Code § 1202(c)(2), "Active business requirement; etc.," provides:

- (A) *In general.* Stock in a corporation shall not be treated as qualified small business stock unless, during substantially all of the taxpayer's holding period for such stock, such corporation meets the active business requirements of subsection (e) and such corporation is a C corporation.
- (B) *Special rule for certain small business investment companies.*
 - (i) *Waiver of active business requirement.* Notwithstanding any provision of subsection (e), a corporation shall be treated as meeting the active business requirements of such subsection for any period during which such corporation qualifies as a specialized small business investment company.

A taxpayer is treated as having purchased any property if, but for Code § 1045(b)(3), the unadjusted basis of such property in the hands of the taxpayer would be its cost (within the meaning of Code § 1012).⁵³⁴⁸ Code § 1045(b)(3) uses the deferred gain to reduce the basis of any QSBS the taxpayer buys during the 60-day rollover period.

II.Q.7.I. Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244

An individual⁵³⁴⁹ may deduct the first \$50,000 of loss⁵³⁵⁰ on the sale of “section 1244 stock” as an ordinary loss, rather than a capital loss.⁵³⁵¹

“Section 1244 stock” is stock of a domestic corporation if:⁵³⁵²

- at the time such stock is issued, such corporation was a small business corporation,
- such stock was issued by such corporation for money or other property (other than stock and securities), and
- such corporation, during the period of its five most recent taxable years ending before the date the loss on such stock was sustained, derived more than 50% of its aggregate gross receipts from sources other than royalties, rents, dividends, interests, annuities, and sales or exchanges of stocks or securities.

The corporation cannot be capitalized with more than \$1 million adjusted basis of assets.⁵³⁵³

Although it applies to the sale of stock in an S corporation, it might not provide much of a benefit, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the shareholder each year. Similarly, this provision might not provide much of a benefit when choosing whether to be taxed as a corporation instead of a partnership, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the partners each year. Furthermore, S corporation shareholders and partners in a partnership would likely obtain a current deduction for such losses, rather than having to wait until their ownership is disposed of, and they would not be required to jump through any statutory hoops similar to Code § 1244 to obtain the

(ii) *Specialized small business investment company.* For purposes of clause (i), the term “specialized small business investment company” means any eligible corporation (as defined in subsection (e)(4)) which is licensed to operate under section 301(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993).

As to “specialized small business investment company,” see part II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

⁵³⁴⁸ Code § 1045(b)(2).

⁵³⁴⁹ Trust, estates, and corporations are not eligible for this treatment. Code § 1244(d)(4); see Part II.J.11.b Code § 1244 Treatment Not Available for Trusts. Individuals may deduct losses flowing through partnerships if the partnerships were the original owners, and corporations may not claim this benefit. Reg. § 1.1244(a)-1(b)(2).

⁵³⁵⁰ \$100,000 if married filing jointly. Code § 1244(b).

⁵³⁵¹ Code § 1244(a).

⁵³⁵² Code § 1244(c).

⁵³⁵³ Code § 1244(c)(3).

ordinary loss deduction. For more information on the concepts described in this paragraph, see part II.G.4 Limitations on Losses.

II.Q.7.m. Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company

Generally, an individual may defer \$50,000 or a corporation may defer \$250,000 of gain on the sale of any publicly traded securities by reinvesting in a specialized small business investment company (SSBIC).⁵³⁵⁴

An SSBIC is any partnership or corporation licensed by the Small Business Administration under section 301(d) of the Small Business Investment Act of 1958 as in effect on May 13, 1993.⁵³⁵⁵ That provision authorizes the licensing of small business investment companies organized to invest in small business concerns in such a way as to facilitate ownership by persons whose participation in the free enterprise system has been hampered by social or economic disadvantages.⁵³⁵⁶

II.Q.7.n. Selling Stock to an Employee Stock Ownership Plan (ESOP)

Code § 1042 defers the gain on the sale of stock to an ESOP. If the corporation is an S corporation, the deferral election may be made with respect to not more than 10% of the amount realized on such sale.⁵³⁵⁷

Under Code § 1042(e), qualified replacement property (QRP) is certain stock purchased with the proceeds of a sale of stock to an employee stock ownership plan (ESOP); this purchase allows the seller to defer gain on the sale, which deferred gain reduces the QRP's basis. Code § 1042(e) requires the deferred gain to be recognized if the seller later disposes of the QRP. Code § 1042(e)(3)(C) provides that a gift does not count as a Code § 1042(e) disposition. Divorce counts as such a gift; see part II.O.2.b Divorce – Income Tax Issues Relating to Buy-Sell Agreements.

II.Q.7.o. Reorganizing to Sell a Business That Is Less Than All of a Corporation's Assets

Suppose a business is being sold, and the corporation has nonoperating assets or other businesses that are not part of the sale.

Generally, the shareholders should form a new corporation with identical ownership, making the original corporation be a wholly owned subsidiary, with the original corporation contemporaneously being converted into an LLC that is treated as a disregarded entity for income tax purposes. This is a tax-free reorganization, with the LLC keeping its original tax ID and the new corporation getting its own tax ID but inheriting the old corporation's income tax attributes; see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

⁵³⁵⁴ Code § 1044.

⁵³⁵⁵ Code § 1044(c)(3).

⁵³⁵⁶ Federal Tax Coord. 2d ¶ I-3794.

⁵³⁵⁷ Code § 1042(h).

Then the LLC can distribute to the parent whatever assets the corporation intends to keep. Generally, this presents less tax risk than keeping the old corporation's corporate status; see part II.P.3.a From Corporations to Partnerships and Sole Proprietorships.

If the parent is a C corporation, consider making an S election, converting to an LLC taxed as a partnership, or liquidating. See parts II.E.2 Comparing Exit Strategies from C Corporations and Pass-Through Entities and II.P.3.b Conversion from C Corporation to S Corporation.

I prefer not to keep liquidity from the sale in corporate format, because the owners may want different investment and distribution strategies, and separating a partnership is very likely to be much less painful than separating a corporation; compare part II.Q.7 Exiting from or Dividing a Corporation to part II.Q.8 Exiting From or Dividing a Partnership, being sure to read the FULL TABLE OF CONTENTS before diving into it. In most cases, I would prefer to move to partnership income taxation of nonbusiness assets as soon as we can, unless a significant owner has a relatively short life expectancy and the owners are willing until that person's death to liquidate; generally, one would convert to an S corporation and wait until at least 5 years after the S election to liquidate; especially consider parts II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374, II.P.3.b.iii Excess Passive Investment Income (may need to invest 3% of portfolio in oil & gas) and II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

II.Q.8. Exiting From or Dividing a Partnership

See part II.Q.8.e.vi Required Documentation to Avoid Withholding on Sale or Redemption of Partnership Interest.

Below, a few themes emerge:

- Exiting a partnership in exchange for a portion of the partnership's assets can be a nontaxable event, in which the exiting partner's basis is reallocated among the distributed assets.⁵³⁵⁸
- Seller-financed redemptions for cash can save a level of capital gain tax, and the buyer and seller can come out ahead, if structured properly.
- If a partner contributes property with a basis not equal to its fair market value, and that partner or that property leaves the partnership within seven years of the contribution, beware of the tax effects!

Contrasting partnership and corporate tax-free divisions:

- A partnership division does not require a business purpose to be nontaxable, but a corporate division does. Generally, a partnership division is not taxable.⁵³⁵⁹
- Contrast a seven-year waiting period for partnership distributions (other than divisions) described further below with a five-year waiting period for corporate divisions. However, the waiting periods are for different reasons! In partnerships, it is to account for contributed

⁵³⁵⁸ See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).

⁵³⁵⁹ Reg. § 1.708-1(d).

property. In corporations, it is to make sure business activities are conducted continuously for at least five years.

Generally, the parties can designate whether a transaction constitutes a sale between partners or a redemption by the partnership.⁵³⁶⁰

See also part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa.

Resources available to IRS examiners include those in part II.G.2.e IRS Practice Units.

II.Q.8.a. Partnership as a Master Entity

II.Q.8.a.i. Partnership Rules Allowing Basis Shifting

II.Q.8.a.i.(a). Overview of Basis-Shifting Rules

Partnerships provide the opportunity to shift basis from one asset to another, which can be helpful when it appears that a low basis asset will be sold; see part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.⁵³⁶¹

However, the partnership needs to be properly seasoned, which generally means at least 7 years from the time that property is contributed to the partnership until the time property is distributed.⁵³⁶² Changes in or issuances of partnership interests when the partnership has property with basis different from fair market value can also bring this 7-year waiting period into play.⁵³⁶³

If one has considerable marketable securities that one would like to be in a partnership, one should consider placing them in a partnership that has no business assets.⁵³⁶⁴ Although the strategy described in this part II.Q.8.a is not geared toward marketable securities, if the estate is large enough then one might consider dividing the marketable securities into a few partnerships that move in different directions and using a series of rolling, asset-splitting GRATs to shift value to the next generation.⁵³⁶⁵ This might be a good strategy for the cash generated from an equity-

⁵³⁶⁰ Letter Ruling 9715008 (respecting the form of a sale between partners). The ruling relied on *Foxman v. Commissioner*, 41 T.C. 535, 551 (1964) (treating a transaction as a sale between partners), aff'd 352 F.2d 466 (3d Cir. 1965) and also cited *Cooney v. Commissioner*, 65 T.C. 101, 109 (1975) (treating a transaction as a redemption).

⁵³⁶¹ Paul S. Lee of Northern Trust has been exploring this idea and has called this the mother ship partnership.

⁵³⁶² See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

⁵³⁶³ See text accompanying fn. 5466, which is part of the link from fn. 5362.

⁵³⁶⁴ Distributions of marketable securities from a partnership might be a taxable transaction. See parts II.Q.8.b.i.(a) Code § 731: General Rule for Distributions (distributions from a partnership generally do not generate income tax) and II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them) (special rules taxing such distributions). See particularly text accompanying fn. 5405 et. seq.

⁵³⁶⁵ See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially the text accompanying fn. 6546.

stripping transaction designed to obtain a basis step-up on real estate with minimal estate tax cost.⁵³⁶⁶

The basis shifting opportunity might work best when few assets are involved. Furthermore, generally it requires a Code § 754 election to be in effect, and such an election requires record-keeping that is often quite complex.⁵³⁶⁷ Thus, one might consider dividing the partnership and making the Code § 754 election only with respect to the property involved in the basis shifting strategy.⁵³⁶⁸

Various basis stripping strategies involve plays on differences between outside basis and inside basis.⁵³⁶⁹ A transfer of a partnership interest allocates basis according to the value of the transferred interest, rather than according to the proportion of rights to income, distributions, etc.⁵³⁷⁰

One might consider having any marketable securities be held in their own partnership that qualifies as an “investment partnership.” See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

Also, note that certain assets are not conducive to non-pro rata distributions of property. See part II.Q.8.b.i.(g) Code § 751 – Hot Assets. To the extent practicable, one might consider holding such assets in a separate partnership and leasing them to the businesses they serve.⁵³⁷¹ Consider the effect, if any, this isolation of leasing activity might have on the passive loss rules and the 3.8% net investment income tax.⁵³⁷²

Similarly, consider whether consolidating assets inside of a partnership affects the passive loss grouping rules,⁵³⁷³ which impact not only the use of passive losses and credits but also the 3.8% tax on net investment income.⁵³⁷⁴

⁵³⁶⁶ See part II.H.10 Extracting Equity to Fund Large Gift. This strategy requires leveraging and maintaining a security interest in loan proceeds, and placing different baskets of marketable securities into separate LLCs (that start as single member LLCs but sooner or later become taxed as partnerships) can facilitate maintaining this security interest. See part II.H.10.d Maintaining the Security Interest in the Loan Proceeds If Using a Donee Guarantee.

⁵³⁶⁷ See generally part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

⁵³⁶⁸ See part II.Q.8.d Partnership Division, especially fn. 5600 (division should result in identical percentage interests before and after the division for each partnership).

⁵³⁶⁹ For an example, see part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue. For a more generic description of inside basis and outside basis, see my blog article, “Tax basis: The key to reducing gain on sale or deducting asset purchases,” at <http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases>.

⁵³⁷⁰ See part II.Q.8.e.ii.(a) Unitary Basis.

⁵³⁷¹ Leasing tangible personal property generally constitutes self-employment income, whereas leasing real generally does not. See part II.L.2.a.ii Rental Exception to SE Tax.

⁵³⁷² See parts II.K Passive Loss Rules and II.I 3.8% Tax on Excess Net Investment Income (NII), especially II.K.1.e Rental Activities.

⁵³⁷³ See part II.K.1.b Grouping Activities.

⁵³⁷⁴ See part II.I.8 Application of 3.8% Tax to Business Income, especially part II.I.8.a.ii Passive Activity Grouping Rules.

Check to see whether the applicable jurisdiction imposes fees or taxes on partnerships or LLCs.⁵³⁷⁵

II.Q.8.a.i.(b). IRS Attacks on Basis Shifting

IR-2024-166 (6/17/2024) announced:

The IRS and the Department of the Treasury today also issued three pieces of guidance focused on partnerships following discoveries by IRS audit teams. Currently, the IRS has tens of billions of dollars of deductions claimed in these transactions under audit.

The new guidance is designed to stop the use of “basis shifting” transactions that use related-party partnerships to avoid taxes. In these complex moves, high-income taxpayers and corporations strip basis from assets they own where the basis is not generating tax benefits and then move the basis to assets they own where it will generate tax benefits without causing any meaningful change to the economics of their businesses. These basis shifting transactions allow closely related parties to avoid taxes.

FS-2024-21 (6/17/2024) summarized that guidance:

Generally, these transactions may employ several steps over a period of years and use sophisticated tax technology to ensure that little or no tax is paid while large amounts of tax basis is “stripped” from certain assets and shifted to other assets to generate tax benefits. In essence, these deals allow increased depreciation deductions or reduced gain on the sale of an asset with little or no substantive economic consequence.

These basis shifting transactions targeted in the new guidance generally fall into three groups:

Transfer of partnership interest to related party: In this transaction, a partner with a low share of the partnership’s “inside” tax basis and a high “outside” tax basis transfers the interest in a tax-free transaction to a related person or to a person who is related to other partners in the partnership. This related-party transfer generates a tax-free basis increase to the transferee partner’s share of “inside” basis.

Distribution of property to a related party: In this transaction, a partnership with related partners distributes a high-basis asset to one of the related partners that has a low outside basis. After this, the distributee partner reduces the basis of the distributed asset and the partnership increases the basis of its remaining assets. The related partners can arrange this transaction so that the reduced tax basis of the distributed asset will not adversely impact the related partners, while the basis increase to the partnership’s retained assets can produce tax savings for the related parties.

Liquidation of related partnership or partner: In this transaction, a partnership with related partners liquidates and distributes (1) a low-basis asset that is subject to accelerated cost recovery or for which the parties intend to sell to a partner with a high outside basis and (2) a high-basis property that is subject to longer cost recovery (or no cost recovery at all) or for which the parties intend to hold to a partner with a low outside

⁵³⁷⁵ For example, New York City imposes a 4% tax on unincorporated business organizations.

basis. Under the partnership liquidation rules, the first related partner increases the basis of the property with a shorter life or which is held for sale while the second related partner decreases the basis of the long-lived or non-depreciable property, with the result that the related parties generate or accelerate tax benefits.

To help address these areas, Notice 2024-54 announces two sets of upcoming regulations:

- The first set of regulations would require partnerships to treat basis adjustments arising from covered transactions in a way that would restrict them from deriving inappropriate tax benefits from the basis adjustments.
- The second set of regulations would provide rules to ensure clear reflection of the taxable income and tax liability of a consolidated group of corporations when members of the group own interests in partnerships. The notice further announces that the covered transactions governed by these regulations would involve basis adjustments under Internal Revenue Code sections 732, 734(b) and/or 743(b).

Basis shifting identified as Transactions of Interest (TOI)

The proposed regulations Treasury and IRS issued today identify certain basis shifting transactions by partnerships as reportable Transactions of Interest (TOI).

“These proposed regulations will provide the IRS with information about potentially abusive partnership transactions involving basis shifting leading to significant tax benefits without causing any meaningful change to the economics of their business,” IRS Commissioner Danny Werfel said. “Our teams are seeing these very problems today. There are cases at either the litigation or the audit stage that involve transactions that are the same or similar to those described as transactions of interest in the proposed regulations issued today.”

The proposed regulations identify related-party partnership basis adjustment transactions and substantially similar transactions as a TOI – a type of reportable transaction. These proposed regulations would affect partnerships that are participating in the identified transactions by distributing partnership property or by transferring an interest in the partnership transferred in an identified transaction. The affected taxpayers and material advisors would be subject to the disclosure requirements for reportable transactions.

The TOIs generally involve positive basis adjustments of \$5 million or more under subchapter K of the Internal Revenue Code – specifically sections 732(b) or (d), 734(b) or 743(b) – to which no corresponding tax is paid. The transactions would include either a distribution of partnership property to a partner that is related to one or more other partners in the partnership, or the transfer of a partnership interest in which the transferor is related to the transferee, or the transferee is related to one or more of the partners.

In these transactions, the basis increase allows related parties an opportunity for decreasing their taxable income through increased cost recovery deductions or through decreasing their taxable gain (or increasing their taxable loss) on the subsequent

transfer of the property in a transaction in which gain or loss is recognized in whole or in part.

The proposed regulations would affect the partnership and the partners that are participating in the identified transactions, including by receiving a distribution of partnership property, transferring a partnership interest or receiving a partnership interest.

“You can see by these descriptions that these involve complex arrangements where taxable income can be shielded from scrutiny,” Werfel said. “These proposed regulations demonstrate the agency’s commitment to use new resources to unpack complicated noncompliance by partnerships and other high-income taxpayers, which is an important part of our efforts to bring more fairness to the tax system.”

Revenue Ruling informs the public that IRS will challenge basis stripping

Revenue Ruling 2024-14 notifies taxpayers and advisors using partnerships that engage in three variations of these transactions that the IRS will apply the codified economic substance doctrine to challenge inappropriate basis adjustments and other aspects of these transactions.

Under Revenue Ruling 2024-14, the IRS announces that the economic substance doctrine will be raised in cases where related parties:

1. create inside/outside basis disparities through various methods, including the use of certain partnership allocations and distributions,
2. capitalize on the disparity by either transferring a partnership interest in a nonrecognition transaction or making a current or liquidating distribution of partnership property to a partner, and
3. claim a basis adjustment under Internal Revenue Code sections 732(b), 734(b), or 743(b) resulting from the nonrecognition transaction or distribution.

Rev. Rul. 2024-14 begins with the following overall introductory facts:

C is a domestic corporation engaged in operating a trade or business, including through several subsidiary entities commonly managed by C or in which C directly or indirectly holds controlling financial interests (C Subsidiaries) such that C is related to each of the C Subsidiaries under § 267(b) or § 707(b)(1). The C Subsidiaries include, among other entities, Sub 1, Sub 2, Sub 3, Partnership A, Partnership B, Partnership C, and Partnership D, each of which is indirectly owned by C through one or more C Subsidiaries. The C Subsidiaries own various depreciable or amortizable assets used in, and have incurred various liabilities as part of, the conduct of C’s trade or business. C issues financial statements for its trade or business that report these assets and liabilities of the C Subsidiaries (C Financial Statements).

Rev. Rul. 2024-14 includes the following overall introductory analysis:

The basis adjustment rules under §§ 732(b), 734(b), and 743(b) are intended to reduce disparities between inside and outside basis that would otherwise result from a

distribution of property or transfer of a partnership interest. In each of Situations 1-3, however, the parties engaged in a concerted effort to create disparities between inside and outside basis through various methods, such as the contribution or distribution of property with specific Federal income tax attributes or the allocation of Federal income tax items in accordance with § 704(b) and (c). They then exploited the created disparities by engaging in transfers resulting in basis adjustments under the mechanical rules of § 732(b), 734(b), or 743(b) to inappropriately reduce taxable income through increased deductions or reduced gain (or increased loss)....

Situations 1-3 all involve persons related to each other under § 267(b) or § 707(b)(1). A transaction among related parties to avoid Federal income tax by generating inflated basis adjustments falls outside the plain intent of §§ 732(b), 734(b), 743(b), and 754. While the differing economic interests of unrelated parties generally make it less likely that unrelated partners will engage in transactions such as those in Situations 1-3, partnerships composed of related partners have no such disincentive.⁴

⁴ This revenue ruling does not address the application of § 7701(o) to transactions among unrelated partners. Depending on the specific facts, § 7701(o) may apply to transactions among unrelated partners.

Congress intended that the provisions of subchapter K apply to transactions between partnerships and their partners to preserve parity between inside and outside basis “so as to prevent any unintended tax benefit or detriment to the partners.” H.R. Rep. No. 1337, 83d Cong., 2d Sess. A225 (1954); S. Rep. No. 1622, 83d Cong., 2d Sess. 384 (1954). Congress also expressed its desire to prevent related parties from exploiting the rules of subchapter K to avoid tax “through the realization of fictitious losses or increasing the basis of property for purposes of depreciation.” H.R. Rep. No. 1337, at A226; S. Rep. No. 1622, at 386-87.

Congress did not intend that taxpayers be able to avoid or indefinitely defer taxation altogether by creating basis disparities through contributions or distributions of property or through allocations of tax items by reason of a § 743(b) basis adjustment after a nonrecognition transaction, such as the Sub 1 Contribution in Situation 1; by reason of a § 734(b) basis adjustment after distribution of property, such as the Sub 3 Stock Distribution in Situation 2; or by reason of a § 732(b) basis adjustment after a liquidating distribution of property, such as the Partnership D Liquidation in Situation 3. The shared economic interests of related parties make them more likely than unrelated parties to attempt to generate such tax benefits in a manner not intended by Congress by entering into transactions with no meaningful economic change.

Unless a “meaning plainly appears” that Congress intended a provision to grant a tax benefit to transactions without economic substance or business purpose, such an intent “will not [be] attribute[d] to Congress.” *Knetsch v. United States*, 364 U.S. 361, 367-69 (1960). The economic substance doctrine is intended to apply “despite literal compliance with the statute.” *Coltec Indus., Inc. v. United States*, 454 F.3d 1340, 1354 (Fed. Cir. 2006); see *Gregory v. Helvering*, 293 U.S. 465, 470 (1935). The economic substance doctrine was developed to address transactions such as these, which follow the literal words of the Code but lie outside of Congress’s plain intent. *Gregory*, 293 U.S. at 469-470.

Each series of transactions described in Situations 1-3 lacks economic substance. In each of those situations, the economic substance doctrine is applied to basis adjustments generated by the following series of connected transactions involving related parties, which may occur over the course of several taxable years: (i) the parties generate basis disparities through various methods, such as contributions of property with specific Federal income tax attributes to the partnership, the allocation of Federal income tax items in accordance with § 704(b) and (c), or distributions of property with specific attributes to the partners, and (ii) either (1) a partner transfers its partnership interest in a nonrecognition transaction while there exists an inside/outside basis disparity, or (2) the partnership distributes property with specific Federal income tax attributes (for example, high inside basis) to one or more partners with specific Federal income tax attributes (for example, low outside basis) in a current or liquidating distribution. The resulting basis adjustments, if allowed, would permit the parties to shift basis in a manner that enables the parties to claim increased cost recovery deductions or reduced gain (or increased loss) upon the sale of the basis-adjusted property.

In applying the conjunctive test of § 7701(o)(1), each of two prongs must be met for the transactions described in Situations 1-3 to have economic substance. First, under § 7701(o)(1)(A), the transaction must change in a meaningful way (apart from Federal income tax effects) the taxpayer's economic position. Second, under § 7701(o)(1)(B), the taxpayer must have had a substantial purpose (apart from Federal income tax effects) for entering into the transaction.

With respect to the first prong under § 7701(o)(1)(A), the transactions in Situations 1-3 have a negligible effect on C's economic position because the transactions shift ownership of property among commonly controlled entities without "effect[ing] any real change in the 'flow of economic benefits,' or provid[ing] any real 'opportunity to make a profit'" *Coltec*, 454 F.3d at 1360; see *Reddam v. Commissioner*, 755 F.3d 1051, 1060-62 (9th Cir. 2014). The transactions fail to "appreciably affect the [taxpayer's] beneficial interest except to reduce ... tax"; that is, the transactions do not appreciably affect C's beneficial interests in the C Subsidiaries or their assets, except to reduce the aggregate Federal income tax liability of the related persons involved. *Knetsch*, 364 U.S. at 366 (quoting *Gilbert v. Commissioner*, 248 F.2d 399, 411 (2d Cir. 1957) (Learned Hand, J., dissenting)) (emphasis added). The only potential economic gains are derived from purported cost savings from cleaning up intercompany accounts between the C Subsidiaries, reducing administrative complexity, and achieving administrative efficiencies. However, any such cost savings do not change C and the C Subsidiaries' economic position in a meaningful way because any economic benefits attributable to purported cost savings (apart from the Federal income tax effects) are insubstantial compared to the \$80x in Federal income tax benefits from the basis adjustments attributable to these transactions. The basis increases of \$80x resulting from the transactions in Situations 1-3 can be used to reduce taxable income of the C Subsidiaries through depreciation, amortization, or other deductions or reduce gain recognized upon the sale of the property. The transactions were "designed to generate" basis increases, and those basis increases "would always ... have overshadowed" the economic gain, including gain derived from cost savings. *Reddam*, 755 F.3d at 1061-62. Even if there had been "some prospect of profit" from transferring a partnership interest or partnership property among related parties, the calculable Federal income tax benefits would have "far exceeded any independent potential for economic return." *Bank of New York Mellon Corp. v. Commissioner*, 801 F.3d 104, 117-18, 120 (2d Cir. 2015); *Salem Fin., Inc. v. United States*, 786 F.3d 932, 949 (Fed. Cir. 2015) (citing *Knetsch*,

364 U.S. at 365-66). Thus, any change in economic position (apart from the Federal income tax effects) in the transactions described in Situations 1-3 is not meaningful within the meaning of § 7701(o)(1)(A).

With respect to the second prong of the conjunctive test under § 7701(o)(1)(B), the transactions described in Situations 1-3 demonstrate a lack of any substantial purpose (apart from Federal income tax effects) to enter into these transactions. The stated business purpose of achieving cost savings from cleaning up intercompany accounts between the C Subsidiaries, reducing administrative complexity, and achieving administrative efficiencies may be a legitimate nontax economic purpose. However, any such business purpose is not substantial compared to the Federal income tax purposes the transactions were designed to carry out. See *Reddam*, 755 F.3d at 1061. Many of the facts in these transactions demonstrating a lack of meaningful change in economic position (apart from Federal income tax effects) also demonstrate a lack of substantial purpose (apart from Federal income tax effects) for these related parties to enter into these transactions. Reasonable inferences into a taxpayer's purpose for entering a transaction can be drawn from the facts and circumstances surrounding such transaction, including results from a transaction that the taxpayer could have reasonably anticipated as well as results from a transaction that were by design. The fact that the cost savings were insubstantial compared to relatively large basis increases of \$80x, that there was no appreciable effect on the parties' economic ownership of the property allocated the basis increases, and that the transactions were structured to guarantee basis increases of \$80x to depreciable or amortizable property while carrying a de minimis risk of economic loss compared to the designed Federal income tax benefit, *Altria Grp.*, 658 F.3d at 290-91, "indicate[] that the taxpayer's true motivation for the transaction is tax avoidance." See *Bank of New York Mellon Corp. v. United States*, 140 T.C. 15, 38 (2013). Therefore, C lacked a substantial purpose (apart from Federal income tax effects) for causing its subsidiaries to enter into the transactions described in Situations 1-3 within the meaning of § 7701(o)(1)(B).

If a transaction or series of transactions lacks economic substance, it may be disregarded for Federal income tax purposes. See *Gregory*, 293 U.S. 465; *Coltec*, 454 F.3d at 1352; *ACM P'ship v. Commissioner*, 157 F.3d 231, 247-48 (3d Cir. 1998). While a transaction might meet the literal requirements of the Code, courts will not recognize a transaction that is not within the intent of the Code. *Gregory*, 293 U.S. at 469-70. The series of transactions described in Situations 1-3 - related-party contributions or distributions of property or allocations of tax items and the subsequent transfer of a partnership interest or distribution of property to generate a basis adjustment to property that is eligible for cost recovery (or is held for future sale) - failed both prongs under § 7701(o)(1) and, therefore, lack economic substance. As a result, their Federal income tax effects must be disregarded. The transactions did not change in a meaningful way (apart from Federal income tax effects) the economic position of C or the C Subsidiaries within the meaning of § 7701(o)(1)(A), and C lacked a substantial business or other purpose (apart from Federal income tax effects) for causing the C Subsidiaries to enter into these transactions within the meaning of § 7701(o)(1)(B).

In addition, under § 6662(b)(6), the transactions described in Situations 1-3 give rise to a 20 percent penalty applicable to an underpayment attributable to a transaction lacking economic substance under § 7701(o). The penalty is increased to 40 percent on any portion of the underpayment attributable to one or more nondisclosed noneconomic

substance transactions. See § 6662(i). Under § 6664(c)(2), a reasonable cause exception to the penalties described in § 6662(b)(6) and (i) may not be asserted.

The series of transactions described in Situations 1-3 may also be subject to the partnership anti-abuse rule under § 1.701-2 or the § 704(c) anti-abuse rule under § 1.704-3(a)(10). Other anti-abuse doctrines including, but not limited to, the substance-over-form doctrine and step-transaction doctrine may apply, depending on the facts and circumstances of a specific transaction or series of transactions.

As to Code § 7701(o), see part II.G.17 Economic Substance Penalty and Doctrines, especially part II.G.17.a What Is the Codified Economic Substance Doctrine.

Rev. Rul. 2024-14 includes the following overall introductory holding:

The series of transactions in Situations 1-3 lack economic substance under § 7701(o). The transactions did not change the economic position of C or the C Subsidiaries in a meaningful way (aside from the Federal income tax effects). Additionally, neither C nor the C Subsidiaries had a substantial purpose for entering the transactions (aside from Federal income tax effects)....

C and/or the C Subsidiaries, as applicable, are subject to the 20 percent penalty under § 6662(b)(6) or the 40 percent penalty under § 6662(i) for a nondisclosed noneconomic substance transaction, as applicable.

The footnote to the above overall introductory holding explains:

This revenue ruling makes no interpretations regarding which audit procedures (for example, the application of subchapter C of chapter 63 of the Code) might apply to effectuate the substantive interpretations of the Holdings section. Any such interpretations would require facts that are outside the scope of this revenue ruling.

Situation 1 involves the following facts:

C indirectly owns more than 50 percent of the stock of each of Sub 1, Sub 2, and Sub 3, all domestic corporations. Sub 1 and Sub 2 are the only partners in Partnership A with each holding a 50 percent interest in the capital, profits, and losses of Partnership A. Sub 1 and Sub 3 are the only partners in Partnership B with each holding a 50 percent interest in the capital, profits, and losses of Partnership B.

Prior to Date 1, Partnership A had a valid election in place under § 754. Also prior to Date 1, Sub 1's share of the adjusted tax basis of Partnership A's property (that is, Sub 1's share of Partnership A's inside basis) was equal to \$20x and the adjusted tax basis of Sub 1's interest in Partnership A (that is, Sub 1's outside basis) was \$100x. This \$80x disparity between Sub 1's share of Partnership A's inside basis and Sub 1's outside basis in Partnership A prior to Date 1 resulted from Sub 1 and Sub 2 making contributions to Partnership A, and Partnership A making distributions to Sub 1 and Sub 2, of property with specific Federal income tax attributes, and the allocation of Federal income tax items in accordance with § 704(b) and (c). Such contributions, distributions, and allocations were undertaken with a view to creating a disparity between Sub 1's share of Partnership A's inside basis and Sub 1's outside basis in Partnership A.

On Date 1, Sub 1 transfers its interest in Partnership A to Partnership B in a contribution that qualifies for nonrecognition of gain or loss under § 721(a) (Sub 1 Contribution). The stated business purpose for the Sub 1 Contribution is to achieve cost savings for C and the C Subsidiaries by cleaning up intercompany accounts, reducing administrative complexity, and achieving other administrative efficiencies.

Immediately after the Sub 1 Contribution, Partnership B's outside basis in its interest in Partnership A is \$100x under § 723 while its share of Partnership A's inside basis is \$20x (without regard to § 743(b)). Under § 743(b), Partnership A increases the adjusted basis of its property by \$80x (the excess of Partnership B's \$100x outside basis over its \$20x proportionate share of inside basis) with respect to Partnership B only.² Partnership A allocates substantially all of this \$80x basis increase to its depreciable or amortizable property (Basis-Adjusted Property) under § 755 and § 1.755-1(b)(5). The Sub 1 Contribution on Date 1 was undertaken with a view to exploiting the disparity between Sub 1's share of Partnership A's inside basis and Sub 1's outside basis in Partnership A created before Date 1 and increasing Partnership B's share of Partnership A's inside basis in the depreciable or amortizable property.

² This section shows a mechanical application of the rules of subchapter K of chapter 1 of the Code (subchapter K). The tax effect will be disregarded if the economic substance doctrine applies. Later sections of this revenue ruling address whether the economic substance doctrine applies.

The cost savings resulting from the Sub 1 Contribution are insubstantial in relation to the reduction in the aggregate Federal income tax liability of the C Subsidiaries resulting from the \$80x increase in Partnership A's basis in the Basis-Adjusted Property, which results in Partnership B being allocated increased amounts of deductions for depreciation or amortization or reduced amounts of gain (or increased amounts of loss) upon the sale of the Basis-Adjusted Property. C reports the relatively small cost savings in the C Financial Statements.

Situation 1 involves the following analysis:

In Situation 1, the actions of the parties creating a disparity between Sub 1's outside basis and share of Partnership A's inside basis, the transfer of Sub 1's interest in Partnership A to Partnership B in the Sub 1 Contribution, and the resulting positive basis adjustment to Partnership B's share of inside basis of Partnership A's property under § 743(b) were undertaken with a view to increasing Partnership B's share of Partnership A's inside basis in depreciable or amortizable property by \$80x while avoiding recognition of gain or loss under § 721(a) through a nonrecognition transaction. Additionally, the \$80x basis increase was relatively large in amount compared to the cost savings to C and the C Subsidiaries.

After additional analysis reproduced further below, the IRS concluded:

In Situation 1, the basis adjustment under § 743(b) is disregarded. As a result, Partnership B is not entitled to an increase of \$80x in its share of the inside basis of Partnership A's assets, and Partnership B's share of the inside basis of Partnership A's assets remains \$20x.

Situation 2 involves the following facts:

C indirectly owns more than 50 percent of the stock of Sub 1 and Sub 2, both domestic corporations. Sub 1 and Sub 2 are the only partners in Partnership C with each having a 50 percent interest in the capital, profits, and losses of Partnership C. Partnership C owns 100 percent of the stock of Sub 3, a domestic corporation, a depreciable asset, and \$100x of money deposited in a bank account.

Prior to Date 2, Partnership had a valid election in place under § 754. Also prior to Date 2, Partnership C held the Sub 3 stock with an adjusted basis of \$90x and fair market value of \$100x and held the depreciable asset with an adjusted basis of \$10x and fair market value of \$100x. Also, Sub 1's outside basis in Partnership C was \$100x and Sub 2's outside basis in Partnership C was \$10x as a result of Sub 1 and Sub 2 making contributions to Partnership C, and Partnership C making distributions to Sub 1 and Sub 2, of property with specific Federal income tax attributes, and the allocation of Federal income tax items in accordance with § 704(b) and (c). Such contributions, distributions, and allocations were undertaken with a view to creating a disparity between Sub 2's outside basis and Partnership C's inside basis in the Sub 3 stock.

On Date 2, Partnership C distributes all of the Sub 3 stock to Sub 2 other than in liquidation of Sub 2's interest in Partnership C (Sub 3 Stock Distribution). The stated business purpose for the Sub 3 Stock Distribution is to achieve costs savings for C and the C Subsidiaries by cleaning up intercompany accounts, reducing administrative complexity, and achieving other administrative efficiencies.

Immediately after the Sub 3 Stock Distribution, Sub 2's adjusted basis in the Sub 3 stock is \$10x under § 732(a)(2), the same as Sub 2's outside basis in Partnership C prior to the Sub 3 Stock Distribution. In addition, the Sub 3 Stock Distribution reduces Sub 2's outside basis in Partnership C from \$10x to zero under § 733(2). Following the Sub 3 Stock Distribution, Partnership C increases the inside basis of its assets by \$80x under § 734(b)(1)(B). Under § 755 and § 1.755-1(c)(2)(i), Partnership C increases the adjusted basis of its remaining depreciable asset from \$10x to \$90x.³ The Sub 3 stock Distribution on Date 2 was undertaken with a view to exploiting the disparity between Sub 2's outside basis in Partnership C and Partnership C's inside basis in the Sub 3 stock created before Date 2 and transferring basis from nondepreciable Sub 3 stock to Partnership C's remaining depreciable asset.

³ The distribution of Sub 3 stock (controlled corporation) to Sub 2 (corporate partner) meets the requirements of § 732(f) because Partnership C's adjusted basis in the Sub 3 stock prior to the Sub 3 Stock Distribution exceeds the adjusted basis of the stock in the hands of the corporate partner (Sub 2). Under § 732(f), the aggregate adjusted bases of Sub 3's property must be reduced by \$80x, subject to the limitations in § 732(f)(3). Additionally, this revenue ruling does not address the application of § 751(b) to the facts of Situations 2 and 3.

The cost savings resulting from the Sub 3 Stock Distribution are insubstantial in relation to the reduction in the aggregate Federal income tax liability of the C Subsidiaries resulting from the \$80x increase in Partnership C's inside basis in the remaining depreciable asset, which results in Sub 1 and Sub 2 being allocated increased amounts of deductions for depreciation or reduced amounts of gain (or increased amounts of

loss) upon the sale of Partnership C's remaining depreciable asset. C reports the relatively small cost savings in the C Financial Statements.

Situation 2 involves the following analysis:

In Situation 2, the actions of the parties creating a disparity between Sub 2's outside basis and Partnership C's inside basis in the Sub 3 stock, the distribution of Sub 3 stock (a high-inside basis asset) to Sub 2 (a partner with a low outside basis in its partnership interest) and the resulting adjustment to the inside basis of Partnership C's remaining property were undertaken with a view to transferring \$80x of basis from nondepreciable Sub 3 stock to Partnership C's remaining depreciable asset while avoiding recognition of gain or loss under § 731 through a nonrecognition distribution. Additionally, the \$80x basis increase was relatively large in amount compared to the cost savings.

After additional analysis reproduced further below, the IRS concluded:

In Situation 2, the basis adjustment under § 734(b) is disregarded. As a result, Partnership C is not entitled to an increase of \$80x to the inside basis of the remaining depreciable asset, and the inside basis of the depreciable asset remains \$10x.

Situation 3 involves the following facts:

C indirectly owns more than 50 percent of the stock of Sub 1 and Sub 2, both domestic corporations. Sub 1 and Sub 2 are the only partners in Partnership D with each having a 50 percent interest in the capital, profits, and losses of Partnership D.

Prior to Date 3, Partnership D owned two assets: a depreciable asset with an adjusted basis of \$20x and a fair market value of \$100x and nondepreciable land with an adjusted basis of \$90x and fair market value of \$100x. Also prior to Date 3, Sub 1's outside basis in Partnership D was \$100x, and Sub 2's outside basis in Partnership D was \$20x as a result of Sub 1 and Sub 2 making contributions to Partnership D, and Partnership D making distributions to Sub 1 and Sub 2, of property with specific Federal income tax attributes, and the allocation of Federal income tax items in accordance with § 704(b) and (c). Such contributions, distributions, and allocations were undertaken with a view to creating a disparity between Partnership D's inside basis in the depreciable asset and Sub 1's outside basis in Partnership D.

On Date 3, Partnership D liquidates by distributing the depreciable asset to Sub 1 and the nondepreciable land to Sub 2 (Partnership D Liquidation). The stated business purpose for the Partnership D Liquidation is to achieve cost savings for C and the C Subsidiaries by cleaning up intercompany accounts, reducing administrative complexity, and achieving other administrative efficiencies.

Immediately after the Partnership D Liquidation, Sub 1's adjusted basis in the depreciable asset is \$100x under § 732(b), the same as Sub 1's outside basis in Partnership D prior to the Partnership D Liquidation, reflecting an increase of \$80x to the adjusted basis of the depreciable asset in the hands of Sub 1. Also immediately after the Partnership D Liquidation, Sub 2's adjusted basis in the nondepreciable land is \$20x under § 732(b), the same as Sub 2's outside basis in Partnership D prior to the Partnership D Liquidation, reflecting a decrease of \$70x to the adjusted basis of the nondepreciable land in the hands of Sub 2. The distribution of the depreciable asset to

Sub 1 as part of the Partnership D Liquidation on Date 3 was undertaken with a view to exploiting the disparity between Partnership D's inside basis in the depreciable asset and Sub 1's outside basis in Partnership D created before Date 3 and transferring basis from nondepreciable land distributed to Sub 2 to the depreciable asset distributed to Sub 1.

The cost savings resulting from the Partnership D Liquidation are insubstantial in relation to the reduction in the aggregate Federal income tax liability of the C Subsidiaries resulting from the \$80x increase in Sub 1's adjusted basis in the depreciable asset, which results in increased deductions for depreciation or reduced amounts of gain (or increased amounts of loss) upon the sale of the depreciable asset for Sub 1. C reports the relatively small cost savings in the C Financial Statements.

Situation 3 involves the following analysis:

In Situation 3, the actions of the parties creating a disparity between Sub 1's outside basis and Partnership D's adjusted basis in the depreciable asset, the liquidating distribution of the depreciable asset (a low-inside basis asset) to Sub 1 (a partner with a high outside basis in its partnership interest) in the Partnership D Liquidation and the resulting adjustment to the adjusted basis of the depreciable asset to Sub 1 under § 732(b) were undertaken with a view to transferring basis from nondepreciable land distributed to Sub 2 to the depreciable asset distributed to Sub 1 while avoiding recognition of gain or loss under § 731 through a nonrecognition distribution. Additionally, the \$80x basis increase was relatively large in amount compared to the cost savings to C and the C Subsidiaries.

The IRS concluded:

In Situation 3, the basis adjustment to Sub 1 under § 732(b) is disregarded. As a result, Sub 1 is not entitled to an increase of \$80x to the adjusted basis of the depreciable asset, and the adjusted basis of Sub 1's depreciable asset remains \$20x.

Proposed regulations, "[Certain Partnership Related-Party Basis Adjustment Transactions as Transactions of Interest](#)," REG-124593-23, RIN 1545-BR07 (6/18/2024), would require reporting within 90 calendar days after the date on which a transaction becomes a transaction of interest.

The preamble's "[Explanation of Provisions](#)" says:

I. Partnership Related-Party Basis Adjustment Transactions of Interest

Proposed § 1.6011-18(a) would identify transactions that are the same as or substantially similar (within the meaning of § 1.6011-4(c)(4)) to transactions described in proposed § 1.6011-18(c) as transactions of interest for the purposes of § 1.6011-4(b)(6). Proposed § 1.6011-18(c) would include a relatedness requirement and a \$5 million minimum threshold requirement. Further, proposed § 1.6011-18(a) would identify transactions that are substantially similar (within the meaning of § 1.6011-4(c)(4)) to the transactions described in proposed § 1.6011-18(c) as including the transactions described in proposed § 1.6011-18(d).

The relatedness requirement would be set forth in proposed § 1.6011-18(b)(8) and (9). Proposed § 1.6011-18(b)(8) would define "related" as having a relationship described in

section 267(b) (without regard to section 267(c)(3)) or 707(b)(1). Proposed § 1.6011-18(b)(9) would define “related partners” as partners of a partnership that are related in the following manner—(i) in a transaction described in proposed § 1.6011-18(c)(1), the partnership has two or more direct or indirect partners that are related to each other within the meaning of proposed § 1.6011-18(b)(8), or (ii) in a transaction described in proposed § 1.6011-18(c)(2), the transferor of a partnership interest is related to the transferee, or the transferee is related to one or more of the partners in the partnership, within the meaning of proposed § 1.6011-18(b)(8). The relatedness requirement may be met either immediately before or immediately after a basis adjustment transaction described in proposed § 1.6011-18(c)(1) or (2).

Proposed § 1.6011-18(c) would provide that a transaction of interest is a transaction the factual elements of which are described in proposed § 1.6011-18(c)(1)(i) through (iii) or (c)(2). A basis adjustment transaction under proposed § 1.6011-18(c)(1)(i) would occur when a partnership makes a current or liquidating distribution of property to a partner who is related to one or more partners, the partnership increases the basis of one or more of its remaining properties under section 734(b) and (c), and the \$5 million threshold under proposed § 1.6011-18(c)(3) is met.

A basis adjustment transaction under proposed § 1.6011-18(c)(1)(ii) would occur when a partnership distributes property to a partner who is related to one or more partners in liquidation of a partnership interest (or in complete liquidation of the partnership), the basis of one or more distributed properties is increased under section 732(b) and (c), and the \$5 million threshold under proposed § 1.6011-18(c)(3) is met.

A basis adjustment transaction under proposed § 1.6011-18(c)(1)(iii) would occur when a partnership distributes property to a partner who is related to one or more partners, the basis of one or more distributed properties is increased under section 732(d), the related partner acquired all or a part of its interest in the partnership in a transaction that would have been a transaction described in proposed § 1.6011-18(c)(2) if the partnership had a section 754 election in effect for the year of transfer, and the \$5 million threshold under proposed § 1.6011-18(c)(3) is met.

A basis adjustment transaction under proposed § 1.6011-18(c)(2) would occur when a partner transfers an interest in the partnership to a related transferee or to a person who is related to one or more existing partners in a nonrecognition transaction, the basis of one or more partnership properties is increased under section 743(b)(1) and (c), and the \$5 million threshold under proposed § 1.6011-18(c)(3) is met. Proposed § 1.6011-18(b)(2) would define nonrecognition transaction as defined in section 7701(a)(45) (other than a transfer on the death of a partner).

Proposed § 1.6011-18(c)(3) would provide rules for determining the \$5 million threshold. Under proposed § 1.6011-18(c)(3), a basis adjustment would include basis increases from multiple transactions described in proposed § 1.6011-18(c)(1) or (2) by the same partner or partnership during the taxable year that in the aggregate (without netting for any basis adjustments in the same transaction or another transaction that reduces basis) and after reducing the resulting aggregate amount by the gain recognized, if any, on which tax imposed under subtitle A of the Code (subtitle A) is required to be paid by any of the related parties to the transaction equal or exceed \$5 million. Accordingly, a transaction of a partner or partnership described in proposed § 1.6011-18(c)(1) or (2) that results in a basis increase of less than \$5 million during the taxable year would be a

transaction of interest under proposed § 1.6011-18(a) if, in the same taxable year, the partner or partnership participated in another transaction or transactions described in proposed § 1.6011-18(c)(1) or (2), and in the aggregate, the transactions resulted in a basis increase that equals or exceeds \$5 million, without regard to any basis decrease resulting from the transactions and after reducing the resulting aggregate amount by the gain recognized, if any, on which tax imposed under subtitle A is required to be paid by any of the related parties to the transactions. A threshold of \$5 million of basis increases in a taxable year to which no corresponding tax is paid should be sufficiently large to capture situations that use the provisions of subchapter K to produce significant tax benefits with little or no economic impact.

If a basis adjustment transaction is described in proposed § 1.6011-18(c)(1)(i) through (iii) or (c)(2), any basis adjustments to recoverable property must be reported in the taxable year of the basis adjustment transaction, in each taxable year there is a cost recovery allowance, and in the taxable year the recoverable property is disposed of in a transaction in which gain or loss is recognized in whole or in part. Any basis adjustments to other property must be reported in the taxable year of the basis adjustment transaction and the taxable year in which the other property is disposed of in a transaction in which gain or loss is recognized in whole or in part. See proposed § 1.6011-18(e) and (f).

Proposed § 1.6011-18(b)(7) would define recoverable property as property of a character subject to an allowance for depreciation, amortization, or depletion under subtitle A of the Code.

II. Examples of Partnership Related-Party Basis Adjustment Transactions of Interest

The following examples illustrate the transactions of interest described in proposed § 1.6011-18(c).

A. Example 1. A Partnership Related-Party Basis Adjustment Transaction Under Proposed § 1.6011-18(c)(1)(i)

XY Partnership is owned by partners X and Y. The partners are related to each other within the meaning of proposed § 1.6011-18(b)(8) and (b)(9)(i). Each partner directly owns 50 percent of the capital and profits interests in XY Partnership and shares losses equally. X has an outside basis of \$10 million, and Y has an outside basis of \$1 million. XY Partnership owns property it uses in its trade or business, including Property 1 and Property 2. For Federal income tax purposes, Property 1 is depreciable property and Property 2 is nondepreciable property. XY Partnership has an adjusted basis in Property 1 of zero, and an adjusted basis in Property 2 of \$10 million.

XY Partnership has a section 754 election in effect for the taxable year and makes a current distribution of Property 2 to Y. Under section 732(a)(2), Y's basis in distributed Property 2 is limited to Y's adjusted basis in its partnership interest of \$1 million. As a result of the distribution to Y, Property 2's adjusted basis is decreased from \$10 million immediately before the distribution to \$1 million in Y's hands. Under section 734(b), XY Partnership must increase the basis of its remaining property. The amount of the basis increase is equal to the excess of XY Partnership's basis in Property 2 immediately before the distribution of \$10 million over Y's adjusted basis in Property 2 after the

distribution of \$1 million, which results in an increase to the basis of XY Partnership's remaining property of \$9 million.

Under sections 734(c) and 755 and the regulations thereunder, XY Partnership allocates the basis increase of \$9 million to Property 1. As a result, XY Partnership claims depreciation deductions based on an increased basis in Property 1.

B. Example 2. A Partnership Related-Party Basis Adjustment Transaction Under Proposed § 1.6011-18(c)(1)(ii)

DEF Partnership is owned by partners D, E and F. The partners are related to each other within the meaning of proposed § 1.6011-18(b)(8) and (b)(9)(i). D's outside basis is \$7 million. E and F each have an outside basis of \$1 million. DEF Partnership owns only two properties, Property 1 and Property 2, both of which it uses in its trade or business. For Federal income tax purposes, Property 1 is depreciable property and Property 2 is nondepreciable property. DEF Partnership has an adjusted basis in Property 1 of zero, and an adjusted basis in Property 2 is \$9 million.

DEF Partnership distributes Property 1 to D in liquidation of D's partnership interest. Under section 732(b), D's basis in distributed Property 1 is equal to \$7 million. As a result, D claims depreciation deductions based on a \$7 million basis in Property 1.

C. Example 3. A Partnership Related-Party Basis Adjustment Transaction Under Proposed § 1.6011-18(c)(1)(iii)

XYZ Partnership is owned by partners X, Y and Z. The partners are related to each other within the meaning of proposed § 1.6011-18(b)(8) and (b)(9)(i). Each partner directly owns one-third of the capital and profits interests in XYZ Partnership and shares losses equally.

XYZ Partnership owns Property 1, Property 2, and Property 3. Property 1 is depreciable property, and XYZ Partnership's adjusted basis in Property 1 is zero. Property 2 and Property 3 are nondepreciable property.

X acquired its interest in XYZ Partnership in a nonrecognition transaction from a person related to X within the meaning of proposed § 1.6011-18(b)(8). At the time of the transfer, XYZ Partnership did not have a section 754 election in effect. Immediately after the transfer, X's outside basis was \$12 million and share of inside basis was \$2 million. If XYZ Partnership had a section 754 election in effect at the time of the transfer, XYZ Partnership would have adjusted X's share of inside basis under section 743(b). Assume that the adjustment under section 743(b) would have resulted in a basis increase to Property 1 of \$10 million.

In a taxable year that is within two years of the transfer of the partnership interest to X, XYZ Partnership makes a current distribution of Property 1 to X. Under section 732(a)(1), X's adjusted basis in Property 1 is zero. However, X makes an election under section 732(d) to adjust the basis of Property 1 to the adjusted basis it would have if the adjustment under section 743(b) were in effect with respect to the partnership property at the time X acquired its interest. As a result of the election under 732(d), because the adjusted basis of Property 1 under section 743(b) with respect to X would have been increased by \$10 million, X takes a basis in Property 1

equal to \$10 million and claims depreciation deductions based on a \$10 million basis in Property 1.

D. Example 4. A Partnership Related-Party Basis Adjustment Transaction Under Proposed § 1.6011-18(c)(2)

AB Partnership is owned by partners A and B. A owns 95 percent of the capital and profits interests in AB Partnership and is allocated 95 percent of all losses. B owns 5 percent of the capital and profits interests in AB Partnership and is allocated 5 percent of all losses. A's outside basis is \$6 million and share of inside basis is \$1 million. AB Partnership owns depreciable property it uses in a trade or business.

In a taxable year in which AB Partnership has a section 754 election in effect, A transfers its entire partnership interest to C, a person related to A within the meaning of proposed § 1.6011-18(b)(8) and (b)(9)(ii), in a nonrecognition transaction in which no gain was recognized. Because AB Partnership has a section 754 election in effect for the taxable year of the transfer, under section 743(b)(1), AB Partnership increases the basis of the partnership property with respect to C by \$5 million.

Assume that under sections 743(c) and 755 and the regulations thereunder, the basis increase with respect to C of \$5 million is allocated to partnership property that is depreciable. As a result, C may be allocated depreciation deductions over the recovery periods of the partnership properties equal to the amount of the basis increase under section 743(b)(1).

Modifying the overall principles described in the preamble above are Background [part VI](#), [“Potential Tax Avoidance Using Partnership Related-Party Basis Adjustment Transactions,”](#) and the Explanation of Provisions' [part III](#), [“Substantially Similar Transactions.”](#)

Prop. Reg. § 1.6011-18(b)(8) provides, “*Related* means having a relationship described in section 267(b) of the Code (without regard to section 267(c)(3)) or section 707(b)(1) of the Code.” See parts II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses and II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

Prop. Reg. § 1.6011-18, “Certain partnership related-party basis adjustment transactions as transactions of interest,” provides in full:

(a) *Identification as transaction of interest.* Transactions that are the same as or substantially similar (within the meaning of § 1.6011-4(c)(4)) to the transactions described in paragraph (c) of this section are identified as transactions of interest for purposes of § 1.6011-4(b)(6). Transactions that are substantially similar (within the meaning of § 1.6011-4(c)(4)) to the transactions described in paragraph (c) of this section include, but are not limited to, transactions described in paragraph (d) of this section.

(b) *Definitions.* The following definitions apply for purposes of this section:

(1) *Code* means the Internal Revenue Code.

- (2) *Nonrecognition transaction* means a nonrecognition transaction within the meaning of section 7701(a)(45) of the Code (other than a transfer on the death of a partner).
- (3) *Participating partner* means any partner that directly receives a distribution of property or an interest in a participating partnership, or directly transfers an interest in a participating partnership, in a transaction described in paragraph (c) of this section, including a person that becomes or ceases to be a partner as a result of such transaction. In the case of a participating partnership interest held by an entity that is disregarded as separate from its owner within the meaning of § 301.7701-2(c)(2)(i) of this chapter, participating partner means the owner of the disregarded entity for Federal income tax purposes. In the case of a participating partnership interest held by a grantor trust within the meaning of section 671 of the Code, participating partner means the grantor or other person designated under sections 671 through 679 of the Code as the owner of that portion of the trust that holds the participating partnership interest.
- (4) *Participating partnership* means any partnership -
- (i) That makes a distribution of property to a participating partner in a transaction described in paragraph (c)(1) of this section, or
 - (ii) A partnership interest which is transferred in a transaction described in paragraph (c)(2) of this section.
- (5) *Participating partnership interest* means any partnership interest in a participating partnership.
- (6) *Recognition transaction* means a transaction other than a nonrecognition transaction within the meaning of paragraph (b)(2) of this section.
- (7) *Recoverable property* means property of a character subject to an allowance for depreciation, amortization, or depletion under subtitle A of the Code (subtitle A).
- (8) *Related* means having a relationship described in section 267(b) of the Code (without regard to section 267(c)(3)) or section 707(b)(1) of the Code.
- (9) *Related partners* mean partners of a partnership that are related in the following manner:
- (i) In the case of a transaction described in paragraph (c)(1) of this section, the partnership has two or more direct or indirect partners that are related immediately before or immediately after a transaction described in paragraph (c)(1) of this section.
 - (ii) In the case of a transaction described in paragraph (c)(2) of this section, the transferor of a partnership interest is related to the transferee, or the transferee is related to one or more of the partners in the partnership, immediately before or immediately after a transaction described in paragraph (c)(2) of this section.

- (10) *Related subsequent transferee* means any person who is related to a participating partner and directly received in a nonrecognition transaction, a transfer (including a distribution) of property that was subject to an increase in basis as a result of a transaction described in paragraph (c) of this section.
- (11) *Tax-indifferent party* means a person that is either not liable for Federal income tax because of its tax-exempt or, in certain cases, foreign status or to which gain from a transaction described in paragraph (c) of this section would not result in Federal income tax liability for the person's taxable year within which such gain is recognized.
- (c) *Transaction description.* A transaction is described in this paragraph (c) if the factual elements of the transaction described in paragraph (c)(1)(i) through (iii) or (c)(2) of this section are met.
- (1) *Distributions by partnership.* A partnership engages in any of the transactions described in paragraphs (c)(1)(i) through (iii) of this section with one or more of the related partners:
- (i) The partnership distributes property to a person who is a related partner in a current or liquidating distribution, the partnership increases the basis of one or more of its remaining properties under section 734(b) and (c) of the Code, and the \$5 million threshold described in paragraph (c)(3) of this section is met.
 - (ii) The partnership distributes property to a person who is a related partner in liquidation of the person's partnership interest (or in complete liquidation of the partnership), the basis of one or more distributed properties is increased under section 732(b) and (c) of the Code, and the \$5 million threshold described in paragraph (c)(3) of this section is met.
 - (iii) The partnership distributes property to a person who is a related partner, the basis of one or more distributed properties is increased under section 732(d) of the Code, the related partner acquired all or a part of its interest in the partnership in a transaction that would have been a transaction described in paragraph (c)(2) of this section if the partnership had a section 754 election in effect for the year of transfer, and the \$5 million threshold described in paragraph (c)(3) of this section is met.
- (2) *Transfer of partnership interest.* A partner transfers an interest in a partnership to a related partner in a nonrecognition transaction, the basis of one or more partnership properties is increased under section 743(b)(1) and (c) of the Code, and the \$5 million threshold described in paragraph (c)(3) of this section is met.
- (3) *\$5 million threshold.* For the purpose of determining whether a transaction is described in paragraph (c)(1), (c)(2), (d)(1), or (d)(2) of this section, the \$5 million threshold is met for a taxable year if the sum of all basis increases resulting from all such transactions of a partnership or partner during the taxable year (without netting for any basis adjustment in the same transaction or another transaction that reduces basis) exceeds by at least \$5 million the gain recognized from such transactions, if any, on which tax imposed under subtitle A is required to be paid

by any of the related partners (or tax-indifferent party, in the case of a transaction described in paragraphs (d)(1) and (2) of this section) to such transactions.

(d) *Substantially similar transaction.* A transaction that is substantially similar (within the meaning of § 1.6011-4(c)(4)) to a transaction described in paragraph (c) of this section includes, but is not limited to:

- (1) A transaction that is described in paragraph (c) of this section except that the partners of the partnership are not related and one or more partners of the partnership is a tax-indifferent party that facilitates, by receiving a distribution of property from the partnership or otherwise, an increase in the basis of partnership property or an increase in the basis of property held by another partner in the partnership; and
- (2) A transaction in which a partner transfers an interest in a partnership to a related partner in a recognition transaction, and the \$5 million threshold described in paragraph (c)(3) of this section is met.

(e) *Participation -*

- (1) *In general.* Whether a taxpayer has participated in a transaction of interest described in paragraph (c) of this section during a taxable year is determined under this paragraph (e).
- (2) *Participating partners.* A participating partner participates in a transaction of interest described in paragraph (c) of this section in any taxable year in which the partner directly receives a distribution of property or an interest in a participating partnership, or directly transfers an interest in a participating partnership, in a transaction described in paragraph (c) of this section.
- (3) *Participating partnerships.* A participating partnership participates in a transaction of interest described in paragraph (c) of this section in any taxable year in which the partnership makes a distribution of property to a participating partner in a transaction described in paragraph (c)(1) of this section, or a participating partnership interest is transferred in a transaction described in paragraph (c)(2) of this section.
- (4) *Related subsequent transferees.* A related subsequent transferee participates in a transaction of interest described in paragraph (c) of this section in any taxable year in which the related subsequent transferee directly receives, in a nonrecognition transaction, a transfer (including a distribution) of property that was subject to an increase in basis as a result of a transaction described in paragraph (c) of this section.
- (5) *Subsequent realization of tax benefit.* A participating partnership, participating partner or related subsequent transferee also participates in a transaction of interest described in paragraph (c) of this section in any taxable year in which its tax return reflects the tax consequences of a basis increase resulting from a transaction of interest described in paragraph (c) of this section. For example, if a participating partner sells property the basis of which has been increased as a result of a transaction of interest described in paragraph (c) of this section during

a taxable year after the year in which the transaction of interest described in paragraph (c) of this section resulting in the basis increase occurred, the participating partner participates in a transaction of interest described in paragraph (c) of this section during the taxable year(s) in which the tax consequences of the sale are reported on the participating partner's tax return.

(f) *Disclosure requirements* -

(1) *In general.* Participants must provide the information required under § 1.6011-4(d) and the Instructions to Form 8886, Reportable Transaction Disclosure Statement (or successor form) for each taxable year in which the participant participated in a transaction described in paragraph (c) of this section as determined under paragraph (e) of this section. For all participants, describing the transaction in sufficient detail includes describing the information described in paragraphs (f)(1)(i) through (iii) of this section, as applicable, on Form 8886 (or successor form) for the taxable year of a transaction described in paragraph (c) of this section.

(i) The names and identifying numbers of all participants, including the participating partnership, participating partners and any related subsequent transferees or tax-indifferent parties.

(ii) All basis adjustments resulting from a transaction described in paragraph (c) of this section, and basis information, including the participating partnership's adjusted basis in the distributed property immediately before the distribution, any adjustments to basis under section 732(a)(2), (b), (d) or 734(b), any adjustments to basis under section 743(b) with respect to a participating partner that is transferred an interest in a participating partnership, and with respect to a participating partner that transfers an interest in a participating partnership, that participating partner's adjusted basis in the participating partnership interest and share of the participating partnership's adjusted basis in its property immediately before the transfer.

(iii) Any Federal income tax consequences realized during the taxable year, as a result of a transaction described in paragraph (c) of this section, including cost recovery allowances attributable to an increase in basis as a result of a transaction described in paragraph (c) of this section, and taxable gain or taxable loss attributable to the disposition of property that was subject to an increase in basis as a result of a transaction described in paragraph (c) of this section. For example, in the case of a distribution of depreciable property that was subject to an increase in basis as a result of a transaction described in paragraph (c) of this section, the Federal income tax consequences realized during the taxable year include the basis increase and cost recovery allowances attributable to the basis increase during the taxable year.

(2) *Disposition in subsequent taxable years.* If the property subject to an increase in basis as a result of a transaction described in paragraph (c) of this section is disposed of in a transaction in which gain or loss is recognized in whole or in part in a subsequent taxable year, the participant must send a copy of Form 8886 to the Office of Tax Shelter Analysis (OTSA). This requirement is in addition to the

requirement that a participant send a copy of Form 8886 to OTSA for the taxable year of the basis increase.

(g) *Examples.* The following examples illustrate the provisions of this section.

- (1) *Example 1:* Reporting by a participating partner and participating partnership in the taxable year of the transaction, including cost recovery allowances
 - (i) *Facts.* ABC Partnership is owned by partners A, B and C. Partners A, B and C are related within the meaning of paragraphs (b)(8) and (9) of this section. At the beginning of taxable year 1, ABC Partnership distributes a depreciable asset, Property X, to Partner A in liquidation of Partner A's interest in ABC Partnership. The distribution is a transaction described in paragraph (c)(1)(ii) of this section. As a result of the distribution, the basis of Property X is increased by \$5 million. On its tax return for taxable year 1, Partner A reports deductions for depreciation expense attributable to the \$5 million increase in the basis of Property X resulting from the transaction under paragraph (c)(1)(ii) of this section. ABC Partnership and Partner A have the same taxable year.
 - (ii) *Analysis.* Partner A is a participant during taxable year 1 within the meaning of paragraph (e) of this section because it is a participating partner within the meaning of paragraph (b)(3) of this section since it directly received a distribution of property during taxable year 1 in a transaction described in paragraph (c) of this section. ABC Partnership is a participant during taxable year 1 within the meaning of paragraph (e) of this section because it is a participating partnership within the meaning of paragraph (b)(4) of this section since it made a distribution of property to a participating partner during taxable year 1 in a transaction described in paragraph (c) of this section. As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), Partner A must disclose the distribution as a transaction of interest under this section on Form 8886 (or successor form) and file the form with its tax return for taxable year 1. Partner A must include the information described in paragraph (f) of this section, including the amount of the deductions attributable to the \$5 million increase in the basis of Property X resulting from the transaction described in paragraph (c)(1)(ii) of this section. As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), ABC Partnership must disclose the distribution as a transaction of interest under this section on Form 8886 (or successor form) and file the form with its tax return for taxable year 1, including the information described in paragraph (f) of this section. In addition, Partner A and ABC Partnership must send a copy of their respective Form 8886 (or successor form) to OTSA.
- (2) *Example 2:* Reporting of the Federal income tax consequences (cost recovery allowances) of the transaction in all taxable years -
 - (i) *Facts.* Under the same facts as in paragraph (g)(1)(i) of this section (Example 1), on its tax returns for taxable years 2 through 5, Partner A reports deductions for depreciation expense attributable to the \$5 million

increase in the basis of Property X related to the transaction described in paragraph (c)(1)(ii) of this section, which occurred in taxable year 1.

- (ii) *Analysis.* As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), Partner A must disclose the deductions on Form 8886 (or successor form) for taxable years 2 through 5 as the Federal income tax consequences of the transaction described in paragraph (c)(1)(ii) of this section. As a result, for each taxable year 2 through 5, Partner A must file the form with its tax return for the taxable year with the information described in paragraph (f) of this section, including the amount of the deductions attributable to the \$5 million increase in the basis of Property X resulting from the transaction described in paragraph (c)(1)(ii) of this section.
- (3) *Example 3: Reporting by a participating partner, participating partnership, and related subsequent transferee in the taxable year of the transaction -*
- (i) *Facts.* The facts are the same as in paragraph (g)(1)(i) of this section (Example 1), except that at the beginning of taxable year 1, ABC Partnership distributes a nondepreciable asset, Land with an adjusted basis of \$1 million, to Partner A in liquidation of Partner A's interest in ABC Partnership. The distribution is a transaction described in paragraph (c)(1)(ii) of this section. As a result of the distribution, the basis of Land is increased to \$6 million. Subsequently in taxable year 1, Partner A contributes Land to another partnership, AX Partnership, in a transfer that is treated as a contribution of property under section 721(a). Partner A and AX Partnership are related within the meaning of paragraph (b)(8) of this section. ABC Partnership, Partner A and AX Partnership have the same taxable year.
 - (ii) *Analysis.* Partner A is a participant during taxable year 1 within the meaning of paragraph (e) of this section because it is a participating partner within the meaning of paragraph (b)(3) of this section since it directly received a distribution of property during taxable year 1 in a transaction described in paragraph (c) of this section. ABC Partnership is a participant during taxable year 1 within the meaning of paragraph (e) of this section because it is a participating partnership within the meaning of paragraph (b)(4) of this section since it made a distribution of property to a participating partner during taxable year 1 in a transaction described in paragraph (c) of this section. AX Partnership is a participant during taxable year 1 within the meaning of paragraph (e) of this section because it is a related subsequent transferee within the meaning of paragraph (b)(10) of this section since it directly received in a nonrecognition transaction, a transfer of property during taxable year 1 that was subject to an increase in basis as a result of a transaction described in paragraph (c) of this section. As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), Partner A must disclose the distribution as a transaction of interest under this section on Form 8886 (or successor form) and file the form with its tax return for taxable year 1. Partner A must include the information described in paragraph (f) of this section. As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), ABC Partnership must disclose the distribution as a transaction of interest under this section on Form 8886 (or successor form) and file the form with its tax return for taxable

year 1, including the information described in paragraph (f) of this section. Further, AX Partnership is subject to the disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e). AX Partnership must disclose that it is a related subsequent transferee within the meaning of paragraph (b)(10) of this section that received, in a nonrecognition transaction, a transfer of property that was distributed in a transaction of interest under this section on Form 8886 (or successor form) and file the form with its tax return for taxable year 1. In addition, Partner A, ABC Partnership and AX Partnership must send a copy of their respective Form 8886 (or successor form) to OTSA.

(4) *Example 4:* Reporting of the Federal income tax consequences (reduced taxable gain) of the transaction in the taxable year of disposition of the property –

(i) *Facts.* Under the same facts as in paragraph (g)(3)(i) of this section (Example 3), in taxable year 2, AX Partnership disposes of Land in a taxable sale for its fair market value of \$6 million and recognizes gain of zero.

(ii) *Analysis.* As part of its disclosure requirements under paragraph (f) of this section and § 1.6011-4(d) and (e), AX Partnership must disclose the taxable gain (zero) on the disposition of Land on Form 8886 (or successor form) for taxable year 2 as the Federal income tax consequences of the transaction described in paragraph (c)(1)(ii) of this section. AX must file the form with its tax return for taxable year 2 and send a copy of the form to OTSA.

(h) *Applicability date.* This section's identification of transactions that are the same as or substantially similar (within the meaning of § 1.6011-4(c)(4)) to the transactions described in paragraph (c) of this section as transactions of interest for purposes of § 1.6011-4(b)(6) and sections 6111 and 6112 of the Code is effective on the date the regulations are published as final regulations in the **Federal Register**.

II.Q.8.a.ii. Caution When Using Master Entity If Liquidity Needed to Pay Estate Tax

Estate tax generated by business interests can be deferred. Obtaining a deferral for a year or two does not require any special structuring.⁵³⁷⁶ Obtaining longer deferrals requires the right structure and involves more uncertainty with partnerships than with corporations.⁵³⁷⁷

If one places assets in a master partnership, consider whether those might affect the owner's estate's ability to make a Code § 6166 to defer estate tax if the owner has insufficient liquidity.⁵³⁷⁸ If the partnership is merely a holding entity and does not itself engage in business activity, it might be considered a nonbusiness asset ineligible for such an election.⁵³⁷⁹

⁵³⁷⁶ See part III.B.5.e.i Overview of Discretionary Extensions Under Section 6161.

⁵³⁷⁷ See part III.B.5.e.ii Code § 6166 Deferral.

⁵³⁷⁸ See part III.B.5.e.ii Code § 6166 Deferral, especially part III.B.5.e.ii.(a) What is a Business?

⁵³⁷⁹ Code § 6166(b)(9). Although Code § 6166(b)(8) provides special rules making corporate holding companies eligible, it does not apply to partnership holding companies. For more details, see fn. 7137.

II.Q.8.a.iii. Examples of Using Partnership to Shift Basis

II.Q.8.a.iii.(a). Applying Outside Basis to Very Low Inside Basis

Each of A, B, and C invests \$500 in a partnership that uses its \$1,500 capital to buy land: Parcel X for \$100 and Parcel Y for \$1,400.

Parcel X grows in value to \$900, and Parcel Y increases in value to \$1,800. Thus, the partnership's assets are worth \$2,700 (\$900 plus \$1,800). Thus, ignoring valuation adjustments, each partner's interest is worth \$900 (\$2,700 divided by 3).

The partnership distributes Parcel X to C in liquidation of C's partnership interest. C's \$500 basis is applied to Parcel X, increasing its basis from \$100 to \$500.

If a Code § 754 election is not in place, then Parcel Y's basis does not change.

Although as a group the partners have managed to increase the real estate's tax basis, C did not get a great deal. If C sells Parcel X, C recognizes a \$400 gain (\$900 value minus its new \$500 basis). If the partnership had sold Parcel X, the \$800 gain (\$900 value minus \$100 basis before the distribution), then each partner (including C) would recognize a \$267 gain (\$800 divided by 3). Thus, C would pay tax on \$133 more gain (\$400 minus \$267) than if the partnership had not distributed Parcel X. On the other hand, C is relieved of responsibility for \$133 gain inherent in Parcel Y (\$1,800 value minus \$1,400 basis equals \$400 gain; \$400 gain divided by 3 partners equals \$133).

II.Q.8.a.iii.(b). Basis Stripped from Distributed Property and Applied to Remaining Property

Each of D, E, and F contributes \$200 to a partnership, which uses its \$600 contributions to buy land: \$200 for Parcel M and \$400 for Parcel N. Parcel M increases in value to \$400, and Parcel N decreases in value to \$200. The partnership distributes Parcel N to F in redemption of F's partnership interest. Parcel N's basis is reduced to F's \$200 basis, which is a \$200 (\$400 basis inside the partnership minus \$200 in F's hands) basis reduction. If the partnership has a Code § 754 election in place, the \$200 basis that is stripped from Parcel N is added to the basis of Parcel M, which is increased from \$200 to \$400.

II.Q.8.a.iii.(c). Basis Stripped from New Property and Applied to Existing Property

Each of G, H, and I contributes \$100 to a partnership, which buys Parcel T (raw land) for \$300. Parcel T's value increases to \$900, and the partners take advantage of this value increase by causing the partnership to borrow \$600 (which is \$200 debt per partner) and distribute that \$600 equally to G, H and I (\$600 divided by 3 equals \$200 distribution each), resulting in each having a capital account of -\$100 (\$100 initial contribution minus \$200 distribution), which also happens to equate to \$100 debt in excess of basis (\$200 share of debt minus \$100 original capital contribution). Note that each partner's share of Parcel T's unrealized appreciation is \$200, which is \$600 (\$900 value minus \$300 basis) divided by 3.

The partnership borrows \$300 to buy Parcel U (raw land) for \$300. Parcel U retains its value. Thus, the partnership's net value continues to be \$300, which is the excess of the \$1,200 values of Parcels T (\$900) and U (\$300) over the partnership's debt of \$900 (\$600 on Parcel T and \$300 on Parcel U).

The partnership distributes Parcel U to G to redeem G's partnership interest. G assumes \$200 of the debt on Parcel U, and the partnership shifts \$100 of the debt on Parcel U to Parcel T. Thus, G receives \$100 net value (\$300 value of Parcel U minus \$200 debt assumed). The basis of G's partnership interest before the distribution was \$200, consisting of \$100 original contribution plus \$300 debt (1/3 of the partnership's \$900 debt before distribution) minus \$200 prior cash distribution. On the distribution, G assumed \$200 of debt and was relieved of \$300 of debt, for a net reduction in debt of \$100. This \$100 net debt reduction is treated as a \$100 cash distribution. Thus, the basis of G's partnership interest after the distribution is \$100 (\$200 basis before distribution minus \$100 deemed distribution), and G recognizes no gain or loss on the redemption on G's partnership interest. After the redemption:

- Parcel U's basis is reduced from its original \$300 to the \$100 basis of G's partnership interest. This \$200 basis strip (\$300 original basis minus \$100 remaining basis) from Parcel U will be applied to increase the partnership's basis in Parcel T from its initial \$300 to a new \$500 if the partnership has a Code § 754 election in effect.
- G winds up with Parcel U with a \$300 value, \$100 basis, and a \$200 debt. Thus, the net value of G's position is \$100 (\$300 value minus \$200 debt). Before the redemption, G had net debt in excess of basis of \$100; after the redemption, G continues to have \$100 debt in excess of basis (\$200 debt minus \$100 basis in Parcel U).
- The partnership has Parcel T with \$900 value, \$500 basis, and \$700 debt (\$600 from the original borrowing and \$100 from Parcel U). Thus, the partnership has property with \$400 value in excess of basis (\$900 value minus \$500 basis), which is \$200 value in excess of basis per partner (\$400 divided by 2 partners), the same as before the redemption. Furthermore, the partnership has \$200 debt in excess of basis (\$700 debt minus \$500 basis), which translates to each partner having \$100 debt in excess of basis (\$200 divided by 2 partners).

Has the partnership made a disguised sale of Parcel U to G? See Reg. § 1.707-6(b)(2).

II.Q.8.a.iii.(d). Basis Shift When Parent Owns Large Majority

Parent owns 98%, Son owns 1%, and Daughter owns 1% of a partnership. The partnership has land that the partnership previously bought that has \$100 value and \$100 debt, so the partnership has net equity of zero and each partner's interest is worthless. Based on prior distributions that zeroed out everyone's basis, Parent is allocated \$98 debt in excess of basis, and each of Son and Daughter is allocated \$1 debt in excess of basis (\$2 total).

Partnership plans to sell the property would result in \$98 gain to Parent, \$1 gain to Son, and \$1 gain to Daughter.

Instead, Parent contributes \$25 to the partnership, which the partnership uses, together with \$100 of additional borrowing to buy Parcel Q (land) for \$125.

The partnership then redeems Parent, distributing Parcel Q and its associated \$100 debt to Parent. Parent's basis in Parent's partnership interest before the redemption was \$123, which comes from \$98 original debt plus \$98 new debt (98% of the \$100 borrowed to buy Parcel Q) plus \$25 contributed toward the purchase of Parcel Q minus \$98 prior distributions. In the redemption, Parent assumed the \$100 debt but was relieved of Parent's \$196 (\$98 original debt

plus \$98 new debt) share of liabilities before the redemption, the basis of Parent's partnership interest decreased by \$96 (\$196 liabilities relieved minus \$100 liabilities assumed) to \$27 (\$123 minus \$96). Thus, Parcel Q's basis decreases from its original \$125 basis to \$27 (the basis of Parent's partnership interest), a \$98 reduction in basis. If the partnership has a Code § 754 election in place, this \$98 basis strip from Parcel Q translates into a \$98 increase in the basis of the original land.

After the redemption, each of Son and Daughter owns one half of the partnership. The partnership has the original land, with a value of \$100, basis of \$98, and liabilities of \$100. When Parent was redeemed, Son and Daughter assumed the partnership's original debt, so their share of liabilities increases by \$98 from \$2 combined to \$100 combined. Their basis increases correspondingly, so that, instead of having \$2 debt in excess of basis, they have \$98 debt in excess of basis (\$100 liabilities allocated minus \$2 prior distributions).

Thus, when the partnership sells the original property for \$100, the partnership recognizes a \$2 gain (\$100 proceeds minus \$98 basis), the same \$2 gain that would have been allocated to Son and Daughter if Parcel Q had never come into the picture.

The difference is in Parent's treatment. Parent would have been allocated \$98 gain before Parcel Q came into the picture. Now, Parent does not pay any tax on the sale of the original land. Instead, the basis of Parcel Q has been reduced by \$98 because of the redemption. If Parent holds Parcel Q until death, Parcel Q's unrealized gain is wiped out by a basis step-up.

II.Q.8.b. Partnership Redemption or Other Distribution

II.Q.8.b.i. Distribution of Property by a Partnership

Distributions to a partner may be taxable under Code §§ 731, 704(c)(1)(B), and 737.⁵³⁸⁰ After the parts describing Code § 731 are the discussions of the other two sections, followed by part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

II.Q.8.b.i.(a). Code § 731: General Rule for Distributions

Partnership distributions of property are usually tax-free to both the partnership and the partner under Code § 731(a) and (b), whether current distributions or liquidating distributions.⁵³⁸¹

⁵³⁸⁰ Partnership distributions might also be subject to the anti-abuse rules (regulations issued under Code § 701), which was asserted in CCA 200650014 when a partnership acquired real estate to be distributed to a partner and that partner was allocated all of the economic risks of that real estate purchase.

⁵³⁸¹ Reg. § 1.731-1(a)(1)(i), which provides:

Where money is distributed by a partnership to a partner, no gain shall be recognized to the partner except to the extent that the amount of money distributed exceeds the adjusted basis of the partner's interest in the partnership immediately before the distribution. This rule is applicable both to current distributions (i. e., distributions other than in liquidation of an entire interest) and to distributions in liquidation of a partner's entire interest in a partnership. Thus, if a partner with a basis for his interest of \$10,000 receives a distribution of cash of \$8,000 and property with a fair market value of \$3,000, no gain is recognized to him. If \$11,000 cash were distributed, gain would be recognized to the extent of \$1,000. No gain shall be recognized to a distributee partner with respect to a distribution of property (other than money) until he sells or otherwise disposes of such property, except to the extent otherwise provided by section 736 (relating to payments to a

A loan from a partnership to a partner who is obligated to repay the amount of the loaned money or property does not constitute a distribution subject to Code § 731 but is a loan governed by Code § 707(a). To the extent that such an obligation is canceled, the obligor partner will be considered to have received a distribution of money or property at the time of cancellation.⁵³⁸² The partnership has taxable income or loss in an amount equal to the difference between its basis in the distributed debt and the debt's fair market value at the time of the distribution, just as if the partnership had sold the debt for this amount and distributed the sale proceeds to the distributee-partner-debtor. The distributee-partner generally does not recognize any gain on the distribution unless the amount of the distribution exceeds the basis of his interest and, unless the special liquidating distribution rule in Code § 731(a)(2) applies, does not recognize a loss; however, the distributee-partner might recognize cancellation-of-indebtedness income on the deemed purchase of the debt.⁵³⁸³

The IRS treats differently partner indebtedness that the partnership bought from a third party. In that case, if the partnership distributes (in a liquidating or nonliquidating distribution) the indebtedness to the partner so that the debt is extinguished, the distribution of property rules will apply to determine the consequences for the partnership. Under Code § 61(a)(12) (and Reg. § 1.61-12(c)(2)), the partner is treated as having repurchased its indebtedness for an amount equal to the fair market value of the indebtedness and therefore will recognize capital gain or loss to the extent the fair market value of the indebtedness differs from the basis of the indebtedness determined under Code § 732.⁵³⁸⁴

CCA 201525010 stated, "The regulations under § 752 do not determine if a debt is recourse or nonrecourse to a partnership for purposes of determining whether, upon foreclosure of the property, the partnership has cancellation of debt income under § 61(a)(12) or gains from dealings in property under § 61(a)(3)." A panel at the May 2016 meeting of the ABA Section on Taxation seemed to disagree with the assumption of the parties in *Great Plains Gasification Associates v. Commissioner*, T.C. Memo. 2006-276, that certain debt was nonrecourse based on Code § 752. The author of CCA 201525010 indicated that the CCA was not just her view but rather was a consensus approach at the IRS.

A deficit capital account is not by itself sufficient to establish the creation of a loan. Similarly, the fact that on a final accounting the partners will take a deficit capital account into consideration is not sufficient to create an obligation to repay a loan. If there is no unconditional and legally enforceable obligation that requires a partner to repay any of the amounts withdrawn to the partnership on or before a determinable date, then withdrawals by that partner that created a deficit in his capital account are not loans governed by Code § 707(a) but are partnership distributions received by him in his capacity as a partner. Rev. Ruls. 73-301, 81-241.

Exceptions to the rule of tax-free distributions include:

- Part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a

retiring partner or a deceased partner's successor in interest) and section 751 (relating to unrealized receivables and inventory items). See section 731(c) and paragraph (c) of this section.

⁵³⁸² Reg. § 1.731-1(c)(2).

⁵³⁸³ McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 19.02[5] Distributions of a Partner's Debt to the Debtor-Partner. Letter Ruling 201314004 confirmed the Code § 731 aspects of such a distribution but did not address any other issues.

⁵³⁸⁴ Rev. Rul. 93-7.

Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

- Part II.Q.8.b.i.(g) Code § 751 – Hot Assets. Even if “hot assets” can be distributed tax-free under Code § 731(a), they may be tainted in terms of generating ordinary income when sold. For the latter, see part II.Q.8.b.i.(h) Characteristics of Distributed Property.
- Part II.M.3.e Exception: Disguised Sale.

Also, Code § 731(a)(1) requires a partner to recognize gain on a monetary distribution when the distribution exceeds the partner’s adjusted basis in the partnership,⁵³⁸⁵ for the taxation of any gain, see part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner. A reduction in a partner’s share of liabilities⁵³⁸⁶ is considered a cash payment in the amount of the liabilities discharged.⁵³⁸⁷ The amount of gain recognized is the excess of the distribution over

⁵³⁸⁵Code § 731(a)(2) explains potential loss recognition consequences of a partnership distribution.

⁵³⁸⁶ See part II.C.3 Allocating Liabilities (Including Debt).

⁵³⁸⁷ Rev. Rul. 74-40, Situations 2 and 3 are most relevant, but let’s look at all three for the sake of completeness. Situation 1 involved the following facts and conclusions:

L is a limited partner in partnership GL to which he contributed \$10,000 in cash on its formation. His distributive share of partnership items of income and loss is 10 percent and he is not entitled to receive any guaranteed payments. The adjusted basis of his partnership interest at the end of the current year is \$20,000. His proportionate share of partnership liabilities, on which neither he, the other partners nor the partnership have assumed any personal liability, is \$15,000. The partnership has no other liabilities. L sells his interest in the partnership to M, an unrelated taxpayer, for \$10,000 in cash. At the time of the transaction the partnership had no unrealized receivables or inventory items described in section 751 of the Internal Revenue Code of 1954 nor any goodwill and L had been paid his distributive share of partnership income.

[Citations to Code §§ 752(c) and 741 and to Reg. §§ 1.752-1(e) and 1.751-1(d) follow.]

Accordingly, in the instant situation, the amount realized by L from the sale of his partnership interest is \$25,000, consisting of cash in the amount of \$10,000 and release from his share of partnership liabilities in the amount of \$15,000. Since the adjusted basis of L’s interest in the partnership is \$20,000, he realized a gain of \$5,000 determined under the provisions of section 741 of the Code.

Situation 2 involved the following facts and conclusions:

The facts are the same as in situation 1, except that L withdraws from the partnership and the partnership distributes \$10,000 to him in cash in complete liquidation of his interest in the partnership.

[Citations to Code §§ 752(b), 731(a), 731(c) and 736 and to Reg. § 1.736-1(b)(1) follow.]

Accordingly, in the instant situation, distributions to L with respect to his partnership interest total \$25,000 and consist of cash in the amount of \$10,000 and a decrease in his share of the partnership liabilities in the amount of \$15,000 that is considered under section 752(b) of the Code as a distribution of money to L by the partnership.

Furthermore, since the money distributed (\$25,000) exceeds the adjusted basis of L’s interest in the partnership immediately before the distribution (\$20,000), he realizes a gain of \$5,000 determined under the provisions of section 731(a) of the Code.

Situation 3 involved the following facts and conclusions:

Instead of selling his interest L withdraws from the partnership at a time when the adjusted basis of his interest in the partnership is zero and his proportionate share of partnership liabilities, all of which consist of liabilities on which neither he, the other partners nor the partnership have assumed any personal liability, is \$15,000.

the partner's adjusted basis;⁵³⁸⁸ basis in a partnership interest includes any partnership debt allocated to it.⁵³⁸⁹ If the partnership distributes cash and property to a partner in the same transaction, the partner applies the cash to basis and then allocates basis to the property distributed.⁵³⁹⁰ However, if a liquidating distribution consists of only cash, unrealized receivables, or inventory with an adjusted basis to the recipient partner that is less than the partner's adjusted basis in the partnership, then the partner would recognize loss.⁵³⁹¹

However, special rules apply to marketable securities, which might be treated as cash for purposes of Code § 731(a)(1) and therefore might trigger gain on distributions.⁵³⁹²

August, "The Debt Cancellation Culture of Section 108: Tax Hurdles for Partnerships Engaged in Debt Workouts," *Corporate Taxation* (WG&L), Sep/Oct 2023, explains "Partnership Transfer or Distribution of Encumbered Property on Disposition of Partnership Interest":

Section 731(a) provides that a partner will realize gain from a distribution of money, including a deemed distribution resulting from a reduction in share of partnership liabilities under Section 752(b), in excess of his aggregate basis in the partnership. Where the partnership distributes property that is subject to an indebtedness, the partner will be taxable only to the extent that the amount of money distributed exceeds the basis of the distributee partner's interest in the partnership immediately before the distribution.

Where the partnership distributes encumbered property proportionately among the partners, then the distributee partners will not receive a deemed distribution of money under Section 752(b) because the amount of liability each partner assumes under Section 752(a) will generally equal the amount of liability that such partner is relieved of as a result of the distribution. It is now clear that increases and decreases in a distributee partner's liabilities occurring by reason of a liquidating or non-liquidating distribution are deemed to occur simultaneously for purposes of determining gain or loss under Section 731.⁸⁰

⁸⁰ See Section 752(c).

If a partnership makes a disproportionate distribution of encumbered property, then any partner who receives less than his proportionate share of the encumbered property may be required to pick up gain under Section 751(b). That's a fairly complex jigsaw puzzle

Accordingly, L is considered to have received a distribution of money from the partnership of \$15,000 and realizes a gain of \$15,000 determined under the provisions of section 731(a) of the Code.

See also Rev. Rul. 77-402 (similar result when grantor trust status terminates with respect to a partnership interest), discussed in fn. 6639, found in part III.B.2.a Tax Basis Issues When Using Irrevocable Grantor Trusts, and Rev. Rul. 75-194 (deemed bargain sale of partnership interest contributed to charity), discussed in part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity.

⁵³⁸⁸ Code § 731(a)(1).

⁵³⁸⁹ See part II.C.3 Allocating Liabilities (Including Debt), especially part II.C.3.a Basic Consequences of Changes in Liability Allocations.

⁵³⁹⁰ Although Code § 731 and the regulations thereunder do not appear to address this issue, Reg. § 1.732-1(a) and (b) implicitly mandate this result when determining the basis of assets distributed to a partner.

⁵³⁹¹ Code § 731(a)(2).

⁵³⁹² See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

that requires a thorough review. The result could also be an inside basis increase to the partnership. Again, “do the math!” As mentioned, a deemed distribution of money for liability reduction previously allocated to a partner may result in taxable gain under Section 731(a). Such gain is not eligible for exclusion under Section 108.

See parts II.C.3.c Allocations of Recourse and Nonrecourse Liabilities, II.G.31.b Debt Forgiveness (which includes more from August’s article), and II.Q.8.b.i.(g) Code § 751 – Hot Assets.

II.Q.8.b.i.(b). Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them)

Although marketable securities are not normally considered cash for income tax purposes, they are treated as “money” for purposes of Code § 731(a)(1) gain calculation.⁵³⁹³ Thus, distributions of marketable securities can result in gain under Code § 731(a)(1), if the total amount of money and securities distributed is higher than the adjusted basis of the partner’s partnership interest. Beware that “marketable securities” means not only financial instruments⁵³⁹⁴ and foreign currencies which are, as of the date of the distribution, actively traded,⁵³⁹⁵ but also:⁵³⁹⁶

- any interest in a common trust fund or a regulated investment company, the latter which is offering for sale or has outstanding any redeemable security⁵³⁹⁷ of which it is the issuer,
- any financial instrument which, pursuant to its terms or any other arrangement, is readily convertible into, or exchangeable for, money or marketable securities,⁵³⁹⁸
- any financial instrument the value of which is determined substantially by reference to marketable securities,
- except to the extent provided in regulations, any interest in a precious metal which, as of the date of the distribution, is actively traded⁵³⁹⁹ unless such metal was produced, used, or held in the active conduct of a trade or business by the partnership,

⁵³⁹³ Code § 731(c)(1). Marketable securities are defined in Code § 731(c)(2)(A) as financial instruments and foreign currencies which are, as of the date of distribution, actively traded. Code § 731(c)(2)(B) includes mutual funds, derivatives and various other financial instruments. Code § 731(c)(2)(C) defines financial instruments to include stocks and other equity interests, evidences of indebtedness, options, forwards, futures, notional principal contracts and derivatives.

⁵³⁹⁴ Financial instrument includes stocks and other equity interests, evidences of indebtedness, options, forward or futures contracts, notional principal contracts, and derivatives. Code § 731(c)(2)(C). Letter Ruling 200651023 held that Code § 731(c)(2)(C) does not apply to life insurance policies, which are “neither money nor marketable securities.”

⁵³⁹⁵ Code § 731(c)(2)(A).

⁵³⁹⁶ Code § 731(c)(2)(B).

⁵³⁹⁷ As defined in section 2(a)(32) of the Investment Company Act of 1940. Code § 731(c)(2)(B)(i)(II).

⁵³⁹⁸ FSA 200219008 asserted that short-term (nine-month) debt instruments issued by a bank should be treated as financial instruments that were readily convertible into money. The IRS probably viewed them as the equivalent of certificates of deposit.

⁵³⁹⁹ Within the meaning of Code § 1092(d)(1). Code § 731(c)(2)(B)(iv).

- except as otherwise provided in regulations, interests in any entity⁵⁴⁰⁰ if substantially all of the assets⁵⁴⁰¹ of such entity consist (directly or indirectly) of marketable securities, money, or both, and
- to the extent provided in regulations,⁵⁴⁰² any interest in an entity⁵⁴⁰³ not described in the preceding bullet point to the extent of the value of such interest which is attributable to marketable securities, money, or both.

However, two exceptions to the “marketable securities are money” rule of Code § 731(c) often apply. First, a marketable security is not treated as money if the security was contributed to the partnership by the partner receiving the distribution, except to the extent the security’s value is attributable to other marketable securities or money contributed to the entity to which the distributed security relates.⁵⁴⁰⁴ Second, Code § 731(c) does not apply to distributions of marketable securities by investment partnerships to eligible partners.⁵⁴⁰⁵ An investment partnership is defined in Code § 731(c)(3)(C)(i) as a partnership that never has been engaged in

⁵⁴⁰⁰ According to Letter Ruling 200223036, this includes a partnership division under part II.Q.8.d Partnership Division. More details on the Letter Ruling are at fn. 5630.

⁵⁴⁰¹ Reg. § 1.731-2(c)(3)(i) provides:

Substantially all. For purposes of section 731(c)(2)(B)(v) and this section, substantially all of the assets of an entity consist (directly or indirectly) of marketable securities, money, or both only if 90 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk.

⁵⁴⁰² Reg. § 1.731-2(c)(3)(ii) provides:

Less than substantially all. For purposes of section 731(c)(2)(B)(vi) and this section, an interest in an entity is a marketable security to the extent that the value of the interest is attributable (directly or indirectly) to marketable securities, money, or both, if less than 90 percent but 20 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk.

⁵⁴⁰³ Letter Ruling 200223036 provides helpful analysis of the consequences of a situation similar to this arising from a partnership division. See fn. 5630.

⁵⁴⁰⁴ Code § 731(c)(3)(A)(i); Reg. § 1.731-2(d)(1)(i). Letter Rulings 201537002 and 201537003 applied that rule to replacement stock certificates (referring to Reg. § 1.1012-1(c)(2)) for purposes of this rule and Code §§ 704(c)(1)(B) and 737; the rulings appear to be merely comfort rulings, because nothing jumped out at me as in doubt.

⁵⁴⁰⁵ Reg. § 1.731-2(e)(1). An eligible partner includes a remainderman of a trust that was an eligible partner. Letter Rulings 200824005 and 200824009. This includes the remaindermen when the LLC starts as a disregarded entity and becomes a partnership when distributed to the remaindermen. Letter Ruling 201421001 (described more fully in fn. 374). However, it does not include the transferor or transferee in a nonrecognition transaction involving a transfer of any portion of an interest in a partnership with respect to which the transferor was not an eligible partner. Code § 731(c)(3)(C)(iii)(II). The committee reports to P.L. 103-465 (12/8/94) explained:

A partner who is not an eligible partner may not remove the taint from his partnership interest by transferring any portion of his interest to another person in a transaction in which gain or loss is not recognized in whole or in part.

This may suggest a more limited scope to Code § 731(c)(3)(C)(iii)(II), but the regulations did not adopt any such limitation, so I would not rely on this suggestion of limited scope for planning purposes. The implicit corollary to the above is that, if the transferor is an eligible partner with respect to the transferor’s entire partnership interest, a transferee partner in a nonrecognition transaction is also an eligible partner.

any trade or business⁵⁴⁰⁶ and whose assets have always substantially consisted of money, stock, notes and bonds, interest rate or currency contracts, foreign currencies, interests in or derivate financial instruments, and other specifically prescribed assets; and an eligible partner is a partner who has contributed only the aforementioned types of assets to the partnership.⁵⁴⁰⁷ With regard to investment partnership status, remember that, if the partnership owns an interest in an entity that is a disregarded entity or partnership for federal income tax purposes, that entity's activity will be treated as a trade or business activity of the holding partnership. Thus, it could be beneficial to set up two partnerships and have one hold the assets that will prevent investment partnership status and another that would be an investment partnership. Furthermore, certain investment partnerships formed with almost all contributions being in the form of cash might be eligible for avoiding the mandatory inside basis step-down that applies when certain transfers of partnership interests or assets occur when a partnership has significant loss assets.⁵⁴⁰⁸

Two more exceptions might not apply frequently but are still important to note. First, if the security was acquired in a nonrecognition transaction and the value of the securities and money exchanged in that nonrecognition transaction is less than 20% of the value of all the assets exchanged in the nonrecognition transaction, the securities will not be considered money.⁵⁴⁰⁹ Additionally, the security is not treated as money if it was not a marketable security on the date the partnership acquired it and the issuing entity did not have any outstanding marketable securities at that time, the partnership held the security for at least six months before it became marketable, and the partnership distributed the security within five years of when it became marketable.⁵⁴¹⁰

In addition to these four general exceptions to Code § 731(c), Code § 731(c)(3)(B) limits the amount of marketable securities treated as money, thereby limiting the amount of gain a recipient partner has to recognize. The limitation is calculated by first determining the partner's share of the partnership's built-in gain in all of its marketable securities, before the distribution is made.⁵⁴¹¹ From this amount you subtract the partner's distributive share of the built-in gain that is attributable to marketable securities held by the partnership immediately after the transaction.⁵⁴¹² The end result is the amount of marketable securities that are treated as "property other than money." Thus, to the extent a distribution of marketable securities does not

⁵⁴⁰⁶ Reg. § 1.731-2(e)(4) provides:

Partnership tiers. For purposes of section 731(c)(3)(C)(iv) and this section, a partnership (upper-tier partnership) is not treated as engaged in a trade or business engaged in by, or as holding (instead of a partnership interest) a proportionate share of the assets of, a partnership (lower-tier partnership) in which the partnership holds a partnership interest if—

- (i) The upper-tier partnership does not actively and substantially participate in the management of the lower-tier partnership; and
- (ii) The interest held by the upper-tier partnership is less than 20 percent of the total profits and capital interests in the lower-tier partnership.

⁵⁴⁰⁷ Code § 731(c)(3)(C)(iii). Investment partnerships, as defined in 86 Ill. Admin. Code § 100.9730, are also exempted from the Illinois replacement tax that generally would otherwise apply to an Illinois partnership. 35 ILCS 5/205(b).

⁵⁴⁰⁸ See text accompanying footnote 5734.

⁵⁴⁰⁹ Reg. § 1.731-2(d)(1)(ii).

⁵⁴¹⁰ Reg. § 1.731-2(d)(1)(iii).

⁵⁴¹¹ Code § 731(c)(3)(B); Reg. § 1.731-2(b)(2).

⁵⁴¹² *Id.*

decrease the recipient's share of built-in gain, the recipient will not be taxed under Code § 731(c). In other words:

- Try to make sure that each person retains a proportionate amount of unrealized appreciation.
- If the parties miss the mark a little, then they are taxed on shifted unrealized appreciation only to the extent that they missed the mark.
- Consider that any tax imposed will increase basis. Given that marketable securities tend to turn over anyway, part or all of the tax due to missing the mark a little might very well be saved when the marketable securities are later sold.

II.Q.8.b.i.(c). Disguised Sale from Partnership to Partner

A distribution of property from a partnership to a partner may be recharacterized as sale of that property in exchange for the partner's contribution of cash or property.⁵⁴¹³ Generally, one would apply rules similar to those described in part II.M.3.e Exception: Disguised Sale.⁵⁴¹⁴

Thus, when a partnership distributes property and within two years after the distribution the recipient contributes cash, the partnership is deemed to have sold the property if the rules described in part II.M.3.e Exception: Disguised Sale would have recharacterized the opposite transaction.⁵⁴¹⁵

Disclosure rules similar to those described in part II.M.3.e Exception: Disguised Sale would apply.⁵⁴¹⁶

⁵⁴¹³ Reg. § 1.707-6(a) provides:

Rules similar to those provided in § 1.707-3 apply in determining whether a transfer of property by a partnership to a partner and one or more transfers of money or other consideration by that partner to the partnership are treated as a sale of property, in whole or in part, to the partner.

⁵⁴¹⁴ See fn. 5413, in which Reg. § 1.707-6(a) refers to Reg. § 1.707-3.

⁵⁴¹⁵ Reg. § 1.707-6(d), Example (1), "Sale of property by partnership to partner," provides:

- (i) A is a member of a partnership. The partnership transfers property X to A. At the time of the transfer, property X has a fair market value of \$1,000,000. One year after the transfer, A transfers \$1,100,000 to the partnership. Assume that under the rules of section 1274 the imputed principal amount of an obligation to transfer \$1,100,000 one year after the transfer of property X is \$1,000,000 on the date of the transfer.
- (ii) Since the transfer of \$1,100,000 to the partnership by A is made within two years of the transfer of property X to A, under rules similar to those provided in § 1.707-3(c), the transfers are presumed to be a sale unless the facts and circumstances clearly establish otherwise. If no facts exist that would rebut this presumption, on the date that the partnership transfers property X to A, the partnership is treated as having sold property X to A in exchange for A's obligation to transfer \$1,100,000 to the partnership one year later.

⁵⁴¹⁶ Reg. § 1.707-6(c) provides:

Disclosure rules. Similar to the rules provided in §§ 1.707-3(c)(2) and 1.707-5(a)(7)(ii), a partnership is to disclose to the Internal Revenue Service, in accordance with § 1.707-8, the facts in the following circumstances:

- (1) When a partnership transfers property to a partner and the partner transfers money or other consideration to the partnership within a two-year period (without regard to the order of the transfers) and the partnership treats the transfers as other than a sale for tax purposes; and

II.Q.8.b.i.(d). Capital Accounting May Trigger Ordinary Income

If a distribution (including client-based intangibles – taking clients with you) has a fair market value that exceeds the distributee’s capital account, then the usual “qualified income offset” provision may trigger ordinary income to the distributee if the partnership agreement does not have “substantial economic effect” and values the distribution in a manner that drives the distributee’s capital account negative.⁵⁴¹⁷ When the client-based intangibles, which had a book value of zero, were distributed with a significant book value, the increase in book value was allocated to the remaining partners rather than to the distributees. If enough of the increase in book value had been allocated to the distributees, the distributees’ capital account could have been zero rather than negative as a result of the distribution. Using target allocations and adjusting book values to match the distributions may have prevented that result.

Therefore, when a partner receives a distribution, consider analyzing the effect and including in the withdrawal agreement provisions to address that possible result. Possible approaches include:

- No gain or loss on distribution.
- The partnership recognizes capital gain on the sale of the asset and allocates it to the distributee.⁵⁴¹⁸
- The allocation of ordinary income described above. However, further analysis would be required to determine how confident one can be in advising clients that they can attain this ordinary income result.

II.Q.8.b.i.(e). Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property

When the distribution is a liquidating distribution, the partner’s adjusted basis in the distributed property is equal to the adjusted basis of the partner’s interest in the partnership, less any money distributed.⁵⁴¹⁹ Therefore, if a high basis partnership interest is redeemed in exchange for low basis property, the property receives a new basis equal to the basis of the redeemed partnership interest;⁵⁴²⁰ this basis increase has no consequences to the partnership if a Code § 754 election is not in place (and certain mandatory basis adjustments are not in effect)⁵⁴²¹ and no consequences to the redeemed partner or other partners so long as none of

-
- (2) When a partner assumes or takes subject to a liability of a partnership in connection with a transfer of property by the partnership to the partner, and the partnership incurred the liability within the two-year period prior to the earlier of the date the partnership agrees in writing to the transfer of property or the date the partnership transfers the property, and the partnership treats the liability as a qualified liability under rules similar to § 1.707-5(a)(6)(i)(B).

⁵⁴¹⁷ For more details, see the text accompanying and preceding fn 510 in part II.C.7 Maintaining Capital Accounts.

⁵⁴¹⁸ See part II.Q.1.c Personal Goodwill and Covenants Not to Compete, especially subpart II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

⁵⁴¹⁹ Code § 732(b).

⁵⁴²⁰ Code § 732(b).

⁵⁴²¹ Part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000, fn. 3199 briefly describes the

the exceptions to the nonrecognition apply.⁵⁴²² The consequence would be a basis reduction.⁵⁴²³ However, this basis reduction would apply only to the extent of any unrealized losses in the partnership's assets; it would not reduce the basis of any assets with unrealized gains.⁵⁴²⁴

In non-liquidating distributions, the partner's adjusted basis in the property distributed is simply the partnership's adjusted basis in the property before the distribution.⁵⁴²⁵ However, the partner's adjusted basis in the distributed property cannot exceed his adjusted basis in his partnership interest less any money distributed at the same time.⁵⁴²⁶

The substituted basis portion continues the contributing partner's depreciation schedule.⁵⁴²⁷

If a transferee partner receives a distribution of property from the partnership within two years after acquiring an interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have as if a Code § 754 election were in effect; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. This applies whether or not the distribution liquidates the partnership interest.

However, when a partnership distributes unrealized receivables (Code § 751(c)) or substantially appreciated inventory items (Code § 751(d)) in exchange for any part of a partner's interest in other partnership property (including money), or, conversely, partnership property (including money) other than unrealized receivables or substantially appreciated inventory items in exchange for any part of a partner's interest in the partnership's unrealized receivables or substantially appreciated inventory items, the distribution will be treated as a sale or exchange of property under the provisions of Code § 751(b).⁵⁴²⁸ In such case, Code § 732 determines the partner's basis of the property which the partner is treated as having sold to or exchanged with the partnership (as constituted after the distribution); the partner is considered as having received such property in a current distribution and, immediately thereafter, as having sold or exchanged it.⁵⁴²⁹ However, Code § 732 does not apply in determining the basis of that part of

effect on basis when a Code § 754 election is in place or in connection with certain substantial built-in loss transactions.

⁵⁴²² For possible exceptions to nonrecognition, see parts II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them), II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, and II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

⁵⁴²³ See part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

⁵⁴²⁴ See fn. 4262, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

⁵⁴²⁵ Code § 732(a)(1).

⁵⁴²⁶ Code § 732(a)(2).

⁵⁴²⁷ Code § 168(i)(7).

⁵⁴²⁸ Reg. § 1.732-1(e).

⁵⁴²⁹ Reg. § 1.732-1(e), referring to Code § 751(b) and Reg. § 1.751-1(b).

property actually distributed to a partner which is treated as received by the partner in a sale or exchange under Code § 751(b), so the basis of such property shall be its cost to the partner.⁵⁴³⁰

The rule that assets received in a liquidating distribution get a basis equal to the liquidated partnership interest's basis can result in the liquidated asset receiving a basis step-up:⁵⁴³¹

Partner B, with a partnership interest having an adjusted basis to him of \$12,000, retires from the partnership and receives cash of \$2,000, and real property with an adjusted basis to the partnership of \$6,000 and a fair market value of \$14,000. The basis of the real property to B is \$10,000 (B's basis for his partnership interest, \$12,000, reduced by \$2,000, the cash distributed).

However, this can turn around to bite the taxpayer, when the basis of the distributed assets exceeds the basis of the recipient's partnership interest (even if not in liquidation):⁵⁴³²

Partner R has an adjusted basis of \$10,000 for his partnership interest. He receives a current distribution of \$4,000 cash and property with an adjusted basis to the partnership of \$8,000. The basis of the distributed property to partner R is limited to \$6,000 (\$10,000, the adjusted basis of his interest, reduced by \$4,000, the cash distributed).

Thus, the distributed property's basis decreased by \$2,000, the excess of the \$8,000 basis before the distribution over the \$6,000 basis after the distribution.

However, Code § 734(b)(1), which applies if a Code § 754 election is in effect,⁵⁴³³ causes the partnership to allocate this basis to other assets.

Special opportunities are available if the partnership has low basis property and a partner has a low basis partnership interest. (The partner might need to receive a large cash distribution to turn a high basis partnership interest into a low basis partnership interest.)⁵⁴³⁴ The partnership borrows to buy property. The partnership then distributes the new property to the partner with the low basis. If a Code § 754 election is in place or if the distribution falls within the special rules of Code § 732(d), the distribution strips basis from the new property and results in the partnership allocating that stripped basis to the old, low basis property.

This basis stripping technique requires more work than is described above. The debt the partnership incurred generally would give everyone's partnership interest a higher basis.⁵⁴³⁵ Increasing the basis of the distributee partner's partnership interest would reduce the basis

⁵⁴³⁰ Reg. § 1.732-1(e).

⁵⁴³¹ Reg. § 1.732-1(b).

⁵⁴³² Reg. § 1.732-1(a), Example (2).

⁵⁴³³ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

⁵⁴³⁴ If the partnership borrows to finance this distribution, consider the interest tracing rules to make sure that the partnership can deduct the interest. Because the debt the partnership incurred generally would give everyone's partnership interest a higher basis, note the suggestions further below in this part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property for keeping the basis of the distributee partner's partnership interest low.

⁵⁴³⁵ Code §§ 752(a) (a partnership's incurring debt is treated as a cash contribution to the partnership), 722 (contribution of cash increases the basis of the contributor's partnership interest).

stripping. Keeping the basis of the distributee partner's partnership interest low requires one of the following to occur:

- Make the distribution terminate the partner's interest in the partnership. Because the distributee will no longer be a partner, he will no longer be allocated any liabilities in the partnership. This reallocation of liabilities will be treated as a cash distribution,⁵⁴³⁶ reducing the basis of his partnership interest available to allocate to the distributed property.⁵⁴³⁷
 - If the partner whose interest is being redeemed contributed to the partnership within seven years assets that the partnership retains or was allocated some built-in gain in the property when other partners were later admitted to the partnership, the partner would recognize gain when leaving the partnership,⁵⁴³⁸ undercutting part or all of the short-term tax saving from the basis stripping transaction. To plan in advance for the possibility of using this strategy, one might consider forming a partnership many years before the opportunity arises.⁵⁴³⁹
 - If the partner wishes to stay in the partnership, consider dividing the partnership before this series of transactions,⁵⁴⁴⁰ so that only the low basis asset remains in the partnership that eventually would buy this new property. Note, however, that a partnership division that distributes a partnership holding marketable securities might trigger Code § 731(c) gain.⁵⁴⁴¹
- Take some special action to make sure that the partners other than the distributee partner are allocated the debt used to buy the new property. These actions relate to the nature of the debt, loan guarantees, and other documentation shifting risk of loss regarding the debt.⁵⁴⁴²
- If the distributed property is encumbered by debt to reduce the equity distributed to the redeemed partner, make sure that the debt is old and cold.⁵⁴⁴³

⁵⁴³⁶ Code § 752(b).

⁵⁴³⁷ Reg. § 1.732-1(b).

⁵⁴³⁸ See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

⁵⁴³⁹ See part II.Q.8.a Partnership as a Master Entity.

⁵⁴⁴⁰ See part II.Q.8.d Partnership Division. The division should keep the partners' percentage ownership the same in each partnership before and after the division to prevent the 7-year anti-mixing bowl rules (see fn. 5438) from applying to either partnership; see fn. 5600.

⁵⁴⁴¹ See fns. 5400 and 5630.

⁵⁴⁴² See part II.C.3 Allocating Liabilities (Including Debt). Code § 752 analysis can interact with the Code § 465 at-risk rules; see part II.G.4.j At Risk Rules, especially CCA 201606027, including key excerpts in fns. 1284-1287.

⁵⁴⁴³ See Reg. § 1.707-6(b)(2) (dealing with liabilities incurred in connected with disguised sales).

Reg § 1.707-6(d) includes the following example:

Example (2). *Assumption of liability by partner.*

- (i) B is a member of an existing partnership. The partnership transfers property Y to B. On the date of the transfer, property Y has a fair market value of \$1,000,000 and is encumbered by a nonrecourse liability of \$600,000. B takes the property subject to the liability. The partnership incurred the nonrecourse liability six months prior to the transfer of property Y to B and used the proceeds to purchase an unrelated asset. Assume that,

Also, be careful not to trip the anti-abuse regulations, which set forth basic ideas generally respecting⁵⁴⁴⁴ or criticizing⁵⁴⁴⁵ partnership transactions, including a facts and circumstances

under the rule of § 1.707-5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability), B's share of the nonrecourse liability immediately before the transfer of property Y was \$100,000.

- (ii) The liability is not allocable under the rules of § 1.163-8T to capital expenditures with respect to the property transferred to B and was not incurred in the ordinary course of the trade or business in which the property transferred to the partner was used or held. Since the partnership incurred the nonrecourse liability within two years of the transfer to B, under rules similar to those provided in § 1.707-5(a)(5), the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish the contrary. Assuming no facts exist to rebut this presumption, the liability taken subject to by B is not a qualified liability. The partnership is treated as having received, on the date of the transfer of property Y to B, \$500,000 (\$600,000 liability assumed by B less B's share of the \$100,000 liability immediately prior to the transfer) as consideration for the sale of one-half (\$500,000/\$1,000,000) of property Y to B. The partnership is also treated as having distributed to B, in B's capacity as a partner, the other one-half of property Y.

⁵⁴⁴⁴ Reg. § 1.701-2(a) provides:

Intent of subchapter K. Subchapter K is intended to permit taxpayers to conduct joint business (including investment) activities through a flexible economic arrangement without incurring an entity-level tax. Implicit in the intent of subchapter K are the following requirements—

- (1) The partnership must be bona fide and each partnership transaction or series of related transactions (individually or collectively, the transaction) must be entered into for a substantial business purpose.
- (2) The form of each partnership transaction must be respected under substance over form principles.
- (3) Except as otherwise provided in this paragraph (a)(3), the tax consequences under subchapter K to each partner of partnership operations and of transactions between the partner and the partnership must accurately reflect the partners' economic agreement and clearly reflect the partner's income (collectively, proper reflection of income). However, certain provisions of subchapter K and the regulations thereunder were adopted to promote administrative convenience and other policy objectives, with the recognition that the application of those provisions to a transaction could, in some circumstances, produce tax results that do not properly reflect income. Thus, the proper reflection of income requirement of this paragraph (a)(3) is treated as satisfied with respect to a transaction that satisfies paragraphs (a)(1) and (2) of this section to the extent that the application of such a provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision. See, for example, paragraph (d) Example 6 of this section (relating to the value-equals-basis rule in § 1.704-1(b)(2)(iii)(c)), paragraph (d) Example 9 of this section (relating to the election under section 754 to adjust basis in partnership property), and paragraph (d) Examples 10 and 11 of this section (relating to the basis in property distributed by a partnership under section 732). See also, for example, §§ 1.704-3(e)(1) and 1.752-2(e)(4) (providing certain de minimis exceptions).

For regulations under Code § 752 that were changed in October 2016, see part II.C.3 Allocating Liabilities (Including Debt).

⁵⁴⁴⁵ Reg. § 1.701-2(b) provides:

Application of subchapter K rules. The provisions of subchapter K and the regulations thereunder must be applied in a manner that is consistent with the intent of subchapter K as set forth in paragraph (a) of this section (intent of subchapter K). Accordingly, if a partnership is formed or availed of in connection with a transaction a principal purpose of which is to reduce substantially the present value of the partners' aggregate federal tax liability in a manner that is inconsistent

with the intent of subchapter K, the Commissioner can recast the transaction for federal tax purposes, as appropriate to achieve tax results that are consistent with the intent of subchapter K, in light of the applicable statutory and regulatory provisions and the pertinent facts and circumstances. Thus, even though the transaction may fall within the literal words of a particular statutory or regulatory provision, the Commissioner can determine, based on the particular facts and circumstances, that to achieve tax results that are consistent with the intent of subchapter K—

- (1) The purported partnership should be disregarded in whole or in part, and the partnership's assets and activities should be considered, in whole or in part, to be owned and conducted, respectively, by one or more of its purported partners;
- (2) One or more of the purported partners of the partnership should not be treated as a partner;
- (3) The methods of accounting used by the partnership or a partner should be adjusted to reflect clearly the partnership's or the partner's income;
- (4) The partnership's items of income, gain, loss, deduction, or credit should be reallocated;
- or
- (5) The claimed tax treatment should otherwise be adjusted or modified.

test.⁵⁴⁴⁶ These regulations accept some basis shifting, which is inherent in Code § 732 itself, such as apportioning among tangible assets with equal value⁵⁴⁴⁷ or among a group of

⁵⁴⁴⁶ Reg. § 1.701-2(c) provides:

Facts and circumstances analysis; factors. Whether a partnership was formed or availed of with a principal purpose to reduce substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K is determined based on all of the facts and circumstances, including a comparison of the purported business purpose for a transaction and the claimed tax benefits resulting from the transaction. The factors set forth below may be indicative, but do not necessarily establish, that a partnership was used in such a manner. These factors are illustrative only, and therefore may not be the only factors taken into account in making the determination under this section. Moreover, the weight given to any factor (whether specified in this paragraph or otherwise) depends on all the facts and circumstances. The presence or absence of any factor described in this paragraph does not create a presumption that a partnership was (or was not) used in such a manner. Factors include:

- (1) The present value of the partners' aggregate federal tax liability is substantially less than had the partners owned the partnership's assets and conducted the partnership's activities directly;
- (2) The present value of the partners' aggregate federal tax liability is substantially less than would be the case if purportedly separate transactions that are designed to achieve a particular end result are integrated and treated as steps in a single transaction. For example, this analysis may indicate that it was contemplated that a partner who was necessary to achieve the intended tax results and whose interest in the partnership was liquidated or disposed of (in whole or in part) would be a partner only temporarily in order to provide the claimed tax benefits to the remaining partners;
- (3) One or more partners who are necessary to achieve the claimed tax results either have a nominal interest in the partnership, are substantially protected from any risk of loss from the partnership's activities (through distribution preferences, indemnity or loss guaranty agreements, or other arrangements), or have little or no participation in the profits from the partnership's activities other than a preferred return that is in the nature of a payment for the use of capital;
- (4) Substantially all of the partners (measured by number or interests in the partnership) are related (directly or indirectly) to one another;
- (5) Partnership items are allocated in compliance with the literal language of §§ 1.704-1 and 1.704-2 but with results that are inconsistent with the purpose of section 704(b) and those regulations. In this regard, particular scrutiny will be paid to partnerships in which income or gain is specially allocated to one or more partners that may be legally or effectively exempt from federal taxation (for example, a foreign person, an exempt organization, an insolvent taxpayer, or a taxpayer with unused federal tax attributes such as net operating losses, capital losses, or foreign tax credits);
- (6) The benefits and burdens of ownership of property nominally contributed to the partnership are in substantial part retained (directly or indirectly) by the contributing partner (or a related party); or
- (7) The benefits and burdens of ownership of partnership property are in substantial part shifted (directly or indirectly) to the distributee partner before or after the property is actually distributed to the distributee partner (or a related party).

⁵⁴⁴⁷ Reg. § 1.701-2(d) provides:

Example (10). Basis adjustments under section 732; use of partnership consistent with the intent of subchapter K.

- (i) A, B, and C are partners in partnership PRS, which has for several years been engaged in substantial bona fide business activities. For valid business reasons, the partners agree that A's interest in PRS, which has a value and basis of \$100x, will be liquidated with the following assets of PRS: a nondepreciable asset with a value of \$60x and a basis to PRS of \$40x, and related equipment with two years of cost recovery remaining

nonmarketable securities⁵⁴⁴⁸ the basis of a partnership interest that is being liquidated. On the other hand, the regulations view as abusive duplication of losses a partner contributing property

and a value and basis to PRS of \$40x. Neither asset is described in section 751 and the transaction is not described in section 732(d). Under section 732(b) and (c), A's \$100x basis in A's partnership interest will be allocated between the nondepreciable asset and the equipment received in the liquidating distribution in proportion to PRS's bases in those assets, or \$50x to the nondepreciable asset and \$50x to the equipment. Thus, A will have a \$10x built-in gain in the nondepreciable asset (\$60x value less \$50x basis) and a \$10x built-in loss in the equipment (\$50x basis less \$40x value), which it expects to recover rapidly through cost recovery deductions. In selecting the assets to be distributed to A, the partners had a principal purpose to take advantage of the fact that A's basis in the assets will be determined by reference to A's basis in A's partnership interest, thus, in effect, shifting a portion of A's basis from the nondepreciable asset to the equipment, which in turn would allow A to recover that portion of its basis more rapidly. This shift provides a federal tax timing advantage to A, with no offsetting detriment to B or C.

- (ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but the application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.
- (iii) A's basis in the assets distributed to it was determined under section 732(b) and (c). The transaction does not properly reflect A's income due to the basis distortions caused by the distribution and the shifting of basis from a nondepreciable to a depreciable asset. However, the basis rules under section 732, which in some situations can produce tax results that are inconsistent with the proper reflection of income standard (see paragraph (a)(3) of this section), are intended to provide simplifying administrative rules for bona fide partnerships that are engaged in transactions with a substantial business purpose. Taking into account all the facts and circumstances of the transaction, the application of the basis rules under section 732 to the distribution from PRS to A, and the ultimate tax consequences of the application of that provision of subchapter K, are clearly contemplated. Thus, the application of section 732 to this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

⁵⁴⁴⁸ Reg. § 1.701-2(d) provides:

Example (9). Absence of section 754 election; use of partnership consistent with the intent of subchapter K.

- (i) PRS is a bona fide partnership formed to engage in investment activities with contributions of cash from each partner. Several years after joining PRS, A, a partner with a capital account balance and basis in its partnership interest of \$100x, wishes to withdraw from PRS. The partnership agreement entitles A to receive the balance of A's capital account in cash or securities owned by PRS at the time of withdrawal, as mutually

with a built-in loss and later receiving other assets with low value in liquidation of his partnership interest (to get a high basis allocated to the distributed assets), then selling the distributed

-
- agreed to by A and the managing general partner, P. P and A agree to distribute to A \$100x worth of non-marketable securities (see section 731(c)) in which PRS has an aggregate basis of \$20x. Upon distribution, A's aggregate basis in the securities is \$100x under section 732(b). PRS does not make an election to adjust the basis in its remaining assets under section 754. Thus, PRS's basis in its remaining assets is unaffected by the distribution. In contrast, if a section 754 election had been in effect for the year of the distribution, under these facts section 734(b) would have required PRS to adjust the basis in its remaining assets downward by the amount of the untaxed appreciation in the distributed property, thus reflecting that gain in PRS's retained assets. In selecting the assets to be distributed, A and P had a principal purpose to take advantage of the facts that A's basis in the securities will be determined by reference to A's basis in its partnership interest under section 732(b), and because PRS will not make an election under section 754, the remaining partners of PRS will likely enjoy a federal tax timing advantage (i.e., from the \$80x of additional basis in its assets that would have been eliminated if the section 754 election had been made) that is inconsistent with proper reflection of income under paragraph (a)(3) of this section.
- (ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. A's basis in the distributed securities is properly determined under section 732(b). The benefit to the remaining partners is a result of PRS not having made an election under section 754. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.
- (iii) In general, the adjustments that would be made if an election under section 754 were in effect are necessary to minimize distortions between the partners' bases in their partnership interests and the partnership's basis in its assets following, for example, a distribution to a partner. The electivity of section 754 is intended to provide administrative convenience for bona fide partnerships that are engaged in transactions for a substantial business purpose, by providing those partnerships the option of not adjusting their bases in their remaining assets following a distribution to a partner. Congress clearly recognized that if the section 754 elections were not made, basis distortions may result. Taking into account all the facts and circumstances of the transaction, the electivity of section 754 in the context of the distribution from PRS to A, and the ultimate tax consequences that follow from the failure to make the election with respect to the transaction, are clearly contemplated by section 754. Thus, the tax consequences of this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

assets at a loss,⁵⁴⁴⁹ a result largely deterred by changes in the law since then.⁵⁴⁵⁰ They also view as abusive distributing an insubstantial asset, allocating substantial basis to it, and then

⁵⁴⁴⁹ Reg. § 1.701-2(d) provides the following example in which the lack of a Code § 754 election was viewed as abusive:

Example (8). Plan to duplicate losses through absence of section 754 election; use of partnership not consistent with the intent of subchapter K.

- (i) A owns land with a basis of \$100x and a fair market value of \$60x. A would like to sell the land to B. A and B devise a plan a principal purpose of which is to permit the duplication, for a substantial period of time, of the tax benefit of A's built-in loss in the land. To effect this plan, A, C (A's brother), and W (C's wife) form partnership PRS, to which A contributes the land, and C and W each contribute \$30x. All partnership items are shared in proportion to the partners' respective contributions to PRS. PRS invests the cash in an investment asset (that is not a marketable security within the meaning of section 731(c)). PRS also leases the land to B under a three-year lease pursuant to which B has the option to purchase the land from PRS upon the expiration of the lease for an amount equal to its fair market value at that time. All lease proceeds received are immediately distributed to the partners. In year 3, at a time when the values of the partnership's assets have not materially changed, PRS agrees with A to liquidate A's interest in exchange for the investment asset held by PRS. Under section 732(b), A's basis in the asset distributed equals \$100x, A's basis in A's partnership interest immediately before the distribution. Shortly thereafter, A sells the investment asset to X, an unrelated party, recognizing a \$40x loss.
- (ii) PRS does not make an election under section 754. Accordingly, PRS's basis in the land contributed by A remains \$100x. At the end of year 3, pursuant to the lease option, PRS sells the land to B for \$60x (its fair market value). Thus, PRS recognizes a \$40x loss on the sale, which is allocated equally between C and W. C's and W's bases in their partnership interests are reduced to \$10x each pursuant to section 705. Their respective interests are worth \$30x each. Thus, upon liquidation of PRS (or their interests therein), each of C and W will recognize \$20x of gain. However, PRS's continued existence defers recognition of that gain indefinitely. Thus, if this arrangement is respected, C and W duplicate for their benefit A's built-in loss in the land prior to its contribution to PRS.
- (iii) On these facts, any purported business purpose for the transaction is insignificant in comparison to the tax benefits that would result if the transaction were respected for federal tax purposes (see paragraph (c) of this section). Accordingly, the transaction lacks a substantial business purpose (see paragraph (a)(1) of this section). In addition, factors (1), (2), and (4) of paragraph (c) of this section indicate that PRS was used with a principal purpose to reduce substantially the partners' tax liability in a manner inconsistent with the intent of subchapter K. On these facts, PRS is not bona fide (see paragraph (a)(1) of this section), and the transaction is not respected under applicable substance over form principles (see paragraph (a)(2) of this section). Further, the tax consequences to the partners do not properly reflect the partners' income; and Congress did not contemplate application of section 754 to partnerships such as PRS, which was formed for a principal purpose of producing a double tax benefit from a single economic loss (see paragraph (a)(3) of this section). Thus, PRS has been formed and availed of with a principal purpose of reducing substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under judicial principles or other statutory authorities, such as the substance over form doctrine or the disguised sale rules under section 707 (see paragraph (h) of this section)), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

⁵⁴⁵⁰ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

selling it at a substantial loss.⁵⁴⁵¹ Depending on the situation, not making a Code § 754 election might be considered abusive⁵⁴⁵² or not abusive.⁵⁴⁵³ Also, the IRS reserves the right to assert and to rely upon applicable nonstatutory principles and other statutory and regulatory authorities

⁵⁴⁵¹ Reg. § 1.701-2(d) provides:

Example (11). Basis adjustments under section 732; plan or arrangement to distort basis allocations artificially; use of partnership not consistent with the intent of subchapter K.

- (i) Partnership PRS has for several years been engaged in the development and management of commercial real estate projects. X, an unrelated party, desires to acquire undeveloped land owned by PRS, which has a value of \$95x and a basis of \$5x. X expects to hold the land indefinitely after its acquisition. Pursuant to a plan a principal purpose of which is to permit X to acquire and hold the land but nevertheless to recover for tax purposes a substantial portion of the purchase price for the land, X contributes \$100x to PRS for an interest therein. Subsequently (at a time when the value of the partnership's assets have not materially changed), PRS distributes to X in liquidation of its interest in PRS the land and another asset with a value and basis to PRS of \$5x. The second asset is an insignificant part of the economic transaction but is important to achieve the desired tax results. Under section 732(b) and (c), X's \$100x basis in its partnership interest is allocated between the assets distributed to it in proportion to their bases to PRS, or \$50x each. Thereafter, X plans to sell the second asset for its value of \$5x, recognizing a loss of \$45x. In this manner, X will, in effect, recover a substantial portion of the purchase price of the land almost immediately. In selecting the assets to be distributed to X, the partners had a principal purpose to take advantage of the fact that X's basis in the assets will be determined under section 732(b) and (c), thus, in effect, shifting a portion of X's basis economically allocable to the land that X intends to retain to an inconsequential asset that X intends to dispose of quickly. This shift provides a federal tax timing advantage to X, with no offsetting detriment to any of PRS's other partners.
- (ii) Although section 732 recognizes that basis distortions can occur in certain situations, which may produce tax results that do not satisfy the proper reflection of income standard of paragraph (a)(3) of this section, the provision is intended only to provide ancillary, simplifying tax results for bona fide partnership transactions that are engaged in for substantial business purposes. Section 732 is not intended to serve as the basis for plans or arrangements in which inconsequential or immaterial assets are included in the distribution with a principal purpose of obtaining substantially favorable tax results by virtue of the statute's simplifying rules. The transaction does not properly reflect X's income due to the basis distortions caused by the distribution that result in shifting a significant portion of X's basis to this inconsequential asset. Moreover, the proper reflection of income standard contained in paragraph (a)(3) of this section is not treated as satisfied, because, taking into account all the facts and circumstances, the application of section 732 to this arrangement, and the ultimate tax consequences that would thereby result, were not clearly contemplated by that provision of subchapter K. In addition, by using a partnership (if respected), the partners' aggregate federal tax liability would be substantially less than had they owned the partnership's assets directly (see paragraph (c)(1) of this section). On these facts, PRS has been formed and availed of with a principal purpose to reduce the taxpayers' aggregate federal tax liability in a manner that is inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under applicable judicial principles and statutory authorities, such as the disguised sale rules under section 707, see paragraph (h) of this section), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

⁵⁴⁵² Reg. § 1.701-2(d), Example (8), reproduced in fn 5449.

⁵⁴⁵³ Reg. § 1.701-2(d), Example (9), reproduced in fn 5448.

to challenge transactions,⁵⁴⁵⁴ which might subject taxpayers to penalties,⁵⁴⁵⁵ so be careful not to get too cute.

Other partnership transactions might also be helpful.⁵⁴⁵⁶

Note that partners can shift basis without going through this process, but the transactions also require seasoning. Suppose A has for many years held low basis real estate worth \$1 million. Last year, B bought real estate for \$1 million, intending to hold it for investment. A and B swap real estate in a tax-free Code § 1031 exchange.⁵⁴⁵⁷ The old property now has a high basis in B's hands, and the new property has a low basis in A's hands. Code § 1031 generally requires A and B to have intended to hold the property for investment when they bought them and to intend to hold the swapped property for investment after the Code § 1031 exchange.

In reviewing anything in this part II.Q.8.b.i.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.b.i.(f). Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value

The Code § 731(a) rule that there are no tax consequences to a partner when the partner receives a partnership distribution is subject to two exceptions if the distribution is made within seven years after the partner contributed property to the partnership:

- First, earlier it was discussed that Code § 704(c)(1)(B) triggers gain when the partnership distributes contributed property to a partner other than the contributing partner⁵⁴⁵⁸ within seven years after the contribution; it also applies if the partnership agreement is amended within seven years to shift to the other partner the burdens and benefits and the property is distributed to that other partner more than seven years after contribution.⁵⁴⁵⁹
- Second, Code § 737 will trigger gain to a distributee partner if the partner contributes property to the partnership and then receives a distribution of some other property⁵⁴⁶⁰ within seven years of the partner's original contribution. When such a distribution is made, the partner must recognize gain equal to the lesser of (1) the excess of the fair market value of the distributed property over the partner's partnership interest's adjusted basis (less any money received in the distribution) or (2) the partner's net pre-contribution gain.⁵⁴⁶¹ Net pre-contribution gain, as defined in Code § 737(b), is the gain that would have been recognized by the distributee partner under Code § 704(c)(1)(B) if all property the partner had contributed to the partnership within seven years of the distribution that was still held by the

⁵⁴⁵⁴ Reg. § 1.701-2(i).

⁵⁴⁵⁵ See part II.G.17 Economic Substance Penalty.

⁵⁴⁵⁶ See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).

⁵⁴⁵⁷ See part II.G.16 Like-Kind Exchanges.

⁵⁴⁵⁸ When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 5404.

⁵⁴⁵⁹ Reg. § 1.704-4(f)(2), Example (1).

⁵⁴⁶⁰ When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 5404.

⁵⁴⁶¹ Code § 737(a)(1) and (2).

partnership immediately before the distribution was distributed by the partnership to some other partner.

These rules relate to Code § 704(c) responsibility – the allocation to a partner of built-in gain or loss when the partnership contributes to a partnership property the basis of which differs from its fair market value – which integrates with part II.P.1.a.i Allocations of Income in Partnerships.

“The transferee of all or a portion of a contributing partner’s partnership interest succeeds to the transferor’s net precontribution gain, if any, in an amount proportionate to the interest transferred.”⁵⁴⁶² Because debt associated with contributed property is allocated to a partner to the extent of Code § 704(c) gain,⁵⁴⁶³ anti-abuse rules prevent the acceleration or duplication of loss through the assumption of potentially suspect obligations.⁵⁴⁶⁴ Obligations that are not

⁵⁴⁶² Reg. § 1.737-1(c)(2)(iii), which further provides:

See § 1.704-3(a)(7) and § 1.704-4(d)(2) for similar provisions in the context of section 704(c)(1)(A) and section 704(c)(1)(B).

Reg. § 1.704-3(a)(7) provides:

Transfer of a partnership interest. If a contributing partner transfers a partnership interest, built-in gain or loss must be allocated to the transferee partner as it would have been allocated to the transferor partner. If the contributing partner transfers a portion of the partnership interest, the share of built-in gain or loss proportionate to the interest transferred must be allocated to the transferee partner. This rule does not apply to any person who acquired a partnership interest from a § 1.752-7 liability partner in a transaction to which paragraph (e)(1) of § 1.752-7 applies. See § 1.752-7(c)(1).

Reg. § 1.704-4(d)(2) provides:

Transfers of a partnership interest. The transferee of all or a portion of the partnership interest of a contributing partner is treated as the contributing partner for purposes of section 704(c)(1)(B) and this section to the extent of the share of built-in gain or loss allocated to the transferee partner. See § 1.704-3(a)(7).

⁵⁴⁶³ See paragraph (2) of the text accompanying fn 442 in part II.C.3.c.iii Allocating Nonrecourse (Remaining) Liabilities.

⁵⁴⁶⁴ Reg. § 1.752-7(a) provides:

Purpose and structure. The purpose of this section is to prevent the acceleration or duplication of loss through the assumption of obligations not described in § 1.752-1(a)(4)(i) in transactions involving partnerships. Under paragraph (c) of this section, any such obligation that is assumed by a partnership from a partner in a transaction governed by section 721(a) is treated as section 704(c) property. Paragraphs (e), (f), and (g) of this section provide rules for situations where a partnership assumes such an obligation from a partner and, subsequently, that partner transfers all or part of the partnership interest, that partner receives a distribution in liquidation of the partnership interest, or another partner assumes part or all of that obligation from the partnership. These rules prevent the duplication of loss by prohibiting the partnership and any person other than the partner from whom the obligation was assumed from claiming a deduction, loss, or capital expense to the extent of the built-in loss associated with the obligation. These rules also prevent the acceleration of loss by deferring the partner’s deduction or loss attributable to the obligation (if any) until the satisfaction of the § 1.752-7 liability (within the meaning of paragraph (b)(8) of this section). Paragraph (d) of this section provides a number of exceptions to paragraphs (e), (f), and (g) of this section, including a de minimis exception. Paragraph (i) provides a special rule for situations in which an amount paid to satisfy a § 1.752-7 liability is capitalized into other partnership property. Paragraph (j) of this section provides special rules for tiered partnership transactions.

Reg. § 1.752-7(c)(1)(i) provides:

Section 704(c). Except as otherwise provided in this section, sections 704(c)(1)(A) and (B), section 737, and the regulations thereunder, apply to § 1.752-7 liabilities. See § 1.704-3(a)(12).

potentially suspect include those that generate basis (such as buying or improving an asset), result in an immediate deduction, or give rise to a nondeductible expense.⁵⁴⁶⁵

If a new partner joins a partnership (or an existing partner makes a non-pro rata contribution) when the partnership holds property the basis of which differs from its fair market value:

- The existing partners' capital accounts obtain Code § 704(c) responsibility,⁵⁴⁶⁶ this is called a "reverse-Code § 704(c)" allocation. Thus, any unrealized gain that occurred between the time the partnership acquired the property and the time a new partner joined (or an existing partner makes a non-pro rata contribution) constitutes Code § 704(c) responsibility that is allocated to all of the existing partners.⁵⁴⁶⁷ This responsibility can be reflected by either a

However, §1.704-3(a)(7) does not apply to any person who acquired a partnership interest from a § 1.752-7 liability partner in a transaction to which paragraph (e)(1) of this section applies.

Reg. § 1.752-7(e)(1) limits deduction, loss, or capital expense is allowed to the partnership on the satisfaction of a Reg. § 1.752-7 liability.

⁵⁴⁶⁵ Reg. § 1.752-1(a)(4)(i). For details, see fn 398 in part II.C.3.b What Is a "Liability" and also fn 6306 in part III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees.

⁵⁴⁶⁶ See Reg. § 1.704-3(a)(6). See also Reg. § 1.704-1(b)(2)(iv)(s)(2).

⁵⁴⁶⁷ Reg. §§ 1.704-1(b)(5), Example (14)(i), provides:

MC and RW form a general partnership to which each contributes \$10,000. The \$20,000 is invested in securities of Ventureco (which are not readily tradable on an established securities market)... Assume that the Ventureco securities subsequently appreciate in value to \$50,000. At that time SK makes a \$25,000 cash contribution to the partnership (thereby acquiring a one-third interest in the partnership), and the \$25,000 is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were \$10,000 each prior to SK's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward (to \$25,000 each) to reflect their shares of the unrealized appreciation in the Ventureco securities that occurred before SK was admitted to the partnership. Immediately after SK's admission to the partnership, the securities are sold for their \$50,000 fair market value, resulting in taxable gain of \$30,000 (\$50,000 less \$20,000 adjusted tax basis) and no book gain or loss. An allocation of the \$30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the \$30,000 taxable gain will, in accordance with section 704(c) principles, be shared \$15,000 to MC and \$15,000 to RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(ii), provides:

Assume the same facts as (i), except that after SK's admission to the partnership, the Ventureco securities appreciate in value to \$74,000 and are sold, resulting in taxable gain of \$54,000 (\$74,000 less \$20,000 adjusted tax basis) and book gain of \$24,000 (\$74,000 less \$50,000 book value). Under the partnership agreement the \$24,000 book gain (the appreciation in value occurring after SK became a partner) is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the \$54,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared \$23,000 to MC \$23,000 to RW, and \$8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(iii), provides:

Assume the same facts as (i) except that after SK's admission to the partnership, the Ventureco securities depreciate in value to \$44,000 and are sold, resulting in taxable gain of \$24,000

special allocation of gain in the partnership agreement or by revaluing capital accounts on the books,⁵⁴⁶⁸ but the partnership must take one of these steps for the partnership agreement to be respected.⁵⁴⁶⁹ An unexpected part of this issue is that one can become saddled with Code § 704(c) responsibility for assets one did not contribute; consider whether this might reset the seven-year period with respect to that newly acquired Code § 704(c) responsibility (I have not researched the latter). Also, beware that a book-up

(\$44,000 less \$20,000 adjusted tax basis) and a book loss of \$6,000 (\$50,000 book value less \$44,000). Under the partnership agreement the \$6,000 book loss is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the \$24,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the \$24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

⁵⁴⁶⁸ For how to revalue, see Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn. 507 in part II.C.7 Maintaining Capital Accounts. See also Reg. § 1.704-1(b)(5), Example (33). Although generally this responsibility is determined separately for each asset, see an alternative approach is in part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

⁵⁴⁶⁹ See Reg. § 1.704-1(b)(5), Example (14)(iv), referencing Reg. § 1.704-1(b)(1)(iii), (iv). Reg. § 1.704-1(b)(1)(iii) provides:

Effect of other sections. The determination of a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) under section 704(b) and this paragraph is not conclusive as to the tax treatment of a partner with respect to such distributive share. For example, an allocation of loss or deduction to a partner that is respected under section 704(b) and this paragraph may not be deductible by such partner if the partner lacks the requisite motive for economic gain (see, e.g., *Goldstein v. Commissioner*, 364 F.2d 734 (2d Cir. 1966)), or may be disallowed for that taxable year (and held in suspense) if the limitations of section 465 or section 704(d) are applicable. Similarly, an allocation that is respected under section 704(b) and this paragraph nevertheless may be reallocated under other provisions, such as section 482, section 704(e)(2), section 706(d) (and related assignment of income principles), and paragraph (b)(2)(ii) of § 1.751-1. If a partnership has a section 754 election in effect, a partner's distributive share of partnership income, gain, loss, or deduction may be affected as provided in § 1.743-1 (see paragraph (b)(2)(iv)(m)(2) of this section). A deduction that appears to be a nonrecourse deduction deemed to be in accordance with the partners' interests in the partnership may not be such because purported nonrecourse liabilities of the partnership in fact constitute equity rather than debt. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address the effect of other sections or limitations on such allocations.

Reg. § 1.704-1(b)(1)(iv) provides:

Other possible tax consequences. Allocations that are respected under section 704(b) and this paragraph may give rise to other tax consequences, such as those resulting from the application of section 61, section 83, section 751, section 2501, paragraph (f) of § 1.46-3, § 1.47-6, paragraph (b)(1) of § 1.721-1 (and related principles), and paragraph (e) of § 1.752-1. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address other tax consequences that may result from such allocations.

Implicit in clause (iv) is that failure to maintain proper capital accounts can have gift tax consequences under Code § 2501.

Also see Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 500 in part II.C.7 Maintaining Capital Accounts.

resulting from a revaluation may shift nonrecourse liabilities,⁵⁴⁷⁰ which can generate income tax.⁵⁴⁷¹

- If the partnership included a nominal partner merely to get the seven-year period running and the previously contributed property is promptly distributed to a partner who is admitted just after the seven-year had run, the nominal partner's existence is ignored in determining the seven-year period, so Code § 704(c)(1)(B) taxes the contributing partner.⁵⁴⁷²

Note that Code § 737 is applied after Code § 731(c), which means that any marketable securities that are treated as money for Code § 731(c) purposes are ignored when applying Code § 737.⁵⁴⁷³ This can lead to a favorable result for a distributee partner in two ways. First, since the property piece of the distribution is reduced by treating marketable securities as money, the Code § 737 gain potential is reduced. Second, the total amount of cash and marketable securities treated as money could be less than the basis of the distributee partner's partnership interest, resulting in no gain recognition under Code § 731.

As in the Code § 704(c) analysis, the prevailing view among commentators seems to be that a transferee of a partnership interest will "step into" the transferor's shoes in Code § 737 situations. This view is supported by the fact that regulations supporting Code § 704(c)(1)(B) and Code § 737 were written by the same people, at the same time, in the same project, and are likely to have been designed to work in coordination with one another. A partner should not be able to avoid the rules of Code § 737 by transferring the partnership interest to a third party. Thus, the transferee partner should be treated as the contributing partner under Code § 737.⁵⁴⁷⁴

When contributed property is distributed to any non-contributing partner within seven years of its contribution, the contributing partner is treated as if the property were sold to the recipient partner at its fair market value and must recognize the proper gain or loss under Code § 704(c)(1)(A); however, an exception applies for certain deemed like-kind exchanges.⁵⁴⁷⁵

⁵⁴⁷⁰ See text preceding and accompanying fn 400 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

⁵⁴⁷¹ See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

⁵⁴⁷² Reg. § 1.704-4(f)(2), Example (2).

⁵⁴⁷³ Reg. § 1.731-2(g).

⁵⁴⁷⁴ I am very comfortable with the statement in the text, although it is not totally free from doubt. See Robinson, Don't Nothing Last Forever – Unwinding the FLP to the Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 302; Blum and Harrison, Another View: A Response to Richard Robinson's Don't Nothing Last Forever – Unwinding the FLP to the Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 313; and Robinson's Comments on Blum and Harrison's Another View, *ACTEC Journal*, Spring 2003, p. 318.

⁵⁴⁷⁵ Code § 704(c)(2). See Borden and Longhofer, The Effect of Like-Kind Property on the Section 704(c) Anti-Mixing Bowl Rules, *TM Real Estate Journal* (3/2/2011). Reg. § 1.704-4(d)(3) provides:

Distributions of like-kind property. If section 704(c) property is distributed to a partner other than the contributing partner and like-kind property (within the meaning of section 1031) is distributed to the contributing partner no later than the earlier of (i) 180 days following the date of the distribution to the non-contributing partner, or (ii) the due date (determined with regard to extensions) of the contributing partner's income tax return for the taxable year of the distribution to the noncontributing partner, the amount of gain or loss, if any, that the contributing partner would otherwise have recognized under section 704(c)(1)(B) and this section is reduced by the amount of built-in gain or loss in the distributed like-kind property in the hands of the contributing partner immediately after the distribution. The contributing partner's basis in the distributed like-kind property is determined as if the like-kind property were distributed in an unrelated distribution

This like-kind exception applies not only to Code § 704(c) but also to Code § 737.⁵⁴⁷⁶ Thus, partners in a real estate mixing bowl partnership might completely avoid gain recognition under Code §§ 704(c)(1)(B) and 737 if the partnership is liquidated before the seven year waiting period and the different partners each receive part or complete ownership of various properties owned by the partnership.⁵⁴⁷⁷

For issues relating to built-in losses, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

II.Q.8.b.i.(g). Code § 751 – Hot Assets

Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain attributable to hot assets (substantially appreciated inventory or unrealized receivables) "shall be considered as an amount realized from the sale or exchange of property other than a capital asset." Because capital gain treatment does not apply, this gain tends to be viewed colloquially as ordinary income, even though it is actually gain from the sale of property. This noncapital gain is "qualified business income" that may receive a deduction of up to 20% under Code § 199A.⁵⁴⁷⁸

When read together, Reg. § 1.751-1(b)(1)(i), -1(b)(2)(i), -1(b)(3)(i), and the -1(g) examples provide that one looks to differences in Code § 751 allocation before and after the distribution. If a partner is distributed exactly its share of each item of Code § 751 property, so that nobody's share of Code § 751 property decreases, then Code § 751 does not apply.

A partner might be deemed to have entered into a transaction regarding hot assets if:⁵⁴⁷⁹

- The partner receives hot assets in exchange for all or a part of the partner's interest in other partnership property (including money), or

prior to the distribution of any other property distributed as part of the same distribution and is determined without regard to the increase in the contributing partner's adjusted tax basis in the partnership interest under section 704(c)(1)(B) and this section. See § 1.707-3 for provisions treating the distribution of the like-kind property to the contributing partner as a disguised sale in certain situations.

Reg. § 1.704-4(d)(4) provides an example.

⁵⁴⁷⁶ In determining the precontribution gain subject to possible taxation under Code § 737, Reg. § 1.737-1(c)(2)(iv) provides:

Section 704(c)(1)(B) gain recognized in related distribution. A distributee partner's net precontribution gain is determined after taking into account any gain or loss recognized by the partner under section 704(c)(1)(B) and § 1.704-4 (or that would have been recognized by the partner except for the like-kind exception in section 704(c)(2) and § 1.704-4(d)(3)) on an actual distribution to another partner of section 704(c) property contributed by the distributee partner that is part of the same distribution as the distribution to the distributee partner.

However, Reg. § 1.737-1(c)(2)(v) requires an actual distribution:

Section 704(c)(2) disregarded. A distributee partner's net precontribution gain is determined without regard to the provisions of section 704(c)(2) and § 1.704-4(d)(3) in situations in which the property contributed by the distributee partner is not actually distributed to another partner in a distribution related to the section 737 distribution.

⁵⁴⁷⁷ Breitstone and Wilensky, *Dividing a Real Estate Empire: The Mixing Bowl Alternative*, *TM Memorandum* (BNA) (3/9/2015).

⁵⁴⁷⁸ See Reg. § 1.199A-3(b)(1)(i), reproduced in part II.E.1.c.ii.(a) Generally; List of Items Included in QBI.

⁵⁴⁷⁹ Code § 751(b)(1).

- The partner receives partnership property (including money) in exchange for all or a part of the partner's interest in hot assets.

This rule does not apply to a distribution of property that the distributee contributed to the partnership or Code § 736(a) payments to a retiring partner or successor in interest of a deceased partner.⁵⁴⁸⁰ Also, it applies only if and to the extent that a partner receives more or less than that partner's share of hot assets.⁵⁴⁸¹

Proposed regulations "prescribe how a partner should measure its interest in a partnership's unrealized receivables and inventory items ... and ... provide guidance regarding the tax consequences of a distribution that causes a reduction in that interest."⁵⁴⁸²

A partnership's inventory items are "substantially appreciated" if their fair market value exceeds 120% of the partnership's adjusted basis in such property, unless a principal purpose for acquiring such property was to avoid these rules regarding inventory items.⁵⁴⁸³ "Inventory items" include:⁵⁴⁸⁴

- the partnership's Code § 1221(a)(1) property,⁵⁴⁸⁵
- any other partnership property that, if the partnership sold or exchanged them, would be considered property other than a capital asset and other than Code § 1231 property,⁵⁴⁸⁶ and

⁵⁴⁸⁰ Code § 751(b)(2).

⁵⁴⁸¹ See Reg. §§ 1.751-1(b)(1)(i), 1.751-1(b)(2)(i), and 1.751-1(b)(3)(i), and the Reg. § 1.751-1(g) examples.

⁵⁴⁸² REG-151416-06, Certain Distributions Treated as Sales or Exchanges [FR Doc. 2014-25487 Filed 10/31/2014 at 8:45 am; Publication Date: 11/03/2014]. The proposed regulations would obsolete Rev. Rul. 84-102. For the effective date:

The regulations, as proposed, apply to distributions occurring in any taxable period ending on or after the date of publication of a Treasury decision adopting these rules as final regulations in the Federal Register. The rules contained in § 1.751-1(a)(2) would apply to transfers of partnership interests that occur on or after [11/03/2014]. However, the rules contained in § 1.751-1(a)(2) are a clarification of existing rules, and no inference is intended from the change to § 1.751-1(a)(2) with respect to sales or exchanges of partnership interests prior to the effective date for § 1.751-1(a)(2). The rules contained in § 1.751-1(a)(3) continue to apply to transfers of partnership interests that occur on or after December 15, 1999. A partnership and its partners would be able to rely on § 1.751-1(b)(2) of these proposed regulations for purposes of determining a partner's interest in the partnership's section 751 property on or after [11/03/2014] provided the partnership and its partners apply each of § 1.751-1(a)(2), § 1.751-1(b)(2), and § 1.751-1(b)(4) of these proposed regulations consistently for all partnership distributions and sales or exchanges, including for any distributions and sales or exchanges the partnership makes after a termination of the partnership under section 708(b)(1)(B).

See Longhofer and Rimmke, Proposed Section 751(b) Regulations: An Exchange for the Better? *Journal of Taxation* (Aug. 2015).

⁵⁴⁸³ Code § 751(b)(3).

⁵⁴⁸⁴ Code § 751(d).

⁵⁴⁸⁵ Real estate might or might not constitute inventory. See part II.G.26.c Future Development of Real Estate.

⁵⁴⁸⁶ Code § 1231 is discussed in part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business. Code § 1245 depreciation recapture overrides Code § 1231; see fn. 1496.

- any other property the partnership held that, if held by the selling or distributee partner, would be considered property of the type described above.

“Unrealized receivables” include, to the extent not previously includible in income under the partnership’s tax accounting method, any rights (contractual or otherwise) to payment for:⁵⁴⁸⁷

- goods delivered, or to be delivered, to the extent the proceeds therefrom would be treated as amounts received from the sale or exchange of property other than a capital asset, or
- services rendered, or to be rendered.

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736,⁵⁴⁸⁸ “unrealized receivables” includes the following as if the partnership had been sold it at its fair market value, to the extent that their sale would trigger certain unfavorable tax treatment:⁵⁴⁸⁹

- mining property,⁵⁴⁹⁰
- stock in a DISC,⁵⁴⁹¹
- Code § 1245 property (as defined in Code § 1245(a)(3) (generally, depreciable personal property and amortizable intangible property),⁵⁴⁹²
- stock in certain foreign corporations,⁵⁴⁹³
- Code § 1250 property (generally, real estate depreciated faster than straight-line depreciation),⁵⁴⁹⁴

⁵⁴⁸⁷ Code § 751(c).

⁵⁴⁸⁸ P.L. 103-66 (8/10/1993), § 13262(b), deleted the reference to Code § 736. As to Code § 736, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

⁵⁴⁸⁹ Code § 751(c).

⁵⁴⁹⁰ As defined in Code § 617(f)(2), to the extent that Code § 617(d)(1) would apply.

⁵⁴⁹¹ As described in Code § 992(a), to the extent that Code § 995(c) would apply.

⁵⁴⁹² See part II.G.6.b Code § 1245 Property and, with respect to amortizable Code § 197 intangibles, fn 1528 reproducing Code § 1245(b)(8), treating such intangibles as one Code § 1245 property, and fn 1706 in part II.G.18.d Amortization of Code § 197 Intangibles, reproducing Code § 197(f)(7), treating all amortizable Code § 197 intangibles as subject to Code § 167.

⁵⁴⁹³ As described in Code § 1248, to the extent that Code § 1248(a) would apply. For purposes of applying Code § 731, 741, and 751, in the case of an individual, the tax attributable to such amount shall be limited in the manner provided by Code § 1248(b) (relating to gain from certain sales or exchanges of stock in certain foreign corporation). Code § 751(e).

⁵⁴⁹⁴ As defined in Code § 1250(c), to the extent that Code § 1250(a) would apply. Code § 1250(a)(1)(A)(i) applies Code § 1250(a) to additional depreciation, referring to subsections (b)(1) and (b)(4).

Subsection (b)(1) applies to depreciation faster than straight line. Subsection (b)(4) applies to certain rehabilitation expenditures. Reg. § 1.1(h)-1(b)(3), “Section 1250 capital gain,” provides:

- (i) *Definition.* For purposes of this section, section 1250 capital gain means the capital gain (not otherwise treated as ordinary income) that would be treated as ordinary income if section 1250(b)(1) included all depreciation and the applicable percentage under section 1250(a) were 100 percent.
- (ii) *Share of section 1250 capital gain allocable to interest in partnership.* When an interest in a partnership held for more than one year is sold or exchanged in a transaction in which all

- farm land,⁵⁴⁹⁵
- franchises, trademarks, or trade names,⁵⁴⁹⁶ or
- an oil, gas, or geothermal property.⁵⁴⁹⁷

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736, “unrealized receivables” also includes any market discount bond⁵⁴⁹⁸ and any short-term obligation⁵⁴⁹⁹ but only to the extent of the amount which would be treated as ordinary income if the partnership had sold such property.

More drastic consequences may apply when selling to a controlled corporation interests in a partnership holding depreciable property (including depreciable real estate that would not have depreciation recapture under Code § 1250), taxing the entire gain as ordinary income, not just the part that might have constituted depreciation recapture.⁵⁵⁰⁰

See also part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

Reg. § 1.6050K-1(a)(1), “In general,” provides:

Except as otherwise provided in this paragraph (a), a partnership shall make a separate return on Form 8308 with respect to each section 751(a) exchange (as defined in paragraph (a)(4)(i) of this section) of an interest in such partnership which occurs after December 31, 1984. A partnership that is in doubt as to whether partnership property constitutes section 751 property to any extent or as to whether a transfer of a partnership interest constitutes a section 751(a) exchange may file Form 8308 in order

realized gain is recognized, there shall be taken into account under section 1(h)(7)(A)(i) in determining the partner’s unrecaptured section 1250 gain the amount of section 1250 capital gain that would be allocated (taking into account any remedial allocation under §1.704-3(d)) to that partner (to the extent attributable to the portion of the partnership interest transferred that was held for more than one year) if the partnership transferred all of its section 1250 property in a fully taxable transaction for cash equal to the fair market value of the assets immediately before the transfer of the interest in the partnership. If less than all of the realized gain is recognized upon the sale or exchange of an interest in a partnership, the same methodology shall apply to determine the section 1250 capital gain recognized by the transferor, except that the partnership shall be treated as transferring only a proportionate amount of each section 1250 property determined as a fraction that is the amount of gain recognized in the sale or exchange over the amount of gain realized in the sale or exchange. This paragraph (b)(3) does not apply to a transaction that is treated, for Federal income tax purposes, as a redemption of a partnership interest.

- (iii) *Limitation with respect to net section 1231 gain.* In determining a transferor partner’s net section 1231 gain (as defined in section 1231(c)(3)) for purposes of section 1(h)(7)(B), the transferor partner’s allocable share of section 1250 capital gain in partnership property shall not be treated as section 1231 gain, regardless of whether the partnership property is used in the trade or business (as defined in section 1231(b)).

⁵⁴⁹⁵ As defined in Code § 1252(a), to the extent that Code § 1252(a) would apply.

⁵⁴⁹⁶ Referred to in Code § 1253(a), to the extent that Code § 1253(a) would apply.

⁵⁴⁹⁷ As defined in Code § 1254, to the extent that Code § 1254(a) would apply.

⁵⁴⁹⁸ As defined in Code § 1278.

⁵⁴⁹⁹ As defined in Code § 1283.

⁵⁵⁰⁰ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially the text accompanying fns. 5109-5114.

to avoid the risk of incurring a penalty under section 6721. The penalty under section 6721 will generally apply, however, to partnerships that do not file Form 8308 where in fact a section 751(a) exchange occurred, except as provided in paragraphs (a)(2) and (e) of this section.

Reg. § 1.6050K-1(a)(4), “Definitions,” provides that, for purposes of Code § 6050K and Reg. § 1.6050K-1:

- (i) *Section 751(a) exchange.* The term “section 751(a) exchange” means any sale or exchange of a partnership interest (or portion thereof) in which any portion of any money or other property received by a transferor partner in exchange for all or a part of his or her interest in the partnership is attributable to section 751 property. The term does not include a distribution which is treated as a sale or exchange between the distributee and the partnership under section 751(b) of the Code.
- (ii) *Section 751 property.* The term “section 751 property” means unrealized receivables, as defined in section 751(c) of the Code, and inventory items which have appreciated substantially in value (“substantially appreciated inventory items”), as defined in section 751(d) of the Code.
- (iii) *Transferor and transferee.* The term “transferor” means the beneficial owner of a partnership interest immediately before the transfer of that interest. The term “transferee” means the beneficial owner of a partnership interest immediately after the transfer of that interest. However, if a partnership does not know the identity of the beneficial owner of an interest in the partnership, the record holder of such interest shall be treated as the transferor or transferee (as the case may be) for purposes of paragraphs (b) and (c) of this section.

See [About Form 8308, Report of a Sale or Exchange of Certain Partnership Interests](#).

Notice 2024-19 explains in part II, “Background”:

Generally, § 6050K and § 1.6050K-1 require a partnership with § 751 property to provide information to each transferor and transferee that are parties to a sale or exchange of an interest in the partnership (or portion thereof) in which any money or other property received by a transferor from a transferee in exchange for all or part of the transferor’s interest in the partnership is attributable to § 751 property (§ 751(a) exchange). Section 1.6050K-1(a)(2) provides that partnerships are required to report each § 751(a) exchange on Form 8308. Generally, § 1.6050K-1(f)(1) provides that a partnership is required to file Form 8308 as an attachment to its Form 1065, U.S. Return of Partnership Income, for the taxable year of the partnership that includes the last day of the calendar year in which the § 751(a) exchange took place. Form 8308 is due at the time for filing the partnership return, including extensions....

On November 30, 2020, the Department of the Treasury (Treasury Department) and the Internal Revenue Service (IRS) published T.D. 9926, 85 FR 76910, which amended § 1.6050K-1(c)(2) to require a partnership to furnish to a transferor partner the information necessary for the transferor to make the transferor partner’s required statement in § 1.751-1(a)(3). Among other items, § 1.751-1(a)(3) requires a transferor partner in a § 751(a) exchange to submit with the transferor partner’s income tax return a statement setting forth the amount of gain or loss attributable to § 751 property. In

October 2023, the IRS released a revised version of Form 8308. Consistent with the requirements in § 1.6050K-1(c)(2), new Part IV of the 2023 Form 8308 requires a partnership to report, among other items, the partnership's and the transferor partner's share of § 751 gain and loss, collectibles gain under § 1(h)(5), and unrecaptured § 1250 gain under § 1(h)(6).

Notice 2024-19, part III, "Grant of Relief," provides:

With respect to § 751(a) exchanges during calendar year 2023, the IRS will not impose penalties under § 6722 solely for failure to furnish Form 8308 with a completed Part IV by the due date specified in § 1.6050K-1(c)(1) for a partnership that (1) timely and correctly furnishes to the transferor and transferee a copy of Parts I, II, and III of Form 8308, or a statement that includes the same information, by the later of (a) January 31, 2024, or (b) 30 days after the partnership is notified of the § 751(a) exchange, and (2) furnishes to the transferor and transferee a copy of the complete Form 8308, including Part IV, or a statement that includes the same information and any additional information required under § 1.6050K-1(c), by the later of (a) the due date of the partnership's Form 1065 (including extensions), or (b) 30 days after the partnership is notified of the § 751(a) exchange.

The relief provided in this notice applies only with respect to furnishing Form 8308 to the transferor and transferee. This notice does not provide relief with respect to filing Form 8308 as an attachment to a partnership's Form 1065; as such, this notice does not provide relief from penalties under § 6721 for failure to file correct information returns.

II.Q.8.b.i.(h). Characteristics of Distributed Property

Often, asset distributions precede, follow, or are substitutes for the transfer of partnership interests. Therefore, the concepts of distributions and transfers of partnership interests should be considered together. For the latter, see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

A distributed property's basis depends on whether the distribution liquidated the partner's partnership interest:

- Generally, the basis of property (other than money) distributed by a partnership to a partner, other than in liquidation of the partner's interest, is its adjusted basis to the partnership immediately before such distribution.⁵⁵⁰¹ However, this basis cannot exceed the adjusted basis of the partner's interest in the partnership, reduced by any money distributed in the same transaction.⁵⁵⁰²
- The basis of property (other than money) distributed by a partnership to a partner in liquidation of the partner's interest is the partnership interest's adjusted basis, reduced by any money distributed in the same transaction.⁵⁵⁰³

⁵⁵⁰¹ Code § 732(a)(1).

⁵⁵⁰² Code § 732(a)(2). If that cap causes a loss of basis, the partnership can reallocate that lost basis to the partnership's other assets under Code § 734 if a Code § 754 election is in place. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

⁵⁵⁰³ Code § 732(b).

However, neither of these rules applies to the extent that a distribution is treated as a sale or exchange of property under Code § 751(b) (relating to unrealized receivables and inventory items).⁵⁵⁰⁴

Also, special rules apply to a partner who acquired all or a part of his interest by a transfer with respect to which a Code § 754 election is not in effect, and to whom a distribution of property (other than money) is made with respect to the transferred interest within two years after such transfer.⁵⁵⁰⁵ The partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the adjustment provided in Code § 743(b) were in effect.⁵⁵⁰⁶ Depending on the situation, this basis adjustment requires elections or is mandatory.⁵⁵⁰⁷

A partner's holding period for property received in a distribution from a partnership generally includes the partnership's holding period.⁵⁵⁰⁸

When a partner who receives "hot assets" later disposes of them, the partner will recognize ordinary income:

- The disposition of Code § 751(c) unrealized receivables received from a partnership is ordinary gain or loss.⁵⁵⁰⁹
- The disposition of Code § 751(d) inventory received from a partnership, within 5 years from the date of the distribution,⁵⁵¹⁰ is ordinary gain or loss.⁵⁵¹¹

⁵⁵⁰⁴ Code § 732(e). For details regarding these assets, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵⁵⁰⁵ Code § 732(d). For a discussion of these rules, including any opportunity to shift basis from non-depreciable to depreciable assets, see McKee, Nelson & Whitmire, ¶26.01 Transferees' Special Basis Adjustments in Connection With Subsequent Distributions, *Federal Taxation of Partnerships & Partners* (WG&L).

⁵⁵⁰⁶ Reg. § 1.732-1(d)(1)(iii). The amount of this adjustment is not diminished by any depletion or depreciation of that portion of the basis of partnership property arising from this special basis adjustment, since depletion or depreciation on such portion before distribution is allowed or allowable only if the optional adjustment under Code § 743(b) is in effect. Reg. § 1.732-1(d)(1)(iv). If this property is not the same property which would have had a special basis adjustment, then such special basis adjustment applies to any like property received in the distribution, if the transferee, in exchange for the property distributed, has relinquished the transferee's interest in the property with respect to which the transferee would have had a special basis adjustment. Reg. § 1.732-1(d)(1)(v).

⁵⁵⁰⁷ Reg. § 1.731-1(d)(2), (3), (4).

⁵⁵⁰⁸ Code § 735(b). See Goold & Schneider, Finding the Gold Nuggets in Partnership Holding Periods, *Passthrough Entities* 31 (Nov./Dec. 2002). See also Borden, Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations, *Business Entities* (Jul./Aug. 2014), suggesting that the holding period of distributed property might be the longer of the partnership's holding period or the partnership interest's holding period.

⁵⁵⁰⁹ Code § 735(a)(1).

⁵⁵¹⁰ For purposes of this rule, the partnership's holding period does not tack, and Code § 751(d) (defining inventory item) shall be applied without regard to any holding period in Code § 1231(b). Code § 735(b), (c)(1).

⁵⁵¹¹ Code § 735(a)(2).

If any of these hot assets is disposed of in a nonrecognition transaction or a series of nonrecognition transactions, the above tax treatment shall also apply to any substituted basis property resulting from such transaction(s).⁵⁵¹²

II.Q.8.b.ii. Partnership Redemption – Complete Withdrawal Using Code § 736

When reading this part II.Q.8.b.ii, beware of part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

II.Q.8.b.ii.(a). Introduction to Code § 736

When a partnership redeems⁵⁵¹³ a partner's interest in full,⁵⁵¹⁴ Code § 736(a) provides that payments may be deductible to the partnership and ordinary income to the selling partner;⁵⁵¹⁵ if and to the extent that these payments are based on partnership income rather than being fixed, they constitute a shifting of a distributive share of partnership income to the retiring partner, rather than a deduction to the partnership and income to the retiring partner.⁵⁵¹⁶ Or, one may

⁵⁵¹² Code § 735(c)(2)(A). This rule does not apply to any stock in a C corporation received in a Code § 351 exchange. Code § 735(c)(2)(B).

⁵⁵¹³ Code § 736 applies only to payments made by the partnership and not to transactions between partners. Reg. § 1.736-1(a)(1)(i). If the responsibility for making payments in a transaction between partners is assigned to the partnership, the assignment does not transform the sale into a Code § 736 redemption. *Coven v. Commissioner*, 66 T.C. 295 (1976), *acq.* 1976-2 C.B. 1, reasoning:

We therefore conclude that petitioner sold his partnership interest to Suttenger individually. The resulting tax consequences accordingly cannot be determined by section 736, since that section applies "only to payments made by the partnership and not to transactions between the partners." Sec. 1.736-1(a)(1)(i), Income Tax Regs. See also *Karan v. Commissioner*, 319 F.2d 303, 307 (7th Cir. 1963), *affg.* a Memorandum Opinion of this Court; *Smith v. Commissioner*, 313 F.2d 16, 19 (10th Cir. 1962), *affg.* 37 T.C. 1033 (1962); *Charles F. Phillips*, 40 T.C. 157, 161 (1963); 1 Willis, Partnership Taxation, sec. 46.01, p. 606 (2d ed. 1976).¹⁰

¹⁰ Although the agreement made a specific allocation for goodwill, capital gains treatment under sec. 736(b)(2)(B) would still not be possible, even if that agreement were not later superseded, because sec. 736 is inapplicable to this sale between partners. Furthermore, even if sec. 736 were applicable, the Consultant Contract, which was adopted, does not make any reference to goodwill, and the partnership did not operate under a written agreement: no operative written partnership agreement specifying payments for goodwill thus existed. Sec. 736(b)(2)(B) would therefore still be inapplicable. See *V. Zay Smith*, 37 T.C. 1033, 1037 (1962), *affd.* 313 F.2d 16 (10th Cir. 1962).

⁵⁵¹⁴ Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. Code § 736 does not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Reg. § 1.736-1(a)(1)(i). A partner retires when that person ceases to be a partner under local law. However, for partnership income tax purposes, a retired partner or a deceased partner's successor will be treated as a partner until such partner's interest in the partnership has been completely liquidated. Reg. § 1.736-1(a)(1)(ii). Thus, if one of the members of a two-person partnership retires or dies and the retiring member or deceased member's estate is to receive Code § 736 payments, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's or deceased member's estate's entire interest is liquidated, since the retiring partner or deceased member's estate continues to hold a partnership interest in the partnership until that time. Reg. § 1.736-1(a)(6).

⁵⁵¹⁵ For whether such payments are subject to self-employment tax, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

⁵⁵¹⁶ Reg. § 1.736-1(a)(4). The retiring partner might like (if credits are passed through) or dislike (if nondeductible expenses increase taxable income) this result.

choose to apply Code § 736(b) so that they are nondeductible to the partnership (although possibly depreciated or amortized) and gain to the partner.⁵⁵¹⁷

In analyzing the discussion below, note that one must be careful in relying on the regulations, which were last amended before P.L. 103-66 was enacted in 1993. The legislative history to 1993 changes to Code § 736 provides:

In general.

The bill generally repeals the special treatment of liquidation payments made for goodwill and unrealized receivables. Thus, such payments would be treated as made in exchange for the partner's interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent. The bill does not change present law with respect to payments made to a general partner in a partnership in which capital is not a material income-producing factor. The determination of whether capital is a material income-producing factor would be made under principles of present and prior law [e.g., sections 401(c)(2) and 911(d) of the Code and old section 1348(b)(1)(A) of the Code]. For purposes of this provision, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual. The practice of his or her profession by a doctor, dentist, lawyer, architect, or accountant will not, as such, be treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in the physical plant constituting the office from which such individual conducts his or her practice so long as such capital investment is merely incidental to such professional practice. In addition, the bill does not affect the deductibility of compensation paid to a retiring partner for past services.

Unrealized receivables.

The bill also repeals the special treatment of payments made for unrealized receivables (other than unbilled amounts and accounts receivable) for all partners. Such amounts would be treated as made in exchange for the partner's interest in partnership property. Thus, for example, a payment for depreciation recapture would be treated as made in exchange for an interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent.

The comment about unrealized receivables – particularly recapture of depreciation for not only Code § 1245 property but also Code § 1250 property – is quite important. Generally, when selling a partnership interest, sale proceeds are reclassified as ordinary income to the extent attributable to that property and many other types of property. See part II.Q.8.b.i.(g) Code § 751

⁵⁵¹⁷ Except to the extent Code § 751(b) applies (see part II.Q.8.b.i.(g) Code § 751 – Hot Assets), the amount of any gain or loss with respect to such payments is determined under Code § 731. Reg. § 1.736-1(b)(6). However, where the total of such payments is a fixed sum, the seller may elect (in the seller's tax return for the first taxable year for which the seller receives such payments), to report and to measure the amount of any gain or loss by the difference between the amount treated as a distribution under Code § 736(b) in that year, and the portion of the partner's adjusted basis that bears the same proportion to the partner's total adjusted basis for the partner's partnership interest as the amount distributed under Code § 736(b) in that year bears to the total amount to be distributed under Code § 736(b). *Id.*

– Hot Assets. However, the scope of items subject to that ordinary income recharacterization is dramatically reduced in a Code § 736 redemption.⁵⁵¹⁸

Regarding payments for past services, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner, regarding when such payments are not subject to self-employment tax.

Code § 736 prevails over the rules of Code § 1001 that normally govern sales.⁵⁵¹⁹ For further discussion, see part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

We will see below that generally a Code § 736(b) payment is taxed under Code § 731(a), so one might wonder how important it might be to be within the scope of Code § 736. Part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially the text accompanying fns. 5547-5550, explains why Code § 736 treatment can be extremely important.

Further below, a brief discussion illustrates why a partner whose interest is being redeemed would generally prefer Code § 736(a) treatment, even though at first glance it would seem that the retiring partner would prefer Code § 736(b) treatment, because capital gains rates are lower than ordinary income rates.

II.Q.8.b.ii.(b). Flexibility in Choosing between Code § 736(a) and (b) Payments

Before explaining this counter-intuitive rule, let's discuss the flexibility allowed. Within certain limits, the redemption agreement can provide that as much or as little of the redemption payments receive treatment under Code § 736(a) or (b).⁵⁵²⁰ However, Code § 736(b) payments

⁵⁵¹⁸ See text accompanying fns 5489-5499 in part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵⁵¹⁹ The first sentence of Reg. § 1.1001-1(a) says, “**Except as otherwise provided in subtitle A of the Code**, the gain or loss realized from the conversion of property into cash, or from the exchange of property for other property differing materially either in kind or in extent, is treated as income or as loss sustained.” (emphasis added)

⁵⁵²⁰ Reg. § 1.736-1(b)(5)(iii). For what constitutes an agreement designating payments, see *Commissioner v. Jackson Investment Company*, 346 F.2d 187 (9th Cir. 1965), *rev'g* 41 T.C. 675 (reviewed decision 1964 holding that a withdrawal agreement was not given effect under Code § 736 as it did not constitute a partnership agreement); the Tax Court seems to have abandoned its decision in *Jackson Investment Company* in other Circuits as well – see *Spector v. Commissioner*, T.C. Memo. 1982-433, characterizing *Jackson Investment Company* as involving an ambiguous provision. If an agreement between all the remaining partners and the withdrawing partner or his successor in interest does not designate payments, then, subject to the limits described further below, Reg. § 1.736-1(b)(5)(i), (ii) provide the following:

If a fixed amount (whether or not supplemented by any additional amounts) is to be received over a fixed number of years, the portion of each payment to be treated as a distribution under section 736(b) for the taxable year shall bear the same ratio to the total fixed agreed payments for such year (as distinguished from the amount actually received) as the total fixed agreed payments under section 736(b) bear to the total fixed agreed payments under section 736(a) and (b). The balance, if any, of such amount received in the same taxable year shall be treated as a distributive share or a guaranteed payment under section 736(a)(1) or (2). However, if the total amount received in any one year is less than the amount considered as a distribution under section 736(b) for that year, then any unapplied portion shall be added to the portion of the payments for the following year or years which are to be treated as a distribution under section 736(b). For example, retiring partner W who is entitled to an annual payment of \$6,000 for 10 years for his interest in partnership property, receives only \$3,500 in 1955. In 1956, he receives \$10,000. Of this amount \$8,500 (\$6,000 plus \$2,500 from 1955) is treated as a distribution under section 736(b) for 1956; \$1,500, as a payment under section 736(a).

cannot exceed the fair market value of the withdrawing partner's share of the partnership property;⁵⁵²¹ therefore, Code § 736(a) must apply to such excess.

Except as discussed below, Code § 736(b) payments cannot be for (and therefore Code § 736(a) must apply to) the partnership's:

- Unrealized receivables;⁵⁵²²
- Goodwill, except to the extent that the partnership agreement provides for a payment with respect to goodwill.

The above limitation on what constitutes Code § 736(b) payments means that such payments must be classified as Code § 736(a) payments. It does not mean that such payments are the only types of payments that can be classified as Code § 736(a) payments instead of Code § 736(b) payments.⁵⁵²³

However, starting in 1993, payments for unrealized receivables and goodwill are eligible for Code § 736(a) treatment only if capital is not a material income-producing factor for the partnership and the retiring or deceased partner was a general partner in the partnership.⁵⁵²⁴ The regulations have not been updated to take into account this rule. In applying this rule, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual.⁵⁵²⁵ The professional practice of a doctor, dentist, lawyer, architect, or accountant is not treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in the physical plant constituting the office from which such individual conducts that practice if the capital investment is merely incidental to such professional practice.⁵⁵²⁶

Code § 736(a) payments are available for payments in the form of mutual insurance not determined by reference to any partnership asset,⁵⁵²⁷ payments of compensation to a retired

If the retiring partner or deceased partner's successor in interest receives payments which are not fixed in amount, such payments shall first be treated as payments in exchange for his interest in partnership property under section 736(b) to the extent of the value of that interest and, thereafter, as payments under section 736(a).

Whether a Code § 754 election is in effect or is deemed to be in effect might affect whether undesignated payments are 736(a) or 736(b) payments. McBride, *Alice's Estate in the Wonderland of Subchapter K*, *Tax Notes* 2/23/2009, pages 971-980.

⁵⁵²¹ Reg. § 1.736-1(b)(5)(iii).

⁵⁵²² Code § 736(b)(2)(A). Unrealized receivables include the right to payments for (1) goods delivered, or to be delivered, to the extent the proceeds would be treated as amounts received from the sale or exchange of property other than a capital asset, or (2) services rendered, or to be rendered. Code § 751(c), which is further described in part II.Q.8.b.i.(g) Code § 751 – Hot Assets. However, for purposes of Code § 736, they do not include other items that Code § 751 would normally treat as unrealized receivables. See text accompanying fns. 5488-5499.

⁵⁵²³ Reg. § 1.736-1(b)(3) provides a ceiling on payments for goodwill, not a floor under which they may not be lowered. *Tolmach v. Commissioner*, T.C. Memo. 1991-538.

⁵⁵²⁴ Code § 736(b)(3).

⁵⁵²⁵ See part II.Q.8.b.ii.(a) Introduction to Code § 736.

⁵⁵²⁶ See part II.Q.8.b.ii.(a) Introduction to Code § 736.

⁵⁵²⁷ Reg. § 1.736-1(a)(2).

partner for past services,⁵⁵²⁸ and perhaps a portion⁵⁵²⁹ of payments where capital is a material income-producing factor.⁵⁵³⁰

If and to the extent that goodwill would not be eligible for Code § 736(a) treatment, consider how one would measure goodwill. For example, if the retiring partner was undercompensated for prior services before the company reached its full potential or for any other reason, payments could be allocated to past services.

If none of the above works around the inability to apply Code § 736(a) to goodwill, consider doing a partial redemption instead of a complete termination. Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership.⁵⁵³¹ Instead, provide a preferred interest in the partnership's profits up to a certain limit. Generally, reallocating profits between partners is not a taxable event.⁵⁵³²

II.Q.8.b.ii.(c). Comparing Code § 736(a) with (b) Strategically

See the example in part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis. The "Capital Gains to Seller" scenario corresponds to part II.Q.1.a.i.(d) S Corporation Double Taxation, which corresponds to Code § 736(b) payments, and the "Ordinary Income to Seller" scenario corresponds to part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill, which corresponds to Code § 736(a) payments. The contrast between these scenarios is illustrated in part II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill.

Main Points

1. Using a capital gain Code § 736(b) scenario, taxes consume much more to the parties as a whole than would the ordinary income Code § 736(a) scenario in meeting the targeted payments of "principal." Thus, the ordinary income scenario provides more money available to buy out the seller and ease the stress of the buy-out.
2. To compensate the seller for a higher ordinary income tax rate, the seller must receive more to generate the same after-tax flow. Thus, the stated sales price would appear to be higher and more burdensome, although really the buyer is better off because deducting the payments saves more than the additional purchase price cost.
3. In the § 736(a) scenario, increases in ordinary income tax rates harm the seller disproportionately, although it might be possible for the buyer to agree to pay seller more because the buyer saves more tax by making those additional payments. On the other hand, in a capital gain scenario, an increase in capital gain rates without a corresponding increase in ordinary income rates would not help the buyer save as much tax by paying the seller more.

⁵⁵²⁸ See part II.Q.8.b.ii.(a) Introduction to Code § 736.

⁵⁵²⁹ If the partners have agreed that the value of the Code § 736(b) payments is not to exceed a certain amount that is below fair market value, the remainder would be Code § 736(a) payments.

⁵⁵³⁰ Banoff, More on Section 736(a) Payments After RRA '93 Changes, 83 *Journal of Taxation* 191 (Sept. 1995).

⁵⁵³¹ See fn. 5514.

⁵⁵³² See part II.C.6 Shifting Rights to Future Profits.

4. Code § 736(a) requires a complete liquidation in the redeemed partner's interest.⁵⁵³³ However, the complete redemption may be made over time, and Code § 736 does not terminate the partnership, even if only one owner is left (but Code § 736 does not prevent termination if the partnership ceases activity).⁵⁵³⁴ If the partnership assumes the partner's share of liabilities, it cannot deduct the payment of those liabilities under Code § 736 later than the year in which the partner's relationship with the partnership terminated,⁵⁵³⁵ the liabilities are treated as relieved (and therefore cash is deemed paid) when the withdrawing partner is no longer a partner (ignoring the Code § 736 deemed continuation).⁵⁵³⁶
5. The above treatment does not apply to the extent that the LLC is repaying the seller's capital account, to the extent that the seller's capital account would be the LLC's earnings that are

⁵⁵³³ Reg. § 1.736-1(a)(1)(i).

⁵⁵³⁴ Rev. Rul. 75-154 involved the following facts:

ABC partnership was formed in 1968 to conduct a management consulting business. Under the terms of the partnership agreement, upon retirement, the retiring partner was entitled to receive, in addition to amounts paid for his interest in partnership property, a specified amount payable in monthly installments over a three-year period following his retirement. There was no provision in the partnership agreement with respect to the payment to a retiring partner for goodwill.

Partner C retired on January 2, 1972, and received 12 monthly payments from the partnership during 1972. On January 2, 1973, all of the business and financial activities of the partnership ended and A and B withdrew from the business. The former partners, A and B, assumed their share of the remaining liability to C and made the required payments for the years 1973 and 1974.

The ruling analyzed and held:

Section 1.736-1(a)(6) of the Income Tax Regulations provides, in part, that a retiring partner or a deceased partner's successor in interest receiving payments under section 736 of the Code is regarded as a partner until the entire interest of the retiring or deceased partner is liquidated.

Therefore, if one of the members of a 2-man partnership retires under a plan whereby he is to receive payments under section 736, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's entire interest is liquidated, since the retiring partner continues to hold a partnership interest in the partnership until that time.

Section 1.736-1(a)(6) of the regulations prevents the termination of a partnership under section 708 of the Code, only in those situations in which the partnership would otherwise be terminated because of the withdrawal of a retiring or a deceased partner who is entitled to receive payments under section 736(a)(2). However, in the instant case, section 1.736-1(a)(6) of the regulations does not prevent the termination of the partnership under section 708, even though C was receiving liquidating payments under section 736(a)(2). It was the withdrawal of A and B that caused the partnership to terminate, not C's prior retirement.

Accordingly, the partnership did not continue to exist under section 736 of the Code, but terminated under section 708 when partners A and B discontinued the financial operation of the partnership and withdrew from the business.

It has been previously held that payments that would have been deductible by a partnership had it continued in existence were deductible by the former partners after termination of the partnership. See *Flood v. United States*, 133 F.2d 173 (1st Cir. 1943).

Thus, in the instant case, after the partnership terminated, payments made by former partners A and B, in satisfaction of the liability to retired partner C, are deductible by them as trade or business expenses under section 162(a) of the Code in the year paid, since the payments would have been deductible by the partnership if it had not terminated. Furthermore, the payments to C are includible in C's gross income under section 61(a) in the year received.

⁵⁵³⁵ *Whitman & Ransom v. Commissioner*, T.C. Memo. 2005-172.

⁵⁵³⁶ See Reg. § 1.736-1(b)(7), Example (1), implementing Reg. § 1.736-1(a)(2) (treating assumption of liabilities treated as a distribution of money under Code § 752 in applying Code § 736).

allocated to the seller but not distributed. The seller would not be taxed on such distributions, because they were taxed when originally earned.

6. Combined with a Code § 754 election, a Code § 736(b) payment would generate a separate basis for each asset whose basis is adjusted, and each year a new set of assets would be created.⁵⁵³⁷ Rather than try to recover that tax benefit, a Code § 736(a) is an easier way for the remaining partners to avoid tax on earnings used to buy the redeemed partner.
7. A partnership might be structured with profits interests that shift over time, which might achieve results similar to that of Code § 736 without the partner completely retiring. For example, suppose an older partner brought in a lot of business, but the agreement would be that the younger partners would take over the business after a number of years. The partnership might be structured to give the older partner a larger profits interest in early years and a smaller profits interest in later years. Generally, merely shifting interests in future profits is not a taxable event.⁵⁵³⁸ The objective would be to structure it not as a sale, but rather as an allocation of profits related to the business each partner generates and the services each partner performs.
8. A technique similar to Code § 736 ordinary income payments used to be available to corporations in some situations. If the corporation could make a case that the departing shareholder was under-compensated for prior services, the corporation would pay compensation to him or her, with economic results similar to that of Code § 736 ordinary income payments. Code § 409A has made that strategy more difficult to use, imposing a 20% penalty on deferred compensation to the extent substantially vesting occurs after December 31, 2004, unless the statute's strict requirements are satisfied. To use deferred compensation payments based on prior services, the parties would need to prove that it is fair to compensate the selling owner-employee for prior services even though the employer was previously not legally obligated to do so. The sooner one plans for this future compensation, the easier it will be to prove reasonableness, since the owner-employee will be earning the compensation over time in a manner that is specifically referred to as an incentive for continued efforts. A challenge is that an appropriate level of compensation may be difficult to determine many years in advance of a sale.

Additional Code § 736 Issues

As discussed above, to the extent permitted by law, generally:

- Returns of basis should be structured as Code § 736(b) payments, because the seller is not taxed on them, and
- Profit on the sale of a partnership should be structured as Code § 736(a) payments, and the sale price should be increased at least enough to compensate the seller for paying taxes at ordinary income and self-employment and similar tax rates instead of any applicable capital gain rates.

⁵⁵³⁷ See the paragraph of text accompanying fn. 5568 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

⁵⁵³⁸ See part II.C.6 Shifting Rights to Future Profits.

II.Q.8.b.ii.(d). Comparing Code § 736(b) to an Installment Sale

Suppose one partner is exiting and being bought out over time, and one or more remaining partners will have higher interests in profits and losses. Should it be structured as a sale from one partner to another, or should the partnership redeem the exiting partner? If the latter, should the partnership issue a note to the partner?

In many cases, the partnership should redeem the exiting partner, documented by the partnership agreement without a separate promissory note. Code § 736 redemptions of a retiring partner are often better than an installment sale; and issuing a note might move the transaction into an unclear tax posture, whereas relying solely on the partnership agreement avoids certain questions. Merely shifting the right to future profits would not generate an income tax consequence,⁵⁵³⁹ however, shifting a partner's capital account and any gain or loss inherent in that partner's share of the partnership's existing value would have income tax consequences. We have already seen how Code § 736(a) payments tend to work better for the partnership's value relating to goodwill;⁵⁵⁴⁰ the rest of this part II.Q.8.b.ii.(d) discusses all components of value in a general sense.

Code § 736 taxes the retired partner on Code § 736 payments as if the retired partner were still a partner;⁵⁵⁴¹ complete liquidation of a partner's interest does not occur until no more payments may be made to the withdrawn partner.⁵⁵⁴² Code § 736(a) payments are taxed in the year for which they are made, rather than in the year of receipt.⁵⁵⁴³ Furthermore, except to the extent Code § 751(b) applies, the amount of any gain or loss with respect to payments under Code § 736(b) for a retiring or deceased partner's interest in property for each year of payment is determined under Code § 731.⁵⁵⁴⁴

Code § 736 redemptions do not appear to contemplate the installment sale rules applying. If Code § 736 applies instead of the installment sale rules applying, then, rather than pro rating basis among the scheduled installment payments the way an installment sale would work, basis is applied fully to the earliest payments until it is used up. Thus, Code § 736 payments defer recognition of gain on sale relative to installment sales, a benefit that is not present in the sale of stock in a C or an S corporation; it also allows distributions to be applied to the partner's entire basis in the partnership,⁵⁵⁴⁵ whereas distributions to shareholders are applied pro rata to their

⁵⁵³⁹ See part II.C.6 Shifting Rights to Future Profits.

⁵⁵⁴⁰ See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, especially parts II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill and II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill.

⁵⁵⁴¹ Reg. § 1.736-1(a)(6). Although a partner retires when he ceases to be a partner under local law, a retired partner or a deceased partner's successor will be treated as a partner for partnership income tax purposes (subchapter K, chapter 1 of the Code) until the partner's interest in the partnership has been completely liquidated. Reg. § 1.736-1(a)(1)(ii). Does this continuation of treatment as a partner apply for purposes of the income in respect of a decedent rules of Code § 1014(c), which is found in subchapter O of chapter 1 of the Code? See part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411.

⁵⁵⁴² *Brennan v. Commissioner*, T.C. Memo, 2012-209 (citing Reg. § 1.761-1(d) and imposing a negligence penalty for failure to report the partner's distributive share of income earned before the partner received the final payment), *aff'd* 116 A.F.T.R.2d 2015-6569 (9th Cir. 2015).

⁵⁵⁴³ Reg. § 1.736-1(a)(5).

⁵⁵⁴⁴ Reg. § 1.736-1(b)(6).

⁵⁵⁴⁵ See part II.Q.8.e.ii.(a) Unitary Basis.

shares and are taxed according to the basis in each block of shares,⁵⁵⁴⁶ perhaps heightening the impact of deferred basis recovery for those sales that are redemptions recharacterized as distributions.

The installment sale of a partnership interest can be particularly disastrous if the partnership has significant “hot assets,” which can include not only inventory and accounts receivable but also depreciable property,⁵⁵⁴⁷ because income from those items is taxable immediately – even if it exceeds the amount that the seller received up front.⁵⁵⁴⁸ However, depreciable property and certain other property⁵⁵⁴⁹ are not “hot assets” when applying Code § 736.⁵⁵⁵⁰ Also, when a partnership redeems a partnership interest and the redeemed partner is allocated ordinary income from hot assets, the remaining partners receive basis in those hot assets.⁵⁵⁵¹ This contrasts with S corporations, where the remaining shareholders report ordinary income on corresponding items.⁵⁵⁵²

Not all redemptions qualify for Code § 736 treatment – they need to be “in liquidation of the interest of a retiring partner or a deceased partner.”⁵⁵⁵³ If a Code § 736 payment obligation is evidenced as a promissory note rather than contract right, do the installment sale provisions apply when the partner receives the note?⁵⁵⁵⁴ The amounts paid for his interest in assets are treated in the same manner as a distribution in complete liquidation under Code §§ 731, 732, and, where applicable, 751.⁵⁵⁵⁵

⁵⁵⁴⁶ See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially fn. 5118.

⁵⁵⁴⁷ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵⁵⁴⁸ See part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests, especially fn. 5677.

⁵⁵⁴⁹ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets, especially fns. 5490-5497.

⁵⁵⁵⁰ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets, especially fn. 5488.

⁵⁵⁵¹ Reg. § 1.751-1(g), Example (2), paragraph (e)(1).

⁵⁵⁵² See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

⁵⁵⁵³ Code § 736(a), (b)(1). Reg. § 1.736-1(a)(1)(i) elaborates:

Section 736 and this section apply only to payments made to a retiring partner or to a deceased partner’s successor in interest in liquidation of such partner’s entire interest in the partnership. See section 761(d). Section 736 and this section do not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Section 736 and this section apply only to payments made by the partnership and not to transactions between the partners. Thus, a sale by partner A to partner B of his entire one-fourth interest in partnership ABCD would not come within the scope of section 736.

⁵⁵⁵⁴ See Kim and Saunders, Redeeming a Partner with The Partnership’s Note, *TM Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740).

⁵⁵⁵⁵ Reg. § 1.736-1(a)(2), which also refers to Reg. § 1.751-1(b)(4)(ii). Reg. § 1.751-1(b)(4)(ii) provides: Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner’s successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner’s successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other property. Thus, payments to a retiring partner or to a deceased partner’s successor in interest under section 736 must first be divided between payments under section 736(a) and

Neither Code § 731 nor Code § 732 nor the regulations under either statute address the effect of distributing a note in which the partnership is the maker. For purposes of maintaining capital accounts, generally distributions of notes do not count as distributions except to the extent that the partner disposes of or the partnership repays the note, but a distribution of a note will count as a distribution if the note is readily tradable on an established securities market,⁵⁵⁵⁶ is negotiable,⁵⁵⁵⁷ or perhaps if it is payable upon demand.⁵⁵⁵⁸ However, a leading treatise strongly opposes counting a note in which the partnership is the maker, whether or not negotiable, as a distribution,⁵⁵⁵⁹ the treatise does, suggest, however, reducing the basis available to allocate to

section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736-1.

However, the scope of unrealized receivables is narrower under Code § 736 than on other transactions involving hot assets; see part II.Q.8.b.i.(g) Code § 751 – Hot Assets, especially the text accompanying fn. 5488.

⁵⁵⁵⁶ In addition to Reg. § 1.704-1(b)(2)(iv)(e)(2) that is reproduced in fn. 5557, consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms or any other arrangement, is readily ... exchangeable for, money or marketable securities) and 731(c)(2)(C) (The term ‘financial instrument’ includes ... evidences of indebtedness ...) treat a distribution of publicly traded debt as a cash distribution.

⁵⁵⁵⁷ Reg. § 1.704-1(b)(2)(iv)(e)(2) provides:

Distribution of promissory notes. Notwithstanding the general rule of paragraph (b)(2)(iv)(b)(5), except as provided in this paragraph (b)(2)(iv)(e)(2), if a promissory note is distributed to a partner by a partnership that is the maker of such note, such partner’s capital account will be decreased with respect to such note only when there is a taxable disposition of such note by the partner or when the partnership makes principal payments on the note. The previous sentence shall not apply if a note distributed to a partner by a partnership who is the maker of such note is readily tradable on an established securities market. Furthermore, the capital account of a partner whose interest in a partnership is liquidated will be reduced to the extent of (i) the fair market value, at the time of distribution, of any negotiable promissory note (of which such partnership is the maker) that such partnership distributes to the partner on or after the date such partner’s interest is liquidated and within the time specified in paragraph (b)(2)(ii)(b)(2) of this section, and (ii) the fair market value, at the time of liquidation, of the unsatisfied portion of any negotiable promissory note (of which such partnership is the maker) that such partnership previously distributed to the partner. For purposes of the preceding sentence, the fair market value of a note will be no less than the outstanding principal balance of such note, provided that such note bears interest at a rate no less than the applicable federal rate at time of valuation.

⁵⁵⁵⁸ Consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms ... is readily convertible into, or exchangeable for, money) and 731(c)(2)(C) (The term ‘financial instrument’ includes ... evidences of indebtedness ...) treat a distribution of a demand note as a cash distribution.

⁵⁵⁵⁹ McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons (footnotes omitted):

Treating even a secured negotiable promissory note of the partnership as cash or a cash equivalent, the distribution of which triggers gain under § 731(a), would be inconsistent with the statutory scheme of Subchapter K because a § 754 election by the partnership would permit the partnership to increase the basis of its assets as the result of the distribution of zero-basis property. Similarly, treating a partnership’s promissory note as property for purposes of applying §§ 731 and 732 also would produce results totally inconsistent with the Subchapter K scheme. Property characterization in connection with a current distribution would give the note a zero basis in the distributee-partner’s hands under § 732(a)(1) because it would have a zero basis in the partnership’s hands immediately prior to the distribution. Subsequent payments on the note would have to be treated as payments rather than distributions; the expenditure of partnership assets with no corresponding overall impact on the bases of the partners’ interests would destroy

other distributed assets by the amount of payments expected to be made.⁵⁵⁶⁰ Issuing a formal note creates much complexity and uncertainty,⁵⁵⁶¹ so one might consider keeping the payment right a contract right not reduced to a note. On the other hand, using a note and installment sale treatment would enable a cleaner break between the redeemed partner and the partnership and simplify inside basis step up issues (fn. 5568). The clean break from the partnership allows the retiring partner not to be treated as a partner any more for income tax purposes⁵⁵⁶² but also locks in the installment sale gain as income in respect of a decedent, the latter making the installment obligation ineligible for a basis step-up at death, whereas mere Code § 736(b) installments appear eligible for a basis step-up at death.⁵⁵⁶³

the symmetry between the partnership's basis in its assets and the partners' bases in their interests, which Subchapter K strives to preserve. Similarly, if a partnership note were treated as property distributed as the sole consideration for the liquidation of a partner's entire interest in the partnership, it would take on a basis equal to the distributee-partner's basis in his interest. If a § 754 election were in effect, the partnership would be required to reduce the basis of its retained assets under § 734(b)(2)(B) by the amount of the distributee-partner's post-distribution basis in the note. By contrast, a cash distribution in the amount of the note would produce an increase in the basis of partnership assets if the cash distributed exceeded the distributee-partner's predistribution basis in his interest. A partnership note should thus not be treated as property under §§ 731 and 732, either. Payments on the note should be treated as distributions of cash, subject to all the rules applicable to such distributions.

⁵⁵⁶⁰ McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons in a footnote:

See Reg. § 1.732-1(b) (Where a partnership distributes property (other than money) in liquidation of a partner's entire interest in the partnership, the basis of such property to the partner shall be an amount equal to the adjusted basis of his interest in the partnership reduced by the amount of any money distributed to him *in the same transaction*. (emphasis added)). The reference to the same transaction should be interpreted to refer to the entire series of liquidating distributions in order to be consistent with the Regulations § 1.761-1(d) definition of liquidation. Further, any other interpretation of Regulations § 1.732-1(b) would make the timing of liquidating distributions a key ingredient in determining the basis of distributed property, and would allow taxpayers to artificially inflate the basis of property distributed in liquidation by agreeing to defer cash distributions. For example, assume a partner, whose basis of his interest is \$10,000, is to receive \$4,000 cash and a capital asset in liquidation of his interest. Under the interpretation suggested in the text, the distributed capital asset will have a basis of \$6,000 to the partner regardless of the order in which the distributions are made. If subsequent cash distributions are not taken into account in computing the basis of the distributed capital asset, the capital asset will take a basis of \$10,000 if it is distributed first and the \$4,000 cash distribution will be taxable when received, a combination that would allow the distributee to accelerate losses (by selling the distributed capital asset) in exchange for a deferred gain on the eventual receipt of the cash.

⁵⁵⁶¹ See Cuff, Distributions of Promissory Notes In Liquidation of a Partner's Interest, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (1st Qtr. 2006) (capital accounting for promissory note distributions to a partner, allocations with respect to contributed property, allocations after a book-up of partnership assets, the minimum gain chargeback, the qualified income offset, unrecovered Code § 1250 gain, allocation of partnership liabilities, and collapsible partnerships); Cuff, Promissory Notes In Liquidation of a Partner's Interest Still Hold Questions, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (2nd Qtr. 2006) (considering the interplay of the rules described in the 1st Qtr. Article, and the rules on disguised sales and collapsible partnerships).

⁵⁵⁶² See fns. 5541-5542.

⁵⁵⁶³ See fns. 5566 and 5567 and part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

One might also be cautious when admitting a partner and redeeming a partner close in time to each, lest the IRS argue a disguised sale between the retiring partner and the new partner.⁵⁵⁶⁴

Letter Ruling 8304059 assumed that using a promissory note to redeem a partner does not necessarily take the transaction out of Code § 736 and ruled that any interest paid constitutes a Code § 707(c) guaranteed payment and that Reg. §§ 1.267(b)-1(b) and 1.707-1(c) prevent Code § 267 from limiting the timing of the interest deduction. Although a Code § 736 payment may bear interest, it need not.⁵⁵⁶⁵ For details on Code § 707(c), see part II.C.8.a Code § 707 -

⁵⁵⁶⁴ See Kim and Saunders, Redeeming a Partner with The Partnership's Note, *TM Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740). Announcement 2009-4 stated:

Until new guidance is issued, any determination of whether transfers between a partner or partners and a partnership is a transfer of a partnership interest will be based on the statutory language, guidance provided in legislative history, and case law.

Announcement 2009-4 looks askance at a couple of cases in this area, which cases are discussed in the Kim and Saunders article but which might control, notwithstanding the IRS' view. Announcement 2009-4 stated:

Section 707(a)(2)(B) provides that, under regulations prescribed by the Secretary, if transfers of property between a partner or partners and a partnership, when viewed together, are properly characterized as a sale or exchange of property, such transfers shall be treated as either transactions between the partnership and one who is not a partner or between two or more partners acting other than in their capacity as partners. The legislative history of section 707(a)(2)(B) indicates the provision was adopted as a result of Congressional concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by related partnership distributions. See H.R. Rep. No. 861, 98th Cong. 2nd Sess. 861 (1984), 1984-3 (Vol. 2) CB 115. Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases that were economically indistinguishable from sales of property to a partnership or another partner, and believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See H.R. Rep. No. 432, 98th Cong. 2nd Sess. 1218 (1984) (H.R. Rep.), and S. Prt. No. 169 (Vol. I), 98th Cong. 2nd Sess. 225 (1984) (S. Prt.) (discussing *Communications Satellite Corp. v. United States*, 625 F.2d 997 (Ct. Cl. 1980), and *Jupiter Corp. v. United States*, 2 Cl. Ct. 58 (1983), both of which involved disguised sales of a partnership interest).

⁵⁵⁶⁵ Garlock, ¶1308 Debt Contributed To And Distributed From Partnerships, *Federal Income Taxation of Debt Instruments* (CCH), asserts in ¶1308.02 Distributions of Debt Instruments from Partnerships, [B] Debt of the Partnership:

...The real issue, then, is whether interest will be imputed on partnership notes to partners that do not bear adequate stated interest. As noted above, the better view is that interest should not be imputed.

If a partnership's note distributed to a partner is respected for all tax purposes, and if the partner's interest in the partnership is not reduced as a result of the distribution (as would be the case in a situation involving a pro rata distribution of notes to all partners), the determination of its issue price is unclear. The note is not issued for cash or property because the partner is not giving anything to the partnership in exchange for the note. There is no partnership analogue to section 1275(a)(4), which deems a corporation's note distributed to a shareholder as being issued in exchange for property. Hence, section 1273(b) does not provide any rule for determining the note's issue price.²⁵⁸ Reg. § 1.1273-2(d)(1), which is broader than the corresponding statutory rule, effectively treats any debt instrument not issued for money or publicly traded property or subject to section 1274 as having an issue price equal to its stated redemption price.

If the debt distributed provides for qualified stated interest (QSI), then its stated redemption price at maturity equals its stated principal amount and little is at stake here. The stated interest is respected as interest, and the stated principal amount is respected as principal. Even if the interest is at a rate below the AFR (or is zero), no interest is imputed under section 1274 because

Compensating a Partner for Services Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

It appears that a basis adjustment would apply at the retiring partner's death, which might eliminate a considerable part of the gain to be recognized on future installments (to the extent that gain is not attributable to the deceased partner's share of items constituting income in respect of a decedent)⁵⁵⁶⁶ and might also lead to depreciation and goodwill amortization deductions.⁵⁵⁶⁷ Thus, installment sales lock in gain as income in respect of a decedent, whereas Code § 736 payments appear eligible for a basis step-up. A partnership agreement might even convert Code § 736(a) payments to Code § 736(b) payments upon death, perhaps reducing the installments to take into account the smaller tax burden imposed on the seller.

Suppose that the partnership agreement provided for a Code § 736(b) payment with respect to goodwill. Each Code § 736(b) installment would give rise to a new goodwill asset that could be amortized over 180 months.⁵⁵⁶⁸ Thus, the parties could get some tax arbitrage by the buyer getting ordinary deductions over 15 years when the seller gets capital gain, but query what the time value of money would be like in a business deal, which generally requires a faster payback. If assets have a faster depreciation period but the number of assets to track is high, consider abandoning the use of Code § 736(b) payments and simply using Code § 736(a); see part II.Q.8.b.ii.(c) Comparing Code § 736(a) with (b) Strategically.

the debt was not issued in exchange for property and no interest is imputed under section 7872 because a loan from a partnership to a partner is not one of the categories of loans subject to that section, absent regulations treating the loan as a significant tax effect loan.²⁵⁹ The only real problem arises if the debt provides for stated interest that is not QSI. Because all payments other than QSI are included in a debt's stated redemption price at maturity,²⁶⁰ the effect of treating the debt's issue price as being equal to its stated redemption price at maturity would be to recharacterize all stated interest on the debt as principal. It is doubtful that this result was intended. The more sensible rule is to treat the debt instrument as issued for its stated principal amount in this situation.

²⁵⁸ See ¶ 203. Section 1273(b)(1) and (2) apply to debt instruments not issued for property, but the rules in those paragraphs depend on the price at which the instruments were offered for sale or actually sold, and this does not apply in the present case. Section 1273(b)(4) is generally the rule that applies if no other rule applies (and it deems the issue price to be equal to the stated redemption price at maturity), but it only applies to debt issued for property.

²⁵⁹ See ¶ 402.02.

²⁶⁰ See ¶ 202.01.

⁵⁵⁶⁶ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000, fn. 5704.

⁵⁵⁶⁷ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000, especially fn. 5706.

⁵⁵⁶⁸ Reg. § 1.734-1(e)(1), referred to by McKee, Nelson & Whitmire, ¶25.02. Allocations of Section 734(b) Adjustments to Partnership Assets: Section 755, *Federal Taxation of Partnerships & Partners* (WG&L), interpreting the consequence of Rev. Rul. 93-13, which provides:

If a partnership that has in effect an election to adjust basis under section 754 of the Internal Revenue Code completely liquidates the interest of a partner by agreeing to make a series of cash payments that are treated as distributions under section 736(b)(1), the section 734(b) basis adjustments to partnership property respond in timing and amount with the recognition of gain or loss by the retiring partner with respect to those payments.

If the Code § 736(b) payments were contingent, perhaps Reg. § 1.197-2(f)(2) would apply to amortize the new payments over the remaining months of the 180-month period.

Presumably, this lack of installment sale treatment would allow partnership redemptions to avoid the interest on deferred tax liabilities that Code § 453A imposes on installment sales. A prominent treatise states:⁵⁵⁶⁹

A selling partner who receives deferred payments and reports gain under § 453 may be subject to acceleration of deferred gain under the pledge rule in § 453A(d) and may be required to pay interest on his deferred tax liability under § 453A(c). There are no analogous provisions applicable to deferred distributions to partners whose partnership interests are liquidated under § 736.

The treatise later states:⁵⁵⁷⁰

In general, amounts that are computed like interest and paid to a partner for the use of partnership capital constitute guaranteed payments under § 707(c). Because a retired partner who receives post-retirement liquidation distributions is treated as a continuing partner (and not as a partnership creditor) for Subchapter K purposes until his interest is completely liquidated, it seems that any “interest” paid with respect to deferred § 736(b) distributions should be treated as guaranteed payments to the retired partner for the use of his unreturned capital. This notion is buttressed by the fact that § 736(a)(2) treats all payments “made in liquidation of the interest of a retiring partner” as § 707 guaranteed payments if they are determined without regard to partnership income and are not paid for the retiring partner’s interest in partnership property under § 736(b).

If deferred liquidation payments cannot bear tax-recognized interest, it follows that the imputed interest rules of §§ 483, 1272, and 7872 do not apply to deferred liquidation distributions under § 736. [In other words, deferred payments under Code § 736 should not be recharacterized as part principal and part interest.] From a policy perspective, inapplicability of these rules may not be as offensive as might first appear, since the timing of any tax benefits and burdens of deferred liquidation payments under § 736 are matched. Thus, because deferred liquidation payments are not treated as liabilities, the continuing partners cannot increase the bases of their partnership interests by the amount of deferred payments under § 752(a). In addition, the partnership is entitled to adjust the basis of its assets under § 734(b) only when the deferred payments are actually made and the retired partner actually recognizes gain or loss. Finally, if amounts payable to a retired partner include interest-like payments, such payments constitute § 736(a)(2) payments that will be included in the income of the retired partner at the same time that they are deducted by the partnership under the matched timing rules of § 707(c).

I am not aware of any primary authority addressing the above issue.

⁵⁵⁶⁹ McKee, Nelson & Whitmire, ¶16.02. Transfers of Partnership Interests by Sale or Exchange: Tax Consequences of Liquidations Compared, *Federal Taxation of Partnerships & Partners*.

⁵⁵⁷⁰ McKee, Nelson & Whitmire, ¶22.02[4][c] Interest on Deferred Section 736(b) Payments, *Federal Taxation of Partnerships & Partners*. For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

II.Q.8.b.ii.(e). Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet

Generally, Code § 736(a)(1) payments that are structured as preferred distributions of profits are considered equity and do not affect the entity's net worth.

On the other hand, Code § 736(a)(2) guaranteed payments and Code § 736(b) installment sale payments would be liabilities on the entity's balance sheet. Similarly, in a cross-purchase, the buyers would have liability on their balance sheets (which can also impede the use of guaranties). Finally, deferred compensation agreements, which are the corporate attempt to replicate Code § 736(a)(2) guaranteed payments, would also constitute a liability on the entity's balance sheets.

Liabilities on balance sheets can impede access to credit before and during the buy-out period. That a business is transitioning from the successful founder to new management doesn't help that situation.

Thus, Code § 736(a)(1) payments that are structured as preferred distributions of profits might very help the business' operations relative to the other ways of structuring buyouts.

II.Q.8.b.ii.(f). Planning for the 3.8% Tax on Net Investment Income and Passive Loss Rules When Using Code § 736 Payments

For purposes of the 3.8% tax on net investment income,⁵⁵⁷¹ see part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411.

See also part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736.

II.Q.8.b.ii.(g). Code § 736 Payments as Retirement Income – Possible FICA and State Income Tax Benefits

Compensatory payments to be made for the rest of a partner's life, which generally would be Code § 736(a) payments, might be excluded from FICA but would be subject to Code § 409A. See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

No state may impose income tax on any retirement income of an individual who is not a resident or domiciliary of that state (as determined under that state's laws).⁵⁵⁷² "Retirement income" includes income from a written plan, program, or arrangement that is in effect immediately

⁵⁵⁷¹ See part II.I 3.8% Tax on Excess Net Investment Income.

⁵⁵⁷² 4 U.S.C. § 114(a). Missouri Private Letter Ruling No. LR 3570 (1/2/2007) held that this statute protected the following payments from state income tax:

Applicant is a participant of a Retirement Plan (RP) and is also a participant of an Insurance Plan (collectively, the Plans). The purpose of the Plans is to supplement retirement benefits from the Pension Plan (Pension Plan) and the Retirement Plan for eligible corporate officers in recognition of service to their employer. The administrator of the RP is the Corporation and the administrator of the insurance plan is a committee within the Pension Plan.

....

In this case the Plans are plans or arrangements as described in IRC section 3121(v)(2)(C) and the monthly payments meet the requirements of section 114(b)(1)(I)(i) of Title 4 of the United States Code. Therefore, for purposes of state income tax, the monthly payments from the Plans received by Applicant will be treated as retirement income as defined in section 114(b) of Title 4 of the United States Code.

before retirement begins and provides retirement payments in recognition of prior service to be made to a retired partner,⁵⁵⁷³ if the income is from an excess benefit plan⁵⁵⁷⁴ or if the income is part of a series of substantially equal periodic payments payable at least annually for either the life or life expectancy of the recipient (or the joint lives or joint life expectancies of the recipient and a designated beneficiary of the recipient) or a period of not less than 10 years.⁵⁵⁷⁵

II.Q.8.b.ii.(h). Interaction of Death with Code § 736 Payments

Generally, the retiring partner's payments would consist of:

- Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes as illustrated in the different purchase prices used in parts II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill and II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill, would be paid during the retiring partner's life, and
- Code § 736(b) payments, not grossed up but generally tax-free because the deceased partner's successor in interest has received a basis step-up, would be made after the retiring partner's death.⁵⁵⁷⁶

Perhaps the partnership has life insurance to pay a retired partner. The life insurance is received tax-free (so long as the partnership complies with the rules on employer-owned life insurance, which apply to any 5% partner, whether or not the partner actually works in the business).⁵⁵⁷⁷ Thus, the partnership does not need to deduct payments it makes to the retired partner's beneficiaries. Furthermore, the basis step-up mentioned above, if my assumption is correct, means that there is no capital gain tax for the retired partner's beneficiaries to avoid. Code § 753 denies a basis step-up to Code § 736(a) payments but does not address Code § 736(b) payments, which implies that Code § 736(b) payments receive a basis step-up. Therefore, consider converting Code § 736(a) payments to Code § 736(b) payments when a partner dies, perhaps reducing the payments to take into account that the seller does not need to be grossed up to pay the seller's taxes on the distribution.

⁵⁵⁷³ 4 U.S.C. § 114(b)(4) provides:

For purposes of this section, the term retired partner is an individual who is described as a partner in section 7701(a)(2) of the Internal Revenue Code of 1986 and who is retired under such individual's partnership agreement.

⁵⁵⁷⁴ 4 U.S.C. § 114(b)(1)(I)(ii) refers to:

a payment received after termination of employment and under a plan, program, or arrangement (to which such employment relates) maintained solely for the purpose of providing retirement benefits for employees in excess of the limitations imposed by 1 or more of sections 401(a)(17), 401(k), 401(m), 402(g), 403(b), 408(k), or 415 of such Code or any other limitation on contributions or benefits in such Code on plans to which any of such sections apply.

I have assumed, without verification, that withdrawal from a partnership counts as termination of employment, consistent with the treatment of partners as employees eligible to participate in a qualified retirement plan. Please let me know what you discover when you research this issue.

⁵⁵⁷⁵ 4 U.S.C. § 114(b)(1)(I)(i).

⁵⁵⁷⁶ For the basis step-up, see fns. 5566 and 5567 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

⁵⁵⁷⁷ See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

II.Q.8.b.iii. Partnership Alternative to Seller-Financed Sale of Goodwill

Is goodwill an asset that belongs to the individual owner or to the entity? Where a non-compete agreement is not in place and business is largely attributable to the close personal relationships that the owner has developed and maintained for decades, goodwill belongs to the owner personally.⁵⁵⁷⁸ Where a contract allocates large amounts to the entity's goodwill and the owner enters into a noncompete agreement to preserve the entity's goodwill, the owner's receipt of noncompetition payments is ordinary income rather than the sale of personal goodwill.⁵⁵⁷⁹ Given that the buyer's deductions relating to goodwill are the same as for a noncompetition agreement,⁵⁵⁸⁰ the seller should consider maximizing the extent to which payments directly to the seller are for personal goodwill rather than a covenant not to compete.⁵⁵⁸¹

As a practical matter, often the buyer will be able to pay the promissory note for goodwill only if the business is sufficiently profitable. If the business is not profitable, the seller would need to sue the buyer to enforce the note, and all that lawsuit would accomplish would be a judgment against someone who cannot pay it. The seller's most effective recourse might be to take over the business, which the judgment on the promissory note is unlikely to accomplish without further legal action.

⁵⁵⁷⁸ See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?

⁵⁵⁷⁹ *Muskat v. U.S.*, 554 F.3d 183 (1st Cir. 2009), *aff'g* 101 AFTR 2d 2008-1606 (D.N.H. 2008). When Muskat sold his business to Jac Pac and agreed not to compete, nothing in the contract mentioned that Muskat was selling personal goodwill. The trial court described the negotiations for the sale:

During the negotiation process, the parties were well-aware of Jac Pac's business goodwill, to which more than \$15,000,000 of the purchase price was allocated. Warren testified that he was not aware of any goodwill in the transaction other than Jac Pac's goodwill. The noncompetition agreement defines Goodwill as an asset of Jac Pac including its goodwill and business as a going concern. The purpose of the noncompetition agreement was to protect Jac Pac's Goodwill in the transaction. Muskat acknowledged in the agreement that the noncompetition provisions were necessary to preserve and protect the proprietary rights and the goodwill of [MAC] (including [Jac Pac's goodwill]) and the Related Entities as going concerns. The consideration paid under the agreement was expressly for the covenants not to compete, with no mention of personal goodwill.

The District Court applied First Circuit precedent requiring the taxpayer to produce strong proof before applying tax treatment that varied from the transaction's legal documentation. The First Circuit agreed with the District Court and also clarified what strong proof means: To constitute "strong proof" a taxpayer's evidence must have persuasive power closely resembling the "clear and convincing" evidence required to reform a written contract on the ground of mutual mistake. For a discussion of whether a taxpayer may use substance over form, see also cases cited in fn 5721 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

In *Duffy v. U.S.*, 120 Fed. Cl. 55 (Ct. Fed. Cl. 2015), *aff'd* 117 A.F.T.R.2d 2016-397 (Fed. Cir. 2016), the recipient of proceeds in a settlement in a case for retaliatory firing asserted that the settlement was for personal injury or as compensation for impaired personal goodwill, the latter because he could not find a job because his former employer would not give him a reference. However, the settlement agreement provided that the payment was for the exclusive purpose of avoiding the expense and inconvenience of further litigation. The Court of Claims used that language to throw out the taxpayer's personal injury and goodwill assertions and held for the IRS. The Federal Circuit cited the quoted language and also noted, Mr. Duffy simply extinguished his claims, and any goodwill in his business remained with him.

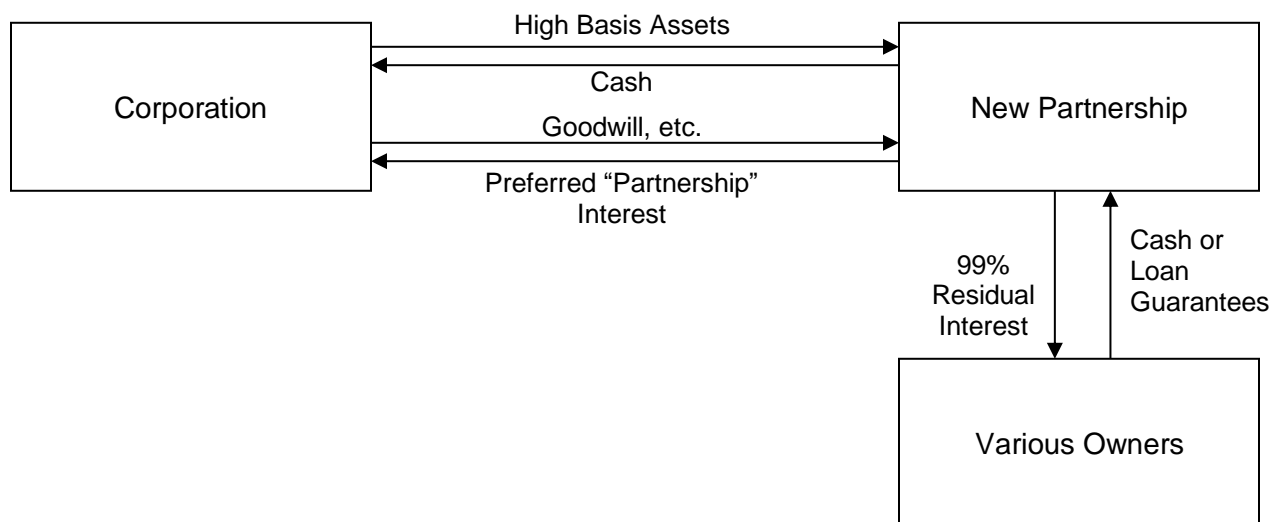

⁵⁵⁸⁰ Compare Code § 197(d)(1)(A) (goodwill) with Code § 197(d)(1)(E) (covenant not to compete).

⁵⁵⁸¹ One might also consider whether applicable state law allows the buyer more latitude in imposing restrictions relating to sale of goodwill than for a noncompetition agreement and whether the seller is trading off state law rights for favorable tax treatment.

The seller might prefer a mechanism in which:

- The seller has a quicker route to gaining control over the business if the buyer does not attain the results necessary to pay the seller.
- The deal is more tax-efficient than the traditional sale of goodwill.

This mechanism recognizes that, although the transfer of goodwill is technically a debt-financed deal, it really carries risks similar to an equity interest. Below is a diagram showing the transaction, in which the seller contributes the goodwill to a new entity in exchange for what for tax purposes is considered a preferred partnership interest.⁵⁵⁸²

This new arrangement needs to involve a real sharing of profits. Therefore, ideally the existing corporation would continue to own a residual interest. The amount and duration of the retained residual interest depend on the facts and circumstances.

The sale of high basis assets is optional. The high basis assets can instead be included in the contribution to capital. Because preferred partnership rates are higher than interest rates, the new partnership – essentially the various owners who own a 99% residual interest in the new partnership in the agreement – would be incurring a higher cost of capital than if the partnership bought the assets for a note. On the other hand, transferring all assets in the business in one fell swoop is appealing and might be the most practical; for how to transfer assets by operation of law to avoid issues that might arise from piecemeal or inadvertently incomplete transfers, see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

Usually this structure is not for new owners but rather so that the existing owners can own the business in a more tax-efficient structure. The shareholders, as individual owners of the new entity, sign a covenant not to compete (together with other provisions protecting the new entity’s intellectual property, etc.) in consideration for their interest in the new entity, as well as contributing some reasonable amount of cash. When an individual retires, that person’s capital

⁵⁵⁸² For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

account is returned over time, and the perpetual residual profits interest is converted to a preferred profits interest until a target amount is reached. This new preferred profits interest would consist of Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes, and Code § 736(b) payments, not grossed up; see part II.Q.8.b.ii.(h) Interaction of Death with Code § 736 Payments.

For the new entity's structure, see part II.E Recommended Structure for Entities, except that this arrangement involves the corporate partner owning not only the 1% of profits commonly shared but also a preferred partnership interest.

Let's look at the non-tax financial issues, then discuss the tax issues in addition to the advantages discussed in parts II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis and II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.Q.8.b.iii.(a). Non-Tax Financial Issues When Using a Preferred Partnership to Acquire Goodwill and Other Assets

The seller receives preferred payments equal to the lesser of the entity's net operating cash flow or a target amount before any amounts are distributed to the buyer. Because the payments are targets and not mandatory, they do not constitute debt or a fixed obligation; rather, they are a return of investment to the owners. Stock purchases for a note and deferred compensation constitute liabilities on financial statement that can impair financing— enough that such arrangements might be considered highly unattractive. This liability might very well be required to be disclosed in financial statements even if the event triggering the notes or deferred compensation have not occurred and are unlikely to occur soon. Clients and advisors tend not to consider this issue when planning, so be sure to raise it early and have the CPA directly address this issue.

If the target is not attained, then:

- The deficiency is added to the following year's target amount.
- The seller might be given control over certain aspects of running the business. This could be as modest as limiting the buyer's compensation for services rendered or as far-reaching as taking over control of part or all of the business' operations. The partial or total shift on control would be a focal point of negotiations.

These provisions would be built directly into the partnership agreement. So that they know that authority has not been transferred to the seller, third-party lenders would require assurances that the buyer is complying with the agreement with the seller, thus providing an independent check on the buyer's compliance with the deal.

After the seller has received all that has been bargained-for, the seller would no longer be an owner of the entity.

II.Q.8.b.iii.(b). Tax Issues When Transferring Assets to New Entity

Suppose the seller is an S corporation. If all of an S corporation's assets were sold to a new entity, the corporation would recognize income taxable to its shareholder. The sale of goodwill would be taxable, but the new entity's deduction for that payment would be spread over 180

months (15 years).⁵⁵⁸³ Furthermore, if the IRS were to find that goodwill was transferred to the new entity at a substantial value, without the S corporation retaining a sufficient interest in the new entity, then:

- 1. The S corporation would have income equal to the goodwill.
- 2. The shareholders would have immediate dividend income equal to the goodwill, which they then contributed to the new entity without receiving an immediate deduction (the deduction would be spread over 180 months).

If the entity transfers its assets to a new LLC, retaining a preferred interest at no more than 150% of the AFR⁵⁵⁸⁴ that distributes only to the extent of operating cash flow, a sale is presumed not to have occurred.⁵⁵⁸⁵ If the S corporation is receiving a return whose present value (using the AFR) is equal to the value of the contributed goodwill (if any), the S corporation should not be treated as having distributed such goodwill to its shareholders. It might be advisable to give the corporation a small but significant profits interest in the LLC.

This concept of transferring to a new LLC also works better when the transferring entity is a partnership. Suppose the transferring entity sells all of its assets in exchange for a promissory note, and the buyer is unable to make all of the payments. Any basis remaining in the note would need to be written off as a bad debt.⁵⁵⁸⁶ Contrast that to a partnership redemption, in which distributions or payments generally are applied to basis first and generate a gain only after recovering basis,⁵⁵⁸⁷ subject to possible application of the disguised sale rules for payments made in the first two years.⁵⁵⁸⁸

II.Q.8.c. Related Party Sales of Non-Capital Assets by or to Partnerships

Gain on the sale of property is ordinary income if it is not a capital asset in the hands of the transferee and the sale is between:⁵⁵⁸⁹

- a partnership and a person owning, directly or indirectly, more than 50% of the capital interest, or profits interest, in such partnership, or
- two partnerships in which the same persons own, directly or indirectly, more than 50% of the capital interest or profits interests.

In applying this rule, “the ownership of a capital or profits interest in a partnership shall be determined in accordance with the rules for constructive ownership of stock provided in

⁵⁵⁸³ Code § 197 provides for 15 years, and Reg. § 1.197-2(f)(1)(i) applies this starting with a particular month.

⁵⁵⁸⁴ AFR meaning the applicable federal rate provided under the tax laws as an arms-length interest rate.

⁵⁵⁸⁵ See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.

⁵⁵⁸⁶ CCA 201328031.

⁵⁵⁸⁷ See parts II.Q.8.b.i Distribution of Property by a Partnership and II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

⁵⁵⁸⁸ See part II.M.3.e Exception: Disguised Sale, explaining the rules and simple steps to avoid their application.

⁵⁵⁸⁹ Code § 707(b)(2). Code § 707(b)(1) lists the same parties.

section 267(c) other than paragraph (3) of such section.⁵⁵⁹⁰ For Code § 267(c), see part II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses.⁵⁵⁹¹

For an explanation of regulations proposed November 27, 2023, see text accompanying and following fn 1419 in part II.G.4.I.iii Code § 267 Disallowance of Related-Party Deductions or Losses. Note that the Tax Reform Act of 1986 modified Code § 707(b), so keep in mind that some of the prior authority mentioned in the rest of this part II.Q.8.c may reflect prior law.

An irrevocable trust paying mandatory income to the grantor's surviving spouse, remainder to the grantor's children is not related under Code § 267(b) or 707(b)(1) with respect to grantor trusts deemed owned by the grantor's two siblings, respectively.⁵⁵⁹²

In applying the first bullet point above, grantor trusts are disregarded from their deemed owners. See CCA 201343021.⁵⁵⁹³

Property subject to this rule includes trade accounts receivable, inventory, stock in trade, and depreciable or real property used in the trade of business.⁵⁵⁹⁴ If a business is being sold and a related partnership needs to transfer assets as part of the sale, that asset transfer may implicate Code § 707(b)(2) if it is to the business on or before the sale. The related partnership may need to sell either to the buyer separately or to the business after the buyer owns the business.

Rev. Rul. 67-105 provides:

Advice has been requested whether a partnership, owned entirely by A and B, may sell a portion of its real property, held for more than 6 months, to another partnership owned entirely by the adult children of A and B, and treat the gain on such sale as long-term capital gain.

A and B are the only partners in X, a valid partnership for Federal income tax purposes, which owns and operates various citrus groves. X proposes to sell one of its groves to Y, a valid partnership for Federal income tax purposes, for use in Y's fruit-growing business. The sale to Y will be at fair market value and in an arms-length transaction. All of the partners in Y are children of A and B and operate this partnership independently of their parents. Neither A nor B is a member of the Y partnership.

Section 707(b)(2)(B) of the Internal Revenue Code of 1954 provides that in the case of a sale or exchange, directly or indirectly, of property which in the hands of the transferee is property other than a capital asset (as defined in section 1221 of the Code), any recognized gain shall be considered as gain from the sale or exchange of property other than a capital asset, if the sale or exchange is between partnerships in which the same persons own, directly or indirectly, more than 80 percent of the capital or profits interests in each partnership. See also section 1.707-1(b)(2) of the Income Tax Regulations.

In determining ownership for the purposes of section 707(b)(2)(B) of the Code, the rules for the constructive ownership of stock provided in section 267(c)(1), (2), (4), and (5) of

⁵⁵⁹⁰ Code § 707(b)(3).

⁵⁵⁹¹ Code § 267(c) and Reg. § 1.267(c)-1 are reproduced in the text following fn 1425 in that part.

⁵⁵⁹² Letter Ruling 200920032.

⁵⁵⁹³ See fn 6565 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

⁵⁵⁹⁴ Reg. § 1.707-1(b)(2).

the Code are applied pursuant to section 707(b)(3) of the Code. Under the rule provided by section 267(c)(2) of the Code, an individual shall, for the purpose of section 707(b)(2)(B) of the Code, be considered as owning the interests in a partnership owned, directly or indirectly, by or for his family. The family of an individual is defined in section 267(c)(4) of the Code, as including brothers, and sisters, spouse, ancestors, and lineal descendants.

Accordingly, A and B must be regarded as the owners of the interests in the Y partnership owned by their children. See *Max A. Burde v. Commissioner*, 43 T.C. 252 (1964), *affirmed* 352 F. 2d 995 (1965), *certiorari denied*, 383 U.S. 966 (1966). Thus, the gain realized by the X partnership upon the sale of its citrus grove to Y partnership for use in Y's business will be treated as gain from the sale of property other than a capital asset.

Dyess v. Commissioner, T.C. Memo. 1993-219, reasoned and held:

The parties in this case agree that the sale of Foxfire Village involved property described in section 707(b)(2), that is, property, which, in the hands of the transferee, is property other than a capital asset as defined in section 1221. Thus, the issue is whether petitioner and Nace owned 80 percent or less of the Foxfire partnership on the date of the sale, thereby saving the transaction from the application of section 707(b)(2)(B). This depends upon petitioner's argument that the Court should disregard the form of the Foxfire limited partnership agreement executed on October 4, 1982, and rely upon what petitioner views as the substance of the transaction.

Respondent argues that section 707(b)(2)(B) is a concisely and clearly drafted provision that must be applied as it is written. Respondent points out that section 707(b)(2)(B) provides a bright-line test and gives plain notice to taxpayers concerning when its restrictions apply. Since, on October 4, 1982, petitioner and Nace owned and controlled 100 percent of Equity and 92.5 percent of Foxfire, respondent concludes that petitioner improperly classified the income he received from the sale of Foxfire Village as capital gain rather than as ordinary income as mandated by section 707(b)(2)(B).

Petitioner admits that, at the time of the sale of property, he and Nace technically owned and controlled more than 80 percent of the partnership interests in Equity and in Foxfire. However, petitioner asserts that the substance of the transaction, rather than its form, dictates that the transaction be viewed not as one between related entities (controlled partnerships) but as one between Equity and a partnership of petitioner, Nace, and a sufficient number of unrelated investors (so as not to constitute controlled partnerships).

Petitioner argues that the substance is readily apparent from the events leading to and occurring after the transaction and is quite different from the mechanical form of the transaction. Petitioner states that he had a commitment and prearranged plan to bring in local, unrelated investors as limited partners. The transfer of the property to Foxfire would have been futile, he says, without the completion of a series of transactions that transferred the limited interests to the outside investors. Without that series, he argues, there would have been no need to create a limited partnership, in light of the fact that the whole purpose of the venture was to provide capital and liquidity to a failing real estate holding.

Petitioner contends that at the time of the transaction he was holding, in an escrow-like arrangement, the limited partnership interests in conjunction with Nace merely for convenience and to avoid unnecessary expenses prior to transferring the interests to the limited partners once they had paid their capital contributions. Petitioner asserts that the holding of the limited partnership interests by himself and Nace was merely an accommodation to avoid having expensive Articles of Limited Partnership with escrow agreements.⁹ Petitioner asserts that the time between the acquisition of the property and the entry of all of the limited partners was merely 30 to 45 days after October 4, 1982.¹⁰ He contends that neither he nor Nace received any tax benefits from the holding of the limited partnership interests during this interim period.¹¹ Therefore, petitioner concludes that, when the substance rather than the form of the transaction is considered, Equity's sale of Foxfire Village to Foxfire does not violate section 707(b)(2)(B).

Respondent does not dispute that petitioner is entitled to have the substance of the transaction examined, as it is an established principle of tax law that the substance of a transaction will govern over its form. *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945); *Gregory v. Helvering*, 293 U.S. 465 (1935); *Kuper v. Commissioner*, 533 F.2d 152, 155 (5th Cir. 1976), *affg. in part and revg. in part* 61 T.C. 624 (1974). Nevertheless, respondent asserts that the substance of the transaction in this case is fully consistent with its form, and that, as a result, section 707(b)(2)(B) is applicable.

Respondent suggests that substance over form, specifically the step transaction doctrine invoked by petitioner, may not be applicable in cases involving provisions such as section 707(b)(2)(B) that mandate restrictive tax treatment for transactions between related parties.¹² Even if the step transaction doctrine is applicable, respondent asserts that petitioner has offered no evidence proving that the form of the partnership agreement does not comport with the substance of the transaction at issue.

¹² In support of this suggestion respondent cites *King Enterprises, Inc. v. United States*, 189 Ct. Cl. 466, 477, 418 F.2d 511, 516 (1969): "aphorisms about 'closely related steps' and 'integrated transactions' may have different meanings in different contexts, and ... there may be not one rule, but several, depending on the substantive provision of the Code to which they are being applied" (quoting Mintz & Plumb, *Step Transactions*, pp. 247, 252-253 (1954)).

As another rule of substance over form, the step transaction doctrine "treats a series of formally separate 'steps' as a single transaction if such steps are in substance integrated, interdependent, and focused toward a particular result". *Penrod v. Commissioner*, 88 T.C. 1415, 1428 (1987).¹³ As described in *Smith v. Commissioner*, 78 T.C. 350, 389 (1982):

The step transaction doctrine generally applies in cases where a taxpayer seeks to get from point A to point D and does so stopping in between at points B and C. The whole purpose of the unnecessary stops is to achieve tax consequences differing from those which a direct path from A to D would have produced. In such a situation, courts are not bound by the twisted path taken by the taxpayer, and the intervening stops may be disregarded or rearranged. [Citation omitted.]

¹³ See also *Barter v. Commissioner*, T.C. Memo. 1990-142.

Courts have applied three tests in deciding whether to employ the step transaction doctrine in a particular situation: (1) the binding commitment test, (2) the end result test, and (3) the interdependence test. Under the binding commitment test, a series of transactions are collapsed if, at the time the first step is taken, there is a binding commitment to undertake the later steps. *Commissioner v. Gordon*, 391 U.S. 83, 96 (1968). Under the end result test, the step transaction doctrine is applicable if it appears that a series of formally separate steps are really prearranged parts of a single transaction intended from the outset to reach an ultimate result. *King Enterprises, Inc. v. United States*, 189 Ct. Cl. 466, 475, 418 F.2d 511, 516 (1969). The interdependence test focuses on “whether on a reasonable interpretation of objective facts the steps are so interdependent that the legal relations created by one transaction would have been fruitless without a completion of the series.” *Redding v. Commissioner*, 630 F.2d 1169, 1177 (7th Cir. 1980), *revg. and remanding* 71 T.C. 597 (1979) (quoting Paul, Selected Studies in Federal Taxation 200, 254 (2d series 1938)).

The final limited partnership agreement for Foxfire (the Agreement) is clear and unambiguous in its language, but petitioner seeks to vary its meaning. In doing so, petitioner invokes this Court’s “strong proof” rule. The strong proof rule requires that a taxpayer, who seeks to establish a position at variance with the language of the written agreement to which he or she was a party, must present more than a preponderance of the evidence that the terms of the written instrument do not reflect business reality and the actual intentions of the contracting parties. *Elrod v. Commissioner*, 87 T.C. 1046, 1066 (1986); *G C Services Corp. v. Commissioner*, 73 T.C. 406, 412 (1979). Alternatively, respondent asserts that we should require petitioner to meet the *Danielson* standard, a parol evidence rule of substantive law that proposes that “a party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties to the agreement would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, etc.”. *Commissioner v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967), *vacating and remanding* 44 T.C. 549 (1965), *cert. denied* 389 U.S. 858 (1967). The Court of Appeals for the Fifth Circuit, to which an appeal in this case would lie, has declined to follow the strong proof rule in certain situations, applying instead the *Danielson* approach. *Spector v. Commissioner*, 641 F.2d 376 (5th Cir. 1981), *revg. and remanding* 71 T.C. 1017 (1979), *cert. denied* 454 U.S. 868 (1981). In the instant case, we would reach the same result under either the strong proof rule or the *Danielson* rule.

The uncontroverted facts of the case at issue are that, on October 4, 1982, petitioner and Nace held a combined 92.5-percent ownership in Foxfire, which on the day of its formation bought real property from another partnership (Equity) of which they owned a combined 100 percent. Petitioner and Nace gave notes to the Foxfire partnership in the total amount of \$185,000 and executed a formal, binding partnership agreement. They were directly involved in the drafting of that agreement. The Agreement in no way suggests that there were undisclosed limited partners in Foxfire as of October 4, 1982.

Petitioner argues that the Letter, which was drafted and executed to waive the requirement of the Agreement that an interest could not be sold without the prior offer to and rejection by the other partners, indicated that there were other limited partners in Foxfire. We do not agree. The prospective investors who signed that Letter were, on October 4, 1982, under no legally binding commitments to become limited partners, and they actually signed the Letter sometime after October 4, 1982. The Letter, seeking to

waive restrictions on the sale of a partnership interest, merely provides that additional limited partners can be brought into the partnership in the future. Neither the Agreement nor the Letter provides for the entry of limited partners on the date of the formation of the Foxfire partnership as petitioner contends. That Letter does not change the fact that, at the time of the sale of the Foxfire Village property, petitioner and Nace were the owners of 92.5 percent of Foxfire. Although the people contacted about the investment opportunity orally expressed strong interest in purchasing interests in Foxfire, they would not commit to investing until after the formation of Foxfire and its acquisition of the Foxfire Village property. These prospective investors, other than Laube, would not commit to investing before seeing the documentation of the transaction and having it reviewed by their personal attorneys or accountants. Just as the potential investors were not bound to make investments, petitioner and Nace were not bound to sell to the previously contacted potential investors. They intended to sell to whoever first offered the money to purchase a limited interest.

The substance or economic reality of the transaction, *i.e.*, the infusion of capital by bringing in limited partners, was in fact accomplished by the form or structure of the limited partnership agreement that was actually used. That economic result could also have been accomplished by other forms or structures. What petitioner complains of is not the failure to achieve the substance or economic reality of the transaction, but the personal tax consequences to him of the form or structure that was used for that purpose.

Petitioner had, or should have had, knowledge of the tax consequences associated with the different forms available for the structure of the limited partnership agreement. The record shows that petitioner consulted Jackson about possible forms of a limited partnership. He also consulted him about tax considerations, but the record is silent as to the nature of any tax advice he received. The initial version of the partnership agreement drafted by Jackson contemplated first selling the 10 limited partnership interests for \$150,000 and then having the partnership purchase an undivided 75-percent interest in the Foxfire Village property from Equity, with petitioner and Nace to contribute their remaining 25 percent of that property as their capital contribution. Had that structure been used, the limited partners would have held a 75-percent interest in the partnership at the time of the purchase of the property from Equity. In that event, the restriction of section 707(b)(2)(B) regarding sales of property between "controlled partnerships" would not appear to come into play.

The record does not contain any satisfactory explanation as to why that draft version was not used. See *supra* note 3. In any event, a different version was executed, with three partners and with petitioner and Nace holding 92.5 percent of the partnership interests on October 4, 1982, the date the partnership was formed and the date of the sale of the property. Although Jackson was under the misimpression that the limited partnership interests had already been sold or virtually sold, he knew the partnership would be changed as the limited partners came in. He drafted a First Amendment to Certificate of Limited Partnership with blank lines so the names of the limited partners could be added later. In fact, three more such amendments were drafted, executed, and recorded in the county court by the time the last of the limited partners had purchased their interests in March of 1983.

Petitioner cannot now disavow the route he in fact followed for a different route he might have but did not take. Furthermore, one cannot find, from the face of the Agreement or

from the facts as they developed, that outside limited partners were actually present and part of the partnership on the date of its formation as petitioner contends. The facts show there were no outside limited partners (other than Laube) at that time. Petitioner has met neither the strong proof test nor the *Danielson* test and cannot now successfully invoke the substance over form doctrine to disavow the manner in which the Foxfire partnership was structured and the limited partnership interests sold.

The transaction at issue, thus, was in substance and in form a sale between related partnerships, falling under the provisions of section 707(b)(2)(B). In this case, petitioner is not asking us merely to “skip, collapse, or rearrange the steps he employed[,] ... [h]e is instead asking that we accept ... new ... steps or events that did not take place. The step transaction doctrine cannot be stretched so far”. *Glacier State Electric Supply Co. v. Commissioner*, 80 T.C. 1047, 1057-1058 (1983). We must rely upon the established principle that “a taxpayer is bound by what he did and he cannot prevail upon the basis of what he could have done but did not do.” *Island Gas, Inc. v. Commissioner*, 30 T.C. 787, 795 (1958). See also *Commissioner v. National Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974), where the Supreme Court stated:

This Court has observed repeatedly that, while a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not ... and may not enjoy the benefit of some other route he might have chosen to follow but did not.

On brief, petitioner raises a new argument that, under the “interim closing of the books” method, he was never in violation of section 707(b)(2)(B) as he was always deemed to have less than the prohibited percentage of ownership in Foxfire. Petitioner asserts that, when the interim closing of the books method is applied to the partnership, the outside investors, who entered the partnership on October 14, 1982, are deemed to have owned their limited partnership interests as of October 4, 1982. There is no evidence in the record to suggest that Foxfire ever used or contemplated using the interim closing of the books method.¹⁴

¹⁴ There is no indication that Foxfire closed its books when limited partners were taken in in October or again in November of 1982. There is a strong suggestion that that did not occur, since the loss for 1982 was allocated according to the percentages of interest as of December 31, 1982.

In any event, petitioner has misconstrued the purpose of the interim closing of the books accounting method. When a partner sells or exchanges a portion of or all of his partnership interest, his distributive share of partnership items for the portion of the taxable year he held that interest must be determined. Sec. 706(c) and (d). Prior to the Tax Reform Act of 1976, partners who entered partnerships late in the tax year were nevertheless taking into account partnership items incurred prior to their entries (e.g., “retroactive allocations” of partnership losses). The Tax Reform Act of 1976 provided that, when partners’ interests change during the taxable year, each partner’s share of various items of partnership income, gain, loss, deduction, and credit is to be determined by taking into account each partner’s varying interest in the partnership during the taxable year. H. Rept. 98-861 (1984), 1984-3 C.B. (Vol.2) 1, 109. Section 72(a) of Public Law 98-369, 98 Stat. 494, 589, again addressed the retroactive allocation issue, adding a new subsection (d) to section 706 (relating to taxable years of partner and

partnership). Section 706(d)(1) generally provides, with exceptions for certain cash basis items, that

if during any taxable year of the partnership there is a change in any partner's interest in the partnership, each partner's distributive share of any item of income, gain, loss deduction, or credit of the partnership for such taxable year shall be determined by the use of any method prescribed by the Secretary by regulations which takes into account the varying interests of the partners in the partnership during such taxable year.

We have recognized that the determination of the varying interests of the partners may be made by using the interim closing of the books method, the proration method, or any other reasonable method. *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd.* 693 F.2d 1189 (5th Cir. 1982); sec. 1.706-1(c)(2)(ii), Income Tax Regs. We described the interim closing of the books accounting method in *Cottle v. Commissioner*, 89 T.C. 467, 495 (1987) as follows:

The interim closing of the books method requires a closing of the partnership books as of the date of entry of the new partner and the computation of the various items of partnership income, gain, loss, deduction, and credit as of that date.

The interim closing of the books method would not help petitioner if the books were closed "as of the date of entry" of the new partners. Petitioner essentially relies on an accounting convention to avoid the clear terms of Foxfire's limited partnership agreement and the proscription of section 707(b)(2)(B). When Congress enacted section 706(d) in 1984, it considered but did not pass a monthly convention.

The legislative history of 706(d) indicates that the Senate amendment contained an explicit provision for a monthly convention: "when there is a disposition of less than an entire interest in a partnership by a partner (including entry of a new partner), the partnership may elect (on an annual basis) to determine the varying interests of the partners by using a monthly convention that treats any changes in any partner's interest as occurring on the first day of the month." H. Rept. 98-861, *supra* 1984-3 C.B. (Vol. 2) at 110. The conference agreement eliminated the monthly convention and determined that the statutory provision of a monthly convention as adopted by the Senate was unnecessary since the Secretary intended to provide for a monthly convention by regulation. *Id.* at 112. The legislative history also indicates that the Secretary may provide for other conventions and "may deny the use of any convention when the occurrence of significant, discrete events (e.g., a large, unusual gain or loss) would mean that use of a convention could result in significant tax avoidance". *Id.*

The Commissioner issued an information release that permitted partnerships using the interim closing of the books method to use a mid-month convention, to be effective until issuance of regulations.¹⁵ I.R.S. News Release IR-84-129 (Dec. 13, 1984). The information release was issued in 1984, after the taxable year at issue in this case and provided as follows:

The Internal Revenue Service today announced that partnerships using the "interim-closing-of-the-books" method to take into account the varying interests of partners during a taxable year will be permitted to use a semi-monthly convention....

Under a semi-monthly convention, this [each partner's distributive share] is determined by treating partners entering during the first 15 days of the month as entering on the first day of the month and partners entering after the 15th day of the month (but before the end of the month) as entering on the 16th day of the month, except to the extent section 706(c)(2)(A) of the Code applies. Partnerships that use the proration method will not be permitted to use a semi-monthly convention, but rather will be required to use a daily convention.

¹⁵ No such regulations have yet been issued. [my comment: for updates to this issue, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

The release does not indicate that the mid-month convention may be used by taxpayers for tax years before 1984.

The interim closing of the books method and the mid-month convention are accounting methods designed to make the computation of varying partnership interests easier when a partnership interest has been sold or exchanged during the taxable year. However, there remains the obligation to use them in a manner that ensures that the tax treatment of various partnership items reflects economic reality. The determination to be made for section 707(b)(2)(B), however, is not a matter of accounting methods or conventions. Section 707(b)(2)(B) requires that a partner's percentage ownership of the capital interest or the profits interest be determined on a particular date, at the time the property is sold or exchanged, to establish the presence or absence of controlled partnerships (i.e., partnerships in which the same persons own more than 80 percent).¹⁶ Nothing in the legislative history of section 706(d) suggests that the convention is to be extended beyond distributive share determinations to impute ownership interests for purposes of section 707(b)(2)(B). Section 707(b)(3) explicitly states that the constructive ownership rules of section 267(c) are to be used to determine percentage ownership of a capital or profits interest.

¹⁶ The current version of sec. 707(b)(2)(B) has reduced the percentage to more than 50 percent.

In any event, as noted earlier, the record does not indicate that Foxfire used the interim closing of the books method in 1982, and therefore would not be entitled to use the mid-month convention. The parties have stipulated that, on its 1982 partnership return, Foxfire reported a loss, which was allocated among the partners in accordance with ownership interests as of December 31, 1982. Thus, Equity and Foxfire constitute two controlled partnerships, and section 707(b)(2)(B) applies to the sale of Foxfire Village by Equity to Foxfire.

The corporate provision most closely related to this one is part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), including possible ordinary income taxation when selling to a controlled corporation interests in a partnership holding depreciable property.⁵⁵⁹⁵

⁵⁵⁹⁵ See text accompanying fns. 5109-5114.

II.Q.8.d. Partnership Division

For an overview with helpful charts and diagrams, see Borden, “Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations,” *Business Entities* (Jul./Aug. 2014).⁵⁵⁹⁶

II.Q.8.d.i. Partnership Division - Generally

In the case of a division of a partnership into two or more partnerships, the resulting partnerships (other than any resulting partnership the members of which had an interest of 50% or less in the capital and profits of the prior partnership) are a continuation of the prior partnership.⁵⁵⁹⁷ Thus, generally a partnership can be divided without immediate income tax recognition.⁵⁵⁹⁸

However, some divisions might be taxable.⁵⁵⁹⁹ Also, tax elections might be revoked and re-started for the new partnership. Furthermore, a division could re-start the seven-year waiting period for measuring Code § 704(c) responsibility; however, if each partner’s overall interest in

⁵⁵⁹⁶ RIA Checkpoint *Catalyst*, ¶ 218:123 Tax Characterization of Division Transaction, discussed a ruling: In IRS Letter Ruling 201619001, the IRS respected the form of a transaction when a partnership division was one step of a larger transaction. In the ruling, an existing partnership (X) divided into two partnerships, X and M, in a transaction in which the partners of X before the division owned identical interests in both X and M after the division. Following the division, M transferred all of its assets to a third partnership (OP) in exchange for partnership interests in OP and other property (stock of the principal partner of OP, a real estate investment trust (REIT stock)). M then liquidated, distributing the partnership interests to some of its partners and the REIT stock to other partners. The partners receiving the REIT stock agreed to treat the transaction as if they sold their partnership interests in M to OP (see ¶ 218:114). The IRS ruled that the transaction would be treated in accordance with its form—i.e., as a division followed by a merger—and that the partners receiving the REIT stock would be treated as having sold their interests to the resulting merged partnership. IRS Letter Ruling 201619001

Comment: The IRS could have disregarded the division and recharacterized the transaction in IRS Letter Ruling 201619001 as a transfer of property by X directly to OP in exchange for partnership interests and other property (the REIT stock). In that case, the transaction would have been treated as a part-sale, part-contribution under IRC § 707(a)(2)(B). See Topic #206, Transactions Between Partner and Partnership, at ¶ 206:150. Presumably, the form of the transaction was intended to permit the gain attributable to the receipt of the REIT stock to be taken into account solely by the partners of X that received the stock.

⁵⁵⁹⁷ Code § 708(b)(2)(B). Even an apparently taxable division might have less adverse tax effects than one might have thought. When a court ordered a partnership’s assets sold and three of five partners bought all of the assets and continued operation of the business, the transaction was not treated as a sale of partnership assets to the three remaining partners but rather was considered as a sale or a liquidation of the partnership interests of the two withdrawing partners. Rev. Rul. 66-264.

⁵⁵⁹⁸ Reg. § 1.708-1(d).

⁵⁵⁹⁹ If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a)).

each partnership property does not change, then Code § 704(c) responsibility would not be affected.⁵⁶⁰⁰ Below are the rules governing whether the above events occur.⁵⁶⁰¹

II.Q.8.d.ii. Which Partnership Keeps Original Partnership's Tax Identity?

When a partnership divides into two or more partnerships, any resulting partnership(s)⁵⁶⁰² shall be considered a continuation of the prior partnership⁵⁶⁰³ if the members of the resulting partnership(s) had an interest of more than 50% in the capital and profits of the prior partnership.⁵⁶⁰⁴

⁵⁶⁰⁰ The preamble to T.D. 8925 provides:

To the extent that a partnership division merely affects a restructuring of the form in which the partners hold property (that is, each partner's overall interest in each partnership property does not change), the IRS and Treasury agree that a partnership division should not create new section 704(c) property or section 737 net precontribution gain. However, it is not clear that this result is necessarily appropriate where a division is non-pro rata as to the partners, where some property is extracted from or added to the partnerships in connection with the division, or where new partners are added to the ownership group in connection with the division. The IRS and Treasury intend to study this issue and request comments in this regard.

McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions, opines:

The authors believe that, unless there are extenuating circumstances, a division should never be the occasion for the creation of new § 704(c) property or § 737 net precontribution gain. The justification for this conclusion flows from the very nature of a division; it is a restructuring of the form in which partners hold property through partnerships. There are no additions or deletions of property to or from the partnership pool. There is no change in the composition of the partners as a group. Instead of owning all the property through a single partnership, the partners now own it through several partnerships. Why should a transaction that involves so little change be the occasion for the imposition of such draconian rules?

The authors' view is consistent with the rules applicable to § 708(b)(1)(B) terminations which, unlike divisions, involve substantial changes in the composition of the partner group. Both the § 704(c)(1)(B) Regulations and the § 737 Regulations provide that these provisions do not apply to the deemed distribution of interests in the new partnership that is caused by the termination. Subsequent distributions by the new partnership may trigger § 704(c)(1)(B) or § 737 with respect to partners in the new partnership who were partners in the terminated partnership, but only to the same extent they would have been triggered without the termination. [citing Reg. §§ 1.704-3(c)(3), 1.737-2(a).] A similar rule should apply to divisions. While further developments are anticipated, they are not expected any time soon.

⁵⁶⁰¹ See McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions. Also note that Reg. § 1.708-1(d)(6) provides:

If any transactions described in paragraph (d)(3) of this section are part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed in such paragraph, the Commissioner may disregard such form, and may recast the larger series of transactions in accordance with their substance.

⁵⁶⁰² As defined in Reg. § 1.708-1(d)(4)(iv), which provides that a resulting partnership is a partnership resulting from the division that exists under applicable jurisdictional law after the division and that has at least two partners who were partners in the prior partnership. For example, where a prior partnership divides into two partnerships, both partnerships existing after the division are resulting partnerships.

⁵⁶⁰³ As defined in Reg. § 1.708-1(d)(4)(ii), which provides that the prior partnership is the partnership subject to division that exists under applicable jurisdictional law before the division.

⁵⁶⁰⁴ Reg. § 1.708-1(d)(1).

Any other resulting partnership will not be considered a continuation of the prior partnership but will be considered a new partnership.⁵⁶⁰⁵

If the members of none of the resulting partnerships owned an interest of more than 50% in the capital and profits of the prior partnership, none of the resulting partnerships will be considered a continuation of the prior partnership, and the prior partnership will be considered to have terminated.⁵⁶⁰⁶

Where members of a partnership which has been divided into two or more partnerships do not become members of a resulting partnership which is considered a continuation of the prior partnership, such members' interests shall be considered liquidated as of the date of the division.⁵⁶⁰⁷

The resulting partnership that is treated as the divided partnership⁵⁶⁰⁸ shall file a return for the taxable year of the partnership that has been divided and shall include the name, address, and employer identification number (EIN) of the prior partnership.⁵⁶⁰⁹

All other resulting partnerships that are regarded as continuing and new partnerships shall file separate returns for the taxable year beginning on the day after the date of the division with new EINs for each partnership.⁵⁶¹⁰

All resulting partnerships that are regarded as continuations of a prior partnership are subject to preexisting elections that were made by that prior partnership.⁵⁶¹¹ A subsequent election that is made by a resulting partnership does not affect the other resulting partnerships.⁵⁶¹²

⁵⁶⁰⁵ Reg. § 1.708-1(d)(1).

⁵⁶⁰⁶ Reg. § 1.708-1(d)(1).

⁵⁶⁰⁷ Reg. § 1.708-1(d)(1).

⁵⁶⁰⁸ As defined in Reg. § 1.708-1(d)(4)(i), which provides as follows:

The divided partnership is the continuing partnership which is treated, for Federal income tax purposes, as transferring the assets and liabilities to the recipient partnership or partnerships, either directly (under the assets-over form) or indirectly (under the assets-up form). If the resulting partnership that, in form, transferred the assets and liabilities in connection with the division is a continuation of the prior partnership, then such resulting partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships and only one of the resulting partnerships is a continuation of the prior partnership, then the resulting partnership that is a continuation of the prior partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships without undertaking a form for the division that is recognized under Reg. § 1.708-1(d)(3), or if the resulting partnership that had, in form, transferred assets and liabilities is not considered a continuation of the prior partnership, and more than one resulting partnership is considered a continuation of the prior partnership, the continuing resulting partnership with the assets having the greatest fair market value (net of liabilities) will be treated as the divided partnership.

⁵⁶⁰⁹ Reg. § 1.708-1(d)(2)(i). The return must include the names, addresses, and EINs of all resulting partnerships that are regarded as continuing. The return must also state that the partnership is a continuation of the prior partnership and shall set forth separately the respective distributive shares of the partners for the periods before and including the date of the division and after the date of division.

⁵⁶¹⁰ Reg. § 1.708-1(d)(2)(i).

⁵⁶¹¹ Reg. § 1.708-1(d)(2)(ii).

⁵⁶¹² Reg. § 1.708-1(d)(2)(ii).

II.Q.8.d.iii. Assets-Over vs. Assets-Up Division

II.Q.8.d.iii.(a). Assets-Over Divisions

Generally, in an “assets-over” division, an existing partnership transfers some portion of its assets and liabilities (directly or by distributing an interest in an entity the partnership owns) to a new partnership, and immediately thereafter distributes interests in the new partnership to some or all of its partners.

When in doubt, the division is an “assets-over” division.⁵⁶¹³

In an assets-over division, the following transactions are deemed to have occurred:

- Where at least one resulting partnership is a continuation of the prior partnership:
 - The divided partnership⁵⁶¹⁴ contributes certain assets and liabilities to a recipient partnership(s)⁵⁶¹⁵ in exchange for interests in such recipient partnership(s).
 - Immediately thereafter, the divided partnership distributes the interests in such recipient partnership(s) to some or all of its partners in partial or complete liquidation of the partners’ interests in the divided partnership.⁵⁶¹⁶
- Where none of the resulting partnerships is a continuation of the prior partnership:
 - The prior partnership will be treated as contributing all of its assets and liabilities to new resulting partnerships in exchange for interests in the resulting partnerships.

⁵⁶¹³ Reg. § 1.708-1(d)(3)(i). The preamble, T.D. 8925, provides:

...it is appropriate to require consistency in applying either the Assets-Over Form or the Assets-Up Form to characterize a transfer of assets to a resulting partnership. However, where a single partnership is divided in a transaction that involves a transfer of assets (either actual or deemed) to multiple partnerships, the transfer to each resulting partnership should be viewed separately. As with mergers involving more than two partnerships, it is consistent with the purposes of these regulations, in the context of divisions, to allow the transfer to one resulting partnership to be characterized under the Assets-Over Form while characterizing the transfer to another resulting partnership under the Assets-Up Form. The proposed regulations provided an example that illustrates when such a division accomplished under both the Assets-Over Form and the Assets-Up Form will be respected. The final regulations do not change the example. See § 1.708-1(d)(5) Example 7 of the final regulations. The final regulations also add an example to illustrate when a division accomplished under both the Assets-Over Form and the Assets-Up Form will not be respected.

⁵⁶¹⁴ See fn. 5608.

⁵⁶¹⁵ As defined in Reg. § 1.708-1(d)(4)(iii), which provides that a recipient partnership is a partnership that is treated as receiving, for Federal income tax purposes, assets and liabilities from a divided partnership, either directly (under the assets-over form) or indirectly (under the assets-up form).

⁵⁶¹⁶ Reg. § 1.708-1(d)(3)(i)(A).

- Immediately thereafter, the prior partnership will be treated as liquidating by distributing the interests in the new resulting partnerships to the prior partnership's partners.⁵⁶¹⁷ Distributions of partnership interests trigger Code § 743 adjustments.⁵⁶¹⁸

Code § 737 and Reg. § 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of the Code § 704(c) property contributed by a partner to a second partnership (transferee partnership) in a Code § 721 exchange, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the Code § 704(c) property to the transferor partnership.⁵⁶¹⁹ A later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.⁵⁶²⁰

II.Q.8.d.iii.(b). Assets-Up Divisions

Generally, in an “assets-up” division, an existing partnership distributes assets and liabilities to some or all of its partners, who then contribute them to a new partnership.

If the divided partnership⁵⁶²¹ distributes certain assets (such that state law causes the partners to be treated as the owners of such assets)⁵⁶²² to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership and immediately thereafter such partners contribute the distributed assets to one or more partnerships in exchange for interests in such recipient partnership(s), the transaction is respected as an “assets-up” division.⁵⁶²³

⁵⁶¹⁷ Reg. § 1.708-1(d)(3)(i)(B).

⁵⁶¹⁸ See parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

⁵⁶¹⁹ Reg. § 1.737-2(b)(2).

⁵⁶²⁰ Reg. § 1.737-2(b)(3).

⁵⁶²¹ Which Reg. § 1.708-1(d)(4)(i) requires to be a continuing partnership.

⁵⁶²² The preamble in T.D. 8925 says:

While the IRS and Treasury believe that it should be necessary for a partnership to actually convey ownership of the partnership's assets to its partners in order to follow the Assets-Up Form, it should not be necessary for the partners to actually assume the liabilities of the partnership in order to follow such form. Pursuant to section 752 and the regulations thereunder, a partner essentially is deemed to have directly incurred a share of the partnership's liabilities. Requiring the partners to actually assume debt that they already are deemed to have incurred is unnecessary. Such a requirement also could create a trap for the unwary. If a partner momentarily assumes an amount of the partnership's debt that is less than the partner's share of such debt under section 752 (and other partners momentarily assume an amount of debt in excess of their shares), the partner could inappropriately recognize gain as a result of the deemed distribution.

⁵⁶²³ Reg. § 1.708-1(d)(3)(ii)(A). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.

If none of the resulting partnerships is a continuation of the prior partnership, then despite the partners' transitory ownership of some or all of the prior partnership's assets, the form of a partnership division will be respected for Federal income tax purposes if:⁵⁶²⁴

- The prior partnership distributes certain assets (such that state law causes the partners to be treated as the owners of such assets) to some or all of its partners in partial or complete liquidation of the partners' interests in the prior partnership, and
- Immediately thereafter, such partners contribute the distributed assets to a resulting partnership(s) in exchange for interests in such resulting partnership(s).

However, if the prior partnership does not liquidate for state law purposes, then, with respect to the assets and liabilities that, in form, are not transferred to a new resulting partnership, the prior partnership will be treated as transferring these assets and liabilities to a new resulting partnership in an assets-over division.⁵⁶²⁵

II.Q.8.d.iii.(c). Effect of Basis Issues on Type of Division

If the basis of the partnership's assets ("inside basis") exceeds the basis of the partnership interests ("outside basis") involved, then one would tend to want to preserve the inside basis, and an assets-over division would tend to be attractive.

If the outside basis exceeds the inside basis, then one might seek to have the outside basis applied to the partnership's assets in an assets-up division, which involves a liquidating distribution.

See part II.Q.8.b.i.(h) Characteristics of Distributed Property.

II.Q.8.d.iii.(d). Checklist of Issues in Choosing Assets-Over vs. Assets-Up

If any division described above is part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard such form, and may recast the larger series of transactions in accordance with their substance.⁵⁶²⁶

The following are among issues to consider in planning partnership divisions:⁵⁶²⁷

- Any mixing bowl gain in current transaction?⁵⁶²⁸
 - Assets up: Are contributed assets distributed to another partner, or other assets contributed to a Code § 704(c) partner within 7 years?

⁵⁶²⁴ Reg. § 1.708-1(d)(3)(ii)(B). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.

⁵⁶²⁵ Reg. § 1.708-1(d)(3)(ii)(B).

⁵⁶²⁶ Reg. § 1.708-1(d)(6).

⁵⁶²⁷ A selected list from Borden, O'Conner, and Schneider, Partnership and LLC Reorganizations, 2013 *LLC Institute* (10/18/2013).

⁵⁶²⁸ See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737.

- Assets over: If one looks through distributed partnership interest, would underlying asset distribution trigger Code § 704(c)(1)(B) or Code § 737 gain?
- These issues apply only if the partners do not have identical percentage interests in each partnership.⁵⁶²⁹
- Is there any potential gain under Code § 731(c), relating to a distribution of marketable securities? An assets-over division that distributes a partnership the value of which is at least 20% marketable securities might be an indirect distribution of marketable securities.⁵⁶³⁰
- Consider future mixing bowl ramifications from creation of new 7-year mixing bowl clock.⁵⁶³¹
 - Can form be changed to minimize costs?
 - What are future distribution plans?
- Consider effect of debt shifts under Code § 752, because deemed distributions from relief of debt might trigger income.
- Any Code § 708(b)(1)(B) terminations of lower-tier partnerships?

⁵⁶²⁹ See fn. 5600.

⁵⁶³⁰ See part II.Q.8.b.i.(a) Code § 731, including fns. 5401 and 5402. Letter Ruling 200223036 included the following facts and holding:

To effect an assets-over form of division, LLC proposes contributing certain assets, including marketable securities, and liabilities to LLC 2 in exchange for 100 percent of the membership interests in LLC 2. Immediately thereafter, LLC will distribute the interests in LLC 2 to Son, Son's Trusts, and Mother's Trust (Distributee Partners) in partial or complete liquidation of their interests in LLC. Consequently, LLC's partnership division will yield two resulting partnerships, LLC and LLC 2. The respective members of LLC and LLC 2 immediately after the division will have had an interest in capital and profits of the prior partnership (LLC before the division) of more than 50 percent. Therefore, we assume that each of the two resulting partnerships will be considered a continuation of the prior partnership. In addition, as the partnership that will transfer the assets and liabilities in the division, LLC should constitute the divided partnership. As the partnership that will be treated as receiving the assets and liabilities, LLC 2 should constitute the recipient partnership.

Because the term money includes marketable securities, LLC's distribution of the interests in LLC 2 to the Distributee Partners will have potential gain consequences under § 731(a). LLC's shares of stock in three public companies meet the definition of marketable securities under § 731(c). In addition, more than 90 percent of the value of LLC 2 will be attributable to the marketable securities, stock shares, it will receive in the division. Therefore, the membership interests in LLC 2 themselves should constitute marketable securities (in an amount equal to their fair market value on the distribution date), the distribution of which should constitute a distribution of money.

A limitation applies to the amount of the distribution of marketable securities (membership interests) that is treated as a distribution of money. The amount of such a distribution is reduced under § 731(c)(3)(B) by a distributee partner's share of the built-in gain in the securities held by the partnership. LLC is concerned that the partnership referred to in § 731(c)(3)(B) in determining the reduction amount may include both continuing partnerships, LLC and LLC 2, thereby eliminating most of the anticipated limitation on any § 731(a) gain resulting from the proposed division.

⁵⁶³¹ See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737.

- Compare state or local taxes based on form - particularly transfer taxes.
- Consider potential application of new Code § 704(c)(1)(C) if one or more assets are depreciated, even if overall net appreciation. Code § 704(c)(1)(C) locks in built-in loss to contributing partner and could create differences depending on form chosen.⁵⁶³²
- Consider Code § 704(c) generally.
 - If assets up, individual partners are Code § 704(c) contributing partners on specific assets.
 - If assets over, consider Code § 704(c) step in the shoes rules.
 - In either case, if the division is pro rata, no new Code § 704(c) responsibility should be created.⁵⁶³³
- If assets up transaction, consider disguised sale rules: were appreciated assets contributed within prior two years?⁵⁶³⁴
- Will assets up transaction result in a shift, at least transitorily, of hot asset sharing or trigger any Code § 751(b) gain?⁵⁶³⁵

II.Q.8.e. Transfers of Partnership Interests

II.Q.8.e.i. Distribution of Partnership Interests

Except as otherwise provided in regulations, for purposes of Code § 708 (termination of partnership, which generally no longer applies),⁵⁶³⁶ Code § 743 (adjustment to inside basis of partnership property when the outside basis of the partnership interest changes), and any partnership income tax matters specified in regulations, any distribution of an interest in a partnership (not otherwise treated as an exchange) is treated as a Code § 761(e) exchange.⁵⁶³⁷ CCA 201517006 held that shifting rights to future profits not is treated as a Code § 761(e) exchange; see part II.C.6 Shifting Rights to Future Profits.

⁵⁶³² See fn. 5729.

⁵⁶³³ See fn. 5600.

⁵⁶³⁴ See part II.M.3.e Exception: Disguised Sale.

⁵⁶³⁵ See part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner and part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵⁶³⁶ See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (**repealed by 2017 tax reform**).

⁵⁶³⁷ Code § 761(e) provides:

Distributions of partnership interests treated as exchanges. Except as otherwise provided in regulations, for purposes of—

- (1) section 708 (relating to continuation of partnership),
- (2) section 743 (relating to optional adjustment to basis of partnership property), and
- (3) any other provision of this subchapter specified in regulations prescribed by the Secretary,

any distribution of an interest in a partnership (not otherwise treated as an exchange) shall be treated as an exchange.

The Conference Report adopting this rule focused on a distribution of a partnership interest by a partnership or corporation.⁵⁶³⁸ The relevant regulation focuses on distributions by partnerships;⁵⁶³⁹ corporate distributions are already taxable as sales or exchanges through corporate income tax provisions.⁵⁶⁴⁰ However, the statute's literal language is not so limited (and CCA 201726012 took a broad approach),⁵⁶⁴¹ so this rule also appears to apply to any distribution (other than a specific bequest) of a partnership interest by an estate or trust.⁵⁶⁴² Therefore, under prior law, when a trust or estate distributes at a 50% or more partnership interest, the partnership would have terminated, resetting all partnership elections and stretching the period over which depreciation is deducted.⁵⁶⁴³ The distribution would have been added to all other transfers constituting a sale or exchange under Code § 708 within a period of 12 consecutive months to determine whether such a termination occurs under pre-2018 law;⁵⁶⁴⁴ to avoid such a consequence, one might have spread distributions over a period exceeding 12 months.

Furthermore, TAM 201929019 took the position that a deemed distribution of a partnership interest in an assets-over merger of two partnerships under Reg. § 1.708-1(c)(3)(i)⁵⁶⁴⁵ is treated as an "exchange" pursuant to Code § 761(e). TAM 201929019 reasoned:

⁵⁶³⁸ Tax Reform Act of 1984, P.L. 98-369, 7/18/1984.

⁵⁶³⁹ Reg. § 1.761-1(e) provides:

Distribution of partnership interest. For purposes of section 708(b)(1)(B) and § 1.708-1(b)(1)(iv), the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is not a sale or exchange of an interest in the new partnership. However, the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is treated as an exchange of the interest in the new partnership for purposes of section 743.

A new partnership formed as the result of the termination of a partnership under Code § 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to Code § 704(c) property deemed contributed to the new partnership by the terminated partnership under Reg. § 1.708-1(b)(1)(iv); see fn. 3854 in part II.P.1.a.i Allocations of Income in Partnerships.

See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (**repealed by 2017 tax reform**).

⁵⁶⁴⁰ See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Note that Code § 761(e) was enacted in 1984, before tax-free corporate liquidations were abolished in 1986, so the reference to corporate distributions did make sense when Code § 761(e) was enacted.

⁵⁶⁴¹ CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," held:

The regulations under § 761 do not limit the definition of exchange to taxable exchanges for purposes of § 743. In particular, no provisions limit the definition of an exchange between related parties or members of a consolidated group. The transactions at issue here involved the distribution of a partnership interest as part of the complete liquidation of a corporate partner, and the transfer of a partnership interest as part of the reorganization of a corporate partner. Consequently, these transactions constitute an exchange for purposes of § 743 under the provisions of § 761(e).

⁵⁶⁴² For further analysis, see McKee, Nelson & Whitmire, *Federal Taxation of Partnerships and Partners*, ¶23.05. Special Problems Relating to the Income Taxation of Partnership Interests Held by Estates and Trusts. For how distributions affect allocating tax items under Code § 706, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

⁵⁶⁴³ Reg. § 1.708-1(b)(1); see part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (**repealed by 2017 tax reform**).

⁵⁶⁴⁴ Reg. § 1.708-1(b)(1).

⁵⁶⁴⁵ See part II.Q.8.e.v Partnership Mergers, especially the text accompanying fns 5841-5842.

Under § 1.708-1(c)(3)(i), X is deemed to contribute all of its assets and liabilities to Y in exchange for an interest in Y (Step 1), and immediately thereafter, X is deemed to distribute interests in Y to A and Q in liquidation of X (Step 2). Except as otherwise provided in regulations, any distribution of an interest in a partnership is treated as an exchange under § 761(e) for purposes of §§ 708 and 743. Neither the Code nor the regulations suggest that § 761(e) was only intended to apply to actual distributions and, therefore, not intended to apply to constructive distributions such as the one described in § 1.708-1(c)(3)(i). Under Subchapter K of the Code, partnership distributions that are “deemed” to occur as a result of the application of certain rules in the Code or regulations to specific facts (such as “deemed” distributions of cash or money under § 731(a) resulting from the forgiveness or shifting of liabilities among partners under § 752(b)) generally will have the same or similar tax effects as actual partnership distributions of money or other property. Accordingly, under the plain language of § 761(e), we conclude that X’s deemed distribution of interests in Y to A and Q in liquidation of X resulting from an assets-over merger under § 1.708-1(c)(3)(i) is treated as an exchange for purposes of § 743(b).

A argues that Congress did not intend § 761(e)(2) to apply to constructive distributions of partnership interests because when Congress amended § 743(b) to require mandatory basis adjustments for a partnership with a substantial built-in loss, it did not also amend the parenthetical language in § 761(e)(2) to reference a “substantial built-in loss.” Because the parenthetical language in § 761(e)(2) only references an “optional adjustment to basis of partnership property” when a § 754 election is in effect, A argues that § 761(e) was not meant to apply to constructive distributions of partnership interests when a partnership has a substantial built-in loss. A disconnect in A’s argument exists because if A’s argument is correct, then § 761(e) would not apply to actual distributions of partnership interests when a partnership has a substantial built-in loss. Clearly, this was not what Congress intended when it amended § 743(b).

We disagree that the failure to amend the parenthetical language in § 761(e)(2) was meant to limit the application of § 743(b) to only actual distributions of partnership interests when a § 754 election is in effect for the partnership. The “relating to” parenthetical language is best read as a descriptive short-hand reference to § 743 and not as limiting language. We find support for our interpretation of § 761(e) in the fact that Congress also did not amend the parenthetical language in § 755(a) when it enacted the substantial built-in loss mandatory basis adjustment rule. Both parentheticals in § 755(a) only refer to optional basis adjustments to partnership property and not the mandatory basis adjustments that would apply when the partnership has a substantial built-in loss. Interpreting § 755(a) as only applying to optional basis adjustments would be erroneous given that § 755 and related regulations provide the exclusive rules for allocation of basis among specific partnership properties when §§ 734(b) and 743(b) adjustments apply. No other rules or methods outside of § 755 provide for allocation of basis among specific partnership properties for mandatory basis adjustments. Because it would be erroneous to limit the application of § 755 to optional basis adjustments based solely on the failure to amend the parenthetical language in § 755(a), it would be equally erroneous to interpret the failure to amend the parenthetical language in § 761(e)(2) as limiting § 761(e) to apply only to optional basis adjustments under § 743(b) and not to mandatory basis adjustments under § 743(b) as well. A’s argument regarding the parenthetical language in § 761(e) is unpersuasive and, thus, § 761(e) applies to actual and constructive distributions of partnership interests when

either a § 754 election is in effect for the partnership or the partnership has a substantial built-in loss.

Alternatively, A argues that Y, the resulting partnership in this case, should be treated as a continuation of both X and Y under the literal language of § 708(b)(2)(A) and, as a result, § 761(e) should not apply to any constructive distributions that would result by treating X as a terminated partnership under the “tiebreaker rule” in § 1.708-1(c)(1). In A’s view, because the merger of two partnerships owned by the same majority partner in the same proportion represents a “mere change in form,” the deemed steps that occur under § 1.708-1(c)(3)(i) by treating X as a terminated partnership under § 1.708-1(c)(1) should have no substantive tax effects or consequences, including any potential § 743(b) adjustments. A cites language from the preamble to proposed regulations under § 704(c) to support A’s argument that because the majority ownership of X and Y was essentially unchanged after the merger, the transaction should result in no substantive tax consequences to the partners.⁶

⁶ See Preamble to Proposed § 1.704-4(c)(4) and § 1.737-2(b), 72 Fed. Reg. 46932, 46933 (Aug. 22, 2007).

We disagree with A’s argument that no substantive tax effects or consequences should result when X and Y merge. When a resulting partnership could be considered the continuation of more than one of the merging or consolidating partnerships under § 708(b)(2)(A) (for example, because the same majority partner owns both partnerships), the “tiebreaker rule” in § 1.708-1(c)(1) mandates that only one of the merging or consolidating partnerships continues (based on fair market value of assets contributed) while any other merging or consolidating partnership terminates. This rule and the rule in § 1.708-1(c)(3)(i) describing the steps that are treated as occurring to effectuate the deemed termination of any merged or consolidated partnership as a result of the merger cannot be ignored. For tracking basis and capital accounts, determining partnership elections, and other administrative concerns, only one merging partnership can be treated as continuing. Additionally, A’s reliance on the preamble to the regulations under § 704(c) is misplaced. The “substantive tax consequences” described in that preamble concern the recognition of immediate gain and not the conformity of partnership basis under § 743(b). Finally, A’s assertion that the merger in this case represents a “mere change in form” ignores the fact that Federal tax law recognizes the existence of separate entities and the resulting tax consequences from transactions between those separate entities. The fact that two separate entities are owned by the same majority partner does not mean they are the same partnership or should be treated as one partnership for Federal income tax purposes. A chose the form of the transaction (in this case, a merger of X into Y) for A’s own reasons. This indicates that the form of the transaction had real substantive legal effects, and therefore, the transaction was not a mere change in form. Accordingly, the transaction as carried out had substantive effects and consequences that are respected for Federal income tax purposes, and the transaction is of a type that falls within and is subject to § 1.708-1(c)(3)(i). The deemed steps that occur as a result of an assets-over merger under § 1.708-1(c)(3)(i) include the treatment of the constructive distribution by X of the partnership interest in Y as an exchange under § 761(e) for purposes of § 743(b).

A also argues that because Rev. Rul. 90-17, 1990-1 C.B. 119, holds that a deemed distribution resulting from an assets-over merger is not an exchange under § 761(e) for § 708(b)(1)(B) purposes, it should not be treated as an exchange for purposes of

§ 743(b). Even though A concedes that Rev. Rul. 90-17 does not address whether a deemed distribution resulting from an assets-over merger is an exchange for purposes of § 743, A argues that the conclusion that the deemed distribution in an asset-over merger is not an exchange for § 743 purposes necessarily follows from this ruling because § 761(e) applies to both §§ 708 and 743. Accordingly, not applying § 708 for purposes of § 761(e) means that § 743 cannot be applied for § 761(e) purposes either. We disagree. As discussed in Rev. Rul. 90-17, the § 708(b)(2)(A) merger rules take precedence over the § 708(b)(1)(B) termination rule in cases where both could theoretically apply. Therefore, even though deemed distributions resulting from assets-over mergers may not be properly treated as exchanges for purposes of applying § 708(b)(1)(B) to the resulting partnership, neither the Code nor the regulations prevent a deemed distribution resulting from an assets-over merger from being treated as an exchange of the distributed interests in the resulting partnership under § 708(b)(2)(A), for purposes of applying § 743(b) to those distributed interests. The holding in Rev. Rul. 90-17 supports this position and does not alter our conclusion that a deemed distribution of a partnership interest in an assets-over merger is treated as an exchange under § 761(e) for purposes of § 743(b).

Finally, A asserts that the netting rule of § 1.752-1(f) reflects and implements a “single transaction/unitary basis” approach and that the application of § 743(b) to the assets-over merger under § 1.708-1(c)(3)(i) assumes a two-step transaction in which the interest acquired in Step 2 is disaggregated from all other interests previously held by the transferee partner in the resulting partnership. Accordingly, A argues that a single transaction approach cannot be reconciled with the separate interest/bifurcated approach that applies for § 743(b) purposes and, therefore, § 743(b) should not apply to an assets-over merger under § 1.708-1(c)(3)(i).

We disagree. The application of the netting rule in § 1.752-1(f) to an assets-over merger under § 1.708-1(c)(3)(i) also does not alter our conclusion. Even though the netting rule in § 1.752-1(f) treats an assets-over merger under § 1.708-1(c)(3)(i) as a single transaction for purposes of determining any net liability shifts under § 752, § 1.752-1(g) Example 2 (illustrating the application of the netting rule when two partnerships merge) demonstrates that an assets-over merger is a single transaction involving two steps, as described in § 1.708-1(c)(3)(i). Therefore, by respecting the deemed steps that occur in an assets-over merger, the single transaction approach can be reconciled with the separate/bifurcated approach that applies for § 743(b) purposes.⁷

⁷ See footnote 14, *infra*, for additional detail.

¹⁴ For example, when applying the separate/bifurcated approach of § 743(b) to the facts from Example 2 of § 1.752-1(g) assuming a § 754 election is in effect and accounting for B’s net decrease in liabilities under § 752, B has no adjustment under § 743. This is correct because before the merger, the inside and outside bases of B in partnership T and partnership S are equal. For simplicity, B’s share of partnership liabilities in partnership T and partnership S is determined under § 1.752-3(a)(3). When partnership T merges into partnership S and transfers its assets (\$600 of adjusted basis and value of \$1,000) and liabilities (\$900) to partnership T, B’s share of partnership T’s liabilities decreases by \$630. B’s share of partnership S’s liabilities, as a momentary indirect partner in partnership S, is \$70 (7% of \$1,000). Under the netting rule in § 1.752-1(f), B does not recognize any gain under § 731. Absent the netting rule, B would recognize \$140 of gain under § 731. For purposes of determining

B's § 743(b) adjustment, B's outside basis in partnership S (transferred partnership interest) is \$0 (\$420 (B's outside basis in partnership T before the merger) less \$630.

If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment. The basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis,"⁵⁶⁴⁶ so every estate or (former) revocable trust has a chance to make up for the partnership's failure to make a Code § 754 election. Note also that, if a Code § 754 election is in place as of date of death, technically the basis adjustments need to be done not only as of date of death but also as of date of distribution. However, if the adjustments are made as of date of death and the distribution is a carryover basis event, then the fact that outside basis equals inside basis means that no further Code § 743(b) is required.⁵⁶⁴⁷

However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, or the liquidation of a partnership interest, was not a sale or exchange for purposes of Code § 708.⁵⁶⁴⁸ Willis & Postlewaite, ¶ 16.01[7] Termination by Gift, Transfer on Death, or Distribution from Estate or Trust, *Partnership Taxation* (WG&L), states:

The transfer of a partnership interest by bequest or inheritance also is specifically excluded from sale or exchange treatment.⁶⁹ The treatment of a distribution of a partnership interest from a trust or estate, however, is less clear. There is no explicit language in the Regulations excluding such distributions from sale or exchange treatment.⁷⁰ Thus, while a transfer of a partnership interest to a trust or estate (if in the form of a gift or bequest) is not an exchange, a distribution of such an interest from the trust or estate arguably constitutes such a transfer.⁷¹ The statutory language provides that, subject to Regulations, any distribution will constitute a § 708 exchange.⁷² While the Conference Committee Report⁷³ focuses only on distributions of partnership interests made by partnerships and corporations, the language clearly is not so limited.

⁶⁹ Reg. § 1.708-1(b)(2).

⁵⁶⁴⁶ See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), particularly the paragraph in which lies the text accompanying fn. 5700.

⁵⁶⁴⁷ See fn. 5701 and accompanying text.

⁵⁶⁴⁸ Reg. § 1.708-1(b)(2), which was last amended after Code § 761(e) was enacted. Does a distribution from a trust qualify for this exception? The Conference Report adopting Code § 761 in 1984 does not expressly address trusts, saying that Code § 761 provides:

that for purposes of section 708, section 743, or any other provision of subchapter K specified in regulations (not just section 743 as in the House bill and Senate amendment) a distribution of a partnership interest by a partnership or corporation will be treated as a sale or exchange of the interest.

Reg. § 1.708-1(b)(2) was Reg. § 1.708-1(b)(1)(ii) before it was re-designated by T.D. 8925 (1/4/2001). It had the same provision since its adoption in 1956. The 2001 redesignation related to comprehensive rules on partnership mergers and divisions and did not mention Code § 761. When T.D. 8717 (5/8/1997) amended other provisions of Reg. § 1.708-1, it also amended Reg. § 1.761-1, without touching this language. So my best guess is that Treasury did not view Code § 761 as having an impact on that particular sentence.

Distributions from trusts tend to be viewed as gifts. See part II.J.8.d Distribution in Kind.

⁷⁰ Regulation § 1.708-1(b)(2) in permitting an assignment of a partnership interest to “a successor in interest” without risk of termination might be thought to include transfers of an interest from a trust. The assignment language, however, appears to modify only the word “gift”.

⁷¹ But see Private Letter Ruling 8605047, involving a terminated trust and the distribution of its assets which included a 50 percent interest in a partnership. The Ruling contained no reference to the termination issue under § 708, possibly because its focal point was whether the partnership, which later divided into two partnerships, could retain its use of a fiscal year.

⁷² IRC § 761(e), discussed at ¶ 16.01[8].

⁷³ HR Rep. No. 861, 98th Cong., 2d Sess. 864 (1984).

Tax policy, authority in related sections of Subchapter K, and subsequent legislative history, however, dictate that distributions from estates and trusts should be exempted from coverage.⁷⁴ However, the Regulation does not contain such an exemption.⁷⁵

⁷⁴ IRC § 761(e). See Regulation § 1.706-1(c)(3)(vi) example (3) (distribution of a partnership interest by an estate is not a sale or exchange of the interest; the partnership taxable year does not close with respect to the estate as partner). Compare Revenue Ruling 72-352, 1972-2 CB 395 (distribution of a partnership interest to a trust beneficiary upon termination of the trust closes the partnership taxable year with respect to the trust as partner). See discussion at ¶ 9.06.

⁷⁵ Reg. § 1.761-1(e). The Senate Finance Committee Report (S. Rep. No. 313, 99th Cong., 2d Sess. 924 (1986)) suggested that the Regulations under § 761(e) exclude such dispositions from sale or exchange treatment. The Report provided that it “is intended that exceptions might include a distribution of a partnership interest by an estate or testamentary trust by reason of the death of a partner will not be treated as a sale or exchange for purposes of § 708(b).”

However, the concept of a partnership terminating by reason of a transfer no longer exists. See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (**repealed by 2017 tax reform**).

Code § 761(e)(2) provides, “Except as otherwise provided in regulations, for purposes of ... section 743 (relating to optional adjustment to basis of partnership property) ..., any distribution of an interest in a partnership (not otherwise treated as an exchange) shall be treated as an exchange.” Regulations do not modify the application of Code § 761(e)(2).

II.Q.8.e.ii. Transfer of Partnership Interests: Effect on Transferring Partner

II.Q.8.e.ii.(a). Unitary Basis

A partner has a single basis in a partnership interest (determined under Code § 705), even if such partner is both a general partner and a limited partner of the same partnership.⁵⁶⁴⁹ (A partner also has a single capital account that reflects all of the partner’s interests, “regardless of

⁵⁶⁴⁹ Rev. Rul. 84-53, citing Rev. Rul. 84-52.

the class of interests owned by such partner (e.g., general or limited) and regardless of the time or manner in which such interests were acquired.”⁵⁶⁵⁰

A partner does not have a divided holding period in an interest in a partnership unless the partner acquired portions of an interest at different times or acquired portions of the partnership interest in exchange for property transferred at the same time but resulting in different holding periods.⁵⁶⁵¹ The portion of a partnership interest to which a holding period relates is determined by reference to a fraction, the numerator of which is the fair market value of the portion of the partnership interest received in the transaction to which the holding period relates, and the denominator of which is the fair market value of the entire partnership interest (determined

⁵⁶⁵⁰ Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 500 in part II.C.7 Maintaining Capital Accounts.

⁵⁶⁵¹ Reg. § 1.1223-3(a). See McKee, Nelson & Whitmire, ¶ 4.01[2][a] Contributing Partner’s Holding Period for His Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L). For other aspects of split holding periods, including options to buy, see Bittker & Lokken, ¶ 49.5 Split Holding Periods, *Federal Taxation of Income, Estates, and Gifts* (WG&L), Rev. Ruls. 62-140 and 75-524, and *Commissioner v. Williams*, 256 F.2d 152 (1958), *aff’d on rehearing*, 285 F.2d 582 (5th Cir. 1961).

immediately after the transaction).⁵⁶⁵² Special rules apply to the sale or exchange of all or a portion of an interest in a partnership⁵⁶⁵³ and distributions.⁵⁶⁵⁴

When one transfers a partnership interest, the basis allocated to the transferred interest is based on the relationship between the value of the transferor's partnership interest and the value of the transferred interest.⁵⁶⁵⁵ Thus, when one transfers partnership interests that are

⁵⁶⁵² Reg. § 1.1223-3(b)(1). The rest of Reg. § 1.1223-3(b) provides:

- (2) *Special rule.* For purposes of applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged (or with respect to which gain or loss is recognized upon a distribution under section 731), if a partner makes one or more contributions of cash to the partnership and receives one or more distributions of cash from the partnership during the one-year period ending on the date of the sale or exchange (or distribution with respect to which gain or loss is recognized under section 731), the partner may reduce the cash contributions made during the year by cash distributions received on a last-in-first-out basis, treating all cash distributions as if they were received immediately before the sale or exchange (or at the time of the distribution with respect to which gain or loss is recognized under section 731).
- (3) *Deemed contributions and distributions.* For purposes of paragraphs (b)(1) and (2) of this section, deemed contributions of cash under section 752(a) and deemed distributions of cash under section 752(b) shall be disregarded to the same extent that such amounts are disregarded under § 1.704-1(b)(2)(iv)(c).
- (4) *Adjustment with respect to contributed section 751 assets.* For purposes of applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged, if a partner receives a portion of the partnership interest in exchange for property described in section 751(c) or (d) (section 751 assets) within the one-year period ending on the date of the sale or exchange of all or a portion of the partner's interest in the partnership, and the partner recognizes ordinary income or loss on account of such a section 751 asset in a fully taxable transaction (either as a result of the sale of all or part of the partner's interest in the partnership or the sale by the partnership of the section 751 asset), the contribution of the section 751 asset during the one-year period shall be disregarded. However, if, in the absence of this paragraph, a partner would not be treated as having held any portion of the interest for more than one year (e.g., because the partner's only contributions to the partnership are contributions of section 751 assets or section 751 assets and cash within the prior one-year period), this adjustment is not available.
- (5) *Exception.* The Commissioner may prescribe by guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) a rule disregarding certain cash contributions (including contributions of a de minimis amount of cash) in applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged.

For Code § 751, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets. Reg. § 1.1223-3(e), "Section 751(c) assets," provides:

For purposes of this section, properties and potential gain treated as unrealized receivables under section 751(c) shall be treated as separate assets that are not capital assets as defined in section 1221 or property described in section 1231.

See part II.G.6.a Code § 1231 Property.

⁵⁶⁵³ Reg. § 1.1223-3(c).

⁵⁶⁵⁴ Reg. § 1.1223-3(d).

⁵⁶⁵⁵ Rev. Rul. 84-53 allocates this basis as follows:

Under section 1.61-6(a) of the regulations, when a partner makes a taxable disposition of a portion of an interest in a partnership, the basis of the transferred portion of the interest generally equals an amount which bears the same relation to the partner's basis in the partner's entire interest as the fair market value of the transferred portion of the interest bears to the fair market

discounted relative to one's holding, one also transfers a proportionately smaller portion of basis to the transferee. Note also that, if a transfer is made to a grantor trust, the consequences of the transfer apply only when the trust ceases to be taxed to the grantor.⁵⁶⁵⁶

Presumably the basis could be divided if the buyer uses an S corporation for a subsequent investment into the partnership. Other consequences of that structure are in part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker, especially part II.L.5.a S Corporation Blocker Generally.

Also, dividing a partnership would isolate the basis with respect to groups of assets in that the groups of assets are in separate partnerships; any such division should result in percentage interests that are the same in each partnership before or after the division.⁵⁶⁵⁷

II.Q.8.e.ii.(b). Character of Gain on Sale of Partnership Interest

Although the sale of stock in a corporation (whether or not an S election is in place)⁵⁶⁵⁸ is pure capital gain or loss, the sale of a partnership interest often has an ordinary income component. The gain is ordinary to the extent attributable to the selling partner's indirect interest in the partnership's unrealized receivables, certain depreciable assets, and inventory items;⁵⁶⁵⁹ the rest generally receives capital gain treatment.⁵⁶⁶⁰ If any interest in a partnership which, directly or indirectly, is transferred to (or is held by) the taxpayer in connection with the performance of substantial services by the taxpayer (or any other related person) in a disfavored trade or business, the holding period for long-term capital gain treatment may be extended to over three

value of the entire interest. However, if such partnership has liabilities, special adjustments must be made to take into account the effect of those liabilities on the basis of the partner's interest. In cases where the partner's share of all partnership liabilities does not exceed the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the transferor partner shall first exclude from the adjusted basis of such partner's entire interest an amount equal to such partner's share of all partnership liabilities, as determined under section 1.752-1(e) of the regulations. A part of the remaining adjusted basis (if any) shall be allocated to the transferred portion of the interest according to the ratio of the fair market value of the transferred portion of the interest to the fair market value of the entire interest. The sum of the amount so allocated plus the amount of the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest (under section 752(d) of the Code and section 1.1001-2 of the regulations) equals the adjusted basis of the transferred portion of the interest.

On the other hand, if the partner's share of all partnership liabilities exceeds the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the adjusted basis of the transferred portion of the interest equals an amount that bears the same relation to the partner's adjusted basis in the entire interest as the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest bears to the partner's share of all partnership liabilities, as determined under section 1.752-1(e).

For Reg. § 1.752-1 after October 2016 changes, see part II.C.3 Allocating Liabilities (Including Debt). I have not yet reviewed their interaction with Rev. Rul. 84-53.

⁵⁶⁵⁶ See part III.B.2.d.i Federal Income Tax and Irrevocable Grantor Trust Treatment, especially fn. 6573.

⁵⁶⁵⁷ See part II.Q.8.d Partnership Division, especially fn. 5600.

⁵⁶⁵⁸ Code § 341, before its repeal, provided exceptions for collapsible corporations.

⁵⁶⁵⁹ Code § 751(a); for details on the assets subject to these rules, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets. See also fn. 5388.

⁵⁶⁶⁰ Code § 741.

years (instead of over one year); see part II.M.4.f.ii.(b) Code § 1061 - Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains.

“Unrealized receivables” includes previously untaxed rights to payment from the sale of:⁵⁶⁶¹

1. Inventory or other ordinary income items, or
2. Services rendered, or to be rendered.

Depreciable assets to which this provision applies are primarily those the sale of which would trigger depreciation recapture, such as depreciation on tangible personal property or accelerated depreciation on the sale of real property; see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.⁵⁶⁶² However, sometimes depreciable real property without accelerated depreciation might be subject to more onerous provisions.⁵⁶⁶³

“Inventory items” includes not only inventory⁵⁶⁶⁴ but certain other ordinary income items,⁵⁶⁶⁵ whether those assets would receive that treatment in the hands of the partnership or the selling partner.⁵⁶⁶⁶ Under prior law, this provision applies only if those assets are substantially appreciated,⁵⁶⁶⁷ meaning that their fair market value exceeds 120% of the adjusted basis to the partnership of such property.⁵⁶⁶⁸ However, now inventory items do not have to be substantially appreciated to impute ordinary income on the portion of the sale of the partnership interest attributable to such items;⁵⁶⁶⁹ thus, the sale of a partnership interest is treated less favorably than a redemption,⁵⁶⁷⁰ since a redemption triggers ordinary income attributable to inventory items only if the inventory items are substantially appreciated.⁵⁶⁷¹

⁵⁶⁶¹ Code § 751(c). Untaxed means to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Reg. § 1.751-1(c)(1). Reg. § 1.751-1(c) describes various aspects of various kinds of unrealized receivables.

⁵⁶⁶² The flush language of Code § 751(c) refers to mining property, stock in a DISC, section 1245 property, stock in certain foreign corporations, section 1250 property, farm land, franchises, trademarks, or trade names, and an oil, gas, or geothermal property, but only to the extent of the amount which would be treated as gain to which certain recapture provisions would apply if, at the time of the sale of the partnership interest, such property had been sold by the partnership at its fair market value. Similar treatment applies any market discount bond and any short-term obligation to the extent of the amount would have been treated as ordinary income; however, this sentence does not apply with respect to the redemption of a partnership interest under Code § 736.

⁵⁶⁶³ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), particularly fn. 5109 the sale of partnership interests to a controlled corporation, which is which is further reaching than Code § 751.

⁵⁶⁶⁴ Code § 751(d)(1).

⁵⁶⁶⁵ Code § 751(d)(2).

⁵⁶⁶⁶ Code § 751(d)(3).

⁵⁶⁶⁷ Reg. § 1.751-1(a)(1).

⁵⁶⁶⁸ Reg. § 1.751-1(d)(1).

⁵⁶⁶⁹ Before P.L. 105-34 was amended in 1997, Code § 751(a)(2) applied to impute ordinary income on the sale of a partnership interest with respect to inventory items of the partnership which have appreciated substantially in value. P.L. 105-34 struck which have appreciated substantially in value from Code § 751(a)(2).

⁵⁶⁷⁰ Milo, The Tax Cost of Hot Assets upon the Disposition of a Partnership Interest, *The Tax Advisor* (August 2010).

⁵⁶⁷¹ Code § 751(b)(3).

When a partner transfers part or all of the partner's interest via gift, part of that transfer will be treated as a sale if the partner's share of partnership liabilities exceeds the adjusted basis of the partner's partnership interest. The transfer is treated as such because liability is shifting from the donor to the donee, and the donor is treated as having received cash to the extent that the donor's share of liabilities is reduced. The shift can be analyzed in two potential ways. One way would be to argue the shift is governed by Code § 752(b), which treats a reduction in a partner's share of partnership liabilities as a deemed cash distribution. In this case, the donor would recognize gain to the extent the distribution exceeded his partnership interest adjusted basis. However, another view is that only a portion of the basis of the partner's partnership interest should be allocated to the sale portion of the transfer, and gain is recognized to the extent the shift in liabilities exceeds the allocated portion of the adjusted basis.⁵⁶⁷²

For the effect of a transfer on the allocation of income reported on the involved partners' K-1s, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership, found within part III.B.2.j Tax Allocations upon Change of Interest.

Rev. Rul. 91-32 held that gain or loss of a foreign partner that disposes of its interest in a partnership that is engaged in a trade or business through a fixed place of business in the United States will be United States source effectively connected income (ECI) gain or will be ECI loss that is allocable to United States source ECI gain, to the extent that the partner's distributive share of unrealized gain or loss of the partnership would be attributable to ECI (United States source) property of the partnership. However, *Grecian Magnesite Mining v.*

⁵⁶⁷² Code § 752(d).

Commissioner, 149 T.C. 63 (2017),⁵⁶⁷³ repudiated Rev. Rul. 91-32.⁵⁶⁷⁴ Before getting to that analysis, it explained that Code § 741 works solely at the entity level (which is the focus of this part Character of Gain on Sale of Partnership Interest III.Q.8.e.ii.(b) and why that case is mentioned here), treating the partnership interest as a single unitary asset, without looking through to the underlying assets, absent any overriding provision:

In sum, section 736(b)(1) provides that payments such as those giving rise to the disputed gain “shall ... be considered as a distribution by the partnership”; section 731(a) provides that such gain “shall be considered as gain ... from the sale or exchange of the

⁵⁶⁷³ Aff'd 926 F.3d 819 (D.C. Cir. 2019). The ECI portion of the case was repealed, as described in the text following fn 943 in part II.E.1.c.viii Income or Gain from or Sale of Property Used in the Business or Business Interest Itself. The Official Tax Court Syllabus described the case as follows:

In 2001 P, a foreign corporation, purchased an interest in PS, a U.S. limited liability company that was treated as a partnership for U.S. income tax purposes. From 2001 to 2008 income was allocated to P from PS, and P paid income tax in the United States. In 2008 P's interest was redeemed by PS, and P received two liquidating payments, one in July 2008 and the second in January 2009 but deemed to have been made on December 31, 2008. P realized gain totaling over \$6.2 million, of which \$2.2 million was deemed attributable to U.S. real property interests (and which P now concedes is taxable income). P contends that the remainder—“disputed gain” of \$4 million—is not taxable for U.S. purposes. P timely filed a Form 1120-F, “U.S. Income Tax Return of a Foreign Corporation”, for 2008, wherein it reported its distributive share of PS's income, gain, loss, deductions, and credits, but did not report any income it received from the redemption of its partnership interest (i.e., neither the now-conceded real estate gain nor the disputed gain). P did not file a return or pay any income tax in the United States for 2009. Ps reporting position was recommended to it by an experienced certified public accountant (“C.P.A.”) who was recommended to P by its U.S. lawyer.

R prepared a substitute for return pursuant to sec. 6020(b) for P's 2009 year, and issued a notice of deficiency for 2008 and 2009, determining, inter alia, that P must recognize its gain on the redemption of its partnership interest for U.S. tax purposes as U.S.-source income that was effectively connected with a U.S. trade or business, consistent with Rev. Rul. 91-32. P timely filed a petition with this Court.

Held: P's disputed gain was capital gain that was not U.S.-source income and that was not effectively connected with a U.S. trade or business. This Court will not follow Rev. Rul. 91-32. P is therefore not liable for U.S. income tax on the disputed gain.

Held, further, as to the now-conceded tax liability for gain on the real estate, P is not liable for the sec. 6662(a) penalty for 2008 or the additions to tax under sec. 6651(a)(1) and (2) for 2009, because P reasonably relied on the erroneous advice of the C.P.A.

⁵⁶⁷⁴ The court summarized:

Our level of deference to agency interpretations of law varies. Where the interpretation construes an agency's own ambiguous regulation, that interpretation is accorded deference, *Rand v. Commissioner*, 141 T.C. 376, 380-381 (2013) (citing *Auer v. Robbins*, 519 U.S. 452, 461 (1997)). On the other hand, where a revenue ruling improperly interprets the text of relevant statutes and has inadequate reasoning, we afford it no deference at all. *PSB Holdings, Inc. v. Commissioner*, 129 T.C. 131, 145 (2007). Between these poles, we follow revenue rulings to the extent that they have the “power to persuade”. See *id.* at 144.

Rev. Rul. 91-32 is not simply an interpretation of the IRS's own ambiguous regulations, and we find that it lacks the power to persuade. Its treatment of the partnership provisions discussed above in part II.B is cursory in the extreme, not even citing section 731 (which, as we set out, yields a conclusion of “gain or loss from the sale or exchange of the partnership interest” (emphasis added)). The ruling's subchapter K analysis essentially begins and ends with the observation that “subchapter K of the Code is a blend of aggregate and entity treatment for partners and partnerships.” We criticize the ruling's treatment of the subchapter N issues in notes 22 and 24 below. We decline to defer to the ruling. We will instead follow the Code and the regulations to determine whether the disputed gain is effectively connected income.

partnership interest of the distributee partner”; and section 741 provides that such gain “shall be considered as gain ... from the sale or exchange of a capital asset”. (Emphasis added.) Accordingly, GMM’s gain from the redemption of its partnership interest is gain from the sale or exchange of an indivisible capital asset - *i.e.*, GMM’s interest in the partnership.

The court reasoned:

The Commissioner posits that the only way to reconcile the two provisions is to interpret section 741 as applicable only to the character of the gain recognized - *i.e.*, as capital rather than ordinary. That is, the Commissioner maintains that while section 741 expressly requires that the gain “shall be considered as gain or loss from the sale or exchange of a capital asset”, the statute does not preclude treating the (capital) gain as arising not from the sale of the partnership interest per se (which the entity theory would yield) but from the partnership’s underlying assets that give value to the partnership interest (which the aggregation theory would yield).

It is true that, in providing that the gain “shall be considered as gain * * * from the sale or exchange of a capital asset”, section 741 does not specify which asset. However, there are four flaws in the Commissioner’s approach that cause us to reject it. First, he exaggerates the conflict between an “entity theory” construction of section 741 and the existence of an exception in section 897(g). In its own terms, section 741 acknowledges one exception (“except as otherwise provided in section 751”),¹⁶ so section 741 is only a general rule, not a rule of absolute and universal application. Congress is always free, having enacted a general rule, to enact exceptions.

¹⁶ Section 751 is a specific exception to section 741 that causes unrealized receivables and inventory items to be addressed separately from the remainder of the partnership interest when that interest is sold or liquidated. In the context of liquidating distributions, the partnership is deemed to have bought the liquidated partner’s share of those assets from that partner, so that that partner has gain of a character and amount consistent with such a hypothetical sale. The IRS did not assert application of section 751(b) in the SNOD, and the Commissioner has not asserted it as an alternative position in this case. Consequently, we do not consider section 751 further. We note that by the express terms of section 741, section 751 is (like section 897(g); see *supra* note 11) an exception, and it mandates an “aggregation” approach for characterizing only gain “attributable to” unrealized receivables or inventory items”. This statute thus presumes the existence of a general rule to which this aggregation approach is an exception. Section 751 does not provide (and the Commissioner does not contend that it provides) a general rule that all gain from a partner’s sale of its partnership interest shall be considered an amount received from the sale of the partnership’s properties of whatever types.

Second, the Commissioner’s reading of section 741 gives insufficient effect to one word in the statute. Section 741 provides that income realized on the sale of a partnership interest “shall be considered as gain * * * from the sale or exchange of a capital asset”. (Emphasis added.) Congress used the singular “asset”, rather than the plural “assets”. This singular wording is more consistent with the treatment of the sale of a partnership interest according to the entity theory, under which the selling partner is deemed to have sold only one asset (its partnership interest) rather than being deemed to have sold its interest in the multiple underlying assets of the partnership. See also *P.B.D. Sports, Ltd.*

v. Commissioner, 109 T.C. 423, 438 (1997) (“Generally, subchapter K employs the entity approach in treating transfers of partnership interests. The sale of a partnership interest is treated as the sale of a single capital asset rather than as a transfer of the individual assets of the partnership. See secs. 741 and 742.”); *Unger v. Commissioner*, T.C. Memo. 1990-15 (listing section 741 as an example of the entity theory in the Internal Revenue Code), *aff’d*, 936 F.2d 1316 (D.C. Cir. 1991). And absent some overriding mandate, section 731 directs that gain or loss on a distribution (such as the one at issue) “shall be considered as gain or loss from the sale or exchange of the partnership interest of the distributee partner” (that is, as directed by section 741).

Third, Congress has explicitly carved out a few exceptions to section 741 that, when they apply, do require that we look through the partnership to the underlying assets and deem such a sale as the sale of separate interests in each asset owned by the partnership. If Congress had intended section 741 to be interpreted as a look-through provision, these exceptions in sections 751 and 897(g) would be superfluous. See *TRW Inc. v. Andrews*, 534 U.S. 19, 31 (2001).

Accordingly, the enactment of section 897(g) actually reinforces our conclusion that the entity theory is the general rule for the sale or exchange of an interest in a partnership. Without such a general rule, there would be no need to carve out an exception to prevent U.S. real property interests from being swept into the indivisible capital asset treatment that section 741 otherwise prescribes.

Fourth, section 731(a)—brought into this analysis by the express wording of section 736(b)(1)—makes explicit that the “entity theory” generally applies to a partner’s gain from a distribution:

Any gain or loss recognized under this subsection shall be considered as gain or loss from the sale or exchange of the partnership interest of the distributee partner.

Sec. 731(a) (emphasis added). This wording could hardly be clearer. The partnership provisions in subchapter K of the Code provide a general rule that the “entity theory” applies to sales and liquidating distributions of partnership interests—i.e., that such sales are treated not as sales of underlying assets but as sales of the partnership interest. Of course, Congress may enact exceptions or different rules, such as for foreign partners, and we consider that possibility below; but we begin our analysis with this generality from subchapter K.

The Commissioner’s interpretation of the Code acknowledges the same sequence we have followed—i.e., that section 736(b)(1) leads to section 731, which in turn leads to section 741, but he evidently thinks such an analysis stops short. The Commissioner apparently maintains that, after applying those sections in that order, one must still return to section 736(b)(1)—so that, while section 741 mandates the capital character of the income, in the end the distribution is still characterized as “payments * * * made in exchange for the interest of such partner in partnership property”. Sec. 736(b)(1) (emphasis added). The emphasized phrase certainly does appear in section 736(b)(1), and the analysis in this case begins there precisely because GMM did indeed receive payments that, given the nature of a partnership, can be said to have been made ultimately in exchange for GMM’s interest in the partnership’s various items of property. However, sections 736(b)(1), 731(a), and 741 tell us what to do with such payments for tax purposes; and as we have shown, they direct us to a conclusion: “gain or loss from

the sale or exchange of the partnership interest”, sec. 731(a), which is “a [singular] capital asset”, sec. 741. We see no reason to abandon that conclusion, return to section 736(b)(1), and halt at the phrase that most nearly coincides with the Commissioner’s position.¹⁷

¹⁷ Indeed, when we read section 736(a) and (b) together, it becomes clear that the role of the words “partnership property” in section 736(b) is to distinguish distributions made for such property from those made out of a partner’s “distributive share” of entity-level partnership income (as in section 736(a)(1)) or as a “guaranteed payment” (as in section 736(a)(2)). A partner’s “distributive share”, sec. 736(a)(1), is governed by sections 704(b) and 701; the tax treatment of a “guaranteed payment”, sec. 736(a)(2), is provided in section 707(a); and payments for partnership property, sec. 736(b), are “considered as a distribution by the partnership”—i.e., are treated as provided in section 731. In none of these instances is the ultimate tax treatment of the transfer of money or property from a partnership to a partner prescribed solely by reference to section 736.

The Commissioner also argues that section 741 should not be applied to characterize the income at issue because applying it in that manner would contradict “Congress’ intent in enacting section 865”, the sourcing rule we discuss below in part IV.B. The Commissioner argues that, when addressing a partnership question under subchapter K of the Code (which deals primarily with partners and partnerships) and applying a Code section (such as section 865) that is outside of subchapter K, one must look to “the nature of the partnership interest involved, together with the intent and purpose of the non-subchapter K section being applied.” Using this rule, the Commissioner explains that not section 741 but rather section 736(b)(1) more appropriately characterizes the type of income here—i.e., as a payment for GMM’s interest in the “partnership property”. We see no basis for the Commissioner’s selection of this particular phrase from section 736(b)(1) as the guiding star for navigating the intersection of partnership taxation and the taxation of international transactions, and we have already explained why this phrase is at the beginning and not the end of the analysis. More important, the Commissioner cites no authority for his posited rule, which seems (at least as he uses it here) to shortcut or distort the subchapter K analysis by invoking a purpose (not explicitly enacted) that he discerns in subchapter N. The Commissioner has not convinced us to reconsider the argument that we rejected 38 years ago when it was advanced by the taxpayer in Pollack. Addressing ourselves to the statutory text, we conclude that subchapter K mandates treating the disputed gain as capital gain from the disposition of a single asset, and in part IV.B below we apply the provisions of section 865 accordingly.

CCA 202309015 asserted that LLC interests were inventory and that sales were taxed as ordinary income (and presumably subject to self-employment tax). The CCA characterized the facts:

Between Year 1 and Year 4, Taxpayer directly, and indirectly through entities owned and managed by Taxpayer (Managed LLCs),¹ engaged in the promotion and sale of interests in LLCs. The only asset held by the LLCs was land. Each of the LLCs engaged in transactions involving the donation of an easement with respect to the land, in exchange for a charitable contribution deduction, as described in Notice 2017-10,² and/or the donation of a fee simple interest in the land in exchange for a charitable contribution deduction. Hereinafter, because the analysis is the same and for ease of discussion, we refer to these transactions, collectively, as the SCE transactions and to the LLCs that

donated the easements and/or land as the SCE LLCs. The character of the gain Taxpayer recognized on the sales of the SCE LLCs is the subject of this advice.

¹ Taxpayer held, through disregarded entities, interests in the Managed LLCs with A and B through which Taxpayer engaged in the transactions described herein. Taxpayer reported the activities of the Managed LLCs as partnerships for federal tax purposes.

² 2017-4 I.R.B. 544.

According to information provided by Taxpayer, Taxpayer has been engaged in a variety of business activities including real estate management, acquisition, and investment activities.³ In at least Year 2, Taxpayer represented that Taxpayer and the Managed LLCs did not sell real property and were not engaged in a trade or business of selling real property.⁴ Promotional materials for the sale of the SCE transactions described certain principals of Managed LLCs as “only providing additional information regarding the potential acquisition of membership interests to prospective members and are not acting as a real estate broker nor are they acting as a broker or dealer in securities.”⁵ During the audit of Taxpayer, LB&I Examination found that Taxpayer’s activities are primarily operated through X, located in State, and that X conducts its activities through various Managed LLCs.

⁴ 30-day Letter Protest Taxpayer Resp. 2 for Year 2 Form 1040, p. 4.

⁵ X, Year 3 Information Package for: Y, p. 4.

*Transaction Steps*⁶

⁶ In general, the transaction steps were the same when the SCE LLC donated easements and/or the land.

Taxpayer, or Taxpayer through a Managed LLC, managed, marketed, and negotiated all transaction steps. From Year 1 through Year 4, Taxpayer generally undertook the following steps to promote and sell the SCE LLC interests. Taxpayer:

1. Identified a third-party owner of an undeveloped piece of land who held the land for more than one year (Landowner). Landowner formed an LLC (Land LLC) and contributed the undeveloped land to Land LLC.
2. Formed a Managed LLC that purchased a% of the interests in Land LLC from Landowner in exchange for cash.
3. Directed Land LLC to subdivide the undeveloped land into parcels, contribute one parcel each to several newly formed LLCs (SCE LLC),⁷ and distribute the SCE LLC interests b% to Landowner and a% to Managed LLC, the same ownership percentages each held in Land LLC. Land LLC continued to hold one of the parcels.

⁷ Taxpayer reported the activities of the SCE LLCs as partnerships for federal tax purposes.

4. Directed Managed LLC to either continue to hold a% interest in each SCE LLC, or distribute the interest to its partners, Taxpayer, A, and B.
5. Managed LLC, or Taxpayer, A, and B, then sold c% of the SCE LLC interests to a newly formed LLC (Investor LLC) of which Managed LLC or Taxpayer was the managing member. Taxpayer used a different newly formed Managed LLC to sell the SCE LLC interests every year. Individual investors contributed tens of thousands of dollars into the Investor LLC to purchase the SCE LLC interests. Managed LLC, or Taxpayer, A, and B, continued to hold d% interest in and act as the managing member of SCE LLC.

Typically, within one to four months from the date of Land LLC's formation, the SCE LLC donated the easement and/or the land to a § 501(c)(3) organization.⁸ The SCE LLC reported the donation as a charitable contribution on its federal tax returns. Taxpayer and the investors, through Investor LLC, claimed a deduction for their distributive shares of the charitable contribution deduction.

⁸ X, Year 3 Information Package for: Y, pp. 7, 14, 21.

Taxpayer, through Investor LLC, made oral and written promises to the investors that they would receive a charitable contribution deduction with respect to the donation of the easement and/or the land many times the amount the investors contributed to Investor LLC.⁹ Although the promotional materials for the Investor LLCs offered the investors several investment options, Taxpayer, acting as managing member of the SCE LLCs caused all the SCE LLCs to donate easements and/or the land to § 501(c)(3) organizations. Taxpayer, through Investor LLC, received a promotional fee or other consideration in connection with the sales of the SCE LLC interests to the investors.¹⁰

⁹ X, Year 3 Information Package for: Y, pp. 14-15.

¹⁰ X, Year 3 Information Package for: Y, p. 7.

From Year 1 through Year 4, Taxpayer and the Managed LLCs, collectively, reported about \$e of gain on the sales of their interests in f SCE LLCs to the Investor LLCs. Other than in Year 4, Taxpayer reported the gain from the sales of the SCE LLC interests as long-term capital gain.¹¹ In Year 4, Taxpayer sold SCE LLC interests directly and reported the gain from these sales as long-term capital gain. During Year 4, Taxpayer also formed an entity that elected to be treated as an S corporation for federal tax purposes. Taxpayer contributed SCE LLC interests to the S corporation that then sold the SCE LLC interests. Taxpayer reported gain on the sales of the SCE LLC interests sold by the S corporation as Schedule E ordinary income. On Taxpayer's personal tax return, Taxpayer reported no other source of income other than the income generated by Taxpayer from the promotion and sale of the SCE transactions.

¹¹ Each Managed LLC reported the sales of the SCE LLC interests as long-term capital gain, its share of the charitable deduction from the SCE LLC, and other expenses associated with the SCE transactions. Each Managed LLC also reported distributions of the SCE LLC sale proceeds.

CCA 202309015 argued that the LLC interests were inventory under Code § 1221:

In *Malat*, the Supreme Court stated, “[a]s used in § 1221(1), ‘primarily’ means ‘of first importance’ or ‘principally.’”¹² The court also explained that the purpose of § 1221 “is to differentiate between the ‘profits and losses arising from the everyday operation of a business’ on the one hand and ‘the realization of appreciation in value accrued over a substantial period of time’ on the other.”¹³

¹² *Malat v. Riddell*, 383 U.S. 569, 572 (1966).

¹³ *Id.* (quoting *Corn Products Refining Co. v. Commissioner*, 350 U.S. 46, 52 (1955); *Commissioner v. Gillette Motor Transport, Inc.*, 364 U.S. 130, 134 (1960)).

The following factors indicate whether property is held primarily for sale to customers in the ordinary course of a trade or business: “(1) the frequency and regularity of sales; (2) the substantiality of sales;” (3) duration of ownership; (4) whether the property held for sale and property held for investment were separately identified; (5) purpose for acquiring the property; (6) sales and advertising efforts; (7) the time and effort devoted to the sales activity; and “(8) how the sales proceeds were used.”¹⁴ “The frequency and regularity of sales are among the most important factors in determining whether an asset is held for investment or as inventory.”¹⁵ Applying these factors, Taxpayer held directly, or through Managed LLCs, the SCE LLC interests primarily for sale to customers (investors).

¹⁴ *Williford v. Commissioner*, T.C. Memo. 1992-450 (citing *United States v. Winthrop*, 417 F.2d 905, 910 (5th Cir.1969); *Byram v. United States*, 705 F.2d 1418, 1424 (5th Cir. 1983); *Ross v. Commissioner*, 227 F.2d 265 (5th Cir. 1955)).

¹⁵ *David Taylor Enterprises, Inc. v. Commissioner*, T.C. Memo. 2005-127 (citing *Suburban Realty Co. v. United States*, 615 F.2d 171, 176 (5th Cir. 1980)).

- (1) From Year 1 through Year 4, Taxpayer sold interests in f SCE LLCs to the Investor LLCs, the sales took place every year, and there were multiple investors in each Investor LLC.
- (2) From Year 1 through Year 4, Taxpayer recognized gain of about \$e from selling the SCE LLC interests to the Investor LLCs.
- (3) The length of time from the acquisition of the Land LLC interests to the sale of Taxpayer’s interests in the SCE LLCs was usually less than a year.
- (4) Taxpayer did not separately identify property held for sale versus property held for investment with respect to the SCE LLC interests.
- (5) Taxpayer directed Managed LLC to acquire an interest in the Land LLC from Landowners to create the SCE LLCs and sell interests in these SCE LLCs quickly, usually within a year.
- (6) Each year from Year 1 through Year 4, Taxpayer vigorously advertised the SCE transactions, through promotional and other written materials and verbal communications, to attract investors who would contribute a minimum of tens of

thousands of dollars to an Investor LLC. Taxpayer also engaged in significant sales activities, resulting in sales of interests in f SCE LLCs with multiple investors buying interests in Investor LLCs every year.

- (7) Taxpayer devoted a substantial amount of time to the SCE transactions. Taxpayer found Landowner with whom Taxpayer negotiated a land purchase price, convinced the Landowner to structure the land sale as a sale of a% interest in Land LLC with Landowner keeping b% in Land LLC.¹⁶ Taxpayer determined the scope and nature of the SCE transactions and arranged financing. Taxpayer directed the subdivision of land in Land LLC, the creation of SCE LLCs and placement of the subdivided land parcels into them, hired appraisers and other professionals, directed the creation of Investor LLC and the promotion and sale of interests therein to investors. As managing member of Investor LLC and in other ways, Taxpayer caused the SCE LLCs to donate the easement and/or the land. Taxpayer repeated these steps every year from Year 1 through Year 4.

¹⁶ X, Year 3 Information Package for: Y, p. 2.

- (8) “Use of sales proceeds to replenish inventory indicates property is held for sale.”¹⁷ Taxpayer clearly intended to replace the SCE LLC interests being sold. From Year 1 through Year 4, Taxpayer created new SCE LLCs and sold Taxpayer’s interests in them. The frequency and size of these transactions support that Taxpayer used the proceeds from the sales of the SCE LLC interests to purchase replacement properties for subsequent similar transactions.

¹⁷ *Williford*, T.C. Memo. 1992-450.

In selling the SCE LLC interests, Taxpayer met each factor relevant to whether property is held primarily for sale to customers in the ordinary course of a trade or business. This confirms that, under § 1221(a)(1), Taxpayer held the SCE LLC interests as inventory “or property held... primarily for sale to customers in the ordinary course of Taxpayer’s trade or business,” not as capital assets. In addition, Taxpayer sold the SCE LLC interests quickly, generally within a year, and did not hold them on a long-term basis. Thus, under *Malat*, Taxpayer realized income “from the everyday operation of a business” and not “the realization of appreciation in value accrued over a substantial period of time.” Therefore, Taxpayer’s gain on the sales of the SCE LLC interests is ordinary income.

In *Corn Products Refining Co.*, a corn products manufacturer’s profits and losses from trading in corn futures were held to be ordinary income, not capital gains under the predecessor to § 1221.¹⁸ The court determined that trading in corn futures was not “separate and apart from [the company’s] manufacturing operations,” but “a form of insurance against increases in the price of raw corn,” which was “closely geared to [the] company’s manufacturing enterprise [and very] important to its successful operation.”¹⁹

¹⁸ *Corn Products Refining Co. v. Commissioner*, 350 U.S. 46 (1955).

¹⁹ *Id.* at 49-50.

The SCE LLC interests sold by Taxpayer are also excepted from the capital asset definition under *Corn Products*, as the SCE LLC interests are not “separate and apart

from” Taxpayer’s operations but are rather “closely geared to” Taxpayer’s business, promoting SCE LLC interests, and are critically “important to its successful operation.”²⁰

²⁰ *Id.*

Section 1221 applies despite § 741

Section 741 provides that in the case of a sale or exchange of an interest in a partnership, gain or loss shall be recognized to the transferor partner. Such gain or loss shall be considered as gain or loss from the sale or exchange of a capital asset, except as otherwise provided in § 751 (relating to unrealized receivables and inventory items).

While the general rule under § 741 treats the sale of partnership interests as a sale of a capital asset, here § 1221 applies, despite § 741, because the legislative history indicates that § 741 contemplates only the sale of partnership assets that are in fact capital assets.

The legislative history of § 741 shows that Congress intended to codify a line of court decisions that held that the sale of a partnership interest is generally considered to be a sale of a capital asset.²¹ In enacting § 741, Congress stated that “[u]nder present decisions the sale of a partnership interest is *generally* considered to be a sale of a capital asset, and any gain or loss realized is treated as a capital gain or loss.”²² Further, Congress intended that “[t]he House and your committee’s bill retain the *general rule* of present law that the sale of an interest in a partnership is to be treated as the sale of a capital asset.”²³

²¹ See *Pollack v. Commissioner*, 69 T.C. 142, 148 (1977) (Tannenwald, J., dissenting).

²² H. Rept. No. 1337, 83d Cong., 2d Sess. (1954) (emphasis added).

²³ S. Rept. 1622, 83d Cong., 2d Sess. (1954) (emphasis added).

In the cases prior to the enactment of § 741, the government took the position that the aggregate theory of partnership determined the result such that the sale of a partnership interest was a sale of the selling partner’s undivided interest in each specific partnership asset.²⁴ The courts rejected the government’s position and found that the sale of a partnership interest was the sale of a capital asset under § 117 (the predecessor to § 1221).²⁵ The courts that addressed the question of the treatment of the sale of partnership interests determined, in part, whether the entity or aggregate theory would prevail in the sale of a partnership interest.²⁶ In these cases, the courts reasoned that because partners did not have a separate or exclusive right to the partnership assets, but rather a common interest in all the assets, a partner’s sale of their partnership interest should be treated as the sale of a capital asset as opposed to the sale of their interest in the partnership assets.²⁷

²⁴ GCM 26379, 1950-1 C.B. 58.

²⁵ See, e.g., *Kessler v. United States*, 124 F.2d 152, 153 (3rd Cir. 1941); *Commissioner v. Shapiro*, 125 F.2d 532, 533 (6th Cir. 1942); *Long v. Commissioner*, 173 F.2d 471, 471-72 (5th Cir. 1949) (finding that a partner’s sale of a partnership

interest is a sale of a capital asset, rather than his share of each asset owned in the partnership).

²⁶ See, e.g., *Kessler, supra*; *Commissioner v. Lehman*, 165 F.2d 383, 384 (2nd Cir. 1948).

²⁷ See, e.g., *Shapiro, supra*; *Commissioner v. Smith*, 173 F.2d 470, 470 (5th Cir. 1949); *Thornley v. Commissioner*, 147 F.2d 416, 422; *Lehman*, 165 F.2d at 385-386.

Notably, the courts that addressed the treatment of the sale of a partnership interest in the pre-1954 cases did not deal with facts that showed the sale of a partnership interest was something other than the sale of a capital asset.²⁸ In other words, the courts were not given the opportunity to consider whether capital gain or ordinary income treatment would apply when a taxpayer was engaged in the business of holding partnership interests for sale to customers. Given the facts of the pre-1954 cases and Congress's intent to codify a line of cases that held that the entity approach should determine the consequences of the sale of a partnership interest, Congress intended to give capital asset treatment only to the sale of partnership interests that are in fact held as capital assets.

²⁸ See, e.g., *Kessler, supra* (advertising agency partnership); *Shapiro, supra* (partnership engaged in the business of manufacturing and selling cosmetics and medicines); *Thornley*, 147 F.2d at 416-17 (3rd Cir. 1944) (advertising agency partnership); *Stilgenbaur v. United States*, 115 F.2d 283, 285 (9th Cir. 1940) (general produce partnership); *Lehman, supra* (brokerage business partnership); *Smith, supra* (oil - field retailer partnership); *Long, supra* (drilling partnership).

Further, Congress's statement that § 741 retained merely the general rule of present law that the sale of a partnership interest is treated as the sale of a capital asset leaves open the possibility for ordinary treatment on the sale of a partnership interest when the facts and circumstances are appropriate.

Here, because the substance of the sales of the SCE LLC interests by the Taxpayer (and the Managed LLCs) were necessary steps in the SCE transactions (facilitated using LLC interests) in the ordinary course of Taxpayer's trade or business of selling SCE LLC interests, § 1221(a)(1) applies to determine the character of the gain on such sales. We are not challenging the entity approach of partnership taken by § 741 (*i.e.*, that the sale of a partnership interest is treated as the sale of a single asset, like corporate stock). The application of § 1221 under the present set of facts harmonizes §§ 1221 and 741 such that capital gain treatment does not apply when a taxpayer's gain or loss arises from the everyday operation of a trade or business. Thus, § 741 does not foreclose treating the gain on the sale of the SCE LLC interests as ordinary income in situations when, as here, the SCE LLC interests were pre-arranged products frequently created and sold to customers (investors).

CCA 202309015 reviewed whether real estate was a Code § 751 asset:

Here, the facts presented do not support that the land was included in the inventory³⁰ of the SCE LLCs or held by the SCE LLCs primarily for sale to customers. Additionally, there are no facts to support that the SCE LLCs were engaged in the trade or business

of selling land. Each SCE LLC donated the easement, and/or the land, to a § 501(c)(3) organization on behalf of the investors. Therefore, § 751(a)(2) and (d)(1) collectively would not apply to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income.

³⁰ Here and elsewhere in this document, potential characterization of real property as inventory is included in the analysis for the sake of consistency with the statutory language in § 751. However, note that the Tax Court has held that real property does not constitute merchandise within the meaning of § 471. See *W.C. & A.N. Miller Development Company v. Commissioner*, 81 T. C. 619 (1983). Accordingly, ordinary income treatment would depend on a determination that the underlying real property constitutes property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

Section 751(a)(2) and (d)(1) would apply, however, to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income if additional facts are presented to support their application. That is, the facts must support that the SCE LLCs were engaged in the trade or business of selling land and that the land held by the SCE LLCs was either inventory or held primarily for sale to customers by the SCE LLCs.

Sections 751(a)(2) and (d)(3)

Collectively, § 751(a)(2) and (d)(3) apply to characterize as ordinary the gain recognized from the sale of a partnership interest attributable to partnership property, which, if held by the selling partner, would be considered: (1) property of the kind described in § 1221(a)(1) and (2) any other property considered to be other than a capital asset and other than property described in § 1231. In other words, ordinary treatment would be appropriate when a partnership asset, if held by the selling partner is, property other than a capital asset to the selling partner; inventory to the selling partner; or held by the selling partner primarily for sale to customers in the ordinary course of the selling partner's trade or business.

Here, the facts presented do not support that Taxpayer (or the Managed LLCs) was in the trade or business of selling land. Promotional materials for the SCE transactions described Taxpayer as not acting as a real estate broker with respect to the SCE transactions. Additionally, in at least one year Taxpayer stated that neither Taxpayer, nor the Managed LLCs, sold land and was not engaged in the business of selling land. Accordingly, the land in the SCE LLCs, if held by Taxpayer (or the Managed LLCs), would have been a capital asset to Taxpayer (or the Managed LLCs) because there is no indication that the land was inventory to the Taxpayer (or the Managed LLCs) or held by Taxpayer (or the Managed LLCs) primarily for sale to customers in the ordinary course of the Taxpayer's (or the Managed LLCs') trade or business. Therefore, § 751(a)(2) and (d)(3) collectively would not apply to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income.

Section 751(a)(2) and (d)(3) would apply, however, to characterize the gain recognized by Taxpayer (or the Managed LLCs) on the sales of the SCE LLCs as ordinary income if additional facts are presented to support their application. That is, the facts must support that the Taxpayer (or the Managed LLCs) was engaged in the business of selling land. In addition, the facts must support that the land held by the SCE LLCs was (i) inventory to the Taxpayer (or the Managed LLCs); (ii) property other than a capital asset to the

Taxpayer (or the Managed LLCs); or (iii) property held by the Taxpayer (or the Managed LLCs) primarily for sale to customers.

CCA 202309015 concluded:

1. Yes. Despite § 741, § 1221 applies to treat Taxpayer's gain on the sales of LLC interests as ordinary income because Taxpayer held the LLC interests primarily for sale to customers in the ordinary course of a trade or business during Year 3 through Year 4.
2. No. Sections 741 and 751(d)(1) and (d)(3) do not collectively apply to treat Taxpayer's gain on the sales of LLC interests as ordinary income because Taxpayer was not engaged in a trade or business of selling land during Year 3 through Year 4.

Presumably "SCE" is an abbreviation for syndicated conservation easement, which the IRS has labeled abusive, describing them as follows in [IR-2022-214 \(12/6/2022\)](#):

In these transactions, investors typically acquire an interest in a partnership that owns land and then claim an inflated charitable contribution deduction based on a grossly overvalued appraisal when the partnership donates a conservation easement on the land.

The promoters in CCA 202309015 were churning out multiple alleged tax schemes. The LLCs were not investment vehicles (any activity involving the land was purely incidental to the primary purpose) but rather arrangements to sell tax benefits. This is very different than a low-income housing tax credit project, new market tax credit project, or qualified opportunity fund that promotes tax benefits expressly intended to promote rental or business activity within the project. I view CCA 202309015 as a narrow approach to impose heavy taxes on those who promote allegedly abusive tax schemes. I am not concerned about spillover into serial entrepreneurs or those with numerous real estate investment portfolios; the latter are already constrained by part II.G.26.a Real Estate Dealer vs. Investor. This paragraph is just a judgment call that may or may not be correct.

II.Q.8.e.ii.(c). Availability of Installment Sale Deferral for Sales of Partnership Interests

Generally, sales of partnership interests are eligible for installment sale deferral under Code § 453 (subject to the limitations of Code §§ 453A and 453B).⁵⁶⁷⁵

However, the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to some of the partnership's "hot assets" under Code § 751⁵⁶⁷⁶ that would not be eligible for the installment sale treatment if sold directly.⁵⁶⁷⁷

⁵⁶⁷⁵ Rev. Rul. 76-483. For more discussion on these limitations and recommended strategies, see part II.G.15 Limitations on the Use of Installment Sales.

⁵⁶⁷⁶ See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

⁵⁶⁷⁷ Rev. Rul. 89-108 held that the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory under Code § 751(d) that would not be eligible for the installment sale treatment if sold directly. It explained:

The IRS has asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered;⁵⁶⁷⁸ consider whether that is a valid argument in light of *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32).⁵⁶⁷⁹

Under section 741 of the Code, the sale of a partnership interest generally is treated as the sale of a single capital asset without regard to the nature of the underlying partnership property. See H.R. Rep. No. 1337, 83d Cong., 2d Sess. 70 (1954). In this respect, the tax treatment of the sale of a partnership interest differs from that accorded the sale of a sole proprietorship. See, e.g., *Williams v. McGowan*, 152 F.2d 570 (2d Cir. 1945), which held that the sale of an entire business as a going concern was the sale of the individual assets of the business. See also Rev. Rul. 68-13, 1968-1 C.B. 195, which holds that the installment sale of a sole proprietorship is generally considered to be a sale of individual assets of the proprietorship for purposes of applying section 453.

Section 751 of the Code was enacted to prevent the conversion of certain potential ordinary income into capital gain upon the sale or exchange of a partnership interest. This section, in effect, severs certain income items from the partnership interest. H.R. Rep. No. 1337, *supra*, at 70, 71, and S. Rep. No. 1622, 83d Cong., 2d Sess. 99 (1954). Thus, to the extent a partnership interest represents substantially appreciated inventory or unrealized receivables described in section 751, the tax consequences to the transferor partner are the same tax consequences which would be accorded an individual entrepreneur. H.R. Rep. No. 1337 at 71, and S. Rep. 1622, *supra*, at 99. In effect, the transferor partner is treated as disposing of the property described in section 751 independently of the rest of his partnership interest. S. Rep. No. 1622 at 98, 99. *George Edward Quick Trust v. Commissioner*, 54 T.C. 1336 (1970), *acq.* 1970-2 C.B. xxi, *aff'd per curiam*, 444 F.2d 90 (8th Cir. 1971); *Woodhall v. Commissioner*, T.C. Memo. 1969-279, *aff'd*, 454 F.2d 226 (9th Cir. 1972).

Gain recognized under section 741 of the Code on the sale of a partnership interest is reportable under the installment method. See Rev. Rul. 76-483, 1976-2 C.B. 131. However, because section 751 effectively treats a partner as if the partner had sold an interest in the section 751 property of the partnership, the portion of the gain that is attributable to section 751 property is reportable under the installment method only to the extent that income realized on a direct sale of the section 751 property would be reportable under such method. Because the installment method of reporting income would not be available on a sole proprietor's sale of the inventory, the installment method is not available for reporting income realized on the sale of a partnership interest to the extent attributable to the substantially appreciated inventory which constitutes inventory within the meaning of section 453(b)(2)(B).

Accordingly, P's income from the sale of the partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory which would not be eligible for installment sale treatment if sold directly. The balance of the income realized by P from the sale of the partnership interest is reportable under the installment method.

⁵⁶⁷⁸ In CCAs 200722027 and 200728001, the IRS asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered, based on its interpretation of some cases as holding that compensation for services could not be reported under the installment method. See *Sorensen v. Commissioner*, 22 T.C. 321 (1954) (a reviewed decision), *followed Mingo v. Commissioner*, T.C. Memo. 2013-149, *aff'd* 773 F.3d 629 (5th Cir. 2014) (the latter also holding that the disallowance of the installment method is a change of accounting method triggering adjustments under Code § 481, to which the statute of limitations does not apply).

⁵⁶⁷⁹ The case is discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5673.

Although publicly traded stock is not eligible for installment sale treatment,⁵⁶⁸⁰ the sale of an interest in a partnership owning publicly traded stock might not preclude deferral.⁵⁶⁸¹ For partnerships that have a lot of hot assets – especially those with significant depreciable property, a Code § 736 redemption⁵⁶⁸² often would generate a much better result.⁵⁶⁸³

II.Q.8.e.iii. Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations

II.Q.8.e.iii.(a). Illustration of Inside Basis Issue

For a more generic description of inside basis and outside basis, see my blog article, “Tax basis: The key to reducing gain on sale or deducting asset purchases.”⁵⁶⁸⁴

Here is an example:

An S corporation has assets with zero basis and \$1,000,000 value.

Sam Sucker buys 50% of stock for \$500,000.

Assets are sold, and S corporation gives Sam a K-1 for his \$500,000 share of the gain. Sam is the proud owner of a \$1,000,000 basis in his stock (\$500,000 purchase price plus \$500,000 K-1) that is worth \$500,000.

Smart Sally finds a partnership with the same characteristics - assets with zero basis and \$1,000,000 value.

Sally buys a 50% partnership interest for \$500,000. The partnership makes a Code § 754 election, giving Sally a \$500,000 in her half of its assets; see part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest. See also part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership’s Assets (Code § 754

⁵⁶⁸⁰ Code § 453(k)(2).

⁵⁶⁸¹ The legislative history to the Tax Reform Act of 1986, P.L. 99-514, suggests that the sale of a partnership interest would be eligible for installment treatment as follows:

The committee intends that any Treasury regulations would not deny use of the installment method if the seller could not have sold, or caused the sale of, the publicly traded stock or securities directly. For example, a retiring partner in a large investment partnership makes an installment sale of his partnership interest, a substantial portion of the value of which is attributable to stocks and securities held by the partnership. Provided that the retiring partner, could not have sold or caused the sale of the partnership’s assets directly, the gain on the sale of the partnership interest may be reported on the installment method.

The letter ruling described in fn. 4100 held that the installment method applied to the sale of stock in an S corporation that appears to have held only marketable securities, suggesting that Code § 453(k)(2) would not apply absent regulations being promulgated.

⁵⁶⁸² See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

⁵⁶⁸³ See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially fn. 5548.

⁵⁶⁸⁴ <http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases>.

Election or Required Adjustment for Built-in Loss). For a single member LLC, any change to outside basis would automatically apply to the inside basis.⁵⁶⁸⁵

When the partnership sells its assets, Sally has no gain on that sale and is content with her \$500,000 basis. If assets are not sold, Sally is happy with any depreciation on her share of assets

Going back to Sam, he does have a way to avoid this terrible result. If the S corporation is liquidated in the same year in which the assets are sold, he can apply his \$1 million basis to his \$500,000 liquidation proceeds to net a \$500,000 loss, which he may be able use to offset gain on the sale of the corporation's assets. See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, especially part II.H.8.a.i Solution That Works for Federal Income Tax Purposes (To an Extent). However, if Sam lives in a different state than wherever the assets sale is sourced, then the Sam's loss on the sale of the stock will not offset the gain on the sale of the assets; see part II.H.8.a.ii State Income Tax Disconnect. Also, to the extent that the S corporation's assets generated ordinary income on sale, such as recapture of depreciation of personal property, Sam's capital loss from liquidation will not offset Sam's ordinary income from the asset sale; see part II.H.8.b Depreciable Personal Property in an S Corporation. Finally, if a substantial part of the S corporation's assets is sold, but an even larger part is not sold, the other owners are unlikely to be willing to liquidate.

However, Code § 338(h)(10) provides a special opportunity when all of the stock in an S corporation is sold and the S corporation is liquidated. The election allows the parties to treat all of the S corporation's assets as having been sold to the person that bought the S corporation stock, enabling the buyer to get a new tax basis on the assets. Meanwhile, the deemed gain on sale of the S corporation's assets increases the basis of the stock in the S corporation, so that often the shareholders are not taxed on the stock's sale and might even have a loss on the sale.⁵⁶⁸⁶ The main downside⁵⁶⁸⁷ to the selling shareholders is that the deemed asset sale might trigger ordinary income taxation (including without limitation depreciation recapture of Code § 1245 property, which is generally depreciable tangible personal property) or higher capital gain taxation (including without limitation the sale of Code § 1250 property, which generally is depreciable real estate), whereas they generally would have paid lower regular long-term capital gain rates on the sale of their S corporation stock had they not made the Code § 338(h)(10) election.

⁵⁶⁸⁵ See fn. 2111 in part II.H.2.h Basis Step-Up for Property Held Outside an Entity; Moving Liabilities Outside of an Entity to Maximize Deductions for Estate Tax Purposes, the latter which points out that results may be better not holding assets in an entity.

⁵⁶⁸⁶ Reg. § 1.338(h)(10)-1(d)(5)(i) provides:

In general. If T is an S corporation target, S corporation shareholders (whether or not they sell their stock) take their pro rata share of the deemed sale tax consequences into account under section 1366 and increase or decrease their basis in T stock under section 1367. Members of the selling consolidated group, the selling affiliate, or S corporation shareholders are treated as if, after the deemed asset sale in paragraph (d)(3) of this section and before the close of the acquisition date, they received the assets transferred by old T in the transaction described in paragraph (d)(4)(i) of this section. In most cases, the transfer will be treated as a distribution in complete liquidation to which section 331 or 332 applies.

See part II.Q.7.a.vii Corporate Liquidation for the tax consequences of the deemed liquidation.

⁵⁶⁸⁷ For former C corporations that have made their S election too recently, beware of part II.P.3.b.ii Built-in Gain Tax.

Code § 338(h)(10) is also available for C corporations, but it does not provide the same benefits to the sellers, in that the corporation's recognition of gain on its deemed sale of assets does not increase its shareholders' stock basis.

II.Q.8.e.iii.(b). Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss)

Upon a partner's death (including the death of the grantor of a revocable trust,⁵⁶⁸⁸ of the beneficiary of a QTIP trust,⁵⁶⁸⁹ or presumably of the holder of a general power of appointment⁵⁶⁹⁰) or on the sale or exchange of a partnership interest, the partnership's property's basis is adjusted under Code § 743 if the partnership has in effect a Code § 754 election⁵⁶⁹¹ and makes a Code § 754 election on the return that covers the taxable period that includes the date of death, which election might be filed⁵⁶⁹² up to 12 months after the due

⁵⁶⁸⁸ Rev. Rul. 79-84, which reasoned as follows in arriving at that conclusion:

Before A's death, A had powers over T of the types described in sections 676 and 677 of the Code, and T was therefore a grantor trust. Additionally, T held a partnership interest. Under the principles of Rev. Rul. 77-402, A is considered to have been the partner during this period for federal income tax purposes. Further, at the time of A's death T ceased to be a grantor trust. The partnership interest is thus considered to have been transferred from A to T at that time. As a result, a transfer of a partnership interest occurred upon the death of a partner.

See also Reg. § 1.1001-2(c), Example (5) is reproduced in fn 6639 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System. Query whether an irrevocable trust for the benefit of A's spouse, which would have been a grantor trust under Code § 677 but excluded from A's estate, would qualify for this treatment.

⁵⁶⁸⁹ The IRS seems to believe that a Code § 743(a) adjustment would apply when a QTIP trust holds a partnership interest and the surviving spouse dies, even though the individual who died is not actually a partner. See Letter Ruling 200019029 (approving a late Code § 754 election without addressing the literal language of Code § 743(a)). Note that Code § 1014(b)(10), which provides a basis adjustment for QTIP assets when the surviving spouse dies, was enacted after Code § 743(a). Thus, considering the surviving spouse to be a partner for purposes of Code § 743(a) is consistent with the philosophy of Code § 1014(b)(10) and should, as a matter of tax policy, be the correct result, even though it seems inconsistent with the literal language of Code § 743(a). See also part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743.

⁵⁶⁹⁰ Inclusion in the surviving spouse's estate under fn 5689 is not as direct an estate inclusion as inclusion by reason of a general power of appointment. See text accompanying fn 3810 in part II.O.2.e Marital Deduction Trusts - Discount Planning.

⁵⁶⁹¹ Code § 743(a) does not address whether an adjustment of basis in partnership property may occur by reason of other transfers without a Code § 754 election. For example, the statute does not address whether an adjustment would be made with respect to a transfer by gift (*i.e.*, not a transfer by sale or exchange or the death of a partner which are referenced in Code § 743) even if a Code § 754 election is in place. Code § 1015(d), allowing a basis adjustment for gift tax paid, was not in existence when Code § 743 was enacted. That might be why Code § 743 does not discuss the gift situation. The legislative history when Code § 1015(d) was adopted makes no mention at all of this partnership issue. The issue would seem to be: would an inside adjustment of partnership property be made in the absence of a statute (since no statute is applicable) under general tax principles? That is further complicated by the fact that tax principles sometimes use an aggregate theory and sometimes an entity theory with respect to partnerships. Although perhaps a position might be taken that the payment of gift tax should trigger an inside basis adjustment, if I were to take that position I would disclose it on Form 8725. A safer approach might be to follow the payment of gift tax by a transfer, which part II.Q.8.e.i Distribution of Partnership Interests discusses generally would give rise to an inside basis adjustment.

⁵⁶⁹² T.D. 9963 (2022) removed the signature requirement from Reg. § 1.754-1(b); REG-116256-17 (10/12/2017) issued proposed regulations to that effect, on which taxpayers could then rely.

date.⁵⁶⁹³ The IRS frequently issues private letter rulings providing additional time to make the election; for example, Letter Ruling 202410001 involved the following facts:

X was formed under the laws of State on Date 1 and was treated as a partnership for federal tax purposes. A, a partner in X, died on Date 2. X inadvertently failed to make a § 754 election for its taxable year ended Date 3.

Letter Ruling 202410001 ruled:

Based solely on the information submitted and the representations made, we conclude that the requirements of §§ 301.9100-1 and 301.9100-3 have been satisfied. As a result, X is granted an extension of time of 120 days from the date of this letter to make an election under § 754 effective for X's taxable year ended Date 4. The election should be made in a written statement filed with the appropriate service center accompanying Form 1065-X, Amended Return or Administrative Adjustment Request (AAR), or Form 8082, Notice of Inconsistent Treatment or AAR, and for any related filings as instructed in Form 1065-X or Form 8082, as appropriate. A copy of this letter should be attached to the relevant filing.

This ruling is contingent on X's relevant filing(s) containing adjustments to the basis of X's properties to reflect any § 734(b) or § 743(b) adjustments that would have been made if the § 754 election had been timely made. These basis adjustments must reflect any additional deductions for recovery of basis related to X's property that would have been allowable if the § 754 election had been timely made, regardless of whether the statutory period of limitations on assessment or filing a claim for refund has expired for any year subject to this grant of late relief. Any deductions for recovery of basis allowable for an open year are to be computed based on the remaining useful life or recovery period and using property basis adjusted by the greater of such deductions allowed or allowable in any prior year had the § 754 election been timely made.

⁵⁶⁹³ Reg. § 301.9100-2(a)(2)(vi) grants an automatic 12-month extension from the due date of the partnership's return, including extensions (Reg. § 301.9100-2(a)(1)), with the election made on an amended return (Reg. § 301.9100-2(c)).

In addition to making the election, the partnership must attach a statement to its tax return that reports the name and taxpayer identification number of the transferee partner, the basis adjustment computation, and the allocation of the basis adjustment to the partnership's properties. Reg. § 1.743-1(k)(1). The transferee partner has an obligation to provide written notice to the partnership of the information needed to compute the basis adjustment, as listed in Reg. § 1.743-1(k)(2). Once that notice is given, the partnership can rely on that information in preparing the adjustment, as long as no partner who is responsible for federal income tax reporting has any knowledge that the information is clearly erroneous. Reg. § 1.743-1(k)(3). Failure to attach this statement would not appear to invalidate the Code § 754 election; this result is inferred by the fact that Reg. § 1.743-1(k)(2) provides procedures for when errors or omissions are made in complying with obligations under Reg. § 1.743-1(k).

Does the long term holding period under Code § 1233(9), that applies when assets are included in a decedent's estate, also apply to the portion of the basis of a partnership's assets that constitutes a basis adjustment under Code § 743? Rev. Rul. 68-79 says that, generally, the change in the holding period of a partnership interest does not change the partnership's holding period in its assets. However, it does not address the impact, if any, on a Code § 754 election. With one exception, regulations under Code §§ 743, 755 and 1233 do not address this issue. Reg. § 1.743-1(j)(4)(i)(B)(1) restarts the holding period for depreciable property when there is a positive adjustment but does not change it when there is a negative adjustment, Reg. § 1.743-1(j)(4)(ii)(B).

If the partnership is required to file an AAR to properly amend a partnership return, then this ruling is also contingent on X filing Form 1065-X or Form 8082 and accounting for the adjustments required by § 6227(b).

Additionally, the partners of X must adjust the basis of their interests in X to reflect what the basis would be if the § 754 election had been timely made, regardless of whether the statutory period of limitations on assessment or filing a claim for refund has expired for any year subject to this grant of late relief. Specifically, the partners of X must reduce the basis of their interests in X in the amount of any additional deductions for the recovery of basis related to X's property that would have been allowable if the § 754 election had been timely made.

Instead of the time and expense of obtaining a private letter ruling, consider effectuating a transaction that triggers another opportunity to make and effectuate the election. See part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743, including not only a variety of actual or deemed nontaxable exchanges that are treated as distribution but also a suggestion that a trust's or estate's distribution of a partnership interest (other than distributing specifically bequeathed property), triggers application of a Code § 743 adjustment. Thus, even though ideally one should make a Code § 754 as of the year of death (if one decides to make the election), if the suggestion described in the preceding sentence is correct then one may also make a Code § 754 election as of the year in which the revocable trust or estate distributes property (other than a specific bequest). A corporate liquidation would also be a triggering event – even if it is a nontaxable event.⁵⁶⁹⁴

Whether or not the election provided in Code § 754 is in effect, the basis of partnership property is not adjusted as the result of a contribution of property, including money, to the partnership.⁵⁶⁹⁵ The Code § 754 election may not be filed in a year before death occurs, unless some other Code § 743 or 734 event occurs in the year covered by the filing.⁵⁶⁹⁶ When a partnership

⁵⁶⁹⁴ CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," reasoned:

Sale or exchange is not defined in § 743, the regulations thereunder, or the legislative history of the provision. Section 743 was enacted to ameliorate the tax consequences to a transferee partner by giving a partnership the option to eliminate discrepancies between a transferee partner's inside and outside basis when the partnership's inside basis in its property is not equal to the fair market value of the property. *Jt. Comm. On Taxation, Summary of the New Provisions of the Internal Revenue Code of 1954*, at 92 (1955).

General Counsel Memorandum 35921 (July 29, 1974) held that for purposes of § 743(b), a transfer of a partnership in a liquidation under former § 333 was not a transfer of an interest by sale or exchange. As demonstrated by the GCM, whether the distribution of a partnership interest by a liquidating corporation was a sale or exchange was considered an open question prior to the Deficit Reduction Act of 1984 (1984 Act). See, e.g., John S. Pennell and Terence F. Cuff, "Tax Results of Liquidation of Corporate Partner Still Unclear Despite DRA 1984," *Journal of Taxation*, Vol. 62, No. 2 (February 1985).

⁵⁶⁹⁵ Reg. § 1.743-1(a). Instead, see part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.

⁵⁶⁹⁶ Reg. § 1.754-1(b), which is modified in certain ways as described in fn 5693, provides: An election under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b), with respect to a distribution of property to a partner or a transfer of an interest in a partnership, shall be made in a written statement filed with the partnership return

interest is community property and receives an outside basis adjustment of both halves, both halves are eligible for a corresponding inside basis adjustment by reason of that death.⁵⁶⁹⁷

Tiered partnerships may carry the effect of Code § 754 elections throughout the partnership system, if each layer has an election in place. Two revenue rulings describe these rules. First, the facts and holdings of Rev. Rul. 78-2 were:

X, an investment partnership, was formed for the purpose of holding interests in operating real estate partnerships. X is a partner of partnership Y, an operating real estate partnership

For purposes of sections 743 and 754 of the Code, a sale or exchange of an interest in X or the death of a partner of X is considered to result in an adjustment to the basis of the property of Y as though the transferee partner were a partner of Y.

Accordingly, upon the transfer of an interest in X by sale or exchange or on the death of a partner of X during a taxable year with respect to which elections under section 754 of the Code are in effect for X and Y, the adjustment to the basis of partnership property under section 743(b) will include, (a) an adjustment to X's partnership interest in Y and (b) an equivalent basis adjustment to Y's property with respect to X and the transferee partner of X only. Compare Rev. Rul. 77-309, 1977-2 C.B. 216, concerning the allowance of a distributive share of partnership loss to a limited partner in a limited partnership that is itself a limited partner of another limited partnership.

The facts of Rev. Rul. 87-115 were:

UTP is a partnership in which A, B, C, and D are equal partners. UTP is a partnership in which A, B, C, and D each contributed 30x dollar of cash to UTP upon its formation, and they each have a 30x interest in partnership capital and surplus. A's share of the adjusted basis of partnership property is 30x dollars, the sum of A's interest as a partner in partnership capital and surplus, plus A's share of partnership liabilities (neither UTP nor LTP have any liabilities). UTP is an equal partner in LTP, along with X and Y. LTP was formed by X, Y, and Z, who each contributed 110x dollars of cash to LTP upon its formation. UTP purchased its interest in LTP from Z for 80x dollars in a taxable year for which LTP did not have an election under section 754 in effect. UTP, X, and Y each have a 110x dollar interest in partnership capital and surplus.

UTP has an adjusted basis of 120x dollars in its property as follows: an adjusted basis of 80 dollars in its partnership interest in LTP and an adjusted basis of 40x dollars in inventory. UTP's partnership interest in LTP has a fair market value of 120x dollars, and UTP's inventory has a fair market value of 80x dollars. LTP has only one asset, a capital asset that is not a section 751 asset. LTP's asset has an adjusted basis of 330 x dollars and a fair market value of 360x dollars.

for the taxable year during which the distribution or transfer occurs. For the election to be valid, the return must be filed not later than the time prescribed by paragraph (e) of § 1.6031-1 (including extensions thereof) for filing the return for such taxable year (or before August 23, 1956, whichever is later). Notwithstanding the preceding two sentences, if a valid election has been made under section 754 and this section for a preceding taxable year and not revoked pursuant to paragraph (c) of this section, a new election is not required to be made....

⁵⁶⁹⁷ Rev. Rul. 79-124.

In 1985, A sold A's entire interest in UTP to E for 50x dollars.

Situation 1

Both UTP and LTP have valid section 754 elections in effect.

Situation 2

UTP has a section 754 election in effect, but LTP does not.

Situation 3

UTP does not have a section 754 election in effect, but LTP does.

Rev. Rul. 87-115 reviewed Rev. Rul. 78-2, then reasoned:

In essence, if an election under section 754 is not in effect, the partnership is treated as an independent entity, separate from its partners. Thus, absent a section 754 election, even though the transferee receives a cost basis for the acquired partnership interest, the partnership does not adjust the transferee's share of the adjusted basis of partnership property. If, however, an election under section 754 is in effect, the partnership is treated more like an aggregate of its partners, and the transferee's overall basis in the assets of the partnership is generally the same as it would have been had the transferee acquired a direct interest in its share of those assets. Nevertheless, the transferee's adjusted basis for specific partnership assets will not necessarily equal the basis the assets would have had if the transferee had acquired a direct interest in the assets. The difference is due to the fact that the transferee's basis in specific partnership assets is controlled by section 755, which does not adopt a pure aggregate approach. See section 1.755-1(c) of the regulations.

Situation 1

E purchased A's interest for 50x dollars. Thus, under section 742, E's basis in E's partnership interest is 50x dollars. Because UTP made a valid section 754 election, under section 743(b) UTP must increase the adjusted basis of its property by 20x dollars, the excess of the transferee partner's basis in the partnership interest (50x dollars) over that partner's share of the adjusted basis of such property. Under section 1.743-1(b)(1), E's share of the adjusted basis of partnership property is 30x dollars, because E succeeds to A's interest in partnership capital and surplus. See, *e.g.*, section 1.743-1(b)(1) Example (2). The 20x dollar special basis adjustment raises UTP's adjusted basis in its partnership property to 140x dollars, but the additional 20x dollars must be segregated and allocated solely to E. Under section 755, the 20x dollars must be allocated between capital assets (UTP's interest in LTP) and other assets (UTP's inventory).

Under section 1.755-1(b)(2) of the regulations, to the extent that an amount paid by a purchaser of a partnership interest (here, 50x dollars) is attributable to the value of capital assets (here, 120x dollars, the value of UTP's interest in LTP), any difference between the amount so attributable and the transferee partner's share of the partnership basis of such property constitutes a special basis adjustment with respect to such capital assets. In the instant case, 30x dollars (60 percent of 50 x dollars) of E's purchase price

is attributable to the value of UTP's interest in LTP, because 120 x dollars, the value of UTP's interest in LTP, is 60 percent of 200x dollars, the total value of UTP's property. Thus, 10x dollars, the difference between the 30 x dollars attributable to the value of UTP's interest in LTP and 20x dollars, E's proportionate share of UTP's basis in LTP, is a special basis adjustment to UTP's interest in LTP. This adjustment gives E an adjusted basis of 30x dollars in UTP's interest in LTP. The remaining 10 x dollars of the 20x dollar special basis adjustment is allocated to the adjusted basis of UTP's inventory. This gives E a 20x dollar adjusted basis in UTP's inventory.

Because UTP made a section 754 election manifesting an intent to be treated as an aggregate for purposes of sections 754 and 743, it is appropriate, for purposes of section 743 and 754, to treat the sale of A's partnership interest in UTP as a deemed sale of an interest in LTP. The selling price of E's share of UTP's interest in LTP is deemed to equal E's share of UTP's adjusted basis in LTP, 30x dollars ($\frac{1}{4}$ of 80x dollars plus 10x dollars, E's special basis adjustment). Further, this deemed sale of an interest in LTP triggers the application of section 743(b) to LTP. Because LTP made a valid section 754 election, under section 743(b) LTP must increase the adjusted basis of its partnership property by 2.5x dollars, the excess of E's share of UTP's adjusted basis in LTP (30x dollars) over E's share of the adjusted basis of LTP's property ($\frac{1}{4}$ of 110x dollars, or 27.5x dollars). Section 755 applies to LTP to allocate this basis adjustment, but because LTP has only one asset, no allocation is necessary. The 2.5 x dollar adjustment must be segregated and allocated solely to UTP and E, the transferee partner of UTP.

Situation 2

UTP has made a valid section 754 election. Thus, as in Situation 1, E gets an adjusted basis of 30x dollars in UTP's interest in LTP and an adjusted basis of 20x dollars in UTP's inventory. Also, as in Situation 1, because UTP made a section 754 election, it is appropriate, for purposes of sections 754 and 743, to treat the sale of A's interest in UTP as the sale of an interest in LTP. However, in this situation, LTP does not have a section 754 election in effect. That is, under section 743(a), LTP chose not to have the basis of its property adjusted as the result of the transfer of an interest in it. Thus, E's purchase of a partnership interest in UTP has no effect on LTP's adjusted basis in its property.

Situation 3

LTP has made a valid election under section 754, but UTP does not make a section 754 election. On the sale by A of an interest in UTP, E succeeds to A's 20x dollar adjusted basis in UTP's interest in LTP and to A's 10 x dollar adjusted basis in UTP's inventory. E succeeds to these bases because, by not making a section 754 election, UTP chose not to have the basis of its property adjusted as the result of the transfer of an interest in UTP.

In addition, by not making a section 754 election, UTP manifested an intent to be treated as an entity for purposes of sections 754 and 743. Thus, it is inappropriate, for purposes of sections 754 and 743, to treat A's sale of an interest in UTP as the sale of an interest in LTP. Consequently, UTP cannot increase E's share of the basis of LTP's property. Nevertheless, LTP's section 754 election is not meaningless. If UTP were to sell its

partnership interest in LTP, the purchaser's share of the adjusted basis of LTP's assets would be adjusted.

Rev. Rul. 87-115 held:

Situation 1

Upon the sale of A's partnership interest in UTP, the transferee's (E's) share of UTP's adjusted basis in its assets is adjusted by the amount by which the basis in E's partnership interest differs from E's share of UTP's adjusted basis in its assets. In addition, E's share of LTP's adjusted basis in its assets is adjusted by the amount by which E's share of UTP's adjusted basis in LTP differs from E's share of the adjusted basis of LTP's property.

Situation 2

Upon the sale of A's partnership interest in UTP, E's share of UTP's adjusted basis in its assets is adjusted by the amount by which the basis in E's partnership interest differs from E's share of UTP's adjusted basis in its assets. However, because LTP did not make a section 754 election, the transfer does not affect LTP's adjusted basis in its property.

Situation 3

The sale of A's partnership interest in UTP does not affect either UTP's adjusted basis in its property or LTP's adjusted basis in its property.

Letter Ruling 201906002 reasoned:

As stated in Rev. Rul. 87-115, when an upper-tier partnership has a § 754 election in effect, any § 743(b) adjustment resulting from the deemed transfer is segregated and allocated solely to the transferee of the upper-tier partnership interest.

Further, with respect to any increase in the basis of partnership property under § 743, a partnership is treated as an aggregate of its owners under the anti-churning rules. Section 197(f)(9)(E).

See part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules.⁵⁶⁹⁸

If the basis of the transferee partner's partnership interest is greater than the former partner's share of the basis of the partnership's assets, then the election will give the new partner a stepped-up basis in the partnership assets.⁵⁶⁹⁹ This basis adjustment is not necessarily tied to the change in basis between the old and new partner; rather, it is based on the relationship between the basis in the partnership interest (the "outside basis") and basis of the partnership's assets allocable to that partner (the "inside basis"). Of course, a change in basis of the partnership interest affects this relationship. However, prior changes in basis of the partnership

⁵⁶⁹⁸ Especially text accompanying fns 4198-4199 in part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules.

⁵⁶⁹⁹ Code § 743(b). Note that previously non-amortizable self-created goodwill becomes purchased amortizable goodwill. Letter Ruling 9715008 (but only if the remaining partners and the selling partner are not related under Code § 197(f)(9)(C)). See also.

also count. In fact, a substituted basis transaction, in which the basis in the partnership interest might or might not change, triggers the basis adjustment;⁵⁷⁰⁰ however, no adjustment is made in a substituted basis transaction if the outside basis equals the inside basis.⁵⁷⁰¹ If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment;⁵⁷⁰² as described above, that basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis."

In a sale or exchange situation, the transferee partner's basis step-up in partnership assets is based on the extent to which the partner's basis in the partnership interest exceeds the basis of the partner's share of the partnership's assets; any contingent payments cause a basis increase to the extent they constitute gain to the seller and potentially deductible interest to the extent they constitute interest income to the seller.⁵⁷⁰³ If the transfer is caused because of a partner's death, the basis step-up is based on the fair market value of the deceased partner's partnership interest as of the date of death, plus the transferee partner's share of partnership liabilities, minus any allocable income in respect of a decedent items;⁵⁷⁰⁴ although liabilities are included in the basis of a partnership interest, they do not generate a basis increase in the partnership's assets.

A partner's share of income in respect of a decedent under Code § 691 (including unrealized receivables) does not receive a basis step-up.⁵⁷⁰⁵ Unrealized receivables are not eligible for a basis step-up, but goodwill that is not being amortized is eligible for a basis step-up.⁵⁷⁰⁶

When a person's partnership interest is liquidated, the basis of the partnership interest is allocated to the assets that person receives.⁵⁷⁰⁷

- This has led to the observation that, if one is going to liquidate the partnership anyway, a Code § 754 election might not be necessary. However, if the partnership sells its assets and then liquidates, then this strategy might not work as well for state income tax purposes

⁵⁷⁰⁰ Reg. § 1.755-1(b)(5). Reg. § 1.755-1(b)(5)(iv), Example (2) provides a basis adjustment as the result of a wholly nontaxable contribution to a partnership under Code § 721.

⁵⁷⁰¹ Reg. § 1.755-1(b)(5)(ii) provides, If the total amount of the basis adjustment under section 743(b) is zero, then no adjustment to the basis of partnership property will be made under this paragraph (b)(5).

⁵⁷⁰² See part II.Q.8.e.i Distribution of Partnership Interests.

⁵⁷⁰³ Letter Ruling 9715008, which also held that contingent payments made more than 6 months after the date of the sale would be divided into additional principal and unstated interest under Reg. § 1.1275-4(c).

⁵⁷⁰⁴ Code § 743; Reg. § 1.742-1. Code § 691 income in respect of a decedent includes the portion of the distributive share of partnership income of the decedent partner's successor in interest that is attributable to the decedent for the period ending with the date of the decedent's death. Letter Ruling 9715008. See also Rev. Rul. 66-325 (no basis step-up for accounts receivable under Code § 743 because Code § 736(a) applied); *Long v. Commissioner*, 71 T.C. 1 (1978), *aff'd* 660 F.2d 416 (10th Cir. 1981) (estate increased its basis in partnership interest to extent it paid liabilities); *Hesse v. Commissioner*, 74 T.C. 1307 (1980) and Letter Ruling 9102018 (no basis step-up for distributive share of income that is attributable to decedent for the period ending with the date of his death – obsolete by later changes to Code § 706 because the income is reported on the decedent's final return and therefore not an unrecognized item at death). Regarding basis step-up attributable to liabilities, see fn 2105 in part II.H.2.g Partnership Basis Adjustments.

⁵⁷⁰⁵ Reg. § 1.755-1(b)(4)(i).

⁵⁷⁰⁶ Example provided in Reg. § 1.755-1(b)(4)(ii).

⁵⁷⁰⁷ Code § 732(b).

as it does for federal income tax purposes;⁵⁷⁰⁸ a Code § 754 election might be particularly important if the owner of the partnership interest resides in a state other than the state in which the partnership does business.

- These rules can generate opportunities to enhance the basis of an asset to be sold (but might be attacked if used to accelerate or duplicate recognition of loss):⁵⁷⁰⁹
 - A partner who receives low basis assets can use the basis in his partnership interest to increase the basis in those assets. If a Code § 754 election is not in effect, then this basis increase is not matched by a corresponding decrease in the distributed asset. Absence of a Code § 754 election might⁵⁷¹⁰ or might not⁵⁷¹¹ be considered abusive in such a case.
 - If a partnership interest with a low basis is liquidated in exchange for high basis assets, a Code § 754 election will take into account the basis reduction in the distributed asset and increase the basis in its remaining assets by a corresponding amount.

Once a Code § 754 election is made, it cannot be revoked without IRS consent. This is extremely important to remember, since the election can lead to a step-down in the basis of partnership assets if the basis of the transferee's interest is less than the transferor's partnership property adjusted basis.

Because a Code § 754 election is irrevocable, consider dividing a partnership before making the election; divisions generally are income tax-free.⁵⁷¹² Reasons to avoid Code § 754 elections except to the extent necessary include:

- Avoiding record-keeping requirements regarding events where basis changes are not worth the complexity.
- Reducing the possibility of events causing an inside basis step-down. However, sometimes basis reductions must be made as if a Code § 754 election were in effect.⁵⁷¹³ To avoid possible unwanted inside basis reductions, one should consider monitoring a partnership's unrealized losses and realizing losses to the next necessary to keep net unrealized losses comfortably below \$250K.

⁵⁷⁰⁸ By analogy, when an S corporation sells its assets to a third party and liquidates, it can replicate in many ways the partnership result for federal income purposes but not necessarily for state income tax purposes. Compare part II.H.8.a.i Solution That Works for Federal Income Tax Purposes with part II.H.8.a.ii State Income Tax Disconnect.

⁵⁷⁰⁹ See part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

⁵⁷¹⁰ See example in fn. 5449 (absence of Code § 754 election considered a duplication of loss). However, Congress has since attacked this abuse (see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000), so the concerns expressed in the example might be less likely to be applied now.

⁵⁷¹¹ See fn. 5448.

⁵⁷¹² See part II.Q.8.d Partnership Division.

⁵⁷¹³ See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

The partnership and the transferee partner, including a decedent's estate, should consider extending their income tax returns so that any IRS adjustments to basis, including the value of assets in the decedent's gross estate, can be reflected in the transferee partner's income tax returns; ignoring the interplay of these statutes of limitations can cause the taxpayer to lose the benefit of the basis step-up.⁵⁷¹⁴ For example, suppose decedent died December 1, 2004, and the partnership sold assets December 31, 2004. The estate tax return is due August 1, 2005 (nine months after death) and may be audited as late as August 1, 2008. The estate's income tax return for calendar year 2004 is due April 15, 2005, and may be amended only as late as April 15, 2008. Thus, audit adjustments on the estate tax return might be made between April 15, 2008 and August 1, 2008, but the estate could not amend its income tax return to reflect any increase in basis due to the audit. The partnership should extend the due date of its return.⁵⁷¹⁵ Additionally, the estate could file an extension for its initial income tax return, so that the return is filed timely between August 1, 2005 and October 15, 2005 (six months being the latest date for an extension). An alternative to extending the estate's income tax return might be for the estate to choose a fiscal year ending on or after April 30, 2005; note that a Code § 645 election would be required if the decedent's partnership interest were held in a revocable trust. Additional measures may be required to preserve the basis step-up.⁵⁷¹⁶

If the partnership's assets are included in the decedent's gross estate under Code § 2036, the partnership's assets will receive a basis adjustment, without regard to whether a Code § 754 election was made;⁵⁷¹⁷ any gift of a partnership interest brought back under Code § 2036 qualifies for the new basis, even though the donee and not the donor's estate owned the partnership interest,⁵⁷¹⁸ and the partnership (and possibly the partners) needs to take

⁵⁷¹⁴ In *Malm v. U.S.*, 420 F.Supp. 1040 (D.C. N.D. 2005), the court stated:

Harry Malm died on August 5, 1998. His estate included shares of Medtronic stock. The IRS disputed the estate's valuation of that stock. The dispute wound up in court, and on July 23, 2003, this Court ruled that the IRS' stock valuation was correct....As a result of this ruling, the Medtronic stock had a higher fair market value than reported by the estate on its federal estate tax return. Therefore, the estate's federal income tax return overstated the amount of the gain on the sale of this stock....The estate filed its income tax return on November 14, 1999. Since the estate did not file a claim for a refund on that return until February 12, 2004, its claim is barred by the statute of limitations.

⁵⁷¹⁵ The partnership will need to make any Code § 754 election no later than the extended due date of the return. If the election does not look worthwhile but upon audit it starts looking worthwhile, the IRS will not grant Code § 9100 relief. Letter Ruling 200626003.

⁵⁷¹⁶ See text accompanying and following fn 1423 in part II.G.4.m.i Code § 1341 Claim of Right Deduction.

⁵⁷¹⁷ Letter Ruling 200626003. See *Hurford*, discussed in fn 1576 in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.

⁵⁷¹⁸ *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, an equitable recoupment case described more fully in the text accompanying and preceding fn 1427 in part II.G.4.m.ii Equitable Recoupment, which held:

Respondent argues that if we determine the estate is entitled to equitable recoupment, we should limit the recoupment to the income taxes paid by Jerry Lou and Gerald, who, pursuant to Ms. Jorgensen's will and revocable trust, are ultimately responsible for the estate tax liability. The grandchildren are not liable for the estate tax deficiency. In *Estate of Branson*, the residuary beneficiary, like Gerald and Jerry Lou, was responsible for the estate tax liability and was the one who overpaid income tax, thus entitling the estate to equitable recoupment. However, the relevant caselaw does not indicate that the taxpayer who overpaid tax must be the one responsible for the related deficiency for equitable recoupment to apply.

appropriate steps to preserve the use of this basis step-up for sales that occur after death and before any estate tax audit concludes.⁵⁷¹⁹ Consider whether an estate that is well below the threshold for paying estate tax would argue that any partnership interest it holds should be disregarded under Code § 2036 and the underlying assets included in the estate, so that the assets could get a higher basis step-up.⁵⁷²⁰ Query the level of proof required to invoke Code § 2036 in such a situation.⁵⁷²¹ The logistics of this inside basis step-up are unclear:

We have found that there was an implied agreement that Ms. Jorgensen would retain control of the assets she contributed to the partnerships even though she purported to give partnership interests to her children and grandchildren. The partnerships paid her expenses including her Federal and California estate tax liabilities (as calculated on the estate tax returns). The assets were included in her gross estate as if they had not been transferred to the partnerships. The goal of Ms. Jorgensen's gift program was to reduce the value of her estate; i.e., a testamentary goal. Because of the program, the objects of her bounty, her children and grandchildren, paid income taxes on assets that were later determined to be properly included in valuing her gross estate, thus subjecting those assets to improper double taxation. Under these circumstances, we find that there is sufficient identity of interest between Ms. Jorgensen's estate and her children and grandchildren.

It would be inequitable for the assets to be included in the value of Ms. Jorgensen's gross estate under section 2036 on the one hand, and on the other hand for the estate not to recoup the income taxes her children and grandchildren overpaid on their sale of those very same assets but are unable to recover in a refund suit. Accordingly, the estate is entitled to equitable recoupment of the 2003 income taxes overpaid by Ms. Jorgensen's children and grandchildren as a result of our determination that the values of the assets Ms. Jorgensen transferred to the partnerships are included in the value of her gross estate under section 2036.

The recoupment referred to above arose from the estate tax case being settled after the statute of limitations had passed for amending the donees' income tax returns that reported gain from sale of some of the included assets. See part II.G.4.m.ii Equitable Recoupment, which is part of part II.G.4.m Fixing Unfair Income Tax Results.

See also Rev. Rul. 79-124, cited in fn 5697, holding a Code § 743(b) adjustment applies to a Code § 1014(b)(6) basis adjustment for community property.

⁵⁷¹⁹ See text accompanying and following fn 1423 in part II.G.4.m.i Code § 1341 Claim of Right Deduction; see also text accompanying fn 1428 in part II.G.4.m.ii Equitable Recoupment.

⁵⁷²⁰ See fns 91-92 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders (which part highlighted an S corporation's ability to avoid Code § 2036).

⁵⁷²¹ For an estate tax TAM, see fn 231 in part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning. The TAM cited *Estate of Robinson v. Commissioner*, 101 T.C. 499, 513-514 (1993), which case, involving annual exclusion gifts, stated:

The ability of a taxpayer to avoid the form of a transaction requires strong proof in this Court, and is even more restricted by the Court of Appeals for the Eleventh Circuit, the court to which an appeal in the instant case would be taken. *Bradley v. United States*, 730 F.2d 718, 720 (11th Cir. 1984). The rule, first announced in *Commissioner v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967), vacating and remanding 44 T.C. 549 (1965), is as follows:

A party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties to the agreement would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, etc....

Although *Danielson* involved the allocation of payments to a covenant not to compete, it is clear that the rule applies beyond the confines of such an allocation. *Sullivan v. United States*, 618 F.2d 1001 (3d Cir. 1980); *Coleman v. Commissioner*, 87 T.C. 178, 202 (1986), *affd.* in an unpublished order 833 F.2d 303 (3d Cir. 1987). The Court of Appeals for the Eleventh Circuit has also adopted a similar rule to the rule in *Danielson*. *Bradley v. United States*, *supra*. We are bound

- If the partnership's assets are somehow treated as passing by reason of the decedent's death, is there somehow a new contribution to the partnership that generates outside basis?
- If not, then outside basis may be much lower than inside basis. In that case, a Code § 754 election may have cause inside basis to decrease to match outside basis when the relevant partnership interest is transferred. Another result would be inside basis being stripped when assets are distributed without outside basis to match.

to follow *Bradley* under the rule of *Golsen v. Commissioner*, 54 T.C. 742 (1970), *affd.* 445 F.2d 985 (10th Cir. 1971).

The rule in *Danielson* prevents a taxpayer from arguing against the form of a transaction adopted by the taxpayer and the other parties to the transaction unless mistake, undue influence, fraud, duress, or other defenses to the formation of a contract could be shown by the taxpayer in action against the other parties to the transaction. The rule in *Danielson* is not applicable when the form of the transaction adopted by the parties is ambiguous. *Smith v. Commissioner*, 82 T.C. 705, 713-714 (1984).

In the instant case, neither the form of the transaction nor the deeds used to facilitate the transaction can be reasonably construed as ambiguous. The deeds do not refer to any interests that petitioner contends decedent's great-grandchildren had in the transferred properties.

Therefore, under the rule in *Danielson*, petitioner is prevented from arguing that implied trusts were created under Georgia law for the benefit of decedent's great-grandchildren.

Along the lines of a case cited above that the taxpayer could not report as goodwill – taxed as capital gain - payments under a covenant not to compete, which was ordinary income, *Muskat v. U.S.*, 554 F.3d 183 (1st Cir. 2009), *aff'g* 101 AFTR 2d 2008-1606 (D.N.H. 2008), which is further described in fn 5579 in part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, stated:

In our view, to constitute “strong proof” a taxpayer's evidence must have persuasive power closely resembling the “clear and convincing” evidence required to reform a written contract on the ground of mutual mistake.

In rejecting a taxpayer's argument that an S corporation of which he owned 49% had a second class of stock, *Mowry v. Commissioner*, T.C. Memo. 2018-105, which is also discussed in fns 260-261 in part II.A.2.i.iii Disproportionate Distributions, held:

Generally taxpayers are bound by the form of the transaction that they choose unless they can provide “strong proof” that the parties intended a different transaction in substance. *Schulz v. Commissioner*, 294 F.2d 52, 55 (9th Cir. 1961), *aff'g* 34 T.C. 235 (1960); see also *Vandenbosch v. Commissioner*, T.C. Memo. 2016-29, at *19-*20. There is no proof that either petitioner or G. Mowry intended an arrangement different from that which they agreed to and reported consistently on their tax filings.

Zaritsky & Law, “Finding Basis - It's Not Always Where You Thought It Was” (5/18/2020), asserted.

The courts and the IRS, however, have held that the taxpayer cannot argue substance over form, because the taxpayer selects the form of the transaction and cannot thereafter challenge it. *City of New York v. Comm'r*, 103 T.C. 481 (1994), *aff'd*, 70 F.3d 142 (D.C. Cir. 1995) (“To freely allow tax-payers to argue for alternative tax treatment of a transaction upon the examination of the returns would be tantamount to administering the tax laws based on a policy that tax consequences flow from the ‘transaction taxpayers have chosen or from any other form [of transaction] they might have chosen, whichever is ... [more favorable]’”); *Estate of Durkin v. Comm'r*, 99 T.C. 561, 571-573 (1992); *Comm'r v. Danielson*, 378 F.2d 771 (3d Cir. 1967), *rev'g* 44 T.C. 549 (1965); *Coleman v. Comm'r*, 87 T.C. 178 (1986), *aff'd without op.* 833 F.2d 303 (3d Cir. 1987); *Howell v. Comm'r*, T.C. Memo. 2012-303. See also, CCA 201121020; FSAs 199921002, 199909018, 200004011, and 200242004; and TAMs 9515003, 200334001, and 200418008.

For a more recent case reciting the doctrine's history, see part II.G.33 Taxpayer Disavowing Form. That case held that “the taxpayer must establish that the form of the transaction was not chosen for the purpose of obtaining tax benefits ... that are inconsistent with those the taxpayer seeks through disregarding that form.”

- Because these issues have not been definitively explored, it may be wise not to distribute the relevant partnership interest or distribute the stepped up assets from the partnership until after one is confident that there will be no IRS Code § 2036 inquiry.
- Although not directly on point, the policy of *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, described in part II.G.4.m.ii Equitable Recoupment, suggests that the Tax Court would accept giving the taxpayer the full income tax benefit of Code § 2036 inclusion. The only way to do that is to treat the assets as passing from the decedent to the partnership immediately after death, to avoid the trap described above. I am very comfortable taking a reporting position consistent with this theory in such a case, while at the same being aware that the lack of authority directly addressing this issues makes this analysis less than ironclad.

In reviewing anything in this part II.Q.8.e.iii.(b), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.e.iii.(c). When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000

Generally, Code § 754 election adjusts the basis of a partnership's assets when certain events occur; those events are described in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets, which also refers back to part II.Q.8.e.i Distribution of Partnership Interests. The idea is that the value of the partnership's assets should reflect the basis in the partnership interest when a triggering event occurs that may or may not change of basis in the partnership interest. If outside basis changes at some point and the inside basis is not reconciled then, other events may trigger an inside basis adjustment.⁵⁷²² Estate planners tend to view death as the main triggering event, but the scope of events that trigger these changes is quite broad.

In one limited case involving straddles, the IRS ruled that failure to make a Code § 754 election constituted an abuse.⁵⁷²³

IRS provided to its personnel "Guidance on the Revocation of Internal Revenue Code Section 754 Election Procedures," outlining on August 26, 2021 procedures for use by LB&I and SB/SE employees when determining whether to approve or deny a request filed by a partnership to revoke its election to adjust the basis of partnership property under IRC section 754, available at <https://www.irs.gov/pub/foia/ig/lmsb/lbi-04-0621-0004.pdf>. Taxpayers use Form 15254, Request for Section 754 Revocation, available at <https://www.irs.gov/forms-pubs/about-form-15254>.

When a Code § 754 election is in place, any Code § 743 adjustments that apply to the transfers of partnership interests require the partnership to essentially create a separate set of books for each partner⁵⁷²⁴ (until the relevant partnership interest is liquidated),⁵⁷²⁵ whereas any

⁵⁷²² See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

⁵⁷²³ Notice 2002-50; see also Reg. § 1.701-2(e)(1) and the discussion of the anti-abuse regulations described in part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

⁵⁷²⁴ Reg. § 1.743-1(j).

⁵⁷²⁵ If the Code § 743(b) basis adjustment remains when the partnership interest is liquidated, instead of being wasted it may cause an inside basis adjustment and perhaps even a capital account adjustment. See fns 515-519 in part II.C.7 Maintaining Capital Accounts.

Code § 734 adjustments (increasing or decreasing inside basis as a result of a change in the basis of distributed property) apply to the partnership as a whole.⁵⁷²⁶ For more details on the implementation of a Code § 743(b) basis step-up, see part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

CCA 201521012 explained the interaction of Code § 734(b) with Code § 481 adjustments for change in accounting method.⁵⁷²⁷ Also, in reviewing anything in this part II.Q.8.e.iii.(c), consider

⁵⁷²⁶ Code § 734(b) provides:

Method of adjustment. In the case of a distribution of property to a partner by a partnership with respect to which the election provided in section 754 is in effect or with respect to which there is a substantial basis reduction, the partnership shall—

- (1) increase the adjusted basis of partnership property by—
 - (A) the amount of any gain recognized to the distributee partner with respect to such distribution under section 731(a)(1), and
 - (B) in the case of distributed property to which section 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by section 732(d)) over the basis of the distributed property to the distributee, as determined under section 732, or
- (2) decrease the adjusted basis of partnership property by—
 - (A) the amount of any loss recognized to the distributee partner with respect to such distribution under section 731(a)(2) , and
 - (B) in the case of distributed property to which section 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under section 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by section 732(d)).

Paragraph (1)(B) shall not apply to any distributed property which is an interest in another partnership with respect to which the election provided in section 754 is not in effect.

⁵⁷²⁷ When the IRS determined that a partnership had improperly deferred gain:

When there is a change in accounting method to which IRC § 481(a) is applied, income for taxable years preceding the year of change must be determined under the accounting method that was then used, and income for the year of change and the following taxable years must be determined under the new accounting method as if the new method had always been used. Accordingly, Taxpayer's IRC § 734(b) adjustments for years preceding the year of change must be computed using the accounting method that was then used. Taxpayer's IRC § 734(b) adjustments for the year of change and subsequent years must be redetermined consistent with the new accounting method.

In computing the net § 481(a) adjustment, a taxpayer must take into account all relevant accounts. See Rev. Proc. 2002-18, section 2.04(1), Rev. Proc. 97-27, 1997-1 C.B. 680, section 2.05(1). Here, the IRC § 481(a) adjustment represents the difference in gain or loss for all of the underlying securities that would have been recognized under the new method, less the gain or loss that was recognized under the prior method as of the beginning of the year of change. Taxpayer's IRC § 734(b) adjustments for taxable years prior to the year of change, as calculated under the prior method, are fully taken into account in calculating the basis in the securities. In addition, beginning in the year of change, Taxpayer's basis in its securities will be modified to reflect the gain or loss recognized in connection with the change in accounting method.

The determination of whether a partnership has a change in accounting method does not depend on whether the partnership made an election under IRC § 754, whose only purpose and effect is to eliminate distortions caused by partnership distributions and sales of partnership interests.

The partners of a partnership using a given accounting method ultimately recognize the same amount of cumulative taxable income over the life of the partnership whether or not the partnership makes an election under IRC § 754. A change in accounting method under IRC § 446 occurs when Taxpayer/partnership no longer treats certain securities transactions as

whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

The taxpayer can take advantage of a basis step-up, without the partnership making a Code § 754 election, by receiving a distribution of appreciated assets within two years after death or sale or exchange of the partnership interest; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. Such a distribution would tend to undermine valuation discounts, which might be good (higher basis step-up) or bad (potentially higher estate tax).

If a partnership holds assets with built-in losses greater than \$250,000, one must consider harvesting those losses before engaging in any disposition or acquisition of any interest in the partnership, including the death of a partner. The rest of this section explains why.

The American Jobs Creation Act added three new mandatory basis adjustment rules that can cause serious problems if a partnership does not have a Code § 754 election in effect.⁵⁷²⁸ The first rule applies to limit the transfer of built-in losses on property contributed to a partnership after October 22, 2004.⁵⁷²⁹ The second rule applies when a partnership distributes cash or property after October 22, 2004 that results in the transferee either recognizing a loss or receiving a stepped-up basis in the property greater than \$250,000.⁵⁷³⁰ The third rule applies when a partner dies or transfers an interest in a partnership after October 22, 2004 and the partnership has built-in losses greater than \$250,000.⁵⁷³¹ Furthermore, starting in 2018, this adjustment applies when the transferee partner would be allocated a loss of more than \$250,000 if the partnership assets were sold for cash equal to their fair market value immediately after such transfer.⁵⁷³²

options and thus, stops deferring the gains, losses, income, or deductions associated with those transactions.

⁵⁷²⁸ For more details, see IRS Notice 2005-32; see also Rosenberg, AJCA Imposes New Burdens for Partnership Basis Adjustments Under Sections 734 and 743, *Journal of Taxation*, vol. 101, No. 6, 12/2004 at 334, which was followed by Lipton and Golub, Dealing With the Service's Interim Guidance on Downward Basis Adjustments Under 734 and 743, *Journal of Taxation*, vol. 103, No. 1, 7/2005 at 33; Schneider, New Basis Rules Aim at Transfer and Duplication of Built-in Losses, *Taxes – The Tax Magazine*, May 2005 at 39. Also note that Reg. § 1.701-2(d), Ex. 8 also considers failure to make a Section 754 election to be an abuse, but Ex. 9 does not consider failure to make a Section 754 election to be an abuse. Similarly, if a tax-indifferent party attempts to shift built-in losses to a U.S. taxpayer who has not incurred an economic loss so that the U.S. taxpayer may claim a deduction of the built-in losses from the distressed assets, the transaction might be a listed transaction under Notice 2008-34.

⁵⁷²⁹ Code § 704(c)(1)(C). For a discussion of proposed regulations, see Kim and Carrasco, Proposed Regulations on Contributions of Built-in Loss Property: Paving a Framework for Super C, *TM Memorandum* (BNA), 10/20/2014, Vol. 55, No. 21. See also the American Bar Association Section of Taxation's Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004, *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

⁵⁷³⁰ Code § 734(b).

⁵⁷³¹ Code § 743(a) and (b), as amended.

⁵⁷³² Code § 743(d)(1)(B). The Senate Report said:

For example, a partnership of three taxable partners (partners A, B, and C) has not made an election pursuant to section 754. The partnership has two assets, one of which, Asset X, has a built-in gain of \$1 million, while the other asset, Asset Y, has a built-in loss of \$900,000. Pursuant to the partnership agreement, any gain on sale or exchange of Asset X is specially allocated to partner A. The three partners share equally in all other partnership items, including in the built-in

Limited exceptions apply to certain electing investment partnerships and securitization partnerships.⁵⁷³³ One of these provisions encourages taxpayers to structure marketable securities partnerships as follows: all contributions are cash in exchange for partnership interests issued within 24 months of formation; the partnerships buys investment assets but does not engage in a trade or business; no partner can readily redeem that partner's partnership interest; and the partnership has a term of no more than 15 years;⁵⁷³⁴ this structure has other advantages as well.⁵⁷³⁵

These adjustments can be particularly disturbing when a partnership interest is sold to a related party. Let's start with an example from IRS Notice 2005-32 that tracks the legislative history:

PRS is a partnership which does not have an election under § 754 in effect. PRS has no liabilities. The fair market value of PRS's assets is \$4 million and the adjusted basis of PRS's assets is \$4.3 million. Under § 743(d), PRS has a substantial built-in loss because the adjusted basis of the partnership property exceeds the fair market value of the partnership property by more than \$250,000. A, a partner of PRS, sells a 25 percent partnership interest in PRS to B for its fair market value of \$1 million. Under § 743(b), an adjustment is required to the adjusted basis of PRS's assets with respect to B....

Presumably that adjustment would be to reduce the basis of the partnership's assets by \$75,000, which is the excess of A's \$1,075,000 pro rata share of the basis of the partnership's assets (25% of \$4,300,000) over the sale price (\$1,000,000).

This provision was intended to prevent double deductions as follows, assuming that the basis of A's partnership interest is 25% of the basis of the partnership's assets:

- A has a \$75,000 loss, since A's basis of \$1,075,000 (25% of \$4.3 million) exceeds A's \$1,000,000 proceeds.
- B reports a \$75,000 loss when PRS sells its assets.

What if, however, B were a related party, and Code § 267 prevented A from deducting the loss? Generally, the perceived double deduction would not apply, since A cannot deduct A's \$75,000 loss. Therefore, as a matter of policy, the \$75,000 mandatory basis adjustment should not apply. However, the statute does not appear to have any exceptions that take into account a

loss in Asset Y. In this case, each of partner B and partner C has a net built-in loss of \$300,000 (one third of the loss attributable to asset Y) allocable to his partnership interest. Nevertheless, the partnership does not have an overall built-in loss, but a net built-in gain of \$100,000 (\$1 million minus \$900,000). Partner C sells his partnership interest to another person, D, for \$33,333. Under the provision, the test for a substantial built-in loss applies both at the partnership level and at the transferee partner level. If the partnership were to sell all its assets for cash at their fair market value immediately after the transfer to D, D would be allocated a loss of \$300,000 (one third of the built-in loss of \$900,000 in Asset Y). A substantial built-in loss exists under the partner-level test added by the provision, and the partnership adjusts the basis of its assets accordingly with respect to D.

⁵⁷³³ Code §§ 734(e) and 743(e), (f).

⁵⁷³⁴ Code § 743(e).

⁵⁷³⁵ Distributions of marketable securities might be considered nontaxable distributions of property rather than potentially taxable distributions of cash. See text accompanying footnotes 5405-5407.

Code § 267 loss disallowance, so it appears that B would be stuck with the negative basis adjustment. Thus, neither A nor B recognizes this loss.⁵⁷³⁶

The situation is worsened when one applies valuation adjustments, since (unlike the example in Notice 2005-32) A's partnership interest is worth less than a pro-rata-share of the underlying assets. For example, suppose A sold A's partnership interest to B for \$750,000? Then a special allocation of basis adjustment would reduce B's share of the basis from A's original \$1,075,000 to only \$750,000. So, at first glance, the basis reduction is \$325,000 (\$1,075,000 minus \$750,000), which exceeds the \$300,000 (\$4.3 million minus \$4 million) substantial built-in loss that triggered the whole situation. However, the basis reduction cannot decrease an asset's basis below its fair market value,⁵⁷³⁷ so this provision is not as onerous as it might have seemed.

One might sell the partnership's loss assets so that the partners recognize the loss, then buy other assets that have similar investment attributes but do not constitute "substantially identical stock or securities" under the wash sale rules of Code § 1091. That should avoid the mandatory basis reductions and give A the losses that would otherwise have been disallowed.

II.Q.8.e.iii.(d). Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest

For when a transfer triggers a Code § 743 inside basis adjustment, see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000. This part II.Q.8.e.iii.(d) assumes that one has determined that a Code § 743(b) adjustment applies. In reviewing anything in this part II.Q.8.e.iii.(d), consider whether part II.Q.8.a.i.(b) IRS Attacks on Basis Shifting (90-day reporting obligations) or II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

Before getting into how the allocations work, consider various reporting issues:

- Make a Code § 754 election on the partnership return covering the year of transfer, if not yet in effect.
- A transferee that acquires, by sale or exchange, an interest in a partnership with a Code § 754 election in effect for the taxable year of the transfer, must notify the partnership, in writing, within 30 days of the sale or exchange.⁵⁷³⁸ A transferee that acquires, on the death of a partner, an interest in a partnership with a Code § 754 election in effect for the

⁵⁷³⁶ B would be able to take advantage of this disallowed loss if and to the extent that B later sells B's partnership interest for a gain. Code § 267(d).

⁵⁷³⁷ See fn. 4262 in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

⁵⁷³⁸ Reg. § 1.743-1(k)(2)(i) (also referred to by Reg. § 1.755-1(d)), which further provides:

The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the transferee and (if ascertainable) of the transferor, the taxpayer identification numbers of the transferee and (if ascertainable) of the transferor, the relationship (if any) between the transferee and the transferor, the date of the transfer, the amount of any liabilities assumed or taken subject to by the transferee, and the amount of any money, the fair market value of any other property delivered or to be delivered for the transferred interest in the partnership, and any other information necessary for the partnership to compute the transferee's basis.

taxable year of the transfer, must notify the partnership, in writing, within one year of the death of the deceased partner.⁵⁷³⁹ In making the adjustments under Code § 743(b) and any statement or return relating to such adjustments under this section, a partnership may rely on the written notice described above to determine the transferee's basis in a partnership interest, unless any partner who has responsibility for the partnership's federal income tax reporting has knowledge of facts indicating that the statement is clearly erroneous.⁵⁷⁴⁰ A partnership is not required to make Code § 743(b) adjustments (or any statement or return relating to those adjustments) with respect to any transfer until it has been notified of the transfer.⁵⁷⁴¹ If the transferee fails to provide the partnership with the written notice described above, the partnership must attach a statement to its return in the year that the partnership is otherwise notified of the transfer.⁵⁷⁴²

- A partnership that must adjust the bases of partnership properties under Code § 743(b) must attach a statement to the partnership return for the year of the transfer setting forth the name and taxpayer identification number of the transferee as well as the computation of the adjustment and the partnership properties to which the adjustment has been allocated.⁵⁷⁴³

What happens when a partner who has received a Code § 743(b) basis adjustment later transfers the partnership interest? Reg. § 1.743-1(f), "Subsequent transfers," provides:

Where there has been more than one transfer of a partnership interest, a transferee's basis adjustment is determined without regard to any prior transferee's basis adjustment. In the case of a gift of an interest in a partnership, the donor is treated as transferring, and the donee as receiving, that portion of the basis adjustment attributable to the gifted partnership interest. The provisions of this paragraph (f) are illustrated by the following example:

Example.

- (i) A, B, and C form partnership PRS. A and B each contribute \$1,000 cash, and C contributes land with a basis and fair market value of \$1,000. When the land has appreciated in value to \$1,300, A sells its interest to T1 for \$1,100 (one-third

⁵⁷³⁹ Reg. § 1.743-1(k)(2)(ii), which further provides:

The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the deceased partner and the transferee, the relationship (if any) between the transferee and the transferor, the deceased partner's date of death, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014, and the manner in which the fair market value of the partnership interest was determined.

⁵⁷⁴⁰ Reg. § 1.743-1(k)(3).

⁵⁷⁴¹ Reg. § 1.743-1(k)(4), which provides that a partnership is notified of a transfer when either:

- (i) The partnership receives the written notice from the transferee required under paragraph (k)(2) of this section; or
- (ii) Any partner who has responsibility for federal income tax reporting by the partnership has knowledge that there has been a transfer of a partnership interest.

⁵⁷⁴² Reg. § 1.743-1(k)(5), which describes the attachment, as well as what to do when the transferee supplies the information.

⁵⁷⁴³ Reg. § 1.743-1(k)(1)(i); in addition to referring to this requirement, Reg. § 1.755-1(d) indicates that this statement should include the partnership properties to which the adjustment is allocated under section 755, which is what this part II.Q.8.e.iii.(d) is all about. See Reg. § 1.743-1(k)(1)(ii) for special rules for oil and gas properties that are depleted at the partner level under Code § 613A(c)(7)(D).

of \$3,300, the fair market value of the partnership property). An election under section 754 is in effect; therefore, T1 has a basis adjustment under section 743(b) of \$100.

- (ii) After the land has further appreciated in value to \$1,600, T1 sells its interest to T2 for \$1,200 (one-third of \$3,600, the fair market value of the partnership property). T2 has a basis adjustment under section 743(b) of \$200. This amount is determined without regard to any basis adjustment under section 743(b) that T1 may have had in the partnership assets.
- (iii) During the following year, T2 makes a gift to T3 of fifty percent of T2's interest in PRS. At the time of the transfer, T2 has a \$200 basis adjustment under section 743(b). T2 is treated as transferring \$100 of the basis adjustment to T3 with the gift of the partnership interest.

The 1954 legislative history says:

If property with respect to which the transferee has a special basis under section 743(b) is distributed to a partner other than the transferee, then the transferee partner's special basis allocable to such property is shifted to other property remaining in the partnership (or distributed to the transferee in the same transaction) in the same manner as is described on page 400 of the report of the Committee on Finance with respect to the Senate amendments (S. Rept. 1622, 83d Cong., 2d sess.).

Reg. § 1.743-1(g), "Distributions," provides:

(1) *Distribution of adjusted property to the transferee.*

- (i) *Coordination with section 732.* If a partnership distributes property to a transferee and the transferee has a basis adjustment for the property, the basis adjustment is taken into account under section 732. See § 1.732-2(b).
- (ii) *Coordination with section 734.* For certain adjustments to the common basis of remaining partnership property after the distribution of adjusted property to a transferee, see § 1.734-2(b).

(2) *Distribution of adjusted property to another partner.*

- (i) *Coordination with section 732.* If a partner receives a distribution of property with respect to which another partner has a basis adjustment, the distributee does not take the basis adjustment into account under section 732.
- (ii) *Reallocation of basis.* A transferee with a basis adjustment in property that is distributed to another partner reallocates the basis adjustment among the remaining items of partnership property under § 1.755-1(c).

(3) *Distributions in complete liquidation of a partner's interest.* If a transferee receives a distribution of property (whether or not the transferee has a basis adjustment in such property) in liquidation of its interest in the partnership, the adjusted basis to the partnership of the distributed property immediately before the distribution includes the transferee's basis adjustment for the property in which the transferee

relinquished an interest (either because it remained in the partnership or was distributed to another partner). Any basis adjustment for property in which the transferee is deemed to relinquish its interest is reallocated among the properties distributed to the transferee under § 1.755-1(c).

(4) *Coordination with other provisions.* The rules of sections 704(c)(1)(B), 731, 737, and 751 apply before the rules of this paragraph (g).

(5) *Example.* The provisions of this paragraph (g) are illustrated by the following example:

Example.

(i) A, B, and C are equal partners in partnership PRS. Each partner originally contributed \$10,000 in cash, and PRS used the contributions to purchase five nondepreciable capital assets. PRS has no liabilities. After five years, PRS's balance sheet appears as follows:

	Assets Adjusted basis	Fair Market value
Asset 1	\$10,000	\$10,000
Asset 2	4,000	6,000
Asset 3	6,000	6,000
Asset 4	7,000	4,000
Asset 5	<u>3,000</u>	<u>13,000</u>
Total	30,000	39,000

	Capital Adjusted per books	Fair Market value
Partner A	\$10,000	\$13,000
Partner B	10,000	13,000
Partner C	<u>10,000</u>	<u>13,000</u>
Total	30,000	39,000

(ii) A sells its interest to T for \$13,000 when PRS has an election in effect under section 754. T receives a basis adjustment under section 743(b) in the partnership property that is equal to \$3,000 (the excess of T's basis in the partnership interest, \$13,000, over T's share of the adjusted basis to the partnership of partnership property, \$10,000). The basis adjustment is allocated under section 755, and the partnership's balance sheet appears as follows:

	Assets Adjusted basis	Fair Market value	Basis adjustment
Asset 1	\$10,000	\$10,000	0.00
Asset 2	4,000	6,000	666.67
Asset 3	6,000	6,000	0.00
Asset 4	7,000	4,000	(1,000.00)
Asset 5	<u>3,000</u>	<u>13,000</u>	<u>3,333.33</u>
Total	30,000	39,000	3,000.00

	Capital Adjusted per books	Fair Market value	Special basis
Partner T	\$10,000	\$13,000	\$3,000
Partner B	10,000	13,000	0
Partner C	<u>10,000</u>	<u>13,000</u>	0
Total	30,000	39,000	3,000

- (iii) Assume that PRS distributes Asset 2 to T in partial liquidation of T's interest in the partnership. T has a basis adjustment under section 743(b) of \$666.67 in Asset 2. Under paragraph (g)(1)(i) of this section, T takes the basis adjustment into account under section 732. Therefore, T will have a basis in Asset 2 of \$4,666.67 following the distribution.
- (iv) Assume instead that PRS distributes Asset 5 to C in complete liquidation of C's interest in PRS. T has a basis adjustment under section 743(b) of \$3,333.33 in Asset 5. Under paragraph (g)(2)(i) of this section, C does not take T's basis adjustment into account under section 732. Therefore, the partnership's basis for purposes of sections 732 and 734 is \$3,000. Under paragraph (g)(2)(ii) of this section, T's \$3,333.33 basis adjustment is reallocated among the remaining partnership assets under § 1.755-1(c).
- (v) Assume instead that PRS distributes Asset 5 to T in complete liquidation of its interest in PRS. Under paragraph (g)(3) of this section, immediately prior to the distribution of Asset 5 to T, PRS must adjust the basis of Asset 5. Therefore, immediately prior to the distribution, PRS's basis in Asset 5 is equal to \$6,000, which is the sum of (A) \$3,000, PRS's common basis in Asset 5, plus (B) \$3,333.33, T's basis adjustment to Asset 5, plus (C) (\$333.33), the sum of T's basis adjustments in Assets 2 and 4. For purposes of sections 732 and 734, therefore, PRS will be treated as having a basis in Asset 5 equal to \$6,000.

For more details on distributions generally when a Code § 754 election is in effect, see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

As noted in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000, special rules apply when built-in losses are involved. For a discussion of proposed regulations implementing Code § 743(b) adjustments in such cases, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

For effectuating these basis adjustments, see part II.Q.1.g Partnership Basis Adjustments.

II.Q.8.e.iii.(e). Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election

In working with the ideas in this part, consider possible 90-day reporting obligations part II.Q.8.a.i.(b) IRS Attacks on Basis Shifting.

The basis of partnership property is adjusted as the result of a distribution of property to a partner if a Code § 754 election is in effect with respect to such partnership or if there is a substantial basis reduction with respect to such distribution.⁵⁷⁴⁴

- (1) To the extent that the adjustment is an increase, the partnership increases the basis of its property by:⁵⁷⁴⁵
 - (A) the amount of any gain recognized to the distributee partner with respect to such distribution under Code § 731(a)(1), and
 - (B) in the case of distributed property to which Code § 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by Code § 732(d) – see further below) over the basis of the distributed property to the distributee, as determined under Code § 732.⁵⁷⁴⁶
- (2) To the extent that the adjustment is a decrease, the partnership increases the basis of its property by:⁵⁷⁴⁷
 - (A) the amount of any loss recognized to the distributee partner with respect to such distribution under Code § 731(a)(2), and
 - (B) in the case of distributed property to which Code § 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under Code § 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by Code § 732(d)).

⁵⁷⁴⁴ Code § 734(a), see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000.

⁵⁷⁴⁵ Code § 734(b)(1).

⁵⁷⁴⁶ The rule in (B) does not apply to any distributed property which is an interest in another partnership with respect to which a Code § 754 election is not in effect.

⁵⁷⁴⁷ Code § 734(b)(2).

This adjustment to the basis of the partnership's property may also cause partners' capital accounts to be adjusted.⁵⁷⁴⁸

Reg. § 1.734-1(e), "Recovery of adjustments to basis of partnership property," includes:

- (1) *Increases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the distribution of property to a partner, then the increased portion of the basis must be taken into account as if it were newly-purchased recovery property placed in service when the distribution occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.
- (2) *Decreases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is decreased as a result of the distribution of property to a partner, then the decrease in basis must be accounted for over the remaining recovery period of the property beginning with the recovery period in which the basis is decreased.

However, basis adjustments under Code § 732 or 734(b) do not qualify for bonus depreciation.⁵⁷⁴⁹

Code § 755 allocates the basis adjustment described above.⁵⁷⁵⁰ Generally, any Code § 743(b) change in the adjusted basis of partnership property will be allocated in a manner which has the effect of reducing the difference between the fair market value in any other manner permitted by regulations;⁵⁷⁵¹ this concept prevents any increase in the basis of assets that are distributed from reducing the basis of the partnership's assets with unrealized gain. In applying Code § 755 allocations to Code § 734(b) basis adjustments:

- (1) Where a distribution of partnership property results in an adjustment to the basis of undistributed partnership property under Code § 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose.⁵⁷⁵² Where a distribution

⁵⁷⁴⁸ See fn 514 in part II.C.7 Maintaining Capital Accounts.

⁵⁷⁴⁹ See text accompanying fns 1474 and 1475 in part II.G.5.b Bonus Depreciation.

⁵⁷⁵⁰ Code § 732(c).

⁵⁷⁵¹ See fn. 4262, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

⁵⁷⁵² Reg. § 1.755-1(c)(1)(i), which continues:

Thus, when the partnership's adjusted basis of distributed capital gain property immediately prior to distribution exceeds the basis of the property to the distributee partner (as determined under section 732), the basis of the undistributed capital gain property remaining in the partnership is increased by an amount equal to the excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital gain property exceeds the partnership's adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital gain property remaining in the partnership is decreased by an amount equal to such excess. Similarly, where there is a distribution of ordinary income property, and the basis of the property to the distributee partner (as determined under section 732) is not the same as the partnership's adjusted basis of the property immediately prior to distribution, the adjustment is made only to undistributed property of the same class remaining in the partnership.

results in an adjustment under Code § 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property.⁵⁷⁵³

- (2) If a basis increase is allocated within a class, the increase is allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation), and any remaining increase must be allocated among the properties within the class in proportion to their fair market values.⁵⁷⁵⁴ If a basis decrease is allocated within a class, the decrease is allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's unrealized depreciation), and any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).⁵⁷⁵⁵
- (3) Where Code § 734(b)(2) requires a decrease in the basis of partnership assets and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of that property is reduced to zero (but not below zero).⁵⁷⁵⁶
- (4) Where an increase or a decrease in the basis of undistributed property cannot be made because the partnership owns no property of the character required to be adjusted, or because the basis of all the property of a like character has been reduced to zero, the adjustment is made when the partnership later acquires property of a like character to which an adjustment can be made.⁵⁷⁵⁷

If a transferee partner receives a distribution of property (other than money) from the partnership within two years after the partner acquired the partner's interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the Code § 754 election were in effect.⁵⁷⁵⁸ For these purposes, a

⁵⁷⁵³ Reg. § 1.755-1(c)(1)(ii).

⁵⁷⁵⁴ Reg. § 1.755-1(c)(2)(i).

⁵⁷⁵⁵ Reg. § 1.755-1(c)(2)(ii).

⁵⁷⁵⁶ Reg. § 1.755-1(c)(3).

⁵⁷⁵⁷ Reg. § 1.755-1(c)(4).

⁵⁷⁵⁸ Reg. § 1.732-1(d)(1)(iii). Reg. § 1.732-1(d)(1)(iv) provides:

If an election under section 732(d) is made upon a distribution of property to a transferee partner, the amount of the adjustment with respect to the transferee partner is not diminished by any depletion or depreciation of that portion of the basis of partnership property which arises from the special basis adjustment under section 732(d), since depletion or depreciation on such portion for the period prior to distribution is allowed or allowable only if the optional adjustment under section 743(b) is in effect.

The final regulations did not change the proposed regulations much. The preamble to the proposed regulations, REG 209682-94, provides:

Section 732(d) provides a special rule that applies to determine the basis of property distributed to a transferee partner who acquired any part of its partnership interest in a transfer when an election under section 754 was not in effect. When the special rule applies, the basis of distributed property is adjusted immediately before the distribution to reflect the basis that the property would have had if the partnership had a section 754 election in effect at the time the transferee acquired the partnership interest. As a result, the basis of the distributed property in the hands of the partnership immediately before the distribution more closely approximates its fair market value. Consequently, the transferee's basis in the distributed property will also more closely approximate its fair market value.

“transfer of a partnership interest occurs upon a sale or exchange of an interest or upon the death of a partner.”⁵⁷⁵⁹ Also, if a Code § 754 election is not in place, a partner is required to apply this rule to a distribution to him, whether or not made within two years after the transfer, if at the time of his acquisition of the transferred interest:⁵⁷⁶⁰

- The fair market value of all partnership property (other than money) exceeded 110% of its adjusted basis to the partnership,
- An allocation of basis under Code § 732(c) upon a liquidation of his interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and
- A Code § 743(b) basis adjustment would change the basis to the transferee partner of the property actually distributed.

If property is distributed to a transferee partner who makes a Code § 732(d) election, and if that property is not the same property that would have had a special basis adjustment, then the special basis adjustment applies to any like property received in the distribution, if the transferee, in exchange for the property distributed, has relinquished the transferee’s interest in the property with respect to which the transferee would have had a special basis adjustment.⁵⁷⁶¹ This rule applies whether the property in which the transferee has relinquished the transferee’s interest is retained or disposed of by the partnership.⁵⁷⁶²

Special rules apply to unrealized receivables and substantially appreciated inventory items.⁵⁷⁶³ Also, in reviewing anything in this part II.Q.8.e.iii.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

⁵⁷⁵⁹ Reg. § 1.732-1(d)(1)(i).

⁵⁷⁶⁰ Reg. § 1.732-1(d)(4). The preamble to the proposed regulations, REG 209682-94, provided: The purpose of § 1.732-1(d)(4) was to prevent distortions caused by section 732(c) that might inflate the basis of depreciable, depletable, or amortizable property above its fair market value. At the time that the regulations were adopted, such distortions might occur because section 732(c) allocated basis among distributed properties based on their relative bases. The changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105-34, section 1061, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. As a result, the Service and Treasury request comments on the proper scope of section 732(d), and specifically, under what circumstances, if any, the Secretary should exercise its authority to mandate the application of section 732(d) to a transferee.

T.D. 8847 described and responded to the requested comments:

Several commentators suggested that the mandatory application of section 732(d) no longer should be required, because the changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105-34, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. However, other commentators noted that distortions caused by section 732(c) still may occur. Accordingly, the rule contained in § 1.732-1(d)(4), which requires the mandatory application of section 732(d) in certain cases, remains in effect.

⁵⁷⁶¹ Reg. § 1.732-1(d)(1)(v).

⁵⁷⁶² Reg. § 1.732-1(d)(1)(v). For a shift of transferee’s basis adjustment under Code § 743(b) to like property, see Reg. § 1.743-1(g).

⁵⁷⁶³ See fns. 5428-5430, found in part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

II.Q.8.e.iii.(f). Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold

When an asset sale is desirable for tax purposes but a stock sale is necessary for nontax purposes, Code § 338(g) permits a corporation that buys another corporation from the target's parent in a qualified purchase to elect to treat the stock purchase as an asset purchase. This may help if the gain on sale can be offset by net operating losses⁵⁷⁶⁴ – especially the target's⁵⁷⁶⁵ – or perhaps if the corporation expects to be taxed at a lower rate now and a higher rate later.

Similarly, the owners of an S corporation should consider making a Code § 338(h)(10) election when selling their S corporation stock to a corporation.⁵⁷⁶⁶ The stock that is sold must be at least 80% of the voting power and at least 80% of the total value of the corporation's stock.⁵⁷⁶⁷

The election causes the stock sale to be treated as if the S corporation sold all its assets while owned by the sellers and while still an S corporation. Gain is therefore recognized by the S corporation and taxed to the selling shareholders, which creates additional basis in their S corporation stock. The actual sale of the stock is ignored for tax purposes and the shareholders are treated as receiving the sale proceeds in liquidation of the S corporation.

Thus, the selling shareholders will be taxed on a deemed asset sale and liquidation, rather than on a stock sale:

- Unless they bought a portion of their stock at a premium over the value of the corporation's assets, a Code § 338(h)(10) election will generally not significantly affect the amount of gain on which they would be taxed. However, it may cause a portion of their gain to be ordinary income, rather than capital gain, to the extent that a sale of the S corporation's assets would generate ordinary income, and state income tax surprises might occur; for a discussion of the some of the issues mentioned in the sentence, see similar issues raised in part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation. But, the whole point was to replicate an asset sale for tax purposes, so the Code § 338(h)(10) election merely allows a different form to be used for the deemed asset sale. Note, however, that ordinary income tax to the seller may be more expensive than the deduction allowed the buyer, if the buyer is a C corporation taxed at a lower rate, so in an environment of very low C corporation rates relative to individual rates may tend to drive the parties further apart with respect to the value of a Code § 338(h)(10) election. These concerns about ordinary income tend to be moot, because buyers usually agree to allocate proceeds in a manner that generates only capital gain on the deemed sale of assets; see part II.Q.1.f Code § 1060 Allocation Rule When Selling Business.
- Thus, gain on sale of the assets will be capital gain and add to basis of the stock that is deemed sold on liquidation. Unless pre-sale outside basis was lower than pre-sale inside basis, this addition to basis will result in a new outside basis greater than or equal to

⁵⁷⁶⁴ See part II.G.4.I.ii Net Operating Loss Deduction.

⁵⁷⁶⁵ Code § 382 limits the amount of the taxable income of any new loss corporation for any post-change year which may be offset by pre-change losses. However, Code § 382(h)(1)(C) provides that this limitation does not apply to any gains recognized by reason of an election under Code § 338.

⁵⁷⁶⁶ Reg. § 1.338(h)(10)-1(c)(1) authorizes a Code § 338(h)(10) election when a corporation buys stock of the target corporation meeting the requirements of Code § 1504(a)(2) from a selling consolidated group, a selling affiliate, or the S corporation shareholders in a qualified stock purchase. See Code §§ 338(d)(3) and 338(h)(3)(A).

⁵⁷⁶⁷ Code § 1504(a)(2).

liquidation proceeds. This has some concepts in common with part II.H.8.a Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly.

- This mechanism automatically avoids gain on sale of stock, with no limit. Compare that with the limitations on the exclusion for the gain on the sale of certain C corporation stock under part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

These income tax consequences may affect selling shareholders differently. Variations in purchase price among shareholders do not violate the S corporation single-class-of-stock rule if determined in arm's length negotiations with the purchaser. See part II.A.2.i.vii Adjustments in Code § 338(h)(10) Sales in part II.A.2.i Single Class of Stock Rule.

If the purchaser is not a corporation, a Code § 336(e) election might allow the buyer to replicate the results of a Code § 338(h)(10) election.⁵⁷⁶⁸ The selling corporation or S corporation shareholder(s) must dispose of stock of another corporation (target) in a qualified stock disposition.⁵⁷⁶⁹ "Qualified stock disposition" means any transaction or series of transactions in which stock meeting the requirements of Code § 1504(a)(2) of a domestic corporation is either sold, exchanged, or distributed, or any combination thereof, by another domestic corporation or by the S corporation shareholders in a disposition,⁵⁷⁷⁰ during the 12-month disposition period.⁵⁷⁷¹ "Disposition" means any sale, exchange, or distribution of stock, but only if:⁵⁷⁷²

- (A) The basis of the stock in the hands of the purchaser is not determined in whole or in part by reference to the adjusted basis of such stock in the hands of the person from whom the stock is acquired or under Code § 1014(a) (property acquired from a decedent);
- (B) Subject to an exception for certain Code § 355(d)(2) and (e)(2) transactions,⁵⁷⁷³ the stock is not sold, exchanged, or distributed in a transaction to which Code § 351, 354, 355, or 356 applies and is not sold, exchanged, or distributed in any transaction described in regulations in which the transferor does not recognize the entire amount of the gain or loss realized in the transaction; and
- (C) The stock is not sold, exchanged, or distributed to a related person.

Both the rules governing Code § 338(h)(10) elections and Code § 336(e) elections⁵⁷⁷⁴ provide that stock acquired by a purchasing corporation from a related corporation is generally not

⁵⁷⁶⁸ Reg. § 1.336-1(a) provides that the effects of Code § 338(h)(10) and the regulations thereunder generally apply to Code § 336(e) elections.

⁵⁷⁶⁹ Reg. § 1.336-2(a), referring to Reg. § 1.336-1(b)(6) in defining a qualified stock disposition.

⁵⁷⁷⁰ Within the meaning of Reg. § 1.336-1(b)(5).

⁵⁷⁷¹ Reg. § 1.336-1(b)(6).

⁵⁷⁷² Reg. § 1.336-1(b)(5).

⁵⁷⁷³ Reg. § 1.336-1(b)(5)(ii) provides that:

a distribution of stock to a person who is not a related person in a transaction in which the full amount of stock gain would be recognized pursuant to section 355(d)(2) or (e)(2) shall be considered a disposition.

⁵⁷⁷⁴ Reg. § 1.336-1(b)(5)(iii) provides:

Transactions with related persons. In determining whether stock is sold, exchanged, or distributed to a related person, the principles of section 338(h)(3)(C) and § 1.338-3(b)(3) shall apply.

considered acquired by purchase.⁵⁷⁷⁵ The seller cannot be a person the ownership of whose stock would, under Code § 318(a) (other than Code § 318(a)(4)), be attributed to the buyer.⁵⁷⁷⁶ (Also, in reviewing anything in this part II.Q.8.b.i.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.)

A Code § 336(e) election for an S corporation target is made by completing the following requirements:⁵⁷⁷⁷

- All of the S corporation shareholders, including those who do not dispose of any stock in the qualified stock disposition, and the S corporation target must enter into a written, binding agreement, on or before the due date (including extensions) of the Federal income tax return of the S corporation target for the taxable year that includes the disposition date, to make a Code § 336(e) election;
- The S corporation target must retain a copy of the written agreement; and
- The S corporation target must attach the Code § 336(e) election statement, to its timely filed (including extensions) Federal income tax return for the taxable year that includes the disposition date. A Reg. § 301.9100-3 extension of time to file the election may be available.⁵⁷⁷⁸

Instead of the seller(s) being treated as selling stock, the target is treated as selling its assets to an unrelated person in a single transaction at the close of the disposition date (but before the deemed liquidation described below)⁵⁷⁷⁹ in exchange for the aggregate deemed asset disposition price.⁵⁷⁸⁰ The target realizes the deemed disposition tax consequences from the deemed asset disposition before the close of the disposition date while the target is owned by

⁵⁷⁷⁵ Reg. § 1.338-3(b)(3).

⁵⁷⁷⁶ Code § 338(h)(3)(A)(iii). For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

⁵⁷⁷⁷ Reg. § 1.336-2(h)(3).

⁵⁷⁷⁸ Letter Rulings 201652014 and 201711007, the latter holding:

WITHIN 45 DAYS OF THE DATE ON THIS LETTER, S Corporation Target and the S Corporation Shareholder must enter into a written, binding agreement to make a section 336(e) election and S Corporation Target must file the section 336(e) election statement in accordance with § 1.336-2(h). The section 336(e) election statement must be attached to S Corporation Target's tax return for B Year. In addition, a copy of this letter must be attached to S Corporation Target's return. Alternatively, if S Corporation Target files its return electronically, it may satisfy the requirement of attaching a copy of this letter to the return by attaching a statement to its return that provides the date and control number (PLR-131803-16) of this letter ruling.

WITHIN 120 DAYS OF THE DATE ON THIS LETTER, all relevant parties must file or amend, as applicable, all returns and amended returns (if any) necessary to report the transaction consistently with the making of a section 336(e) election for the taxable year in which the transaction was consummated (and for any other affected taxable year).

The above extension of time is conditioned on the taxpayers' (*i.e.*, Purchaser's, S Corporation Target's, and S Corporation Shareholder's) tax liability (if any) being not lower, in the aggregate, for all years to which the section 336(e) election applies than it would have been if the Election had been timely filed (taking into account the time value of money). No opinion is expressed as to the taxpayers' tax liability for the years involved. A determination thereof will be made by the applicable Director's office upon audit of the federal income tax returns involved.

⁵⁷⁷⁹ Reg. § 1.336-2(b)(1)(iii).

⁵⁷⁸⁰ Reg. § 1.336-2(b)(1)(i)(A).

seller or the S corporation shareholders.⁵⁷⁸¹ If the target is an S corporation, its S election continues in effect through the close of the disposition date (including the time of the deemed asset disposition and the deemed liquidation) notwithstanding the usual rules for S corporation terminations.⁵⁷⁸² Also, if the target is an S corporation (but not a qualified subchapter S subsidiary (QSub)⁵⁷⁸³), any direct or indirect subsidiaries of the target that the target has elected to treat as QSubs remain qualified QSubs through the close of the disposition date.⁵⁷⁸⁴ If the target is an S corporation, its shareholders (whether or not they sell or exchange their stock) take their pro rata share of the deemed disposition tax consequences into account under Code § 1366 and increase or decrease their basis in target stock under Code § 1367.⁵⁷⁸⁵

Immediately after the deemed asset disposition described above, the target is treated as acquiring all of its assets from an unrelated person in a single, separate transaction at the close of the disposition date in exchange for an amount equal to the adjusted grossed-up basis.⁵⁷⁸⁶ The target remains liable for the tax liabilities it had before this deemed sale and purchase (including the tax liability for the deemed disposition tax consequences).⁵⁷⁸⁷

The target and seller (or S corporation shareholders) are treated as if, before the close of the disposition date, after the deemed asset disposition described above, and while target is owned by seller or S corporation shareholders, the target transferred all of the consideration deemed received in the deemed asset disposition to seller or S corporation shareholders, any S corporation election for the original target terminated, and the original target ceased to exist.⁵⁷⁸⁸ This transfer to the seller or S corporation shareholders is characterized for Federal income tax purposes in the same manner as if the parties had actually engaged in the transactions deemed to occur above and taking into account other transactions that actually occurred or are deemed to occur.⁵⁷⁸⁹

Thus, the following transactions are deemed to have occurred:

1. The target sells its assets to a hypothetical buyer.
2. The target is treated as having bought its assets from a hypothetical seller.
3. The target liquidates, while the old shareholders are deemed to continue owning the stock.

The time for taking into account liabilities in the hypothetical asset transaction and the amount of the liabilities taken into account is determined as if the consideration included the discharge of

⁵⁷⁸¹ Reg. § 1.336-2(b)(1)(i)(A).

⁵⁷⁸² Reg. § 1.336-2(b)(1)(i)(A).

⁵⁷⁸³ See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

⁵⁷⁸⁴ Reg. § 1.336-2(b)(1)(i)(A).

⁵⁷⁸⁵ Reg. § 1.336-2(b)(1)(iii)(A). Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally.

⁵⁷⁸⁶ Reg. § 1.336-2(b)(1)(ii).

⁵⁷⁸⁷ Reg. § 1.336-2(b)(1)(ii).

⁵⁷⁸⁸ Reg. § 1.336-2(b)(1)(iii)(A).

⁵⁷⁸⁹ Reg. § 1.336-2(b)(1)(iii)(A), which continues:

For example, the transfer may be treated as a distribution in pursuance of a plan of reorganization, a distribution in complete cancellation or redemption of all of its stock, one of a series of distributions in complete cancellation or redemption of all of its stock in accordance with a plan of liquidation, or part of a circular flow of cash. In most cases, the transfer will be treated as a distribution in complete liquidation to which sections 331 or 332 and sections 336 or 337 apply.

the liabilities by the unrelated person.⁵⁷⁹⁰ For example, if no amount of a liability is properly taken into account in amount realized as of the beginning of the day after the disposition date, the liability is not initially taken into account in determining the purchase price, but it may be taken into account at some later date.⁵⁷⁹¹ At the January 2017 American Bar Association Section of Taxation meeting, a discussion of Code § 336(e) gave this example:⁵⁷⁹²

- Deemed asset purchase price equals cash paid plus “liabilities” assumed.
- Liabilities do not include amounts which are not currently deductible or amounts not borrowed from a third party.
- Assume that the assets are worth 100 and are associated with 20 of liabilities, and that the purchaser pays 80 for the target’s stock.
- On the target’s deemed liquidation after filing a conversion election, assets distributed are worth 100, but basis is limited to 80, which potentially triggers 20 of gain.

The meeting gave the following examples of liabilities that may trigger this gain:

- Environmental and other contingent liabilities
- Deferred compensation (Code § 404(a)(5))⁵⁷⁹³

⁵⁷⁹⁰ Reg. § 1.336-3(d)(2).

⁵⁷⁹¹ Reg. § 1.336-3(d)(2).

⁵⁷⁹² Slides discussed by Bakal, Bakke, Mottahedeh, and Weiss are saved as Thompson Coburn LLP document no. 6563470.

⁵⁷⁹³ *Hoops, LP v. Commissioner*, T.C. Memo. 2022-9, *aff’d* 77 F.4th 557 (7th Cir. 2023), held: Section 404(a)(11)(B) provides that, for purposes of determining when deferred compensation is paid, no amount shall be treated as received by the employee, or paid, until it is actually received by the employee. This result is consistent with Congress’ intent for nonqualified plans under section 404, as discussed in the previous section, to deviate from the clear reflection of income principle and require matching of income inclusion and deduction between the employee and employer. Accordingly, Hoops must include the deferred compensation liability in its amount realized on the 2012 sale and is not entitled to offset or reduce its amount realized by the amount of the deferred compensation liability.

The Seventh Circuit agreed that Code § 404(a)(5) overrides Reg. § 1.461-4(d)(5)(i) and added: Treasury Regulation § 1.461-4(d)(2)(iii) states that “the economic performance requirement is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation).” The express reference—in conditional terms—to § 404 further defeats Hoops’s position. By its terms, the regulation tells us that economic performance is satisfied and liabilities are therefore deductible if the other requirements of § 404 are also met. In this way, the regulation expressly directs taxpayers to return to § 404 before confirming that a deduction is available under the acceleration provision, showing the emphasis placed on taxpayers meeting § 404(a)(5)’s specific requirements for amounts owed under non-qualifying deferred compensation plans.

Note too the absence of any reference in § 404 to the asset sale provisions in § 461. Under § 404(a)(5), Congress allowed a deduction for deferred compensation “in the taxable year in which an amount attributable to the contribution is includible in the gross income of employees participating in the plan.” The implementing regulation, Treasury Regulation § 1.404(a)-12(b)(1), provides further that deductions are permitted “only in the taxable year of the employer in which

- Obligations to perform future services (*Pierce*)
- Economic performance (Code § 461(h))

However, it was suggested that such a mismatch may occur in a straight asset sale as well.

A minority shareholder who retains its target stock does not recognize gain or loss with respect to its shares of target stock; thus, the minority shareholder's basis (except as noted below) and holding period for that target stock are not affected by Code § 336(e) election.⁵⁷⁹⁴

Notwithstanding this treatment of the minority shareholder, if a Code § 336(e) election is made, target will still be treated as disposing of all of its assets in the deemed asset disposition.⁵⁷⁹⁵ If the target is an S corporation, any K-1 items the minority shareholder reports by reason of the deemed sale will affect the shareholder's basis.⁵⁷⁹⁶

A handy list comparing Code § 338(h)(10) elections and Code § 336(e) elections is found at Harper & Andersen, "Section 336(e)-Another Tool in the Toolbox," *BNA Daily Tax Report* (5/28/2014).⁵⁷⁹⁷

At the May 2017 American Bar Association Section of Taxation meeting, a discussion of Code §§ 336(e), 338(h)(10), 453(h), and 453B(h), included:⁵⁷⁹⁸

- Helpful flowcharts showing the transactions deemed to occur in Code § 336(e) or 338(h)(10) elections.
- Potential surprises, how to avoid them using a one-day note for 100% of the transaction, and disadvantages of doing so.⁵⁷⁹⁹

or with which ends the taxable year of an employee in which an amount attributable to such contribution is includible in his gross income as compensation, and then only to the extent allowable under section 404(a)." Neither provision contains an exception for asset sales, nor do they reference § 461 and accrual method accounting. These observations reflect and give effect to Congress's clear intent in passing § 404 in the first place—to displace the accrual method with an approach that requires employers to choose between qualified plan payments and earlier deductions. Hoops gives us no reason to believe that Congress allowed employers to get out of this choice by selling their liabilities and claiming them as ordinary business expenses.

For an introduction to deferred compensation, see parts II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules and II.Q.1.d Nonqualified Deferred Compensation, the latter focusing on using it to complement a stock sale that is not treated as an asset sale.

⁵⁷⁹⁴ Reg. § 1.336-3(d)(3).

⁵⁷⁹⁵ Reg. § 1.336-3(d)(3).

⁵⁷⁹⁶ Note the parenthetical in this quote from Reg. § 1.336-2(b)(1)(iii)(A):

If old target is an S corporation, S corporation shareholders (whether or not they sell or exchange their stock) take their pro rata share of the deemed disposition tax consequences into account under section 1366 and increase or decrease their basis in target stock under section 1367.

⁵⁷⁹⁷ A copy of which is saved as Thompson Coburn LLP document no. 6344607.

⁵⁷⁹⁸ "Converting Stock Sales to Assets Sales (and Back Again)," slides discussed by Dolan, Harper, and Waters, is saved as Thompson Coburn LLP document no. 6617969.

⁵⁷⁹⁹ If the buyer was willing to pay cash and the seller wanted the one-day note, the buyer's willingness to pay cash does not prevent the seller from using the installment method – only the actual deal counts. Rev. Rul. 73-396. See Reg. § 1.453-11, "Installment obligations received from a liquidating corporation." See also *The Tax Adviser*, "S Corporation Sale of Assets Followed by a Liquidation" (10/1/2008).

- State approaches.

One way to avoid the complexity of these elections and disparate state law treatment may be to create a new parent corporation, convey or merge the old corporation into a new single-member, tax-disregarded LLC, and then sell the LLC to the buyers. The first two steps constitute a tax-free Code § 368(a)(1)(F) transaction.⁵⁸⁰⁰ Selling the LLC to the buyers means that the buyer is not concerned with the old corporation's status as an S corporation.⁵⁸⁰¹ If the LLC becomes a partnership that is then sold, the allocation of purchase price among assets might become more complex; see part II.Q.1.f Code § 1060 Allocation Rule When Selling Business and II.Q.8.b.i.(g) Code § 751 – Hot Assets.

II.Q.8.e.iii.(g). Certain Changes in Inside Basis May Reduce Foreign Tax Credits

A “covered asset acquisition” may disqualify a portion of the foreign tax credit.⁵⁸⁰²

For purposes of this rule, “covered asset acquisition” means:⁵⁸⁰³

- (A) a qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies,
- (B) any transaction which-
 - (i) is treated as an acquisition of assets for purposes of this chapter, and
 - (ii) is treated as the acquisition of stock of a corporation (or is disregarded) for purposes of the foreign income taxes of the relevant jurisdiction,
- (C) any acquisition of an interest in a partnership which has an election in effect under section 754, and
- (D) to the extent provided by the Secretary, any other similar transaction.

Prop. Reg. § 1.901(m)-2(b) would add.⁵⁸⁰⁴

⁵⁸⁰⁰ See parts II.E.7.c.i.(b) Use F Reorganization to Form LLC and II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. If the entity is an S corporation, this tool also involves part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

⁵⁸⁰¹ For example, the S corporation may have had an ineligible shareholder. See parts II.A.2.f Shareholders Eligible to Hold S Corporation Stock and III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, the latter explaining how one might think that a trust is a wholly-owned grantor trust but may be incorrect.

⁵⁸⁰² Code § 901(m)(1).

⁵⁸⁰³ Code § 901(m)(2).

⁵⁸⁰⁴ These supplement Reg. § 1.901(m)-2T(b) (which is not repeated in the text because it does not seem to add to the statute):

Covered asset acquisitions. Except as provided in paragraph (d) of this section, the transactions set forth in this paragraph (b) are CAAs.

- (1) A qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies (section 338 CAA);

- (4) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of U.S. income tax and as the acquisition of an interest in a fiscally transparent entity for purposes of a foreign income tax;
- (5) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as a partnership distribution of one or more assets the U.S. basis of which is determined by section 732(b) or 732(d) or which causes the U.S. basis of the partnership's remaining assets to be adjusted under section 734(b), provided the transaction results in an increase in the U.S. basis of one or more of the assets distributed by the partnership or retained by the partnership without a corresponding increase in the foreign basis of such assets; and
- (6) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of both U.S. income tax and a foreign income tax, provided the transaction results in an increase in the U.S. basis without a corresponding increase in the foreign basis of one or more assets.

Generally, international structures and most of subchapter C are beyond the scope of this paper. This part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits is merely one consideration when an international structure is affected by the tools described in parts II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property, II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss) and II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.8.e.iv. Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform)

Caution – This part II.Q.8.e.iv was repealed by 2017 tax reform.

If a sale or exchange of 50% or more of the total interest in partnership capital *and*⁵⁸⁰⁵ profits occurs (in the aggregate) within a 12-month period, the partnership is deemed to have terminated.⁵⁸⁰⁶ However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, the liquidation of a partnership interest, and the contribution of property to a partnership do not constitute such a sale or exchange is not a sale or exchange for purposes of this test.⁵⁸⁰⁷

-
- (2) Any transaction that is treated as an acquisition of assets for U.S. income tax purposes and as an acquisition of stock of a corporation (or the transaction is disregarded) for foreign income tax purposes;
 - (3) Any acquisition of an interest in a partnership that has an election in effect under section 754 (section 743(b) CAA);
 - (4)-(6) [Reserved].

⁵⁸⁰⁵ For example, the sale of a 30% interest in partnership capital and a 60% interest in partnership profits is not the sale or exchange of 50% or more of the total interest in partnership capital and profits.

Reg. § 1.708-1(b)(2).

⁵⁸⁰⁶ Code § 708(b)(1)(B).

⁵⁸⁰⁷ Reg. § 1.708-1(b)(2).

If a partnership is terminated by a sale or exchange of an interest, the partnership is deemed to contribute all of its assets and liabilities to a new partnership in exchange for an interest in the new partnership; and, immediately thereafter, the terminated partnership is deemed to distribute interests in the new partnership to the purchasing partner and the other remaining partners in proportion to their respective interests in the terminated partnership in liquidation of the terminated partnership, either for the continuation of the business by the new partnership or for its dissolution and winding up.⁵⁸⁰⁸

- Subject to the points made below in this part II.Q.8.e.iv, see parts II.Q.8.b.i Distribution of Property by a Partnership and II.M.3 Buying into or Forming a Partnership for the deemed distribution from the old partnership and contribution to the new partnership, respectively (which tend to be tax-free transactions).
- Book values and capital accounts from the old partnership carry over to the new partnership.⁵⁸⁰⁹ Therefore, no Code § 704(c) accounting for newly contributed property applies; instead, the terminating entity's Code § 704(c) accounting carries over.⁵⁸¹⁰
- These deemed transactions do not trigger Code § 704(c)(1)(B)⁵⁸¹¹ or Code § 737⁵⁸¹² taxation on the distribution of property within seven years after contribution, which makes sense given the continuation of Code § 704(c) accountability.
- The partner who acquired the partnership interest in the sale or exchange that triggered the deemed termination would obtain a basis adjustment in the partnership's assets that this partner is deemed to acquire if a Code § 754 election is in place.⁵⁸¹³ A partner with a Code § 743 basis adjustment in the partnership's property will continue to have the same basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership,⁵⁸¹⁴ regardless of whether the new partnership makes a Code § 754 election.⁵⁸¹⁵ See part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, which describes inside basis adjustments.⁵⁸¹⁶
- Any start-up expenditures being amortized under Code § 195(b) or organizational expenses being amortized under Code § 709(b)(1) continue to use the same schedule.⁵⁸¹⁷ However,

⁵⁸⁰⁸ Reg. § 1.708-1(b)(4).

⁵⁸⁰⁹ Reg. § 1.704-1(b)(2)(iv)(I).

⁵⁸¹⁰ Reg. § 1.704-3(a)(3)(i). See part (iii) of the example in Reg. § 1.708-1(b)(4).

⁵⁸¹¹ Reg. § 1.704-4(c)(3).

⁵⁸¹² Reg. § 1.737-2(a).

⁵⁸¹³ Reg. § 1.708-1(b)(5).

⁵⁸¹⁴ Referring to Reg. § 1.708-1(b)(1)(iv).

⁵⁸¹⁵ Reg. § 1.743-1(h)(1).

⁵⁸¹⁶ See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

⁵⁸¹⁷ Reg. § 1.708-1(b)(6). See also Reg. §§ 1.197-2(g)(2) and 1.197-2(k), Example (16), the latter providing:

- (i) A and B are partners with equal shares in the capital and profits of general partnership P. P's only asset is an amortizable section 197 intangible, which P had acquired on January 1, 1995. On January 1, 2000, the asset had a fair market value of \$100 and a basis to P of \$50. On that date, A sells his entire partnership interest in P to C, who is unrelated to A, for \$50. At the time of the sale, the basis of each of A and B in their respective partnership interests is \$25.

depreciation of tangible property starts over,⁵⁸¹⁸ as does the method for accounting for book-tax differences when depreciating assets.⁵⁸¹⁹ The terminating partnership cannot depreciate any assets it places in service during the termination year;⁵⁸²⁰ rather the new partnership

-
- (ii) The sale causes a termination of P under section 708(b)(1)(B). Under section 708, the transaction is treated as if P transfers its sole asset to a new partnership in exchange for the assumption of its liabilities and the receipt of all of the interests in the new partnership. Immediately thereafter, P is treated as if it is liquidated, with B and C each receiving their proportionate share of the interests in the new partnership. The contribution by P of its asset to the new partnership is governed by section 721, and the liquidating distributions by P of the interests in the new partnership are governed by section 731. C does not realize a basis adjustment under section 743 with respect to the amortizable section 197 intangible unless P had a section 754 election in effect for its taxable year in which the transfer of the partnership interest to C occurred or the taxable year in which the deemed liquidation of P occurred.
 - (iii) Under section 197, if P had a section 754 election in effect, C is treated as if the new partnership had acquired two assets from P immediately preceding its termination. Even though the adjusted basis of the new partnership in the two assets is determined solely under section 723, because the transfer of assets is a transaction described in section 721, the application of sections 743(b) and 754 to P immediately before its termination causes P to be treated as if it held two assets for purposes of section 197. See paragraph (g)(3) of this section. B's and C's proportionate share of the new partnership's adjusted basis is \$25 each in one asset, which continues to be amortized over the 10 years remaining in the original 15-year amortization period. For the other asset, C's proportionate share of the new partnership's adjusted basis is \$25 (the amount of the basis increase resulting from the application of section 743 to the sale or exchange by A of the interest in P), which is amortized over a new 15-year period beginning in January 2000.
 - (iv) If P did not have a section 754 election in effect for its taxable year in which the sale of the partnership interest by A to C occurred or the taxable year in which the deemed liquidation of P occurred, the adjusted basis of the new partnership in the amortizable section 197 intangible is determined solely under section 723, because the transfer is a transaction described in section 721, and P does not have a basis increase in the intangible. Under section 197(f)(2) and paragraph (g)(2)(ii) of this section, the new partnership continues to amortize the intangible over the 10 years remaining in the original 15-year amortization period. No additional amortization is allowable with respect to this asset.

⁵⁸¹⁸ In proposing regulations that T.D. 8717 (5/8/1997) finalized, [PS-5-96], Termination of a Partnership under Section 708(b)(1)(B), stated:

In addition, the proposed regulations will not change the effect of a termination on the depreciation of partnership property by the new partnership. Property deemed contributed to the new partnership will continue to be subject to the anti-churning provisions of section 168(f)(5), which generally require the new partnership to depreciate the property as if it were newly-acquired property under the same depreciation system used by the terminated partnership. This result is required by statute and is not affected by the specific mechanics of a termination under section 708(b)(1)(B). See Code sections 168(f)(5); 168(i)(7); 168(e)(4) and (f)(10)(repealed 1986).

Code § 168(i)(7) provides that the transferee steps into the shoes of the transferor when depreciating an asset to which Code § 332, 351, 361, 721, or 731 applies. However, Code § 168(i)(7)(B) provides that this rule does not apply in the case of a partnership's termination under Code § 708(b)(1)(B). By negative implication, such a termination restarts the depreciation period. See McKee, Nelson & Whitmire, ¶ 13.05[2][k] Effect on Depreciation of Partnership Property, *Federal Taxation of Partnerships & Partners* (WG&L).

⁵⁸¹⁹ Reg. § 1.704-3(a)(2).

⁵⁸²⁰ Reg. § 1.168(d)-1(b)(3)(ii) includes:

No depreciation deduction is allowed for property placed in service and disposed of during the same taxable year.

depreciates them, including receiving bonus depreciation⁵⁸²¹ for any assets placed in service during the termination year.⁵⁸²²

- For purposes of certain procedures regarding changing accounting methods, a technical termination constitutes cessation of a trade or business.⁵⁸²³
- The new partnership retains the old partnership's tax ID.⁵⁸²⁴ Each of the old and new partnership files a short period return, with the new partnership filing a return for its taxable year beginning after the date of termination of the terminated partnership.⁵⁸²⁵

Contrast this with a corporation (whether or not an S election is in place). It is not deemed to terminate when its shareholders change, although a change in shareholders could impair the use of net operating losses, etc.⁵⁸²⁶

⁵⁸²¹ See part II.G.5.b Bonus Depreciation.

⁵⁸²² Reg. § 1.168(k)-1(b)(5)(iii).

⁵⁸²³ See Section 3.04(2)(f) of Rev. Proc. 2015-13, the other provisions of which Rev. Proc. 2015-33 clarified. Lovett, "Technical Termination of LLCs and Partnerships: Overview, Mechanics and Opportunities," *TM Real Estate Journal* (BNA) (2/1/2017), suggests that the termination's closing the tax year will require that two separate installments of a prior Code § 481(a) adjustment be taken into account in one calendar year.

⁵⁸²⁴ Reg. § 301.6109-1(d)(2)(iii); see also the Example in Reg. § 1.708-1(b)(4).

⁵⁸²⁵ Notice 2001-5.

⁵⁸²⁶ Code § 382.

II.Q.8.e.v. Partnership Mergers

For partnership mergers, see Notice 2005-15,⁵⁸²⁷ Notice 2009-70⁵⁸²⁸ and any related proposed regulations.⁵⁸²⁹ For an overview of mergers, with helpful charts and diagrams, see Borden,

⁵⁸²⁷ Notice 2005-15 announced the principles of proposed regulations, which Notice 2009-70, § 2 described:

On August 22, 2007, the IRS and the Treasury Department published in the Federal Register (2007-41 I.R.B. 790 [72 FR 46932]) a notice of proposed rulemaking (REG-143397-05) (the Proposed Merger Regulations), consistent with Notice 2005-15 (2005-1 C.B. 527), providing that (1) section 704(c)(1)(B) applies to newly created section 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over merger, but does not apply to newly created reverse section 704(c) gain or loss resulting from a revaluation of property in the continuing partnership, and (2) for purposes of section 737(b), net precontribution gain includes newly created section 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over merger, but does not include newly created reverse section 704(c) gain or loss resulting from a revaluation of property in the continuing partnership. On November 6, 2007, corrections to the proposed regulations were published in the Federal Register (72 FR 62608).

The proposed regulations include several examples. Example (3) of the proposed regulations (see Treas. Proposed Reg. § 1.704-4(c)(4)(ii)(F), Example (3)) involves a situation where built-in gain property contributed to the transferor partnership has both a revaluation loss in the transferor partnership and additional gain upon merger with the transferee partnership. The example concludes that the section 704(c) layers are collapsed in the merger and that upon contribution to the transferee partnership the property had only built-in gain and no built-in loss.

After describing Example (3), Notice 2009-70 states:

A number of rules in existing regulations may be relevant to mergers, divisions and tiered partnerships. In particular Treas. Reg. § 1.704-3(a)(7)-(9) may apply.

⁵⁸²⁸ Notice 2009-70, § 3, "Discussion," provides:

While no requests for a hearing were received in response to the proposed regulations issued on August 22, 2007, the IRS and the Treasury Department did receive comments relating to the proposed regulations and took notice of a number of articles published in response to the proposed regulations.

Most of the comments and articles address Example (3) which provides that property either has a built-in gain or built-in loss upon merger, not both, and that original section 704(c) gain is reduced by subsequent revaluation losses. Several comments discussed not only the specifics of Example (3), but also the broader implications of the example. In particular, the commentators questioned whether the example implies that a subsequent revaluation loss would reduce prior section 704(c) gains rather than create a new section 704(c) loss layer where there has been no partnership merger. Another comment suggested that the section 704(c) allocations in the example could be different if, for example, the transferor partnership used the remedial method instead of the traditional method. Other commentators expressed concerns that the application of the proposed regulations would result in tax allocations after the merger that are not consistent with the economic arrangement of the partners of the transferor partnership. For example, if layers of reverse section 704(c) built-in gain or built-in loss are collapsed in the merger, then a partner who prior to the merger was allocated a net loss for book purposes with respect to the property would not recognize a corresponding tax loss until liquidation of its interest. They contend that if the transferor partnership had continued in existence instead of liquidating, the section 704(c) layers would have been preserved under the tiered partnership rules of Treas. Reg. § 1.704-3(a)(9). Some practitioners believe the results should be the same in a merger. The IRS and the Treasury Department have also become aware that there are conflicting views among practitioners about how section 704(c) layers should be maintained with respect to tiered partnerships. One view is that an aggregate approach should apply or be permitted such that a tiered partnership arrangement can be "looked through" and section 704(c) applied as if the

“Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations,” *Business Entities* (Jul./Aug. 2014), suggesting using an “assets-over” form to preserve basis or holding period and an “assets-up” type to change basis or holding period.⁵⁸³⁰ For example, TAM 201929019⁵⁸³¹ asserted that a deemed distribution of a partnership interest in an assets-over merger (described below) is treated as an exchange that triggered an automatic basis step-down (or would have triggered a basis step-up if a Code § 754 election had been place and the assets had increased in value) under part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than \$250,000. Hamill, “Tax Reporting Issues Following a Merger of Partnerships,” *Journal of Taxation* (6/2023),⁵⁸³² discussed:

This article will address the tax filing requirements and reporting issues for the terminated and continuing partnerships. This will include basic information such as due dates for tax returns, use of tax identification numbers, identification and survival of tax attributes, any information required to be attached to the returns, reporting of shares of liabilities in the continuing partnership and the effects of any shifts in such shares, determinations of MACRS deductions in the terminated and continuing partnerships, and the holding periods of partnership properties and partnership interests. The intent is to assist the tax return preparers of the combining partnerships with both basic and advanced reporting issues. Exhibits are provided to identify the continuing partnership,

partners of the upper-tier partnership directly own a portion of the assets of the lower-tier partnership (the Aggregate Approach). Another view is the entity approach under which the upper-tier partnership is treated as owning an interest in the lower-tier partnership but is not treated as owning any interest in the section 704(c) property of the lower-tier partnership (the Entity Approach). Each approach raises different issues and has unique consequences. After extensive consideration of the concerns raised, the IRS and the Treasury Department believe that comments would be helpful to the development of guidance concerning section 704(c) layers in tiered partnerships and in mergers and divisions. The IRS and Treasury Department believe that it is appropriate to consider the issues regarding section 704(c) layers in general before finalizing the Proposed Merger Regulations.

Notice 2009-70 requested comments on a number of issues, without requesting comments on the principles described in Notice 2005-15.

⁵⁸²⁹ See also CCA 201315026. RIA Checkpoint *Catalyst*, ¶ 218:111 Merger or Consolidation of Partnerships, described a ruling:

In IRS Letter Ruling 201619001, a real estate investment trust (REIT) formed a partnership (OP), then transferred cash and its own stock to the partnership in exchange for a partnership interest. A second partnership (M) then transferred all of its assets to OP in exchange for OP partnership interests and the REIT stock. M then liquidated, distributing the REIT stock to some of its partners and the OP partnership interests to the remaining partners. The IRS ruled that the transaction was a merger of OP and M under Reg. § 1.708-1(c). IRS Letter Ruling 201619001.

Comment: In IRS Letter Ruling 201619001, M was formed immediately before the merger as the result of the division of a third partnership (X) into two separate partnerships. The IRS respected the form of the transaction as a division followed by a merger. The apparent purpose of this form was to permit the partners of X receiving REIT stock (who were also partners of M after the division) as having sold their partnership interests in M to OP under Reg. § 1.708-1(c)(4) (see ¶ 218:114) For further discussion, see Substance Over Form Exception in ¶ 218:113.

⁵⁸³⁰ For a description of the two types of transactions, see part II.Q.8 Exiting From or Dividing a Partnership, especially part II.Q.8.d.iii Assets-Over vs. Assets-Up Division.

⁵⁸³¹ See fn 5645 of part II.Q.8.e.i Distribution of Partnership Interests.

⁵⁸³² Saved as Thompson Coburn LLP doc. no. 30167834.

distinguish the two forms of combinations, and identify the statutory provisions supporting the tax consequences of a merger or consolidation.

More detailed issues that may confound reporting will also be discussed. These include: (1) The treatment of old and new layers of Section 704(c) gain or loss, including partner-level reporting for items M and N on a partner's schedule K-1; (2) The treatment of the 7-year rule for recognition of Section 704(c) gains as a result of a distribution that triggers either Section 704(c)(1)(B) or Section 737; (3) The recording of tax basis and Section 704(b) "book" basis capital accounts for the continuing partnership; (4) The ability of the continuing partnership to complete a Section 1031 exchange started by any of the partnerships involved in the merger or consolidation; (5) The effect of the merger or consolidation on an partnership election to defer gain by investing in a qualified opportunity fund or a merger of partnerships with interests qualifying as qualified opportunity zone property; (6) Tax allocations in the continuing partnership in the year of merger based on the varying interests rule; (7) The effect of the merger or consolidation on prior Section 465 aggregation or Section 469 grouping decisions of the combining partnerships; (8) The effect of the merger or consolidation on the ability of the continuing partnership to change or to make new aggregation decisions for purposes of Section 199A ; and, (9) The applicability of the Section 743(d) mandatory basis adjustment rule.

Below are some details of partnership mergers.

If two or more partnerships merge or consolidate into one partnership, the resulting partnership is considered a continuation of the merging or consolidating partnership the members of which own an interest of more than 50% in the capital and profits of the resulting partnership.⁵⁸³³ Generally, if this resulting partnership can be considered a continuation of more than one of the merging or consolidating partnerships, it is considered the continuation solely of that partnership which is credited with the contribution of assets having the greatest fair market value (net of liabilities) to the resulting partnership, and any other merging or consolidating partnerships shall be considered as terminated.⁵⁸³⁴ However, if the members of none of the merging or consolidating partnerships have an interest of more than 50% in the capital and profits of the resulting partnership, all of the merged or consolidated partnerships are terminated, and a new partnership results.⁵⁸³⁵

The taxable years of any merging or consolidating partnerships which are considered terminated shall be closed in under Code § 706(c) the regulations thereunder, and those partnerships shall file their returns for a taxable year ending upon the date of merger or consolidation.⁵⁸³⁶ Any resulting partnership shall file a return for the taxable year of the merging or consolidating partnership that is considered as continuing.⁵⁸³⁷

A merger is an "assets-over" merger unless it as an "assets-up" merger.⁵⁸³⁸ In an "assets-up" merger, the merged or consolidated partnership that is considered terminated as described above distributes all of its assets to its partners (in a manner that causes the partners to be

⁵⁸³³ Code § 708(b)(2)(A); Reg. § 1.708-1(c)(1).

⁵⁸³⁴ Reg. § 1.708-1(c)(1).

⁵⁸³⁵ Reg. § 1.708-1(c)(1).

⁵⁸³⁶ Reg. § 1.708-1(c)(2).

⁵⁸³⁷ Reg. § 1.708-1(c)(2), which also provides that the resulting partnership shall keep its original taxpayer identification number and include certain tax disclosures.

⁵⁸³⁸ Reg. § 1.708-1(c)(3)(i).

treated, under the laws of the applicable jurisdiction, as the owners of such assets) in liquidation of the partners' interests in the terminated partnership, and immediately thereafter, the partners in the terminated partnership contribute the distributed assets to the resulting partnership in exchange for interests in the resulting partnership.⁵⁸³⁹ The form of such a partnership merger or consolidation will be respected for federal income tax purposes despite the partners' transitory ownership of the terminated partnership's assets.⁵⁸⁴⁰

When two or more partnerships merge or consolidate into one partnership under the applicable jurisdictional law, without undertaking a form for the merger or consolidation, or undertake a form for the merger or consolidation that is not an assets-up merger, any merged or consolidated partnership that is considered terminated is treated as undertaking the assets-over form for Federal income tax purposes.⁵⁸⁴¹ Under the assets-over form, the merged or consolidated partnership that is considered terminated contributes (or is treated as contributing) all of its assets and liabilities to the resulting partnership in exchange for an interest in the resulting partnership, and immediately thereafter, the terminated partnership distributes interests in the resulting partnership to its partners in liquidation of the terminated partnership.⁵⁸⁴² For whether an assets-over merger constitutes a Code § 761(e) transfer, see TAM 201929019, described in the text following fn 5645 in part II.Q.8.e.i Distribution of Partnership Interests.

Code §§ 704(c)(1)(B) and 737 and Reg. §§ 1.704-4 and 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in Code § 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement.⁵⁸⁴³ A later distribution of Code § 704(c) property by the transferee partnership to a partner of the transferee partnership is subject to Code § 704(c)(1)(B) to the same extent that a distribution by the transferor partnership would have been subject to Code § 704(c)(1)(B).⁵⁸⁴⁴ Similarly, a later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.⁵⁸⁴⁵

In an assets-over merger, a sale of all or part of a partner's interest in the terminated partnership to the resulting partnership that occurs as part of a merger or consolidation will be respected as a sale of a partnership interest if the merger agreement (or another document) specifies that the resulting partnership is purchasing interests from a particular partner in the merging or consolidating partnership and the consideration that is transferred for each interest sold, and if the selling partner in the terminated partnership, either before or at the same time as the transaction, consents to treat the transaction as a sale of the partnership interest.⁵⁸⁴⁶

⁵⁸⁴⁴ Reg. § 1.704-4(c)(4).

⁵⁸⁴⁵ Reg. § 1.737-2(b)(3).

⁵⁸⁴⁶ Reg. § 1.708-1(c)(4), referring to Code § 741 and Reg. § 1.741-1 for determining the selling partner's gain or loss on the sale or exchange of the partnership interest; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest. Letter Ruling 201619001 (described in fn. 5829) respected a sale under

When merging, consider whether any relief of debt or other actual or deemed distributions within two years might constitute a disguised sale. See part II.M.3.e Exception: Disguised Sale. However, some divisions might be taxable to the extent that they rely on Code § 721(a) nonrecognition.⁵⁸⁴⁷

The IRS expects to issue regulations, effective for distributions from partnerships made after January 19, 2005, providing the following regarding Code § 704(c) gain and reverse-Code § 704(c) gain:⁵⁸⁴⁸

The regulations will apply the principles of Rev. Rul. 2004-43 to distributions of property following assets-over partnership mergers. The regulations will apply to distributions of property with newly created § 704(c) gain or loss whether or not that gain or loss is treated as reverse § 704(c) gain or loss as the result of a revaluation by the transferor partnership. The regulations also will apply to distributions of property with original § 704(c) gain or loss that existed upon contribution to the transferor partnership. However, the regulations will provide that if the transferor partnership in an assets-over merger holds contributed property with original § 704(c) gain or loss, the seven year periods in §§ 704(c)(1)(B) and 737 do not restart with respect to that gain or loss as a result of the merger.

The regulations will provide that § 704(c)(1)(B) does not apply to newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In addition, the regulations will provide that for purposes of § 737, net precontribution gain does not include newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In order for merging partnerships to qualify for the exceptions described in this paragraph, each partner's percentage interest in the transferor partnership's capital, profits, losses, distributions, liabilities, and all other items must be the same as the partner's percentage interest in those items of the continuing partnership.

The survivor of merged partnerships may want to see whether it qualifies for special Code § 704(c) accounting for securities partnerships.⁵⁸⁴⁹

Reg. § 1.708-1(c)(4), when the contribution agreement relating to a merger will specify (i) that the partnership is purchasing its interest in another partnership from each particular partner in the purchasing partnership and (ii) the consideration that is transferred for each interest purchased.

⁵⁸⁴⁷ If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a)).

⁵⁸⁴⁸ Notice 2005-15. Query whether the regulations would be retroactive, given all of the time that has passed. For a description of reverse-Code § 704(c) allocations, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5466-5469.

⁵⁸⁴⁹ See fn. 3896 (especially Letter Ruling 201710008), found in part II.P.1.a.i Allocations of Income in Partnerships.

A book-up resulting from a revaluation (which results from a merger or consolidation) may shift nonrecourse liabilities,⁵⁸⁵⁰ which can generate income tax.⁵⁸⁵¹ When two or more partnerships merge or consolidate in an assets-over merger, increases and decreases in partnership liabilities associated with the merger or consolidation are netted by the partners in the terminating partnership and the resulting partnership to determine the effect of the merger under the Code § 752 rules allocating liabilities to partners and determining whether a change in liabilities constitutes a distribution or contribution.⁵⁸⁵² For more information, see part II.C.3 Allocating Liabilities (Including Debt).

If any merger described above is part of a larger series of transactions and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard the form and recast the larger series of transactions according to their substance.⁵⁸⁵³

Langdon and Byrd, “Missing Partnership Merger Definition Raises Questions,” *The Tax Advisor* (7/2016), discussed “determining the federal income tax consequences when a taxpayer collapses two partnerships - one an upper-tier partnership, or UTP, and the other a lower-tier partnership, or LTP - into a single entity.” The article says:

The lack of a merger definition means that the tax characterization can vary dramatically depending on how the transaction is viewed. To illustrate possible different treatments, consider this scenario.

Example: X, Y, and a UTP own 10%, 10%, and 80% interests, respectively, in an LTP. Neither X nor Y holds an interest in the UTP. The parties agree to consolidate the two entities by having X and Y contribute their LTP interests to the UTP in exchange for interests in the UTP. For state law purposes, both legal entities still exist after the transaction, although for federal income tax purposes only one partnership remains. The remaining partnership is owned 10% by X, 10% by Y, and 80% by the UTP’s former partners.

⁵⁸⁵⁰ See text preceding and accompanying fn 400 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

⁵⁸⁵¹ See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

⁵⁸⁵² Reg. § 1.752-1(f).

⁵⁸⁵³ Reg. § 1.708-1(c)(6)(i), providing the following example in Reg. § 1.708-1(c)(6)(ii):

A, B, and C are equal partners in partnership ABC. ABC holds no section 704(c) property. D and E are equal partners in partnership DE. B and C want to exchange their interests in ABC for all of the interests in DE. However, rather than exchanging partnership interests, DE merges with ABC by undertaking the assets-up form described in paragraph (c)(3)(ii) of this section, with D and E receiving title to the DE assets and then contributing the assets to ABC in exchange for interests in ABC. As part of a prearranged transaction, the assets acquired from DE are contributed to a new partnership, and the interests in the new partnership are distributed to B and C in complete liquidation of their interests in ABC. The merger and division in this example represent a series of transactions that in substance are an exchange of interests in ABC for interests in DE. Even though paragraph (c)(3)(ii) of this section provides that the form of a merger will be respected for Federal income tax purposes if the steps prescribed under the assets-up form are followed, and paragraph (d)(3)(i) of this section provides a form that will be followed for Federal income tax purposes in the case of partnership divisions, these forms will not be respected for Federal income tax purposes under these facts, and the transactions will be recast in accordance with their substance as a taxable exchange of interests in ABC for interests in DE.

Because of the lack of guidance on partnership mergers, there appear to be at least three potential characterizations of this transaction for federal income tax purposes.

Alternative 1: LTP Merges Into UTP

It is generally thought a merger exists in any case in which (1) at least two tax partnerships exist immediately before a transaction, (2) immediately after the transaction only one tax partnership exists, and (3) the equity holders of each of the preexisting tax partnerships become equity holders in the single remaining tax partnership as part of the transaction. From this perspective, the transaction could be viewed as a merger because two partnerships existed at the beginning of the day and only one partnership remains at the end.

Sec. 708(b)(2)(A) provides:

In the case of a merger or consolidation of two or more partnerships, the resulting partnership shall, for purposes of this section, be considered the continuation of any merging or consolidating partnership whose members own an interest of more than 50 percent in the capital and profits of the resulting partnership [(the ownership test)].

Here, determining which of the LTP or the UTP should be considered the continuing partnership depends on whether an aggregate or entity approach to partnerships is taken.

Under an entity approach, of the historic partners of the LTP (X, Y, and the UTP), only X and Y hold interests in the resulting partnership (20%). The historic partners of the UTP hold the remaining 80% interest in the resulting partnership. Accordingly, the resulting partnership would appear to be considered a continuation of the UTP. This result depends on treating the UTP as an entity for purposes of applying the ownership test.

If the UTP were treated as an aggregate, then arguably both partnerships would be treated as continuations, but under Regs. Sec. 1.708-1(c)(1), the resulting partnership would be treated as a continuation of the LTP because the net value of the LTP's assets exceeded the net value of the UTP's assets. The aggregate approach appears to be inconsistent with the entity-level focus of Sec. 708, but if it were applied, the application of the merger rules would be largely consistent with the liquidation of the UTP and continuation of the LTP characterization discussed below. Under Regs. Sec. 1.708-1(c)(3)(i), the form of a merger then would be characterized as the LTP contributing all its assets and liabilities to the UTP for a "hook" interest, with the LTP then making a liquidating distribution of the new UTP interests to its partners (UTP, X, and Y).

The merger characterization may not be an exact fit for this transaction because a common expectation of a merger is that the resulting entity will go forward with a combination of assets and operations obtained from the merged entities. In this transaction, there has been no combination of assets and operations. The historic holding company activity of the UTP has disappeared, and the historic operating activity of the LTP has survived without any change other than the identity of the majority of its direct owners. Furthermore, application of the ownership test appears inconsistent with the realities of the transaction because the UTP would be viewed as the continuing partnership despite contributing no real assets in the transaction, while the LTP is deemed to terminate despite being the source of all the assets.

Alternative 2: UTP Liquidates and LTP Continues

If the results of the merger characterization do not quite fit the economic realities of the transaction, Sec. 708 suggests an alternative characterization. Sec. 708(a) provides that an existing partnership shall be considered as continuing if it is not terminated, and Sec. 708(b)(1)(A) provides that a partnership will be considered terminated if no part of its business, financial operation, or venture is carried on by any of its partners in a partnership form. Under this rule, the LTP would be treated as continuing because the LTP's historic business would still be operated in partnership form, while the UTP would be treated as terminating because its historic business—holding an investment in the LTP—would no longer exist.

If the LTP is considered to continue, then the substance of the transaction appears to be a liquidation of the UTP. Under a liquidation scenario, the UTP is deemed to make liquidating distributions of the LTP interests to its partners, and, pursuant to Sec. 732(b), the partners would take a substituted basis in the LTP interest received.

The UTP's liquidation view gives effect to the requirements of Secs. 708(a) and 708(b)(1)(A) and avoids creating a new layer of Sec. 704(c) gain, but it seems out of line with the form of the transaction. The partners that actually engage in a transaction (X and Y) are treated as doing nothing, while the partners of the UTP (which do not engage in a state law transaction) are treated as exchanging their interests in the UTP for interests in the LTP.

Alternative 3: X and Y Contribute LTP Interests in a Sec. 721 Transaction

As a third alternative, it may be appropriate to give effect to the form of the transaction (a Sec. 721 contribution of interests in the LTP by X and Y to the UTP). Following the contribution, the UTP would hold all the partnership interests in the LTP, and the LTP would terminate under Sec. 708(b)(1)(A).

This perspective is similar to what is described in Rev. Rul. 99-6, Situation 1, in which Partner B purchases, in a taxable transaction, the partnership interests held by Partner A. Under the ruling, Partner A is treated as selling its interest to Partner B, but Partner B must treat the transaction as if (1) the partnership made a liquidating distribution of a proportionate interest in the partnership assets to Partner A; (2) Partner A sold its proportionate interest in assets to Partner B; and (3) Partner B received a liquidating distribution of its proportionate interest in assets from the partnership.

As with the merger characterization, this viewpoint appears to create a layer of Sec. 704(c) gain for X and Y. In addition, it is not clear that Rev. Rul. 99-6 was intended to apply to a nonrecognition transaction. If it was intended to apply to this transaction, it is not clear that the Sec. 721 contribution viewpoint can be reconciled with the terms of Sec. 708(b)(1)(A). If the model of Rev. Rul. 99-6 is followed, the LTP would terminate under Sec. 708(b)(1)(A), but this characterization is inconsistent with the terms of the statute because X and Y continue to be partners with regard to the historic operations of LTP. Under existing case law (*Byrum*, 440 F.2d 949 (6th Cir. 1971), *aff'd*, 408 U.S. 125 (1972)), a revenue ruling may be disregarded if it conflicts with the statute it purports to interpret.

Conclusion

None of these three characterizations appears to meet all of the existing guidance and policies of the transaction. The absence of a definition of “merger” for purposes of Sec. 708 makes it difficult for taxpayers to know how to appropriately apply the U.S. federal income tax rules when faced with choosing among at least these three possible characterizations and possibly more when a holding partnership structure is collapsed.

II.Q.8.e.vi. Required Documentation to Avoid Withholding on Sale or Redemption of Partnership Interest

Generally, if any portion of the gain (if any) on any disposition of an interest in a partnership would be treated under Code § 864(c)(8) as effectively connected with the conduct of a trade or business within the United States, the transferee shall be required to deduct and withhold a tax equal to 10% of the amount realized on the disposition.⁵⁸⁵⁴

However, this requirement does not apply if the transferor furnishes to the transferee an affidavit by the transferor stating, under penalty of perjury, the transferor’s United States taxpayer identification number and that the transferor is not a foreign person.⁵⁸⁵⁵

A sample affidavit is in Thompson Coburn LLP doc. no. 6729373.

Also see Notice 2018-29, “Guidance Regarding the Implementation of New Section 1446(f) for Partnership Interests That Are Not Publicly Traded.”

II.Q.9. Trust Selling a Business

See parts:

- II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets,
- II.J.15 QSST Issues That Affect the Trust’s Treatment Beyond Ordinary K-1 Items, and
- II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

⁵⁸⁵⁴ Code § 1446(f)(1).

⁵⁸⁵⁵ Code § 1446(f)(2)(A). Subparagraphs (B) and (C) provide:

(B) *False affidavit.* Subparagraph (A) shall not apply to any disposition if -

(i) the transferee has actual knowledge that the affidavit is false, or the transferee receives a notice (as described in section 1445(d)) from a transferor’s agent or transferee’s agent that such affidavit or statement is false, or

(ii) the Secretary by regulations requires the transferee to furnish a copy of such affidavit or statement to the Secretary and the transferee fails to furnish a copy of such affidavit or statement to the Secretary at such time and in such manner as required by such regulations.

(C) *Rules for agents.* The rules of section 1445(d) shall apply to a transferor’s agent or transferee’s agent with respect to any affidavit described in subparagraph (A) in the same manner as such rules apply with respect to the disposition of a United States real property interest under such section.

II.R. Choice of Entity Hypothetical

Alice, Ben and Connie want to form a business manufacturing and selling widgets. They have been friends for many years. Even though they consider themselves family, technically they are not related to each other.

Alice is a natural at sales. She has many contacts and could sell any product that she believes is beneficial to the customer. Alice is terrific at selling not only to potential customers but also potential investors.

Ben is great at putting together and running organizations. He always knows what is going on in the business, tracking current progress, making short-term and long-term financial projections, and keeping everyone focused on the company's goals. Ben is talented at securing financing and making investors feel comfortable that they are receiving accurate information.

Connie is a creative genius. She has scientific knowledge, engineering skills, and a keen mind for how to make machines and manufacturing and packaging processes work. Connie will enable the company to be a low-cost producer for generic products and to efficiently tailor manufacturing processes to fit special customer needs.

Initial Formation - Year 1

Connie came up with a revolutionary widget that every household should have, and Alice has informally discussed with various retailers how they might help market the product. Ben has arranged a \$1,000,000 bank loan, but the bank is going to make Alice, Ben and Connie personally guarantee loan repayment. Alice, Ben and Connie have agreed to take no compensation the first year, \$50,000 each the second year, and then see where the business is headed. The business requires a \$500,000 machine, as well as five employees to run it, initially under Connie's supervision. The business leases its space.

How should they set up their deal in Year 1?

Types of entities: sole proprietorships, partnerships, C corporations and S corporations. Business ownership and management structure. Tax on formation. Allocating gain when entity later sells contributed property. Ability to deduct losses: basis and at-risk limitations; net operating losses at entity vs. shareholder level; Code § 1244 stock. Allocating gain and loss from ongoing operations; tax distribution clauses. Self-employment/FICA tax: partnership vs. limited partnership vs. S corporation vs. C corporation.

Outside Investors - Year 2

Due to additional capital needs to take the business to the next level, Alice has been working on securing two investors who would put up capital of \$250,000 each. They seek an annual preferred return of 20%, as well as one-fifth each of the business' residual value.

How should they bring in the investors? What governance/approval mechanisms would the investors want to protect themselves?

Tax on later contribution to entity. Allocation of income from operations, including preferred returns and, if taxed as a partnership, disguised sale issues. Restrictions on shareholders (S corporations).

Buying Out Outside Investors - Year 5

In Year 5, the business is earning \$600,000 per year net profit, after paying \$100,000 annual compensation to each of Alice, Ben and Connie. Alice, Ben and Connie are not getting along with the outside investors and want to buy them out. They believe the business will continue to expand and do not wish to share this growth with the investors when the company is later sold, and they are tired of paying a 20% return to the investors.

How should Alice, Ben and Connie go about buying out the investors? How would the form of organization affect this?

Structurally, it would require an agreement on the part of the investors to be bought out. The founders could have an option built into the original financing arrangements allowing them to buy back at certain formula, or upon certain triggers. Discuss dispute resolution mechanisms as well as buy-out options. Contrast S corporation or C corporation buy-out with after-tax dollars with LLC buy-out with pre-tax dollars under Code § 736, which can eliminate capital gain tax on part or all of the complete liquidation of an LLC member's interest.

Bigger Workforce: Family Business Succession Planning - Year 10

In Year 10, the business is earning \$2,000,000 net profit, after paying \$250,000 annual compensation to each of Alice, Ben and Connie. It has full sales and manufacturing forces and excellent office support, for a total of 50-100 employees. Everyone loves these new widgets; Connie keeps finding ways to improve the product; and Alice keeps finding new customers. Ben, however, is tired of trying to keep up with their unbridled energy. Ben's son, George, just received an MBA from a leading business school. Ben thinks that George should take over Ben's job and would like to transfer some of his equity to him. Alice and Connie agree to let George work his way into the business, getting experience in various office functions and eventually moving up to Ben's job in five years if George works out well.

How should they handle George's new role and Ben's phasing out of his own role? What if George turns out to be a slacker?

Estate planning issues: tax rates and exemption levels, ability to make gifts, transferring business opportunities or leveraged businesses, asset protection planning using trusts, passing to spouse and children, fair vs. equal, dividing into voting and nonvoting ownership interests, need for single class of equity interest (consider nonvested stock), and estate tax issues with related party buy-sell agreements. Alice, Ben and Connie want to institute some kind of

nonqualified deferred compensation plan for themselves. Develop simple performance bonus for George, payable within 2½ months after close of year with no option for deferral. Important to set goals based on where Alice, Ben and Connie want George to be in five years. If George turns out to be a slacker, he gets no bonus. When Ben wants to transfer some of his shares to George, consider the issues of restrictions on transfer, rights of first refusal, etc.

Purchase of Retiring Founder's Interest; Business Succession Planning to Current Key Employee - Year 15

In Year 15, Alice gets bored. She wants to sell her share of the business to Ben, George and Connie and retire to a tropical island, along with the main characters in John Grisham's first two books. Sally, an employee who has been a top salesman for years, wants to take Alice's job. However, Sally has no money to invest to buy out Alice. Furthermore, Sally wants some financial incentives based on the company's sales and profitability.

Should the company, the other owners, or Sally buy out Alice? What kind of incentives should Sally be given?

Availability of capital gain rates when entity sells assets. Tax on splitting up or dissolving. Code § 736 payments. Consider phantom shares or restricted stock for Sally. George needs to be ahead of Sally because he is the son of the founder and, in his mind, the heir apparent. Include George in same plan developed for Sally. Also see issues from Year 10.

Purchase of Deceased Founder's Interest, Including Possible Sale of Business - Year 20

In Year 20, Connie dies. The stresses of keeping up with changing technology and foreign competition left her exhausted.

How should the remaining owners handle buying out Connie's ownership interest, which under her estate plan would pass to her husband, Herman?

Instead, should they sell the business? To the employees or to outside investors? Possible merger?

What if the remaining owners prefer to retire, turning the business over to the employees?

Estate tax deferral. Restricted stock (or phantom stock) immediately vested. Also see issues from Year 15.

III. Estate Planning Implications

The first section of this portion deals with drafting and administering trusts and estates, including income taxation and fiduciary responsibility. The second section deals with transfer tax issues, including transfers during life, estate tax issues, and special valuation issues (including the effect of buy-sell agreements). The third section discusses fairness within families, including allocating assets when businesses are involved and potential conflicts of interest involved in those allocation decisions.

The American College of Trust and Estate Counsel provides [free estate planning resources](#) for those who do not specialize in the field.

III.A. Drafting and Administering Trusts and Estates

Drafting trusts to hold business interests involves melding the grantor's wishes with the related income tax consequences, especially when holding stock in S corporations. Trustees need to consider diversifying, but when a special purpose of the trust is to hold a business interest, the trustees will want to make sure that the businesses are professionally run in a manner that is both economically sound for the beneficiaries but also minimizes the trustees' liability.

III.A.1. General Benefits of Trusts

Increasingly, people are becoming aware of the need to protect their assets from claims by creditors or spouses. Clients can do a big favor for their surviving spouses or children by leaving assets in trust instead of outright. The trust agreement can provide them with virtually complete control over the trust. Or, if clients wish, the trust agreement could be very restrictive. It all depends on what they want.

For example, a wife leaves her entire estate outright to her husband upon her death. They orally agree that he will leave her remaining assets to their children at his death. Unfortunately, that's a moral, not a legal, agreement. Suppose the husband remarries after the wife's death. Under Missouri law, upon his death, his new spouse would have the right to about 1/3 of his estate. This would be contrary to the clients' originally agreed goal of having all of their assets pass to their children at her death.

What about estate taxes? A credit shelter trust can protect future appreciation from estate tax, for those concerned about it. Lawyers can include various options to attain basis step-up through selective estate inclusion, to the extent it later turns out to be beneficial.

Clients can avoid these problems and reduce or avoid estate tax by leaving their property in trust for the surviving spouse. If they wish, the surviving spouse can be the sole trustee, take distributions for support as the surviving spouse determines, and change how the trust's assets pass at the surviving spouse's death to take into account changes in their children's family circumstances. Because the assets are in a trust the first spouse created, if the second spouse remarries, the new spouse would not have a claim on them upon the second spouse's death. Because the first spouse used his or her estate tax exclusion amount to create the trust, it will be excluded from the surviving spouse's estate at the surviving spouse's death, and the surviving spouse can use his or her exclusion amount to cover the assets that the surviving spouse owned outside of that trust.

What about leaving assets to children? Even adult children may need protection from creditors and spouses. Suppose a child starts a new business. The child's creditors will demand personal guarantees. If the client leaves assets to the child outright, they would be at risk. Likewise, if the child marries, the child's spouse might persuade the child to put the money in a joint account. If the child later divorces, the child will need to split this account with the soon-to-be ex-spouse.

⁵⁸⁵⁶ See

<http://www.aicpa.org/INTERESTAREAS/TAX/RESOURCES/TRUSTESTATEANDGIFT/Pages/default.aspx>.

When I asked a client whether he liked the idea of trusts for his children, he told me about his neighbor. The neighbor bought a house for his daughter and her husband. The house was titled jointly in their names. When the daughter divorced, the neighbor bought his ex-son-in-law's half so that the daughter could own the house outright. In other words, the neighbor paid for his daughter's house one and a half times!

Clients can avoid these, and other (special needs trusts), problems by leaving your property in a separate trust for each child. If the client wishes, his or her child can be the sole trustee of the child's trust, take distributions to support the child as the child determines, and change how the trust's assets pass at the child's death. The child might even be able to pass the trust's assets free from estate tax, even if the child's separate assets use up the estate tax exclusion amount.

I often authorize an independent person to make unlimited distributions to the beneficiary, to facilitate tax planning or decanting.⁵⁸⁵⁷

Many states now allow trusts to last forever. However, flexible drafting can let each generation change the rules for the next.

By using trusts, we can help clients protect their families from predators. We can also build in flexibility to allow them to react to changes that nobody can foresee, so that we can help clients give their families a legacy that they might enjoy forever.

III.A.2. Liability Issues

In most states, trusts may hold interests in general partnerships or sole proprietorships only if the governing instrument or a state statute grants the trustee authority to do so, because of the liability risks involved. Even investments in limited liability entities may be considered too risky unless they have a proven track record. The propriety of an authorized investment in a closely-held business is determined by applying the same standard of care as for other assets.⁵⁸⁵⁸

Under the Uniform Prudent Investor Act (UPIA),⁵⁸⁵⁹ a trustee "shall invest and manage trust assets as a prudent investor would by considering the purposes, terms, distribution requirements, and other circumstances of the trust;" and in making such decisions, the trustee "shall exercise reasonable care, skill and caution."⁵⁸⁶⁰ Additionally, a trustee's investment and management decisions regarding individual assets are to be evaluated with respect to the trust portfolio as a whole and "as part of an overall investment strategy having risk and return objectives reasonably suited to the trust."⁵⁸⁶¹ While making investment decisions and managing trust assets, the trustee should consider factors such as general economic conditions, tax consequences, the role of the asset in the overall trust portfolio, and the expected return from the asset.⁵⁸⁶² Perhaps the most important factor to be considered is the asset's special relationship or value to the purposes of the trust or to one or more of the beneficiaries, when the special purpose of the trust is to hold a business interest.⁵⁸⁶³ This factor ties in with the UPIA's

⁵⁸⁵⁷ See part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

⁵⁸⁵⁸ See generally, Bogert, *The Law of Trusts and Trustees*, § 679 (Rev. 2d. Ed. 1982).

⁵⁸⁵⁹ Citations to the Uniform Prudent Investor Act (UPIA) are to the version adopted in 1994, published April 18, 1995, by the National Conference of Commissioners on Uniform State Laws.

⁵⁸⁶² UPIA §2(c) .

⁵⁸⁶³ UPIA §2(c)(8).

other requirement that the trustee diversify the trust investments unless special circumstances indicate the trust's purposes would be better served without diversification.⁵⁸⁶⁴ Thus, when the trust's specific purpose is to hold a business interest, a lack of diversity in the assets of the trust will not run afoul of the UPIA's requirements. Finally, the UPIA imposes a "duty of impartiality" when the trust has more than one beneficiary. The trustee is to act impartially in performing his or her duties and in doing so should take into account any differences in the beneficiaries' interests. For example, the trustee has to consider any potential conflicts between the interests of beneficiaries interested in trust income versus those interested in trust principal.⁵⁸⁶⁵ This duty of impartiality will affect the trustee's investment and management conduct with regard to principal and income allocations – especially with regard to tax burden allocations.

The Uniform Trust Code (UTC)⁵⁸⁶⁶ provides default rules governing the trustee's duties and powers but allows for many of those rules to be modified by terms of the trust.⁵⁸⁶⁷ Among those duties are the duty of loyalty and the duty of impartiality among beneficiaries, a duty identical to the UPIA's duty of impartiality.⁵⁸⁶⁸ With regard to the duty of loyalty, the trustee must act in furtherance of the best interests of the beneficiaries. Specifically, when the trust holds a business interest, the trustee has a duty to vote shares and use proper care to promote beneficiary interests; and when the trust is the sole owner of an entity, the trustee should elect or appoint a director or manager to manage the entity in the best interests of the beneficiaries.⁵⁸⁶⁹ In a corporate context, the trustee must vote for corporate directors who will follow policy consistent with the trustee's duty of impartiality. The UTC also emphasizes that when a trustee has special skills or expertise in an area, he or she should use those skills in managing the trust.⁵⁸⁷⁰ In recognition of the trustee's ability to hold business interests, the UTC gives the trustee the power to continue business and take actions that would be taken by shareholders, members, or property owners and allows the trustee to exercise rights of an absolute owner with respect to stocks or other securities.⁵⁸⁷¹ One might consider including a provision addressing the compensation a person earns as trustee, as a director, and as an officer or other employee of the company – who makes the payments and how do the payments relate to each other. These duties might conflict with the corporate directors' duties to *all* the shareholders.

With regard to partnership interests specifically, National Banks may find it difficult to hold a partnership interest. The Office of the Comptroller of the Currency (OCC) regulates these banks and has stated that, as a general partner, a bank's liability is not limited to the principal of a particular account, but that it would object to a bank investing in general partnerships unless local law limited the bank's liability.⁵⁸⁷² As a limited partner, a bank usually would not have a say in the management of the assets. When a bank does hold a limited partnership interest, the OCC will not object if such investment is authorized by the governing instrument, local law or by written consent of account beneficiaries. Additionally, the bank would still be subject to the

prudent investment standard, and the investment would have to meet the objective of the entity to match the outsider's offer.⁵⁸⁷³ Distributions are mandatory, but the person controlling the entity may establish reasonable reserves.

Some people give the donee the right to sell the interest to the donee for cash equal to the appraised value, which right lasts 15-45 days – whatever the practitioner feels is similar to what would be a reasonable period within which to exercise *Crummey* rights.⁵⁸⁷⁴

III.A.3. Trusts Holding Stock in S Corporations

Estates, including not only decedents' estates but also bankruptcy estates, are qualified shareholders during a reasonable period of administration.⁵⁸⁷⁵

The holder of a usufruct interest is similar to a life tenant and is not considered to be a trustee of a trust. Rather, the holder is treated as the sole owner for K-1 purposes.⁵⁸⁷⁶

The rest of this part III.A.3 deals with trusts.

Rev. Rul. 93-79 held:

A state court order, which retroactively reforms a trust to meet the requirements of a qualified subchapter S trust, does not have retroactive effect for purposes of determining the trust's eligibility to be a shareholder of an S corporation.

However, Rev. Rul. 93-79 also held:

The trust reformation, however, will be recognized prospectively. Therefore, because X has never been an S corporation, it may file a new S corporation election for a subsequent taxable year without waiting the 5-year period specified in section 1362(g) of the Code for new S corporation elections by corporations whose previous elections have terminated.

Rev. Rul. 93-79 reasoned:

In the present situation, the original terms of the Trust did not satisfy the requirements of section 1361(d)(3)(A)(ii) of the Code regarding distributions of corpus. Consequently, the Trust was not a QSST and was ineligible to be an S corporation shareholder. Thus, the S corporation election filed by X on March 15, 1992, was ineffective because the Trust held shares of X at the time the election was filed. In an effort to cure the ineffective

⁵⁸⁷³ If a right of first refusal contains a fixed price instead of just the right to match the offering price, and that fixed price is less than the offering price, failure to exercise that right generally would constitute a gift. Letter Ruling 9117035.

election, the Trust's beneficiaries obtained a court-approved retroactive reformation of the governing trust instrument.

Retroactive changes of the legal effects of a transaction through judicial nullification of a transfer or judicial reformation of a document do not have retroactive effect for federal tax purposes. *American Nurseryman Publishing Company v. Commissioner*, 75 T.C. 271, 276-277 (1980), *aff'd without published opinion*, 673 F.2d 1333 (7th Cir. 1982); *Estate of Hill v. Commissioner*, 64 T.C. 867 (1975), *aff'd without published opinion*, 568 F.2d 1365 (5th Cir. 1978); *Emerson Institute v. United States*, 356 F.2d 824 (D.C. Cir. 1966), *cert. denied*, 385 U.S. 822 (1966); *Piel v. Commissioner*, 340 F.2d 887 (2d Cir. 1965); *M.T. Straight Trust v. Commissioner*, 245 F.2d 327 (8th Cir. 1957); *Eisenberg v. Commissioner*, 161 F.2d 506 (3d Cir. 1947), *cert. denied*, 332 U.S. 767 (1947); *Sinopoulos v. Jones*, 154 F.2d 648 (10th Cir. 1946).

American Nurseryman considered whether an S corporation election was terminated when stock in the corporation was transferred to a trust. A state court found that the stock transfer was a mistake and held it to be void. The Tax Court disregarded the effect of the state court action for purposes of determining the federal tax status of the corporation and found that the S election was terminated. The court followed the consistently expressed judicial opinion that judicial reformation cannot operate to change the federal tax consequences of a completed transaction.

Quoting its opinion in *M.T. Straight Trust v. Commissioner*, 24 T.C. 69 (1955), *aff'd*, 245 F.2d 327 (8th Cir. 1957), the court in *American Nurseryman* said that it recognized that "[t]here are numerous cases in which the construction or interpretation of an instrument by a decision of a State court involving the taxpayer and rendered subsequent to the taxable period involved has been relied upon to determine the tax consequences of the document, but the court stated that "In the instant case, however, the reformation decree is not a determination of the legal effect of the original trust instrument under local law, nor does it purport to be such a determination. On the contrary, it alters and modifies the instrument." 75 T.C. 275. The court went on to observe that "as a general rule a reformation of an instrument has retroactive effect as between the parties to the instrument, but not as to third parties who previously acquired rights under the instrument." 75 T.C. 276.

In *Flitcroft v. Commissioner*, 328 F.2d 449 (9th Cir. 1964), *rev'g*, 39 T.C. 52 (1962), the taxpayers established trusts that were not by their terms irrevocable. State law mandated that a trust was not irrevocable unless expressly stated in the trust instrument. A state court reformed the trusts, based on the asserted original intent of the grantors, and decreed that the trusts were irrevocable from their execution. The Ninth Circuit held that the trusts were irrevocable for federal tax purposes. The Service does not follow the Ninth Circuit's decision in *Flitcroft* to the extent it requires the Service to give effect to a retroactive reformation.

Accordingly, the reformation of the Trust will not be recognized retroactively to cure the defective S corporation election filed by X. Because an ineligible trust held shares of X stock at the time X's S corporation election was filed, X was not a small business corporation on that date (as required by section 1362(a) of the Code) and on each day of 1992 before that date (as required by section 1362(b)(2)(B)(i)). Therefore, X never became an S corporation because the S corporation election filed by X on March 15, 1992, was ineffective. Furthermore, the provision of section 1362(b)(2) permitting

certain otherwise ineffective elections to be effective for the following taxable year does not permit the election filed by X to be valid for the following taxable year, 1993, because X was not a small business corporation when the election was filed.

However, see parts II.A.2.e.iii Relief for Late S corporation Elections Within 3+ Years, II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity, and III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections.

III.A.3.a. Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures

A wholly owned grantor trust is among the types of trusts that can hold stock in an S corporation. For a description of the types of trusts that qualify, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

Below are discussions of what types of trusts can qualify as wholly owned grantor trusts, what it means to be “wholly” owned, how a trust can fall short, and what step an S corporation should take to avoid a trust falling short if it is at risk for doing so.

III.A.3.a.i. Qualifying as a Wholly Owned Grantor Trust

This part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures discusses a trust that qualifies as a shareholder solely because all of the trust is treated under the grantor trust rules as owned by an individual who is a citizen or resident of the United States.⁵⁸⁷⁷ If a trust has more than one deemed owner but they have substantially separate and independent shares, the trusts are treated as separate trusts⁵⁸⁷⁸ and may separately qualify as wholly owned grantor trusts.⁵⁸⁷⁹

⁵⁸⁷⁷ Implementing Code § 1361(c)(2)(A)(i), Reg. § 1.1361-1(h)(1)(i) provides:

Qualified subpart E trust. A trust all of which is treated (under subpart E, part I, subchapter J, chapter 1) as owned by an individual (whether or not the grantor) who is a citizen or resident of the United States (a qualified subpart E trust). This requirement applies only during the period that the trust holds S corporation stock.

⁵⁸⁷⁸ Implementing the flush language at the end of Code § 1361(d)(3), Reg. § 1.1361-1(j)(3) includes:

For purposes of sections 1361(c) and (d), a substantially separate and independent share of a trust, within the meaning of section 663(c) and the regulations thereunder, is treated as a separate trust.

⁵⁸⁷⁹ In approving a community property trust as an eligible shareholder before and after divorce, Letter Ruling 9729025 held:

Under the trust agreement, H and W retain the power to revoke TR and revest the trust’s property in themselves. Therefore, H and W are treated, under section 676, as the owners of TR until their divorce. Because TR is treated as owned entirely by H and W between d2 and d3, TR is a trust described in section 1361(c)(2)(A)(i).

Under section 663(c) and section 1.663(c)-1(a) of the Income Tax Regulations, shares of a single trust are treated as separate trusts if the trust has more than one beneficiary and the different beneficiaries have substantially separate and independent shares. Section 1.663(c)-3 provides that the applicability of the separate share rule generally depends upon whether distributions of the trust are to be made in substantially the same manner as if separate trusts had been created. Thus, if an instrument directs a trustee to divide the trust estate into separate shares for each beneficiary and the trustee is given discretion, with respect to each share, to distribute or

If not a foreign trust,⁵⁸⁸⁰ such a grantor trust automatically qualifies as an S corporation shareholder,⁵⁸⁸¹ and the trust's deemed owner is treated as the shareholder for all tax purposes,⁵⁸⁸² including the 100-shareholder limitation.⁵⁸⁸³

A revocable trust would qualify as a grantor trust taxed to its grantor.⁵⁸⁸⁴ An irrevocable trust might qualify as a grantor trust taxed to the grantor under the normal rules of Code §§ 671-677, to the beneficiary under Code § 678, or to the beneficiary through a QSST election made by the beneficiary.

A trust might be taxable to a beneficiary under Code § 678 if the beneficiary has a withdrawal right with respect to all gifts to the trust (a *Crummey* trust);⁵⁸⁸⁵ whether such withdrawal rights impair spendthrift protection requires additional analysis.⁵⁸⁸⁶ Examples of Code § 678 trusts include:

- Grantor creates a “vested” trust for a grandchild, as follows: The grandchild can withdraw the entire gift and all earnings on the gift. This withdrawal right lapses in full after a

accumulate income or to distribute principal or accumulated income or to do both, separate shares will exist under section 663(c).

Upon the dissolution of H's and W's marriage, the community property held by TR (including the X stock) was divided equally on the trustee's books and each half was treated as the separate property of H and W. As a result, H was entitled to all of the income from his separate share of the trust property and so much of the principal as he directed. Likewise, W was entitled to all of the income from her separate share of the trust property and so much of the income as she directed. Therefore, H's and W's shares of TR are substantially separate and independent shares within the meaning of section 663(c).

I am not sure that I agree with the logic of why the trust qualified while they were married, although ultimately the result was probably correct. The ruling points out that Code § 1361(c)(1) treats spouses as one shareholder for purposes of Code § 1361(b)(1)(A). However, the ruling determined eligibility under Code § 1361(c)(2)(A)(i), so presumably applying the spousal unity rule for purposes of Code § 1361(b)(1)(A) would not have been relevant to the ruling. Therefore, because the ruling's spousal unity reasoning appears incorrect, make sure that any community property trusts are held as separate and independent shares during life.

For further analysis, see fns 6666-6667 and accompanying text in part III.B.2.h.i Who Is the Grantor
⁵⁸⁸⁰ Consistent with the last sentence of Code § 1361(c)(2)(A), Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even if otherwise would qualify as a shareholder.

⁵⁸⁸¹ Code § 1361(c)(2)(A)(i).

⁵⁸⁸² Code § 671. Grantor trusts may use their deemed owners' social security numbers as their taxpayer identification numbers. Reg. § 1.671-4(b)(2)(A). However, a QSST must file Form 1041 and attach a statement of the items treated as having been received directly by its beneficiary. Reg. § 1.671-4(b)(6). One might consider filing Form 1041 for other grantor trusts as well to get the statute of limitations running on grantor trust treatment.

⁵⁸⁸³ Code § 1361(c)(2)(B)(i).

⁵⁸⁸⁴ Code § 676.

⁵⁸⁸⁵ See discussion of IRS Letter Rulings in 730-2nd T.M., S corporations: *Formation and Termination*, II.E.1.b(3), and in *Federal Income Taxation of S corporations* ¶ 3.03[10] (4th ed., Warren, Gorham & Lamont). A trustee-beneficiary's power to make distributions to himself under an ascertainable standard might make the trustee-beneficiary a Code § 678 owner to the extent of that distributions would be authorized under that standard. Letter Rulings 8211057 and 200747002 (Code § 678(a)(2) lapse followed by the beneficiary-trustee being able to make distributions to himself under an ascertainable standard was sufficient to allow the trust to hold stock in an S corporation). For more details, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

⁵⁸⁸⁶ See parts III.B.2.i.ix Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights.

reasonable interval. The grandchild is the sole beneficiary during his or her life and has a general power of appointment upon death. For income tax purposes, one may treat the trust as deemed owned 100% by the beneficiary.⁵⁸⁸⁷ The gift qualifies for the annual exclusion.⁵⁸⁸⁸ For estate tax purposes, the trust is includible in the beneficiary's estate.⁵⁸⁸⁹ If and to the extent that the gift qualifies for the annual exclusion, the gift is also exempt for generation-skipping transfer (GST) purposes, without using any GST exemption.⁵⁸⁹⁰ If and to the extent that the lapse exceeds the greater of \$5,000 or 5% of the trust's assets (subject to coordination with other lapses by that beneficiary),⁵⁸⁹¹ the beneficiary has made an incomplete gift⁵⁸⁹² and for GST purposes becomes the transferor,⁵⁸⁹³ however, because the trust is included in the beneficiary's estate for estate tax purposes, the beneficiary's GST exemption needs to be allocated upon death anyway.

- Grantor makes a gift of less than \$5,000 to the trust⁵⁸⁹⁴ and later sells stock in an S corporation to the trust.⁵⁸⁹⁵
- Decedent bequeaths to a trust over which the beneficiary holds an unlimited withdrawal right, making the trust taxable to the beneficiary under Code § 678(a)(1), building in features that would trigger Code § 678(a)(2) after the withdrawal rights lapse.⁵⁸⁹⁶

Note that the settlor's grantor trust powers trump any beneficiary's grantor trust powers.⁵⁸⁹⁷

A beneficiary may also be treated as the owner by making a "QSST" election⁵⁸⁹⁸ to have the grantor trust rules apply. See part III.A.3.e.i QSSTs.

III.A.3.a.ii. How a Trust Can Fall Short of Being Wholly Owned by One Person

If a person is treated as the owner of a portion of a trust, that portion may or may not include both ordinary income and other income allocable to corpus.⁵⁸⁹⁹ However, for a trust to meet the

⁵⁸⁸⁷ See parts III.B.2.i.vii Portion Owned When a Gift Over \$5,000 is Made.

⁵⁸⁸⁸ For qualification of withdrawal rights for the annual exclusion and whether an interest in a business entity qualifies for the annual exclusion, see part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts, especially the paragraph accompanying fn. 6373.

⁵⁸⁸⁹ Code § 2041(a)(2).

⁵⁸⁹⁰ Code § 2642(c).

⁵⁸⁹¹ Code § 2514(e). For more details on calculating the 5% lapse, see fn 6148 in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).

⁵⁸⁹² Reg. 25.2511-2(b).

⁵⁸⁹³ See Reg. § 26.2652-1(a)(5), Example (5), reproduced in fn 676 in part II.D.3 Trust as Grantor or Deemed Owner of Another Trust.

⁵⁸⁹⁴ See part III.B.2.i.vi Funding the Trust with Small Gifts.

⁵⁸⁹⁵ See part III.B.2.i.v Sale to a Beneficiary Deemed-Owned Trust – When a Traditional Sale to an Irrevocable Grantor Trust Does Not Meet the Client's Objectives.

⁵⁸⁹⁶ See part III.B.2.i.viii Funding the Trust with a Large Initial Gift or Bequest.

⁵⁸⁹⁷ Code § 678(b).

⁵⁸⁹⁸ Code § 1361(d)(1). If the beneficiary dies and the trust continues, with another beneficiary stepping into his or her place, the QSST election remains in place, Reg. § 1.1361-1(j)(9); but, if the trust terminates by reason of the beneficiary's death, then a new QSST election must be filed. Reg. § 1.1361-1(j)(9)(ii), Example (2). One might consider including a clause that, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to Reg. § 1.1361-1(j)(9)(ii), Example (1).

⁵⁸⁹⁹ Reg. § 1.671-3(b).

wholly owned grantor trust rules, one person must be the deemed owner of both income and principal.⁵⁹⁰⁰

If the grantor's spouse is a beneficiary, the trust is not necessarily deemed wholly owned,⁵⁹⁰¹ so an additional grantor trust power might be advisable.⁵⁹⁰² The trust might very well cease qualifying as a wholly-owned grantor trust upon separation or divorce,⁵⁹⁰³ so that an ESBT election might be necessary after divorce or separation.⁵⁹⁰⁴

If a trust qualifies as being deemed wholly owned by the beneficiary, consider what might happen if the provision upon which the beneficiary's deemed ownership is based includes some ambiguity.⁵⁹⁰⁵ Also, if the beneficiary does not have a withdrawal right over every gift to the trust and over the income and gains generated by each such gift or if the beneficiary has a withdrawal right that lapses in an incorrect manner, the trust might not be deemed wholly owned by the beneficiary.⁵⁹⁰⁶

III.A.3.a.iii. Steps an S Corporation Might Take to Avoid a Trust Falling Short of Being a Wholly-Owned Grantor Trust

An S corporation might insist that certain protective measures be taken in case a trust falls short of being deemed wholly owned by one person.

If the trust is intended to be deemed owned wholly by the beneficiary, the beneficiary might file a QSST election, just in case the trust is not deemed wholly owned by the beneficiary. A beneficiary cannot elect QSST treatment if the grantor is taxed as the owner; however, a beneficiary may elect QSST treatment if the beneficiary is taxed as the owner.⁵⁹⁰⁷ However, the beneficiary might not want to make the QSST election during any time when the trust is buying stock from the beneficiary, because a QSST election complicates the purchase and might make the process of getting the value of the stock out of the beneficiary's estate take twice as long.⁵⁹⁰⁸

For a trust deemed owned by its settlor (or a trust deemed owned by its beneficiary where QSST status is undesirable to impractical), the trust might file an ESBT election, just in case the

⁵⁹⁰⁰ Code § 1361(c)(2)(A)(i). Letter Ruling 200226006 held that a trust that was partly a nongrantor trust and partly a grantor trust did not satisfy this rule, even though the grantor trust portion was created by contributing S corporation stock and the nongrantor portion was created by contributing other assets. (Generally I would recommend separating grantor and nongrantor trusts anyway; the facts in that letter ruling were particularly problematic in that the trust appears to be partially a GST-exempt trust and partially a Code § 2036 trust.) This ruling is consistent with Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 5996, which is found in part III.A.3.e.i.(a) QSSTs Generally). Letter Ruling 200942020 approved an irrevocable grantor trust as an S corporation shareholder when it had multiple *Crummey* power holders, holding that Code § 678(b) caused the grantor's deemed owner status to trump the beneficiaries' deemed owner status.

⁵⁹⁰¹ Letter Ruling 201208013.

⁵⁹⁰² See part III.B.2.h How to Make a Trust a Grantor Trust.

⁵⁹⁰³ See fn. 5996, discussing how Reg. § 1.1361-1(k)(1), Example (10), applies Code § 682 to a trust owning stock in an S corporation.

⁵⁹⁰⁴ See parts III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation (especially part III.A.3.b.v An Electing Small Business Trust) and III.A.3.e.ii.(a) Qualification as an ESBT.

⁵⁹⁰⁵ See part III.B.2.i.xii Dealing with Code § 678(a)(2) Uncertainty.

⁵⁹⁰⁶ See part III.B.2.i.vii Portion Owned When a Gift Over \$5,000 is Made.

⁵⁹⁰⁷ Reg. § 1.1361-1(j)(6)(iv).

⁵⁹⁰⁸ See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).

trust is not a wholly-owned grantor trust taxable to only one person. Although estate planners commonly rely on swap powers, they are not foolproof.⁵⁹⁰⁹ A grantor trust may make an ESBT election.⁵⁹¹⁰ However, grantor trust treatment trumps ESBT taxation.⁵⁹¹¹ That doesn't mean that the ESBT election is not technically in effect⁵⁹¹² - it just means that the election has no current income tax consequences. Although the trust needs an EIN to make an ESBT election, nothing in Reg. § 1.671-4(b)(6) prevents an ESBT from using the grantor's social security number as its tax ID. Thus, the S corporation can issue the K-1 using the grantor's social security number⁵⁹¹³.

These protective measures are not necessarily beneficial to anyone other than the S corporation:

- A grantor trust can use regular income taxation for the first two years after the grantor's death and get more favorable income tax treatment as a regular trust.⁵⁹¹⁴ Post-mortem ESBT treatment may be good or bad, depending on whether the income distribution deduction would generate higher or lower federal and state (consider the trust's and beneficiaries' respective residences) income taxes; see part II.J.3 Strategic Fiduciary Income Tax Planning (and other cross-references in the footnote at the end of this sentence).⁵⁹¹⁵ The ESBT portion of the trust should get a \$10,000 state income tax deduction that is separate from the non-S portion, so if the trust has other income then having an additional state income tax deduction can help; see part II.J.3.d Who Benefits Most from Deductions.
- Some grantor trusts might qualify as a QSST or an ESBT upon termination of grantor trust status. The regulations limit how often one can switch back and forth between QSST and ESBT status. Initially making the ESBT election means that, after switching to a QSST

⁵⁹⁰⁹ Whether a swap power is effective depends on the facts and circumstances, as described in Reg. § 1.675-1(b)(4)(iii). Part III.B.2.h.iii Swap Power quotes this regulation and describes why estate planners do not mind relying on it as the sole grantor trust feature. Letter Ruling 9548013 held (highlighting added):

Based upon the facts and representations you submitted, we conclude that A will be treated as the owner of TR1 and B will be treated as the owner of TR2 provided that the District Director determines that the circumstances indicate that A and B hold the power of administration over the entire corpus of their respective trusts in a nonfiduciary capacity. Therefore, A and B will be considered the owners of their respective trusts until their deaths, the termination of the trusts, or they release their administrative power, whichever comes first.

To protect an S election against an adverse finding by the District Director, one might want the additional protection that an ESBT election provides.

⁵⁹¹⁰ Reg. §§ 1.1361-1(m)(2)(v) (general approval for grantor trust to make an ESBT election), 1.1361-1(m)(8)(iii), Example 3 (Code § 678 trust may make an ESBT election).

⁵⁹¹¹ Reg. § 1.641(c)-1(c). A partial grantor trust is illustrated in Reg. § 1.641(c)-1(f), Example (1).

⁵⁹¹² A trust may not make a protective ESBT election. Reg. § 1.1361-1(m)(2)(v), which concludes with: In addition, a trust that qualifies as an ESBT may make an ESBT election notwithstanding that the trust is a wholly-owned grantor trust.

⁵⁹¹³ See generally part III.B.2.e.i Grantor Trust Treatment During the Grantor's Life.

⁵⁹¹⁴ Code § 1361(c)(2)(A)(ii). See Code § 641(c) for ESBTs' unfavorable income tax treatment.

⁵⁹¹⁵ With that part or outside that part, see especially parts II.J.4.h.i Trapping Income in Trust Notwithstanding Distributions – ESBT, as well as parts II.E.1.f Trusts/Estates and the Code § 199A Deduction (especially part II.E.1.f.ii Electing Small Business Trusts (ESBTs)), II.J.3.a Who Is Best Taxed on Gross Income, II.J.3.c Who Is Benefits the Most from Losses, II.J.3.d Who Benefits Most from Deductions, III.A.3.e.ii.(b) ESBT Income Taxation - Overview, and III.A.3.e.ii.(c) When ESBT Income Taxation Might Help.

once, the trust must wait 36 months before switching back to a QSST or later back to an ESBT again. Absent the initial ESBT election, the beneficiary could make a QSST election upon termination of grantor trust status and later switch to ESBT status with waiting 36 months. Part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock describes this, as well as the Reg. § 1.1361-1(m)(6) requirement to obtain a private letter ruling to revoke an ESBT election when not converting to a QSST.

If the sole risk to being wholly owned is the separation or divorce of a beneficiary from the grantor, an irrevocable grantor trust that includes the grantor's spouse as a beneficiary might provide that separation or divorce terminates the spouse's interest. That provision might avoid the need for an ESBT election upon which the S corporation otherwise might have required.

III.A.3.a.iv. Why to Be Extraordinarily Sensitive to Protecting the S Election

Some people point to the generous relief the IRS provides for inadvertent terminations and decide that going to great lengths to protect the S election is not necessary.⁵⁹¹⁶

However, a buyer might be very sensitive to the S election's validity, particularly in a stock sale that is treated as an asset purchase.⁵⁹¹⁷ Fixing any problems that the buyer's tax counsel perceives to exist (whether or not the problem actually exists) can delay a transaction, during which time other issues might arise that might cause the seller to lose a sale to a strategic buyer at a premium price. I became much more aware of this issue when a transaction worth hundreds of millions of dollars faced a possible delay due to an issue caused by prior counsel and I was asked to obtain a private letter ruling to fix it; I was able to get a private letter ruling in only six weeks from the date of submission, but until I did the client was very nervous about the six-month delay projected by those who insisted on the PLR. If I had not been able to get the PLR that quickly (which I have no assurance of being able to replicate) and that deal had cratered, I wonder what the repercussions would have been to prior counsel and then realized that any of us could be in that situation someday if there is even the slightest concern.

A solution that may satisfy the buyer (but does not cure the seller's S corporation problem) involves moving all of the corporation's assets into a single member LLC, which can be done using state law conversion/merger statutes and then selling that LLC.⁵⁹¹⁸ That solution may address other issues as well.⁵⁹¹⁹

⁵⁹¹⁶ See part III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections and the related discussion preceding that.

⁵⁹¹⁷ See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

⁵⁹¹⁸ See fns. 5800-5801 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

⁵⁹¹⁹ See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, especially fns. 5792-5798.

III.A.3.b. Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation

To qualify as S corporation shareholders for any length of time,⁵⁹²⁰ generally⁵⁹²¹ an irrevocable trust must either be a grantor trust or an electing small business trust (ESBT). Planning to avoid the 3.8% tax on net investment income⁵⁹²² requires additional planning regarding participation in the business; it may be advisable to have the trustee materially participate even if the trust is a grantor trust.⁵⁹²³

If not a foreign trust,⁵⁹²⁴ any of the trusts described below may be a shareholder. See also part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S corporation Stock During Taxable Year, which is part of part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

III.A.3.b.i. A Trust All of Which Is Treated Under the Grantor Trust Rules as Owned by An Individual Who Is a Citizen or Resident of the United States

See part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures.

III.A.3.b.ii. A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death

Code § 1361(c)(2)(A)(ii). This includes a former QSST.⁵⁹²⁵

⁵⁹²⁰ Trusts can qualify as S shareholders by electing to be taxed as an estate under Code § 645 (which election has a limited duration under Code § 645(b)(2)), by being a continuation of a grantor trust under Code § 1361(c)(2)(A)(ii), or a testamentary trust under Code § 1361(c)(2)(A)(iii) – for the latter, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.

⁵⁹²¹ A voting trust does not have time limits on how long it is an eligible shareholder under

Code § 1361(c)(2)(A)(iv).

⁵⁹²² See part II.I 3.8% Tax on Excess Net Investment Income (NII).

⁵⁹²³ See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

⁵⁹²⁴ Consistent with the last sentence of Code § 1361(c)(2)(A), Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even it otherwise would qualify as a shareholder.

⁵⁹²⁵ Reg § 1.1361-1(j)(7)(ii) provides:

If, upon the death of an income beneficiary, the trust continues in existence, continues to hold S corporation stock but no longer satisfies the QSST requirements, is not a qualified subpart E trust, and does not qualify as an ESBT, then, solely for purposes of section 1361(b)(1), as of the date of the income beneficiary's death, the estate of that income beneficiary is treated as the shareholder of the S corporation with respect to which the income beneficiary made the QSST election. The estate ordinarily will cease to be treated as the shareholder for purposes of section 1361(b)(1) upon the earlier of the transfer of that stock by the trust or the expiration of the 2-year period beginning on the day of the income beneficiary's death. During the period that the estate is treated as the shareholder for purposes of section 1361(b)(1), the trust is

Generally, such a trust is an eligible shareholder only for the 2-year period beginning on the day of the deemed owner's death.⁵⁹²⁶ It does not include a trust that did not own the stock during the deemed owner's life and received the stock pursuant to the terms of a will,⁵⁹²⁷ which is subject instead to the time period described in part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It. However, if the trust is subject to an election under Code § 645,⁵⁹²⁸ then the trust is taxed as an estate and can hold the stock during the entire period during which the trust is taxable as an estate.⁵⁹²⁹ Whether the trust qualifies as a former grantor trust or as an estate, the grantor's estate is treated as the owner for purposes of the 100-shareholder limitation.⁵⁹³⁰

treated as the shareholder for purposes of sections 1366, 1367, and 1368. If, after the 2-year period, the trust continues to hold S corporation stock and does not otherwise qualify as a permitted shareholder, the corporation's S election terminates. If the termination is inadvertent, the corporation may request relief under section 1362(f).

⁵⁹²⁶ Reg. § 1.1361-1(h)(1)(ii), "Subpart E trust ceasing to be a qualified subpart E trust after the death of deemed owner," provides:

A trust that was a qualified subpart E trust immediately before the death of the deemed owner and that continues in existence after the death of the deemed owner, but only for the 2-year period beginning on the day of the deemed owner's death. A trust is considered to continue in existence if the trust continues to hold the stock pursuant to the terms of the will or the trust agreement, or if the trust continues to hold the stock during a period reasonably necessary to wind up the affairs of the trust. See § 1.641(b)-3 for rules concerning the termination of trusts for federal income tax purposes.

The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2578 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced in fn 2747 in part II.J.8.

⁵⁹²⁷ Regs. § 1.1361-1(k)(1), Example 3, paragraph (i), provides:

2-year rule under section 1361(c)(2)(A)(ii) and (iii). F owns stock of Corporation P, an S corporation. In addition, F is the deemed owner of a qualified subpart E trust that holds stock in Corporation O, an S corporation. F dies on July 1, 2003. The trust continues in existence after F's death but is no longer a qualified subpart E trust. On August 1, 2003, F's shares of stock in Corporation P are transferred to the trust pursuant to the terms of F's will. Because the stock of Corporation P was not held by the trust when F died, section 1361(c)(2)(A)(ii) does not apply with respect to that stock. Under section 1361(c)(2)(A)(iii), the last day on which the trust could be treated as a permitted shareholder of Corporation P is July 31, 2005 (that is, the last day of the 2-year period that begins on the date of the transfer from the estate to the trust). With respect to the shares of stock in Corporation O held by the trust at the time of F's death, section 1361(c)(2)(A)(ii) applies and the last day on which the trust could be treated as a permitted shareholder of Corporation O is June 30, 2005 (that is, the last day of the 2-year period that begins on the date of F's death).

⁵⁹²⁸ See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

⁵⁹²⁹ Regs. §§ 1.1361-1(k)(1), Example 3, paragraph (ii) and 1.645-1(e)(2)(i); Letter Ruling 200529006.

⁵⁹³⁰ Code § 1361(c)(2)(B)(ii). Reg. § 1.1361-1(h)(3)(i)(B) provides:

If stock is held by a trust defined in paragraph (h)(1)(ii) of this section, the estate of the deemed owner is generally treated as the shareholder as of the day of the deemed owner's death. However, if stock is held by such a trust in a community property state, the decedent's estate is the shareholder only of the portion of the trust included in the decedent's gross estate (and the surviving spouse continues to be the shareholder of the portion of the trust owned by that spouse under the applicable state's community property law). The estate ordinarily will cease to be treated as the shareholder upon the earlier of the transfer of the stock by the trust or the expiration of the 2-year period beginning on the day of the deemed owner's death. If the trust

Reg. § 1.1361-1(k)(1), Example (1) illustrates how these rules might apply to a joint revocable trust when the grantor dies and then again later when the survivor's revocable trust and downstream irrevocable trusts are funded:

- (i) *Terms of the trust.* In 1996, A and A's spouse, B, created an inter vivos trust and each funded the trust with separately owned stock of an S corporation. Under the terms of the trust, A and B designated themselves as the income beneficiaries and each, individually, retained the power to amend or revoke the trust with respect to the trust assets attributable to their respective trust contributions. Upon A's death, the trust is to be divided into two separate parts; one part attributable to the assets A contributed to the trust and one part attributable to B's contributions. Before the trust is divided, and during the administration of A's estate, all trust income is payable to B. The part of the trust attributable to B's contributions is to continue in trust under the terms of which B is designated as the sole income beneficiary and retains the power to amend or revoke the trust. The part attributable to A's contributions is to be divided into two separate trusts both of which have B as the sole income beneficiary for life. One trust, the Credit Shelter Trust, is to be funded with an amount that can pass free of estate tax by reason of A's available estate tax unified credit. The terms of the Credit Shelter Trust meet the requirements of section 1361(d)(3) as a QSST. The balance of the property passes to a Marital Trust, the terms of which satisfy the requirements of section 1361(d)(3) as a QSST and section 2056(b)(7) as QTIP. The appropriate fiduciary under § 20.2056(b)-7(b)(3) is directed to make an election under section 2056(b)(7).
- (ii) *Results after deemed owner's death.* On February 3, 1997, A dies and the portion of the trust assets attributable to A's contributions including the S stock contributed by A, is includible in A's gross estate under sections 2036 and 2038. During the administration of A's estate, the trust holds the S corporation stock. Under section 1361(c)(2)(B)(ii), A's estate is treated as the shareholder of the S corporation stock that was included in A's gross estate for purposes of section 1361(b)(1); however, for purposes of sections 1366, 1367, and 1368, the trust is treated as the shareholder. B's part of the trust continues to be a qualified subpart E trust of which B is the owner under sections 676 and 677. B, therefore, continues to be treated as the shareholder of the S corporation stock in that portion of the trust. On May 13, 1997, during the continuing administration of A's estate, the trust is divided into separate trusts in accordance with the terms of the trust instrument. The S corporation stock that was included in A's gross estate is distributed to the Marital Trust and to the Credit Shelter Trust. A's estate will cease to be treated as the shareholder of the S corporation under section 1361(c)(2)(B)(ii) on May 13, 1997 (the date on which the S corporation stock was transferred to the trusts). B, as the income beneficiary of the Marital Trust and the Credit Shelter Trust, must make the QSST election for each trust by July 28, 1997 (the end of the 16-day-and-2-month period beginning on the date the estate ceases to be treated as a shareholder) to have the trusts become permitted shareholders of the S corporation.

qualifies and becomes an electing QSST, the beneficiary and not the estate is treated as the shareholder as of the effective date of the QSST election, and the rules provided in paragraph (j)(7) of this section apply. If the trust qualifies and becomes an ESBT, the shareholders are determined under paragraphs (h)(3)(i)(F) and (h)(3)(ii) of this section as of the effective date of the ESBT election, and the rules provided in paragraph (m) of this section apply.

Reg. § 1.1361-1(k)(1), Example (2) illustrates how these rules might apply to a revocable trust that stays intact when the grantor dies and includes a variation where a beneficiary has an unlimited withdrawal right after the grantor's death⁵⁹³¹ (common in joint revocable trusts for small estates):

- (i) *Qualified subpart E trust as shareholder.* In 1997, A, an individual established a trust and transferred to the trust A's shares of stock of Corporation M, an S corporation. A has the power to revoke the entire trust. The terms of the trust require that all income be paid to B and otherwise meet the requirements of a QSST under section 1361(d)(3). The trust will continue in existence after A's death. The trust is a qualified subpart E trust described in section 1361(c)(2)(A)(i) during A's life, and A (not the trust) is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.
- (ii) *Trust ceasing to be a qualified subpart E trust on deemed owner's death.* Assume the same facts as paragraph (i) of this Example 2, except that A dies without having exercised A's power to revoke. Upon A's death, the trust ceases to be a qualified subpart E trust described in section 1361(c)(2)(A)(i). A's estate (and not the trust) is treated as the shareholder for purposes of section 1361(b)(1). A's estate will cease to be treated as the shareholder for purposes of section 1361(b)(1) upon the earlier of the transfer of the Corporation M stock by the trust (other than to A's estate), the expiration of the 2-year period beginning on the day of A's death, or the effective date of a QSST or ESBT election if the trust qualifies as a QSST or ESBT. However, until that time, because the trust continues in existence after A's death and will receive any distributions with respect to the stock it holds, the trust is treated as the shareholder for purposes of sections 1366, 1367, and 1368. If no QSST or ESBT election is made effective upon the expiration of the 2-year period, the corporation ceases to be an S corporation, but the trust continues as the shareholder of a C corporation.
- (iii) *Trust continuing to be a qualified subpart E trust on deemed owner's death.* Assume the same facts as paragraph (ii) of this Example 2, except that the terms of the trust also provide that if A does not exercise the power to revoke before A's death, B will have the sole power to withdraw all trust property at any time after A's death. The trust continues to qualify as a qualified subpart E trust after A's death because, upon A's death, B is deemed to be the owner of the entire trust under section 678. Because the trust does not cease to be a qualified subpart E trust upon A's death, B (and not A's estate) is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368. Since the trust qualifies as a QSST, B may make a protective QSST election under paragraph (j)(6)(iv) of this section.

Note that, if the grantor's gross estate (for federal estate tax purposes) might be subject to estate tax, it is common for the trustee to hold the S stock for more than two years after the grantor's death. This is done to avoid the trustee incurring personal liability under the tax laws, because a final determination of estate tax might not be made until after the two-year period has expired. Therefore, the trustee should consider making a Code § 645 election, as described in the preceding paragraph.

⁵⁹³¹ Part (iii) of the regulation allows a protective QSST election, which is helpful as described in fn 5989 in part III.A.3.e.i.(a) QSSTs Generally.

Suppose S corporation stock a trust held at its deemed owner's death was transferred upon that death to two trusts created by the agreement that created the original trust. Would those trusts be treated as continuations of the original grantor trust under Code § 1361(c)(2)(A)(ii)? Letter Ruling 201709016⁵⁹³² assumed, without explanation, that the answer is "yes." Given that trust law treats the new trusts as separate trusts and legal title was transferred from the original trust, the former grantor trust does not appear to have continued its existence as to the transferred shares, so I would not rely on that assumption when planning.

Even when keeping the S corporation stock in such a trust or estate is permitted, doing so might come at an income tax cost. If the S corporation does not distribute all of its income, part or all its income might be taxed at the highest rate.⁵⁹³³ One might save significant annual income taxes by distributing the S corporation stock to one or more QSSTs, each of which is taxed at its beneficiary's income tax rate (without regard to how much cash the S corporation distributes),⁵⁹³⁴ which might be significantly lower. However, if estate tax is or might be due, consider the risks that the executor takes in distributing property before estate tax is paid in full.⁵⁹³⁵

For additional cash flow issues relating to a trust that was a grantor trust before the deemed owner's death, see also part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.b.iii. A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It

Code § 1361(c)(2)(A)(iii). In such a case, the testator's estate is treated as an owner for purposes of the 100-shareholder limitation.⁵⁹³⁶

Reg. § 1.1361-1(h)(1)(iv), "Testamentary trusts, provides:

A trust (other than a qualified subpart E trust, an electing QSST, or an electing small business trust) to which S corporation stock is-

- (A) Transferred pursuant to the terms of a will, but only for the 2-year period beginning on the day the stock is transferred to the trust except as otherwise provided in paragraph (h)(3)(i)(D) of this section; or
- (B) Transferred pursuant to the terms of an electing trust as defined in § 1.645-1(b)(2) during the election period as defined in § 1.645-1(b)(6), or deemed to be distributed at the close of the last day of the election period pursuant to § 1.645-1(h)(1), but in each case only for the 2-year period beginning on the day the stock is transferred or

⁵⁹³² In Letter Ruling 201709016, the two successor trusts qualified as QSSTs, but no QSST election was made within two years after the original deemed owner's death. The ruling allowed late QSST elections to be made, retroactive to two years after the original deemed owner's death.

⁵⁹³³ See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation.

⁵⁹³⁴ See part III.A.3.e.i.(a) QSSTs Generally.

⁵⁹³⁵ See generally III.B.3.c.iv Federal Estate Tax Liens.

⁵⁹³⁶ Code § 1361(c)(2)(B)(iii).

deemed distributed to the trust except as otherwise provided in paragraph (h)(3)(i)(D) of this section.

Thus, because a revocable trust that has made a Code § 645 election is treated as an estate, any transfer from that estate by reason of termination of the election or by bequest under that revocable trust is treated as transferred pursuant to the terms of a will. See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

Inadvertent termination relief has been granted for failure to make QSST elections for downstream trusts after the grace period expires.⁵⁹³⁷ A special rule applies if a Code § 645 election terminates before the stock is distributed to the transferee trust. On the close of the last day of the election period, the combined electing trust and related estate, if there is an executor, or the electing trust, if there is no executor, is deemed to distribute the share (or shares, as determined under Code § 663(c)) comprising the electing trust to a new trust in a distribution to which Code §§ 661 and 662 apply.⁵⁹³⁸ The qualified revocable trust is an eligible shareholder for the 2-year period beginning on the day the stock is deemed distributed to the trust.⁵⁹³⁹ Special rules apply for determining who is treated as the owner for purposes of the 100-shareholder limitation.⁵⁹⁴⁰

Reg. § 1.1361-1(k)(1), Example (3) provides:

- (i) *2-year rule under section 1361(c)(2)(A)(ii) and (iii)*. F owns stock of Corporation P, an S corporation. In addition, F is the deemed owner of a qualified subpart E trust that holds stock in Corporation O, an S corporation. F dies on July 1, 2003. The trust continues in existence after F's death but is no longer a qualified subpart E trust. On August 1, 2003, F's shares of stock in Corporation P are transferred to the trust pursuant to the terms of F's will. Because the stock of Corporation P was not held by the trust when F died, section 1361(c)(2)(A)(ii) does not apply with respect to that stock. Under section 1361(c)(2)(A)(iii), the last day on which the trust could be treated as a permitted shareholder of Corporation P is July 31, 2005 (that is, the last day of the 2-year period that begins on the date of the transfer from the estate to the trust). With respect to the shares of stock in Corporation O held by the trust at the time of F's death, section 1361(c)(2)(A)(ii) applies and the last day on which the trust could be treated as a permitted shareholder of Corporation O is June 30, 2005 (that is, the last day of the 2-year period that begins on the date of F's death).

⁵⁹³⁷ Letter Rulings 202004002, 202004003, and 202004004.

⁵⁹³⁸ Reg. § 1.645-1(h)(1).

⁵⁹³⁹ Reg. § 1.1361-1(h)(1)(iv)(B).

⁵⁹⁴⁰ Reg. § 1.1361-1(h)(3)(i)(D) provides:

If stock is transferred or deemed distributed to a testamentary trust described in paragraph (h)(1)(iv) of this section (other than a qualified subpart E trust, an electing QSST, or an ESBT), the estate of the testator is treated as the shareholder until the earlier of the transfer of that stock by the trust or the expiration of the 2-year period beginning on the day that the stock is transferred or deemed distributed to the trust. If the trust qualifies and becomes an electing QSST, the beneficiary and not the estate is treated as the shareholder as of the effective date of the QSST election, and the rules provided in paragraph (j)(7) of this section apply. If the trust qualifies and becomes an ESBT, the shareholders are determined under paragraphs (h)(3)(i)(F) and (h)(3)(ii) of this section as of the effective date of the ESBT election, and the rules provided in paragraph (m) of this section apply.

- (ii) *Section 645 electing trust and successor trust.* Assume the same facts as in paragraph (i) of this Example 3, except that F's trust is a qualified revocable trust for which a valid section 645 election is made on October 1, 2003 (electing trust). Because under section 645 the electing trust is treated and taxed for purposes of subtitle A of the Code as part of F's estate, the trust may continue to hold the O stock pursuant to § 1361(b)(1)(B), without causing the termination of Corporation O's S election, for the duration of the section 645 election period. However, on January 1, 2004, during the election period, the shares of stock in Corporation O are transferred pursuant to the terms of the electing trust to a successor trust. Because the successor trust satisfies the definition of a testamentary trust under paragraph (h)(1)(iv) of this section, the successor trust is a permitted shareholder until the earlier of the expiration of the 2-year period beginning on January 1, 2004, or the effective date of a QSST or ESBT election for the successor trust.

III.A.3.b.iv. A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It

Code § 1361(c)(2)(A)(iv). In such a case, each beneficiary of the voting trust is treated as the owner for purposes of the 100-shareholder limitation.⁵⁹⁴¹

To qualify as a voting trust, the beneficial owners must be treated as the owners of their respective portions of the trust under the grantor trust rules, and the trust must have been created pursuant to a written trust agreement entered into by the shareholders, that:⁵⁹⁴²

- (A) Delegates to one or more trustees the right to vote;
- (B) Requires all distributions with respect to the stock of the corporation held by the trust to be paid to, or on behalf of, the beneficial owners of that stock;
- (C) Requires title and possession of that stock to be delivered to those beneficial owners upon termination of the trust; and
- (D) Terminates, under its terms or by state law, on or before a specific date or event.⁵⁹⁴³

Let's explore the requirement that the beneficial owners be treated as the owners of their respective portions of the trust under the grantor trust rules.⁵⁹⁴⁴ This is automatic for the settlors of the trust,⁵⁹⁴⁵ but not automatic when the settlors transfer their beneficial interests (voting trust certificates) to others. One treatise suggests making the beneficiaries entitled to distributions, but that might not satisfy the requirement that the trust agreement require payment of distributions to the beneficiaries; therefore, one might consider giving the beneficiaries the right

⁵⁹⁴¹ Code § 1361(c)(2)(B)(iv).

⁵⁹⁴² Reg. § 1.1361-1(h)(1)(v).

⁵⁹⁴³ I am not aware of any authoritative interpretation of on or before a specific date or event.

Presumably the trust might provide that the trust terminates when it holds no voting stock or perhaps when each individual in a named list of people has died.

⁵⁹⁴⁴ Reg. § 1.1361-1(h)(1)(v)(C). If the beneficiary originally transferred the stock to the trust, then it is a grantor trust under Code § 677. Otherwise, the trust needs to qualify as an investment trust; see part II.D.4.a Investment Trusts, which also describes the income tax consequences when a voting trust that is an investment trust sells stock. This regulation was adopted by TD 8600 (7/20/1995). For the IRS' interpretation before then, see Letter Ruling 9344020.

⁵⁹⁴⁵ Code § 677(a) combined with Reg. § 1.1361-1(h)(1)(v)(B).

to withdraw any distributions the trust receives from the S corporation, followed by a requirement that the trustee pay to the beneficiaries any such distributions.⁵⁹⁴⁶ It has also been suggested that the voting trust might qualify as an investment trust, in which case a transferee would be treated as a grantor and therefore the trust would automatically qualify.⁵⁹⁴⁷

III.A.3.b.v. An Electing Small Business Trust (ESBT)

Code § 1361(c)(2)(A)(v). In such a case, each potential current beneficiary of the trust is treated as the owner for purposes of the 100-shareholder limitation.⁵⁹⁴⁸ The 100-shareholder limitation is made less severe by a family attribution rule, treating a person, his or her spouse, and his or her descendants as one shareholder.⁵⁹⁴⁹ A charitable remainder trust cannot own stock in an S corporation, so an electing small business trust (ESBT) election would not help it; instead, consider donating the stock to a charity in exchange for a charitable gift annuity, after

⁵⁹⁴⁶ When the beneficiary has the right to withdraw such distributions, Code § 678(a)(1) would treat the beneficiary as the owner. After that withdrawal right has lapsed, the IRS' Letter Ruling position would support a position that Code §§ 678(a)(2) and 677(a) would treat the beneficiary as the owner.

⁵⁹⁴⁷ See part II.D.4.a Investment Trust. Letter Ruling 201226019 approved this approach, holding:

1. During the lives of A and B and after their deaths, Voting Trust will be classified as an investment trust under § 301.7701-4(c) for U.S. federal income tax purposes.
2. During the lives of A and B (assuming they are the only holders of the Certificates during their lives), Voting Trust will be considered a qualified voting trust under § 1361(c)(2)(A)(iv) and § 1.1361-1(h)(1)(v). Accordingly, Voting Trust will be a permitted S corporation shareholder. If, during their lives, A or B transfer all or a portion of their Certificates to a transferee that is a permitted S corporation shareholder, the transferee will be treated as a successor grantor of the Voting Trust. Therefore,
 - (i) Voting Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
 - (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.
3. After the death of A or B, when the executor of their respective Wills (the Executor) holds the Certificates held by A or B, as applicable, prior to their deaths, A's and B's respective estates (if the period during which such estates hold the Certificates does not exceed the period actually required to fully administer the estates as described in § 1.641(b)-3(a)) will be treated as successor grantors of the Voting Trust. After the Executor distributes the Certificates held by A or B in accordance with the terms and provisions of their estate planning documents, as applicable, such transferees of the Certificates will be treated as successor grantors of their portions of the Voting Trust. Therefore,
 - (i) Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
 - (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.

The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2578 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced after fn 2747 in part II.J.8.

⁵⁹⁴⁸ Code § 1361(c)(2)(B)(v) applied in Reg. § 1.1361-1(m)(4)(vii). The 2017 tax reform act amended Code § 1361(c)(2)(B)(v) to make it not apply for purposes of Code § 1361(b)(1)(C), the latter which does not allow an S corporation to "have a nonresident alien as a shareholder." Thus, an ESBT may have a nonresident alien as a beneficiary, which makes sense because the trust is paying tax at the highest possible rate, notwithstanding having such a beneficiary. See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fns 140-143.

⁵⁹⁴⁹ Family attribution rules ameliorate the 100-shareholder limitation. See fn 160 in part II.A.2.f Shareholders Eligible to Hold S Corporation Stock.

considering unrelated business taxable income issues.⁵⁹⁵⁰ For details about ESBTs, see part III.A.3.e.ii Electing Small Business Trusts (ESBTs, which is found in part III.A.3.e QSSTs and ESBTs.

III.A.3.b.vi. Retirement Plans

Retirement plans are trusts, so let's discuss those for a moment. First, IRAs are qualified under Code § 408, not § 401(a). Therefore, IRAs are not eligible shareholders, as they are not trusts that qualify under these rules.⁵⁹⁵¹ Second, qualified retirement plans are eligible shareholders⁵⁹⁵² but are taxed on unrelated business taxable income,⁵⁹⁵³ including **all** income from S corporations, whether or not it normally constitutes unrelated business income.⁵⁹⁵⁴ However, employee stock ownership plans (ESOPs) are not subject to this tax.⁵⁹⁵⁵ Furthermore, transitory ownership by an IRA of S corporation stock rolled over from an IRA will not terminate the S election.⁵⁹⁵⁶

III.A.3.b.vii. Charitable Trusts

Charities are permitted shareholders.⁵⁹⁵⁷ The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.⁵⁹⁵⁸

⁵⁹⁵⁰ See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity.

⁵⁹⁵¹ Reg. § 1.1361-1(h)(1)(vii), which became final on August 13, 2008, provides that individual retirement accounts (including Roth IRAs) are not eligible S corporation shareholders, unless they satisfy the exception created in Code § 1361(c)(2)(A)(vi) for bank stock that was held by the IRA as of October 22, 2004. That regulation is extremely unlikely to be challenged as, for various reasons, a reviewed opinion of the Tax Court concluded that IRAs, including Roth IRAs, were not eligible shareholders before that regulation was promulgated. *Taproot Administrative Services, Inc. v. Commissioner*, 133 T.C. 202.

⁵⁹⁵² Code § 1361(c)(6)(A), referring to organizations described in Code § 401(a).

⁵⁹⁵³ Code § 511(a)(1), 501(a).

⁵⁹⁵⁴ Code § 512(e)(1).

⁵⁹⁵⁵ Code § 512(e)(3).

⁵⁹⁵⁶ Rev. Proc. 20014, Section 4 provides:

The Service will accept the position that an S corporation's election is not affected as a result of an ESOP's distribution of S corporation stock where the participant directs that such stock be distributed to an IRA in a direct rollover, provided that:

- .01. The terms of the ESOP require that the S corporation repurchase the stock immediately upon the ESOP's distribution of the stock to an IRA;
- .02. Either, pursuant to the terms of the ESOP, the S corporation actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution, or, pursuant to the terms of the ESOP, the ESOP is permitted to assume the rights and obligations of the S corporation to repurchase the S corporation stock immediately upon the ESOP's distribution of the stock to an IRA and the ESOP actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution; and
- .03. No income (including tax-exempt income), loss, deduction, or credit attributable to the distributed S corporation stock under § 1366 is allocated to the participant's IRA.

⁵⁹⁵⁷ Code § 1361(c)(6) provides that an organization, which not only is described in Code § 401(a) or 501(c)(3) but also is exempt from taxation under Code § 501(a), may be a shareholder in an S corporation.

⁵⁹⁵⁸ Letter Ruling 201441018.

However, a charitable remainder trust is not a permitted shareholder. See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity for that⁵⁹⁵⁹ and other nuances.

III.A.3.b.viii. Observations About Trusts as S Corporation Shareholders

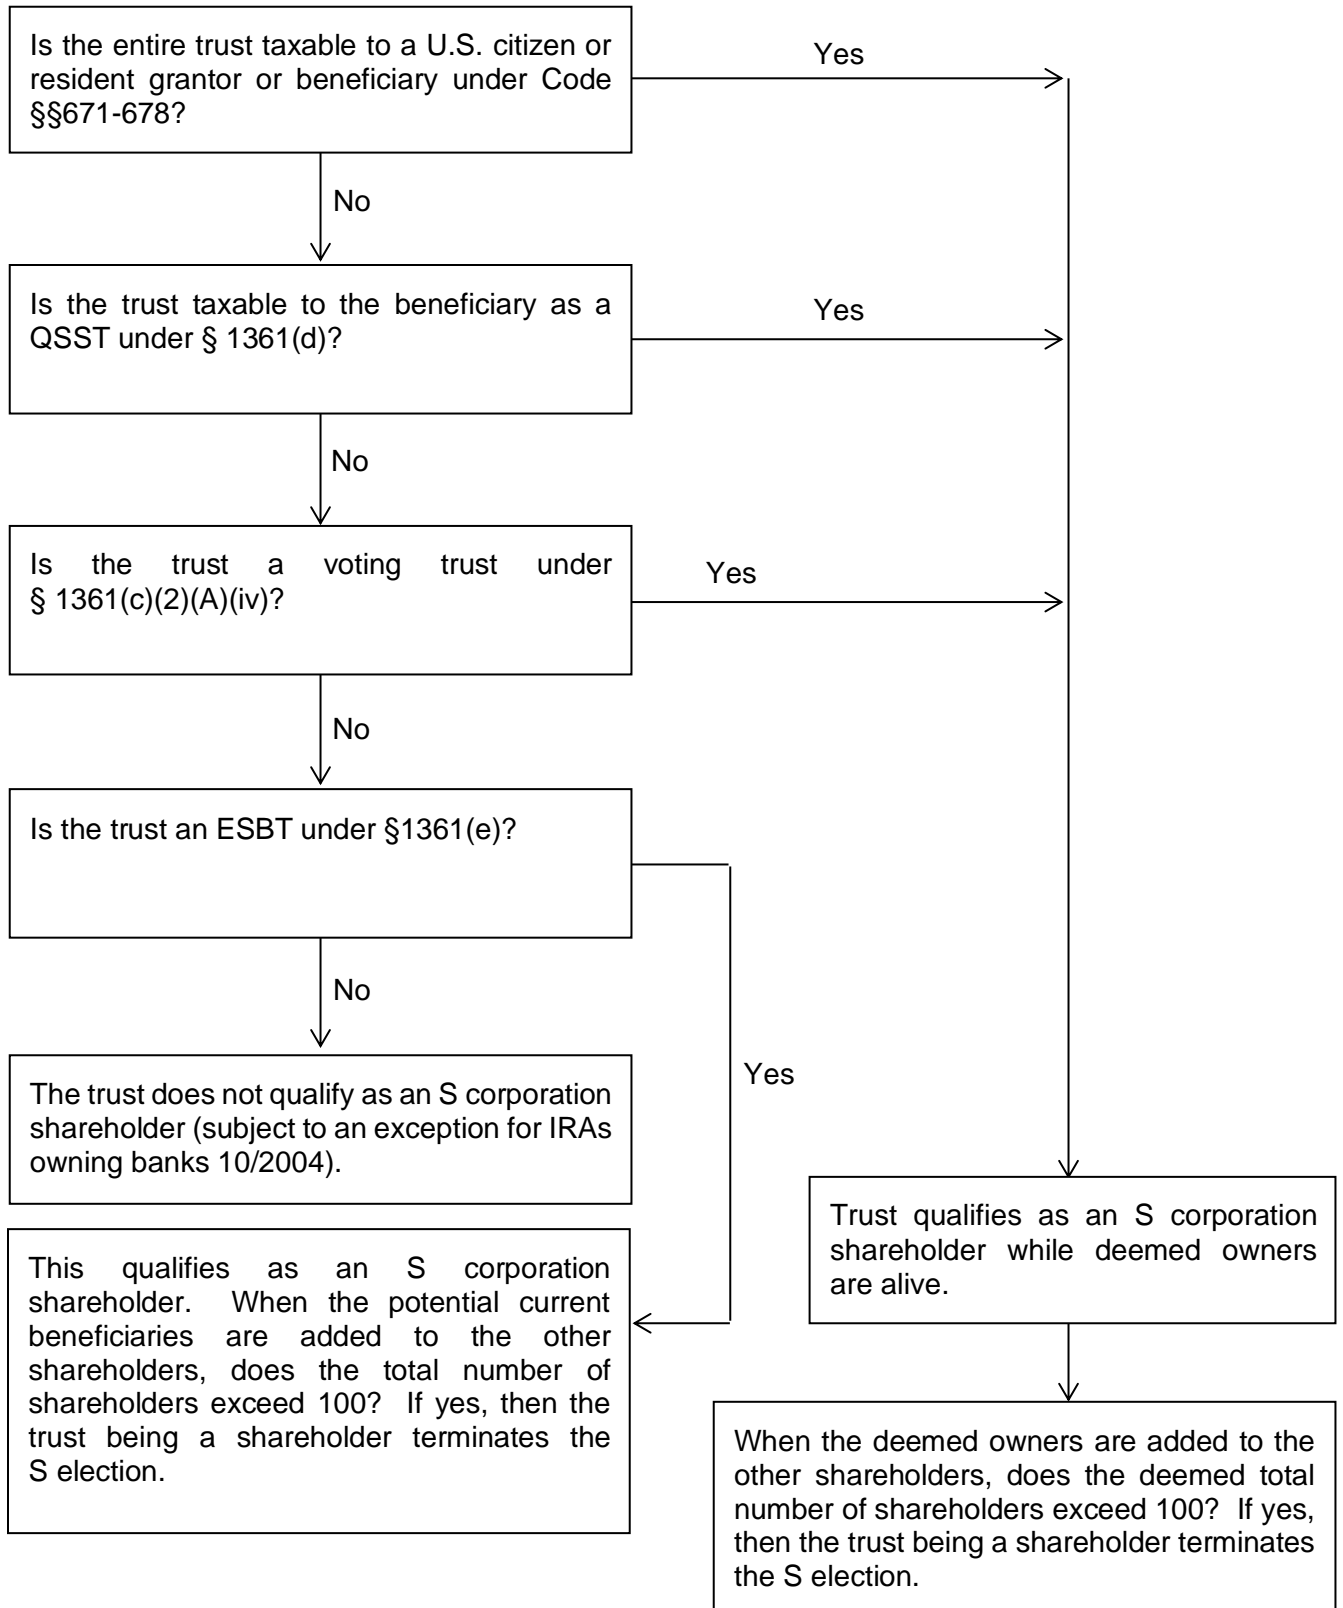

The shareholder agreement does not need to specify these trusts, as the reference to causing the corporation not to be a “small business corporation” as defined in Code § 1361(b)(1) should be sufficient to limit which kinds of trusts may be owners without going into all the detail described above. However, when preparing shareholders’ estate plans, make sure the beneficiaries of the estate plans qualify.

III.A.3.c. Deadlines for Trust Qualifying as S Corporation Shareholder

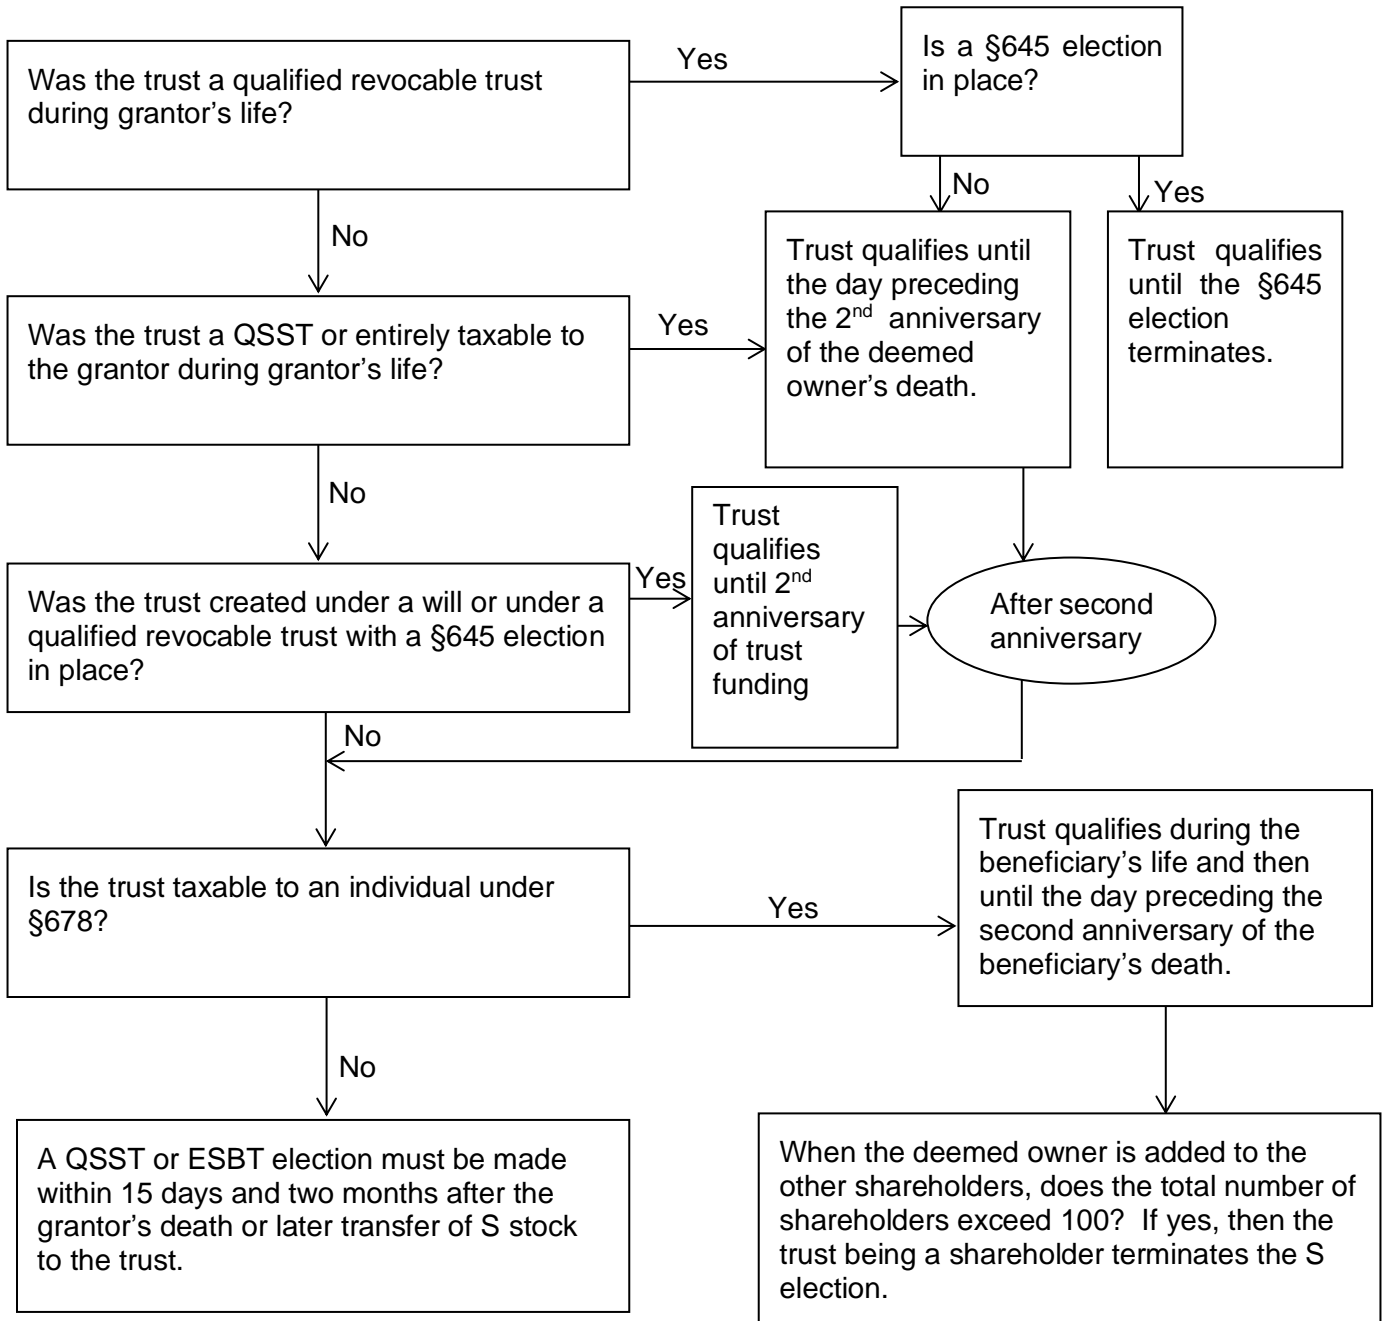

Below are some flowcharts illustrating trust qualification as a shareholder of an S corporation. The flowcharts do not consider trusts that are tax-exempt.

⁵⁹⁵⁹ See fn 4934.

III.A.3.c.i. Flowchart of Inter Vivos Trusts (Trusts Created while Grantor is Alive)

III.A.3.c.ii. Flowchart of Testamentary Trusts (Trusts Created on Grantor's Death or Continued after QSST Beneficiary's Death)

III.A.3.c.iii. Deadlines for QSST and ESBT Elections

III.A.3.c.iii.(a). General Description of Deadlines for QSST and ESBT Elections

A separate QSST election must be made with respect to each S corporation in which the trust owns stock.⁵⁹⁶⁰ Although initially an ESBT election needs to be filed at every IRS Service Center that receives the returns of the S corporations the trust owns, no future ESBT elections are required when the trust acquires stock in another S corporation.⁵⁹⁶¹

The beneficiary must make a QSST election no later than fifteen days and two months after the trust received the stock.⁵⁹⁶² The trustee of an ESBT must file the ESBT election within the same time framework.⁵⁹⁶³ If the trust is a wholly owned grantor trust or meets some other exception allowing it to be an eligible shareholder,⁵⁹⁶⁴ the deadline would be based on whenever the election's effective date is required⁵⁹⁶⁵ or desired. If the trust is already an eligible shareholder and the QSST or ESBT election is made with an effective date that is later than when the trust first acquired the stock, when drafting the QSST or ESBT election I generally include the fact of that qualification when I say when the trust first acquired the stock, so that any IRS reviewer of the election will see that there does not appear to be any time gap in the trust's eligibility as a shareholder.

If an ESBT or QSST election is made late or is in some manner defective, the S corporation status can be retroactively reinstated if the termination or invalidity was inadvertent, within a reasonable period of time after discovery of the terminating event or invalid election steps were taken to rectify the situation, and the corporation and shareholders agree to adjustments that the IRS may require for the period.⁵⁹⁶⁶ If a trust fails to make an ESBT election and fails to file tax returns consistent with the ESBT election, the corporation and each of its shareholders must

⁵⁹⁶⁰ Reg. § 1.1361-1(j)(6)(i).

⁵⁹⁶¹ Reg. § 1.1361-1(m)(2)(i).

⁵⁹⁶² Reg. § 1.1361-1(j)(6)(ii)(C). A QSST election by a person who is under a legal disability by reason of age may be made on that person's behalf by that person's guardian or other legal representative, or if there be none, by that person's natural or adoptive parent. Reg. § 1.1361-1(j)(6)(i).

⁵⁹⁶³ Reg. § 1.1361-1(m)(3)(i) provides that trust is an ESBT on the effective date of the ESBT election.

⁵⁹⁶⁴ See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

⁵⁹⁶⁵ For example, Reg. § 1.1361-1(j)(6)(iii)(C) provides:

If a trust ceases to be a qualified subpart E trust, satisfies the requirements of a QSST, and intends to become a QSST, the QSST election must be filed within the 16-day-and-2-month period beginning on the date on which the trust ceases to be a qualified subpart E trust. If the estate of the deemed owner of the trust is treated as the shareholder under paragraph (h)(3)(i) of this section, the QSST election may be filed at any time, but no later than the end of the 16-day-and-2-month period beginning on the date on which the estate of the deemed owner ceases to be treated as a shareholder.

As a further example, Reg. § 1.1361-1(j)(6)(iii)(D) provides:

If a testamentary trust is a permitted shareholder under paragraph (h)(1)(iv) of this section, satisfies the requirements of a QSST, and intends to become a QSST, the QSST election may be filed at any time, but no later than the end of the 16-day-and-2-month period beginning on the day after the end of the 2-year period.

For Reg. § 1.1361-1(h)(1)(iv), see part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.

⁵⁹⁶⁶ Reg. § 1.1362-4(a). Among the many private letter rulings providing relief for a late ESBT election is Letter Ruling 202234003, involving multiple failures.

file any original and amended returns for all open taxable years consistent with the inadvertent termination relief.⁵⁹⁶⁷

The corporation and all persons who were shareholders of the corporation at any time during the period must consent to make to any adjustments that the IRS may require.⁵⁹⁶⁸ Each consent should be in the form of a statement agreeing to make the adjustments:⁵⁹⁶⁹

- The statement must be signed by the shareholder and corporation.
- A shareholder's consent statement should include the name, address, and taxpayer identification numbers of the corporation and shareholder, the number of shares of stock owned by the shareholder, and the dates on which the shareholder owned any stock.
- The corporate consent statement should include the name, address, and taxpayer identification numbers of the corporation and each shareholder.

A late ESBT or QSST election may be made within 3 years and 75 days after the effective date of the election, without the \$30,000 fee generally required for letter rulings under Code § 9100, illustrated by the following chart provided by the IRS:⁵⁹⁷⁰

Retroactive reinstatement is required to prevent the accumulated adjustments account (AAA) from being wiped out.⁵⁹⁷¹

For the statute authorizing relief and the importance of provisions in a shareholders' agreement ensuring that this relief would be available, see part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

⁵⁹⁶⁷ Letter Ruling 201943018.

⁵⁹⁶⁸ Reg. § 1.1362-4(e). However, if relief under Rev. Proc. 2013-30 applies, Section 6.01(4) of that procedure requires:

Statements from all shareholders during the period between the date the S corporation election was to have become effective or was terminated and the date the completed Election Form is filed that they have reported their income on all affected returns consistent with the S corporation election for the year the election should have been made and for all subsequent years.

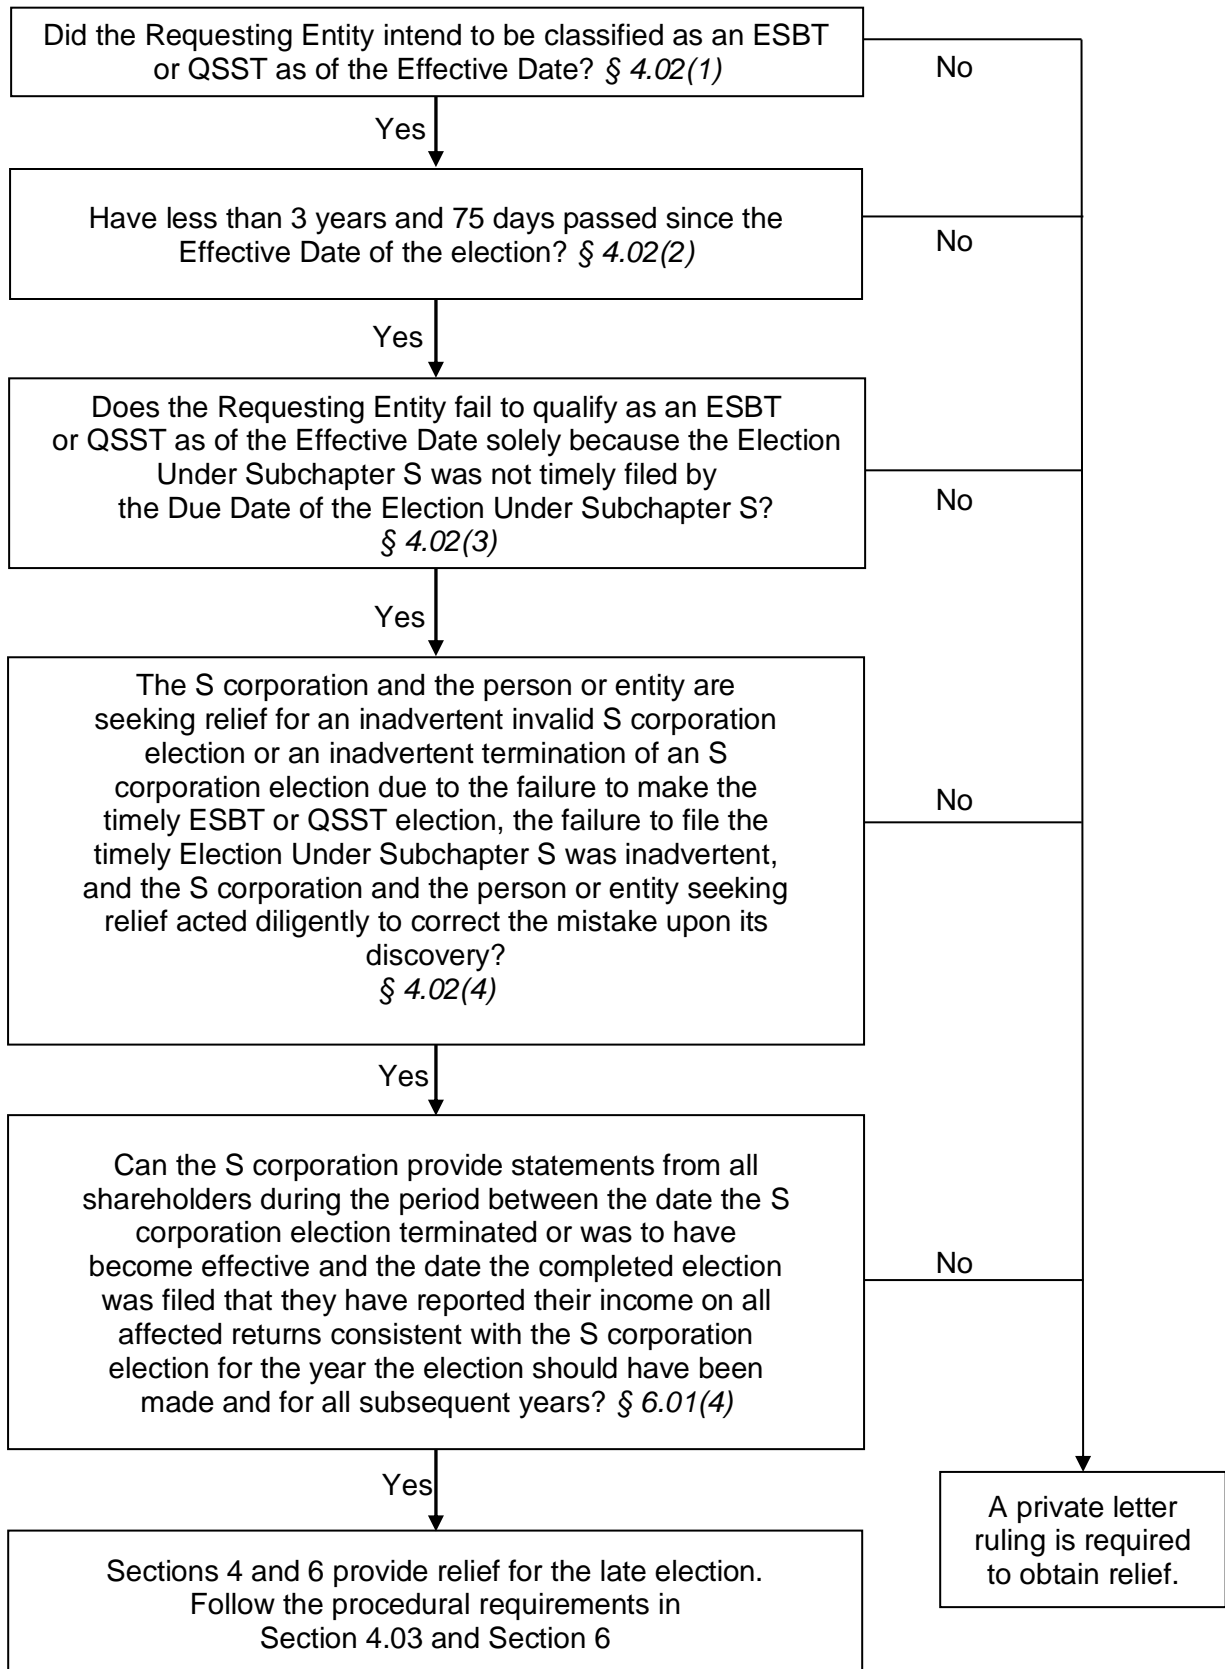

Presumably, these statements are in lieu of consenting to adjustments. One might consider supplementing the statements by agreeing to make adjustments as required by Reg. § 1.1362-4(e), but supplementing the statements does not appear to be required. The relevant IRS web page is <https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief>.

⁵⁹⁶⁹ Reg. § 1.1362-4(e).

⁵⁹⁷⁰ Rev. Proc. 2013-30, modifying and superseding Rev. Procs. 2003-43, 2004-48, and 2007-62. One might consider checking the most recent annual Revenue Procedure for issuing letter rulings, the successor to Rev. Proc. 2020-1, for any updates to user fees and to verify the status of Rev. Proc. 2013-30. Also, some taxpayers might qualify for reduced user fees. The relevant IRS web page is <https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief>.

⁵⁹⁷¹ For AAA's importance, see part II.Q.7.b Redemptions or Distributions Involving S Corporations. For the idea that termination of the S election wipes out AAA, see part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

III.A.3.c.iii.(b). Flowchart Showing Relief for Late QSST & ESBT Elections

III.A.3.d. Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

III.A.3.d.i. Various Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

Regarding basis step-up issues regarding S corporation stock, see fn 2096 in part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

If one bequeaths S corporation stock, consider expressly providing that any distributions with respect to that stock are to be passed on to the beneficiary receiving that stock. Not only does such a provision ensure fairness if the trust/estate administration lasts any significant amount of time, but it also prevents a potentially unfair tax result from occurring, as described below.

A bequest of a partnership interest or S corporation stock that is “ascertainable under the terms of a testator’s will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust” is a specific bequest that does not count as a distribution that carries with it distributable net income;⁵⁹⁷² the “date of the inception” rule means that the exercise of an inter vivos limited power of appointment does not fall within this exception. On the other hand, income allocated to a beneficiary *does* count a distribution that carries with it distributable net income.⁵⁹⁷³ The bequest of the partnership interest or S corporation stock does not constitute a separate share, but distributions bequeathed to the recipient of that business interest *do* constitute a separate share.⁵⁹⁷⁴ See part II.J.9.a.ii Separate Share Rule.

See parts III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation (especially part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S corporation Stock During Taxable Year) and III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

The distributive share of partnership or S corporation income that does not constitute trust accounting income:⁵⁹⁷⁵

is allocated among the separate shares that could potentially be funded with these amounts irrespective of whether the share is entitled to receive any income under the terms of the governing instrument or applicable local law. The amount of such gross income allocated to each share is based on the relative value of each share that could potentially be funded with such amounts.

⁵⁹⁷² Reg. § 1.663(a)-1(b)(1), delineating items that qualify for the exclusion under Reg. § 1.663(a)-1(a). See Reg. § 1.663(a)-1(b)(3), Example (1).

⁵⁹⁷³ Reg. § 1.663(a)-1(b)(2)(i), defining items that do not qualify for the exclusion under Reg. § 1.663(a)-1(a).

⁵⁹⁷⁴ Reg. § 1.663(c)-5, Example (8). Reg. § 1.663(c)-4(a) provides:

Separate shares include... the income on bequeathed property if the recipient of the specific bequest is entitled to such income Conversely, a gift or bequest ... of property as defined in section 663(a)(1) is not a separate share.

⁵⁹⁷⁵ Reg. § 1.663(c)-2(b)(4), which applies to:

the allocation of the portion of gross income includible in distributable net income that is not attributable to cash received by the estate or trust (for example, original issue discount, a distributive share of partnership tax items, and the pro rata share of an S corporation’s tax items).

Tying together the separate share rules⁵⁹⁷⁶ with the above rules regarding distributive shares of partnership or S corporation income, one can distill the following rules:⁵⁹⁷⁷

- DNI equal to undistributed income is allocated among the separate shares according to the amount of income to which each share is entitled.
- DNI equal to distributions from an S corporation or partnership constituting trust accounting income is allocated among the separate shares according to the amount of income to which each share is entitled.⁵⁹⁷⁸ DNI equal to distributions from an S corporation or partnership not

⁵⁹⁷⁶ See generally part II.J.9.a.ii Separate Share Rule.

⁵⁹⁷⁷ Reg. § 1.663(c)-5, Examples (4) and (5) provide:

Example 4. (i) *Facts.* Testator, who dies in 2000, is survived by a spouse and one child. Testator's will provides for a pecuniary formula bequest to be paid in not more than three installments to a trust for the benefit of the child of the largest amount that can pass free of Federal estate tax and a bequest of the residuary to the surviving spouse. The will provides that the bequest to the child's trust is not entitled to any of the estate's income and does not participate in appreciation or depreciation in estate assets. During the 2000 taxable year, the estate receives dividend income of \$200,000 and pays expenses of \$15,000 that are deductible on the estate's federal income tax return. The executor partially funds the child's trust by distributing to it securities that have an adjusted basis to the estate of \$350,000 and a fair market value of \$380,000 on the date of distribution. As a result of this distribution, the estate realizes long-term capital gain of \$30,000.

(ii) *Conclusion.* The estate has two separate shares consisting of a formula pecuniary bequest to the child's trust and a residuary bequest to the surviving spouse. Because, under the terms of the will, no estate income is allocated to the bequest to the child's trust, the distributable net income for that trust's share is zero. Therefore, with respect to the \$380,000 distribution to the child's trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662. Because no distributions were made to the spouse, there is no need to compute the distributable net income allocable to the marital share. The taxable income of the estate for the 2000 taxable year is \$214,400 (\$200,000 (dividend income) plus \$30,000 (capital gain) minus \$15,000 (expenses) and minus \$600 (personal exemption)).

Example 5. The facts are the same as in Example 4, except that during 2000 the estate reports on its federal income tax return a pro rata share of an S corporation's tax items and a distributive share of a partnership's tax items allocated on Form K-1s to the estate by the S corporation and by the partnership, respectively. Because, under the terms of the will, no estate income from the S corporation or the partnership would be allocated to the pecuniary bequest to child's trust, none of the tax items attributable to the S corporation stock or the partnership interest is allocated to the trust's separate share. Therefore, with respect to the \$380,000 distribution to the trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662.

Example 6. The facts are the same as in Example 4, except that during 2000 the estate receives a distribution of \$900,000 from the decedent's individual retirement account that is included in the estate's gross income as income in respect of a decedent under section 691(a). The entire \$900,000 is allocated to corpus under applicable local law. Both the separate share for the child's trust and the separate share for the surviving spouse may potentially be funded with the proceeds from the individual retirement account. Therefore, a portion of the \$900,000 gross income must be allocated to the trust's separate share. The amount allocated to the trust's share must be based upon the relative values of the two separate shares using a reasonable and equitable method. The estate is entitled to a deduction under section 661 for the portion of the \$900,000 properly allocated to the trust's separate share, and the trust must include this amount in income under section 662.

⁵⁹⁷⁸ Reg. § 1.663(c)-2(b)(2) provides that:

constituting trust accounting income would be allocated to each share according to “its portion of gross income that is includible in distributable net income and its portion of any applicable deductions or losses.”⁵⁹⁷⁹ Note that distributions from an S corporation or partnership that do not constitute trust accounting income but constitute gross income would constitute DNI only if they are (a) not from the sale of a capital asset,⁵⁹⁸⁰ or (b) from the sale of a capital asset but satisfy the rules for including capital gain in DNI.⁵⁹⁸¹

- Note that the amounts deducted by the trust or estate and included in the beneficiary’s income are the lesser of the beneficiary’s allocable share of DNI and the amount actually distributed.⁵⁹⁸² If and to the extent that the trust or estate does not make distributions (or is not required to make) to the beneficiary attributable to DNI, the distributive shares of partnership or S corporation income are trapped inside the trust or estate to the extent not distributed (or required to be made). Thus, the estate or trust is taxed on that income, even though the recipient of the specific bequest ultimately benefits from the undistributed income.

However, practical logistics might suggest not allocating distributions to the recipient of the specific bequest. It is not unusual for tax distributions to be made after yearend. For example, A dies January 31, 2016. The partnership or S corporation makes distributions April 1, 2016 to the owners to pay taxes incurred with respect to 2015 income. A’s estate or revocable trust will need that cash to pay its 2015 tax that is due April 15, 2016. Therefore, if A’s estate plan bequeathed the partnership or S corporation to B, B should be allocated all of the distributions with respect to the partnership or S corporation, other than distributions relating to 2015 tax and other than distributions relating to tax on income earned between January 1, 2016 and January 31, 2016. Furthermore, these distributions might also draw an allocation of DNI. Thus, consider a clause along these lines (after further thought if the specific bequest is to a QTIP trust):⁵⁹⁸³

If any partnership interest or stock in any S corporation is specifically allocated to one or more persons, the person(s) entitled to the allocation shall also be entitled to any distributions from the date of the allocation until the date the partnership interest or stock is distributed; however, any distributions that were intended for the payment of tax imposed on taxable items with respect to periods before the event that caused that allocation shall be paid to the person reporting those items.

Also note that state corporate law might not permit distributions to use record dates (determining who is the shareholder of record) more than a certain number of days before the distribution. For example, Missouri law does not allow a corporation to make a distribution with

gross income includible in distributable net income that is income within the meaning of section 643(b) ... is allocated among the separate shares in accordance with the amount of income that each share is entitled to under the terms of the governing instrument or applicable local law.

For income under Code § 643(b), see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law; although focused on capital gain, it discusses Code § 643(b) generally as well.

⁵⁹⁷⁹ Reg. § 1.663(c)-2(b)(1).

⁵⁹⁸⁰ See part II.J.8.a Capital Gain Constitutes DNI Unless Excluded.

⁵⁹⁸¹ See part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

⁵⁹⁸² See part II.J.9.a.ii Separate Share Rule, especially the text accompanying fns. 2878-2880.

⁵⁹⁸³ If the specific bequest is to a QTIP trust and income otherwise payable to the QTIP trust is diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

a record date more than 70 days before the date of distribution.⁵⁹⁸⁴ If these statutes apply, one might consider declaring a distribution in the form of a promissory note, the principal of which is any taxes, interest, and penalties imposed on the shareholders by reason of any examination of any prior year returns. This method might also be needed for taxes during the current year, depending on whether the tax laws allow the corporation to close its books as of the date of death. One might also consider converting the corporation into an LLC taxed as an S corporation using a tax-free reorganization,⁵⁹⁸⁵ because LLC laws might not impose such a requirement.

III.A.3.d.ii. Bequeathing S Corporation Stock to or from QSSTs – Special Fiduciary Income Tax Issues

If the terminating trust is a QSST,⁵⁹⁸⁶ coordinate these concerns with those found in part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, which also includes a reference to marital deduction issues relating to the payment of income.⁵⁹⁸⁷

If the trust terminates in favor of one or more QSSTs, consider whether, during post-mortem administration, part or all of the income might be trapped inside the trust at high income tax rates if the S corporation does not distribute all of the income shown on the K-1 that the corporation issues the trust.⁵⁹⁸⁸ A similar issue arises for partnerships, which may be placed into one or more S corporations using a QSST strategy. Quickly funding the QSST(s) may tax the income at the beneficiary's rate instead of the trust's rate; see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests.

III.A.3.e. QSSTs and ESBTs

III.A.3.e.i. QSSTs

After reviewing a variety of QSST issues that apply during the beneficiary's life, see part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

III.A.3.e.i.(a). QSSTs Generally

After determining a trust's eligibility for its beneficiary to make a "qualified subchapter S trust" (QSST) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections. A beneficiary may make a protective QSST election.⁵⁹⁸⁹

⁵⁹⁸⁴ R.S.Mo. § 351.250.

⁵⁹⁸⁵ See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

⁵⁹⁸⁶ See part III.A.3.e.i QSSTs.

⁵⁹⁸⁷ See fn. 6029.

⁵⁹⁸⁸ See part III.A.4 Trust Accounting Income Regarding Business Interests, as well as parts II.J.11 Trust Business Income Tax Nuances and III.A.3.e QSSTs and ESBTs.

⁵⁹⁸⁹ See Reg. § 1.1361-1(k)(1), Example (2), part (iii), reproduced in the text accompanying fn 5931 in part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.

A QSST may have only one beneficiary (who also must be a U.S. citizen or resident) who may receive income or corpus during the beneficiary's lifetime, and all of its income must be distributed currently to that beneficiary⁵⁹⁹⁰ while the trust⁵⁹⁹¹ holds S stock.⁵⁹⁹²

The only-one-beneficiary rule is in Code § 1361(d)(3)(A) and Reg. § 1.1361-1(j)(1)(ii), (iii). A trust cannot qualify as a QSST if it provides that, if the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than the current income beneficiary. Rev. Rul. 89-55. Consistent with this limitation, Reg. § 1.1361-1(j)(2)(iii) restricts powers of appointment:

If, under the terms of the trust, a person (including the income beneficiary) has a special power to appoint, during the life of the income beneficiary, trust income or corpus to any person other than the current income beneficiary, the trust will not qualify as a QSST. However, if the power of appointment results in the grantor being treated as the owner of the entire trust under the rules of subpart E, the trust may be a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section.

Note, however, that failure to make a trust a spendthrift trust (and therefore allowing the beneficiary's interest to be assignable) will not disqualify the trust as a QSST unless it gets assigned (and then it might or might not disqualify the trust).⁵⁹⁹³ On the other hand, Letter

⁵⁹⁹⁰ Code § 1361(d)(3). Letter Ruling 9014008 ruled that a distribution to a grantor trust created by the beneficiary would not qualify, but Letter Rulings 9442036, 9444022, 9444024, and 9444059 permitted distributions to a disability trust because the beneficiary did not have legal capacity, and Letter Rulings 8831020, 9001010, and 9140055 approved distributions to custodial accounts under the Uniform Transfers to Minors Act (the latter also approved distributions to "a court-appointed guardian or conservator of the beneficiary"). This requirement does not preclude secured sales in which all income is used to buy the stock (part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls)), nor does it prevent the trust from agreeing to make payments to a third party if stock the trust bought is resold within a certain number of years after the trust's purchase (Letter Ruling 200140040).⁵⁹⁹¹ In Letter Ruling 200404037, the IRS accepted the representation that applicable state law deemed a life estate, with the power to sell, to be a trust relationship between the life tenant and the remaindermen and that the deemed trust satisfies the requirements for treatment as a QSST. Letter Ruling 200247030 elaborated on the basis for this deemed trust treatment:

It is represented that under State law, a life tenant, with the power to sell or dispose of property devised to him or her for life with remainder to designated persons, is a trustee or quasi trustee and occupies a fiduciary relationship to the remaindermen. In the exercise of that power, the life tenant owes to the remaindermen the highest duty to act honorably and in good faith. A life tenant is a trustee in the sense that he cannot injure or dispose of property to the injury of the rights of the remaindermen, but differs from a pure trustee in that he may use property for his exclusive benefit and take all income and profits.

⁵⁹⁹² Rev. Rul. 92-20 held that a provision in a trust agreement authorizing the trustee to accumulate trust income if the trust does not hold any shares of an S corporation does not, by itself, preclude the trust's qualification as a QSST.

⁵⁹⁹³ Reg. § 1.1361-1(j)(2)(iv). Reg. § 1.1361-1(k), Example (5), "QSST when current income beneficiary assigns the income interest to a person not named in the trust," provides:

On January 1, 1996, stock of Corporation R, a calendar year S corporation, is transferred to a trust that satisfies all of the requirements to be a QSST. Neither the terms of the trust nor local law preclude the current income beneficiary, K, from assigning K's income interest in the trust. K files a timely QSST election that is effective January 1, 1996. On July 1, 1996, K assigns the income interest in the trust to N. Under applicable state law, the trustee is bound as a result of the assignment to distribute the trust income to N. Thus, the QSST will cease to qualify as a QSST under section 1361(d)(3)(A)(iii) because N's interest will terminate on K's death (rather than on

Ruling 9437021 viewed the possibility of distribution from the QSST to another trust for that same beneficiary as an error, but ruled that it was harmless error in that case because the recipient trust never existed and therefore could never receive a distribution (see also fn. 5990 regarding the distribution of income other than directly to the beneficiary); however, one might not want to assume that the IRS' national office will repeat this kind and gentle approach. Thus, one may need to avoid authorizing the merger or decanting of any trust that has a QSST election in place. For decanting, see fn. 2661, found in part II.J.4.i Modifying Trust to Make More Income Tax Efficient. However, the Uniform Trust Decanting Act allows decanting to be done by trust amendment rather than actual transfer of assets, in which case a QSST need not prevent decanting; for details on decanting by mere amendment, see fn. 2975, found in part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

Also, the grantor trust treating a person other than the current income beneficiary as the owner of a part or all of that portion of a trust which does not consist of the S corporation stock does not disqualify the trust from making a QSST election. Reg. § 1.1361-1(j)(2)(vi). Does that, by negative implication, suggest that the settlor (who is not the beneficiary) being treated as deemed owner of the portion of a trust that includes the S corporation stock precludes a QSST election? Reg. § 1.1361-1(j)(4) suggests that prohibition exists; Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 5996) confirms that result.

As to the requirement to distribute income: All of the trust's income, not just the income from the S stock, must be distributed or distributable currently. Letter Ruling 9603007. This refers to trust accounting income, not taxable income. Reg. § 1.1361-1(j)(1)(i). Letter Ruling 200446007 held that the amount of a deemed dividend under Code § 1361(d)(3)(B) was not required to be distributed. Also, consistent with ideas discussed in part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally (with fn 4904 referring the reader here), Letter Ruling 200451021 clarifies that, when Code § 302(d) taxes a partial liquidation as a distribution rather than as a redemption, the trust itself is not taxed on any income on the distribution if the trust has sufficient AAA to absorb the basis reduction (Ruling Request 1) and the proceeds from the sale of stock in partial liquidation are principal that the QSST does not need to distribute (Ruling Request 2). Similarly, in Letter Ruling 9349009:

Company wishes to make a substantial distribution to its shareholders, but for estate planning purposes, its shareholders prefer that the distribution be treated as principal of the Trusts rather than income distributable to the Beneficiaries. Company proposes making a cash distribution to its shareholders ("Distribution") in a stock redemption under section 302(d) of the Code.

Letter Ruling 9349009 held:

As indicated above, each of the Trusts gives the trustee broad discretionary power to allocate trust receipts between income and principal. Moreover, it is represented that under State law the Distribution should be allocated to principal. Accordingly, the Distribution proceeds received by the Trusts will not constitute fiduciary accounting "income" within the meaning of section 643(b) of the Code.

Assuming the Distribution will qualify as a redemption under section 302(d) of the Code, we conclude that the provisions of sections 1368(b) and 1368(c) will apply for purposes

N's death). Accordingly, as of the date of the assignment, the trust ceases to be a QSST and Corporation R ceases to be an S corporation.

of determining whether the Distribution to Company's shareholders will be includable in their gross income. In addition, the treatment of the proposed Distribution by the Trusts as principal rather than income will not cause the Trusts to fail to satisfy the current distribution requirement of section 1361(d)(3). Therefore, assuming the Trusts otherwise qualify as qualified subchapter S trusts, the Distribution will not adversely affect Company's election to be an S corporation.

In Letter Ruling 200234062, an S corporation distributed a partnership interest to its shareholders; the partnership held only cash. Because a distribution of property did not constitute fiduciary accounting income, the partnership interests were not required to be distributed to the income beneficiary. The facts were:

Company elected in 1999 to be treated as an S corporation for federal income tax purposes. Company has accumulated earnings and profits from periods prior to 1999. Company has 32 shareholders. Fifty three percent of the stock in Company is owned by Trusts #1 through #26, which were established between and by Grantor, Grantor's son (Son), the spouse of Son (Spouse), and the granddaughters of Grantor (Granddaughter 1 and Granddaughter 2) for the benefit of various descendants of Grantor. Granddaughters 1 and 2 are also shareholders of Company. The remaining 4 shareholders are other trusts (not at issue in this ruling request) established by one of the granddaughters. All of the individual trustees of Trusts #1 through #26 are descendants of Grantor. In addition, an independent corporate trustee is a co-trustee of Trusts #1 through #8, and Trusts #18 and #19. A major asset of each of the trusts is stock in Company.

It is represented that: Trusts #1 through #8 and Trusts #18 and #19 qualify as shareholders of Company as electing small business trusts (ESBTs); Trusts #9 through #17 qualify as shareholders of Company as qualified subchapter S trusts (QSST Trusts); and Trusts #20 through #26 are grantor trusts, within the meaning of Subpart E, Part I, Subchapter J, Chapter 1, Subtitle A of the Internal Revenue Code of 1986.

Trusts #1 - #19:

Trusts #1 through #4 are either inter vivos or testamentary trusts that were created by Grantor primarily for the benefit of Granddaughters 1 and 2 and their issue. Trusts #5 through #8 are either inter vivos or testamentary trusts that were created by Son also primarily for the benefit of Granddaughters 1 and 2 and their issue. Likewise, Trusts #9 through #19 are either inter vivos or testamentary trusts that were created by Spouse primarily for the benefit of Granddaughters 1 and 2 and their issue. Trusts #1 through #19 do not contain any provision directing the allocation of receipts between income and principal. Trusts #1 through #19 are governed by Maryland law and were irrevocable prior to September 25, 1985. It is represented that no additions have been made to any of Trust #1 through Trust #19 after September 25, 1985.

Trusts #20 - #23:

Trusts #20 through #23 are irrevocable trusts that were established on Date 1, after September 25, 1985, by Granddaughter 1, primarily for the benefit of her issue and their descendants. You represent that Granddaughter 1 allocated sufficient GST exemption so that Trusts #20 through #23 each has an inclusion ratio of zero for generation-

skipping transfer tax purposes. These trusts are also governed by Maryland law. Art. III(G)13 of each trust states that:

Fiduciary Powers. In addition to the powers granted by law, I grant my Trustee the powers set forth in the Estates and Trusts Article of the Maryland Code, as well as the powers set forth in the following paragraphs, which is subject, however, to the restrictions set forth in the following Paragraphs H, I, and J of this Article. My Trustee (hereinafter sometimes referred to as "fiduciary") is empowered, in its discretion as a fiduciary and without the order or ratification of any court: ...

13. To determine whether items should be charged or credited to income or principal or allocated between income and principal, in such manner as the Trustee deems equitable and fair under all the circumstances, without regard to how such items are treated for federal estate or income tax purposes, . . .

Further, the Maryland Uniform Principal and Income Act (Md. Code Ann., Est. & Trusts, § 15-508 (2001)) provides, in part:

(c) Receipts allocated to principal. - Except as provided in subsection (f) of this section, a trustee shall allocate the following receipts from an entity to principal:

(1) Property other than money;

(2) Money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity; . . .

Trusts #24 - #26:

Trusts #24 through #26, are irrevocable trusts established on Date 2, after September 25, 1985, by Granddaughter 2 primarily for the benefit of her issue and their descendants. You also represent that Granddaughter 2 allocated sufficient GST exemption so that Trusts #20 through #23 each has an inclusion ratio of zero for generation-skipping transfer tax purposes. Trusts #24 through #26 are governed by New Jersey law. Art. III(G)(13) of each trust states that:

Fiduciary Powers. In addition to the powers granted by law, I grant my Trustee the powers set forth in the New Jersey Statutes, as well as the powers set forth in the following paragraphs, which shall be subject, however, to the restrictions set forth in the following Paragraphs H, I, and J of this Article. My Trustee (hereinafter sometimes referred to as "fiduciary") is empowered, in its discretion as a fiduciary and without the order or ratification of any court: . . .

13. To determine whether items should be charged or credited to income or principal or allocated between income and principal, in such manner as the Trustee deems equitable and fair under all the circumstances, without regard to how such items are treated for federal estate or income tax purposes, ...

Further, New Jersey law provides that, where the trust instrument makes provision for the ascertainment of principal and income or grants discretion to the fiduciary or other person to do so, the provision or the grant of discretion shall control, notwithstanding any provision in the New Jersey statute. N.J. Stat. Ann. § 3B:19A-5(a) (West 2001).

The shareholders of Company created LLC1, a limited liability company, in 2000. The shareholders' membership interests in LLC1 are in the same proportion as their respective shares in Company. It is represented that, to date, no capital contributions have been made to LLC1 by its members.

Proposed Transaction

Company proposes to create a second limited liability company (LLC2) in which Company will initially be the sole member. Upon the creation of LLC2, Company will contribute property and cash to LLC2 in an amount not in excess of its accumulated adjustments account, as defined in § 1368(e)(1) of the Internal Revenue Code. Company will then distribute its interest in LLC2 to its shareholders in proportion to each of the shareholders' stock holdings in Company. The trustee of each of the Trusts will allocate the LLC2 interests received to principal. LLC2 will then merge into LLC1 with LLC1 as the surviving entity. All of these transactions will occur in quick succession.

After ruling that the changes will not undo GST grandfathering or change the GST inclusion ratio, Letter Ruling 200234062 held:

The distribution of the LLC2 interests to the QSST Trusts is a distribution of property allocable to principal under Maryland law. Therefore, the receipt of the LLC2 interests by the QSST Trusts will not be considered a receipt of income to the trusts for § 1361(d)(3)(B) purposes. As the receipt of the LLC2 interests is not income to the QSST Trusts, the proposed transaction will not cause the QSST Trusts to fail to qualify as QSSTs if they do not distribute the LLC2 interests to the beneficiaries of those trusts.

During the time Company is the sole member of LLC2, LLC2 will be treated as a disregarded entity for federal tax purposes. Therefore, the transfer of assets to LLC2 has no federal tax consequences. Company's distribution of the LLC2 interests to its shareholders will be considered a distribution of the property and cash held by LLC2 followed by a contribution of the property and cash to LLC2 by the shareholders. The distribution of the LLC2 interests by Company (treated as a distribution of LLC2 's property and cash) will be subject to §§ 1368 and 311(b). Furthermore, the shareholders of Company will be treated as contributing the property and cash to LLC2 under § 721.

Although LLC1 was an empty shell, even if it had assets the merger of LLC2 into it would have been nontaxable. See part II.Q.8.e.v Partnership Mergers.

This result is consistent with section 401(d)(1) of the Uniform Fiduciary Income and Principal Act (2018) and section 401(c)(1) of the (last revised in 2008) Uniform Principal & Income Act (UPIA). Comments trace this rule back to the 1962 UPIA. Further thoughts:

- With this precedent, the taxpayers might feel emboldened to repeat this transaction every year – the corporation might put cash into a new single member LLC, distribute to the shareholder, then merge into LLC1. That would frustrate the intent behind the QSST distribute-all-income requirement, so I would not try it without a private letter ruling.
- Query whether a QSST's trustee has a duty to object to annual receipts of operating income in the form of property other than cash. In doing the planning suggested by the ruling, consider who is making the decision. I tend to make voting stock 5% of the entity's stock and pass that differently than nonvoting stock, so consider making the voting shareholders

be different from these QSSTs and not having a paper trail of doing this at the request of the QSSTs' trustees.

- Consider whether the trustee of a QSST should consider exercising the power to adjust when this occurs.
- Consider whether a beneficiary may object to a trustee's decision not to pursue these avenues. However, the beneficiary must prove an abuse of discretion.

If the income may be used to discharge the beneficiary's parent's support obligation, actual (not mere potential) use for that purpose may ruin the trust's qualification. Reg. 1.1361-1(j)(2)(ii)(B), "Legal obligation to support," provides:

If under local law a distribution to the income beneficiary is in satisfaction of the grantor's legal obligation of support to that income beneficiary, the trust will not qualify as a QSST as of the date of distribution because, under section 677(b), if income is distributed, the grantor will be treated as the owner of the ordinary income portion of the trust or, if trust corpus is distributed, the grantor will be treated as a beneficiary under section 662. See § 1.677(b)-1 for rules on the treatment of trusts for support and § 1.662(a)-4 for rules concerning amounts used in discharge of a legal obligation.

Reg. § 1.1361-1(j)(2)(ii)(C) provides an example illustrating Reg. 1.1361-1(j)(2)(ii)(B):

Example. F creates a trust for the benefit of F's minor child, G. Under the terms of the trust, all income is payable to G until the trust terminates on the earlier of G's attaining age 35 or G's death. Upon the termination of the trust, all corpus must be distributed to G or G's estate. The trust includes all of the provisions prescribed by section 1361(d)(3)(A) and paragraph (j)(1)(ii) of this section, but does not preclude the trustee from making income distributions to G that will be in satisfaction of F's legal obligation to support G. Under the applicable local law, distributions of trust income to G will satisfy F's legal obligation to support G. If the trustee distributes income to G in satisfaction of F's legal obligation to support G, the trust will not qualify as a QSST because F will be treated as the owner of the ordinary income portion of the trust. Further, the trust will not be a qualified subpart E trust because the trust will be subject to tax on the income allocable to corpus.

However, if the distribution is caught within the first 2½ months of the year, consider converting the trust to an ESBT. See parts III.A.3.c.iii Deadlines for QSST and ESBT Elections and III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

The income distribution rule is that all income either actually is distributed each year or is required to be distributed each year;⁵⁹⁹⁴ inadvertent termination relief may be available if the

⁵⁹⁹⁴ Code § 1361(d)(3)(B); Reg. § 1.1361-1(j)(1)(i), the latter which expressly recognizes that income distributed in the first 65 days of the year may be treated under Code § 663(b) as being distributed in the immediately preceding year. Letter Rulings 8508048, 8836057, and 199927011 approved trusts in which the income must be distributed currently, but the beneficiary may elect in any year to have the trustee retain all or any portion of the income of the trust (it is not clear whether the trusts expressly permitted their beneficiaries to elect that retention or whether that was simply a practice that was contemplated); for related issues not discussed in the rulings, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts, especially part III.B.2.i.ix Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights, Whether Currently Exercisable or Lapsed.

income is not distributed and catch-up distributions are made.⁵⁹⁹⁵ Special rules apply to an inter vivos QTIP or another trust for a spouse.⁵⁹⁹⁶ If a QSST ceases to meet any of the requirements of Reg. § 1.1361-1(j)(1)(ii), the QSST rules will cease to apply as of the first day on which that requirement ceases to be met.⁵⁹⁹⁷ If such a trust ceases to meet the income distribution

⁵⁹⁹⁵ Letter Ruling 201710001.

⁵⁹⁹⁶ Reg. § 1.1361-1(j)(4) approves testamentary QTIP trusts but, for inter vivos ones, prohibits a QSST election during marriage and requires one to ensure that the grantor is treated as wholly owning the trust: However, if property is transferred to a QTIP trust under section 2523(f), the income beneficiary may not make a QSST election even if the trust meets the requirements set forth in paragraph (j)(1)(ii) of this section because the grantor would be treated as the owner of the income portion of the trust under section 677. In addition, if property is transferred to a QTIP trust under section 2523(f), the trust does not qualify as a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section (a qualified subpart E trust), unless under the terms of the QTIP trust, the grantor is treated as the owner of the entire trust under sections 671 to 677.

Reg. § 1.1361-1(k)(1), Example (10), added by T.D. 8600 (7/20/1995), provides:

- (i) *Transfers to QTIP trust.* On June 1, 1996, A transferred S corporation stock to a trust for the benefit of A's spouse B, the terms of which satisfy the requirements of section 2523(f)(2) as qualified terminable interest property. Under the terms of the trust, B is the sole income beneficiary for life. In addition, corpus may be distributed to B, at the trustee's discretion, during B's lifetime. However, under section 677(a), A is treated as the owner of the trust. Accordingly, the trust is a permitted shareholder of the S corporation under section 1361(c)(2)(A)(i), and A is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.
- (ii) *Transfers to QTIP trust where husband and wife divorce.* Assume the same facts as in paragraph (i) of this Example 10, except that A and B divorce on May 2, 1997. Under section 682, A ceases to be treated as the owner of the trust under section 677(a) because A and B are no longer husband and wife. Under section 682, after the divorce, B is the income beneficiary of the trust and corpus of the trust may only be distributed to B. Accordingly, assuming the trust otherwise meets the requirements of section 1361(d)(3), B must make the QSST election within 2 months and 15 days after the date of the divorce.
- (iii) *Transfers to QTIP trust where no corpus distribution is permitted.* Assume the same facts as in paragraph (i) of this Example 10, except that the terms of the trust do not permit corpus to be distributed to B and require its retention by the trust for distribution to A and B's surviving children after the death of B. Under section 677, A is treated as the owner of the ordinary income portion of the trust, but the trust will be subject to tax on gross income allocable to corpus. Accordingly, the trust does not qualify as an eligible shareholder of the S corporation because it is neither a qualified subpart E trust nor a QSST.

Paragraph (iii) illustrates two points. First, to qualify as a wholly owned grantor trust (see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust), the trust must have not only its income but also its principal deemed owned wholly by the same individual (see part III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, especially fn. 5900); therefore, when drafting a trust for a spouse that holds stock in an S corporation for which an ESBT election is not in effect, one should consider including a grantor trust power beyond merely Code § 677, to make sure that the entire trust is taxed to the grantor (see part III.B.2.h How to Make a Trust a Grantor Trust). Second, no part of a QSST may be deemed owned by a person other than the beneficiary.

Paragraph (ii) offers insight into the application of Code § 677(a) after divorce. See part III.B.2.h.ix Code § 682 Limitations on Grantor Trust Treatment, the result of which is that, if distributions are made after separation, the trust no longer qualifies as a wholly owned grantor trust and a QSST election is unavailable; therefore, an ESBT election must be made (but note that Code § 682 is being repealed by 2017 tax reform). For the interaction of divorce with Chapter 14, see parts III.B.7.b.iv Divorce Planning to Avoid Code § 2701 and III.B.7.d Code § 2702 Overview, especially the text accompanying fns. 7445-7450.

⁵⁹⁹⁷ Reg. § 1.1361-1(j)(5).

requirement of Reg. § 1.1361-1(j)(1)(i), but continues to meet all of the requirements Reg. § 1.1361-1(j)(1)(ii), the QSST rules will cease to apply as of the first day of the first taxable year beginning after the first taxable year for which the trust ceased to meet that income distribution requirement. See parts III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation⁵⁹⁹⁸ and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.

Reg. § 1.1361-1(k)(1), Example (4) illustrates the income distribution rule (before the number of shareholder limitation was increased from 75 to 100):

- (i) *QSST when terms do not require current distribution of income.* Corporation Q, a calendar year corporation, makes an election to be an S corporation effective for calendar year 1996. On July 1, 1996, G, a shareholder of Corporation Q, transfers G's shares of Corporation Q stock to a trust with H as its current income beneficiary. The terms of the trust otherwise satisfy the QSST requirements, but authorize the trustee in its discretion to accumulate or distribute the trust income. However, the trust, which uses the calendar year as its taxable year, initially satisfies the income distribution requirement because the trustee is currently distributing all of the income. On August 1, 1996, H makes a QSST election with respect to Corporation Q that is effective as of July 1, 1996. Accordingly, as of July 1, 1996, the trust is a QSST and H is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.
- (ii) *QSST when trust income is not distributed currently.* Assume the same facts as in paragraph (i) of this Example 4, except that, for the taxable year ending on December 31, 1997, the trustee accumulates some trust income. The trust ceases to be a QSST on January 1, 1998, because the trust failed to distribute all of its income for the taxable year ending December 31, 1997. Thus, Corporation Q ceases to be an S corporation as of January 1, 1998, because the trust is not a permitted shareholder.
- (iii) *QSST when a person other than the current income beneficiary may receive trust corpus.* Assume the same facts as in paragraph (i) of this Example 4, except that the events occur in 2003 and H dies on November 1, 2003, and the trust does not qualify as an ESBT. Under the terms of the trust, after H's death, L is the income beneficiary of the trust and the trustee is authorized to distribute trust corpus to L as well as to J. The trust ceases to be a QSST as of November 1, 2003, because corpus distributions may be made to someone other than L, the current (successive) income beneficiary. Under section 1361(c)(2)(B)(ii), H's estate (and not the trust) is considered to be the shareholder for purposes of section 1361(b)(1) for the 2-year period beginning on November 1, 2003. However, because the trust continues in existence after H's death and will receive any distributions from the corporation, the trust (and not H's estate) is treated as the shareholder for purposes of sections 1366, 1367, and 1368, during that 2-year period. After the 2-year period, the S election terminates and the trust continues as a shareholder of a C corporation. If the termination is inadvertent, Corporation Q may request relief under section 1362(f). However, the S election would not terminate if the trustee distributed all Corporation Q shares to L, J, or both on or before October 31, 2005, (the last day of

⁵⁹⁹⁸ Especially fn 6898 in part III.B.2.j.ii.(c) Transfer of Shareholder's Entire Interest.

the 2-year period) assuming that neither L nor J becomes the 76th shareholder of Corporation Q as a result of the distribution.

Suppose a QSST owns the S corporation stock through a single-member LLC that is disregarded for income tax purposes. Only distributions from the LLC to the trust – rather than distributions from the S corporation – must be distributed to satisfy the QSST rules. I would tend to stay away from the idea of reducing what must be distributed to the beneficiary:

- I am concerned about gift tax issues for failure to require the trustee to pull out the LLC's assets.⁵⁹⁹⁹ Is the trustee making sure the statute of limitations runs annually so that the income beneficiary's claim at death is not huge,⁶⁰⁰⁰ and is the annually retained income less than 5% of the distributions?⁶⁰⁰¹ Does the lapse generate Code § 678 issues regarding the LLC's non-S corporation income⁶⁰⁰² or Code § 2036 issues regarding the excess lapse?⁶⁰⁰³
- I am also concerned about – upon termination - the trustee distributing the LLC to more than one beneficiary, thereby creating a partnership that is not eligible to hold S stock and terminating the S election.⁶⁰⁰⁴

Reg. § 1.1361-1(k)(1), Example (7) illustrates the effect of a remote possibility⁶⁰⁰⁵ that principal may be distributed to someone other than the current income beneficiary and curing that defect:

QSST when settlor of trust retains a reversion in the trust. On January 10, 1996, M transfers to a trust shares of stock in corporation X, an S corporation. D, who is 13 years old and not a lineal descendant of M, is the sole income beneficiary of the trust. On termination of the trust, the principal (including the X shares) is to revert to M. The trust instrument provides that the trust will terminate upon the earlier of D's death or D's 21st birthday. The terms of the trust satisfy all of the requirements to be a QSST except those of section 1361(d)(3)(A)(ii) (that corpus may be distributed during the current income beneficiary's life only to that beneficiary) and (iv) (that, upon termination of the trust during the life of the current income beneficiary, the corpus, must be distributed to that beneficiary). On February 10, 1996, M makes a gift of M's reversionary interest to D. Until M assigns M's reversion in the trust to D, M is deemed to own the entire trust under section 673(a) and the trust is a qualified subpart E trust. For purposes of section 1361(b)(1), 1366, 1367, and 1368, M is the shareholder of X. The trust ceases

⁵⁹⁹⁹ See discussion of Rev. Rul. 84-105 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

⁶⁰⁰⁰ See part II.J.4.j.i Need to Provide Notices.

⁶⁰⁰¹ See text following fn 2636 in part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary, discussing Rev. Rul. 66-87 and *Fish v. U.S.*

⁶⁰⁰² See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

⁶⁰⁰³ Part III.C Code § 2036.

⁶⁰⁰⁴ See text accompanying fns 146-157 in part .

⁶⁰⁰⁵ Using the latest mortality tables that had issued, on July 5, 2019 a 13-year-old had a 99.5% chance of reaching age 21. I don't know why Code § 673(a) was chosen, because the facts below do not appear to satisfy Code § 673(a), which provides that, subject to subsection (b) when the beneficiary is a minor descendant, "The grantor shall be treated as the owner of any portion of a trust in which he has a reversionary interest in either the corpus or the income therefrom, if, as of the inception of that portion of the trust, the value of such interest exceeds 5 percent of the value of such portion."

See fn 6010, which reproduces the holding of Rev. Rul. 93-31 regarding a remote possibility that the corpus of the trust will be distributed during the lifetime of the current income beneficiary to someone other than that beneficiary

to be a qualified subpart E trust on February 10, 1996. Assuming that, by virtue of the assignment to D of M's reversionary interest, D (upon his 21st birthday) or D's estate (in the case of D's death before reaching age 21) is entitled under local law to receive the trust principal, the trust will be deemed as of February 10, 1996, to have satisfied the conditions of section 1361(d)(3)(A)(ii) and (iv) even though the terms of the trust do not explicitly so provide. D must make a QSST election by no later than April 25, 1996 (the end of the 16-day-and-2-month period that begins on February 10, 1996, the date on which the X stock is deemed transferred to the trust by M). See example (5) of § 1.1001-2(c) of the regulations.

Some annual expenses are ordinarily allocated one-half to income and one-half to principal. Generally, these include (1) the regular compensation of the trustee and of any person providing investment advisory or custodial services to the trustee, and (2) expenses for accountings, judicial proceedings, or other matters that involve both the income and remainder interests.⁶⁰⁰⁶ If S corporation distributions are the trust's only source of cash, this rule is impractical, because the trust would be unable to pay the portion of the expense allocated to principal. Accordingly, I often suggest that the trustee make an adjustment, allocating the entire expense to income, which might be authorized under either state law⁶⁰⁰⁷ or the governing instrument.⁶⁰⁰⁸ If the business or the stock is sold later, the proceeds are taxable to the trust, rather than the beneficiary; at that time, some of the proceeds might be allocated to income to make up for these prior allocations of administrative expenses, which would help move taxable items from the trust's high rates to the beneficiary's potentially lower rates.⁶⁰⁰⁹

A trust that has substantially separate and independent shares, each of which is for the sole benefit of one beneficiary, may qualify as a QSST with respect to each separate share.⁶⁰¹⁰ For

⁶⁰⁰⁶ Section 501 of the Uniform Principal and Income Act, which can be found at [http://www.uniformlaws.org/Act.aspx?title=Principal and Income Amendments \(2008\)](http://www.uniformlaws.org/Act.aspx?title=Principal%20and%20Income%20Amendments%20(2008)).

⁶⁰⁰⁷ See part II.J.8.c.i.(a) Power to Adjust.

⁶⁰⁰⁸ See parts II.J.8.c.i.(d) Exceptions in the Governing Instrument and II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially fns. 2780-2785 (language that might be included in one's forms authorizing such an adjustment, as well as the consequences of using such language).

⁶⁰⁰⁹ See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets. See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the . For form language that might facilitate this allocation, see fn. 2780, found in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.

⁶⁰¹⁰ Code § 1361(d)(3); see Letter Ruling 201119005, discussed in fn 6024 in part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies. Although the statute cites to the separate share rules under Code § 663(c) (see part II.J.9.a.ii Separate Share Rule), the test is more stringent than that. Code § 663(c) provides for that distributions to other beneficiaries be ignored in determining separate share treatment if the possibility of distribution is remote. Rev. Rul. 93-31 holds:

A substantially separate and independent share of a trust, within the meaning of section 663(c) of the Code, is not a QSST if there is a remote possibility that the corpus of the trust will be distributed during the lifetime of the current income beneficiary to someone other than that beneficiary.

For example, if an inter vivos QSST includes a clause requiring the payment of estate tax if the grantor dies during the beneficiary's life, and that payment clause might benefit the grantor's estate beyond whatever applicable law would provide but for that clause, the IRS' view is that mere possibility of such a

example, a grantor sets up an irrevocable trust for the benefit of his four children, who are the only children he will ever have. Each child receives one-fourth of the income and corpus distributions. Each child would be considered the owner of one-fourth of the stock owned by the trust.⁶⁰¹¹ This could also work well for a vested trust for a grandchild, which qualifies for the GST annual exclusion;⁶⁰¹² see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust for an example of a vested trust.

To avoid the requirement that all of the trust income – not just its S corporation income – be distributed to the beneficiary, it is not uncommon for a trust agreement to divide the trust so that the QSST is a separate trust. For inter vivos QSSTs, this approach might have additional state income tax benefits; see part II.J.15.b QSSTs and State Income Tax Issues. On a separate but related note, suppose a QSST holds investments (such as partnerships) that generate taxable income without necessarily generating trust accounting income. Can the nongrantor trust portion of the QSST take an income distribution deduction with respect to the distributions to the beneficiary of trust accounting income derived from S corporation? The QSST regulations⁶⁰¹³ do not address it, but the grantor trust regulations provide some support for my preliminary view that the nongrantor trust portion cannot get credit for those distributions.⁶⁰¹⁴

diversion might disqualify the QSST from inception. Letter Ruling 201451001 (which I obtained to obtain inadvertent termination relief at the insistence of the CPAs for the company that was acquiring my client). However, paying transfer tax on the beneficiary's death should not cause any QSST problem. Letter Ruling 9014008 (GST tax).

See the text accompanying fn 6005 for an example in the regulations about what happens when the remote possibility is cured.

⁶⁰¹¹ However, it would not work if trust provided that the birth of another child after the trust is created would cause the trust to be divided five ways, essentially diverting one-fourth of each existing trust. Rev. Rul. 89-45.

⁶⁰¹² Code § 2642(c)(2) provides that the GST annual exclusion applies to a trust that uses *Crummey* withdrawal rights only if the grandchild (or other skip person) is the sole beneficiary of the trust, and the trust's assets must be includible in the beneficiary's gross estate upon her death. Code § 2654(b) provides that substantially separate and independent shares of different beneficiaries shall be treated as separate trusts under the GST rules. Suppose a grantor sets up an irrevocable trust for the benefit of his four grandchildren. Each grandchild receives one-fourth of the income and corpus distributions; the trust distributes all of its income each year; and each of the four living grandchild would be considered the owner of one-fourth of the stock owned by the trust. If a grandchild who dies before or after trust termination holds a general power of appointment over one-fourth of the trust's assets, the trust will qualify for the GST annual exclusion and as a QSST.

⁶⁰¹³ Reg. § 1.1361-1(j).

⁶⁰¹⁴ Reg. § 1.671-3(a)(2) provides:

If the portion treated as owned consists of specific trust property and its income, all items directly related to that property are attributable to the portion. Items directly related to trust property not included in the portion treated as owned by the grantor or other person are governed by the provisions of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code.

"Items" refers to "items of income, deduction, and credit against tax attributable to or included in that portion," so I can't say with absolute certainty what the answer is. However, I think that the "better" answer is that distributions from the trust of S corporation trust accounting income would be attributable to the grantor trust portion. This is consistent with the IRS' general approach in CCA 201327009, discussed in the text accompanying fns 6136-6138 in part III.A.3.e.vi.(a) Grantor Trust Issues Involved in a Sale of S Stock to a QSST.

The beneficiary of a QSST is taxed on all of the QSST's K-1 income and losses from the S corporation⁶⁰¹⁵ (although the trust still needs to get its own tax ID and use a grantor information statement to report K-1 items to the beneficiary).⁶⁰¹⁶ However, when the QSST sells the stock, the trust itself is taxable on any gain on the sale,⁶⁰¹⁷ including any gain the corporation incurs after adopting a plan of complete liquidation⁶⁰¹⁸ or from the deemed asset sale resulting from a Code § 338(h)(10) election.⁶⁰¹⁹ If the corporation actually sells its assets without adopting a plan of liquidation, I am unsure of the result. For additional planning issues, see parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI), and II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax). From the above, one can glean that depreciation recapture on the actual or deemed sale of personal property is ordinary income that is principal but might be best taxed to the beneficiary, who might either be in a lower tax bracket or might have losses from operations during the year of sale passing through the grantor trust portion to offset; thus, consider including in one's trust the flexibility to distribute principal or to reallocate principal to income.⁶⁰²⁰

The beneficiary must make a separate QSST election with respect to each corporation whose stock the trust holds.⁶⁰²¹

See part II.A.2.d Estate Planning Strategies Available Only for S Corporation Shareholders for a brief introduction to a QSST's unique benefits. To explore a QSST's unique attributes as a grantor trust deemed owned by its beneficiary, see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs.

Also note that a QSST election might enhance (or perhaps reduce) the trust's ability to deduct charitable contributions made by the S corporation.⁶⁰²²

⁶⁰¹⁵ Code § 1361(d)(1)(B). Reg. § 1.1361-1(j)(7)(i) provides:

The income beneficiary who makes the QSST election and is treated (for purposes of section 678(a)) as the owner of that portion of the trust that consists of S corporation stock is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.

Reg. § 1.1361-1(j)(8) further provides:

If a valid QSST election is made, the income beneficiary is treated as the owner, for purposes of section 678(a), of that portion of the trust that consists of the stock of the S corporation for which the QSST election was made.

⁶⁰¹⁶ Reg. § 1.671-4(b)(6)(iii).

⁶⁰¹⁷ Reg. § 1.1361-1(j)(8). However, for purposes of recognizing any losses suspended due to the at-risk rules of Code § 465 or the passive activity rules of Code § 469, the regulation treats the beneficiary as having sold the stock so that the suspended losses can be triggered. For more details on such sales, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets.

⁶⁰¹⁸ Letter Rulings 9721020 and 199905011. This includes gain from the actual sale of assets as well as gain on the Code § 336 deemed sale of assets distributed to shareholders. Of course, Code § 331 gain on the deemed sale of stock on dissolution is also taxed to the trust.

⁶⁰¹⁹ Letter Rulings 9828006, 199920007, and 201232003.

⁶⁰²⁰ See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, which includes parts discussing allocating to income what otherwise would be principal receipts.

⁶⁰²¹ Reg. § 1.1361-1(j)(6)(i). Inadvertent termination relief is available when the trust acquires stock in another S corporation if a timely QSST election is not made with respect to that other S corporation. Letter Ruling 201618003.

⁶⁰²² See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity, especially the text accompanying fn. 4967.

For a simpler (but less useful) trust to hold S corporation stock, see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests.

III.A.3.e.i.(b). QSST Issues When Beneficiary Dies

QSSTs have excellent post-mortem planning flexibility:

- A QSST may hold stock for two years after the beneficiary's death without making any election at all.⁶⁰²³
- If a QSST continues as separate QSST-eligible shares for each beneficiary after termination but before the new QSST trusts are actually funded, no new election is required until actual funding of the new trusts; in other words, the QSST election stays in effect, with the individual remaindermen taxed as the QSST beneficiaries until actual post-mortem trust funding occurs.⁶⁰²⁴

The latter is a very important tool. Consider what happens after the beneficiary dies and before the stock is retitled in the remaindermen's names. If the S corporation does not distribute all of its taxable income, the trust might not be able to obtain an income distribution deduction to carry out all of the income to the remaindermen, thereby trapping the income⁶⁰²⁵ at the trust's presumably higher income tax rates.⁶⁰²⁶ Keeping the QSST election intact post-mortem before stock retitling to make sure that individual beneficiaries are taxed directly on the S corporation's K-1 income might save income tax during that period.

However, challenges arise when the remaindermen are not the residual beneficiaries of the beneficiary's estate plan. The S corporation might make distributions to pay the shareholders'

⁶⁰²³ See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.

⁶⁰²⁴ See Reg. § 1.1361-1(j)(9)(ii), contrasting Example (1) with Example (2). Code § 1361(d)(2)(B)(ii) provides:

Elections with respect to successive income beneficiaries. If there is an election under this paragraph with respect to any beneficiary, an election under this paragraph shall be treated as made by each successive beneficiary unless such beneficiary affirmatively refuses to consent to such election.

Letter Ruling 201119005 held that, when the QSST beneficiary died, separate shares were created that qualified as QSSTs, without any QSST election needing to be affirmatively made with respect to the remaindermen, in the following scenario:

Upon B's death, Trust's assets were divided into two shares. The income from one share is required to be paid to C and the income from the other share is required to be paid to D. During the life of each of C and D (the income beneficiaries), the income and principal from one beneficiary's share can only be paid to that income beneficiary. Neither income beneficiary has a claim against the income and principal of the other beneficiary's share. Since Date 4, the income from each share of Trust has been distributed to the income beneficiary of that share. Neither beneficiary has affirmatively refused to consent to the QSST election made for Trust on Date 3.

For separate share treatment for QSSTs, see fn 6010 in part III.A.3.e.i.(a) QSSTs Generally.

⁶⁰²⁵ See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation.

⁶⁰²⁶ Note, however, that trapping income inside trusts might be beneficial. See parts II.J.3 Strategic Fiduciary Income Tax Planning and III.A.3.e.ii.(c) When ESBT Income Taxation Might Help, the latter not directly on point but having some helpful ideas.

income taxes after the beneficiary dies, and then how will the beneficiary's estate pay tax on the beneficiary's allocable share⁶⁰²⁷ of the S corporation's income? What happens when a QSST's beneficiary dies, the beneficiary's estate is taxed on pre-mortem income, and the remaindermen are different than the beneficiaries of the beneficiary's estate? This might occur, for example, in a second marriage situation. Although the Uniform Principal and Income Act discusses issues along these lines to a certain extent,⁶⁰²⁸ drafting to address this issue would be advisable:

- If the beneficiary does not control disposition of the trust's assets, the beneficiary might consider negotiating income tax reimbursement provisions with the trustee as a condition of making the QSST election.
- If the beneficiary does control disposition, the beneficiary might consider exerting that control to require that the remaindermen reimburse the beneficiary's estate for income tax on the pre-mortem income. On the other hand, if the QSST's remaindermen are the same as under the beneficiary's estate plan generally, the opportunity to create a debt (taxes on the earned but undistributed income) on the beneficiary's estate tax return might prove beneficial. In the latter case, the beneficiary might exercise any power of appointment he or she might have to provide for the QSST election to remain in place after the beneficiary's death during trust administration before the trust is divided.

One might consider a provision along the following lines:

- (1) If the individuals to whom the S corporation stock is allocated do not share in the residue of the deceased beneficiary's estate (in this Agreement, Article 5 determines the sharing of the residue of my estate, because my will bequeaths my estate to the Revocable Trust and Article 5 bequeaths the residuary trust assets), then any distributions the S corporation makes to pay its shareholders' taxes with respect to their distributive shares of taxable income before the date of death shall be treated as income earned before the beneficiary's death and paid to the beneficiary's estate.
- (2) If and to the extent that paragraph (1) does not apply, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to U.S. Treas. Reg. section 1.1361-1(j)(9)(ii), Example (1), and the trusts for the beneficiaries will be amended under [the QSST provisions].

Such a provision would not cause any marital deduction problems for the trust that is terminating.⁶⁰²⁹ However, if the trust is included in the beneficiary's estate and the beneficiary is bequeathing the stock to a QTIP trust and income otherwise payable to the QTIP trust is

⁶⁰²⁷ See part III.B.2.j Tax Allocations upon Change of Interest, especially part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

⁶⁰²⁸ Section 201 of the Uniform Principal and Income Act (last amended or revised in 2008; see http://www.uniformlaws.org/shared/docs/principal%20and%20income/upia_final_08_clean.pdf) addresses actions when a trust terminates.

⁶⁰²⁹ Rev. Rul. 92-64 generally allows income earned during the surviving spouse's life but paid after the surviving spouse's death to be paid to either the surviving spouse's estate (if allowed under state law) or the successor beneficiary. State corporate law often limits the gap between record date (the date on the shareholder actually owned the stock) and payment date; generally, an LLC taxed as an S corporation would not face this problem. Of course, in a trust situation, with either type of entity the trust would receive the distribution and then direct it according to the beneficiaries' respective interests, if the ownership interest was not transferred between death and date of the distribution from the corporation.

diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

A successive income beneficiary may disaffirm this QSST continuation, retroactively by as much as 2 months and 15 days (but may not disaffirm after that period).⁶⁰³⁰

The amount of income allocated before and after death is also potentially subject to considerable uncertainty, unless an election to close the corporation's books is made, as described in part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, especially part III.B.2.j.ii.(d) Death of a Shareholder.

If the stock is bequeathed to a person other than the persons receiving the trust's residue, consider the issues in part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests, which addresses timing issues relating to distributions to pay taxes on the trust's distributive share of the entity's income.

Letter Ruling 201420005 addressed the following facts:

The information submitted states that X was incorporated under the laws of State on Date 1, and elected to be an S corporation effective Date 2. Trust 1, Trust 2 and Trust 3, each of which was a qualified subchapter S trust (QSST) under § 1361(d)(1) for which A was the sole income beneficiary, were shareholders of X.

On Date 3, A died. Trust 1, Trust 2 and Trust 3 each continued to qualify as a permissible S corporation shareholder under § 1.1361-1(j)(7)(ii) of the Income Tax Regulations for the 2-year period beginning on the day of the deemed owner's death and ending on Date 4.

On Date 4, Trust 1, Trust 2 and Trust 3 each became an ineligible shareholder of X and X's election to be an S corporation terminated. On Date 5, the trustees of each of Trust 1, Trust 2 and Trust 3 distributed each Trust's stock in X to Trust 4, which X represents is a QSST. X represents that the circumstances resulting in the termination of X's S corporation election were inadvertent and were not motivated by tax avoidance or retroactive tax planning.

⁶⁰³⁰ Reg. § 1.1361-1(j)(10), "Affirmative refusal to consent," provides:

- (i) *Required statement.* A successive income beneficiary of a QSST must make an affirmative refusal to consent by signing and filing with the service center where the corporation files its income tax return a statement that -
 - (A) Contains the name, address, and taxpayer identification number of the successive income beneficiary, the trust, and the corporation for which the election was made;
 - (B) Identifies the refusal as an affirmative refusal to consent under section 1361(d)(2); and
 - (C) Sets forth the date on which the successive income beneficiary became the income beneficiary.
- (ii) *Filing date and effectiveness.* The affirmative refusal to consent must be filed within 15 days and 2 months after the date on which the successive income beneficiary becomes the income beneficiary. The affirmative refusal to consent will be effective as of the date on which the successive income beneficiary becomes the current income beneficiary.

Without mentioning any of the rules stated above, Letter Ruling 201420005 concluded:

Based solely on the information submitted and the representations made, we conclude that X's S corporation election terminated on Date 4, when Trust 1, Trust 2 and Trust 3 became ineligible shareholders. We further conclude that the termination of X's S corporation election was an inadvertent termination within the meaning of § 1362(f). Accordingly, pursuant to the provisions of § 1362(f), X will be treated as an S corporation from Date 4 and thereafter, provided that X's S corporation election was otherwise valid and has not otherwise terminated under § 1362(d).

The ruling did not address how Trust 1, Trust 2 and Trust 3 were administered after A's death. Did they accumulate income, as trusts do between date of termination and date of funding the downstream trusts? Or, did they distribute all of the income to the sole beneficiary of Trust 4, who presumably under state law should have received any fiduciary accounting income not necessary to wind up Trust 1, Trust 2 or Trust 3? These questions make me want to be very specific in referring to Reg. § 1.1361-1(j)(9)(ii), Example (1), as does the sample clause listed above. If one does not have similar language, consider documenting in writing that this continuation is in fact occurring between date of termination and date of funding the downstream trusts if for some reason it is impractical to fund the downstream trusts before the two-year post-mortem grace period expires. That documentation might also save income taxes; see fns 6025-6026 and the accompanying text.

III.A.3.e.ii. Electing Small Business Trusts (ESBTs)

III.A.3.e.ii.(a). Qualification as an ESBT

After determining eligibility to make an electing small business trust (ESBT) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections. Make sure the election correctly refers to the date shares were transferred to the trust that is selected as the effective date.⁶⁰³¹

To qualify to make an ESBT election,⁶⁰³² the trust cannot have as a beneficiary any person other than an individual, an estate, a charity within certain definitions;⁶⁰³³ if a potential current

⁶⁰³¹ Letter Ruling 201941006 granted inadvertent termination relief as of Date 3 in the following situation:

On Date 2, Trust 1 acquired shares in A. Trust 1 qualified under § 1362(c)(2)(A)(v) as an eligible S corporation shareholder and timely filed an ESBT election effective Date 2. A represents that on Date 3, under the laws of State Trust 1 merged with and into Trust 2, with Trust 2 surviving. As a result of the merger, the shares of A owned by Trust 1 were transferred to Trust 2 as of Date 3.

On Date 4, the trustee of Trust 2 filed an election under § 1362(c)(2)(A)(v) to be treated as an ESBT effective Date 5. The ESBT election incorrectly stated that the shares of A owned by Trust 1 prior to the merger were transferred to Trust 2 on Date 5, when the shares were actually transferred on Date 3. A represents that Trust 2 intended the ESBT election to be effective as of Date 3. As a result, A's S corporation election terminated on Date 3 because Trust 2 was an ineligible shareholder.

See parts II.J.18.b Trust Mergers and II.J.18.c Decanting, the latter being relevant because a decanting may be a trust merger treated as a mere continuation of the original trust.

⁶⁰³² Code § 1361(e)(1)(A)(iii) authorizes the election.

⁶⁰³³ Code § 1361(e)(1)(A)(i). Permitted charities include an organization described in Code § 170(c)(2), (3), (4), or (5) or, if it has a contingent interest in the trust and is not a potential current beneficiary, a Code § 170(c)(1) organization. As described in part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, 2017 tax reform allowed a nonresident alien (NRA) to be a beneficiary. In exchange, any part of the trust that the NRA is deemed to own is taxed as a nongrantor S portion; see fns 142-143.

beneficiary of an ESBT is not an eligible shareholder of an S corporation, the S election terminates.⁶⁰³⁴ “Beneficiary” includes a person who has a present, remainder, or reversionary interest in the trust.⁶⁰³⁵ A distributee trust is the beneficiary of the ESBT only if the distributee trust is a Code § 170(c)(2) or (3) organization.⁶⁰³⁶ In all other situations, any person who has a beneficial interest in a “distributee trust” is a beneficiary of the ESBT, rather than the trust itself being considered to be a beneficiary.⁶⁰³⁷ A “distributee trust” is a trust that receives or may receive a distribution from the ESBT, whether the rights to receive the distribution are fixed or contingent, or immediate or deferred.⁶⁰³⁸

If an impermissible shareholder might become a potential current beneficiary, one might consider taking steps to exclude that person from being a potential current beneficiary (“PCB”) of the ESBT portion.⁶⁰³⁹ Generally, a PCB is any person who at any time during the taxable year is entitled to, or in the discretion of any person may receive, a distribution from the principal or income of the trust;⁶⁰⁴⁰ the deemed owner of a grantor trust is also a PCB.⁶⁰⁴¹ A potential trap

⁶⁰³⁴ Reg. § 1.1361-1(m)(5)(iii), which provides further:

For example, the S corporation election will terminate if a charitable remainder trust becomes a potential current beneficiary of an ESBT. Such a potential current beneficiary is treated as an ineligible shareholder beginning on the day such person becomes a potential current beneficiary, and the S corporation election terminates on that date. However, see the special rule of paragraph (m)(4)(iii) of this section. If the S corporation election terminates, relief may be available under section 1362(f).

⁶⁰³⁵ Reg. § 1.1361-1(m)(1)(ii)(A).

⁶⁰³⁶ Reg. § 1.1361-1(m)(1)(ii)(B).

⁶⁰³⁷ Reg. § 1.1361-1(m)(1)(ii)(B).

⁶⁰³⁸ Reg. § 1.1361-1(m)(1)(ii)(B).

⁶⁰³⁹ Letter Ruling 200913002 held that such a modification did not affect GST grandfathering.

⁶⁰⁴⁰ Code § 1361(e)(2). Reg. § 1.1361-1(m)(4)(i) provides:

Generally. For purposes of determining whether a corporation is a small business corporation within the meaning of section 1361(b)(1), each potential current beneficiary of an ESBT generally is treated as a shareholder of the corporation. Subject to the provisions of this paragraph (m)(4), a potential current beneficiary generally is, with respect to any period, any person who at any time during such period is entitled to, or in the discretion of any person may receive, a distribution from the principal or income of the trust. A person is treated as a shareholder of the S corporation at any moment in time when that person is entitled to, or in the discretion of any person may, receive a distribution of principal or income of the trust. No person is treated as a potential current beneficiary solely because that person holds any future interest in the trust. An NRA potential current beneficiary of an ESBT is treated as a shareholder for purposes of the 100-shareholder limit under section 1361(b)(1)(A). However, an NRA potential current beneficiary of an ESBT is not treated as a shareholder in determining whether a corporation is a small business corporation for purposes of the NRA-shareholder prohibition under section 1361(b)(1)(C).

Reg. § 1.1361-1(m)(4)(iii) further provides:

Special rule for dispositions of stock. Notwithstanding the provisions of paragraph (m)(4)(i) of this section, if a trust disposes of all of the stock which it holds in an S corporation, then, with respect to that corporation, any person who first met the definition of a potential current beneficiary during the 1-year period ending on the date of such disposition is not a potential current beneficiary and thus is not a shareholder of that corporation.

Reg. § 1.1361-1(m)(4)(v) also provides:

Contingent distributions. A person who is entitled to receive a distribution only after a specified time or upon the occurrence of a specified event (such as the death of the holder of a power of appointment) is not a potential current beneficiary until such time or the occurrence of such event.

For the effect of a power of appointment, see fn 6055.

⁶⁰⁴¹ Reg. § 1.1361-1(m)(4)(ii) provides:

applies when an ESBT terminates in favor of trusts (the “downstream trusts”). After the event terminating the ESBT (such as the primary beneficiary’s death) and before the trust distributes its assets to the downstream trusts, the downstream trusts might become PCBs, applying the following rules:

- (1) Generally, a trust that exists is a distributee trust if it becomes entitled to, or at the discretion of any person, may receive a distribution from principal or income of an ESBT.⁶⁰⁴² A trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit.⁶⁰⁴³ A trust that is not yet funded not currently a distributee trust.⁶⁰⁴⁴
- (2) If the distributee trust qualifies a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the persons who would be its PCBs if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT.⁶⁰⁴⁵ However, if the distributee trust is a former grantor trust⁶⁰⁴⁶ or is a testamentary trust,⁶⁰⁴⁷ in either case during the special initial 2-year period, then the relevant estate is treated as the ESBT’s PCB during that period.⁶⁰⁴⁸
- (3) If the distributee trust is not a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the distributee trust is the potential current beneficiary of the ESBT and the corporation’s S corporation election terminates.⁶⁰⁴⁹ However, if the distributee trust would be a valid QSST or ESBT if the relevant election were made and the election is not made because the trust does not hold S stock, then the distributee trust does not count as a PCB,⁶⁰⁵⁰ and the distributee trust’s

Grantor trusts. If all or a portion of an ESBT is treated as owned by a person under subpart E, part I, subchapter J, chapter 1 of the Internal Revenue Code, such owner is a potential current beneficiary in addition to persons described in paragraph (m)(4)(i) of this section.

⁶⁰⁴² Reg. § 1.1361-1(m)(4)(iv)(A).

⁶⁰⁴³ Reg. § 1.1361-1(m)(4)(iv)(A).

⁶⁰⁴⁴ Reg. § 1.1361-1(m)(4)(iv)(A). Letter Rulings 200816012 and 200913002 approved as an ESBT a trust prohibiting distributions to a nonresident alien for so long as (1) the trust has an ESBT election in effect, and (2) a non-resident alien is not permitted to be a PCB of an ESBT under the Code and Regs. (I do not know why the rulings cited Reg. § 1.1361-1(m)(4)(iv) instead of Reg. § 1.1361-1(m)(4)(v). I wonder whether that is a typo.) However, starting in 2018, a nonresident alien may be a beneficiary of an ESBT. See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fns 140-136.

⁶⁰⁴⁵ Reg. § 1.1361-1(m)(4)(iv)(C).

⁶⁰⁴⁶ See part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.

⁶⁰⁴⁷ See part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.

⁶⁰⁴⁸ Reg. § 1.1361-1(m)(4)(iv)(C).

⁶⁰⁴⁹ Reg. § 1.1361-1(m)(4)(iv)(B).

⁶⁰⁵⁰ Reg. § 1.1361-1(m)(4)(iv)(D) provides:

For the purposes of paragraph (m)(4)(iv)(C) of this section, a trust will be deemed to be described in section 1361(c)(2)(A) if such trust would qualify for a QSST election under section 1361(d) or an ESBT election under section 1361(e) if it owned S corporation stock.

Letter Ruling 200912005 approved a distributee trust that would have been eligible to make an ESBT election even though its sole remainderman was a charity (it did not, as drafted, qualify as a charitable remainder trust).

Reg. § 1.1361-1(m)(8)(vi), Example 6, provides:

(A) *Distributee trust that would itself qualify as an ESBT.* Trust-1 holds stock in X, an S corporation, and has a valid ESBT election in effect. Under the terms of Trust-1, the

PCBs would count as PCBs of the trust that does hold the S stock.⁶⁰⁵¹ Another option is for the main trust to partially fund the distributee trust and have the distributee trust then qualify as a shareholder.⁶⁰⁵²

Each potential current beneficiary is treated as a shareholder for the purposes of the 100-shareholder limitation.⁶⁰⁵³

Regulations had provided that an open-ended inter vivos power of appointment violates the 100-shareholder limitation; however, Congress modified that provision for years beginning after December 31, 2004 to provide that powers of appointment are considered during a period only

trustee has discretion to make distributions to A, B, and Trust-2, a trust for the benefit of C, D, and E. Trust-2 would qualify to be an ESBT, but it owns no S corporation stock and has made no ESBT election. Under paragraph (m)(4)(iv) of this section, Trust-2's potential current beneficiaries are treated as the potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Thus, A, B, C, D, and E are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Trust-2 itself will not be counted as a shareholder of Trust-1 for purposes of section 1361(b)(1).

(B) *Distributee trust that would not qualify as an ESBT or a QSST.* Assume the same facts as Example 6 in paragraph (m)(8)(vi)(A) of this section except that D is a charitable remainder trust. Trust-2 would not be eligible to make an ESBT or QSST election if it owned S corporation stock and therefore Trust-2 is a potential current beneficiary of Trust-1. Since Trust-2 is not an eligible shareholder, X's S corporation election terminates.

(C) *Distributee trust that is a section 1361(c)(2)(A)(ii) trust.* Assume the same facts as in Example 6 in paragraph (m)(8)(vi)(A) of this section except that Trust-2 is a trust treated as owned by A under section 676 because A has the power to revoke Trust-2 at any time prior to A's death. On January 1, 2003, A dies. Because Trust-2 is a trust described in section 1361(c)(2)(A)(ii) during the 2-year period beginning on the day of A's death, under paragraph (m)(4)(iv)(C) of this section, Trust-2's only potential current beneficiary is the person listed in section 1361(c)(2)(B)(ii), A's estate. Thus, B and A's estate are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1).

⁶⁰⁵¹ Reg. § 1.1361-1(m)(4)(iv)(B) provides:

If the distributee trust is a trust described in section 1361(c)(2)(A), the persons who would be its potential current beneficiaries (as defined in paragraphs (m)(4)(i) and (ii) of this section) if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT. Notwithstanding the preceding sentence, however, if the distributee trust is a trust described in section 1361(c)(2)(A)(ii) or (iii), the estate described in section 1361(c)(2)(B)(ii) or (iii) is treated as the potential current beneficiary of the ESBT for the 2-year period during which such trust would be permitted as a shareholder.

See Reg. § 1.1361-1(m)(8)(vi), Example 6, reproduced in fn. 6050.

⁶⁰⁵² Reg. § 1.1361-1(m)(8)(v), Example 5, provides:

Potential current beneficiaries and distributee trust holding S corporation stock. Trust-1 has a valid ESBT election in effect. The trustee of Trust-1 has the power to make distributions to A directly or to any trust created for the benefit of A. On January 1, 2003, M creates Trust-2 for the benefit of A. Also on January 1, 2003, the trustee of Trust-1 distributes some S corporation stock to Trust-2. A, as the current income beneficiary of Trust-2, makes a timely and effective election to treat Trust-2 as a QSST. Because Trust-2 is a valid S corporation shareholder, the distribution to Trust-2 does not terminate the ESBT election of Trust-1. Trust-2 itself will not be counted toward the shareholder limit of section 1361(b)(1)(A). Additionally, because A is already counted as an S corporation shareholder because of A's status as a potential current income beneficiary of Trust-1, A is not counted again by reason of A's status as the deemed owner of Trust-2.

⁶⁰⁵³ Code § 1361(c)(2)(B)(v).

to the extent exercised during that period,⁶⁰⁵⁴ and the regulations now reflect this change.⁶⁰⁵⁵ If a distribution can be made to an existing trust, that trust must be qualify under the general rules for trusts as S corporation shareholders,⁶⁰⁵⁶ similar to the power of appointment rule, that rule does not apply until the distributee trust has been created.⁶⁰⁵⁷

⁶⁰⁵⁴ Code § 1361(e)(2).

⁶⁰⁵⁵ Reg. § 1.1361-1(m)(4)(vi)(A) provides:

(A) *Powers of appointment.* A person to whom a distribution may be made during any period pursuant to a power of appointment (as described for transfer tax purposes in section 2041 and § 20.2041-1(b) of this chapter and section 2514 and § 25.2514-1(b) of this chapter) is not a potential current beneficiary unless the power is exercised in favor of that person during the period. It is immaterial for purposes of this paragraph (m)(4)(vi)(A) whether such power of appointment is a “general power of appointment” for transfer tax purposes as described in §§ 20.2041-1(c) and 25.2514-1(c) of this chapter. The mere existence of one or more powers of appointment during the lifetime of a power holder that would permit current distributions from the trust to be made to more than the number of persons described in section 1361(b)(1)(A) or to a person described in section 1361(b)(1)(B) or (C) will not cause the S corporation election to terminate unless one or more of such powers are exercised, collectively, in favor of an excessive number of persons or in favor of a person who is ineligible to be an S corporation shareholder. For purposes of this paragraph (m)(4)(vi)(A), a “power of appointment” includes a power, regardless of by whom held, to add a beneficiary or class of beneficiaries to the class of potential current beneficiaries, but generally does not include a power held by a fiduciary who is not also a beneficiary of the trust to spray or sprinkle trust distributions among beneficiaries. Nothing in this paragraph (m)(4)(vi)(A) alters the definition of “power of appointment” for purposes of any provision of the Internal Revenue Code or the regulations.

(B) *Powers to distribute to certain organizations not pursuant to powers of appointment.* If a trustee or other fiduciary has a power (that does not constitute a power of appointment for transfer tax purposes as described in §§ 20.2041-1(b) and 25.2514-1(b) of this chapter) to make distributions from the trust to one or more members of a class of organizations described in section 1361(c)(6), such organizations will be counted collectively as only one potential current beneficiary for purposes of this paragraph (m), except that each organization receiving a distribution also will be counted as a potential current beneficiary. This paragraph (m)(4)(vi)(B) shall not apply to a power to currently distribute to one or more particular charitable organizations described in section 1361(c)(6). Each of such organizations is a potential current beneficiary of the trust.

⁶⁰⁵⁶ Reg. § 1.1361-1(m)(4)(iv)(B).

⁶⁰⁵⁷ Reg. § 1.1361-1(m)(4)(iv)(A), which further provides:

For this purpose, a trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit. Thus, if a trust instrument provides for a trust to be funded at some future time, the future trust is not currently a distributee trust.

An ESBT cannot have a beneficiary whose interest was acquired by purchase.⁶⁰⁵⁸ This prohibition does not have anything to do with whether the trust has purchased or might later purchase S stock.⁶⁰⁵⁹

⁶⁰⁵⁸ Code § 1361(e)(1)(A)(ii). For whether a change in a beneficiary's interest in a trust might cause an interest in the trust to be obtained by purchase in violation of this rule, see Potter, Trust Decanting of S corporation Shareholders: Avoiding Inadvertent Termination of the Company's S Election, *TM Memorandum* (BNA) (12/29/2014) or *TM Estates, Gifts and Trusts Journal* (BNA) (3/12/2015). Letter Ruling 201834007 ruled:

A is causing A's grantor trust to transfer the shares of X stock to the Trust pursuant to the divorce Decree, and the amount of the liabilities assumed plus the liabilities that the property transferred is subject to does not exceed the adjusted basis of the property transferred. Accordingly, based on the facts submitted and representations made, provided that the transfer of the shares of X stock to the Trust occurs within six years of the entry of final judgment and the terms of the Trust as executed by A and B remain materially identical to those submitted, we conclude that § 1041(a) applies and A and B will not recognize any gain or loss on the transfer of the shares of X stock from A's grantor trust to the Trust. Further, § 1041(b) applies such that the transfer is treated as a gift under § 1041(b). As such, B's acquisition of B's lifetime distribution rights in the Trust for consideration is not a purchase within § 1361(e) because the sale is not governed by § 1012(a). Accordingly, B's acquisition of B's distribution rights will not disqualify Trust from being an ESBT.

Letter Rulings 201436006 and 201436007 ruled that the following transactions did not constitute a prohibited purchase of an interest in a trust:

X created Trust 1 on D1. Trust 1 is a grantor trust wholly owned by X. X proposes to create Trust 2 which will be a grantor trust wholly owned by X. X proposes to contribute S corporation stock to Trust 2 and sell the Trust 2 remainder interest to Trust 1. Trust 2 will elect to be an electing small business trust (ESBT) under 1361(e) upon creation.

....

[W]e conclude that the sale of the Trust 2 remainder interest to Trust 1 will not disqualify Trust 2 from being an ESBT under § 1361(e) during the period when Trust 1 is a grantor trust as to X because the sale of the remainder interest is not a purchase within the meaning of § 1361(e). The sale of the remainder interest is not a purchase within the meaning of 1361(e) because the sale is not governed by § 1012(a). However, to the extent that the sale is treated as a gift, the sale will be covered by § 1015(a). In addition, we conclude that Trust 2 will not cease to be or fail to qualify as an ESBT after the termination of Trust 1's grantor trust status because Trust 1's acquisition of the remainder is not a purchase within the meaning of § 1361(e).

⁶⁰⁵⁹ Reg. § 1.1361-1(m)(1)(iii) provides:

Interests acquired by purchase. A trust does not qualify as an ESBT if any interest in the trust has been acquired by purchase. Generally, if a person acquires an interest in the trust and thereby becomes a beneficiary of the trust as defined in paragraph (m)(1)(ii)(A), and any portion of the basis in the acquired interest in the trust is determined under section 1012, such interest has been acquired by purchase. This includes a net gift of a beneficial interest in the trust, in which the person acquiring the beneficial interest pays the gift tax. The trust itself may acquire S corporation stock or other property by purchase or in a part-gift, part-sale transaction.

T.D. 8994 (5/13/2002) stated:

Two commentators requested clarification on whether a trust is eligible to be an ESBT if it acquires property in a part-gift, part-sale transaction, such as a gift of encumbered property or a net gift, in which the donor transfers property to a trust provided the trust pays the resulting gift tax. Section 1361(e)(1)(A)(ii) provides that a trust is eligible to be an ESBT only if "no interest in the trust was acquired by purchase." Section 1361(e)(1)(C) defines purchase as "any acquisition if the basis of the property acquired is determined under section 1012." The proposed regulations provide that if any portion of a beneficiary's basis in the beneficiary's interest is determined under section 1012, the beneficiary's interest was acquired by purchase. The final regulations clarify

If an ESBT transfers stock to a qualified voting trust,⁶⁰⁶⁰ the ESBT continues to be treated as the owner for purposes of reporting income and the current beneficiaries of the ESBT continue to be treated as the shareholders for purposes of determining whether the corporation remains eligible to be taxed as an S corporation.⁶⁰⁶¹

If an ESBT is decanted, be sure to file a new ESBT election.⁶⁰⁶²

A trust ceases to be an ESBT on the first day the trust fails to meet the definition of an ESBT, and the last day the trust is treated as an ESBT is the day before the date on which the trust fails to meet the definition of an ESBT.⁶⁰⁶³ A trust ceases to be an ESBT on the first day following the day the trust disposes of all S corporation stock; but, if the trust is using the installment method to report income from the sale or disposition of its stock in an S corporation, the trust ceases to be an ESBT on the day following the earlier of the day the last installment payment is received by the trust or the day the trust disposes of the installment obligation.⁶⁰⁶⁴

III.A.3.e.ii.(b). ESBT Income Taxation - Overview

ESBT income taxation is complicated. An ESBT is treated as two separate trusts for purposes of chapter 1 of subtitle A of the Code.⁶⁰⁶⁵ The portion that consists of stock in one or more S corporations is treated as one trust, and the portion that consists of all the other assets in the trust is treated as a separate trust.⁶⁰⁶⁶ The grantor trust rules trump this treatment;⁶⁰⁶⁷ but, to the extent a nonresident alien is a deemed owner, that portion is reallocated to the nongrantor S portion.⁶⁰⁶⁸ However, the ESBT is treated as a single trust for administrative purposes, such as having one taxpayer identification number and filing one tax return.⁶⁰⁶⁹

The income from the Schedule K-1 that the S corporation files for the trust is separately taxed to the trust at the highest individual income tax rate for that type of income.⁶⁰⁷⁰ Very few deductions are allowed against this income, and the income distribution deduction is not

that the prohibition on purchases applies to purchases of a beneficiary's interest in the trust, not to purchases of property by the trust. A net gift of a beneficial interest in a trust, where the donee pays the gift tax, would be treated as a purchase of a beneficial interest under these rules, while a net gift to the trust itself, where the trustee of the trust pays the gift tax, would not.

The Joint Committee on Taxation, *General Explanation of Tax Legislation Enacted in the 104th Congress* (JCS-12-96), December 18, 1996 (Blue Book), stated:

No interest in the trust may be acquired by purchase. For this purpose, "purchase" means any acquisition of property with a cost basis (determined under sec. 1012). Thus, interests in the trust must be acquired by reason of gift, bequest, etc. The trust itself may acquire property (including stock of an S corporation) by purchase.

⁶⁰⁶⁰ See part III.A.3.b.iv A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It.

⁶⁰⁶¹ Letter Ruling 201837012.

⁶⁰⁶² Letter Ruling 201442047, essential parts of which are reproduced in the text accompanying fn 2985 in part II.J.18.c.ii Tax Consequences of Decanting, viewed decanting as requiring a new ESNT election. The ruling seems to indicate that beneficial interests did not change in the trust merger and that the decanting was solely to change trustee provisions.

available;⁶⁰⁷¹ capital loss carryforwards appear to be allowable.⁶⁰⁷² Two CCAs discussed how ESBTs treat NOLs:

CCA 200734019 involved the following facts:

Trust was created pursuant to the last will and testament of A, who died on Date 1 . Trust, a residuary testamentary trust, was funded on Date 2 with various assets including the stock of X, an S corporation. Prior to A's death, A held the X stock directly. During the administration of A's estate, the estate did not have sufficient income to absorb losses attributable to the X stock which gave rise to a NOL as defined under § 172.

The NOL carryover remained unused upon the termination of A's estate on Date 2 , the same date that Trust was funded. As a residuary testamentary beneficiary of A's estate, Trust succeeded to the NOL carryover that was unused by A's estate at the time of its termination under § 642(h)(1).

Trust qualified as a permissible S corporation shareholder under § 1361(c)(2)(A)(iii) during the 2-year period beginning on Date 2, the date the X stock was transferred to it pursuant to A's will. In order to remain an eligible trust following the 2-year period, the trustee made an election for Trust to be an ESBT under § 1361(c)(3), effective Date 3.

CCA 200734019 asserted:

We conclude that § 641(c)(2)(C) provides a complete list of the items of income, loss, deduction, or credit that the S portion of an ESBT may take into account. Section 642(c)(2)(C), flush language, provides that "no deduction or credit shall be allowed for any amount not described in this paragraph." The NOLs that Trust succeeded to under § 642(h)(1) are not described in § 641(c)(2)(C); therefore, the S portion of Trust is precluded from taking deductions attributable to those NOLs. However, the NOLs should be available as a deduction to the non-S portion Trust following Trust's ESBT election.

CCA 202335014 posited the following facts:

In its X taxable year, an S corporation incurred an NOL that it passed through to its sole shareholder, an ESBT. The ESBT had sufficient basis in its stock to fully claim the loss. However, it did not have sufficient income in its S portion to cover the loss, thus creating an NOL at the trust level. The ESBT carried the NOL to its Y taxable year to use against the income of the S portion.

CCA 202335014 explained:

S corporation shareholders generally take into account in their current taxable year the items their pro rata share of the S corporation's income, loss, deduction, or credit allocated to them under § 1366(a)(1). But the ability to use the losses flowing through in

⁶⁰⁷¹ Code § 641(c)(2).

⁶⁰⁷² Reg. § 1.641(c)-1(d)(3)(i) disallows deductions for losses capital losses that exceed gains by more than \$3,000 under Code § 1211(b) but does not refer to capital loss carryforwards under Code § 1212. Nothing directly addresses whether capital losses incurred before making an ESBT election but relating to S corporation items can be deducted against capital gain incurred while an ESBT.

the current year may be limited for various reasons, including when the shareholder's current year income is less than the amount of the losses, the basis limitation of § 1366(d)(1) applies, or other provisions of law such as the "at-risk" rules under § 465 or the passive loss rules under § 469, and such suspended losses will be deductible in other taxable years only as specifically authorized by the relevant provision.

In the case of an individual S corporation shareholder who is allocated a loss from the corporation, if the amount of the loss exceeds the shareholder's gross income for the taxable year, the shareholder may sustain an NOL, which the shareholder may carry to another taxable year pursuant to § 172(b) and claim an NOL deduction under § 172(a). However, if such a loss is allocated to the S portion of an ESBT shareholder and creates a trust-level NOL, the special rules of § 641(c)(2)(C) are implicated, complicating the question of whether such NOL may be carried over to another taxable year of the trust and taken into account by the S portion in that year.

Uncertainty in this area has been created in part by commentators' speculation as to the meaning of CCA 200734019 (issued 8/24/07). In the CCA, Trust was a residuary testamentary trust created pursuant to the will of A, who died on Date 1. On Date 2, Trust was funded with assets including stock of X, an S corporation, which A had held directly during life. During the administration of A's estate (between Dates 1 and 2), A's estate did not have sufficient income to absorb losses attributable to the X stock, giving rise to an NOL. The NOL carryover remained unused at the termination of the estate and funding of Trust on Date 2, and Trust succeeded to it under § 642(h)(1). Pursuant to § 1361(c)(2)(A)(iii), Trust qualified as an S corporation shareholder for the 2-year period beginning on Date 2. To remain as an eligible shareholder following that period, Trust elected to be an ESBT effective Date 3.

The CCA concludes that § 641(c)(2)(C) provides a complete list of the items of income, loss, deduction, or credit that the S portion of an ESBT may take into account, the flush language specifically denying a deduction or credit for any amount not included in the statutory list. Because the NOLs that Trust succeeded to under § 642(h)(1) are not listed, the S portion was precluded from taking deductions attributable to them. However, the NOLs would be available as a deduction to the non-S portion. The CCA notes that the taxpayer had argued that the NOL should be allocated to the S portion of Trust because it is attributable to losses sustained by the S corporation whose stock is held in that portion. The CCA rejects this taxpayer argument based on the "plain language" of § 641(c)(2)(C).

A standard treatise, *S Corporations Federal Taxation* (May 2020 updated version), Blau, Richard D., Lemons, Bruce N., and Rohman, Thomas P., (hereinafter, "Blau") suggests at § 19:35 a possible government interpretation of the CCA that would forbid the S portion of an ESBT from using NOL carryovers in any situation:

As an additional example, consider that while losses that pass through the S corporation to the ESBT under § 1366 are specifically required to be taken into account in the S portion of the trust, the S portion of the trust may have insufficient income to absorb these losses in a particular year. In that case, the S portion of the trust would carry such losses back forward [sic], presumably, under § 172 to a prior or future year. But, when the losses are carried forward to the future year, the losses arise, not under § 1366, but, rather, under § 172. The Service might argue that since losses under § 172 are not 'items required to be taken into account under § 1366' as

provided in § 641(c)(2)(C), these types of carry forward losses can only be taken into account with respect to the non-S portion of the trust, perhaps resulting in the inability to use the losses against future income of the S corporation passed through to the S portion of the trust. One can argue that such an approach would not be appropriate.

The footnotes to the quoted text cite to the CCA and suggest that its holding could have been reached on other grounds: “One way of dealing with this issue would have been for the Service to simply have noted that since the losses had arisen before the trust was an ESBT, the losses were necessarily part of the non-S portion of the trust.” They then suggest multiple reasons in opposition to a reading of the CCA as disallowing any NOL carryovers to the S portion of an ESBT, which we paraphrase as follows:

1. There is no policy ground for disallowing losses carried forward or back under a section other than § 1366. The statute and regulation only require that they “originate” under § 1366. Section 1.641(c)-1(d)(2)(i) states that rules otherwise applicable to trusts apply in determining the extent to which a loss or deduction may be taken into account by the S portion; under those rules, a trust would normally be able to carry over a § 1366 loss under § 172.
2. Disallowing losses that flowed through under § 1366 in a prior or subsequent year leads to an unreasonable result. If an ESBT owned stock in two S corporations, it would clearly be able to offset flow-through gain from one with a flow-through loss from the other, yet a narrow reading of the CCA would disallow the use of losses from one corporation against gain from that same corporation if they occurred in different years, which the treatise describes as “simply mak[ing] no sense.”
3. As previously noted, the CCA conclusion could have been reached on the alternative ground that the losses were part of the non-S portion because they arose before the trust was an ESBT that had an S portion.²
4. Losses suspended under § 1366(d) because of insufficient current year basis would be treated more favorably than other losses for no apparent reason. The statute explicitly allows these losses to carry forward, whereas losses based on insufficient current year income would be permanently lost.
5. Section 1.641(c)-1(j) does not imply any limit on the use of NOL carryovers by the S portion of an ESBT during its existence, but merely addresses the use of unused NOLs upon the termination of the S portion.

² This point is not convincing. We would have reached the same answer in the CCA, as in this document, if the testamentary trust and the ESBT had existed concurrently.

We agree with the commentators that the holding of the CCA does not require the disallowance of all NOL carryovers by the S portion of an ESBT. The ESBT described in the CCA received the NOL carryovers from another taxpayer, the estate, under the special rule of § 642(h)(1) allowing these items to be carried over to a successor rather than lost at the estate’s termination. The ESBT never had a § 1366 item related to these losses. We believe that if a loss flowing through to the S portion of an ESBT under § 1366 cannot be used in the current taxable year because of the lack of offsetting income, it is nonetheless an item “taken into account” by reason of § 1366 in the prior or

subsequent year in which it is deductible under § 172. To hold otherwise is to defeat the language of both § 1.641(c)-1(d)(2)(i) that the rules “otherwise applicable to trusts apply in determining the extent to which any loss, deduction, or credit may be taken into account,” and of § 1.642(d)-1 providing that the § 172 NOL deduction should be “generally” available other than for listed exceptions. We do not feel compelled to interpret § 641(c)(2)(C) in a manner that anomalously disadvantages certain § 1366 flow-through losses relative to others or ESBTs relative to other S corporation shareholders.

State and local income taxes and administrative expenses directly related to the S portion and those allocated to that portion are taken into account by the S portion.⁶⁰⁷³ These items may be allocated in any manner that is reasonable in light of all the circumstances, including the terms of the governing instrument, applicable local law, and the trustee’s practice with respect to the trust if it is reasonable and consistent.⁶⁰⁷⁴ Note that the \$10,000 limit on state income tax deductions⁶⁰⁷⁵ would apply separately to the S portion and the non-S portion,⁶⁰⁷⁶ allowing the trust to deduct up to \$20,000 in state income tax.

Complications arise if the ESBT is a grantor trust in whole or in part or if the trust is a charitable lead trust or other trust eligible for a charitable income tax deduction. The charitable deduction applies only the charitable contributions passing through a K-1 from the S corporation to the trust and not to contributions made by the trust.⁶⁰⁷⁷ Effective for tax years beginning after December 31, 2017, an ESBT’s contribution deduction does not apply Code § 642(c) but rather uses the Code § 170 limits based on the rules that apply to individuals,⁶⁰⁷⁸ which means that the

⁶⁰⁷³ Reg. § 1.641(c)-1(d)(4)(i), which is specifically authorized by Code § 641(c)(2)(C)(iii).

⁶⁰⁷⁴ Reg. § 1.641(c)-1(h). For an example, see Reg. § 1.641(c)-1(l)(1)(iv).

⁶⁰⁷⁵ For the \$10,000 limit, see the text accompanying fn 2524 in part II.J.3.d Who Benefits Most from Deductions. Because Reg. § 1.641(c)-1(d)(4)(i) says that these taxes are “taken into account,” rather than “deducted,” the regulation does not appear to provide an independent basis for a deduction.

⁶⁰⁷⁶ See fns 6065-6066 in this part III.A.3.e.ii.(b).

⁶⁰⁷⁷ The charitable deduction is not allowed against ESBT income if made directly by the trust. See Code § 641(c)(2)(C) and Reg. § 1.641(c)-1(d)(1), disallowing all deductions except those expressly listed (but the deduction should be allowed against the non-S portion of the trust). However, Reg. § 1.641(c)-1(d)(2)(ii) describes charitable deductions passing through a K-1 the ESBT receives from an S corporation:

Special rule for charitable contributions. If a deduction described in paragraph (d)(2)(i) of this section [referring to K-1 items] is attributable to an amount of the S corporation’s gross income that is paid by the S corporation for a charitable purpose specified in section 170(c) (without regard to section 170(c)(2)(A)), the contribution will be deemed to be paid by the S portion pursuant to the terms of the trust’s governing instrument within the meaning of section 642(c)(1) [the unlimited charitable deduction for trusts]. The limitations of section 681, regarding unrelated business income, apply in determining whether the contribution is deductible in computing the taxable income of the S portion.

Code § 512(e)(1)(B)(i) provides all S corporation K-1 income is per se unrelated business income, so Code § 681 and Reg. § 1.681(a)-2(a) would apply the individual contribution limits, rather than the unlimited Code § 642(c), to such deductions. For more information about Code § 681, mentioned in the last sentence of this regulation, see part II.Q.7.c.i Income Tax Trap - Reduction in Trust’s Charitable Deduction.

⁶⁰⁷⁸ Code § 641(c)(2)(E) provides:

- (i) Section 642(c) shall not apply.
- (ii) For purposes of section 170(b)(1)(G), adjusted gross income shall be computed in the same manner as in the case of an individual, except that the deductions for costs which are paid or

charitable deduction generally is based on the fair market of property donated, in contrast to the Code § 642(c) deduction being limited to the property's adjusted basis,⁶⁰⁷⁹ furthermore, Code § 170 but not Code § 642(c) deductions may be passed through to beneficiaries as excess deductions on termination.⁶⁰⁸⁰ For other differences between Code §§ 170 and 642(c), see part II.J.4.c Charitable Distributions.

For application of the passive loss rules to ESBTs, see part II.K.2.b.v Electing Small Business Trusts (ESBTs) and the Passive Loss Rules.

Regarding the Code § 199A deduction, which generally is 20% of qualified business income, see part II.E.1.f Trusts/Estates and the Code § 199A Deduction, especially part II.E.1.f.ii Electing Small Business Trusts (ESBTs).

If the nongrantor trust portion of an ESBT is included in a person's estate, the ESBT election might prevent a basis step-up of depreciable property.⁶⁰⁸¹

For a corporate split-up involving ESBTs, see Letter Ruling 202033005, when a family business divided when a trust holding it terminated. It is reproduced in part II.Q.7.f.ii.(f) Continuity of Interest.⁶⁰⁸²

III.A.3.e.ii.(c). When ESBT Income Taxation Might Help

ESBT income taxation can be favorable in the right circumstances. For example:

- The trust's income might be taxed at lower state income rates (or not at all) inside the trust than in the beneficiary's hands, or
- The beneficiary might be in the top income tax bracket, and reporting additional income would cause the beneficiary to lose some itemized deductions, AMT exemption, or personal exemptions.

In either case, the ESBT can make distributions to the beneficiary without passing S corporation income to the beneficiary. To maximize this flexibility, the trustee might consider dividing the ESBT into two separate trusts – one that holds S stock and one that holds any distributions that the trustee intends to reinvest, based on the following analysis:

incurred in connection with the administration of the trust and which would not have been incurred if the property were not held in such trust shall be treated as allowable in arriving at adjusted gross income.

The Senate report adopting this rule said:

The Senate amendment provides that the charitable contribution deduction of an ESBT is not determined by the rules generally applicable to trusts but rather by the rules applicable to individuals. Thus, the percentage limitations and carryforward provisions applicable to individuals apply to charitable contributions made by the portion of an ESBT holding S corporation stock.

⁶⁰⁷⁹ See fn 4951 in part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income.

⁶⁰⁸⁰ See text accompanying fn 2576 in part II.J.3.i Planning for Excess Losses.

⁶⁰⁸¹ See part II.J.11.a.ii.(c) Trust vs. Separately Recognized Business Entity Holding Depreciable Property, particularly fns. 2910-2911.

⁶⁰⁸² Beginning with the text accompanying fn 5050.

1. Distributions from a trust that generates investment income (other than S corporation K-1 income) will carry out income to the beneficiary.
2. If the investments are held in a separate trust, that trust can accumulate income and trap the investment income.
3. Therefore, when the trustee of the trust that holds S stock receives a distribution, the trustee would retain enough to pay income tax and administrative expenses, distribute to the beneficiary as appropriate, and then transfer the balance of the cash to the trust that generates investment income.

This three-part analysis applies when the S corporation distributes all of its income. It would not apply if the corporation distributes only enough for its shareholders to pay tax and uses the rest to grow the business (or its marketable securities portfolio). For trusts that are somewhere in between, it might or might not be helpful.

III.A.3.e.iii. Comparing QSSTs to ESBTs

A QSST tends to be used when:

- The trust is a marital trust or other trust whose income is required to be distributed currently to one beneficiary with no other current beneficiary. Under the marital trust rules,⁶⁰⁸³ all income must be distributed annually, which means that, under normal trust rules, the income that the spouse is required to receive is taxable to her, just like any other mandatory income beneficiary.⁶⁰⁸⁴
- The beneficiary's income tax rate is lower than the trust's income tax rate. Because trust income above a modest threshold is taxed at the highest possible rates that apply to individuals,⁶⁰⁸⁵ a beneficiary in a lower bracket should save taxes.

A QSST is not the best for trusts intended to accumulate their income, including trusts with multiple current beneficiaries. In most such cases, such trusts should be ESBTs.

ESBTs might avoid the 3.8% NII tax⁶⁰⁸⁶ by appointing a trustee who is active in the business if the beneficiary is not active in the business.⁶⁰⁸⁷ A QSST's income is not subject to the 3.8% NII tax if the beneficiary is active in the business⁶⁰⁸⁸ or has income below the threshold,⁶⁰⁸⁹ however, because the trustee's participation is what counts when the QSST sells the stock, consider making the trustee active well in advance of a potential sale.⁶⁰⁹⁰ Also note that, if the

⁶⁰⁸³ Code §§ 2056(b)(1) and 2523(b).

⁶⁰⁸⁴ Code § 651.

⁶⁰⁸⁵ Code § 1(e)(2).

⁶⁰⁸⁶ For the 3.8% tax on net investment income (NII), see II.I 3.8% Tax on Excess Net Investment Income. For calculating the tax on an ESBT, see fn 2927 (which also refers to an example in the proposed regulations) and the accompanying text.

⁶⁰⁸⁷ See parts II.K.2.b.i Participation by a Nongrantor Trust: Authority and II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.

⁶⁰⁸⁸ A QSST is a grantor trust deemed owned by the beneficiary. The 3.8% tax looks to the character of the income in the hands of the deemed owner; see fn. 2332.

⁶⁰⁸⁹ See part II.I.3 Tax Based on NII in Excess of Thresholds.

⁶⁰⁹⁰ See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

trust directly or indirectly owns real estate that is rented to the S corporation, a QSST election might complicate a trust's qualification for the self-rental exception, which exception would enable the taxable rental income avoid the 3.8% NII tax, so the trustee might consider retaining some stock in an ESBT, rather than moving all of the stock into a QSST.⁶⁰⁹¹ See also part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.

See part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

Other than possible complexity regarding taxes on the earned but undistributed income, a QSST generally has more flexibility than an ESBT. A QSST offers options for deferring S corporation trust tax elections.⁶⁰⁹² If the trustee of an irrevocable grantor trust makes an ESBT election as a protective measure,⁶⁰⁹³ the trust's ESBT taxation continues after death,⁶⁰⁹⁴ in effect springing into place without any of the savings that other former irrevocable grantor trusts (including QSSTs) have.⁶⁰⁹⁵

On the other hand, ESBTs might provide more flexibility than QSSTs in avoiding adverse taxation of certain related party sales of depreciable or amortizable property or in replicating an inside basis step-up if the stock receives a basis step-up. For related party sales, see part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill). For inside basis step-up opportunities,⁶⁰⁹⁶ see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, explaining how to replicate an inside basis step-up for property to the extent that Code § 1239 is not triggered, as

⁶⁰⁹¹ See part II.I.8.g Structuring Businesses in Response to 3.8% Tax, particularly the text accompanying fns. 2474-2475.

⁶⁰⁹² See text accompanying fns. 6023-6024.

⁶⁰⁹³ A trustee cannot make a conditional ESBT election. Reg. § 1.1361-1(m)(2)(v). If the trustee of a grantor trust makes an unconditional current ESBT election, the election is in effect but does not control the trust's taxation to the extent trumped by the grantor trust rules. Reg. § 1.641(c)-1(c). T.D. 8994 (5/13/2002) includes the government's response to the idea that a protective ESBT election should be available:

One commentator suggested that grantor trusts should be permitted to make protective ESBT elections in light of the uncertain status of some trusts that may be grantor trusts under section 674. The IRS and the Treasury Department continue to believe that a conditional ESBT election that only becomes effective in the event the trust is not a wholly-owned grantor trust should not be available. A conditional ESBT election should not be allowed because the ESBT election must have a fixed effective date. If, in the absence of a conditional ESBT election, the trust is an ineligible shareholder, relief under section 1362(f) may be available for an S corporation. In addition, a trust that qualifies as an ESBT may make an ESBT election notwithstanding that the trust is a wholly-owned grantor trust.

⁶⁰⁹⁴ Reg. § 1.1361-1(m)(8)(iv), Example 4.

⁶⁰⁹⁵ part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death regarding a grantor trust's continuing eligibility to hold S stock for two years after the deemed owner's death. Normal trust income tax rules, which generally are more favorable than ESBT income tax rules, apply during that time. See text accompanying fns. 6070-6072 for ESBT taxation.

⁶⁰⁹⁶ Part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations explains such issues.

well as state income tax issues that can complicate matters when the taxpayer is not a resident of the state in which the property is located.⁶⁰⁹⁷

A QSST complicates purchases made out of earnings, as described in part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST. In ESBTs, interest on the promissory note is deductible only for tax years beginning after December 31, 2006.⁶⁰⁹⁸ A better solution is a trust taxable to its beneficiary under Code § 678.⁶⁰⁹⁹ Also, it might be possible for the income beneficiary to sell S corporation stock to the QSST and not recognize gain or loss on the sale.⁶¹⁰⁰

III.A.3.e.iv. Flexible Trust Design When Holding S Corporation Stock

Consider a GST-exempt trust with only one beneficiary, with discretionary distributions of income and principal under an ascertainable standard. An independent person is authorized to direct that, for a period of no less than 36 months, all of the income is required to be distributed, based on the following:

- The minimum period of time between ESBT and QSST conversions is 36 months. This minimum period applies between conversions but does not apply to the first conversion. In other words, once the first ESBT or QSST election is made, a conversion to the alternate form (QSST or ESBT) can be made at any time. However, once one converted from a QSST to an ESBT or vice versa, the 36-month period applies in reversing the conversion.⁶¹⁰¹ But for this process, Reg. § 1.1361-1(m)(6) provides:

An ESBT election may be revoked only with the consent of the Commissioner. The application for consent to revoke the election must be submitted to the Internal Revenue Service in the form of a letter ruling request under the appropriate revenue procedure.

- Mandatory distributions ensure no missteps in distributing income to maintain QSST status, because mandatory income trusts are not required to prove actual distributions of all of the income. However, a trust that actually distributes all of its income qualifies even without a mandatory distribution clause.⁶¹⁰²
- Before converting, split the trust if it has assets other than S corporation stock, so that the other assets are not subjected to the QSST distribution scheme.
- The independent person would also be authorized to turn off the mandatory income direction for any trust taxable year that begins after the date the mandatory income direction is turned off. (Otherwise, the IRS might argue that the mandatory income provision is illusory because it could get turned off at any time during the year.)

⁶⁰⁹⁷ See part II.H.8.a.ii State Income Tax Disconnect.

⁶⁰⁹⁸ Reg. § 1.641(c)-1(d)(4)(ii) provides, (ii) *Special rule for certain interest*. Interest paid by the trust on money borrowed by the trust to purchase stock in an S corporation is allocated to the S portion but is not a deductible administrative expense for purposes of determining the taxable income of the S portion. This was repealed for tax years beginning after December 31, 2006 by Code § 641(c)(2)(C)(iv).

⁶⁰⁹⁹ See fn 5885.

⁶¹⁰⁰ See part III.B.2.i.xiv QSST as an Alternative Form of Beneficiary Deemed-Owned trust.

⁶¹⁰¹ Reg. §§ 1.1361-1(j)(12)(iii), 1.1361-1(m)(7)(iii).

⁶¹⁰² See fn. 5994.

This would open up the opportunity to toggle between QSST and ESBT taxation, while allowing any ESBT income to accumulate inside an environment protected from estate taxes and creditors. After a trust has been an ESBT for 36 months, it may be divided into a separate trust for each beneficiary, and each new trust can separately either continue as an ESBT or become subject to a QSST election.⁶¹⁰³ Thus, every three years the trustee can consider how much of the trust should be a QSST and how much an ESBT and then ask the independent person to adjust the mandatory income direction as appropriate. This toggling decision would take into account the expected annual S corporation income, the beneficiary's adjusted gross income, and the beneficiary's participation in the business (see below).

In making these elections, consider part III.A.3.c.iii Deadlines for QSST and ESBT Elections.

Note that toggling only affects whether income distributions to that beneficiary may or must be mandatory or discretionary; the beneficiary must remain the trust's sole beneficiary of income⁶¹⁰⁴ and principal⁶¹⁰⁵ during the beneficiary's life.⁶¹⁰⁶ Thus, if the beneficiary has an inter vivos limited power of appointment, the beneficiary can hold the power of appointment during an initial ESBT period,⁶¹⁰⁷ but once the trust converts to a QSST the beneficiary must permanently renounce the power of appointment.

S corporation business income is free from the 3.8% tax on net investment income (NII) if the recipient significantly participates in the S corporation's business activity.⁶¹⁰⁸ For a QSST, one would look to the beneficiary's participation, whereas for an ESBT the IRS would look to the participation of a trustee;⁶¹⁰⁹ however, for a QSST, the IRS would look to trustee participation when the trust sells S corporation stock or the S corporation sells substantially all of its business assets.⁶¹¹⁰ If the beneficiary materially participates in the business, then either QSST or ESBT taxation could avoid the tax, the latter if the beneficiary is appointed as a trustee for purposes of holding the S corporation stock and satisfies the rules for trustee participation.⁶¹¹¹ If the beneficiary does not materially participate in the business, the S corporation income would constitute NII; however, the beneficiary might be in a sufficiently low tax bracket that the 3.8% tax on NII might not apply to the beneficiary at all.

Additionally, if the beneficiary already owns stock in the S corporation, the trust might buy the stock from the beneficiary, perhaps without any capital gain tax on the sale.⁶¹¹²

⁶¹⁰³ Letter Ruling 201122003.

⁶¹⁰⁴ Code § 1361(d)(3)(A)(i).

⁶¹⁰⁵ Code § 1361(d)(3)(A)(ii).

⁶¹⁰⁶ Rev. Rul. 93-31 provides that even a remote possibility of these conditions not being met would disqualify the trust from being a QSST. See fn 6010 in part III.A.3.e.i.(a) QSSTs Generally.

⁶¹⁰⁷ See text accompanying fns. 6054-6055.

⁶¹⁰⁸ See part II.I.8 Application of 3.8% Tax to Business Income (application of the 3.8% tax on net investment income), especially part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.

⁶¹⁰⁹ See parts II.J Fiduciary Income Taxation (application of the 3.8% tax on net investment income) (particularly fn. 2332 and later sections of part II.J dealing with the sale of QSST or ESBT stock) and II.K.2 Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business (determining when a trust materially participates).

⁶¹¹⁰ See part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).

⁶¹¹¹ See parts II.K.2.b.i Participation by a Nongrantor Trust: Authority and II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.

⁶¹¹² See part III.B.2.i.xiv QSST as an Alternative Form of Beneficiary Deemed-Owned trust.

Finally, QSSTs provide more post-mortem tax options than ESBTs, so pre-mortem toggling to QSST status can provide this enhanced flexibility.⁶¹¹³

III.A.3.e.v. Converting a Multiple Beneficiary ESBT into One or More QSSTs

III.A.3.e.v.(a). Strategic Issues

Every dollar of ESBT income is taxed at 37% federal income tax and 3.8% tax on net investment income (“NII”).⁶¹¹⁴ The beneficiaries’ federal income tax brackets might be significantly lower,⁶¹¹⁵ and the NII tax would not apply except to the extent that their modified adjusted gross income exceeds \$200,000 for a single individual or \$250,000 for a married person filing jointly.

However, any trustee and tax preparation fees might be deductible by the beneficiaries as miscellaneous itemized deductions (and disallowed for AMT purposes) rather than being deducted directly against the S corporation income.⁶¹¹⁶

This might increase the state income tax on the business income. As an ESBT, only the trust’s state income tax posture is considered. Depending on the ESBT’s state of residence, the ESBT might not be responsible for tax on the trust’s income (particularly investment income) that is not sourced to a particular state. If the trust is converted to QSSTs, each beneficiary would need to file an income tax return for each state in which the S corporation does business, reporting his or her share of each state’s income, thereby complicating each beneficiary’s income tax return preparation. Additionally, each beneficiary who lives in a state with income tax would need to pay state income tax on his or her share of income, ameliorated in whole or in part by a credit for income taxes paid to other states.

The ESBT might have been accumulating income or perhaps distributing income to separate GST-exempt trusts for beneficiaries, the latter so that each beneficiary decides on a case-by-case basis whether to accumulate income in a protected trust. This accumulation might be important for estate tax reasons, as well as perhaps for nontax reasons. Now, however:

- With the \$5+ million estate tax exemption, this accumulation strategy has less estate tax benefit, if the beneficiaries do not have estates near the exemption.
- Trusts that accumulate income face the same increase in federal income tax and NII tax as described above if they are ESBTs or have more than \$12,000⁶¹¹⁷ in taxable income, so the accumulation strategy would have additional income tax costs.

⁶¹¹³ See text accompanying fn. 6092.

⁶¹¹⁴ See part II.I 3.8% Tax on Excess Net Investment Income. It’s possible that some ESBT income might be below the adjusted gross income threshold. See part II.J.14 Application of 3.8% NII Tax to ESBTs.

⁶¹¹⁵ Consider the effect of phase-outs based on adjusted gross when evaluating the beneficiaries’ income tax rates.

⁶¹¹⁶ Reg. § 1.67-2T(b)(1).

⁶¹¹⁷ \$12,750 in 2019 per Rev. Proc. 2018-57, § 3.01, Table 5; presumably higher in future years.

III.A.3.e.v.(b). Implementation

The trustee might consider the following:

- Evaluate the trustee's authority to divide trusts and to convert separate trusts into QSSTs. If the trust has beneficiaries of more than one generation (e.g., children and grandchildren), the trustee needs to consider any fiduciary duties to the lower generations (e.g., grandchildren) in dividing the trust into separate trusts for the upper generation (e.g., children). The trustee might obtain ratification from all adult beneficiaries to protect the trustee. The parent (who is not a beneficiary) of any minor or unborn descendant would sign on behalf of that descendant; this can be problematic if the child who is a beneficiary is divorced or otherwise having marital troubles. A consent by a beneficiary might raise Code § 2702 issues; this is less of a concern if the beneficiary had not been receiving distributions and never expected to receive distributions before that beneficiary's parent's death.
- If centralized management is a concern:
 - Determine whether the trustee is authorized to commingle the QSSTs, treating them as separate shares.⁶¹¹⁸ The trustee might maintain a single new bank account for new deposits, which would then either distribute anything it receives or reimburse the existing account for administrative expenses the trust incurs. The division of shares would be done simply by recording the shares on a spreadsheet.
 - See whether the beneficiaries have the right to change the trustees of their separate trusts, which rights they might not have had in the main trust.
- Determine whether paying 100% of annual trustee fees and administrative expenses regarding the QSST portion out of income reasonably and fairly balances the interests of the income and remainder beneficiaries, as the trust might not have another source to pay those fees; the trustee would want to reserve the right to allocate them to principal in the year of sale.⁶¹¹⁹ Normally such fees and expenses are allocated one-half to income and one-half to one-half to principal.⁶¹²⁰ Perhaps the corporation would pay the fees, but

⁶¹¹⁸ This is permitted under the last sentence of Code § 1361(d)(3) and Reg. § 1.1361-1(j)(3).

⁶¹¹⁹ Gain on sale of stock, including any gain reported on a K-1 form the S corporation issues reporting gain by reason of a Code § 338(h)(10) election to treat a stock sale as an asset sale, is taxable to the trust, rather than the being taxable as the grantor trust portion. See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and III.A.3.e.i QSSTs, particularly the text accompanying fns. 6017-6019, dealing with sales of not only S corporation stock but also of an S corporation's business in an asset sale. For additional planning issues, see parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business and II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI). Of course, the trust might obtain a distribution deduction by distributing the sale proceeds; see part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI), especially part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus.

⁶¹²⁰ Section 501 of the Uniform Principal & Income Act.

note that the payment might need to be a separately stated K-1 item, if the character of the fees would change on a beneficiary's income tax return.⁶¹²¹

III.A.3.e.v.(c). Timing Tax Deductions in Year of Conversion

Consider which expenses would be better deductions against ESBT or QSST income and pay them in the appropriate time period.

K-1 items need to be pro-rated.⁶¹²²

Presumably, administrative expenses relating to S corporation income would be allocated to the time before and after the conversion and any expenses allocable to the QSST portion would be deductible by the beneficiary.

III.A.3.e.vi. QSST as a Grantor Trust; Sales to QSSTs

Because the beneficiary pays tax on not only the S corporation's distributed income but also its undistributed income, a QSST can be a way to:

- Avoid high trust income tax rates and take advantage of a full run through the beneficiary's graduated tax rates.
- Allow the beneficiary to deduct a loss before the trust's termination, if the stock has sufficient basis.
- Have the beneficiary pay tax on any reinvested earnings used to grow the S corporation, increasing the trust's value and reducing the beneficiary's gross estate.
- Prevent the grantor of a trust for a spouse from being taxed on any reinvested taxable income after divorce.⁶¹²³ If the beneficiary/former spouse may also receive principal distributions, the beneficiary may elect to treat the trust as a QSST, thereby ensuring that the taxable items of the trust's assets inside an S corporation owned by the trust are taxable to the beneficiary, whether or not actually distributed to the beneficiary.⁶¹²⁴
- Allow the beneficiary to sell S corporation stock (and, indirectly, other assets) to the trust on what appears to be a tax-free basis.⁶¹²⁵ A sale to an irrevocable grantor trust is a powerful estate planning technique.⁶¹²⁶ Clients sometimes balk at selling assets to a trust where they are not beneficiaries, because they might need the assets for their living expenses. For a client who refuses to part with all of the enjoyment of sufficient assets, consider suggesting

⁶¹²¹ See text accompanying fn. 6116 and Code § 1366(a)(1)(A).

⁶¹²² See part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

⁶¹²³ Code § 677 treats the grantor as owners of any items that can be distributed to or held for eventual distribution to the grantor or the grantor's spouse. See part III.B.2.h.ix Code § 682 Limitations on Grantor Trust Treatment.

⁶¹²⁴ See fn. 5996, noting the contrast between paragraphs (ii) and (iii) within Example (10).

⁶¹²⁵ See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).

⁶¹²⁶ See part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

that he or she sell assets to a trust in which he or she is a beneficiary and is the deemed owner - a beneficiary deemed-owned trust.⁶¹²⁷

The grantor trust aspects can be powerful planning techniques but are also subject to some significant disadvantages.⁶¹²⁸

Beneficiary deemed-owned trusts involve complex tax issues, including the risk that the Internal Revenue Service, which generally has stopped issuing private letter rulings regarding such trusts,⁶¹²⁹ might at some point take a position inconsistent with its many past favorable private letter rulings. The complexity involved often includes a sale being highly leveraged (sometimes using a trust funded with no more than \$5,000), which might invite IRS scrutiny.

QSSTs do not face the funding issues that apply to many other beneficiary deemed-owned trusts. They can be funded very substantially and still be entitled to grantor trust treatment.

III.A.3.e.vi.(a). Grantor Trust Issues Involved in a Sale of S Stock to a QSST

If a QSST buys the beneficiary's stock from the beneficiary after making a QSST election for its then-existing S stock (issued by the same corporation), that would be a disregarded transaction for income tax purposes, following the general principle under Rev. Rul. 85-13 that a transaction between a trust and its deemed owner (for income tax purposes) is disregarded (for income tax purposes).⁶¹³⁰

The regulation that treats the beneficiary as the Code § 678(a) provides that the trust's selling or distributing the stock is attributable to the trust, not the beneficiary,⁶¹³¹ but does not discuss the consequences of the trust buying S corporation stock. This regulation overrode Rev. Rul. 92-84, which applied grantor trust treatment to a QSST's sale of S corporation stock; however, the logic of Rev. Rul. 92-84 might continue to apply (as a matter of good analysis, not as a matter of precedent) to the extent that the regulation is silent. The preamble to the regulation⁶¹³² overrode Rev. Rul. 92-84 for practical reasons: if the trust no longer holds S stock during the deferred consummation of an installment sale, how could QSST treatment apply? That should not be a concern when the trust is buying stock. Although the IRS might have concerns about the asymmetry involved (the trust buying stock from the beneficiary having a different result than

⁶¹²⁷ See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

⁶¹²⁸ See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

⁶¹²⁹ Rev. Proc. 2015-3, Section 4.01(39), provides that ordinarily the IRS will not rule on: Whether a person will be treated as the owner of any portion of a trust over which that person has a power to withdraw the trust property (or had such power prior to a release or modification, but retains other powers which would cause that person to be the owner of the trust under § 671 if the person were the grantor), other than a power which would constitute a general power of appointment within the meaning of § 2041, if the trust purchases the property from that person with a note and the value of the assets with which the trust was funded by the grantor is nominal compared to the value of the property purchased.

⁶¹³⁰ Code § 1361(d)(1)(B) provides, for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the [QSST] election ... is made.

⁶¹³¹ For gain on sale of stock or assets and for related planning opportunities, see text accompanying fns. 6017-6019.

⁶¹³² T.D. 8600.

the trust selling stock to the beneficiary), those concerns would not appear to be supported by the IRS' official pronouncements.⁶¹³³

If an income beneficiary who sells S corporation stock to an existing QSST that already owns stock in the same S corporation, the above analysis might be more comfortable. Three companion private letter rulings, in approving the merger of one QSST into another, used analysis that supports this concept.⁶¹³⁴

Under 1.1361-1(j)(7), the X shares which make up the corpus of Exempt QSST A and Exempt QSST B are treated as directly owned by Y. Any transfer of the X shares, pursuant to a merger under Article 5.6, would effectively be a transfer of the shares from Y to Y.

What is the tax treatment of interest payments on a promissory note a QSST uses to buy stock in an S corporation?⁶¹³⁵ The IRS has taken the position that, when the QSST buys stock from a

⁶¹³³ This asymmetry already exists under Rev. Rul. 85-13. In that ruling, initially the trust was not a grantor trust. The grantor bought stock from the trust in exchange for an unsecured promissory note. The note's existence is what made the trust a grantor trust deemed owned by its grantor and caused the transaction to be disregarded. On the other hand, if the trust had bought stock from its grantor, its grantor would have recognized gain on the sale, because a promissory note owed by the trust to the grantor would not have triggered grantor trust status. This asymmetry did not prevent that ruling from becoming the IRS' formal position.

Notice 97-24 points out that Rev. Rul. 85-13 avoids assets receiving a basis step-up. In the case of a beneficiary selling to a QSST, if the beneficiary did not pay capital gain tax on the sale to the trust, then the stock the trust acquires, which will be outside of the estate tax system, will not receive a new basis and therefore will be taxed more highly to the trust if sold after beneficiary's death (or after any other event terminating grantor trust status).

Based on a long line of law, Rev. Rul. 85-13 held that the deemed owner was the deemed owner of the trust's property. See fn. 6567.

The bottom line is that the beneficiary would be deemed to own the stock that the beneficiary sells to the trust both before and after the proposed transaction. One cannot have a recognition event when one sells closely-held business stock, which Rev. Rul. 90-7 expressly held is deemed owned by a trust's deemed owner, to oneself. Rev. Rul. 85-13 recognized this longstanding principle when it reasoned:

A transaction cannot be recognized as a sale for federal income tax purposes if the same person is treated as owning the purported consideration both before and after the transaction. See *Dobson v. Commissioner*, 1 B.T.A. 1082 (1925).

The *Dobson* case itself involved closely-held business stock. Rev. Rul. 2007-13, reproduced in fn 4359 in part II.Q.4.b.i Transfer for Value Rule Generally, reaffirmed this concept, and it should be applied to the sale to a QSST as well.

⁶¹³⁴ Letter Rulings 200441013, 200441014, and 200441015.

⁶¹³⁵ In all fairness, the beneficiary should get the deduction, especially in light of the separate share rules under Code § 663. However, an argument can be made that only S corporation K-1 items are treated as part of the Code § 678 share allocated to the beneficiary. Code § 1361(d)(1)(B) provides, "for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the election under paragraph (2) is made...." On the other hand, Code §§ 1361(d)(1)(B) and 641(c)(1)(A) use very similar language. Therefore, when an issue is not expressly addressed by authority, the ESBT and QSST rules should be read consistently. The principle behind the ESBT regulation quoted in fn 6098 tends to support the beneficiary's deduction of interest under Code § 1361(d)(1)(B) (or a disregard of the interest income and deduction under Code § 678 if the seller is the beneficiary), because the Regulation's allocation of the interest to the S portion remains intact.

third party using a promissory note, the note is part of the S corporation portion that is deemed owned by the QSST's beneficiary and therefore the interest is deductible by the beneficiary.⁶¹³⁶ Informal conversations indicated that this position was the result of discussions at the highest levels of IRS policy-makers. Interest expense is deductible on Schedule E, Part II of the beneficiary's individual income tax return.⁶¹³⁷

This position - that the promissory note is part of the S corporation portion that the beneficiary is deemed to own - gives me confidence that a beneficiary's sale to a QSST would be disregarded under Rev. Rul. 85-13 because the beneficiary would be considered to be selling to himself or herself.⁶¹³⁸

Furthermore, often a trust that holds stock in an S corporation is split off as a separate QSST, which never accumulates any income, because all of the income is distributed to the beneficiary. Allocating income to a nonexistent non-S portion would not make sense in those situations. That contrasts with ESBTs, where generally there is no reason for the S stock to be held in a separate trust. Allocating the interest deduction to the non-S corporation portion of the trust would result in a mismatch, in that the interest the trust pays is allocated to income that the beneficiary, not the trust, is treated as owning for income tax purposes. It would appear to run counter to the spirit of the debt-tracing rules of Reg. § 1.163-8T, which would characterize the interest as related to the S corporation. If the interest is allocated to the non-S corporation portion of the trust, its deductibility should relate to the nature of the income passing through on the K-1 the trust receives from the company. To the extent the K-1 income is income from a trade or business, presumably the interest would be expense from trade or business that would generate a net operating loss carryover if the trust did not have sufficient other income.

Reg. § 1.163-8T(a)(4)(i). Notice 89-35 supports this approach:

In the case of debt proceeds allocated under section 1.163-8T to the purchase of an interest in a passthrough entity (other than by way of a contribution to the capital of the entity), the debt proceeds and the associated interest expense shall be allocated among all the assets of the entity using any reasonable method. Reasonable methods of allocating debt among the assets of a passthrough entity ordinarily include a pro-rata allocation based on the fair market value, book value, or adjusted basis of the assets, reduced by any debt of the passthrough entity or the owner allocated to such assets.

If the trust generates a net operating loss (NOL) carryforward due to the interest expense, be sure not to make an ESBT election, as Chief Counsel Advice 200734019 takes the position that the NOL carryforward is not deductible against ESBT income.

⁶¹³⁶ CCA 201327009 allows the beneficiary to deduct the interest when the QSST buys from a third party using a promissory note. The IRS declined to rule on the loan's effect under the at-risk rules out of concern that taxpayers would set up a Code § 465(c)(4) device to limit liability. Because the trust had no other assets, debt tracing was not a concern, and all of the interest was allocated to the S corporation activity. The IRS also declined to address the passive loss rules.

⁶¹³⁷ The 2013 instructions to Form 1040, Schedule E, Part II say:

Interest expense relating to the acquisition of shares in an S corporation may be fully deductible on Schedule E. For details, see Pub. 535.

Publication 535, for use in preparing 2013 returns, says to report interest expenses from S corporation business borrowing on Schedule E (Form 1040), line 28, entering interest expense and the name of the S corporation in column (a) and the amount in column (h). Presumably this would also apply to loans to a QSST to acquire stock in an S corporation.

⁶¹³⁸ This background on CCA 201327009 results from informal discussions with an attorney, who has since left the IRS, when I asked whether the IRS would consider approving a sale to a QSST. The IRS informally indicated that it would decline to issue such a ruling if I sought it, because it was not totally certain of the result and does not wish to encourage sales to Code § 678 trusts. It was suggested that the IRS never would have approved a sale to an irrevocable grantor trust if it had realized that the technique would become so popular.

III.A.3.e.vi.(b). Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made)

Using QSSTs involves challenges that do not apply to other Code § 678 trusts. Consider the disadvantages of an S corporation as an investment vehicle that is shared among family members:

- Take Care to Make Formation of Corporation Nontaxable. See part II.M.2 Buying into or Forming a Corporation.
- Inability to Divide S Corporation. An S corporation that does not engage in a trade or business would not be able to be divided income-tax free under Code § 355.⁶¹³⁹ This would trap all family members in a single investment entity, unable to manage investments suitable for each person's goals.
- Tax Cost of Distributing Investments. A distribution of investments would be taxed as a sale.⁶¹⁴⁰ Thus, distributing marketable securities to family members so that they go their separate ways would subject them to capital gain tax on the deemed sale of the investments. Distributing depreciable property might subject them to tax on ordinary income.⁶¹⁴¹

However, pre-mortem planning might help. Suppose the trust is a credit shelter trust or a GST-exempt trust and the beneficiary's estate is subject to estate tax. If the QSST sells its investments that have unrealized gain, the income (capital gain) tax liability will be a debt deductible on the beneficiary's estate tax return. Harvesting gain would prevent the distribution of securities from being a taxable event at the shareholder level. However, the distribution of securities in a corporation would generate income tax to the extent that the fair market value of the distribution exceeds the basis (and might generate dividend income if and to the extent the corporation had been a C corporation and the distribution constituted a distribution of earnings and profits); on the other hand, the recognition of gain on the sale of securities would increase the stock's basis.⁶¹⁴² Just be sure that the pre-mortem gain harvesting is not pursuant to a plan of liquidation⁶¹⁴³ or a sale of stock combined with a Code § 338(h)(10) election;⁶¹⁴⁴ either event would subject to sale of assets to stock at the trust's level, rather than the beneficiary's level.⁶¹⁴⁵

⁶¹³⁹ See part II.Q.7.f Corporate Division, including part II.Q.7.f.iii Active Business Requirement for Code § 355.

⁶¹⁴⁰ See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

⁶¹⁴¹ See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property.

⁶¹⁴² See part II.Q.7.b Redemptions or Distributions Involving S Corporations.

⁶¹⁴³ See fn. 6018, found within part III.A.3.e.i.(a) QSSTs Generally. This is important because an S corporation that used be a C corporation can avoid dividend taxation by engaging in a liquidation; see fn. 4887, found within part II.Q.7.a.vii Corporate Liquidation.

⁶¹⁴⁴ See fn. 6019, found within part III.A.3.e.i.(a) QSSTs Generally.

⁶¹⁴⁵ In addition to the citations within fns. 6143 and 6144, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).

- Inability to Swap. Although a beneficiary does not recognize gain or loss when selling S corporation stock to a QSST, the trust would recognize income on selling S corporation stock back to the beneficiary.⁶¹⁴⁶
- All Income Must Be Distributed. A QSST must distribute to its beneficiary all of its trust accounting income. This can be controlled by the S corporation not making distributions to the trust. The IRS might argue that the beneficiary's failure to compel the trustee to compel a distribution from the S corporation constitutes a gift. Note, however, that the IRS considers 3%-5% to be a reasonable range for income distributions, so the IRS should view any distributions within that range as sufficient.⁶¹⁴⁷ If distributions were below this range, the IRS would argue that the lapsing withdrawal right 5-and-5 safe harbor of Code § 2514(e) that appears to protect such a small lapse is calculated in a way that does not provide much protection.⁶¹⁴⁸
- Personal Use Assets. Placing personal use assets inside an S corporation would require the charging of rent. The S corporation would recognize rental income, and those paying rent would not be able to deduct that rent. If the beneficiary uses a trust asset for personal purposes, he does not need to pay rent, since the point of the trust is to benefit him.

These limitations are not imposed on Code § 678(a)(2) trusts. When their assets are divided among family members, the division is done on a tax-free basis and they can each go their separate ways quite easily.

Consider who pays income tax for the year in which the beneficiary dies.⁶¹⁴⁹ These considerations also apply when the beneficiary of a Code § 678(a)(2) trust dies, although the beneficiary of the latter has a broader power of appointment than the former.

Income tax difficulties in splitting an S corporation after the beneficiary's death might be addressed as follows:

- Form a Partnership. By forming an entity taxed as a partnership with the beneficiary, other family members, or other trusts, a QSST might be able to access investment opportunities not otherwise available to it or might be able to facilitate their access to investment opportunities not available to them. Although such a partnership could preserve the expected annual cash flow, the commitment to retaining funds in the partnership would reduce the fair market value of the S corporation's partnership interest. This value reduction would also reduce the tax if the corporation distributes some or all of assets when the QSST divides upon the beneficiary's death. Such a partnership should be formed well in advance of the beneficiary's death.⁶¹⁵⁰ When the beneficiary dies, perhaps the S corporation would distribute some of its partnership interests right away so that the trust could immediately fund part of the bequests; then, later, after the trustee is satisfied that all tax and other fiduciary liabilities have been resolved, the S corporation could distribute the remaining partnership interests.⁶¹⁵¹ Furthermore, the partnership could later divide in a variety of ways

⁶¹⁴⁶ Reg. § 1.1361-1(j)(8); see fns. 6017-6019.

⁶¹⁴⁷ See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, especially the text accompanying fn. 2779.

⁶¹⁴⁸ See part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.

⁶¹⁴⁹ See part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

⁶¹⁵⁰ See part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially fn 5126.

⁶¹⁵¹ Distributing in stages would tend to alleviate the concerns described in fn 5126.

on a tax-free basis,⁶¹⁵² so that each family member can implement his or her own investment strategy over time; however, if the family members do not have strategies that either are consistent with each other's or complement each other's, pursuing different investment strategies would tend to require asset sales that might generate capital gain tax.⁶¹⁵³

- **Create Separate Corporations.** Suppose a trustee decides to contribute its assets to an S corporation with the expectation that the beneficiary will make a QSST election. Instead, consider forming a separate S corporation for the future benefit of each of the beneficiary's children. When the beneficiary dies, each of the beneficiary's children will be allocated a separate S corporation, thereby eliminating the need to divide the corporation or distribute its assets. This solution merely postpones the issue, because these issues would need to be addressed when a child of the beneficiary dies (or if a child predeceases the beneficiary, but that postponement might be sufficiently beneficial to address concerns for a while).
- **Marital Trust QSST Doesn't Have This Problem.** If a marital deduction trust that holds 100% of an S corporation and the beneficiary makes a QSST election, then the S corporation stock gets a basis step-up, which essentially passes through in a nontaxable (because of the basis step-up) liquidation, subject to certain qualifications; see part II.H.8.a Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly, subject to the caveats in part II.H.8.a.i.(b) Challenging Issues When S Corporation Liquidates Holding Depreciable Property or Other Ordinary Income Property. This is one of the few times when I like to have an LLC elect S corporation status, because the S corporation status can be revoked, resulting in a constructive liquidation, retroactively within 75 days after the beneficiary spouse's death.

See also parts II.A.2.d.ii Estate Planning and Income Tax Disadvantages of S Corporations, II.A.2.d.iii Which Type of Entity for Which Situation? and III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.e.vi.(c). Required Structure for a Sale to a QSST (Including Possible Pitfalls)

In QSSTs, all income must be distributed to the beneficiary.⁶¹⁵⁴ Therefore, at first glance, it would appear impossible for a QSST to use its S corporation distributions to buy stock.

However, if a QSST buys stock in a secured sale in which it pledges all of its S corporation distributions, the trust never receives the distributions, so the trust has no income receipts to

⁶¹⁵² See part II.Q.8 Exiting From or Dividing a Partnership.

⁶¹⁵³ If the strategies are consistent with each other's, then the partnership could simply divide pro rata. If the strategies complement each other's, then each person could take the assets that interest him or her. Anything else would require post-division adjustments, most likely accomplished through sales.

⁶¹⁵⁴ Reg. § 1.1361-1(j)(1)(i) provides

All of the income (within the meaning of § 1.643(b)-1) of the trust is distributed (or is required to be distributed) currently to one individual who is a citizen or resident of the United States. For purposes of the preceding sentence, unless otherwise provided under local law (including pertinent provisions of the governing instrument that are effective under local law), income of the trust includes distributions to the trust from the S corporation for the taxable year in question, but does not include the trust's pro rata share of the S corporation's items of income, loss, deduction, or credit determined under section 1366....

pay to the beneficiary.⁶¹⁵⁵ Private letter rulings have readily accepted this theory for mandatory income trusts;⁶¹⁵⁶ this theory should apply to a discretionary income trust.⁶¹⁵⁷

A significant disadvantage is that this method might take twice as long as a normal sale to a grantor trust. In most states, the trustee must transfer from principal to income an amount equal to the income paid to reduce the principal balance of the note (as used in this part III.A.3.e.vi.(c), the “adjustment amount”).⁶¹⁵⁸ Thus, although note payments complete the sale (the obligation to the beneficiary in the beneficiary’s capacity as a creditor), they create an obligation that the trust owes to the beneficiary as a beneficiary:

- Worst Case Scenario – Simplistic view. In other words, first the trust repays the note, then the trust repays the beneficiary the income that was diverted from the beneficiary (as a beneficiary) to pay the note. Thus, the original note principal is not removed from the estate tax system until both the note and the adjustment amount to the beneficiary are fully paid. However, if the adjustment amount is not expected to be paid made for a while, consider that the possible inclusion of the adjustment amount in the beneficiary’s estate might very well be the present value of that principal distribution, which might be significantly less than the amount of the principal that is owed.
- Actual Law – Not So Bad? The trust’s obligation is to transfer to income principal equal to the adjustment amount. This means that, when the trust receives cash generally classified as principal, it must reclassify that cash as income, to the extent of the adjustment amount.

⁶¹⁵⁵ The trust would need to pay any future cash receipts of principal to the beneficiary to make up for this diversion of amounts that would otherwise constitute trust accounting income. Adopting Section 502(b) of the Uniform Principal and Income Act (last amended or revised in 2008; see [http://www.uniformlawcommission.com/Act.aspx?title=Principal and Income Amendments \(2008\)](http://www.uniformlawcommission.com/Act.aspx?title=Principal%20and%20Income%20Amendments%20(2008))), RSMo section 469.453.2 provides:

If a principal asset is encumbered with an obligation that requires income from that asset to be paid directly to the creditor, the trustee shall transfer from principal to income an amount equal to the income paid to the creditor in reduction of the principal balance of the obligation.

⁶¹⁵⁶ This accounting treatment is consistent with Letter Rulings 200140040 (which not only diverted dividends to repay the seller but also required that the trust pay additional purchase price if it resold the stock within a certain period of time after buying the stock), 200140043, and 200140046 (trust’s purchases from another shareholder), as well as 9140055 (distributions used to pay bank loan used to buy stock), which rulings essentially treated the repayment of principal on the notes as income disbursements rather than principal disbursements. See also Letter Ruling 9639013, permitting the use of income to repay notes on a seller-financed sale to QSSTs. CCA 201327009 did not expressly consider this issue; however, based on the facts and conclusion, it implicitly assumed that the use of S corporation distributions to repay the note was permitted.

Other rulings dealing with principal and income issues include Letter Rulings 9140055 (beneficiary repayment of trust distribution to pay interest QSST owed bank), 200446007 (deemed dividend is not fiduciary accounting income and therefore not required to be distributed), and 200451021 (redemption treated as distribution for income tax purposes, but proceeds were principal not required to be distributed).

⁶¹⁵⁷ What if the trust would be relying on the payment of actual income to satisfy Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i)? One might be concerned that the trust would be receiving no income and therefore would be making no distributions of income. On the other hand, all of the company’s distributions that are payable to the trust would in fact wind up in the hands of the trust’s sole beneficiary; it will simply get there as a note repayment, rather than as a distribution. Thus, relying on the payment of actual income would not appear to violate the spirit of Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i).

⁶¹⁵⁸ See fn. 6155.

That principal receipt might never happen during the beneficiary's life, and the trust might never be required to pay the beneficiary.

Consider the following ways to repay this additional obligation, if it exists:

1. Suppose the trust is a discretionary income trust. Perhaps an independent trustee would be able to toggle on and off the mandatory income feature (which, of course, is not possible in a one-lung QTIP plan⁶¹⁵⁹ but might be possible using a *Clayton*-QTIP plan).⁶¹⁶⁰ After the note is repaid, the independent trustee might turn off the mandatory income obligation. If the beneficiary never needs the income under the standards provided by the trust, the trust might accumulate funds thereafter and never pay cash equal to the full adjustment amount. However, the IRS might argue that such a modification undermines the point of recharacterizing the principal as income,⁶¹⁶¹ so consider a compromise: Instead of the trustee accumulating income under the discretionary standards and perhaps never paying the adjustment amount, the trustee and beneficiary come to the following agreement: The trustee agrees to pay future income to the beneficiary to the extent of the adjustment amount, notwithstanding the fact that the trustee has determined that the beneficiary would not receive income under the trust's new distribution standards. That income is payable until the earlier of the beneficiary's death or amounts equal to the adjustment amount have been paid. The trustee might sign a revocable letter directing the company to pay the beneficiary directly any distributions of income (up to the adjustment amount) that normally would have gone to the trust.
2. If the trust is a mandatory income trust, see whether the corporation will make a distribution to all shareholders in partial liquidation of the entity or merely redeem the trust's stock, depending whether it is important to keep proportionate stock ownership. Such a distribution or redemption might very well constitute a nontaxable return of AAA (reinvested S corporation taxable income).⁶¹⁶² For example, a partial liquidation would be a principal distribution for trust accounting purposes (even if it is a distribution of AAA for income tax purposes) that could then be used to repay the principal obligation.
3. If the trust has other assets, then gain from the sale of other assets would be used to repay this principal obligation. Being transferred to income⁶¹⁶³ or being used to determine a distribution⁶¹⁶⁴ should cause the capital gain to be taxed to the beneficiary.

When drafting a trust that might engage in such a transaction, keep in mind the above issue. Perhaps the trustee might have some flexibility in allocating receipts and disbursements

⁶¹⁵⁹ For an explanation of a one-lung plan, including some of its advantages and disadvantages, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.

⁶¹⁶⁰ For a description of a *Clayton*-QTIP plan, see the paragraph accompanying fn. 6176.

⁶¹⁶¹ Reg. § 1.643(b)-1 provides, "Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized." See part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially the text accompanying fn. 2778.

⁶¹⁶² See part II.Q.7.b Redemptions or Distributions Involving S Corporations.

⁶¹⁶³ See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law.

⁶¹⁶⁴ See part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

between principal and income?⁶¹⁶⁵ Perhaps the trust might have a provision requiring the trustee to give the beneficiary notice of a right to principal and provide that the right to that principal adjustment lapses as provided in Code § 2514(e)?

Consider whether the IRS might attack the sale as follows:

- The IRS might argue that stock's value exceeded the sale price; therefore, the IRS might argue, the seller made a gift to a trust that benefits the seller, triggering Code § 2036 inclusion.
- One might consider using a defined value clause,⁶¹⁶⁶ instructing the trustee to distribute any excess value to a separate share of the trust, of which 10% would be structured as a completed gift (no power of appointment over the remainder) and 90% would be structured as an incomplete gift (power of appointment over the remainder - perhaps even a presently exercisable withdrawal right) or a sale. With adequate disclosure, the gift tax statute of limitations would run regarding how much comprises the completed gift and incomplete gift portions.⁶¹⁶⁷ For a fully completed gift, see part III.B.2.i.xviii Sample Beneficiary Deemed-Owned Trust.
- The separate share of the trust would be treated as a separate trust for QSST purposes; however, the separate share's treatment as a grantor trust as to the seller⁶¹⁶⁸ would make a QSST election unnecessary during the seller's life.
- Might the fact that the separate share is created only in the event of an audit cause that share to be disrespected? It did for a charitable gift (see part III.B.3.h *Moore*), but charitable gifts have stricter standards than noncharitable gifts.

Such a possible Code § 2036 attack may deter using this technique. If one is trying to move miscellaneous assets by contributing them to an S corporation and selling the S corporation stock to a trust, consider instead using a preferred partnership.⁶¹⁶⁹ However, if one has an operating business in an S corporation, a preferred partnership is not available⁶¹⁷⁰ unless the transferor is the sole owner or all of the owners have the same estate planning goal.⁶¹⁷¹

III.A.3.e.vi.(d). Using a QSST to Buy Stock When Using a "One-Lung" Marital Deduction Plan

One of my favorite estate planning tools for married couples is to bequeath the entire residue into a trust that can qualify to the QTIP marital deduction. The executor may elect a marital deduction with respect to none, part, or all of the trust. For an explanation of some of the

⁶¹⁶⁵ For flexibility in allocating between income and principal, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, which includes a sample general clause (not geared toward the QSST sale issue) as well as the regulations governing such allocations.

⁶¹⁶⁶ See part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.

⁶¹⁶⁷ See part III.B.4 Adequate Disclosure on Gift Tax Returns.

⁶¹⁶⁸ Code § 677.

⁶¹⁶⁹ See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

⁶¹⁷⁰ A partnership is not an eligible owner of a S stock. Code § 1361(b)(1)(B); see part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity.

⁶¹⁷¹ If the transferor is the sole owner or all owners have the same estate planning goals, the S corporation itself could contribute its assets to a preferred partnership. See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

advantages and disadvantages of such a plan, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.

More recently, I have been including in the trust the authority for an independent trustee to make distributions for the surviving spouse's welfare. If the surviving spouse is the trustee, he or she may appoint as a co-trustee a person who is not a related or subordinate party,⁶¹⁷² who could make a distribution for welfare and then resign.

Suppose the decedent's estate tax exemption is insufficient to cover all of the decedent's S corporation stock. Some S corporation stock is allocated to a trust excluded from the estate tax system (a "nonmarital trust"), and the rest is allocated to a marital deduction trust (a "marital trust"). The surviving spouse elects QSST treatment for each trust.⁶¹⁷³ The marital trust distributes its S corporation stock to the surviving spouse, who then sells it to the nonmarital trust in exchange for a promissory note.

If the client has an independent trustee who is quite comfortable with the surviving spouse and the remainderman, one might consider using *Clayton*-QTIP planning.⁶¹⁷⁴ *Clayton*-QTIP planning is where the portion that is not elected QTIP goes to a trust that has different dispositive provisions than the portion that is elected QTIP.⁶¹⁷⁵ In the nonmarital trust, an independent trustee would be able to distribute income for the surviving spouse's welfare (in addition to any other desirable discretionary distributions for the surviving spouse). This would help address a particular drawback to sales to QSSTs.⁶¹⁷⁶

III.A.3.e.vi.(e). Converting Existing Trust to a QSST to Obtain Beneficiary Deemed-Owned Trust Status

Suppose the client is the beneficiary of an existing GST-exempt trust with discretionary distributions. Consider converting the trust into a QSST, by whatever legal means are available to do so. Consider the ideas discussed in parts III.A.3.e.iv Flexible Trust Design and III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs.

Then the client can sell the client's S corporation stock to the QSST.

If the client does not have an S corporation, the client could contribute assets to an S corporation and then sell the S corporation stock to the trust. Alternatively, an existing GST-exempt trust with only one beneficiary might simply form an S corporation and the beneficiary make a QSST election, effectively converting the trust to a beneficiary deemed-owned trust.⁶¹⁷⁷ However, in either case, be sure to consider exit strategies upon the client's death, as described

⁶¹⁷² As fn. 6758 explains, the spouse's power to appoint a trustee who can distribute for the spouse's welfare will not cause the spouse to hold a general power of appointment if the trustee is not a related or subordinate party, as defined in Code § 672(c) (see fn. 2556).

⁶¹⁷³ Using this strategy, a QSST election is required for the nonmarital trust but not for the marital trust. However, making such an election for the marital trust tends to simplify income tax issues.

⁶¹⁷⁴ Authorizing an independent trustee to be the executor with authority to make the QTIP election should avoid any attack the IRS might make whether a spouse who is the executor had made a gift to the extent that failure to make a QTIP election causes the surviving spouse to lose his or her mandatory income rights.

⁶¹⁷⁵ Reg. § 20.2056(b)-7(d)(3) authorizes this in response to case law.

⁶¹⁷⁶ See fn. 6160.

⁶¹⁷⁷ This would be ideal if the trust is already a mandatory income trust. If the trust is not a mandatory income trust, then complying with the requirement to distribute all income might be tricky.

in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

III.A.3.e.vi.(f). QSST to Convert Terminating Trust to GST-Exempt Life Trust

Suppose the client created a trust for children that terminates at various ages. The client could create a QSST for each adult child.

See part III.A.3.e.vi.(e) Converting Existing Trust to a QSST for considerations involved in using this strategy.

III.A.4. Trust Accounting Income Regarding Business Interests

When a trust holds a business entity interest, complicated accounting and tax issues can arise. One of the main reasons for these complexities is the difference between accounting income and taxable income. Accounting income helps determine the amount of distributions a trust is required to make, under the governing instrument or state law, which in turn may determine how much taxable income is carried out to the beneficiaries of the trust. The Code defines “income required to be distributed currently” as the fiduciary accounting income that must be distributed currently pursuant to the governing instrument or state law. Because fiduciary accounting income is determined by state law or the governing instrument, differences between taxable income and accounting income generally arise. An example of such a difference would be capital gains. Capital gains are usually principal for fiduciary accounting purposes, but taxable income for income tax purposes.

III.A.4.a. General Strategies Regarding Fiduciary Income Taxation of Business Interests

Trusts and estates reach the top income tax brackets and are subjected to the 3.8% tax on net investment income⁶¹⁷⁸ far more rapidly than beneficiaries. See part II.J Fiduciary Income Taxation.

Part III.F Hypothetical illustrates the issues described in this part III.A.4 Trust Accounting Income Regarding Business Interests. That income tax dynamic may subject income to a higher tax bracket than if all of the income were taxed in a QSST, in which the beneficiary is the deemed owner of all of the K-1 income.⁶¹⁷⁹ Thus:

- If the trust holds S corporation stock, consider facilitating a QSST election.
- If the trust holds a partnership interest, consider placing the partnership interest in an S corporation (or in a slightly more elaborate structure)⁶¹⁸⁰ and facilitating a QSST election.
- If one wants to hold a business interest in trust and keep it there but is fine with all distributions or sale proceeds the trust receives being automatically distributed to the beneficiary, consider creating a unit investment trust (part II.D.4.a Investment Trusts) and giving interests in the trust to one or more beneficiaries. For qualification to hold

⁶¹⁷⁸ See part II.I 3.8% Tax on Excess Net Investment Income.

⁶¹⁷⁹ See part III.A.3.e.i QSSTs.

⁶¹⁸⁰ The trustee might place the partnership interest into an LLC, owned by one S corporation for each expected remainderman. See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).

S corporation stock, see part III.A.3.b.iv A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It and III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust (see discussion of separate share trusts).

III.A.4.b. Example for Trust Accounting Income Regarding Business Interests

A similar problem can arise when a trust holds a partnership interest. Often a partnership may report significant earnings on its K-1s, but may distribute a much smaller amount in cash to its partners. For example, a trust could receive a partnership K-1 with \$100,000 of taxable income but may only receive \$60,000 of cash as a distribution. The \$60,000 is all the accounting income, because the amount distributed does not exceed the amount of income attributable to the trust.⁶¹⁸¹ When this happens, the trust will have distributable income equal to \$60,000, but will be unable to distribute the additional \$40,000 of “phantom income” from the K-1, meaning the trust will be taxed on the \$40,000. This can lead to cash flow problems when the trust has no other income, since once the trust distributes the \$60,000 to the beneficiary it will have no available cash to pay the taxes. The Uniform Principal and Income Act⁶¹⁸² provides a solution to this problem. Under old section 505(c)(1), a tax that is required to be paid by a trustee on the trust’s share of an entity’s taxable income is proportionally divided between principal and income based on the receipts allocated to each.⁶¹⁸³ Thus, the trustee will be able to keep some of the cash to pay the taxes on the trust’s undistributed income. See below for the 2008 clarification to section 505 that makes sure that the trustee has enough money to pay the tax.

Another example, with a flowchart, is at part III.F.2 Trust Accounting and Taxation.

III.A.4.c. Distributions from Entities as Trust Accounting Income or Principal

Generally, cash distributions from a business entity are trust accounting income unless they are in partial or complete liquidation. Below are how the Uniform Principal & Income Act (“UPIA”) and Uniform Fiduciary Income & Principal Act (“UFIPA”) treat a trust’s receipt of distributions. UFIPA is the Uniform Law Commission’s 2018 overhaul of UPIA; check applicable state law to see which of them applies. I was ABA Advisor to the 2008 amendments to UPIA, which did not change the rules below (except for part III.A.4.d Distributions from Pass-Through Entities Used to Pay Income Tax) and an ACTEC observer and an active participant in drafting UFIPA.

Before reviewing these rules, note that their application is just a first step. Consider also parts:

- III.A.4.d Distributions from Pass-Through Entities Used to Pay Income Tax (when the trustee may use trust accounting income to pay tax attributable to the business entity’s reinvested income, even if the trust requires trust accounting income to be distributed),
- II.J.8.c.i.(a) Power to Adjust (reclassifying principal as income and vice versa), and
- II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules (when the business

⁶¹⁸¹ Uniform Principal and Income Act § 401(b). See footnote 6182.

⁶¹⁸² Citations to the Uniform Principal and Income Act are to the version adopted in 1997, as amended or revised in 2000, published August 21, 2003, by the National Conference of Commissioners on Uniform State Laws.

⁶¹⁸³ See also R.S.Mo. § 469.459.3(1).

entity is sold, reimbursing an income beneficiary burdened by part III.A.4.d - see first bullet point above).

UPIA § 401, Character of Receipts,” provides:

- (a) In this section, “entity” means a corporation, partnership, limited liability company, regulated investment company, real estate investment trust, common trust fund, or any other organization in which a trustee has an interest other than a trust or estate to which Section 402 applies, a business or activity to which Section 403 applies, or an asset-backed security to which Section 415 applies.
- (b) Except as otherwise provided in this section, a trustee shall allocate to income money received from an entity.
- (c) A trustee shall allocate the following receipts from an entity to principal:
 - (1) property other than money;
 - (2) money received in one distribution or a series of related distributions in exchange for part or all of a trust’s interest in the entity;
 - (3) money received in total or partial liquidation of the entity; and
 - (4) money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.
- (d) Money is received in partial liquidation:
 - (1) to the extent that the entity, at or near the time of a distribution, indicates that it is a distribution in partial liquidation; or
 - (2) if the total amount of money and property received in a distribution or series of related distributions is greater than 20 percent of the entity’s gross assets, as shown by the entity’s year-end financial statements immediately preceding the initial receipt.
- (e) Money is not received in partial liquidation, nor may it be taken into account under subsection (d)(2), to the extent that it does not exceed the amount of income tax that a trustee or beneficiary must pay on taxable income of the entity that distributes the money.
- (f) A trustee may rely upon a statement made by an entity about the source or character of a distribution if the statement is made at or near the time of distribution by the entity’s board of directors or other person or group of persons authorized to exercise powers to pay money or transfer property comparable to those of a corporation’s board of directors.

The official Comment to UPIA § 401 explains:

Entities to which Section 401 applies. The reference to partnerships in Section

401(a) is intended to include all forms of partnerships, including limited partnerships, limited liability partnerships, and variants that have slightly different names and characteristics from State to State. The section does not apply, however, to receipts from an interest in property that a trust owns as a tenant in common with one or more co-owners, nor would it apply to an interest in a joint venture if, under applicable law, the trust's interest is regarded as that of a tenant in common.

Capital gain dividends. Under the Internal Revenue Code and the Income Tax Regulations, a "capital gain dividend" from a mutual fund or real estate investment trust is the excess of the fund's or trust's net long-term capital gain over its net short-term capital loss. As a result, a capital gain dividend does not include any net short-term capital gain, and cash received by a trust because of a net short-term capital gain is income under this Act.

Reinvested dividends. If a trustee elects (or continues an election made by its predecessor) to reinvest dividends in shares of stock of a distributing corporation or fund, whether evidenced by new certificates or entries on the books of the distributing entity, the new shares would be principal. Making or continuing such an election would be equivalent to deciding under Section 104 to transfer income to principal in order to comply with Section 103(b). However, if the trustee makes or continues the election for a reason other than to comply with Section 103(b), e.g., to make an investment without incurring brokerage commissions, the trustee should transfer cash from principal to income in an amount equal to the reinvested dividends.

Distribution of property. The 1962 Act describes a number of types of property that would be principal if distributed by a corporation. This becomes unwieldy in a section that applies to both corporations and all other entities. By stating that principal includes the distribution of any property other than money, Section 401 embraces all of the items enumerated in Section 6 of the 1962 Act as well as any other form of nonmonetary distribution not specifically mentioned in that Act.

Partial liquidations. Under subsection (d)(1), any distribution designated by the entity as a partial liquidating distribution is principal regardless of the percentage of total assets that it represents. If a distribution exceeds 20% of the entity's gross assets, the entire distribution is a partial liquidation under subsection (d)(2) whether or not the entity describes it as a partial liquidation. In determining whether a distribution is greater than 20% of the gross assets, the portion of the distribution that does not exceed the amount of income tax that the trustee or a beneficiary must pay on the entity's taxable income is ignored.

Other large distributions. A cash distribution may be quite large (for example, more than 10% but not more than 20% of the entity's gross assets) and have characteristics that suggest it should be treated as principal rather than income. For example, an entity may have received cash from a source other than the conduct of its normal business operations because it sold an investment asset; or because it sold a business asset other than one held for sale to customers in the normal course of its business and did not replace it; or it borrowed a large sum of money and secured the repayment of the loan with a substantial asset; or a principal source of its cash was from assets such as mineral interests, 90% of which would have been allocated to principal if the trust had owned the assets directly. In such a case the trustee, after considering the total return from the portfolio as a whole and the income component of that return, may decide to

exercise the power under Section 104(a) to make an adjustment between income and principal, subject to the limitations in Section 104(c).

UFIPA § 401, "Character of Receipts from Entity," provides more details about factual inquiries or assumptions the trustee may make and adds clarity to various terms. It says:

(a) In this section:

(1) "Capital distribution" means an entity distribution of money which is a:

(A) return of capital; or

(B) distribution in total or partial liquidation of the entity.

(2) "Entity":

(A) means a corporation, partnership, limited liability company, regulated investment company, real estate investment trust, common trust fund, or any other organization or arrangement in which a fiduciary owns or holds an interest, whether or not the entity is a taxpayer for federal income tax purposes; and

(B) does not include:

(i) a trust or estate to which Section 402 applies;

(ii) a business or other activity to which Section 403 applies which is not conducted by an entity described in subparagraph (A);

(iii) an asset-backed security; or

(iv) an instrument or arrangement to which Section 416 applies.

(3) "Entity distribution" means a payment or transfer by an entity made to a person in the person's capacity as an owner or holder of an interest in the entity.

(b) In this section, an attribute or action of an entity includes an attribute or action of any other entity in which the entity owns or holds an interest, including an interest owned or held indirectly through another entity.

(c) Except as otherwise provided in subsection (d)(2) through (4), a fiduciary shall allocate to income:

(1) money received in an entity distribution; and

(2) tangible personal property of nominal value received from the entity.

(d) A fiduciary shall allocate to principal:

(1) property received in an entity distribution which is not:

(A) money; or

- (B) tangible personal property of nominal value;
- (2) money received in an entity distribution in an exchange for part or all of the fiduciary's interest in the entity, to the extent the entity distribution reduces the fiduciary's interest in the entity relative to the interests of other persons that own or hold interests in the entity;
- (3) money received in an entity distribution that the fiduciary determines or estimates is a capital distribution; and
- (4) money received in an entity distribution from an entity that is:
 - (A) a regulated investment company or real estate investment trust if the money received is a capital gain dividend for federal income tax purposes; or
 - (B) treated for federal income tax purposes comparably to the treatment described in subparagraph (A).
- (e) A fiduciary may determine or estimate that money received in an entity distribution is a capital distribution:
 - (1) by relying without inquiry or investigation on a characterization of the entity distribution provided by or on behalf of the entity, unless the fiduciary:
 - (A) determines, on the basis of information known to the fiduciary, that the characterization is or may be incorrect; or
 - (B) owns or holds more than 50 percent of the voting interest in the entity;
 - (2) by determining or estimating, on the basis of information known to the fiduciary or provided to the fiduciary by or on behalf of the entity, that the total amount of money and property received by the fiduciary in the entity distribution or a series of related entity distributions is or will be greater than 20 percent of the fair market value of the fiduciary's interest in the entity; or
 - (3) if neither paragraph (1) nor (2) applies, by considering the factors in subsection (f) and the information known to the fiduciary or provided to the fiduciary by or on behalf of the entity.
- (f) In making a determination or estimate under subsection (e)(3), a fiduciary may consider:
 - (1) a characterization of an entity distribution provided by or on behalf of the entity;
 - (2) the amount of money or property received in:
 - (A) the entity distribution; or
 - (B) what the fiduciary determines is or will be a series of related entity distributions;

(3) the amount described in paragraph (2) compared to the amount the fiduciary determines or estimates is, during the current or preceding accounting periods:

(A) the entity's operating income;

(B) the proceeds of the entity's sale or other disposition of:

(i) all or part of the business or other activity conducted by the entity;

(ii) one or more business assets that are not sold to customers in the ordinary course of the business or other activity conducted by the entity;
or

(iii) one or more assets other than business assets, unless the entity's primary activity is to invest in assets to realize gain on the disposition of all or some of the assets;

(C) if the entity's primary activity is to invest in assets to realize gain on the disposition of all or some of the assets, the gain realized on the disposition;

(D) the entity's regular, periodic entity distributions;

(E) the amount of money the entity has accumulated;

(F) the amount of money the entity has borrowed;

(G) the amount of money the entity has received from the sources described in Sections 407, 410, 411, and 412; and

(H) the amount of money the entity has received from a source not otherwise described in this paragraph; and

(4) any other factor the fiduciary determines is relevant.

(g) If, after applying subsections (c) through (f), a fiduciary determines that a part of an entity distribution is a capital distribution but is in doubt about the amount of the entity distribution which is a capital distribution, the fiduciary shall allocate to principal the amount of the entity distribution which is in doubt.

(h) If a fiduciary receives additional information about the application of this section to an entity distribution before the fiduciary has paid part of the entity distribution to a beneficiary, the fiduciary may consider the additional information before making the payment to the beneficiary and may change a decision to make the payment to the beneficiary.

(i) If a fiduciary receives additional information about the application of this section to an entity distribution after the fiduciary has paid part of the entity distribution to a beneficiary, the fiduciary is not required to change or recover the payment to the beneficiary but may consider that information in determining whether to exercise the power to adjust under Section 203.

The official Comment to UFIPA § 401 explains:

Entities to which Section 401 applies. Section 401 covers distributions from all types of entities. For example, the reference to partnerships in Section 401(a)(2)(A) includes all forms of partnerships, including limited partnerships, limited liability partnerships, and variants that have slightly different names and characteristics from state to state. And subsection (b) provides that the same is true of a chain or chains of entities, whether the entities are the same or different and no matter how many tiers the entities represent. This section does not apply, however, to receipts from an interest in property that a fiduciary owns as a tenant-in-common with one or more coowners, nor would it apply to an interest in a joint venture if, under applicable law, the interest is regarded as that of a tenant-in-common.

Section 401(a)(2)(A) of the 2018 Act clarifies that Section 401 applies to an entity that meets these tests whether or not the entity is respected for federal income tax purposes. In Section 401(a)(2)(B) the 2018 Act retains the exceptions from the application of Section 401 in Section 401(a) of the 1997 Act, except that it clarifies that it does not exclude a business that might appear to be described in Section 403 if it is conducted in an entity that is subject to Section 401 under Section 401(a)(2)(A). This clarification and a similar clarification to Section 403(a)(2) prevent what might otherwise seem to be a circularity between Sections 401 and 403, with each of those sections excluding an entity described in the other section.

Terms. The 2018 Act introduces the term “entity distribution” to refer to distributions from entities to which Section 401 applies and the term “capital distribution” to refer to distributions of money, rather than other property, which nevertheless are treated as principal. “Capital distribution” replaces the former term “total or partial liquidation” and includes a “return of capital.”

Reinvested dividends. If a fiduciary elects (or continues an election made by a predecessor) to reinvest dividends in shares of stock of a distributing corporation or fund, whether evidenced by new certificates or entries on the books of the distributing entity, the new shares would be principal. Making or continuing such an election would be equivalent to making an adjustment from income to principal under Section 203. If the fiduciary makes or continues the election for a reason other than to comply with the standards of Section 203, such as making an investment without incurring brokerage commissions, the fiduciary has the option of considering a corresponding transfer of cash from principal to income.

Distribution of property. The 1962 Act described a number of types of property that would be principal if distributed by a corporation. This became unwieldy in a section (former Section 401) that applied to both corporations and all other entities. By stating that the distribution of any property other than money is generally allocated to principal, subsection (d)(1) embraces all of the items enumerated in Section 6 of the 1962 Act as well as any other form of nonmonetary distribution not specifically mentioned in that act. The new exception in subsections (c)(2) and (d)(1)(B) for “tangible personal property of nominal value” would cover, for example, an item of food sent to owners (and perhaps others such as customers, suppliers, and employees) at a holiday time. It is not necessarily given in proportion to ownership interests, and as a practical matter it often needs to be allocated to income, in effect, so it can be conveniently distributed and enjoyed.

With respect to large distributions of cash, the 2018 Act is sensitive to the fact that the fiduciary might not have enough information to properly categorize the distribution. Subsection (d)(2) addresses the relatively easy case of a likely non-pro-rata distribution that reduces the fiduciary's proportionate interest in the entity – in effect, a redemption. Subsection (d)(4) retains the special rule for capital gain dividends from a regulated investment company (RIC) or real estate investment trust (REIT) that was added in 1997, and adds a reference to other distributions that federal income tax law treats comparably.

Subsection (d)(2) retains the rule that a distribution in exchange for part of all of the fiduciary's interest in the entity is principal, but clarifies that this rule applies only to the extent the transaction reduces the fiduciary's proportional interest in the entity relative to other owners. It does not necessarily apply, for example, to a corporate reorganization in which shareholders exchange their stock for other stock. If all owners receive proportionate distributions, the distribution to the fiduciary is tested as described in the next paragraph.

With regard to receipts of money that could be what the act refers to as a “capital distribution” – a return of capital or a distribution in partial liquidation of the entity – subsections (d)(3), (e), and (f) provide some help with what the act acknowledges might be only an “estimate” by the fiduciary. For this purpose, subsection (e) provides that the fiduciary may first rely on how the entity describes the distribution, unless the fiduciary possesses information that casts doubt on that description or the fiduciary is a majority voting owner, in which case the fiduciary may have a duty to inquire or investigate further. Next, the fiduciary may be satisfied with treating the distribution as a capital distribution if information the entity provides, together with other information the fiduciary knows, indicates that the distribution exceeds 20 percent of the fair market value of the fiduciary's interest. This 20 percent test is retained from the 1997 Act, except that (i) it is a permissive safe harbor and not a presumption and (ii) the 1997 Act applied the 20 percent test to “the entity's gross assets” and the 2018 Act applies it to “the fair market value of the fiduciary's interest in the entity,” thus focusing the inquiry on the distribution to that fiduciary rather than all distributions made by the entity. For this purpose, what the available information indicates is or will be a series of distributions is aggregated. Finally, under subsection (e)(3), the fiduciary may make a determination or estimate based on factors in subsection (f), including but not limited to the entity's characterization of the distribution, that may help point the fiduciary to a distribution that is extraordinary enough under the circumstances to be treated as a capital distribution. But it is not possible to describe a “capital distribution” with reference to objective characteristics alone, and fiduciaries will have to exercise some judgment in making the necessary determinations and estimates.

Because estimates may be necessary and are expressly contemplated by the act, subsections (h) and (i) help the fiduciary know how to make distributions on the basis of incomplete information and, as a last resort, cite the power to adjust between income and principal in Section 203.

III.A.4.d. Distributions from Pass-Through Entities Used to Pay Income Tax

In the summer of 2008, the Uniform Law Commission amended Section 505 of the Uniform Principal & Income Act (the “UPAIA”); see part III.A.4.d.vi Appendix to 505 Discussion. The amendment responds to litigation over the income tax burden when a mandatory income trust

holds an interest in a partnership or other pass-through entity. This article addresses the concerns underlying the changes, explains the changes, and discusses the planning implications of this change and related issues.

When a mandatory income trust holds an interest in a partnership or other flow-through entity, coordinating the UPAIA with fiduciary income tax rules can get tricky. The changes to UPAIA section 505 provide needed clarity regarding the treatment of taxes paid regarding a trust's distributive share of an entity's income; however, they do not address the other issues described in part II.J.5 Mandatory Income Trusts.

The Uniform Law Commission approved an overhaul of UPAIA in 2018. The Uniform Fiduciary Income and Principal Act ("UFIPA") retained UPAIA § 505 but renumbered it as UFIPA § 506. I was an ACTEC observer and was actively involved with the drafting committee.

III.A.4.d.i. Concerns Underlying the UPAIA Section 505 Changes

Before discussing the technical reasons for change, one must understand some of the basic income tax rules governing business entities, the rules governing the income taxation of trusts, and how they interact.

Income Tax Rules Governing Business Entities

Three different paradigms apply to business entities. A traditional corporation (also known as a "C corporation") pays income taxes on its own income. When it distributes its current or accumulated earnings, the distribution is taxed to its shareholders as a dividend. It might also make one or more distributions in partial or total liquidation, which is taxed to its shareholders as a sale of part or all of the stock rather than a dividend if certain tax law requirements are satisfied.

The Tax Reform Act of 1986 prevented C corporations from liquidating without both the shareholders and corporation being taxed. These new rules encouraged those who owned C corporations to convert them to S corporations. S corporation owners are taxed on the corporation's income rather than the corporation being taxed on the income. An example will help explain this difference:

- **C Corporation.** Suppose the corporation has one shareholder, A. A invests \$1,000x. In Year 1, the corporation earns \$100,000x and pays \$40,000x in income tax, leaving \$60,000x of after-tax earnings and a total of \$61,000x of cash. The corporation liquidates, distributing \$61,000x to A. A pays income tax of \$12,000x on the excess of the \$61,000x proceeds over the \$1,000x that A invested. After paying taxes, A has \$49,000x (\$61,000x liquidation proceeds minus \$12,000x taxes that A paid).
- **S corporation.** Same situation, only an S election is in place. In Year 1, the corporation pays no income tax on its earnings; instead, A receives Schedule K-1 from the corporation reporting \$100,000x of gross income and pays \$40,000x income tax on the corporation's earnings. Code § 1366(c). The corporation distributes \$40,000x to A to pay the income taxes, so A has really not used any of A's own money to pay the income tax. Code § 1368(b)(1) provides that this distribution is not taxed because it does not exceed the shareholder's tax basis. However, A's investment in the corporation has increased for income tax purposes. A's basis is now \$61,000x, which is the \$1,000x that A invested, plus the \$100,000x

income on which A was taxed, minus the \$40,000x that the corporation distributed to A to pay A's income tax. Code § 1367. The corporation then liquidates, distributing \$61,000x to A (\$1,000x that A invested, plus \$100,000x earnings, minus \$40,000x distributed to A to pay A's income taxes). A keeps the entire \$61,000x without paying any income tax on the distribution, because A received the same amount as A is deemed to have invested.

In the example, the sole shareholder has received more using an S corporation than using a C corporation. The \$40,000x that the S corporation distributed to A really was not intended as a benefit to A; instead, it was reimbursing A for the taxes that A paid on the corporation's income. The \$40,000x is referred to below as a "tax distribution."

C and S corporations are the first two of the three paradigms. Partnerships (including limited liability companies taxed as partnerships) have similar effects on the taxation of owners for purposes of UPAIA section 505. Therefore, this article refers to S corporations and partnerships as "flow-through" entities and uses "K-1 income" to describe the income from the flow-through entity that an owner needs to report. For reasons beyond the scope of this article, partnerships have much more flexible income tax rules regarding distributions from the entity to owners.

In the example above, let's compare distributions from C corporations with distributions from flow-through entities.

- The owner of a C corporation receives no distribution.
- The owner of a pass-through entity receives a tax distribution, so that the owner retains no cash after paying income taxes.

Suppose that, in the example above, the owner is a mandatory income trust:

- A trust that owns stock in a C corporation has no trust accounting income because it has no receipts.
- How much trust accounting income does a trust that owns a pass-through entity have that must be distributed to the beneficiary? To achieve parity with the C corporation scenario, the income taxes paid using the tax distribution would be charged against income, so that again the beneficiary receives nothing. However, that result was not clear under UPAIA section 505 before the amendment.

One must understand trust income taxation to fully understand how UPAIA section 505 works.

Income Tax Rules Governing Trusts

Suppose a trust receives Schedule K-1 reporting \$100,000x income. Ignoring the trust's small exemption amount and very modest use of lower tax brackets, the trust would be required to pay \$40,000x of income tax, assuming a 40% federal and state income tax rate. However, if the trust distributes \$100,000x to its beneficiary, it receives a \$100,000x income distribution deduction and pays no income tax;⁶¹⁸⁴ instead, the trust gives the beneficiary a Schedule K-1 reporting \$100,000x income, and the beneficiary pays income tax on the \$100,000x

⁶¹⁸⁴ Code §§ 651, 661.

Schedule K-1 income (to the extent not offset by the beneficiary's deductions, exemptions, etc.).⁶¹⁸⁵

Carrying this example further, suppose the trust receives only a \$40,000x tax distribution and does not have other funds to distribute to the beneficiary. If the trust distributes the \$40,000x to the beneficiary, then the trust receives a \$40,000x income distribution deduction and must pay \$24,000x income tax (\$60,000x multiplied by 40%) on its remaining \$60,000x (\$100,000x Schedule K-1 income minus \$40,000x income distribution deduction) taxable income. However, the trustee has no funds with which to pay the \$24,000x income tax. In fact, the only way to prevent the trustee from not being able to pay income tax with respect to the Schedule K-1 income would be for the trustee to retain the entire tax distribution.

What are the principles that apply to determining the income distribution deduction described above? First, compute the amount of trust's distributable net income (taxable income, with certain adjustments). Next, determine the amount required to be distributed and any additional amounts actually distributed to the beneficiary. The income distribution deduction, which is always taxable to the beneficiary through the Schedule K-1 the trustee gives to the beneficiary, is the lesser of the distributable net income or the distributions described above. The rules become more complicated when one considers capital gains, tax-exempt income, or other similar issues, but the framework is similar.

Now let's apply this to a mandatory income trust. The trust accounting income, determined under the UPAIA, is an amount required to be distributed using the above principles. Some people assume that the Schedule K-1 income is the amount deemed distributed. That assumption is false. For income tax purposes, the amount of income required to be distributed is based on state law fiduciary accounting income.⁶¹⁸⁶ UPAIA Section 102(4) provides that "'income' means money or property that a fiduciary receives as a current return...." Thus, income would not exceed "money or property that a fiduciary receives" even if the Schedule K-1 income is higher.

In a trust that receives a \$40,000x tax distribution, the trust has \$40,000x of income receipts.⁶¹⁸⁷ How much income tax should the trustee deduct from the \$40,000x receipt to determine the income that must be distributed? UPAIA section 505 answers that question. However, the answer was unclear and bred litigation, because beneficiaries receiving no cash from a mandatory income trust were understandably upset. Below, this article explains the UPAIA change and how attorneys drafting estate plans or representing disappointed beneficiaries might advise their clients in light of these changes and existing law.

III.A.4.d.ii. Explanation of the UPAIA Section 505 Changes

Before this amendment, the language of UPAIA section 505 was ambiguous regarding accounting for tax distributions. The amendment clarifies the overriding principle that the trustee of a mandatory income trust uses tax distributions to the extent necessary to pay income taxes and distributes any remaining income to the beneficiary. The official comments contain an algebraic formula that might be used when an interrelated calculation is required, which is whenever distributions from a pass-through are less than its Schedule K-1 income and the

⁶¹⁸⁵ Code §§ 652, 662.

⁶¹⁸⁶ Reg. §§ UPAIA Section 401(b).

⁶¹⁸⁷ UPAIA Section 401(b).

trustee has no other funds to distribute to the beneficiary or pay income tax on its Schedule K-1 income.

The policy behind this change is that the UPAIA should not place trustees in a position where they cannot pay the trust's income tax. Generally, it is not practical or prudent for a trustee to borrow to pay income tax when the trustee has no idea when, if ever, a distribution in excess of a tax distribution will be made. Furthermore, if the trust owned C corporation stock rather than an interest in a flow-through entity, the trust would never have received a distribution from the business entity anyway.

In the example above, suppose the business entity annually accumulated the \$40,000x excess of Schedule K-1 income over the tax distribution. Suppose these accumulated amounts were later distributed to the trust. UPAIA section 506(a)(3) would authorize additional distributions to the beneficiary because the beneficiary essentially paid the tax on these accumulated amounts when the trustee used the tax distributions to pay income tax instead of distributing part or all of them to the beneficiary.

Before turning to advising clients about these changes, let's discuss particular rules affect how these rules apply to various trusts that own stock in S corporations:

- An electing small business trust ("ESBT") does not receive an income distribution deduction with respect to its Schedule K-1 income that is distributed to its beneficiary.⁶¹⁸⁸
- A qualified subchapter S trust ("QSST") under Code Section 1361(d), or other trust treated as wholly owned by one grantor or one beneficiary, does not pay taxes on any of its Schedule K-1 income from an S corporation. Instead, the individual beneficiary or grantor treated for income tax purposes as receiving Schedule K-1 income pays all the income taxes attributable to the Schedule K-1 income.⁶¹⁸⁹ Therefore, the trustee would distribute to the beneficiary all of the tax distribution.
- Only in very limited situations may a trust not described above be qualified to hold stock in an S corporation. The main situations involve trusts that were grantor trusts during the grantor's or beneficiary's life (but only for the two years following the deemed owner's death), estates (including a revocable trust taxed as an estate if a Code Section 645 election is made), and trusts that are funded upon termination of an estate (but only for the two years following funding).⁶¹⁹⁰

III.A.4.d.iii. UFIPA § 506

UFIPA § 506, "Income Taxes," provides:

- (a) A tax required to be paid by a fiduciary which is based on receipts allocated to income must be paid from income.

⁶¹⁸⁸ Code § 1361(e); Reg. § 1.641(c)-1(i).

⁶¹⁸⁹ Code § 1361(d)(1)(B).

⁶¹⁹⁰ Code § 1361(c)(2). See part III.A.3 Trusts Holding Stock in S Corporations.

- (b) A tax required to be paid by a fiduciary which is based on receipts allocated to principal must be paid from principal, even if the tax is called an income tax by the taxing authority.
- (c) Subject to subsection (d) and Sections 504, 505, and 507, a tax required to be paid by a fiduciary on a share of an entity's taxable income in an accounting period must be paid from:
- (1) income and principal proportionately to the allocation between income and principal of receipts from the entity in the period;
 - (2) principal to the extent the tax exceeds the receipts from the entity in the period.
- (d) After applying subsections (a) through (c), the fiduciary shall adjust income or principal receipts, to the extent the taxes the fiduciary pays are reduced because of a deduction for payments made to a beneficiary.

UFIPA § 506 retained the Comment to UPAIA (see part III.A.4.d.vi Appendix to 505 Discussion) and added a Comment clarifying that it has no effect on the marital deduction.⁶¹⁹¹

III.A.4.d.iv. Advising Clients about the UPAIA § 505 Change and UFIPA § 506

The common yet extreme scenario posited – where a mandatory income trust owns only an interest in a flow-through entity that limits distributions to tax distributions – presents difficult challenges for settlors, trustees, and beneficiaries. The changes to UPAIA section 505 and UFIPA § 506 allow the trustee to pay the trust's taxes notwithstanding these significant other challenges. One must consider why this difficult situation arises, what the trustee must do to alter the trust's investments if the trust agreement does not address the issue, and how to minimize disputes about what the trustee should do.

III.A.4.d.iv.(a). Why This Difficult Situation Arises

The first question is why the settlor would provide for a mandatory income interest, while expecting that no income will be available to distribute to the beneficiary? Scenarios include:

- *Marital Deduction Mandatory Income Requirement.* The trust is for a surviving spouse who does not need distributions but must provide for mandatory income to qualify for the marital deduction. The trust has the usual clause allowing the spouse to require the trustee to make the property productive. In some cases, using a separate trust to hold a flow-through entity without holding any other assets might be

⁶¹⁹¹ The added Comment says:

Marital deduction issues. Any payment of income tax from income could raise issues of the estate or gift tax marital deduction, especially if the income on which that income tax is paid is not fully distributed, as in the case of income retained in an entity owned in whole or in part by the trust. These issues are similar to the issues raised by Revenue Ruling 2006-26 in the context of defined contribution qualified retirement plans and individual retirement accounts (IRAs). See Section 409 and the Comment thereto. The 2018 Act makes no change to Section 506 because the power in the spouse to cause the trust assets to be made reasonably productive of income addresses any marital deduction issue. See Section 413.

necessary to minimize the estate tax risk of buy-sell agreements.⁶¹⁹² The Internal Revenue Service has taken the position that a fixed-price buy-sell agreement, in which the sale price of a decedent's equity is less than the Internal Revenue Service-determined fair market value, effectively passes property to a person other than the surviving spouse and therefore disqualifies the marital trust from being eligible for a marital deduction.⁶¹⁹³ If the client uses a fixed-price buy-sell agreement, the client might protect the marital deduction with respect to other assets by placing the other assets into a marital deduction trust that is separate from the trust that holds the client's equity. In such a case, the settlor should make sure that the spouse understands the trust's purposes and does not expect any distributions from the trust. If, however, the surviving spouse is adverse to the remaindermen, then the grantor settlor should consider a prenuptial agreement or other ways of documenting a particular expectation of cash flow to the surviving spouse.

- *Future Income Expected.* The settlor does not expect income to be generated initially but expects the business entity eventually to generate income and does not expect the beneficiary to need the income until later. In this case, the settlor might consider describing the settlor's expectation regarding income so that the trustee has more guidance on what the settlor expects and can respond to concerns that the income beneficiary might raise.
- *Post-Mortem Business Sale Expected.* The settlor wanted to mandate income distributions, knowing full well that the business would need to be sold. The settlor might not have been able to find a buyer while alive, might have wanted to have a place to work for as long as the settlor lived, or might have wanted to wait until death to save income (including capital gain) tax on the sale.

III.A.4.d.iv.(b).What the Trustee Must Do to Alter the Trust's Investments If the Trust Agreement Does Not Address the Issue

The Uniform Prudent Investor Act (the "Investor Act") imposes various requirements:

- The trustee must consider "the purposes, terms, distribution requirements, and other circumstances of the trust."⁶¹⁹⁴
- The trustee must further consider not only total return from income and appreciation of capital but also needs for liquidity and regularity of income.⁶¹⁹⁵
- "A trustee shall diversify the investments of the trust unless the trustee reasonably determines that, because of special circumstances, the purposes of the trust are better served without diversifying."⁶¹⁹⁶

⁶¹⁹² In addition to the estate tax reason mentioned below, a QSST that holds only S stock (and no other assets) is not required to take any particular action to continue to qualify as an S corporation shareholder within two years after the beneficiary dies. Code §§ 1361(c)(2)(A)(ii), 1361(d)(1)(B).

⁶¹⁹³ See part II.O.2.c Effect of Buy-Sell Agreement on Marital Deduction, especially fn 3798.

⁶¹⁹⁴ Section 2(a) of the Investor Act.

⁶¹⁹⁵ Section 2(c)(5) and (7) of the Investor Act.

⁶¹⁹⁶ Section 3 of the Investor Act.

- “Within a reasonable time after accepting a trusteeship or receiving trust assets, a trustee shall review the trust assets and make and implement decisions concerning the retention and disposition of assets, in order to bring the trust portfolio into compliance with the purposes, terms, distribution requirements, and other circumstances of the trust, and with the requirements of this [Act].”⁶¹⁹⁷
- “If a trust has two or more beneficiaries, the trustee shall act impartially in investing and managing the trust assets, taking into account any differing interests of the beneficiaries.”⁶¹⁹⁸

Thus, absent an expression of intent to the contrary, the trustee has a duty to sell enough of the business interest to generate income sufficient to fairly balance the income beneficiary’s interests against the other beneficiaries’ interests; note that a sale might not be required if the business already generates sufficient income to create that fair balance. The trustee also must sell enough of the business interest to create a diversified portfolio. Therefore, for all practical purposes, the trustee must dispose of substantially all of the business interest, if that comprises too much of the trust.

The trust agreement can expressly modify this duty to sell. It might include some or all of the following provisions:

- Expressly authorize the trustee to hold the property (for a particular period of time or indefinitely), notwithstanding its failure to produce income and notwithstanding any requirement to diversify that might otherwise apply. However, this authorization might be insufficient when the stock is performing poorly.⁶¹⁹⁹ Although the lower court’s decision was reversed, it indicates what some judges might do. Also, such a provision cannot be used for marital deduction trusts if it would deprive the surviving spouse of the right to income.⁶²⁰⁰ The author routinely includes language authorizing the spouse to require that the trustee either make the trust’s property productive or convert it to income-producing property within a reasonable time.⁶²⁰¹
- Subject to the marital trust concerns described above, require the trustee to hold the property (for a particular period of time or indefinitely). The authorization to hold might be viewed as requiring the trustee to consider the merits of selling even if it places less pressure to sell, whereas the requirement to hold should remove any requirement to consider selling.
- Give family members interested in the business the power to direct the trustee to hold the business interest. Some states completely relieve the trustee of liability for following directions that the trust agreement authorizes; others might implicitly impose a duty to resist

⁶¹⁹⁷ Section 4 of the Investor Act.

⁶¹⁹⁸ Section 6 of the Investor Act.

⁶¹⁹⁹ *Testamentary Trust UW Dumont*, 791 N.Y.S.2d 868 (Surr. Ct. 2004), reversed *In re Chase Manhattan Bank*, 809 N.Y.S.2d 360 (N.Y.A.D. 2006).

⁶²⁰⁰ Regs. §§ 20.2056(b)-5(f)(5) (general power of appointment marital trusts), 20.2056(b)-7(d)(2) (same rules apply to QTIP trusts).

⁶²⁰¹ Reg. § 20.2056(b)-5(f)(4) suggests such a provision if the trust’s assets consist substantially of unproductive property. However, Reg. § 20.2056(b)-5(f)(5) looks to the trust’s overall return and approves of distributing principal to make up for lack of income from any nonproductive assets, so such a provision can relate to the trust’s overall level of distributions, rather than requiring that each asset be productive.

instructions if the instructions appear inconsistent with the trustee's duties to various beneficiaries.

- If the trust is not a marital trust, add as beneficiaries those family members working in the business by stating that a purpose of retaining the business interest is to provide jobs for those family members. Even if the trust agreement does not provide for distributions to them, some steps should be taken to recognize their interests; otherwise, the trustee has no duty to protect their interests.⁶²⁰²

Note, however, that these ideas do not resolve marital deduction issues if the surviving spouse wants more income. Consistent with the regulations cited in fn 6201, UFIPA § 413 provides:

Marital Deduction Property Not Productive of Income. If a trust received property for which a gift or estate tax marital deduction was allowed and the settlor's spouse holds a mandatory income interest in the trust, the spouse may require the trustee to make property productive of income, convert property to property productive of income within a reasonable time, or exercise the power to adjust under Section 203, to the extent the trust assets otherwise do not provide the spouse with sufficient income from or use of the trust assets to qualify for the deduction. The trustee may decide which action or combination of actions to take.

UFIPA § 413 did not make any substantive changes to UPAIA.⁶²⁰³

III.A.4.d.iv.(c). How to Minimize Disputes About What the Trustee Should Do

The most effective way to minimize disputes is to have legally binding, unambiguous language in the trust. However, being too detailed might unduly tie the trustee's hands when the settlor really wanted to rely on the trustee's judgment. It is impossible to predict the future, and giving the trustee flexibility is often the best call.

The settlor should consider discussing with family members the settlor's intent in placing an essentially unproductive asset into a mandatory income trust. An income beneficiary who has lowered expectations might be less demanding, especially if the trustee and the other beneficiaries are all in the room when the settlor expresses this intent.

The settlor might also consider writing a precatory letter to the trustee (and beneficiaries, if appropriate) expressing this intent. Although the trustee cannot rely on this letter to change the trustee's legal obligations, a trustee usually finds comfort to the extent the letter supports the trustee's discretionary actions under the trust agreement.

⁶²⁰² Section 5 of the Investor Act.

⁶²⁰³ The Comment to UPAIA § 413 says

In Section 413 the 2018 Act makes little substantive change from the 1997 Act. It omits Section 413(b) of the 1997 Act, which had provided:

In a case not governed by subsection (a), proceeds from the sale or other disposition of an asset are principal without regard to the amount of income the asset produces during any accounting period.

Section 404(2) of the 2018 Act provides that proceeds from a sale or exchange of a principal asset remain principal, which renders former Section 413(b) duplicative.

For example, to maximize flexibility in a trustee who is to make the ultimate decision, the settlor would:

- include in the trust agreement express authority (but not a mandate) for the trustee to retain assets originally contributed (or sold by the settlor) to the trust, including without limitation (name of the company, its affiliates, etc.), without any requirement to diversify under the Investor Act, and
- write a precatory letter to the trustee.

Extreme caution is recommended in using such provisions with a marital deduction trust or other trust that the tax laws require to have a mandatory income provision. Being too explicit might trigger an attack on the provision as undermining the mandatory income characterization; however, including a right to make productive should suffice.⁶²⁰⁴

III.A.4.d.iv.(d). Fairness When the Trust Sells Its Interest in the Entity

See parts II.J.8.c.i.(b) Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation and II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

III.A.4.d.v. Conclusion

The amendment to UPAIA section 505 should prove helpful. It should avoid disputes over whether the trustee will be able to pay the trust's income taxes and place the focus where it belongs – whether a mandatory income trust should hold assets that, in the aggregate, produce no after-tax income. Trusts to hold most or all of their assets in the form of flow-through entities such as partnerships that sometimes make no more than tax distributions might be drafted with a discretionary instead of a mandatory income distribution and in any event should be drafted with careful consideration to the Uniform Prudent Investor Act.

III.A.4.d.vi. Appendix to 505 Discussion

Below are the amendments to Uniform Principal and Income Act, which are incorporated into the UPAIA at http://www.law.upenn.edu/bll/archives/ulc/upaia/2008_final.htm:

Section 505 is amended to read:

SECTION 505. INCOME TAXES

- (a) A tax required to be paid by a trustee based on receipts allocated to income must be paid from income.
- (b) A tax required to be paid by a trustee based on receipts allocated to principal must be paid from principal, even if the tax is called an income tax by the taxing authority.
- (c) A tax required to be paid by a trustee on the trust's share of an entity's

⁶²⁰⁴ See fn. 6201.

taxable income must be paid ~~proportionately~~:

- (1) from income to the extent that receipts from the entity are allocated only to income; and
- (2) from principal to the extent that:
 - (A) ~~receipts from the entity are allocated only to principal; and~~
 - (B) ~~the trust's share of the entity's taxable income exceeds the total receipts described in paragraphs (1) and (2)(A).~~
- (3) proportionately from principal and income to the extent that receipts from the entity are allocated to both income and principal; and
- (4) from principal to the extent that the tax exceeds the total receipts from the entity.

~~(d) For purposes of this section, receipts allocated to principal or income must be reduced by the amount distributed to a beneficiary from principal or income for which the trust receives a deduction in calculating the tax. After applying subsections (a) through (c), the trustee shall adjust income or principal receipts to the extent that the trust's taxes are reduced because the trust receives a deduction for payments made to a beneficiary.~~

Comment

~~**Electing Small Business Trusts.** An Electing Small Business Trust (ESBT) is a creature created by Congress in the Small Business Job Protection Act of 1996 (P.L. 104-188). For years beginning after 1996, an ESBT may qualify as an S corporation stockholder even if the trustee does not distribute all of the trust's income annually to its beneficiaries. The portion of an ESBT that consists of the S corporation stock is treated as a separate trust for tax purposes (but not for trust accounting purposes), and the S corporation income is taxed directly to that portion of the trust even if some or all of that income is distributed to the beneficiaries.~~

~~A trust normally receives a deduction for distributions it makes to its beneficiaries. Subsection (d) takes into account the possibility that an ESBT may not receive a deduction for trust accounting income that is distributed to the beneficiaries. Only limited guidance has been issued by the Internal Revenue Service, and it is too early to anticipate all of the technical questions that may arise, but the powers granted to a trustee in Sections 506 and 104 to make adjustments are probably sufficient to enable a trustee to correct inequities that may arise because of technical problems.~~

~~**Taxes on Undistributed Entity Taxable Income.** When a trust⁶²⁰⁵ owns an interest in a pass-through entity, such as a partnership or S corporation, it must report its share of the entity's taxable income regardless of how much the entity distributes to the trust. Whether the entity distributes more or less than the trust's~~

⁶²⁰⁵ [This is my footnote.] UFIPA added "nongrantor" before "trust"

tax on its share of the entity's taxable income, the trust must pay the taxes and allocate them between income and principal.

Subsection (c) requires the trust to pay the taxes on its share of an entity's taxable income from income or principal receipts to the extent that receipts from the entity are allocable to each. This assures the trust a source of cash to pay some or all of the taxes on its share of the entity's taxable income. Subsection 505(d) recognizes that, except in the case of an Electing Small Business Trust (ESBT), a trust normally receives a deduction for amounts distributed to a beneficiary. Accordingly, subsection 505(d) requires the trust to increase receipts payable to a beneficiary as determined under subsection (c) to the extent the trust's taxes are reduced by distributing those receipts to the beneficiary.

Because the trust's taxes and amounts distributed to a beneficiary are interrelated, the trust may be required to apply a formula to determine the correct amount payable to a beneficiary. This formula should take into account that each time a distribution is made to a beneficiary, the trust taxes are reduced and amounts distributable to a beneficiary are increased. The formula assures that after deducting distributions to a beneficiary, the trust has enough to satisfy its taxes on its share of the entity's taxable income as reduced by distributions to beneficiaries.

Example (1) – Trust T receives a Schedule K-1 from Partnership P reflecting taxable income of \$1 million. Partnership P distributes \$100,000 to T, which allocates the receipts to income. Both Trust T and income Beneficiary B are in the 35% tax bracket.

Trust T's tax on \$1 million of taxable income is \$350,000. Under Subsection (c) T's tax must be paid from income receipts because receipts from the entity are allocated only to income. Therefore, T must apply the entire \$100,000 of income receipts to pay its tax. In this case, Beneficiary B receives nothing.

Example (2) - Trust T receives a Schedule K-1 from Partnership P reflecting taxable income of \$1 million. Partnership P distributes \$500,000 to T, which allocates the receipts to income. Both Trust T and income Beneficiary B are in the 35% tax bracket.

Trust T's tax on \$1 million of taxable income is \$350,000. Under Subsection (c), T's tax must be paid from income receipts because receipts from P are allocated only to income. Therefore, T uses \$350,000 of the \$500,000 to pay its taxes and distributes the remaining \$150,000 to B. The \$150,000 payment to B reduces T's taxes by \$52,500, which it must pay to B. But the \$52,500 further reduces T's taxes by \$18,375, which it also must pay to B. In fact, each time T makes a distribution to B, its taxes are further reduced, causing another payment to be due B.

Alternatively, T can apply the following algebraic formula to determine the amount payable to B:

$$D = (C-R*K)/(1-R)$$

D = Distribution to income beneficiary
C = Cash paid by the entity to the trust
R = tax rate on income
K = entity's K-1 taxable income

Applying the formula to Example (2) above, Trust T must pay \$230,769 to B so that after deducting the payment, T has exactly enough to pay its tax on the remaining taxable income from P.

<u>Taxable Income per K-1</u>	<u>1,000,000</u>
<u>Payment to beneficiary</u>	<u>230,769⁶²⁰⁶</u>
<u>Trust Taxable Income</u>	<u>\$ 769,231</u>
<u>35% tax</u>	<u>269,231</u>

<u>Partnership Distribution</u>	<u>\$ 500,000</u>
<u>Fiduciary's Tax Liability</u>	<u>(269,231)</u>
<u>Payable to the Beneficiary</u>	<u>\$ 230,769</u>

In addition, B will report \$230,769 on his or her own personal income tax return, paying taxes of \$80,769. Because Trust T withheld \$269,231 to pay its taxes and B paid \$80,769 taxes of its own, B bore the entire \$350,000 tax burden on the \$1 million of entity taxable income, including the \$500,000 that the entity retained that presumably increased the value of the trust's investment entity.

If a trustee determines that it is appropriate to so, it should consider exercising the discretion granted in UPIA section 506 to adjust between income and principal. Alternatively, the trustee may exercise the power to adjust under UPIA section 104 to the extent it is available and appropriate under the circumstances, including whether a future distribution from the entity that would be allocated to principal should be reallocated to income because the income beneficiary already bore the burden of taxes on the reinvested income. In exercising the power, the trust should consider the impact that future distributions will have on any current adjustments.

III.A.5. Fiduciary Duties Regarding Business Interests Held in Trust

Issues regarding the duty to diversify are discussed in part III.A.4.d.iv, Advising Clients about the UPAIA § 505 Change and UFIPA § 506.

This author has heard of bank regulators requiring corporate trustees to revalue closely-held business interests annually, citing 12 CFR 9.6, which provides:

Sec. 9.6 Review of fiduciary accounts.

- (a) *Pre-acceptance review.* Before accepting a fiduciary account, a national bank shall review the prospective account to determine whether it can properly

⁶²⁰⁶ $D = (C - R * K) / (1 - R) = (500,000 - 350,000) / (1 - .35) = \$230,769$. (D is the amount payable to the income beneficiary, K is the entity's K-1 taxable income, R is the trust ordinary tax rate, and C is the cash distributed by the entity).

administer the account.

- (b) *Initial post-acceptance review.* Upon the acceptance of a fiduciary account for which a national bank has investment discretion, the bank shall conduct a prompt review of all assets of the account to evaluate whether they are appropriate for the account.
- (c) *Annual review.* At least once during every calendar year, a bank shall conduct a review of all assets of each fiduciary account for which the bank has investment discretion to evaluate whether they are appropriate, individually and collectively, for the account.

III.A.6. Post-Mortem Trust and Estate Administration

Although the decedent's final income tax year ends with the date of death, the filing of a return and payment of tax may be made as though the decedent had lived throughout the last taxable year.⁶²⁰⁷ For details on activity on the date of death and when the decedent's final income tax year closes and the estate's fiduciary income tax year begins, see part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

If a joint return is filed, the surviving spouse may sign the first return on behalf of both of them if no court-appointed executor is serving and certain other conditions are satisfied;⁶²⁰⁸ otherwise, the court-appointed executor signs, and if no executor is court-appointed then another person "charged with" the decedent's property may sign.⁶²⁰⁹ A person "charged with" the decedent's

⁶²⁰⁷ Reg. § 1.443-1(a)(2).

⁶²⁰⁸ Reg. § 1.6013-1(d).

⁶²⁰⁹ Reg. § 1.6012-3(b). If multiple executors are named, any one of them may sign the return. Rev. Rul. 83-41, citing Reg. § 1.6012-3(b)(1). Rev. Rul. 83-41 also allows any one fiduciary to sign a fiduciary income tax return or extend the time to assess tax, citing Reg. § 1.6012-3(a)(1). Rev. Rul. 84-165 clarifies:

While a consent signed by any one executor or administrator is valid for federal tax purposes, more than one executor or administrator may sign the consent.

Rev. Rul. 83-41 also discusses rules for signing consents for an active or a dissolved corporation regarding tax generally or for a partnership liable for employment or excise taxes.

property includes an heir,⁶²¹⁰ the trustee of the decedent's revocable trust,⁶²¹¹ or perhaps an agent under a durable power of attorney who does not yet know of the death.⁶²¹² However, only

⁶²¹⁰ CCA 201334040 (an informal letter – not a National Office pronouncement) advised:

Q. Decedent is a non-filer who died intestate with one asset: a bank account held by the decedent, her daughter, and her daughter's husband. Field counsel considers the daughter a distributee and proposed having the daughter to sign a Form 56, Notice Concerning Fiduciary Relationship, and then sign the decedent's unfiled tax returns and Form 870 or 872.

A. The daughter may sign the decedent's unfiled returns, because section 6012(b)(1) provides that "Tax returns of decedents are to be made by the decedent's executor, administrator, or other person charged with the property of the decedent." The daughter has the decedent's property. If the daughter submits balance due returns, those are acceptable without proof of authority; but if she claims credit elects or refunds, the Service may demand Form 1310 and/or documentary authority before refunding or crediting any claimed overpayment. See IRM 3.11.3.10.2(3). The Service may communicate with the daughter and her representatives about returns the daughter signs for her mother.

Section 6501(c)(4)(A) provides for extending the ASED and section 6213(d) provides for waiving restrictions on assessment, but who may sign ASED extension consents and waivers for decedents is not specified in the statutes or regulations. Although Revenue Ruling 83-41, 1983-1 C.B. 349, clarified, amplified by Rev. Rul. 84-165, 1984-2 C.B. 305, held that "the Service will generally apply the rules applicable to execution of the original returns to consents to the extension of time to make an assessment", it ruled that in the absence of a court-appointed administrator for an intestate decedent, nobody may sign an ASED extension for the intestate decedent. Under the revenue rulings, the daughter may sign ASED extensions for her liability as a transferee, because it's her own liability, but she may not sign Form 870 or 872 for her mother's estate without being appointed as the personal representative (administrator) for her mother's estate by a court of competent jurisdiction. The same rules should apply to Form 870, as well. The Service should require letters of administration or equivalent proof of such appointment before accepting an 870 or 872 from the daughter.

The daughter should also submit a Form 56 to document her fiduciary relationship as the personal representative of her mother's estate. The regulations require the fiduciary to retain proof of authority to act for the principal, sec. 301.6903-1(b)(2), and the same authority that would provide a foundation for Form 56 would likely suffice for Forms 870 and 872 (that is, letters of administration from a state probate court).

⁶²¹¹ CCA 201334040 (an informal letter – not a National Office pronouncement) advised:

Q: Decedent established a revocable trust into which he transferred all his assets before he died. He died testate, naming B his executor. B is also one of three trustees of the trust. The will has not been probated, and nothing passed under the will. Field counsel proposes treating the trustees as "testamentary trustees" and having them sign Form 56 and Form 870 or 872. The trust documents require the trustees to act unanimously, and the trustees have voted to appoint B the person to handle IRS matters.

A: B may execute any unfiled returns for the decedent, because section 6012(b)(1) provides that "Tax returns of decedents are to be made by the decedent's executor, administrator, or other person charged with the property of the decedent." The Service will accept returns signed by B as trustee in possession of the decedent's property, but the Service may require a Form 1310 and/or documentation of B's appointment by a court if the returns claim an overpayment. As for filing a Form 870 or 872, the Service should require proof of authority, confirmed by a court (that is, letters testamentary), before accepting either an ASED extension or a waiver of restrictions on assessment.

⁶²¹² CCA 201334040 (an informal letter – not a National Office pronouncement) advised:

Q: The day after decedent died (in New Jersey) and before his attorney-in-fact learned the decedent (principal) had died, the POA (acting in Florida) executed a Form 872 extending the ASED. No probate has been opened, and no representative has been appointed.

a court-appointed executor may sign an amended return⁶²¹³ or consent to extend the time to assess tax.⁶²¹⁴

See part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests. Consider whether to do a very quick funding of any QSSTs created upon death or to place a partnership interest in an S corporation owned by a QSST; see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests. A huge downside to quick funding is the executor's personal liability if an federal debts are unpaid before the distribution⁶²¹⁵ or due to an estate tax lien imposed on the executor's own assets.⁶²¹⁶ An executor can obtain some assurance by filing Forms 4810 to get the statute of limitations on income tax matters shortened, writing a letter to the IRS (certified mail, return receipt requested) to the IRS to obtain a discharge under Code §§ 2204(a), (b) and 6905,⁶²¹⁷ and obtaining an

A: The ASED extension signed by the attorney-in-fact the day after the taxpayer's death and at a time when neither the attorney-in-fact nor the IRS knew that the taxpayer had died is valid, because under both Florida law (where the attorney-in-fact acted) and New Jersey law (where the taxpayer died and may have been domiciled) acts by an attorney-in-fact done in good faith and without knowledge that the principal is dead are valid and binding. Fla. Stat. § 709.2109(4); N.J. Stat. § 46:2B-8.5(a).

Now that the attorney-in-fact is aware of the principal's death, the POA is terminated, and he is not authorized to act for the decedent. If the estate wishes to submit a Form 870 or 872, the Service should require proof of authority to bind the estate. If the decedent died intestate, then court appointment of an administrator (and letters of administration) will be required. If the decedent died testate and named an administrator, then court approval (and letters testamentary) will be required.

Conclusion: In all cases, if the purported personal representative won't provide proof of authority (letters of administration or letters testamentary from an appropriate court), then no 870 or 872 should be accepted, and notices of deficiency should issue to ensure that the assessments are valid (copies to the taxpayer's last known address and to the address of any fiduciaries, whether confirmed or not).

⁶²¹³ CCA 201107020, citing *Estate of Weisel v. Commissioner*, T.C. Memo. 1990-351, and Rev. Rul. 83-41. The CCA was an informal letter – not a National Office pronouncement.

⁶²¹⁴ Rev. Rul. 83-41; CCA 201107020 (see fn. 6213); CCA 201334040 (see fns. 6210-6212). However, Rev. Rul. 83-41 held that heirs liable under Code § 6901 as transferees may sign consents for their own liabilities.

⁶²¹⁵ 31 U.S.C. § 3713(b), as described in fn. 7216 in part III.B.5.e.iv.(e) Which Estates Are Affected by the Estate Tax Lien?.

⁶²¹⁶ See part III.B.5.e.iv Federal Estate Tax Liens.

⁶²¹⁷ Instead of a letter, one might file IRS Form 5495. However, the form has various requirements, and neither provision requires using the form. Referring to the format for a Code § 2204 discharge request, *U.S. v. Paulson*, 125 A.F.T.R.2d 2020-1429 (DC CA 03/23/2020) held:

Currently, there is no authority that requires specific format, form or wording to make an application for discharge. See *United States v. Johnson*, 224 F.Supp.3d 1220, 1237 (D. Utah 2016) ("*Johnson II*"), reversed on other grounds *United States v. Johnson*, 920 F.3d 639 (10th Cir. 2019). However, Plaintiff argues that Michael Paulson signed various documents in different capacities and sometimes would sign the same document multiple times in his differing capacities. (Doc. No. 191-1 at 19–21.) There is no such requirement, however, how to sign the letter nor is there a requirement that Michael Paulson was supposed to provide two letters to the IRS...

Further, the IRS never contacted Michael Paulson regarding any confusion over the letter. In fact, the IRS never responded to the letter. The IRS is "to notify the fiduciary (1) of the amount of such tax for which it has been determined the fiduciary is liable, or (2) that it has been determined that the fiduciary is not liable for any such tax." 26 U.S.C. § 2204. If there was any confusion, Plaintiff argues that the IRS should have alerted the fiduciary that he remained liable for the full amount of "any estate

agreement by the beneficiaries to pay back any distributions if the executor did not reserve enough (a “refunding agreement”);⁶²¹⁸ however, a refunding agreement is only as good as the executor’s ability to seize assets from the beneficiaries.

See part III.B.2.j Tax Allocations upon Change of Interest in a Business, especially parts III.B.2.j.ii.(d) Death of a Shareholder and III.B.2.j.iii.(c) Death of a Partner — Treated Like a Transfer of a Partner’s Entire Interest. Consider planning opportunities for allocations in the year of death or when funding bequests, such as measuring pre- and post-mortem income based on an accounting cut-off or pro-rata, per-share, per-day.

tax for which the fiduciary may be personally liable.” The Court agrees. Plaintiff should not have waited twelve years to raise this issue in litigation.

In fn 1, *U.S. v. Paulson*, 131 A.F.T.R.2d 2023-1743 (9th Cir. 5/17/2023), noted that the U.S. did not appeal this conclusion.

Johnson (fn 7220) awarded the taxpayer attorney fees when the IRS persisted with arguments that the taxpayer did not qualify for a Code § 2204 discharge.

⁶²¹⁸ Letter Ruling 201745001 held that entering into a refunding agreement with a private foundation would not be a prohibited act of self-dealing under Code § 4941, and any repayments the foundation may make would not constitute taxable expenditures under Code § 4945. The IRS described the refunding agreement:

You represent that Trust and Foundation are seeking to fulfill Grantor’s intent that the Trust distribute the maximum value of Trust to the Foundation at the earliest opportunity. You further represent that the administration of Trust has not been completed and is ongoing. Pursuant to the provisions of Trust instrument, assets remaining to be distributed to the Foundation may be or become subject to expenses, losses or liabilities sustained in the administration of Trust. You state that under State law, Trustee 1 and Trustee 2 may be personally liable for expenses, losses and liabilities sustained in the administration of the Trust. Given the potential exposure to future claims and liabilities against Trust, Trustee 1 and Trustee 2 believe it would be prudent to retain until the completion of trust administration a sufficient reserve to satisfy any such claims. You represent that there is a risk that liabilities will likely extend well beyond the termination of Trust. The transfer of the remaining assets of Trust to the Foundation is within the powers of Trustee 1 and Trustee 2. Foundation has requested that Trustee 1 and Trustee 2 accelerate distributions of the assets of the Trust to Foundation before Trustee 1 and Trustee 2 know the full extent of potential claims and liabilities. In order to induce Trustee 1 and Trustee 2 to make substantial distributions to Foundation sooner than they otherwise would make them, Foundation has proposed to execute and deliver to Trustee 1 and Trustee 2 the Agreement.

Under the Agreement, Foundation acknowledges that Trustee 1 and Trustee 2 would normally defer a substantial portion of the distributions to Foundation until a final resolution of all liabilities and claims. Trustee 1 and Trustee 2 would only make a final distribution of the remaining assets of the Trust when they are satisfied that all liabilities of the Trust have been determined and discharged. Trustee 1 and Trustee 2 are willing to consider accelerating the distribution of assets to the Foundation, provided that the Foundation obligates itself to indemnify Trustee 1 and Trustee 2. Further, under the Agreement, Foundation agrees to return any distribution required to be refunded under the Agreement to either Trustee 1 or Trustee 2 should claims and liabilities arise. Under the Agreement, the distribution of assets to the Foundation will include cash or in kind assets whether investment securities, real property or other assets. Pursuant to the Agreement, Trustee 1 and Trustee 2 can be assured that the Foundation will pay such amounts or return such portion of distributions that Trustee 1 and Trustee 2 determine in their sole and absolute discretion are needed or desirable to pay all such liabilities.

In addition, under the Agreement, Foundation agrees to indemnify and hold harmless Trustee 1 and Trustee 2 from any and all liabilities and expenses sustained in the administration of the Trust. Further, nothing in the Agreement requires Trustee 1 or Trustee 2 to make any distributions to Foundation at any particular time and Trustee 1 and Trustee 2 shall determine the amounts of and whether to make distributions in their sole and absolute discretion.

Planning for partnership interests also includes:

- Obtaining an inside basis step-up on death. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. (Pre-mortem planning includes part II.H.2.i Avoiding a Basis Step-Down.) If the decedent owned all (perhaps most) of the stock of an S corporation than held only marketable securities or other nondepreciable property, consider whether liquidating the corporation (for example, converting it to an LLC taxed as a sole proprietorship or partnership) might facilitate an inside basis at little cost; see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up.
- Distributing a partnership interest when funding bequests provides an opportunity to obtain an inside basis step-up (especially if the partnership did not make the requisite election on or before the partnership's taxable year that included date of death) and make new partnership elections, but it also might cause depreciation periods to start again (which could significantly defer depreciation for real estate). See parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

See also part III.B.2.e.ii Tax ID Issues When the Deemed Owner of a Grantor Trust Dies; Related Effect on Quarterly Payments of Estimated Income Tax.

Also, Code § 451(b)(3)(A)(iii) accelerates certain income of an accrual taxpayer who has an applicable financial statement (AFS) - "a financial statement which is certified as being prepared in accordance with generally accepted accounting principles and which is ... an audited financial statement of the taxpayer which is used for (I) credit purposes, (II) reporting to shareholders, partners, or other proprietors, or to beneficiaries, or (III) any other substantial nontax purpose."⁶²¹⁹ Reg § 1.451-3(c)(6)(i) provides:⁶²²⁰

⁶²¹⁹ An excerpt from the preamble to the regulations is in fn 4451 in part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured.

⁶²²⁰ T.D. 9941 (1/6/2021) provides background for this inclusion:

However, the Treasury Department and the IRS agree with comments suggesting that taxpayers should be afforded the flexibility of applying an offset for costs incurred against AFS income inclusions from the future sale of inventory, the "AFS cost offset method." Accordingly, a taxpayer that uses the AFS cost offset method determines the amount of gross income includible for a year prior to the year in which ownership of inventory transfers to the customer by reducing the amount of revenue it would otherwise be required to include under the AFS Income Inclusion Rule for the taxable year (AFS inventory inclusion amount) by the cost of goods related to the item of inventory for the taxable year, the "cost of goods in progress offset." The net result is the amount that is required to be included in gross income for that year under the AFS Income Inclusion Rule. The deferred revenue, that is, the revenue that was reduced by the cost of goods in progress offset for a taxable year prior to the taxable year that ownership of the item of inventory is transferred to the customer, is generally taken into account in the taxable year in which ownership of the item of inventory is transferred to the customer.

The final regulations provide that the cost of goods in progress offset for each item of inventory for the taxable year is calculated as (1) the cost of goods incurred through the last day of the taxable year, (2) reduced by the cumulative cost of goods in progress offset amounts attributable to the items of inventory that were taken into account in prior taxable years, if any. However, the cost of goods in progress offset cannot reduce the AFS inventory inclusion amount for the item of inventory below zero. Further, the cost of goods in progress offset attributable to one item of

A taxpayer that uses the AFS cost offset method or the advance payment cost offset method must include in gross income for a taxable year prior to the taxable year in which an item of inventory is transferred to the customer, all payments received for the item of inventory that were not previously included in gross income ... if, in that taxable year, the taxpayer ... dies

III.B. Transfer Tax Issues

Transfer tax issues include transfers during life, estate tax issues, and special valuation issues.

III.B.1. Transfers During Life

Transfers during life include many ways of transferring equity to one's loved ones. The simplest way is shifting a business opportunity. Gifts without consideration can appear straightforward, but then valuation issues complicate matters, and designing trusts to hold stock in S corporations can be tricky. More advanced tactics include transfers to grantor retained

inventory cannot reduce the AFS inventory inclusion amount attributable to a separate item of inventory. Any cost of goods that were not used to offset AFS inventory inclusion amounts because they were subject to limitation are considered when the taxpayer determines the cost of goods in progress offset for that item of inventory in a subsequent taxable year.

The cost of goods in progress offset is determined by reference to the costs and expenditures related to each item of inventory produced or acquired for resale, which costs have been incurred under section 461 and have been capitalized and included in inventory under sections 471 and 263A or any other applicable provision of the Code at the end of the year. However, the cost of goods in progress offset does not reduce the costs that are capitalized to the item of inventory produced or acquired for resale by the taxpayer under the contract. That is, while the cost of goods in progress offset reduces the AFS inventory inclusion amount, it does not affect how and when costs are capitalized to inventory under sections 471 and 263A or any other applicable provision of the Code or when those capitalized costs will be recovered. Instead, the cost of goods in progress offset serves only to reduce or "offset" any AFS income inclusion amounts for the item of inventory and defer such amounts to the taxable year in which ownership of the item of inventory is transferred to the customer.

The costs of goods comprising the cost of goods in progress offset must be determined by applying the inventory accounting methods used by the taxpayer for Federal income tax purposes. A taxpayer must calculate its cost of goods in progress offset by reference to all costs that the taxpayer has permissibly capitalized and allocated to items of inventory under its inventory method, but may not consider costs that are not properly capitalized under such method.

In the taxable year in which ownership of the item of inventory is transferred to the customer, any revenue deferred by way of a prior year cost offset is included in gross income in the year of the transfer along with any additional revenue that is otherwise required to be included in gross income under the AFS Income Inclusion Rule for such year. Although no cost offset is permitted in such year, the taxpayer would recover costs capitalized and allocated to the item of inventory transferred as cost of goods sold in such year in accordance with sections 471 and 263A or any other applicable provision of the Code. However, if in a taxable year prior to the taxable year in which ownership of the item of inventory is transferred to the customer, either (A) the taxpayer dies or ceases to exist in a transaction other than a transaction to which section 381(a) applies, or (B) the taxpayer's obligation to the customer with respect to the item of inventory ends other than in a transaction to which 381(a) applies or certain section 351(a) transactions between members of the same consolidated group, then all payments received for the item of inventory that were not previously included in gross income as a result of the application of the cost offset rules are required to be included in gross income in such year.

annuity trusts and various sale techniques, including self-canceling installment notes and private annuities.

TAM 200147021 explained gift-splitting:

ISSUE(S)

Is the deemed gift under 2515 of the generation-skipping transfer tax imposed on a direct skip split between spouses if the spouses have elected under 2513 to split all gifts made to third parties during the calendar year?

CONCLUSION

Taxpayer and Spouse must split the deemed gift under 2515 of the generation-skipping transfer tax imposed on a direct skip because Taxpayer and Spouse elected under 2513 to split all gifts made to third parties during the calendar year.

FACTS

Taxpayer and Spouse are husband and wife. During Year, Taxpayer and Spouse made gifts to Taxpayer's grandchildren. Prior to Year, Taxpayer gifted over Amount 1 to third parties and, therefore, at the time of the gifts to the grandchildren in the instant case, Taxpayer had completely utilized his unified credit as well as his generation-skipping transfer tax exemption. Prior to Year, Wife gifted Amount 2. Thus, Wife had not completely utilized her unified credit or her generation-skipping transfer tax exemption. Taxpayer and Spouse filed separate Forms 709, "United States Gift (and Generation-Skipping Transfer) Tax Return." Both Taxpayer and Spouse executed the consents required by 2513 and elected to treat the gifts to Taxpayer's grandchildren as made one-half by each spouse. In addition, each treated the deemed gift under 2515 of the generation-skipping transfer tax as an additional gift that must be split under 2513.

LAW AND ANALYSIS

Section 2513(a) provides that a gift made by one spouse to any person other than his spouse shall, for the purposes of this chapter, be considered as made one-half by him and one-half by his spouse, but only if at the time of the gift each spouse is a citizen or resident of the United States. The gifts are treated as made one-half by each spouse only if both spouses consent to gift-splitting on all gifts made during the calendar year by either while married to the other.

Section 2515 provides that, in the case of any taxable gift that is a direct skip (within the meaning of chapter 13), the amount of such gift shall be increased by the amount of any tax imposed on the transferor under chapter 13 with respect to the gift. Thus, any generation-skipping transfer tax imposed is treated as an additional gift that is also subject to gift tax.

Section 2601(a)(3) provides that, in the case of a direct skip, the tax shall be paid by the transferor.

Under 2652(a)(2), if, under 2513, one-half of a gift is treated as made by an individual and one-half of such gift is treated as made by the spouse of such individual, such gift shall be so treated for purposes of chapter 13.

Section 26.2652-1(a)(4) provides that, in the case of a transfer with respect to which the donor's spouse makes an election under 2513 to treat the gift as made one-half by the spouse, the electing spouse is treated as the transferor of one-half of the entire value of the property transferred by the donor, regardless of the interest the electing spouse is actually deemed to have transferred under 2513. The donor is treated as the transferor of one-half of the value of the entire property. In 26.2652-1(a)(5), Example 2, T transfers \$100,000 to a trust for the sole benefit of T's grandchild. S, T's spouse, consents under 2513 to split the gift with T. For purposes of chapter 13, S and T are each treated as a transferor of \$50,000 to the trust.

In the instant case, Taxpayer and Spouse elected under 2513 to treat all gifts made during the calendar year by either to be treated as made one-half by each spouse. The statutory language of 2515 deems the generation-skipping tax imposed on the transferor to be an additional gift that is subject to gift tax. If both spouses have consented to gift-splitting for a calendar year, 2513 requires all gifts made during the calendar year to be treated as made one-half by each spouse. Therefore, because Taxpayer and Spouse made an election under 2513 to split all gifts made to third parties during Year, Taxpayer and Spouse must split the deemed gift under 2515 of generation-skipping transfer tax imposed on the direct skip gift to Taxpayer's grandchildren.

Reg. § 26.2652-1(a)(4), "Split-gift transfers," provides:⁶²²¹

In the case of a transfer with respect to which the donor's spouse makes an election under section 2513 to treat the gift as made one-half by the spouse, the electing spouse is treated as the transferor of one-half of the entire value of the property transferred by the donor, regardless of the interest the electing spouse is actually deemed to have transferred under section 2513. The donor is treated as the transferor of one-half of the value of the entire property. See § 26.2632-1(c)(5) Example 3, regarding allocation of GST exemption with respect to split-gift transfers subject to an ETIP.

III.B.1.a. Business Opportunities

A business owner who plans to add new locations or new products or services may be able to use some basic techniques to let family members participate in the business' growth. These techniques involve shifting these business opportunities to the family members.

New businesses often have speculative value. Even a successful business may have difficulty expanding into new locations or adding products or services. When starting a new business, consider giving most of the ownership to family members through nonvoting ownership interests. For example, the client owns 1% of the company and all of the voting rights, and the client's children own 99% of the company without any voting rights. The 99% that the client gives his or her children has little value if the new business has an uncertain future. Because the client controls the business, the client can use the business techniques that the client has mastered to make sure it is managed correctly. However, the children own 99% of the profits

⁶²²¹ See also text accompanying fn 6441 in part III.B.1.d.ii Estate Tax Inclusion Period (ETIP) and text accompanying fn 6446 in part III.B.1.d.iii Who Is the Transferor.

that the client creates. Examples of this might include investing in the following that might be leased or otherwise profitably provided to the existing business:

- New location.
- New line of business.
- New customer target group.
- New equipment.
- New business method.
- New patent.

Examples are further described in part III.B.1.a.v Sending Business or Performing Services.

Whatever form the gift may take, as it stands, the Code does not mention the term “gift of opportunity.” This, naturally, has not stopped the IRS from pursuing these “gifts” as taxable transfers. The gift tax was initially devised as a backstop to the federal estate tax; however, this purpose was seemingly broadened by the decision in *Dickman v. Commissioner*.⁶²²² In *Dickman*, the Supreme Court established that the gratuitous gift of the use of property constituted a taxable gift.⁶²²³ In holding such, the court stated that, “Congress intended the gift tax statute to reach all gratuitous transfers of any valuable interest in property.”⁶²²⁴ The court goes further by adding, “the gift tax was designed to encompass all transfers of property and property rights having significant value.”⁶²²⁵ Several past cases highlight the extensive grasp of the gift tax provisions. “Gift,” as Congress intended the word, means all of the “protean arrangements which the wit of man can devise that are not business transactions within the meaning of ordinary speech.”⁶²²⁶ The gift tax is “broad enough to include property, however conceptual or contingent,”⁶²²⁷ and may “reach every kind and type of transfer by gift.”⁶²²⁸ Suffice it to say, the Supreme Court has supported a broad interpretation of what may fall under the purview of the gift tax statutes.

That being said, the IRS has encountered limited success in its efforts at reaching gifts of opportunity. The following discussion outlines some of these successes, and, likewise, some of its failures.

Be sure to properly document any legal rights that the prospective owners should have. The IRS may argue that certain opportunities later ripened into rights belonging to the person who provided the business opportunities.⁶²²⁹

⁶²²⁷ *Smith v. Shaughnessy*, 318 U.S. 176, 180 (1943).

⁶²²⁸ *Robinette v. Helvering*, 318 U.S. 184, 187 (1943).

⁶²²⁹ See *Cavallaro*, discussed in fn 6361 in part III.B.1.a.vi Asset Transfers to Children or Their Businesses.

Loaning money to a child or other family member, under the holding in *Crown v. Commissioner*⁶²³⁰ did not produce gift tax liability should the lending parent fail to charge or collect interest on the loans. The court stated that interest-free demand loans were not transfers of property within the meaning of the gift tax statutes, as the borrowing child had no legally protected right against the lending parent.⁶²³¹ Furthermore, the child's use of the money was not an interest with an exchangeable value.⁶²³²

In certain respects, *Dickman* changed this. The Supreme Court, as previously mentioned, held that the right to use the loaned money represented a valuable, taxable gift because it represents a transfer of property by gift.⁶²³³ The Court softened this blow by recapping the merits of the gift tax exclusions available to individuals and families, such as the annual exclusion, gift splitting, exemptions, and the unified credit.⁶²³⁴ However, *Crown* might apply in particular circumstances. For instance, a parent who allows his or her adult child to use the family vacation home rent-free might not make a gift tax liability if the child does not have a legally enforceable right, against the parent, to stay in the home.⁶²³⁵ *Dickman* involved loans and other arrangement where the borrower had a legally protected interest to use loaned funds. It also reasoned:

What was transferred here was the use of a substantial amount of cash for an indefinite period of time. An analogous interest in real property, the use under a tenancy at will, has long been recognized as a property right. E. g., *Restatement (Second) of Property* § 1.6 (1977); G. Thompson, *Commentaries on the Modern Law of Real Property* § 1020 (J. Grimes ed. 1980). For example, a parent who grants to a child the rent-free, indefinite use of commercial property having a reasonable rental value of \$8000 a month has clearly transferred a valuable property right.

Making long-term loans to a client's children at low interest rates is an easy way to help them acquire investments, whether a privately-owned business, real estate, or marketable securities. See parts III.B.1.a.i Loans and III.B.1.a.ii Loan Guarantees.

Thus, although a short-term use of property might be free from gift tax, indefinite use of property is more problematic.⁶²³⁶

III.B.1.a.i. Loans

Interest-free or below-market loans are governed by Code § 7872, which generally requires imputation of interest of such loans.⁶²³⁷ Each month, the IRS publishes a revenue ruling that prescribes interest rates to be used for federal tax purposes. These Applicable Federal Rates (AFRs) provide short-, mid-, and long-term government rates of interest.

⁶²³⁰ 585 F.2d 234 (7th Cir. 1978).

⁶²³¹ *Id.* at 239.

⁶²³² *Id.*

⁶²³³ *Dickman*, 465 U.S. at 333.

⁶²³⁴ *Id.* at 341-42.

⁶²³⁵ The *Dickman* Court expressly reserved for future cases adult children's use of cars or vacation cottages. *Id.* at 336.

⁶²³⁶ See Letter Ruling 8104207.

⁶²³⁷ *Dickman* has been superseded and codified as Code § 7872, which provides for short-term (under three years), mid-term (three to nine years), and long-term (over nine years) AFRs.

Fundamental to using the AFR is that there is a reasonable expectation of repayment.⁶²³⁸ See part III.B.1.a.i.(a) Loans Must be Bona Fide.

These loans break down into two categories: term loans and demand loans. A term loan, as the name implies, is a loan for a specific term, i.e. it has a defined start date and end date. A demand loan is a loan that is immediately callable at any time.

See also part II.G.4.a.i Loans to Businesses – Whether AFR Is Required, discussing whether Code § 7872 applies. If Code § 7872 does not apply, then one might consider whether to charge interest anyway to avoid a gift under common law principles;⁶²³⁹ characterization of a transfer to a family controlled entity as a contribution to capital rather a loan can result in the IRS seeking to apply the draconian Code § 2701.⁶²⁴⁰

Code § 7872 provides certain exceptions to the general rule of imputing interest. For instance, gift loans between individuals may qualify for a de minimis exception. If the outstanding aggregate amount of loans between individuals is less than \$10,000, then the general rules of Code § 7872 will not apply.⁶²⁴¹ The same rule holds true for compensation-related and corporate shareholder loans.⁶²⁴² Also, Code § 7872 provides for an income tax (but not gift tax) exclusion of accrued interest where aggregate loans do not exceed \$100,000.⁶²⁴³

For loans between spouses, see fns 7303-7309 and the accompanying text in part III.B.6.d Divorce as an Opportunity to Transfer.

For notes arising from a taxable sale, also see part II.G.15 Limitations on the Use of Installment Sales.

III.B.1.a.i.(a). Loans Must be Bona Fide

Dynamo Holdings Ltd. Partnership v. Commissioner, T.C. Memo. 2018-61, held that advances between family-owned entities were not gifts. The court summarized relevant principles:

The question of whether a taxpayer has entered into a bona fide creditor-debtor relationship pervades Federal tax litigation.⁶²⁴⁴ The parties must have actually intended to establish a debtor-creditor relationship for a transaction to be a bona fide loan.⁶²⁴⁵ To find a bona fide creditor-debtor relationship, we must determine that at the time the advances were made there was “an unconditional obligation on the part of the transferee

⁶²³⁸ See part III.B.1.a.ii.(a) Gift Tax Issues. In the income tax arena, debt might be recharacterized as equity. See part II.G.20.b When Debt Is Recharacterized as Equity.

⁶²³⁹ Gift tax applies to not only direct but also indirect gifts. Code § 2511(a); Reg. § 25.2511-1(h)(1), which governs indirect gifts through business entities and is reproduced in part III.B.1.h Transfers in the Ordinary Course of Business.

⁶²⁴⁰ Code § 2701(e)(5). See III.B.7.b Code § 2701 Overview, and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

⁶²⁴¹ Code § 7872(c)(2)(A).

⁶²⁴² Code § 7872(c)(3)(A).

⁶²⁴³ Code § 7872(d)(1).

to repay the money, and an unconditional intention on the part of the transferor to secure repayment.”⁶²⁴⁶

We apply special scrutiny to intrafamily transfers and transactions between entities in the same corporate family or with shared ownership.⁶²⁴⁷ Transfers between family members are presumed to be gifts.⁶²⁴⁸ This presumption can be rebutted by “an affirmative showing that there existed a real expectation of repayment and intent to enforce the collection of the indebtedness.”⁶²⁴⁹ When analyzing transfers between related parties, it is useful to compare the transactions at issue to arm’s-length transactions and normal business practices.⁶²⁵⁰ However, we must also be mindful of the business realities of related parties.⁶²⁵¹ For example, we have held that security and other creditor protections are less important in a related-party context.⁶²⁵²

Dynamo Holdings viewed debt-vs.-equity cases as helpful but not directly on point.⁶²⁵³ Instead, the court looked to a case that the Eleventh Circuit affirmed without a published opinion:

In *Jones v. Commissioner*, we used a long-standing nine-factor facts and circumstances test to determine whether two parties entered into a valid debtor-creditor relationship.⁶²⁵⁴ We evaluated all the pertinent facts and circumstances of the case, including whether:

⁶²⁵³ The court noted that the case would be appealed to the Eleventh Circuit and listed that Circuit’s “13-factor debt-versus-equity test,” which “asks the Court to look to the totality of all the facts and circumstances and specifically directs the Court to consider” various factors, citing *Ellinger v. United States*, 470 F.3d 1325], 1333-1334 (11th Cir. 2006). The Tax Court then noted:

But this is not a debt-versus-equity case. The Commissioner argues that the transfers were gifts, not equity. As a result, our inquiry is not focused on weighing debt versus equity, but rather on considering whether there is a bona fide debt. While the debt-versus-equity test adopted by the Court of Appeals offers some guidance, it is not directly on point.

⁶²⁵⁴ Fn 29 of *Dynamo Holdings* cited here:

Jones v. Commissioner, T.C. Memo. 1997-400, 74 T.C.M. (CCH) 473, 482 (1997), *aff’d without published opinion*, 177 F.3d 983 (11th Cir. 1999).

(1) There was a promissory note or other evidence of indebtedness, (2) interest was charged, (3) there was security or collateral, (4) there was a fixed maturity date, (5) a demand for repayment was made, (6) any actual repayment was made, (7) the transferee had the ability to repay, (8) any records maintained by the transferor and/or the transferee reflected the transaction as a loan, and (9) the manner in which the transaction was reported for Federal tax is consistent with a loan.

Describing its approach that was different than what the parties urged,⁶²⁵⁵ the court stated:⁶²⁵⁶

We apply a special scrutiny to transactions between companies with shared ownership and intrafamily transfers, and we presume that transfers between family members are gifts.⁶²⁵⁷ Here, transfers between Beekman and Dynamo were transfers between companies with both shared ownership and intrafamily transfers.

Reviewing issues relating to formal indicia of debt, the court noted:

Dynamo and Beekman satisfied some but not all of the formal indicia of debt. We agree with the Commissioner that at the time the advances were made there was no contemporaneous promissory note identifying all the terms of the agreement, there was no collateral set aside to ensure repayment, there was no invoice or demand made by Beekman, and there was no fixed maturity date or intent to force Dynamo into bankruptcy if required to ensure repayment. However, there are many meaningful indicia of debt. Dynamo and Beekman maintained records that reflected advances as debt in their general ledgers, and they executed promissory notes.

⁶²⁵⁵ The court noted:

Petitioners allege that Dynamo and Beekman had the intent to repay and be repaid as demonstrated by their subjective declarations of their intent. Conversely, the Commissioner argues that we should draw an adverse inference from Mrs. Moog's failure to testify at trial and infer that Dynamo and Beekman did not intend to repay and be repaid. We disagree with both parties.

⁶²⁵⁶ The court explained:

Beekman and Dynamo had shared ownership and control. Both Dynamo and Beekman were owned in part by trusts for which Christine, Mr. Julien and their families were beneficiaries. Transfers between the two structures were transfers between companies with shared ownership. Transfers between Beekman and Dynamo were ultimately intrafamily transfers. When Beekman made transfers to Dynamo, value was being transferred from one family of companies, the majority of which were held by trusts for which Delia Moog is a beneficiary, Delia Moog Family Trust and Delia Moog Family Trust #2, to another family of companies, the majority of which were held by trusts for which her daughter and nephew and their families were beneficiaries. While Christine and Mr. Julien were also beneficiaries of some of the trusts which owned Beekman, the transfers from Beekman to Dynamo reduced Delia Moog's beneficial interest in the underlying properties in favor of her daughter, her nephew, and their families.

Given the nature of these transfers, we treat them with special scrutiny and determine whether the advances are gifts or loans for Federal tax purposes on the basis of the totality of the circumstances.³³ On that basis we find that the advances were loans.

³³ See *Estate of Mixon*, 464 F.2d at 402.

⁶²⁵⁷ Fn 32 of *Dynamo Holdings* cited here:

Perry v. Commissioner, 92 T.C. at 481; *Kean v. Commissioner*, 91 T.C. at 595; *Vinikoor v. Commissioner*, 75 T.C.M. (CCH) at 2187.

Regarding issues relating to formal indicia of debt, the court concluded:

We are not troubled by any shortcomings in Dynamo’s and Beekman’s formal indicia of debt. They must be taken into account in the context of the business realities of the transaction. We would be surprised if Mr. Julien wrote himself an invoice, demanded repayment, or required a credit check or audited financial statements before making an advance. The management of these companies was the same, and they had full knowledge of and access to all financial information. Moreover, we have consistently held that these formal indicia of debt are little more than declarations of intent without accompanying objective economic indicia of debt.⁶²⁵⁸

Dynamo Holdings then reviewed the “economic indicia of debt”:

In ascertaining the economic realities of the transaction, it is helpful to measure the transfer against the economic realities of the marketplace to determine whether a third party lender would have extended the loan.⁶²⁵⁹ *Dynamo* and *Beekman* satisfy all the objective economic indicia of debt. *Beekman* charged and *Dynamo* accrued interest on the advances in 2006 and 2007. *Beekman* reported and paid tax on that interest income. *Dynamo* reported and deducted that interest expense. *Dynamo* repaid some of the advances before any examination began. At all times, *Dynamo* had the ability to repay the loans. Importantly, *Dynamo* could have received loans on substantially similar terms. And *Dynamo* did receive sizable loans from third parties.

Dynamo Holdings concluded on this issue:

After analyzing the facts, we hold that *Dynamo* and *Beekman* entered into a bona fide creditor-debtor relationship. At the time the advances were made, *Dynamo* had an unconditional obligation to repay the loans, and *Beekman* had an unconditional intent to be repaid. A bona fide loan precludes a constructive distribution.⁶²⁶⁰ Because we found that the advances were bona fide debt, the advances are not constructive distributions. Likewise, *Dynamo* is entitled to deduct the interest expenses.

Although the *Dynamo Holdings* taxpayers prevailed, they had to overcome their documentation weaknesses. One might consider documenting the expectation of repayment and the loan itself using the principles of Reg. § 1.385-2; I am not at all suggesting that such documentation is necessary but merely that a tax planner who is extraordinarily cautious might find some comfort there.⁶²⁶¹ This is part of part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense; see also parts II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt,

⁶²⁵⁸ Fn 45 of *Dynamo Holdings* cited here:

⁶²⁵⁹ Fn 46 of *Dynamo Holdings* cited here:

Sensenig v. Commissioner, at *26-*27.

⁶²⁶⁰ Fn 58 of *Dynamo Holdings* cited here:

Schnallinger v. Commissioner, T.C. Memo. 1987-9 (1987).

⁶²⁶¹ As part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense discusses, generally Reg. § 1.385-2 targets C corporations engaged in international financial transactions and would not apply to intra-family loans for estate planning. However, if one can satisfy Reg. § 1.385-2, which was geared toward perceived abuses, presumably one would go a long way toward showing a loan’s bona fides.

II.G.4.d.ii Using Debt to Deduct S Corporation Losses (discussing deducting S corporation losses against loans from shareholders to the corporation and the consequences of doing so), and II.Q.7 Exiting from or Dividing a Corporation, text accompanying fns 4825-4827 (payments to employee-shareholder characterized as distributions or compensation instead of loans). For a case describing a family's heroic efforts to shore up a family business, first investing money, then buying subordinated debt that faced foreclosure and later converting the debt into senior preferred equity, which were still not enough to save the company, generating a loss of the initial investment, see *MCM Investment Management, LLC v. Commissioner*, T.C. Memo. 2019-158, which is described in detail in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.⁶²⁶²

Estate of Moore v. Commissioner, T.C. Memo. 2020-40, discussed whether transfers were loans or gifts:

"A purported loan between family members is always subject to close scrutiny.... The presumption, for tax purposes at least, is that a transfer between family members is a gift." *Perry v. Commissioner*, 92 T.C. 470, 481 (1989), *aff'd* without published opinion, 912 F.2d 1466 (5th Cir. 1990). The presumption may be rebutted upon a showing that the transferor had a real expectation of repayment and an intention to enforce the debt. *Estate of Van Anda v. Commissioner*, 12 T.C. 1158, 1162 (1949), *aff'd*, 192 F.2d 391 (2d Cir. 1951). A promise to pay money in the future coupled with an implied understanding that the promise will not be enforced does not create a true debtor-creditor relationship. As we held in *Estate of Maxwell v. Commissioner*, 98 T.C. 594, 605 (1992), *aff'd*, 3 F.3d 591 (2d Cir. 1993), "a stated obligation to pay a fixed sum of money may be disregarded as having no value where the facts show that the parties did not contemplate that the obligation would be met."

Whether there's a true loan is a question of fact, and we have several factors to help determine whether a transfer creates a bona fide debt:

- the name given to the instrument underlying the transfer of funds;
- the presence or absence of a fixed maturity date and a schedule of payments;
- the presence or absence of a fixed interest rate and actual interest payments;
- the source of repayment;
- the adequacy or inadequacy of capitalization;
- the identity of interest between creditors and equity holders;
- the security for repayments;
- the transferee's ability to obtain financing from outside lending institutions;
- the extent to which repayment was subordinated to the claims of outside creditors;

⁶²⁶² Text between that accompanying fns 1558-1563.

- the extent to which transferred funds were used to acquire capital assets; and
- the presence or absence of a sinking fund to provide repayment.

Estate of Rosen, 91 T.C.M. (CCH) at 1236; see also *Zimmerman v. United States*, 318 F.2d 611, 613 (9th Cir. 1963); *Hubert Enters., Inc. v. Commissioner*, 125 T.C. 72, 92 (2005), *aff'd in part, rev'd in part* on other grounds and remanded, 230 F.App'x 526 (6th Cir. 2007).

We do find it more likely than not that these were gifts:

- Each of Moore's children signed a note promising to pay back to the FLP \$500,000 on or before February 2010. Interest on the purported loans was set at 3.56% per annum. This factor weighs in favor of a finding that the transfer of the FLP funds created a bona fide debt. But ...
- The promissory notes have no fixed payment schedule. This factor weighs against a finding of bona fide debt. See *Roth Steel Tube Co. v. Commissioner*, 800 F.2d 625, 631 (6th Cir. 1986), *aff'g* T.C. Memo. 1985-58; *Estate of Rosen v. Commissioner*, 91 T.C.M. (CCH) at 1237.
- Moore's children have never paid any interest on the loans despite the notes' requirement to do so. The estate asserts that Moore's children simply did not understand the terms of the loans, but during trial they testified that Hahn had advised them that they did not need to make payments. The FLP has never demanded repayment. These facts persuade us that Moore's children did not intend to make interest payments and the facts weigh strongly against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 631; *Estate of Rosen*, 91 T.C.M. (CCH) at 1237.
- Lynda testified that she intended to pay back the loan to the FLP with FLP assets - assets currently unavailable as a result of the estate's litigation with the Commissioner. Repayment that depends solely on earnings does not support a finding of bona fide debt. *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1237.
- The record does not provide any evidence that Moore's children had the resources to repay the loans. Thin or inadequate capitalization to fund a transferee's obligations weighs against a finding of bona fide debt. *Estate of Rosen*, 91 T.C.M. (CCH) at 1237-38.
- There is a disproportionate ratio between Moore's children's ownership interests in the FLP and the debt they owe to it - this tends to weigh in favor of a bona fide debt. See *id.* at 1238.
- The promissory notes signed by Moore's children were not secured - this weighs strongly against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.
- Given that Moore's children did not have any security for the purported loans, and the absence of any evidence that they had the resources to repay the loans, we do

not believe that they would have been able to obtain comparable funding from another lender. This weighs against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 631; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

- Because the funds from the FLP were unsecured, they would have been subordinate to other claims. But without any known creditors of Moore's children this factor is either inapplicable or weighs slightly against the finding of bona fide debt. See *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.
- There is very little on the record regarding the children's use of the funds though the estate contends that the children made very poor investments. We will give this factor little weight.
- Nothing on the record suggests that Moore's children set aside funds - aside from their plan to use FLP assets to repay their debts to the FLP - to repay their notes. This weighs against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

We pick a path through the prongs to what we think is the most important fact of all - Moore listed a desire for each of his children to receive \$500,000 as one of his estate planning goals. Hahn even testified that the payments needed to be loans for tax purposes—that “having [them] as a gift wouldn't be the best use of the tax laws.” We find Hahn credible on this point to the very limited extent that we agree that it would benefit the estate to make the transfers look like loans. But we also find that Moore's intent to make gifts and the children's course of conduct that treated the transfers as gifts mean that those transfers were not in fact loans.

Based on our review of the record, we find that the \$500,000 transfers of FLP funds to Moore's children were not loans but gifts subject to section 2501 to the extent that they exceed the exclusion under section 2503(b). Additionally, because the gifts to his children were made within the three-year period preceding Moore's death, the gross estate is increased by the value of tax paid on these gifts.²¹ See sec. 2035(b).

²¹ Section 2035(b) states that the “amount of the gross estate ... shall be increased by the amount of any tax paid under chapter 12 by the decedent or his estate on any gift made by the decedent or his spouse during the 3-year period ending on the date of the decedent's death.”

Regarding another loan, *Estate of Moore v. Commissioner*, T.C. Memo. 2020-40, held:

A taxpayer must prove that when the funds were disbursed there was an “unconditional obligation and intent on the part of the transferee to repay the money and an unconditional intent on the part of the transferor to secure repayment.” *Estate of Rosen*, 91 T.C.M. (CCH) at 1236; see also *Busch v. Commissioner*, 728 F.2d 945, 948 (7th Cir. 1984), *aff'd* T.C. Memo. 1983-98; *Haag v. Commissioner*, 88 T.C. 604, 615-16 (1987), *aff'd*, 855 F.2d 855 (8th Cir. 1988).

There is very little on the record that indicates that the \$2 million transfer from the FLP to the Living Trust was a loan: Lynda testified during trial that she “believed” the FLP had lent Moore money but was unaware of any details, even though the estate tax return reflects the payment as a loan. Other than that, there is nothing. There is no evidence

in the record that there was ever a promissory note, that the FLP ever charged interest or the Living Trust ever paid it, or that there was any collateral for the loan. It also appears that there was no maturity date on the loan and that no payments were made. As of the date of trial there has never been a demand for repayment. The estate simply did not meet its burden. We, therefore, find that the estate is not entitled to deduct the \$2 million payment as a loan. On the other hand, we do find that Moore spent this money before he died, mostly on income tax that he owed on the sale of the farm. It should not be included in his taxable estate under section 2033.²²

²² As the Commissioner notes, the Moore children themselves kicked in \$400 at the FLP's inception. See *supra* p. 14. The parties should make a small adjustment in their Rule 155 computations so this is not taxed.

Estate of Mary P. Bolles v. Commissioner, T.C. Memo. 2020-71, discussed whether advances were loans or gifts:

Both parties rely on the analysis of *Miller v. Commissioner*, T.C. Memo. 1996-3, *aff'd*, 113 F.3d 1241 (9th Cir. 1997), for the traditional factors used to decide whether an advance is a loan or a gift. Those factors are explained as follows: (1) there was a promissory note or other evidence of indebtedness, (2) interest was charged, (3) there was security or collateral, (4) there was a fixed maturity date, (5) a demand for repayment was made, (6) actual repayment was made, (7) the transferee had the ability to repay, (8) records maintained by the transferor and/or the transferee reflect the transaction as a loan, and (9) the manner in which the transaction was reported for Federal tax purposes is consistent with a loan.

These factors are not exclusive. See, e.g., *Estate of Maxwell v. Commissioner*, 98 T.C. 594 (1992), *aff'd*, 3 F.3d 591 (2d Cir. 1993). In the case of a family loan, it is a longstanding principle that an actual expectation of repayment and an intent to enforce the debt are critical to sustaining the tax characterization of the transaction as a loan. *Estate of Van Anda v. Commissioner*, 12 T.C. 1158, 1162 (1949), *aff'd per curiam*, 192 F.2d 391 (2d Cir. 1951).

While Mary recorded the advances to Peter as loans and kept track of interest, there were no loan agreements or attempts to force repayment. Respondent focuses on the lack of security for the loans to Peter. We agree that the reasonable possibility of repayment is an objective measure of Mary's intent. The estate maintains that during her life Mary always considered these advances as loans. We cannot reconcile this argument with the deterioration of Peter's financial situation and the ultimate failure of his practice in San Francisco and later in Las Vegas.

Peter's creativity as an architect and his ability to attract clients likely impressed Mary. We find she expected him to make a success of the practice as his father had, and she was slow to lose that expectation. However, it is clear she realized he was very unlikely to repay her loans by October 27, 1989, when her trust provided for a specific block of Peter's receipt of assets at the time of her death. Accordingly, in 1990 the "loans" lost that characterization for tax purposes and became advances on Peter's inheritance from Mary. In conclusion, we find the advances to Peter were loans through 1989 but after that were gifts. We have considered whether she forgave any of the prior loans in 1989, but we find that she did not forgive the loans but rather accepted they could not be repaid on the basis of Peter's financial distress.

In an unpublished opinion, the Ninth Circuit affirmed, 133 AFTR 2d 2024-XXXX (4/1/2024):

The Tax Court calculated the Estate's tax deficiency based on its findings regarding various payments that Mary Bolles made to her son Peter between 1985 and 2007. Specifically, it found that the payments from 1985 through 1989 were loans, but the payments from 1990 through 2007 were gifts. Intrafamily transactions are presumed to be gifts; for an intrafamily payment to be considered a loan, there must have been a bona fide creditor-debtor relationship between the two parties, *Miller v. Comm'r*, T.C. Memo. 1996-3 at *7, *aff'd*, 113 F.3d 1241 (9th Cir. 1997), characterized by "a real expectation of repayment and intent to enforce the collection of the indebtedness," *Estate of Van Anda v. Comm'r*, 12 T.C. 1158, 1162 (1949).

The Tax Court did not clearly err by determining that Mary's payments to Peter from 1985 through 1989 were loans because the circumstances indicate that a bona fide creditor-debtor relationship existed between them. Peter had been running his father's architecture practice since the early 1970s, but by the mid-1980s it was not current on its bills. Mary was familiar with fluctuations in the financial fortunes of the practice, having frequently loaned money to her husband to support it. These loans from Mary to her husband were always repaid. It is reasonable to conclude that Mary expected Peter to use the payments to make a success of the practice as his father had done in the past and repay her once the practice regained solvency. It was thus reasonable for the Tax Court to conclude that Mary had a real expectation of repayment, and that the payments from 1985 through 1989 were loans. See *Van Anda*, 12 T.C. at 1162.

Unlike the payments from 1985 through 1989, the payments after 1990 were made under different circumstances. First, unlike the early years of Mary's payments to Peter, there is no evidence that Peter made any repayments during this period. Second, in late 1989, Peter was specifically excluded from Mary's personal trust. And third, Peter signed an agreement acknowledging that "he has neither the assets, nor the earning capacity" to make repayments. It was reasonable for the Tax Court to conclude that there was no bona fide creditor-debtor relationship between Mary and Peter during this period, and accordingly that the payments from 1990 through 2007 were gifts.¹

¹ The Estate claims that Mary's personal trust has no tax-reporting or payment responsibilities with respect to the payments from Mary to Peter that are classified as gifts, since the gifts were made by Mary, not the trust. We disagree. A foundational principle in estate law is that a decedent's liabilities become part of her estate after death. See George G. Bogert, *The Law of Trusts and Trustees* 2 § 12 (2024) (noting that the executor pays the decedent's debts out of the estate). Indeed, estate tax is imposed not on the decedent herself, but on the transfer of her taxable estate. 26 U.S.C. § 2001(a); see also *id.* § 2002 (noting that the estate tax "shall be paid by the executor [of the estate]") (emphasis added). Mary's trust is not a separate taxpayer from Mary for purposes of the estate tax.

The Tax Court did not clearly err by calculating an estate tax deficiency based on a finding that Mary's payments to Peter from 1985 through 1989 were loans, but that the payments from 1990 through 2007 were gifts.

For loans of shares, see part II.A.1.d Lending Securities.

III.B.1.a.i.(b). Term Loans

Term loans with an interest rate below the AFR immediately result in a completed gift of the difference between the amount of proceeds and the value of the repayments using the AFR. For instance, the July 2005 mid-term monthly AFR was 3.79%. On a five-year loan of \$100,000, the monthly payment would be \$1,832. An interest-free loan, however, would generate a monthly payment of only \$1,667. The monthly difference between the two payments is \$165. The present value of five years' worth of \$165 monthly payments is \$9,006 (at the AFR), a figure which also represents the completed gift.

If an interest-free or below-market term loan is made, the lender is treated as having transferred an amount equal to the money loaned, less the present value of all payments due under the loan.⁶²⁶³ The present value is calculated using a discount rate equal to the AFR for the term of the loan.⁶²⁶⁴ If principal payments are fixed in total amount but uncertain as to time, for the term use the latest possible date on which a principal payment can be made.⁶²⁶⁵ Although some have suggested that, for sales, one could use the AFR for the month of the sale or for either of the two preceding months, in an intra-family transaction I would always use the AFR for the month of sale.⁶²⁶⁶

The loan will be considered to have original issue discount ("OID") in an amount equal to the excess of the money loaned over the present value of the payments due on the loan.⁶²⁶⁷ The lender will accrue interest income in each year of the loan. The borrower's tax treatment on the loan depends on whether he or she can deduct the interest. If deductible, it must be deducted in each year of the loan.

However, Reg. § 1.1273-2(a)(1), "Issue price," begins with:

If a substantial amount of the debt instruments in an issue is issued for money, the issue price of each debt instrument in the issue is the first price at which a substantial amount of the debt instruments is sold for money. Thus, if an issue consists of a single debt instrument that is issued for money, the issue price of the debt instrument is the amount paid for the instrument. For example, in the case of a debt instrument evidencing a loan to a natural person, the issue price of the instrument is the amount loaned.

III.B.1.a.i.(c). Demand Loans

Demand loans (those immediately callable at any time), are valued annually for gift tax purposes. The short-term AFR is used, assuming that on the last day of the year, the amount of interest was paid to the lender, who in turn made a gift back to the borrower.⁶²⁶⁸

⁶²⁶³ Code §§ 7872(b)(1), 7872(d)(2).

⁶²⁶⁴ Code § 7872(f)(1).

⁶²⁶⁵ Reg. § 1.1274-4(c)(4), which also provides that, "in the case of an installment obligation, [refer] to the longest weighted average maturity under any possible payment schedule."

⁶²⁶⁶ See Steve Leimberg's Estate Planning Email Newsletter - Archive Message #1447. I have additional commentary saved as document # 5278071, which even more strongly reinforces my view as applied to sales to irrevocable grantor trusts.

⁶²⁶⁷ Code § 7872(b)(2)(A). Added to this OID amount is any OID that the loan would carry before considering the gift element. Code § 7872(b)(2)(B).

⁶²⁶⁸ Code § 7872(a)(1); See generally Kathryn Henkel ¶ 28.02, Section 7872: Imputed Interest on Below-Market Loans, Estate Planning and Wealth Preservation (June 2005).

A demand loan could call for annual interest payments.

Every July, the IRS releases a blended annual rate.⁶²⁶⁹

Suppose the client wants to extend a line of credit to a business or family member. Below are terms one might use:

For value received, the undersigned, _____ (“Borrower”), acting by and through its fiduciaries in their fiduciary capacity only, promises to pay to the order of _____ (“Lender”), the principal sum of _____ Dollars (\$_____), increased by any additional amounts Lender disburses to Borrower, all as documented or may be documented from time to time on Schedule A, such amount (as may be increased) on demand (the “Maturity Date”), together with all accrued interest thereon, as provided in this Promissory Note (the “Note”).

This Note may be funded in multiple advances (each an “Advance” and collectively referred to herein as “Advances”) upon the request of Borrower at any time after the date hereof until the Maturity Date.

Borrower further promises to pay to the order of Lender interest from time to time on the outstanding principal balance of this Note from the date of this Note to the Maturity Date at the rate of _____ Percent (____%) per annum. Absent prior demand, all accrued and unpaid interest on this Note shall be due and payable annually on each December 31 during the term of this Note, commencing on December 31, _____, and on the Maturity Date. All payments received by Lender under this Note shall be allocated first to accrued and unpaid interest and then to principal. Lender shall adjust the interest rate hereof at the time of each Advance to the Applicable Federal Rate under Section 1274 of the Internal Revenue Code of 1986, as amended (the “AFR”) if the AFR is higher than the then-current interest rate on this Note. Lender shall also adjust the interest rate hereof each January 1 if the rate for the year that contains that January 1 as determined under Revenue Ruling 86-17 (or any administrative or regulatory pronouncement that replaces it) (the “Blended Rate”) is greater than the interest rate that would apply but for this sentence. If the AFR or Blended Rate, as the case may be, is higher than the then-current interest rate on this Note, then such higher rate shall apply to the entire outstanding principal balance of this Note, with the interest accruing at that higher rate as of the adjustment date. The amount of interest accruing under this Note shall be compounded on a daily basis.

Thus:

- Each time an advance is made, I look at the short-term rate and use the higher of the loan’s current rate or the short-term rate at the time of the loan.
- Every summer, when the blended annual rate for demand loans is issued, I adjust the interest rate retroactively to January 1 if the blended rate exceeds the interest rate that otherwise applies that January 1.

⁶²⁶⁹ Prop. Reg. § 1.7872-13(a). For example, see Rev. Rul. 2019-16, Table 6, one in a series that began with Rev. Rul. 86-17.

- Each December I calculate the interest due and inform the client. At that time, and each time the client communicates any other advances and payments to me, I ask whether we should lock in the term and interest rate. I normally don't have more than one or two of the loans outstanding at any particular time, and nobody got caught by the 2022 surge in interest rates.

The software I use is [TValue 6 - TimeValue Software](#), which makes these calculations very easy to do. It lets one input various loans and payments and change interest rates as often as one wants very quickly and easily.

In the interest of simplicity, my methodology concedes more than is necessary. If the interest rate decreases, my methodology does not give the taxpayer the benefit. Furthermore, theoretically, each advance is a separate loan, so the interest rate would start at the short-term AFR and then move to the blended annual rate and change every year, without regard to any higher interest rates that apply to subsequent loans. Furthermore, the order in which payments are to be applied to each loan is unclear in such a situation. Ultimately, the question is how material the difference in methods would be, in terms of the cost of the time to calculate vs. the tax saved.

III.B.1.a.i.(d). Refinancing or Cancelling Loans

Regulations provide some flexibility in loan work-outs⁶²⁷⁰ or other loan modifications;⁶²⁷¹ for the latter, see part II.G.31.a Debt Modifications. For a general discussion of the relevant issues, see *Hunt v. Commissioner*, T.C. Memo. 1989-335. Where the surrounding circumstances indicate that a debt is worthless and uncollectible and that legal action to enforce payment would in all probability not result in the satisfaction of execution on a judgment, a showing of these facts will be sufficient evidence of the worthlessness of the debt for purposes of the Code § 166 bad debt deduction.⁶²⁷²

For income and transfer tax consequences of cancellation by reason of gift or bequest and issues raised by discounting the value of a note on death, see part III.B.5.b Promissory Notes.

See also part II.G.31.b Debt Forgiveness.

When refinancing, canceling or otherwise transferring notes arising from a taxable sale, also see part II.G.15 Limitations on the Use of Installment Sales.

III.B.1.a.i.(e). Payment in Kind

Plans to pay in kind concern me. Part II.A.1.d.i Code § 1058 Loan of Securities generally requires that a loan of securities must be repaid with an equity return. Of course, those are income tax rules, not estate tax rules, but without any estate tax rules addressing these issues a court might analogize.

Thus, if securities are sold to a trust for a note that is expected to be repaid with those securities and the IRS successfully asserts that the sale was essentially a loan of the securities, could the

⁶²⁷⁰ Prop. Reg. § 1.7872-11(a)(2), providing no income taxation in some situations when accrued interest is forgiven.

⁶²⁷¹ Reg. § 1.1001-3(c), discussing exceptions to the general rule that a significant modification of debt instrument is a taxable exchange.

⁶²⁷² Reg. § 1.166-2(b).

IRS assert that any payment less than an equity return constituted a gift? Consider whether to create cash flow projections showing realistically how the note will be repaid. I would keep those in a privileged file until IRS audits and then consider producing it. That's because, if one attached those projections to a gift tax return and payments vary from the schedule, the IRS might assert that the taxpayer is not following the plan and that the note should be disregarded.

III.B.1.a.i.(f). Interest Rate for Sales

Code § 1274(d)(2), "Lowest 3-month rate applicable to any sale or exchange," provides:

- (A) *In general.* In the case of any sale or exchange, the applicable Federal rate shall be the lowest 3-month rate.
- (B) *Lowest 3-month rate.* For purposes of subparagraph (A), the term "lowest 3-month rate" means the lowest of the applicable Federal rates in effect for any month in the 3-calendar-month period ending with the 1st calendar month in which there is a binding contract in writing for such sale or exchange.

Reg. § 1.1274-4(a), "Determination of test rate of interest," provides:

- (1) *In general.*
 - (i) *Test rate is the 3-month rate.* Except as provided in paragraph (a)(2) of this section, the test rate of interest for a debt instrument issued in consideration for the sale or exchange of property is the 3-month rate.
 - (ii) *The 3-month rate.* Except as provided in paragraph (a)(1)(iii) of this section, the 3 month rate is the lower of -
 - (A) The lowest applicable Federal rate (based on the appropriate compounding period) in effect during the 3 month period ending with the first month in which there is a binding written contract that substantially sets forth the terms under which the sale or exchange is ultimately consummated; or
 - (B) The lowest applicable Federal rate (based on the appropriate compounding period) in effect during the 3 month period ending with the month in which the sale or exchange occurs.
 - (iii) *Special rule if there is no binding written contract.* If there is no binding written contract that substantially sets forth the terms under which the sale or exchange is ultimately consummated, the 3-month rate is the lowest applicable Federal rate (based on the appropriate compounding period) in effect during the 3-month period ending with the month in which the sale or exchange occurs.
- (2) *Test rate for certain debt instruments.*
 - (i) *Sale-leaseback transactions.* Under section 1274(e) (relating to certain sale-leaseback transactions), the test rate is 110 percent of the 3-month rate determined under paragraph (a)(1) of this section. For purposes of section 1274(e)(3), related party means a person related to the transferor within the meaning of section 267(b) or 707(b)(1).

(ii) *Qualified debt instrument.* Under section 1274A(a), the test rate for a qualified debt instrument is no greater than 9 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.

(iii) *Alternative test rate for short-term obligations.*

(A) *Requirements.* This paragraph (a)(2)(iii)(A) provides an alternative test rate under section 1274(d)(1)(D) for a debt instrument with a maturity of 1 year or less. This alternative test rate applies, however, only if the debt instrument provides for adequate stated interest using the alternative test rate, the issuer provides on the face of the debt instrument that the instrument qualifies as having adequate stated interest under section 1274(d)(1)(D), and the issuer and holder treat or agree to treat the instrument as having adequate stated interest.

(B) *Alternative test rate.* For purposes of paragraph (a)(2)(iii)(A), the alternative test rate is the market yield on U.S. Treasury bills with the same maturity date as the debt instrument. If the same maturity date is not available, the market yield on U.S. Treasury bills that mature in the same week or month as the debt instrument is used. The alternative test rate is determined as of the date on which there is a binding written contract that substantially sets forth the terms under which the sale or exchange is ultimately consummated or as of the date of the sale or exchange, whichever date results in a lower rate. If there is no binding written contract, however, the alternative test rate is determined as of the date of the sale or exchange.

Does the lower interest apply to a sale to an irrevocable grantor trust – a transaction that is disregarded for income tax purposes but is recognized for gift and estate tax purposes?⁶²⁷³

I am unaware of any definitive authority, although I have seen a relatively persuasive argument that one can use the lower rate.⁶²⁷⁴ However, I do not use the lower rate - given that the difference in interest rates is not going to materially improve the transaction, allowing the note to get paid off a month or perhaps a few months earlier is not worth the risk of the IRS trying to get settlement value from legal arguments about the issue.⁶²⁷⁵

⁶²⁷³ See parts III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially part III.B.2.d.i Federal Income Tax and Irrevocable Grantor Trust Treatment and its subpart III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

⁶²⁷⁵ Characterizing using the lower interest rate as “unwise” on page 142, Akers, Stephen R. and Hayes, Philip J. (2012) “Estate Planning Issues With Intra-Family Loans and Notes,” *ACTEC Law Journal*: Vol. 38: No. 2, Article 2, available at: <https://scholarlycommons.law.hofstra.edu/actec/lj/vol38/iss2/2>.

III.B.1.a.ii. Loan Guarantees

Generally, a guarantee (guaranty) is a promise to pay another person's debt, and the borrower is required to repay the guarantor any funds the grantor pays on the borrower's behalf:⁶²⁷⁶

- The lender loans to the borrower.
- The guarantor promises that the loan will be repaid. The guarantee may be for part or all of the loan.
- At some point, the lender may collect from the guarantor.
- The guarantor steps into the lender's shoes with respect to the amount the lender collects (subrogation right). Using this subrogation right, the guarantor can attempt to collect from the borrower.
- The guarantor is out-of-pocket only for amounts not collected from the borrower (including collection expenses, which loans usually impose on the borrower).

Generally, a lender enforces the guarantee when the borrower defaults. The guarantee agreement may require the lender to take various actions against the borrower before collecting from the guarantor. Or, it may allow the lender to collect from the guarantor once the event of default concerns, essentially placing the full burden of collection efforts on the guarantor. To

⁶²⁷⁶ *Standard Oil Company of New Jersey v. Commissioner*, 7 T.C. 1310, 1321 (1946) (a reviewed decision supplemented 11 T.C. 843 (1948), *acq.* 1949-2 C.B. 3), held:

Guaranty is defined in 38 C.J.S. 1129 as follows:

A guaranty or guarantee may be generally defined as a collateral promise or undertaking by one person to answer for the payment of some debt or the performance of some contract or duty in case of the default of another person, who in the first instance is liable for such payment or performance; a collateral promise or undertaking to pay a debt owing by a third person in case the latter does not pay.

A guaranty may be one of various kinds, such as an absolute or conditional guaranty, a guaranty of payment or of collection, a general, special, continuing, or unlimited guaranty, or a letter of credit. 38 C.J.S. 1139. In the instant proceeding, as noted above, the agreement of November 6, 1929 states that the guaranty thereby given shall be deemed a continuing guaranty. In 38 C.J.S. 1142 A continuing guaranty is one which is not limited to a single transaction, but which contemplates a future course of dealing, covering a series of transactions, generally for an indefinite time or until revoked.

In 38 C.J. S. 1130, it is stated:

A guaranty in its technical and legal sense has relation to some other contract or obligation with reference to which it is a collateral undertaking; it is a secondary and not a primary obligation.

Numerous authorities are cited in the footnote for the above proposition, including *Howell v. Commissioner*, 69 Fed. (2d) 447. In that case the Circuit Court of Appeals, Eighth Circuit, among other things said:

That in the case of suretyship or guaranty there is an implied agreement on the part of the principal debtor to reimburse his surety or guarantor is unquestioned. See *Melletee Farmers' Elevator Co. v. H. Poehler Co.* (D.C.) 18 Fed. (2d) 430; *In re Dailey et al.* (D.C.) 19 Fed. (2d) 95; *United States Fidelity & Guaranty Co. v. Centropolis Bank of Kansas City, Mo.* (C.C.A. 8) 17 Fed. (2d) 913, 917, 53 A.L.R. 295; *National Surety Co. v. Salt Lake County* (C.C.A. 8) 5 Fed. (2d) 34; (compare *Jenkins v. National Surety Co.*, 277 U.S. 258, 48 S.Ct. 445, 72 L.Ed. 874); 28 C.J. 1037.

make it even easier for the lender to collect from the guarantor, the lender may require that the loan documentation show the guarantor not as such but rather as a nominal co-borrower. The true borrower receives the loan proceeds and makes payments, and the guarantor/nominal co-borrower steps in only if the true borrower is unable to pay. If co-borrowers own the collateral securing the loan, one co-borrower might transfer the collateral to the other and the other assumes the loan, so that the transferee becomes the only true borrower and the transferor becomes a mere guarantor.⁶²⁷⁷

Case law and related authority look to whether, when the guarantee was made, the guarantor intended to enforce the guarantor's subrogation right. This intent must be proven objectively by analyzing whether one could reasonably expect the borrower to repay the loan. If so, making the guarantee does not constitute a gift (see part III.B.1.a.ii.(a) Gift Tax Issues Involving Loan Guarantees), and any payment under a loan guarantee (net of any collection from the borrower under the subrogation right) is deductible for estate tax purposes as a claim against the estate (see part III.B.1.a.ii.(b) Code § 2053 Estate Tax Deduction re Loan Guarantees). For income tax consequences of a guarantor's payments, see part III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees.

Most of the cases described in parts III.B.1.a.ii.(a) and III.B.1.a.ii.(b) were decided before *Dickman v. Commissioner*, 465 U.S. 330 (1984),⁶²⁷⁸ held that a loan may have gift tax consequences. This aspect of *Dickman* was codified by Code § 7872, which provides that lending money at no less than the applicable federal rate does not constitute a transfer.⁶²⁷⁹ Let's unpack the implications of this codification:

- Code § 7872(e)(1) and (f)(2) refer to the applicable federal rate (AFR) under Code § 1274(d).
- Code § 1274(d)(1)(C) determines the AFR "based on the average market yield ... on outstanding marketable obligations of the United States...."
- In the appraisal profession, such obligations are the benchmark for risk-free rates of return. Appraisers then add various risk factors to determine an appropriate discount rate or required rate of return.
- Therefore, under Code § 7872, loans are deemed to charge adequate interest if they charge interest based on a risk-free loan.

In other words, given that Code § 7872 applies to borrowers who are not the U.S. government and places no qualifications whatsoever on who may use it, Congress has decreed that credit risk is not taken into account in determining adequacy of interest! It's not quite that simple, however, in that Code §§ 1271-1275 are read together as one coherent set of rules. In determining whether to give effect to a schedule of stated payments, Reg. § 1.1273-1(c)(1)(ii) ignores "the possibility of nonpayment due to default, insolvency, or similar circumstances" unless "the lending transaction does not reflect arm's length dealing and the holder does not intend to enforce the remedies or other terms and conditions." Thus, if one structures a loan with terms (other than interest rate) that reflect arm's length dealing, the only remaining issue is

⁶²⁷⁷ An example of this is *Estate of Hendrickson v. Commissioner*, T.C. Memo. 1999-357, discussed in part III.B.1.a.ii.(b) Code § 2053 Estate Tax Deduction re Loan Guarantees.

⁶²⁷⁸ Discussed further in text accompanying fns 6233-6234 in part III.B.1.a Business Opportunities.

⁶²⁷⁹ See part III.B.1.a.i Loans.

whether the holder intends to enforce the remedies and other terms and conditions. Fortunately, we have a body of law that determines this intent – the pre- and post-*Dickman* authority described in parts III.B.1.a.ii.(a) and III.B.1.a.ii.(b) referred to above.

Compare a loan guarantee to a back-to-back loan. In the latter, instead of guaranteeing a loan, the person whose credit capacity (the “credit intermediary”) is to be used borrows from a commercial lender, then loans the proceeds to the ultimate borrower. The borrower grants a security interest to the credit intermediary, which the credit intermediary then assigns (together with whatever collateral the credit intermediary provides) to the lender. This back-to-back mechanism is not just an estate planning tool – rather, it is required for a shareholder in an S corporation to obtain basis against which to deduct the corporation’s debt-financed losses.⁶²⁸⁰

Consider the terms of the back-to-back loan. Nothing in Code § 7872 looks to the source of a lender’s funds – how much interest the credit intermediary pays on the loan from the commercial lender that the credit facilitator uses to loan to the ultimate borrower. Thus, the credit intermediary can obtain a loan at market interest rates, which take into account the risk a commercial lender takes in lending to the credit intermediary, then turn around and loan that money to the ultimate borrower at the AFR – a risk-free interest rate. Code § 7872 prevents the arbitrage – the excess of interest paid to the commercial lender over the AFR – from constituting a gift. Furthermore, the credit intermediary must pay the commercial lender whether or not the ultimate borrower is performing on the loan.

Because the interest arbitrage and financial risk the credit intermediary incurs exceed the cost and risk assumed by a guarantor and such an arrangement does not constitute a gift, I believe that Code § 7872 inherently means that a loan guarantee does not constitute a gift – but if and only if objectively there was a reasonable expectation that the borrower would pay the loan and the guarantee was merely to bridge the gap between a reduced-risk loan and the risks inherent in loaning to that particular borrower. If the client wants to reduce whatever tax risk a loan guarantee presents, the client can engage in a back-to-back loan, but consider that the client:

- Still needs to be able to prove a reasonable expectation that the borrower would pay the loan, and
- Must deal directly with the lender and borrower on a regular (sometimes monthly) basis, whereas with a loan guarantee the guarantor has no role regarding loan payment until the borrower defaults.

The latter bullet point is a key reason why a client may want to be a guarantor instead of the credit intermediary in a back-to-back loan. Enforcing loans to family members can disrupt family relationships. My personal view is that making the borrower deal with a bank injects formality into the process and increases the likelihood of payment. Whenever a client asks me about possibly loaning to a friend, I first ask whether not getting repaid would ruin the friendship (and the client’s financial position) and also recommend offering to guarantee a bank loan to that friend instead; those questions usually put the kibosh on the friend’s request. Considering these dynamics, relative to a back-to-back loan a loan guarantee seems to me to have a strong nontax business reason.

⁶²⁸⁰ See part II.G.4.d.ii Using Debt to Deduct S Corporation Losses.

Tribune Media Company v. Commissioner, T.C. Memo. 2021-122, respected a guaranty that was unlikely ever to be called; for an excerpt from with a complete discussion, see part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

One CPA expressed concern to me that an S corporation guaranteeing a loan made to a shareholder might generate a second class of stock if “a principal purpose of the agreement is to circumvent” the single class of stock requirement.⁶²⁸¹ To address such a concern, consider providing that:

- Any payment on the guaranteed loan must be accompanied by a similar proportionate loan to each other shareholder, with the payment on the guaranteed loan and the similar proportionate loan payable with interest at a rate no less than the AFR.
- If there is no reasonable expectation of repayment at the time that the payment on the guaranteed loan is made, the payment on the guaranteed loan is instead a distribution and the other shareholders will receive similar distributions.
- If the borrower transfers the stock while the guaranteed loan continues in effect, any payments on behalf of the borrower will be treated as payments to the transferee, with the transferee’s sole recourse being against the borrower.

This part III.B.1.a.ii includes:

- III.B.1.a.ii.(a) Gift Tax Issues Involving Loan Guarantees
- III.B.1.a.ii.(b) Code § 2053 Estate Tax Deduction re Loan Guarantees
- III.B.1.a.ii.(c) Loan Guarantees Forbidden for IRAs
- III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees

III.B.1.a.ii.(a). Gift Tax Issues Involving Loan Guarantees

Ultimately, if objectively there is a reasonable expectation that the loan will be repaid, I believe that a guarantee does not constitute a gift. The overall logic is in part III.B.1.a.ii Loan Guarantees; supporting detail is below in this part III.B.1.a.ii.(a).

Shiman v. Commissioner, 60 F.2d 65 (2nd Cir. 1932), held that, although a payment under a guarantee may occur when the borrower is insolvent and appear to be a gift, the test for a gift is the borrower’s apparent ability to repay the loan when the guarantee is made:

.... Indeed, if the putative lender knows that the borrower is without resources and likely never to have any, it may be reasonable with nothing further, to assume that he merely means to give the money. The conduct of neither party would in that case have its usual implication, and no contract would result. In the case at bar there was no reason to suppose, when Shiman guaranteed the accounts that Oppenheim would be unable to make him whole. Oppenheim was then solvent, and his promise, implied from the facts, was as authentic as any other. Nobody disputes that this is the common understanding,

⁶²⁸¹ See Reg. § 1.1361-1(f)(2)(i), reproduced in part II.A.2.ii Temporary Timing Differences; Other Varying Differences, especially fn 1213 (lender was related party)

or that a contract results from it. Oppenheim's obligation was indeed conditional upon Shiman's to the brokers. Only in case Shiman was called upon to perform, was Oppenheim to repay him; no debt arose between the two till Shiman paid, though as soon as he did, Oppenheim owed him the amount at once. But it made no difference that when Shiman did in fact pay, the situation had become such that, had he then voluntarily done so, the advance would have been a gift. He was forced to pay by his earlier undertaking, which from 1920 forward bound his freedom of choice. It has indeed been at times debated whether a conditional obligation is an obligation at all until the condition is fulfilled, but the dispute is scholastic. Except so far as the doctrine of anticipatory breach may require, a promise to perform in the future, whether absolute or conditional, does not circumscribe the conduct of the promisor meanwhile; it limits his freedom only when the time arrives, or if the event occurs. Nevertheless, that limitation has all along been fixed by the promise, and requires no further consent by the promisor to hold him. He has subjected himself to events beyond his control. So it is absurd to treat the performance as it would have been had it been freely made at the time. That cannot be a gift which the putative giver was powerless to withhold.

Next the Commissioner says that in any event there can be no deduction because Shiman suffered no loss; the debt was worthless at the moment it arose, for Oppenheim was then insolvent and known to be. If the deduction had been for the loss of purchased property, this would be clearly untrue. The statute, section 204 (a) and (b) of the Act of 1924, 26 USCA § 935 (a, b) and note, fixes the "cost" of property acquired after March 1, 1913, as the basis for losses which may be deducted under section 214 (a) (4, 5), 26 USCA § 955 (a) (4, 5). A man who buys property at more than its value, does not forfeit his deduction by his bad judgment. It is immaterial to prove that he could have got it for less; he is taxed upon his actual net income, not on what another, more sagacious, might have secured. But this was not a deduction for a loss under section 214 (a) (4) or (5), to be calculated under section 204 (a) and (b); it was for a debt "ascertained to be worthless and charged off within the taxable year." Section 214 (a) (7), 26 USCA § 955(a)(7). Though there was no debt until Shiman paid the brokers, it then became such at once and was known to be worthless as soon as it arose; verbally at any rate there is no difficulty. Nor is there any reason to impute a purpose to except such cases; the loss is as real and unavoidable as though the debt had had some value for a season....

Estate of Davidson v. Commissioner, 26 BTA 754 (1932), was not really a guarantee case but rather was whether a securities loan was really a gift. The court held that the transfer was a gift, because the taxpayer did not prove that the borrower would be indebted to the taxpayer if the taxpayer was unable return the securities:

Whether the transaction detailed in the findings of fact created an indebtedness to the taxpayer on the part of his son depends upon the intention of the taxpayer in the transfer of the securities. *Jacob Grossman*, 9 B.T.A. 643. If taxpayer's intention was that his son be permitted to use the securities as a pledge and return them when no longer needed and also to pay him their value in case of sale by the pledgee, the transaction would leave the son indebted as claimed by petitioners. However, if the intent was that the son return the securities when no longer needed by him, but that in the case of their sale by the pledgee, his son would not be indebted to him for their value, no indebtedness would arise. *Hattie Wolff*, 26 B.T.A. 622.

The evidence from which we must draw our conclusion is meager. It is well settled that a transfer of money or other property by a father to a son is presumed to be a gift or advance rather than a loan. *Storey v. Storey*, 214 Fed. 973. However, such presumption is not conclusive, but may be rebutted by a sufficient showing of intent to the contrary. *William M. Fleitmann, Jr., et al., Executors*, 22 B.T.A. 1291; *Redfield v. Eaton*, 53 Fed. (2d) 693; *Elizabeth N. C. Hetherington*, 20 B. T. A. 806.

The record shows that the transfer of these securities was made by the taxpayer upon a request by his son to establish a credit upon which he might draw to protect his equity in a stock-trading account. We think the evidence of his discussion of the matter with another son before making the transfer and his final agreement thereto after that son expressed the belief that the need for the securities was only temporary, is sufficient to show that it was the taxpayer's intention that these securities be returned to him if not sold to satisfy the indebtedness of the pool account. However, in the face of the contrary presumption and without additional evidence, may we conclude that it was the taxpayer's intention that his son pay him or remain indebted to him for the value of these securities in case they were sold by the broker? There was no specific agreement between petitioner and his son and we have no evidence indicating that after the securities were sold by the brokers petitioner considered an indebtedness as existing. The taxpayer died in 1930 and it does not appear that the son and daughter, who are the executors of his estate and who, it is assumed, realize what his intention was in respect to this matter, have listed any indebtedness of R. J. Davidson, Jr., as an asset of the estate or charged against him in the settlement of the estate any indebtedness owing to the decedent.

We do not think that the transfer of property by a father to a son with the understanding that it be returned if not lost by him is sufficient basis for a presumption of intention that the value of the property be paid by the son in case of its loss. It appears that such is the situation here. However, even in the event that petitioners' contention with respect to the intent of the taxpayer in the transfer of these securities could be sustained and an indebtedness held to have been created on the part of the son, such indebtedness would not be subject to a charge-off by the taxpayer as a worthless debt. It is shown that the transfer of these securities by the taxpayer was with the knowledge that the use to which they were to be put was a most hazardous one and that their sale by the pledgee would only be under conditions leaving his son utterly unable to pay an indebtedness of this amount. It appears, further, that the securities were in no sense sold by the taxpayer to his son, but that he permitted their use merely as security. It is clear that they remained the property of the taxpayer, subject to the right of the pledgee to sell them if necessary. Any increase in their value while held by the pledgee was to the benefit of the taxpayer, and if the transaction did give rise to an indebtedness on the part of the son, such indebtedness arose only upon the contingency of the sale of the securities by the pledgee. *Osterloh v. Lucas*, 37 Fed. (2d) 277. The happening of such contingency would necessarily leave the son bankrupt, the debt would be wholly worthless and uncollectible when it came into existence, and there would consequently be no value represented by it to be charged off by the taxpayer. *Eckert v. Burnet*, 283 U. S. 140.

We have noted carefully the recent opinion of the Circuit Court of Appeals for the Second Circuit in *Shiman v. Commissioner*, 60 Fed. (2d) 65, reversing a decision of the Board which denied a bad debt deduction growing out of a guarantee by the taxpayer of certain brokerage accounts of his brother-in-law. In that case a substantially different situation was presented. Here, we have a case of a transfer by a father to his son with

knowledge of the critical condition of the latter's affairs, in which the father had no interest other than that arising from his paternal interest in his son's welfare. In the Shiman case there was a guarantee of brokerage accounts of a brother-in-law at a time when the latter was known to be solvent and in certain of these accounts the taxpayer himself owned a part interest.

Our conclusion is that as a result of the transaction in question the taxpayer had no indebtedness due him, on account of these securities transferred to his son, for which he was entitled to take credit as a debt ascertained to be worthless and charged off in the taxable year.

In *Pierce v. Commissioner*, 41 B.T.A. 1261 (1940), the taxpayer guaranteed loans made to his son's corporation. When the lender called the loan, some was paid, but the taxpayer had to pay part. The court framed the issues:

We are called on to decide here whether the petitioner's payment of \$24,506.46 on his guarantee of the indebtedness of his son is (1) a contribution to the capital cost of stock held by the petitioner which he sought to protect by his guarantee, (2) a gift to his son made when the business affairs of the son did not warrant a prudent loan, or (3) a loan made to his son, ascertained by the petitioner to be worthless in 1933 and charged off at that time.

After dismissing the capital contribution theory, because the taxpayer paid the bank and did not receive any equity in the corporation for his payment, turned to the remaining issues:

The respondent must fail also in his alternative contention, that the funds paid out by the petitioner may not be regarded as loans, but were gifts made to his son. Respondent's argument is based on his allegation that the financial position of the petitioner's son during the period of the first guarantee and the subsequent increases was so insecure as to render any advances imprudent from a business standpoint and more in the nature of gifts. He assigns the close relation between the petitioner and his son as the reason for the advances and a further basis for branding the outlays as gifts. The evidence, however, is clear that the petitioner's son was solvent by a safe margin at the time of the original guarantee and the increase on September 29, and that petitioner felt assured during the entire period from September 4, 1930, through December 28, 1931, that the position of his son if protected at those times by petitioner's guarantees would ultimately be saved by the later increased value of the collateral. The petitioner, as an officer of the corporations the stock of which was held as collateral, was in a favorable position to pass judgment as to the fair value of the stock so held and its future prospects, and he has stated his opinion that it was worth at least double its market value in September 1930. While we do not accept this testimony as conclusive of the value of the stock, we think it sheds light on the petitioner's intentions and objects in making the guarantees. See *Daniel Gimbel*, 36 B. T. A. 539. The petitioner regarded these dealings as sound from a business standpoint and this regardless of the personal relationship which obtained between him and the debtor, his son. The guarantee which petitioner made in October 1930 of the indebtedness of one J. C. Howard, a legal stranger, we think strengthens this impression.

The petitioner was prompted to make the guarantees for an additional reason which we think furnishes valid basis for holding that these advances were not gifts. The primary objective, as we have noted, of the guarantees was to protect the market value of

securities held by the petitioner. Advances made for such purposes are closely related to business expenses and when intended to be in the form of a loan are clearly deductible when the resultant debt becomes worthless.

Here, the evidence points conclusively to the fact that the petitioner intended to hold his son as a debtor in whatever amount he was required to pay on the guarantees. This intent is made plainer by the execution of the note in the amount of \$20,000. We do not take this latter fact, however, as an indication that the additional \$4,506.46 was meant as a gift. The entire amount must be reckoned as a single transaction. It seems clear, further, that D. W. Pierce, Jr., was hopelessly insolvent at the time the petitioner made his payments and that the debt became worthless as soon as it came into being. Whether the \$4,506.46 difference between the debt and the note is properly explained, as the petitioner alleges, by the fact that when the note was signed the exact amount of the guarantee payment had not been ascertained or by some other fact, the entire debt was ascertained to be worthless immediately after the payments in June 1933, and it is thus a proper deduction in that year. *Shiman v. Commissioner*, 60 Fed. (2d) 65; *H. Rodney Sharp*, 38 B.T.A. 166; *Daniel Gimbel*, *supra*.

In *Ortiz v. Commissioner*, 42 B.T.A. 173 (1940), the Official Tax Court Syllabus summarized the guarantee issue at hand:

Petitioner guaranteed certain brokerage accounts of her husband, who was trading in securities. During 1934 she was forced to respond under her guaranty and make good a deficit in his accounts. The husband had no earning capacity and such property as he had was taken by the wife in reduction of the amount paid under her contract of guaranty. *Held*, under the facts petitioner is entitled to deduct the difference between the amount paid under the guaranty and the value of the property taken from her husband, as a debt ascertained to be worthless and charged off.

Ortiz refuted the IRS' argument that, because the taxpayer's guarantee was in the nature of a gift, no deduction was allowed:

We understand respondent's argument to be that the satisfaction of the deficit in Julien Ortiz's accounts under the contract of guaranty did not create a debt. He denies the existence of a debt because, he says, under the evidence a gift was intended. On the contrary, we think the evidence establishes the lack of any donative intent. Prior to the market crash Julien Ortiz's stock market transactions had been profitable, and his wife believed that profitable operations in his accounts would be resumed. Before executing the contract of guaranty she consulted with her financial adviser and her husband, who assured her that she would suffer no loss under the guaranty. Each of them believed that the market would go up and there would be no occasion to respond under the contract of guaranty. If the wife had been motivated by a donative intent, there would have been no hesitancy. She would have been ready and willing to give her husband any necessary funds. That no such donative intent existed is demonstrated by her act in taking over the security remaining in his accounts and requiring him to convey to her the real property in his name. These acts are inconsistent with donative intent. *Cf. Elizabeth N. C. Hetherington*, 20 B. T. A. 806; *Edward H. Moore*, 22 B. T. A. 366; appeal dismissed, 59 Fed. (2d) 1069; *William M. Fleitmann, Jr., et al., Executors*, 22 B.T.A. 1291; *Roy Nichols*, 17 B. T. A. 580.

Furthermore, respondent's argument ignores the legal consequences that flow from the contract of guaranty. Where a guarantor is forced to answer for the debt or default of another the law implies a promise on the part of the principal debtor to reimburse his guarantor. *Howell v. Commissioner*, 69 Fed. (2d) 447, and cases cited; *certiorari denied*, 292 U. S. 654. When Alice duPont Ortiz was forced to respond under her guaranty, the law implied a promise by Julien Ortiz to reimburse her. The guarantor's payment did not extinguish the debt; it merely substituted the guarantor for the creditor, and thereafter she was entitled to assert any rights that the creditor may have had against the principal debtor or against any security held for the debt, 24 American Jurisprudence 955; 60 Corpus Juris 740, and the facts show that she exercised the rights so acquired against the principal debtor and against the security held for the debt. As a matter of law, therefore, a debtor-creditor relationship existed between husband and wife immediately upon her payment of the deficit in his accounts pursuant to her contract of guaranty.

The facts and circumstances under which this debt was created are so similar to the facts and circumstances existing in *Shiman v. Commissioner*, 60 Fed. (2d) 65, and the arguments advanced in the two cases are so alike, that a detailed analysis of the Circuit Court's decision will be helpful in disposing of the present issue. In July 1920 Shiman guaranteed a brokerage account of his brother-in-law, Oppenheim, who was speculating in stocks. At the time Shiman guaranteed the account Oppenheim was solvent, but thereafter he fell into financial straits and became insolvent. In October 1924 the brokers forced Shiman to pay \$10,000 into the account under his guaranty in order to keep the account open for the balance of the year. In 1925 the account was closed out and Shiman had to pay an additional sum of more than \$26,000 under his guaranty. In his 1924 return Shiman claimed the \$10,000 payment as a loss, or a worthless debt, but the Commissioner and this Board denied the deduction. The Circuit Court, however, reversed. The Commissioner's argument, that the payment created no debt because it was a gift, was rejected, as was the argument that in any event Shiman was entitled to no deduction because the debt was worthless the moment it arose, as Oppenheim was then insolvent and known to be. The court likewise rejected the argument that until the account was closed out the debt was not ascertained to be worthless, and the argument that the charge-off was insufficient.

However, guaranteeing a loan that had no reasonable expectation of repayment constituted a gift and therefore did not support a bad debt deduction in *Ellisberg v. Commissioner*, 9 T.C. 463 (1947), which reasoned:

In the instant case the principal obligor was the endorser's son. He wished to go into a business requiring credit and capital, neither of which he had. The father loaned or gave to the son both capital and credit. The new business did not prosper. Because the father desired to see the son continue in business, he endorsed the son's notes executed for the purposes of obtaining additional capital. At that time the father made no investigation into the son's business or financial prospects. All he knew was that the business was not prospering and that the son always needed more money. After the father paid the notes thus endorsed, he made no effort to collect against his son the amount of his payment and he filed no claim on account thereof in the bankruptcy proceedings in which his son was later involved, nor did the son ever list such a debt as one of his liabilities or take any step indicating that he acknowledged the existence of this indebtedness.

Under the circumstances disclosed by the record in this case, we are of the opinion that the transaction in question is equivalent to one in which a father borrowed money from a

bank and, in effect, made a gift of the proceeds to his son. It will not, in our opinion, justify a bad debt deduction, since, on the facts shown, it is impossible for us to conclude that the petitioner and his son intended a debt to arise from petitioner's payments of his son's notes. See *Charles J. Matthews*, 8 T. C. 1313.

In *D. W. Pierce*, 41 B.T.A. 1261, we permitted the deduction as a bad debt of amounts paid by a father on account of a guarantee of a son's obligation. In that case, however, we pointed out (p. 1265) "that the petitioner's son was solvent by a safe margin at the time of the ... guarantee," that the petitioner regarded the transaction "as sound from a business standpoint, and this regardless of the personal relationship" between him and his son, and that the evidence in that case pointed "conclusively to the fact that the petitioner intended to hold his son as a debtor in whatever amount he was required to pay on the guarantees." In the instant case the record before us requires a holding on all these points contrary to that reached in the *Pierce* case.

Fox v. Commissioner, 14 T.C. 1160 (1950), held that a securities loan and a loan guaranty did not constitute gifts and that losses under those arrangements constituted deductible nonbusiness bad debts.⁶²⁸²

Any claim that the securities were furnished by petitioner to her husband without intent that he should return them to her is, we think, without merit. Neither do we think that she intended that any amounts she might have to pay under the guaranty should be regarded as gifts. Petitioner was not making a gift to her husband, but rather was making him a loan of some of her securities and through the guaranty of his account a loan of her credit. There was a definite agreement for the return of the securities and, whether expressed in words or not, there was a legally implied obligation to reimburse her for any sums she might be required to pay under her guaranty. That the law implies a promise on the part of a principal debtor to reimburse his guarantor where the guarantor is forced to pay his debt or make good his default does not in our opinion require elaboration. For a full discussion of that legal principle see *Howell v. Commissioner*, 69 Fed. (2d) 447. See also *Thomas Watson*, 8 T.C. 569; *Alice du Pont Ortiz*, 42 B.T.A. 173; *D. W. Pierce*, 41 B.T.A. 1261; and *Daniel Gimbel*, 36 B.T.A. 539.

The Tax Court found no taxable gift when the taxpayer helped refinance her husband's note (at a time before the unlimited marital deduction). For legitimate business reasons, the husband (J.C.) asked the taxpayer to become the primary named borrower, although the taxpayer clearly was not, in substance, the borrower. *Bradford v. Commissioner*, 34 T.C. 1059, 1064-65 (1960), acq. 1961-2 C.B. 4., held:

The facts and circumstances surrounding the transaction here involved do not convince us that petitioner intended to divest herself of any property or interest therein owned by her in 1938, or that any of the parties involved anticipated that any of her property would ever be used to satisfy the obligation to the bank. In the first place she did not own property in 1938 that would have come anywhere near satisfying the obligation to the bank, and she had no prospects of acquiring any except through her husband. Secondly, the entire transaction was arranged by J.C., his collateral was retained as security for petitioner's note, and he testified that it was understood that the bank would look first to his collateral for liquidation of the obligation, and he hoped and expected that the

⁶²⁸² The Second Circuit, 192 F.2d 101 (1951), held that the loss was a business loss, because settling the guaranty with the lender was necessary to allow the taxpayer to free her account to invest for profit.

collateral would increase sufficiently in value to cover the entire obligation. J.C. paid the interest on the loan and it is reasonable to assume that all parties involved looked to J.C.'s assets and his earning power to liquidate the loan.

This does not mean that petitioner was not obligated on the indebtedness evidenced by her note. We assume the bank could have taken judgment against her on the note had it not been paid, and levied on her property to help satisfy the judgment, and that it probably would have done so had that course of action become necessary. But unless and until such action was taken we do not believe petitioner parted with, or intended to part with, dominion and control of any property owned by her which would give rise to a gift tax.

Granted that section 501 is comprehensive enough to "include property, however conceptual or contingent," *Smith v. Shaughnessy*, 318 U.S. 176, and to reach any passage of control over the economic benefits of property, *Estate of Sanford v. Commissioner*, 308 U.S. 39; nevertheless, no matter how intangible, the donor must own a property right or interest which is capable of being, and is, transferred. *Commissioner v. Mills*.⁶²⁸³ Petitioner transferred no property or interest in property in 1938 but only made a promise to pay in the future if called upon to do so. *John D. Archbold*, 42 B.T.A. 453. The fact that J.C. may have derived some economic benefit in 1938 as a result of this promise is not controlling. Regs. 79, art. 1.

In *Cogan v. Commissioner*, T.C. Memo. 1971-251, advances the taxpayer made to her son did not constitute bona fide debt and therefore could not support a bad debt deduction:

Petitioner did not require her son to execute a note for these amounts; there was no agreement to pay interest; and, no time was fixed for repayment. The alleged debt was not scheduled in the bankruptcy proceedings; nor was it claimed as a bad debt deduction in petitioner's tax return. We are not convinced by petitioner's explanation of the reason the deduction was not claimed on her tax return for the taxable year 1967. We cannot believe that, considering the surrounding facts and circumstances in which the payments and advances were made, petitioner intended to enforce collection of them against her son who was the sole support of his wife and three young children. Lacking this intent there is no clear showing that a debtor-creditor status was created; the advances and payments are presumed to be gifts. *William Francis Mercil*, 24 T.C. 1150 (1955); *Estate of Carr V. Van Anda*, 12 T.C. 1158 (1949) *aff'd. per curiam* 192 F.2d 391; *C. B. Hayes*, 17 B.T.A. 86 (1929). See *Evans Clark*, 18 T.C. 780 (1952).

However, payments on a loan guarantee did support a bad debt deduction. *Cogan* held:

We think payment to the United California Bank stands on a different footing. For many years prior to the taxable year, petitioner had guaranteed loans by the bank to her son. While her concealment from him of the fact of her guaranty raises some question as to whether her ultimate payments under the guaranty represents gifts, we are satisfied that, more probably, she was motivated by a desire to instill confidence in her son in the ultimate success of his business enterprise. We think that, at the time of the transaction, there existed a real expectation of repayment and an intent to enforce collection. *Giffen Andrew*, 54 T.C. 239 (1970). Accordingly, we have found that petitioner did not intend to

⁶²⁸³ 183 F.2d 32 (C.A. 9, 1950), affirming 12 T.C. 468.

make a gift to her son at the time she made the guaranties in question. *Cf. Kate Baker Sherman*, 18 T.C. 746 (1952).

Letter Ruling 9113009 held that loan guarantees conferred “valuable economic benefits” to the grantee that constituted a gift. If the grantee, without the guarantees, would pay a higher interest rate on the loan, or otherwise be unable to obtain the loan altogether, then the grantee has received a valuable property interest. The grantor had assumed a legally enforceable obligation for less than full consideration. Thus, when a loan guarantee became binding, the grantor had made a completed gift.

At least one commentator, at the time, noted the “foolishness” with which loan guarantees were taxed.⁶²⁸⁴ The folly came by way of comparison of the effects of a parent loaning a child funds (possibly using a “back-to-back” loan) versus a parent guaranteeing a child’s loan. Code § 7872, which superseded *Dickman*, controls below-market demand loans. Thus, at the October 2010 short-term AFR,⁶²⁸⁵ a parent could lend his or her child funds at 1.73% for almost nine years without incurring gift tax liability. If the parent has wonderful credit, he or she may be able to borrow funds for himself or herself at the prime lending rate, which, as of October 1, 2010, was 3.25%. Thus, using a back-to-back loan, a parent who could borrow at the prime lending rate can essentially gift 1.52% per year tax-free. However, if the parent simply chose to guarantee the child’s loan, under Letter Ruling 9113009, this would incur gift tax liability.

Letter Ruling 9409018 withdrew Letter Ruling 9113009 as to that issue. Letter Ruling 9409018 reasoned:

Under section 2056(b)(4), if property passing to the surviving spouse is encumbered in any manner, the encumbrance is taken into account in the same manner as if the amount of a gift to the spouse were being determined. Under the terms of the taxpayer’s will, assets will pass to the Estate Trust for the benefit of the surviving spouse only if there are any loan guarantees outstanding at the taxpayer’s death. The marital deduction for the bequest of such assets would not be reduced by the entire unpaid balance of the guaranteed loans unless at the time of the taxpayer’s death it appears that a default after the Estate Trust is funded is likely, that assets of the Estate Trust will be used to pay the entire unpaid balance of such loans, and that the subrogation rights appear to be worthless.

It is well settled that, notwithstanding the restrictions of section 2056(b), an asset in the form of a promissory note that passes from a decedent to or for the benefit of the surviving spouse is ordinarily eligible for the marital deduction, whether the note passes outright to the spouse or to an estate trust described in section 20.2056(e)-2(b) or to a marital trust described in section 2056(b)(5) or (b)(7). After a decedent’s death, the spouse (or the trustee of the trust for the benefit of the spouse) holds the note as a creditor of the borrower and is subject to a risk of loss if the borrower were to default and be incapable of repaying the note. It follows that the mere presence of a promissory note among assets passing to a trust for the benefit of the surviving spouse would not ordinarily cause the disallowance of the marital deduction.

⁶²⁸⁴ See Randall J. Gingiss, *The Gift of Opportunity*, 41 *DePaul L. Rev.* 395, 409 (1991-1992).

⁶²⁸⁵ Rev. Rul. 2010-24.

If one or more assets (not necessarily promissory notes) pass from a decedent to or for the benefit of the spouse subject to a loan guarantee encumbrance, the spouse (or the trustee of the trust for the benefit of the spouse) is subject to a risk of loss if the borrower were to default and be incapable of repaying the guaranteed loan. In the event of default, the spouse (or the trustee) would pay the lender pursuant to the guarantee, as a result of which the spouse (or the trustee) would be immediately subrogated to the lender and would consequently become a creditor of the borrower for the amount paid pursuant to the guarantee.

Thus, for purposes of section 2056(b), the position of a spouse (or trustee) as a note holder is indistinguishable from the position of a spouse (or trustee) as holder of assets subject to a loan guarantee. In the case of the note asset and in the case of the guarantee-encumbered asset, the risk of the borrower's default presents the same issue for purposes of determining whether a surviving spouse's interest in the asset is considered a nondeductible terminable interest. In either case, neither the borrower nor the lender possesses an "interest in" or a "power to appoint" property, as those terms are used in section 2056(b).

Accordingly, in the present case, the mere presence of a loan guarantee as an encumbrance on assets passing from the taxpayer at death would not ordinarily cause the complete disallowance of the marital deduction that would otherwise be allowable for the bequest to the Estate Trust or the Marital Trust. This would be so whether the guaranteed loan had been made to an entity owned by the taxpayer or had been made to some other borrower.

Letter Ruling 9409018's theory of loan guarantees is enshrined in regulations in a different context.⁶²⁸⁶

Thus, a parent should be able to make his or her credit standing available to his or her children without creating an income or gift tax event.⁶²⁸⁷ What is essentially a loan of creditworthiness, though it may enable a child to obtain a loan at a more favorable interest rate or a loan that would have otherwise been unavailable to him or her, should not factor into gift of opportunity analysis. Thus, one of the more troublesome aspects of *Carriage Square* has been

⁶²⁸⁶ Part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, explains that a shareholder gets no basis for guarantees but does get basis for loans made from the shareholder to the corporation, then in fn 1216 cites Reg. § 1.1366-2(a)(2)(iii), Example (4), "Guarantee," which provides: A is a shareholder of S, an S corporation. In 2014, S received a loan from Bank. Bank required A's guarantee as a condition of making the loan to S. Beginning in 2015, S could no longer make payments on the loan and A made payments directly to Bank from A's personal funds until the loan obligation was satisfied. For each payment A made on the note, A obtains basis of indebtedness under paragraph (a)(2)(ii) of this section. Thus, A's basis of indebtedness is increased during 2015 under paragraph (a)(2)(ii) of this section to the extent of A's payments to Bank pursuant to the guarantee agreement.

⁶²⁸⁷ Streng, *Estate Planning*, 800-2d T.M. VII.D.2. See also Hatcher and Manigault, Using Beneficiary Guarantees in Defective Grantor Trusts, *Journal of Taxation* (March 2000) (beneficiary guarantees of loans to trusts). Some have suggested that the Tax Court's position is that a beneficiary does not make a gift by guaranteeing a loan to a trust from which (s)he benefits. Blattmachr and Zaritsky, "Is the BDIT Ready for Primetime?" *Probate Practice Reporter* (University of South Carolina School of Law, ISBN 1044-7423), Sept. 2012.

superseded. Furthermore, in Letter Ruling 200534014,⁶²⁸⁸ the IRS did not appear to be troubled by a parent providing his creditworthiness to his child, pointing to some cases that seem to have been decided under state law where parents loaned collateral to their children. The Tax Court has referred to loan guarantees as “unmatured, potential claims.”⁶²⁸⁹

One can glean from all of the above that, if the intent to repay is not genuine, then the arrangement is vulnerable to IRS attack;⁶²⁹⁰ however, an adequately secured legal obligation to repay may be respected, even if the lender intends to forgive.⁶²⁹¹ The converse is that, if the intent to repay is genuine, then no transfer occurs until the person who bears the credit risk not only makes a payment but also, on a gratuitous basis, forgoes commercially reasonable remedies against the debtor to recover the right to be reimbursed for that payment.⁶²⁹² If a later

⁶²⁸⁸ In addition to the fact that letter rulings are not precedent, this particular ruling dealt with the effect of a child conveying to the parent stock in the company that borrowed the money. Thus, the loan of creditworthiness was not the true issue; rather, the parent was deemed to have held the stock in trust for the child. The author does not recommend intentionally creating the facts present in that ruling.

⁶²⁸⁹ *Estate of Theis v. Commissioner*, 81 T.C. 741, 748 (reviewed decision 1983) (rejecting estate tax deduction for claim due to guarantees that were legally valid, but the underlying loan was not in default), *aff'd* 770 F.2d 981 (11th Cir. 1985); followed *Estate Of Charles P. Cafaro v. Commissioner*, T.C. Memo. 1989-348.

⁶²⁹⁰ Rev. Rul. 77-299 (IRS did not respect notes intended to be forgiven in the amount of the annual exclusion each year). If one wants to transfer property over time and use the annual exclusion, then, the IRS argues, one should simply give a small portion of the property each year. Rev. Rul. 83-180. The latter strategy would take longer if the property appreciates, but that might be the cost of obtaining the annual exclusion. In the income tax arena, debt might be recharacterized as equity. See part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

⁶²⁹¹ *Haygood v. Commissioner*, 42 T.C. 936 (1964), *acq. in result*, 1965-1 C.B. 4, *nonacq.*, 1977-2 C.B. 2, held:

In the instant case if donative intent were the criterion our question would be easily solved for the record is amply clear that petitioner intended to donate only \$3,000 per year of the property here involved to each of her sons until such time as the full value had been given to them. However, since this not the criterion, it is necessary to look to the property that passed to petitioner in return for the real property transferred to see if the amount of petitioner's gifts to her sons in 1961 of the city property exceeded the \$6,000 she reported. See *Estate of Sarah A. Bergan*, 1 T.C. 543 (1943). In *Estate of Koert Bartman*, 10 T.C. 1073 (1948), we recognized that the consideration for the transfer of property by a taxpayer to each of his three children was less than the value of the property transferred. In that case we held that the transfers were for inadequate consideration, and therefore to the extent the value of the property transferred exceeded the value of the consideration given by the children, the taxpayer had made a gift within the meaning of the statute. We did, however, recognize that the agreements to pay annuities and notes were given by the children to the parent in consideration for the property. In the *Bartman* case the taxpayer had contended that none of the gifts was sufficiently complete to occasion the incidence of gift tax because by means of the annuity obligations, the taxpayer retained a right of invasion of the gift. We did not sustain that contention. Likewise, in the instant case we agree with respondent that the gift of the land, insofar as its value exceeded the consideration received by petitioner therefor, was completed in the year 1961. The existence of the vendor's lien notes and deeds of trust would not cause the transfer to be so incomplete as not to be a consummated gift at the time of the transfer to the extent the value of the property exceeded the value of the consideration received therefor. *Cf. Mable G. Adams*, 44 B.T.A. 1091, 1093 (1940), and cases there cited.

We hold that the value of the property transferred by petitioner did not exceed the value of the vendor's lien notes and deeds of trust received in return therefor by more than the \$3,000 in the case of each son, which amounts petitioner has reported as gifts in the year 1961.

⁶²⁹² An income tax analogy is Prop. Reg. § 1.465-6(d), providing that, in applying the at-risk rules:

forgiveness is gratuitous, then the forgiveness of principal should be treated as a gift rather than cancellation of indebtedness income.⁶²⁹³ The forgiveness of interest will not constitute a deemed receipt of interest by the lender and a deemed payment by the borrower if the forgiveness includes in substantial part the loan principal.⁶²⁹⁴

If one is concerned that a loan guarantee is a gift, one should structure the loan as a back-to-back loan, meaning the parent borrows from the proposed lender and loans money to the child.⁶²⁹⁵ If that is impractical, consider paying the parent a reasonable guarantee fee.

Notwithstanding the lack of gift tax consequences, consider additional documentation when a trust guarantees the obligations of another trust. The IRS might argue that, by entering into a transaction for the benefit of someone other than the beneficiaries, the fruits of that transaction belong to the guarantor trust.⁶²⁹⁶ Steps to try to avoid such an argument might include:

- a provision in the trust agreement allowing extending credit to other trusts for the benefit of the trust's beneficiaries,
- charging a fair market value guarantee fee would give a guarantee a business purpose, or

If a taxpayer guarantees repayment of an amount borrowed by another person (primary obligor) for use in an activity, the guarantee shall not increase the taxpayer's amount at risk. If the taxpayer repays to the creditor the amount borrowed by the primary obligor, the taxpayer's amount at risk shall be increased at such time as the taxpayer has no remaining legal rights against the primary obligor.

⁶²⁹³ If the parent's will cancels the loan, the loan is included in the parent's gross estate, but the Code § 102 exclusion of bequests from income trumps Code § 61(a)(12). Letter Ruling 9240003. Although it addressed a different situation, in analyzing the consequences of an employee's loan modification, Rev. Rul. 2004-37 stated:

Not every indebtedness that is cancelled results in the debtor realizing gross income by reason of discharge of indebtedness within the meaning of §§ 61(a)(12) and 108(a). Debt discharge that is only a medium for some other form of payment, such as a gift or salary, is treated as that form of payment, rather than under the debt discharge rules. S. Rep. No. 1035, 96th Cong., 2d Sess. 8 n.6 (1980), 1980-2 C.B. 620, 624 n.6.

Code § 108(e)(6) confirms no cancellation of indebtedness income when a shareholder cancels a debt owed by the corporation to the shareholder.

⁶²⁹⁴ Prop. Reg. § 1.7872-11(a)(2).

⁶²⁹⁵ Back-to-back loans are not unusual in the S corporation area, to give the shareholder basis against which to deduct losses. See part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, especially fn 1213 (lender was related party).

⁶²⁹⁶ *Harris Trust and Sav. Bank v. Salomon Smith Barney, Inc.*, 530 U.S. 238, 250 (2000), an ERISA case that looked to general trust law principles, noted:

As petitioners and amicus curiae the United States observe, it has long been settled that when a trustee in breach of his fiduciary duty to the beneficiaries transfers trust property to a third person, the third person takes the property subject to the trust, unless he has purchased the property for value and without notice of the fiduciary's breach of duty. The trustee or beneficiaries may then maintain an action for restitution of the property (if not already disposed of) or disgorgement of proceeds (if already disposed of), and disgorgement of the third person's profits derived therefrom. See, e.g., *Restatement (Second) of Trusts* §§ 284, 291, 294, 295, 297 (1957); 4 A. Scott & W. Fratcher, *Law of Trusts* § 284, § 291.1, pp. 77–78, § 294.2, p. 101, § 297 (4th ed. 1989) (hereinafter *Law of Trusts*); 5 *id.*, § 470, at 363; 1 D. Dobbs, *Law of Remedies* § 4.7(1), pp. 660–661 (2d ed. 1993); G. Bogert, *Law of Trusts and Trustees* § 866, pp. 95–96 (rev. 2d ed. 1995).

- obtaining the beneficiaries' consent.

On the other hand, suppose the beneficial interests in the trusts are substantially the same. Although trusts are often treated as entities outside of trust law, under trust law a trust is not an entity at all. Under trust law, a trust is the relationship between the trustee(s) (the holder(s) of legal title) and the beneficiaries (those who receive distributions for their own use) pursuant to the wishes of whoever gave property to the trust (the settlor(s)). Trustees have a duty to promote the beneficiaries' interests pursuant to this relationship. Whether the trustees further this relationship by holding property in separate accounts or pursuant to different trust instruments with substantially the same terms is of no consequence – in either case, all of the funds are to be used to promote this relationship. All trust experts with whom I have spoken agree that a trustee of identical trusts has a fiduciary duty to use one trust to promote the activities of the other trust. Thus, one trust guaranteeing a loan to a substantially identical trust would have a solid business purpose.

III.B.1.a.ii.(b). Code § 2053 Estate Tax Deduction re Loan Guarantees

Ultimately, if objectively there is a reasonable expectation that the loan will be repaid, I believe that any payment on a loan guarantee imposed on assets included in a decedent's gross estate would constitute a claim deductible for estate tax purposes. The overall logic behind considering such a loan guarantee as having adequate and full consideration in money or money's worth is in part III.B.1.a.ii Loan Guarantees; supporting detail is below in this part III.B.1.a.ii.(b), but please note that Prop. Reg. § 20.2053-4 may change this analysis.

When a guarantor dies and the guarantee has not been collected upon, the guarantee is merely a contingent claim. Only if the lender collects from the guarantor's gross estate and the guarantor's gross estate is not restored (see last bullet point above) will the guarantor's gross estate actually be out-of-pocket. Thus, in analyzing Code § 2053, consider:

- Rules for deducting contingent claims
- How much the guarantor's gross estate actually pays (or has paid) the lender
- How much the guarantor's gross estate actually has collected or is expected to collect from the borrower

Let's review some cases.

Carney v. Benz, 90 F.2d 747 (1st Cir. 1937) is short, so here is the full opinion:

This case involves the same statutory provisions which we lately had occasion to consider in *Commissioner v. Lyne Administrator*, 90 F.(2d) 745.*

* Revenue Act of 1926, chap. 27, 44 Stat. 9.

Sec. 303. "For the purpose of the tax the value of the net estate shall be determined -

("(a)) In the case of a resident, by deducting from the value of the gross estate -

“(1) Such amounts for ... claims against the estate, ...to the extent that such claims... were incurred or contracted bona fide and for an adequate and full consideration in money or money’s worth.” U.S.C. title 26, § 412, 26 U.S.C.A. § 412 note.

Revenue Act of 1932, c. 209, § 805, 47 Stat. 169, 280. Section 303 (a) (1) of the Revenue Act of 1926, as amended, is amended to read as follows:

(“(b) Such amounts - ...

“(3) for claims against the estate ... as are allowed by the laws of the jurisdiction, ... under which the estate is being administered....

The deduction herein allowed in the case of claims against the estate, ... or any indebtedness shall, when founded upon a promise or agreement, be limited to the extent that they were contracted bona fide and for an adequate and full consideration in money or money’s worth.” U.S.C. title 26. § 412, 26 U.S.C.A. § 412.

The present question is whether the claim sought to be deducted from the gross estate was founded upon sufficient consideration. The Commissioner denied the deduction and imposed an additional tax. The executors paid under protest and, claim for refund having been denied, brought suit to recover in the District Court, where they obtained a judgment in their favor. The Collector has appealed.

There is no dispute about the facts. Jacob C. Benz, a citizen and resident of Massachusetts, died in November, 1932, leaving a substantial estate. Paine Webber & Co., stockbrokers, presented a claim against his estate in the amount of \$52,811, which was duly paid by the executors and was claimed by them as a deduction in computing the net value of the estate for the federal estate tax. It is the item here in controversy. The claim arose on a written guaranty to Paine Webber & Co. which Benz had made, guaranteeing the account of the Doris Realty & Investment Company. No question is made but what the amount claimed by Paine Webber & Co. was due under guaranty.

The guaranty was given under the following circumstances: The Doris Realty & Investment Company was a Massachusetts corporation organized in 1926. It was owned and operated by the decedent’s wife and daughter. In 1929 the company desired to open a stock-trading account with Paine Webber & Co. The brokers required that the account should be guaranteed by Benz, and he gave the guaranty in question. At the end of 1929 the account showed a substantial profit, but in May, 1933, when it was closed out, there was a deficiency amounting to the sum claimed.

The Commissioner disallowed the deduction on the ground that Benz did not receive for the contract of guaranty adequate and full consideration in money or money’s worth, as required by the statute. He insists that claims are not deductible unless the consideration for the contract on which they are founded was received by the decedent. There is a dictum to this effect in *Latty v. Commissioner*, 62 F.(2d) 952, 954 (C.C.A.6), but the facts in that case were fundamentally different from those here, and the contract on which the claimed deduction rested was uncommercial in character. In *Glaser v. Commissioner*, 69 F.(2d) 254, 257 (C.C.A.8), which is also relied on by the Commissioner, it was said that a contract on which a deduction could be based must be “a business transaction on the part of the decedent or a contract intended to augment his estate,” etc. In *Porter v. Commissioner*, 60 F.(2d) 673, 675 (C.C.A.2), it was said that the section was not limited

“to cases where the consideration passes to the testator; for example, a promise to pay for goods delivered to another might fall within it, if the testator has recourse over.” In *United States v. Mitchell* (C.C.A.) 74 F.(2d) 571, in which the facts were very similar to those in the present case it was held that the claim was deductible; and in the very recent case *Commissioner v. Bryn Mawr Trust Co.* (C.C.A.) 87 F.(2d) 607, it was held that the statute did not require that the consideration for the contract on which the claim was based should be received by the decedent, disapproving the Commissioner’s regulation that it must be so in order to make the claim deductible.

The statute is to be construed according to the natural and reasonable meaning of the words used, having in mind the purpose which it was designed to accomplish. The purpose of this section in the light of its legislative history [see *United States v. Mitchell* (C.C.A.) 74 F.(2d) 571] was to prevent deductions, under the guise of claims, of what were in reality gifts or testamentary distributions. There was no intention so far as appears of discriminating between bona fide claims against an estate, making some of them deductible and others not. We think the statute means that bona fide business contracts entered into upon adequate legal consideration give rise, if resulting in loss, to allowable deductions. The things which the statute was intended to disallow were colorable family contracts and similar undertakings made as a cloak to cover gifts. There are many kinds of business agreements in which the consideration does not move to the promissor, e. g., contracts of guaranty and of surety, endorsements of commercial paper, etc. There is no reason why claims of this character should be discriminated against, and nothing in the statute which requires that the consideration on which the claim rests should have been received by the decedent. As suggested in *United States v. Mitchell, supra*, if Congress had intended so to restrict the statute, there is every reason to believe it would have said so.

In the present case the guaranty which the decedent gave to Paine Webber & Co. was a purely commercial undertaking. The District Judge in effect so found. He also found: “The instant case presents no suggestion of an attempted testamentary disposition of property.” It does not appear that Benz expected to lose by giving the guaranty; as has been said, the Doris Company was at first successful. Benz had a right of recourse against the corporation but it is not suggested that there were assets of the corporation available in reduction of the amount paid under the guaranty. It is argued for the Commissioner that the decedent’s wife and daughter who received his estate were owners of the Doris Company, and that therefore his guaranty amounted to a gift to them. But the Doris Company was an independent entity. It does not appear that the beneficiaries under the decedent’s will were obligated on its contracts, still less that in making the guaranty Benz intended to make or in fact made any gift to them.

The judgment of the District Court is affirmed, with costs.

Commissioner v. Porter, 92 F.2d 426 (2nd Cir. 1937) explained “full consideration in money or money’s worth”:

The purpose of the phrase under discussion was, in our opinion, to prevent a man from diminishing his taxable estate by creating obligations not meant correspondingly to increase it but intended as gifts or a means of distributing it after his death. See *Latty v. Commissioner*, 62 F.(2d) 952 (C.C.A.6). Thus, if a guarantor reserve no recourse over against the principal in the transaction, the guaranty would be in substance a gift; as we pointed out in the *Porter Case, supra*. But the present record does not disclose a

transaction of that character. There is no evidence that the decedent surrendered his right of subrogation to the pledged collateral or his right to seek reimbursement from other property of his son-in-law should the guaranty be called. It is true that in October, 1931, when the guaranty was increased by \$30,000, the collateral was \$50,000 short of the loans, and that, as stipulated, the right of subrogation at the guarantor's death and at all times since was valueless. But the stipulation does not say that, when the guaranty was given, the son-in-law was insolvent or that the guarantor had no reasonable expectation of reimbursement if he should be called upon to pay. So far as appears, it was an ordinary business transaction by which an accommodation guarantor, if required to pay, would acquire rights equal in value to the obligations he had assumed. The Board rightly held the claim deductible.

Mccoy v. Rasquin, 102 F.2d 434 (2nd Cir. 1939), allowed a deduction with respect to amounts paid with respect to a loan guarantee in which the debtor paid only part of the obligation, even though the guaranty benefitted a family member:

It is argued that the case at bar differs from that of *Commissioner v. Porter, supra*, because the guaranty there was an accommodation to the decedent's son-in-law who was not a beneficiary of the decedent's estate, whereas in this case there was a provision in the decedent's will that any loss occasioned to her estate by meeting the guaranty was to be deducted from the share of her son William D. McCoy and should not come out of the portion bequeathed to her daughter Ann McCoy Winters. We cannot see that the provision in the will of Mrs. McCoy that the loss by reason of the guaranty should come out of the son's share matters at all. The primary debtor was not the son, but a corporation in which he and the decedent were both interested. While he was the president and the largest stockholder of the company, there is no reason to go behind the corporate entity or to find that the object of the compromise was tax evasion.

Dodge v. Gagne, 23 F.Supp. 729 (D. N.H. 1938), in allowing a deduction for payments of decedent's guarantee of his sister-in-law's notes, commented:

It is contended by the defendant that the transactions constituted a gift, but the argument appears to be labored. I see nothing to indicate that the transaction was anything out of the ordinary. It is common for a person to sign notes for the purpose of helping another, having confidence that he will never be called upon to pay and it is human nature to postpone payment so long as there is any hope that the maker will discharge his obligation....

It cannot be seriously questioned that Dodge's endorsement of his sister-in-law's note was a valid claim against his estate under the laws of the State of New Hampshire. That obligation had existed for some years. The fact that Dodge paid the interest on the notes subsequent to the date when his sister-in-law became unable to do so, indicates only that he was trying to postpone the day of payment. It may have been because he had other use for his money or that the same was tied upon in investments and unavailable. Payment was eventually made after his death from his estate.

The statute was enacted to prevent deductions under the guise of claims which were in reality gifts or testamentary distributions. The transactions in the case at bar do not fall within either of the above provisions.

Commissioner v. Wragg, 141 F.2d 638 (1st Cir. 1944), held:

Thus when it has appeared that the decedent's right over against the primary obligor was worth its face value, no deduction has been allowed for a secondary liability (*Estate of Lay*, 40 B.T.A. 522; *Hartford Nat. Bank & Trust Co. v. Smith*, D.C. Conn., 54 F.Supp. 579; see also *Parrott v. Commissioner*, 9 Cir., 30 F.2d 792, certiorari denied 279 U.S. 870, 49 S.Ct. 512, 73 L.Ed. 1007; *Buck v. Helvering*, 9 Cir., 73 F.2d 760); but when it has appeared that the right over was valueless a deduction for it has been allowed. *United States v. Mitchell*, 7 Cir., 74 F.2d 571; *Commissioner v. Porter*, 92 F.2d 426; *Carney v. Benz*, 1 Cir., 90 F.2d 747, 113 A.L.R. 365; *Dodge v. Gagne*, D.C., 23 F.Supp. 729. And, when it has appeared that the right was worth something but not its face value a deduction has been allowed to the extent of the amount which actually had to be paid and could not be recovered from the primary obligor by the estate. *McCoy v. Rasquin*, 2 Cir., 102 F.2d 434; *Eckhart v. Commissioner*, 33 B.T.A. 426, 440; *Estate of Borland*, 38 B.T.A. 598. In view of these cases, particularly the two last cited, it does not seem to us that the Tax Court in the case at bar would have allowed the deduction unless it had come to the conclusion that the right of the estate over against the primary obligor, the decedent's son, was valueless. To be sure it made no such finding categorically, but nevertheless we feel that such a finding is implicit in the factual background of the case and that it must have been assumed by the Tax Court that the estate would ultimately have to bear the loss or else it would not have reached the result which it did. The facts upon which we base our conclusion are that at various times the creditors had threatened to sell the collateral pledged to secure the notes; that upon some occasions actions were instituted by creditors against the decedent's estate on the notes, and that the execution on the judgment obtained by the conservator against the son was never levied upon or satisfied although the conservator as a fiduciary was under a legal duty to collect on his judgment, regardless of the family relationship involved, if he could. It seems to us that the creditors would not have taken the steps which they did if the son had been solvent, and that the conservator, if possible, would have collected on his judgment against the son. In the absence of evidence we cannot assume that he neglected to do so in breach of his fiduciary duties. Thus we think that the Tax Court must have concluded, but merely failed to state, that the right of the estate over against the son was valueless, and, this being so, we see no point in remanding the case for a definite finding to that effect.

Estate of Hofford v. Commissioner, 4 T.C. 542 (1945), allowed a deduction relating to a loan guarantee in this situation.⁶²⁹⁷

In his deficiency notice the respondent disallowed the item, "in the absence of proof that it was contracted for adequate and full consideration in money or money's worth." It is not necessary that the consideration referred to in the statute be received by the decedent. *Porter v. Commissioner*, 60 Fed. (2d) 673; *Dodge v. Gagne*, 23 Fed. Supp. 729; *Old Colony Trust Co., Executor*, 39 B. T. A. 871, 879. In the instant proceeding the decedent endorsed a note for the Lehighon Legion Home Association. The money received by the latter was used to buy uniforms for its members. The association was clearly debtor for borrowed money on the note which it executed. The testimony is that the association paid some interest on the note to the bank, but never paid anything on the principal. There is no evidence that the decedent intended any gift

⁶²⁹⁷ The case was appealed on other issues, which a reviewed opinion of the Tax Court addressed without disturbing this holding.

to the association by his accommodation endorsement and there is no reason to suppose that he intended any gift. After the decedent's executors paid the note, they made a demand on the association for repayment, but it was without funds and the note was then uncollectible.

In *Estate of Duval v. Commissioner*, 4 T.C. 722 (1945), the Official Tax Court Syllabus summarized:

Where a bank, owner of a claim against decedent as guarantor of notes, consented to distribution of the estate without payment of its claim, reserving, however, a claim against a co-guarantor, and where the estate will never be required to pay the claim, *held*, such claim is not deductible from the gross estate of decedent, although formally allowed by a court having jurisdiction of the settlement of the estate.

In *Duval*, the decedent guaranteed a loan made to a corporation of which she was a shareholder. The court disallowed a deduction for the guarantee:

In view of this peculiar and unusual liability, a liability that in the case of a solvent and going corporation is not at all likely ever to be enforced where in practical effect the stockholders' liability is rather that of surety than that of a primary debtor, although as a matter of law the liability of the stockholder is primary, we hold that the payment by the corporation of its indebtedness should be considered as satisfying the claim against the estate as of the date of the death of the deceased. If the debt of the corporation is paid by the corporation before it is paid by the stockholder, the liability of the stockholder is extinguished. For purposes of appraisal of the estate for the fixing of the Federal estate tax, the stockholders' liability should be considered as a potential claim rather than an actual claim, until it is paid by the estate or it is reasonably certain that it must be paid.

In the present case the liability does not attain the dignity of a potential claim. In point of fact, there is no claim at all. The position of petitioners is much weaker than that present in *Charles H. Lay*, 40 B. T. A. 522, where we said:

Of course, if when decedent died, there had been indebtedness to [the creditor] for money borrowed by the decedent, the claim would have been deductible in full. Doubtless, the Commissioner would not contend otherwise, but where an estate is liable only as a surety or endorser, it cannot take any deduction because of such liability where the principal has ample assets to pay the indebtedness. *Cf. Buck v. Helvering, supra; Parrott v. Commissioner*, 30 Fed. (2d) 792.

In affirming this holding, the Ninth Circuit, 152 F.2d 103 (1945), elaborated that the subrogation right was key:

... Whether the rights over be called a right of subrogation or a right to a right of subrogation or contribution, decedent at her death had property rights of value, and the right upon payment to acquire the right of subrogation is the property right which must be included in the gross estate.

No difficulty is encountered in fixing the value of the rights over. It is conceded that the company and the co-guarantor were, at the time of decedent's death, solvent and able to pay the claims and so continued up to the time of the hearing in the tax court. The Tax

Court so found and its finding is not challenged. In fact, it may be said the question admits of no dispute, the petitioners having so stipulated. At the hearing before the tax court the petitioners endeavored to show by expert testimony the value of the rights over at the time of decedent's death. This testimony was rejected by the tax court and we think correctly so. When, as here, the concession is made that the company was fully able to pay and discharge the debt, there is no reason to encumber the record by the introduction of opinion evidence as to the value. Such evidence would have been of no assistance to the tax court.

Rev. Rul. 60-247 provides:

Advice has been requested concerning the deduction, for Federal estate tax purposes, of claims against the estate which have not been paid or which will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment.

The question here arises from a United States District Court decision in the case of *Bertha Jacobi Winer v. United States*, 153 Fed. Supp. 941, which involved a suit by the executrix to recover estate tax paid by the estate of her deceased mother on the grounds that the Commissioner of Internal Revenue erred in disallowing a deduction for a claim of the daughter-executrix against the estate. The claim had become void and uncollectible by virtue of noncompliance with the applicable state statute. The daughter had loaned money to her mother and had received notes in exchange. The court found that there was no question of the legitimacy of the debt. Under the applicable state statute, however, a claim not filed in the office of the proper authority within a stated period of time becomes void and can no longer be the basis of a cause of action. The court found further that noncompliance with the statute was inadvertent and that the daughter could not profit by the deduction as she was taking nothing under the mother's will.

The United States District Court for the Southern District of New York held for the plaintiff on the ground that the daughter had, on date of death, an "enforceable claim" and that no more is needed to warrant deduction. It attached no importance to the fact that the debt could not be collected....

Section 2053(a) of the Internal Revenue Code of 1954 provides, in part, that the value of the taxable estate shall be determined by deducting from the value of the gross estate such amounts for claims against the estate as are allowable by the laws of the jurisdiction under which the estate is being administered.

Section 20.2053-4 of the Estate Tax Regulations states, in part, that only claims enforceable against the decedent's estate may be deducted.

In *Jacob A. Jacobs, et al., Executors of the Last Will of Morris Eisenstadt, Deceased, v. Commissioner*, 34 Fed. (2d) 233, Ct. D. 128, C.B. VIII-2, 403 (1929), *certiorari denied*, 280 U.S. 603, the opinion of the court was that Congress intended to provide a deduction for those claims which were presented and allowed or otherwise determined as valid against the estate and actually paid or were to be paid. In that case a widow elected to accept the provision of the will of her deceased husband in her favor in lieu of the amount provided by an antenuptial contract. The antenuptial contract provided for payment of an amount to her upon his death out of his estate in lieu of dower and other

marital rights. Under the state law such contract was valid and enforceable against the estate of the deceased husband at the time of his death. The court held, however, that the amount stipulated in the antenuptial contract was not deductible from the gross estate of the decedent for the reasons stated above.

The principles stated in the Jacobs case were cited with approval in *John Jacobs, et al., Executors of the Will of Carrie Jacobs Brown v. Commissioner*, 34 B.T.A. 594. There, personal property taxes were assessed by a county auditor upon property owned by the decedent. Subsequently, the state taxing authorities issued a certificate of immunity which, by state statute, constituted a defense in any action for recovery of the assessment. The taxes assessed had not been paid and no demand had been made by the taxing authorities. The court held that the assessment was not a claim against the estate and, therefore, the amount was not deductible for Federal Estate tax purposes.

Both the *Jacobs* and the *John Jacobs* cases were cited with approval in *Estate of William P. Metcalf, et al., v. Commissioner*, 7 T.C. 153. In that case, real estate taxes and penalties had accrued and constituted a lien on certain property of the decedent prior to his death. A suit to enforce the lien had been instituted, and the suit was compromised by the estate for a lesser amount than the amount of the taxes claimed. The court held that only the lesser amount was deductible from the gross estate of the decedent.

In *Estate of Ethel M. DuVal, et al., v. Commissioner*, 4 T.C. 722, affirmed, 152 Fed. (2d) 103, certiorari denied 328 U.S. 838, a bank, owner of a claim against decedent as guarantor of notes, consented to distribution of the estate without payment of its claim. It reserved, however, a claim against a co-guarantor. The estate would never be required to pay the claim. The court held that such claim was not deductible from the gross estate of the decedent. The opinion of the Tax Court of the United States stated, "A claim is an assertion of a right. If there be no assertion of a right or if the right to assert has been relinquished or abandoned, there is no claim."

Accordingly, it is the position of the Internal Revenue Service that no deduction will be allowed for claims against the estate which have not been paid or will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment.

Consistent with (but not citing) Rev. Rul. 60-247, *Estate of Conard v. Commissioner*, T.C. Memo. 1975-249, held:

The deduction for claims against the estate provided by section 2053(a)(3)¹ is limited to those claims which are allowable under the laws of the jurisdiction in which the estate is administered and which represent personal obligations of the decedent at the time of his death. Whether or not the claim has matured does not affect deductibility.²

¹ [footnote restated the statute]

² Estate Tax Regs. 20.2053-4.

It is settled, however, that Congress was concerned with actual claims, not theoretical ones that the estate will never be required to pay. *Jacobs v. Commissioner*, 34 F.2d 233, 235 (8th Cir. 1929), cert. denied 280 U.S. 603 (1929). Thus, although a valid,

enforceable claim exists at the time of death, if subsequent events relieve the estate of liability for the claim, no deduction will be allowed.³ *Estate of Quintard Peters Courtney*, 62 T.C. 317 (1974); *Estate of Frank G. Hagmann*, 60 T.C. 465 (1973), *affd. per curiam* 492 F.2d 796 (5th Cir. 1974); *Estate of Ethel M. DuVal*, 4 T.C. 722 (1945), *affd.* 152 F.2d 103 (9th Cir. 1945), *cert. denied* 328 U.S. 838 (1946); *John Jacobs, Executors*, 34 B.T.A. 594 (1936).⁴

³ A claim against the decedent as a secondary obligor is deductible if rights against the primary obligor are worthless. *Commissioner v. Wragg*, 141 F.2d 638 (1st Cir. 1944). See also *John Parrott, Jr., Executors*, 7 B.T.A. 134 (1927), *affd.* 30 F.2d 792 (9th Cir. 1929), *cert. denied* 379 U.S. 870 (1929). Richard testified that the primary obligor (Salt City Business College, Inc.) was unable to pay the notes, was insolvent, and continued to lose money after his sister's death. Respondent did not challenge Richard's characterization on cross-examination, nor present any contradictory evidence. Additionally, the estate tax return valued the stock in the corporation at zero and respondent did not challenge this valuation. While by no means free from doubt, we believe the state of the record requires a conclusion that at the time of the decedent's death the primary obligor was unable to honor the notes in question or reimburse the guarantors. Thus, in denying relief to petitioner, we do not do so on the grounds that the primary obligor was able to pay or that the petitioner would be subrogated to rights against the primary obligor equal to the claim against the estate. See *Du Val's Estate v. Commissioner*, 152 F.2d 103 (9th Cir. 1945), *affg.* 4 T.C. 722 (1945), *cert. denied* 328 U.S. 838 (1946).

⁴ For a different view, see *Russell v. United States*, 260 F.Supp. 493 (N.D. Ill. 1966); *Winer v. United States*, 153 F.Supp. 941 (S.D. N.Y. 1957). See also Stephens, Maxfield, & Lind, *Federal Estate and Gift Taxation*, 5-17, 5-18 (3d Ed.).

The conclusion we reach is dictated by our decision in *Estate of Frank G. Hagmann*, *supra*. There bona fide obligations on which the decedent was primarily liable were deducted from the gross estate. The relevant state statute provided that claims not properly filed would be void and unenforceable. No claims in respect of the debts were filed within the statutory period. We held that since the estate assets would not be used to pay the debts, the respondent's disallowance must be sustained.

Similarly, the deduction must be denied in the instant case. Kansas law⁵ requires that any demand against a decedent's estate, including those arising from liability as a surety, guarantor or indemnitor, be exhibited within 9 months of publication of the first notice to creditors. Moreover, Kansas law requires that liens upon the property of a decedent not existing at death must be exhibited in the same manner as other claims against the estate.⁶ Failure to exhibit the claim precludes its later enforcement.

[fn 5, 6 citations to Kansas law omitted]

In this case, notice of the appointment of an executor and notice to the creditors to present their claims was first given on April 15, 1970. The bar date for filing claims was January 15, 1971, and the Bank failed to present any claim by this date. The petitioner was thus relieved of liability on the notes endorsed by the decedent as co-guarantor. The petitioner has not and will not be required to honor the notes as co-guarantor. Consequently, the deduction must be denied.

Estate of Scofield v. Commissioner, T.C. Memo. 1980-470, had the following Official Tax Court Syllabus:

Decedent executed a will leaving substantially all his estate to his son and naming his son as executor. Subsequently, he guaranteed bank loans made to his son and pledged securities as collateral for the loans. The bank filed no claims against the estate during its probate, but the securities were distributed to the son subject to the security interest of the bank.

Held: (1) Under California law, the bank's claim on the guaranty was not extinguished by failure to file a claim against the estate since the claim was secured; (2) under sec. 2053, I.R.C. 1954, the estate is entitled to a deduction for the bank's lien, but the amount of the deduction must be reduced by the value of the right of subrogation against the son; and (3) the value of such right determined.

Scofield introduced its analysis:

We deal next with the Commissioner's contention that the decedent's guaranty and pledge were "in the nature of gifts or testamentary dispositions" to the extent they secured loans used by Mr. Scofield for personal living expenses. The argument derives from the cases construing section 2053(c), which provides in part:

The deduction allowed by this section in the case of claims against the estate, unpaid mortgages, or any indebtedness shall, when founded on a promise or agreement, be limited to the extent that they were contracted bona fide and for an adequate and full consideration in money or money's worth ...

In construing this provision,⁴ this and other courts have consistently held that the consideration in money or money's worth need not pass to the decedent. *Commissioner v. Porter*, 92 F.2d 426 (2d Cir. 1937), *affg.* 34 B.T.A. 798 (1936); *Carney v. Benz*, 90 F.2d 747 (1st Cir. 1937); *Commissioner v. Bryn Mawr Trust Co.*, 87 F.2d 607 (3d Cir. 1936), *affg.* a Memorandum Opinion of this Court; *Commissioner v. Kelly's Estate*, 84 F.2d 958 (7th Cir. 1936), *affg.* 31 B.T.A. 941 (1934), *cert. denied* 299 U.S. 603 (1936); *Estate of Borland v. Commissioner*, 38 B.T.A. 598 (1938); *Estate of Wade v. Commissioner*, 21 B.T.A. 339 (1930). A guarantor's obligation has been held to have been contracted for adequate and full consideration in money or money's worth when there has been a loan of money to a third party as a result of the guaranty and the guaranty thereby became binding. *Estate of Hofford v. Commissioner*, 4 T.C. 542 (1945), *supp. opinion* 4 T.C. 790 (1945); *Commissioner v. Porter*, *supra*; *Carney v. Benz*, *supra*; *Estate of Borland v. Commissioner*, *supra*.⁵

⁴ The requirement of an "adequate and full consideration in money or money's worth" came into law in 1926 as sec. 303(a)(1) of the Rev. Act of 1926, ch. 27, 44 Stat. 72.

⁵ In *Latty v. Commissioner*, 62 F.2d 952, 954 (1933), dismissing *petn. to rev.* 23 B.T.A. 1250 (1931), the Sixth Circuit, in dicta, expressed some doubt about such holdings by saying: "we think that ordinarily these words [the consideration requirement of sec. 2053(c)] must be construed to evidence an intent upon the part of Congress to permit the deduction of claims only to the extent that such claims were contracted for a consideration which at the time either augmented the estate of the decedent, granted him some right or privilege he did not possess before, or operated

to discharge a then existing claim, as for breach of contract or personal injury.” However, our research has revealed no recent decisions on the issue, and the Commissioner has not asked us to reconsider such holdings. Under the circumstances, we decline to do so on our own initiative.

In view of such decisions, it is clear that the estate is not to be denied the deduction merely because the decedent received no consideration in money or money’s worth for the guaranty. However, the Commissioner relies on dicta in some of such cases and argues that, in part, the deduction should be disallowed because the guaranty arrangement was used by the decedent as a means of making testamentary gifts to Mr. Scofield. The petitioner responds that by this argument, the Commissioner is seeking, indirectly, to challenge the holding that the deduction is not to be disallowed merely because the decedent received no consideration in money or money’s worth for the guaranty.

The *Scofield* standards regarding loan guarantees appear more favorable to estates than other claims against an estate. For example, before the unlimited marital deduction for qualified terminable interest property, any payments to a spouse upon death pursuant to a prenuptial agreement had to be supported by the decedent having received some property. In *Sutton v. Commissioner*, T.C. Memo 1973-211:

The requirement that an allowable claim against the estate must be contracted “for an adequate and full consideration in money or money’s worth” dates back in its present form to the Revenue Act of 1926. It was carried over without change in section 2053 of the Revenue Act of 1954.³ The courts have long held that it is not sufficient that the claim be enforceable as a matter of state law. In order to meet the test prescribed in the statute, there must be a commensurate benefit flowing from the claimant to the decedent. See *Latty v. Commissioner*, 62 F.2d 952 (C.A. 6, 1933). Furthermore, the consideration flowing to the decedent and the claim against the decedent must be of comparable value in terms of dollars and cents. *Estate of Herbert C. Tiffany*, 47 T.C. 491 (1967); *Estate of Ella J. Davis*, 57 T.C. 833 (1972). The consideration for Helen’s life annuity of \$400 per month predicated on the prenuptial agreement fails to meet that test. Decedent received nothing of comparable value. See *Estate of Frances R. Pollard*, 52 T.C. 741 (1969).

³ H. Rept. No. 1337, 83d Cong., 2d Sess. (1954), p. A317.

However, that strictness might be explained by Code § 2053(b), which has always viewed marital rights as insufficient consideration – except in the context of divorce, etc.

Scofield reasoned and held regarding the guaranty being a bona fide claim:

In support of his position, the Commissioner relies on the facts that the decedent made a gift to Mr. Scofield in 1968, that in that year, the decedent also executed his will in which he bequeathed substantially all of his estate to Mr. Scofield, that Mr. Scofield admitted that his income was negligible in the years 1968 through 1973, that Mr. Scofield used some of the funds borrowed from the bank to cover his personal expenses, and that Mr. Scofield sustained substantial losses in his stock transactions during those years. In addition, the Commissioner asserts that the decedent knew that Mr. Scofield needed some of the borrowed funds for his personal expenses and that the decedent reasonably knew that he would be called upon to pay off the loans to Mr. Scofield. However, the

record contains not one iota of evidence indicating that the decedent was aware of the facts that Mr. Scofield needed to use some of the borrowed funds for his personal expenses and that Mr. Scofield was sustaining losses on his stock transactions. Although Mr. Scofield testified in this case, he was never asked any questions concerning whether he revealed his need for funds and his financial condition to the decedent.

In this case, as in the *Hofford*, *Carney*, and *Porter* cases, the arrangements between the decedent and the lender took the form of a commercial transaction. In *Hofford*, *Carney*, and *Porter*, the courts recognized that they were dealing with what appeared to be a business transaction, and in their dicta, they made clear that they would look behind the form of the transaction only when there was evidence indicating that the arrangement was being used for the purpose of making gifts. Since the Commissioner has the burden of proof on this issue in this case, he has the burden of proving that in entering into the guaranty arrangement, the decedent intended to make gifts to Mr. Scofield, and the evidence is clearly insufficient to carry that burden. For all that we know, the decedent may have been wholly unaware of the fact that Mr. Scofield was using some of the borrowed funds for personal expenses or that Mr. Scofield was sustaining substantial losses; Mr. Scofield may have, deliberately or otherwise, withheld such information from the decedent. Moreover, even if the decedent was aware of such circumstances, both he and Mr. Scofield may have been eternally optimistic, hoping that Mr. Scofield's investments would, in time, prove far more successful. Without evidence showing that the decedent was aware of Mr. Scofield's need for money, we cannot infer that the decedent intended to make gifts by his continuing to guarantee the loans to Mr. Scofield.

Inasmuch as the Commissioner has failed to prove that gifts were intended, he has failed to bring his case within the dicta of *Hofford*, *Carney*, and *Porter*.⁶ Consequently, we need not, and do not, decide whether to adopt such dicta in this case.

⁶ It should be recognized that in the *Jermyn* case, the petitioner had the burden of proving that the decedent did not intend to make gifts. Whether we would reach the same result on the record in this case if the burden was on the petitioner is a matter not to be considered.

Scofield analyzed subrogation:

In *Eckhart v. Commissioner*, 33 B.T.A. 426 (1935), the decedent had endorsed two promissory notes which were payable on demand. At the date of his death, a balance of approximately \$148,000 was due on the notes, and they were secured by collateral of the maker having a value of \$65,000. After the decedent's death, the holder of the notes made an unsuccessful demand on the maker for payment, filed a claim against the decedent's estate which was allowed, and sold the collateral for approximately \$19,000. The proceeds of the collateral were applied to the notes, and the estate paid the difference and claimed a deduction therefor. This Court rejected the Commissioner's position that the deduction should be limited to the difference between the debt and the value of the collateral at the date of death and allowed the entire deduction. 33 B.T.A. at 440-441. We recognized the general rule for valuing the estate, but we pointed out that the amount of certain claims and losses depends upon events occurring subsequent to the valuation date. The estate was actually required to pay the entire difference between the amount of the debt and the proceeds from the sale of the collateral, and the Court held that such amount should be deductible.

The right of subrogation in this case is like the collateral in *Eckhart*: such right is not an asset of the estate which should be valued on the valuation date; rather, it represents an amount to be applied in reduction of the bank's lien in determining the amount of the allowable deduction. As in *Eckhart*, we believe that the amount of the deduction to be allowed in this case should not be based simply on the circumstances existing at the valuation date but should take into consideration all the events occurring during the administration of the estate. The Commissioner recognized that the amount of the lien is to be reduced by the payments made during the administration of the estate. Similarly, the reduction resulting from the existence of the right of subrogation should not be computed until the administration of the estate was completed and the collateral was distributed to Mr. Scofield, subject to the lien. Accordingly, we hold that the value of the right of subrogation should be determined as of the date of the distribution of the assets of the estate. For such purpose, the net value of Mr. Scofield's distribution is determined as of that date, and his net worth is determined as of that date.

Propstra v. U.S., 680 F.2d 1248 (9th Cir. 1982), did not allow consideration of post-mortem events in determining the deductibility of "claims that are certain and enforceable at the time of death":

As a preliminary matter we must determine the nature of the lien claims against the estate. The law is clear that post-death events are relevant when computing the deduction to be taken for disputed or contingent claims. See Treas. Reg. §20.2053-1(b)(3) ("No deduction may be taken on the basis of a vague or uncertain estimate."). See also *Estate of DuVal v. Commissioner*, 4 T.C. 722 (1945), *aff'd*, 152 F.2d 103 (9th Cir.), *cert. denied*, 328 U.S. 838, 66 S.Ct. 1013, 90 L.Ed. 1613 (1946). Less certain is the relevance of post-death events with regard to claims that are certain and enforceable at the time of death.

We first must determine whether the claim was disputed or contested. The Government argues that the estate contested the lien claims, citing the notation "contested in part" on the estate tax return in support of its argument. The estate contends that the notation was irrelevant; because the Association lacked the power to compromise its lien claim against decedent's estate at the time of his death, the claims were certain (that is for a liquidated sum), enforceable, and owing.

The executrix for the estate had hoped to find a defense against the Association's lien claims against the estate. This hope was reflected in the notation "contested in part" written next to the deductions taken for these claims on the estate tax form that she filed. The executrix' hopes, however, have no bearing on whether the Association's claims were certain or enforceable. The Government concedes that at the time of decedent's death the Association lacked the authority to settle its claims for less than their full amount. Moreover, the executrix had no legal or factual arguments that would support a challenge to the claims. The estate lacked even a colorable defense against the Association's claims. Consequently, the Association's lien claims were certain and enforceable.

This conclusion necessitates an examination of whether post-death events are relevant when computing the permissible deduction for certain and enforceable claims.⁹ We rule that, as a matter of law, when claims are for sums certain and are legally enforceable as of the date of death, post-death events are not relevant in computing the permissible deduction.

⁹ The commentators have differing opinions regarding this issue. See, e.g., Palmquist, *The Estate Tax Deductibility of Unenforced Claims Against a Decedent's Estate*, 11 *Gonzaga L.Rev.* 707 (1976) (post-death events irrelevant); Comment, *Estate and Income Tax: Claims Against the Estate and Events Subsequent to Date of Death*, 22 *UCLA L.Rev.* 654 (1975) (post-death events irrelevant); Comment, *Effect of Events Subsequent to the Decedent's Death on the Valuation of Claims Against His Estate Under Section 2053 of the Federal Estate Tax*, 1972 *Ill.L. Forum* 770 (post-death events relevant).

Neither section 2053(a) nor the tax regulations state on their face whether post-death events are relevant when computing the permissible deduction for certain and enforceable claims against the estate. Nevertheless, we think that various indicia show that Congress intended that post-death events be disregarded when valuing the claims against an estate.¹⁰

¹⁰ In examining cases that have previously considered this issue, we have found an irreconcilable split in authority. Compare *Commissioner v. Strauss*, 77 F.2d 401, 405 (7th Cir. 1935); *Russell v. United States*, 260 F.Supp. 493, 499 (N.D. Ill. 1966); *Winer v. United States*, 153 F.Supp. 941 (S.D.N.Y. 1957); *Estate of Lester v. Commissioner*, 57 T.C. 503 (1972) with *Gowetz v. Commissioner*, 320 F.2d 874 (1st Cir. 1963); *Commissioner v. Estate of Shively*, 276 F.2d 372, 374 (2nd Cir. 1960); *Estate of Courtney*, 62 T.C. 317 (1974); *Estate of Hagmann v. Commissioner*, 60 T.C. 465 (1973), *aff'd*, 492 F.2d 796 (5th Cir. 1974). Faced with these conflicting views, we have examined the arguments underlying each and conclude that *Strauss*, *Winer* and their progeny are more persuasive.

First, we find significance in a change in wording made by Congress when it enacted the Internal Revenue Code of 1954. Predecessors to section 2053 had authorized deductions of the value of only such claims "as are allowed by the laws of the jurisdiction ... under which the estate is being administered." See, e.g., *Int. Rev. Code of 1939*, ch. 3, §812(b)(3), 53 Stat. 123 (emphasis added). Some courts interpreted this language as meaning that the deduction was only for such claims as were actually paid. See *Commissioner v. Estate of Shively*, 276 F.2d 372, 374 (2nd Cir. 1960); *Estate of Metcalf v. Commissioner*, 7 T.C. 153, 160 (1946), *aff'd in unpublished opinion*, 47-2 U.S. Tax Cas. (CCH) ¶10,556 (6th Cir. 1947). Consequently, they concluded that post-death events were relevant to the valuation of claims against the estate and that the compromised portion of the claim against the estate "no longer represented an enforceable claim." *Estate of Metcalf*, 7 T.C. at 160. Other courts, however, noted that deductibility was conditioned on a claim's enforceability under local law, and that enforceability was to be determined as of the time of death. See *Smyth v. Erikson*, 221 F.2d 1, 3 (9th Cir. 1955); *Winer v. United States*, 153 F.Supp. 941, 943 (S.D.N.Y. 1957). They reasoned that the use of the term "allowed" "[was] not to be construed as meaning that unless a claim against the estate has been allowed by the state court no deduction therefor will be permitted." *Smyth*, 221 F.2d at 3. These courts reasoned that Congress intended that the phrase be used as a substantive guide delineating those claims (and other estate disbursements) that would be deductible. Specifically, Congress intended the phrase to mean that only claims based on legally recognized and enforceable rights were deductible; claims that were unenforceable because they lacked legal foundation were not deductible, even if actually paid. See *Wolfsen v. Smyth*, 223 F.2d 111 (9th Cir. 1955); *Jones v. United States*, 424 F.Supp. 236 (E.D. Ill. 1974). Congress lent support to this latter construction when, in enacting the Internal Revenue

Code of 1954, it replaced “allowed” with “allowable.” Accord, *Russell v. United States*, 260 F.Supp. 493, 499 (N.D. Ill. 1966); Comment, *supra*, 22 UCLA L.Rev. at 670.

Treasury Regulation 20.2053-4 also supports the construction that certain and enforceable claims against the estate should be valued without regard to post-death events. In pertinent part, it provides:

“The amounts that may be deducted as claims against a decedent’s estate are such only as represent personal obligations of the decedent *existing at the time of his death*, whether or not then matured, and interest thereon which had accrued at the time of death Only claims *enforceable* against the decedent’s estate may be deducted.”

(emphasis added). Significantly, the regulation designates “the time of death” as the critical reference point. In addition, it speaks of “enforceable” rather than “enforced” claims. These factors further suggest that post-death events are irrelevant to the computation of certain and enforceable claims against the estate. Accord, *Winer*, 153 F.Supp. at 943. See also *Jacobs v. Commissioner*, 34 F.2d 233, 236-37 (8th Cir.) (McDermott, J., dissenting), *cert. denied*, 280 U.S. 603, 50 S.Ct 85, 74 L.Ed. 647 (1929).

Finally, our construction is consistent with the teaching of *Ithaca Trust Co. v. United States*, 279 U.S. 151 49 S.Ct 291, 73 L.Ed. 647 (1929). In *Ithaca Trust* the Supreme Court considered whether post-death facts should be considered in measuring the value of a charitable gift for the purpose of deducting that value from the gross estate when computing the taxable estate. In holding that post-death events should be ignored, the Court reasoned:

The first impression is that it is absurd to resort to statistical probabilities when you know the fact. But this is due to inaccurate thinking. The estate so far as may be is settled as of the date of the testator’s death. The tax is on the act of the testator not on the receipt of property by the legatees. Therefore the value of the thing to be taxed must be estimated as of the time when the act is done Tempting as it is to correct uncertain probabilities by the now certain fact, we are of [the] opinion that it cannot be done

279 U.S. at 155, 49 S.Ct. at 291 (citations omitted).¹¹ In *Ithaca Trust*, the bequest was not for a liquidated sum; its value depended on the valuation of the use of property for the life of the testator’s widow. The fact that she died within six months of the date of the testator’s death was held not to be a proper consideration, and her life estate was determined according to mortality tables as of the date of the testator’s death. In contrast, in the present case the amount of the assessment was fixed as of the date of death. Therefore there is even less reason to look to post-death events.

¹¹ *Ithaca Trust* is arguably distinguishable from the instant case on the grounds that it dealt with charitable bequests, which are deductible from the gross estate pursuant to a statutory section different from that authorizing deductions for claims against the estate. See *Jacobs v. Commissioner*, 34 F.2d 233 (8th Cir.), *cert. denied*, 280 U.S. 603, 50 S.Ct. 85, 74 L.Ed. 647 (1929). This technical distinction, although accurate, fails to explain why deductions for claims against the estate should be computed differently from charitable bequests. The Eighth Circuit, relying on this distinction in *Jacobs*, provided no indication of why Congress would have intended such an anomalous result.

The Government denies the force of these arguments, and cites to *Jacobs v. Commissioner*, in which the Eighth Circuit construed a predecessor to section 2053(a) as requiring the consideration of post-death events when computing the value of claims against the estate.¹² *Jacobs*, however, is without persuasive force for several reasons. First, *Jacobs* is distinguishable from the instant case. In *Jacobs*, the decedent's will gave his widow a power to elect between two alternatives. Her claim, therefore, was not certain and enforceable; it was contingent. Second, we find the *Jacobs* court's analysis of Congressional intent unconvincing. The Eighth Circuit placed heavy reliance on the fact that "claims against the estate" appeared in the same paragraph as funeral and estate administration expenses.¹³ The court reasoned that, because funeral and administration expenses necessarily require consideration of post-death events, Congress must also have intended that post-death events be considered when computing claims against the estate. 34 F.2d at 236. We do not find this convincing evidence of Congressional intent. The same statutory section provides for the deduction of unpaid mortgages (or other indebtedness) on property when the value of the decedent's interest in that property has been included in the value of the gross estate. See note 8 supra. This amount can be ascertained as of the date of death. See *Commissioner v. Kelly's Estate*, 84 F.2d 958, 963-64 (7th Cir.), cert. denied, 299 U.S. 603, 57 S.Ct. 230, 81 L.Ed. 445 (1936). Thus, the contents of section 2053 do not give rise to any inference regarding whether post-death events should be considered when valuing claims against an estate. Moreover, except with regard to matters like funeral and administrative expenses, which by their very nature require valuation after a decedent's death, Congress has been explicit in providing for consideration of post-death events. See I.R.C. §§2013, 2032, and 2054. Third, *Jacobs* was decided before the change in the Code discussed above, which indicates Congress' most recently expressed intent. Finally, we find the *Jacobs* court's distinction of *Ithaca Trust*, which was decided approximately six months before *Jacobs*, inadequate for reasons already stated. See note 11 supra. For these reasons, *Jacobs* is of dubious precedential value to our determination of whether post-death events are relevant when computing the value of certain and enforceable claims against the estate.

¹² *Jacobs* has spawned a line of authority supporting the proposition that post-death events must be taken into account when computing the value of certain and enforceable claims against the estate. See, e.g., *Gowetz v. Commissioner*, 320 F.2d at 876; *Estate of Shively*, 276 F.2d at 375; *Estate of Hagmann*, 60 T.C. at 467-69; *Estate of Metcalf*, 7 T.C. at 161; *John Jacobs v. Commissioner*, 34 B.T.A. 594, 596-97 (1936), remanded on stipulation, 95 F.2d 1006 (6th Cir. 1938).

¹³ The statute involved in *Jacobs*, section 403(a)(1) of the Revenue Act of 1921, 42 Stat. 279, c. 136, closely resembled the one now before us, I.R.C. §2053.

The Government also relies on Revenue Ruling 60-247.¹⁴ Although revenue rulings are occasionally entitled to weight in the interpretive process, they are not conclusive statements of the law. See *McMartin Industries, Inc. v. Vinal*, 441 F.2d 1274 (8th Cir. 1971); *Macey's Jewelry Corp. v. United States*, 387 F.2d 70, 72 (5th Cir. 1967). A revenue ruling that conflicts with the revenue statutes must be ignored. *Idaho Power Co. v. Commissioner*, 477 F.2d 688, 696 n.10 (9th Cir. 1973), rev'd on other grounds, 418 U.S. 1, 94 S.Ct. 2757, 41 L.Ed.2d 535 (1974); *United States v. Eddy Brothers, Inc.*, 291 F.2d 529, 531 (8th Cir. 1961). In issuing Revenue Ruling 60-247, the Commissioner relied extensively on *Jacobs*, *John Jacobs*, and *Estate of Metcalf*, all of which are unconvincing in their assessment of Congressional intent regarding the relevance of

post-death events when computing the value of certain and enforceable claims against an estate. We are not persuaded by a revenue ruling that relies on cases that we find unpersuasive. Moreover, we note that Revenue Ruling 60-247 was disregarded in *Russell v. United States*, 260 F.Supp. 493, 499-500 (N.D.Ill.1966).

¹⁴ A deduction, for Federal estate tax purposes, will not be allowed for claims against the estate which have not been paid or will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment. An exception is made in cases where the claim may be deemed to have been paid through the payment of a legacy in an amount at least equal to that of the claim. Rev. Rul. 60-247, 1960-2 C.B. 272.

Having concluded that section 2053 precludes the consideration of post-death events in computing the value of certain and enforceable claims against an estate, we reverse the summary judgment granted in the Government's favor and remand for further proceedings consistent with this holding.

Estate of Theis v. Commissioner, 81 T.C. 741 (1983), a reviewed case with a well-reasoned dissent, the Official Tax Court Syllabus summarized:

Decedents gave one separate tract of land to each of their two children, but retained life estates in both parcels. Both children mortgaged the properties. Decedents joined in executing the mortgages. Decedent-husband also signed the note on one of the properties as an accommodation party, making him secondarily liable for its payment. Both properties were included at their date-of-death fair market value in the decedents' gross estates under sec. 2036(a), I.R.C. 1954. Decedents deducted the principal balances due on the mortgages from their gross estates. No claims had been made against the estates for payment. The children, who were primarily liable on the mortgages, appear solvent and have continued to make payments thereon. *Held*:

1. Neither estate is entitled to a deduction for a claim against the estate under sec. 2053(a)(3). *Estate of Courtney v. Commissioner*, 62 T.C. 317 (1974), followed.
2. Under the described circumstances of this case, no deduction is allowed for a mortgage debt under sec. 2053(a)(4).
3. The deduction or exclusion provided by sec. 20.2053-7, Estate Tax Regs., is not applicable.

The majority concluded that no deduction or exclusion was allowed, because that would have generated an end-run around Code § 2036:

A literal reading of section 20.2053-7, Estate Tax Regs., would require us to agree with petitioners. But we do not find that regulation applicable here. Section 20.2053-7, Estate Tax Regs., like section 2053(a)(4), was intended to cover situations involving the liability for mortgages on a decedent's own property. *Estate of Johnstone v. Commissioner*, 19 T.C. 44 (1952).¹² In the instant cases, the property was mortgaged after the decedents transferred remainder interests. To adopt a literal reading of section 20.2053-7, Estate Tax Regs., would be to go against the purpose and intent of section 2036(a) and section 2053(a)(4). For example, suppose an individual gifts a remainder interest in

property to his children and retains a life estate, the children could then mortgage the property (without having their father cosign the mortgage) or could sell the property to a third party who mortgages it. If we agreed with petitioners' contention, the father would have to include only the net equity of redemption value (i.e., subtract the mortgages) in his gross estate. This is wholly contradictory to the express language of section 2036(a). We cannot agree with petitioners because we do not think that Congress intended to allow deductions to estates for debts that the decedents would not be required to pay.¹³

¹² We note that the ultimate conclusion in *Johnstone* was contrary to this result because the decedent retained an interest in the property, as a tenant in common, at death. However, despite its contrary conclusion, this Court's reasoning in *Johnstone* supports our result in this case.

¹³ Petitioners' reliance on our opinion in *Estate of Scofield v. Commissioner*, T.C. Memo. 1980-470, for the proposition that the bank's liens were not extinguishable and therefore and deductible under section 2053 is misplaced.

Petitioners misstate the result of that case. In *Scofield*, a father executed a will in which he bequeathed stock to his son. The son borrowed money from a bank with the father acting as guarantor and pledging his stock as security. When the father died, the estate attempted to deduct the principal amount of the lien from the value of the gross estate.

The lien was not deductible in full, as petitioners in the present cases assert, but rather was offset by the value of the estate's right of subrogation against the son. Also, the case is distinguishable in that the Commissioner, unlike the present cases, conceded that the liens were deductible under sec. 20.2053-7, Estate Tax Regs., and the taxpayer conceded that the amount of the deduction was to be offset by the value of the estate's right of subrogation against the son. Indeed, when viewed in light of its differing facts and concessions, we read *Scofield* as supportive of our conclusions herein. See note 14 *infra*.

The record here does not indicate that the decedents have made, or will have to make, payments on the mortgage notes. The decedents' children appear to be solvent. In addition, no claims have ever been presented against the estates for payment. As noted previously, there are no claims against the decedents' estates for payment and no deductions are allowed under section 2053(a)(3). *Estate of Courtney v. Commissioner*, 62 T.C. 317 (1974).

We think the same result should follow in the instant cases where the decedents were not primarily liable on the mortgages and will not have to bear the burden of repayment. Section 20.2053-7, Estate Tax Regs., is not applicable to reduce petitioners' inclusion in their gross estates. Hence, we hold that the proper amount to be included in each decedent's estate is \$45,000, which represents his or her share of the entire value of the properties (which has been stipulated to be \$90,000).¹⁴

¹⁴ Moreover, even if sec. 20.2053-7, Estate Tax Regs., were applicable here, it would not aid petitioners. We have held that the decedents were not primarily liable on the mortgages. Accordingly, if we applied the regulation to the instant cases, it would require that the only value that need be returned in the decedents' gross estates is the equity of redemption value. However, this amount would then be offset by the

decedents' right of contribution against their children. In other words, the decedents' recovery from their children would reduce the estates' exclusions. *Estate of Shedd v. Commissioner*, 37 T.C. 394 (1961), *affd.* 320 F.2d 638 (9th Cir. 1963); *Du Val's Estate v. Commissioner*, 152 F.2d 103 (9th Cir. 1945), *affg.* 4 T.C. 722 (1945). See also R. Stephens, G. Maxfield & S. Lind, *Federal Estate and Gift Taxation*, 5.03 [6.] (1978). Here, the decedents as accommodation parties on the mortgages would have a right of recourse against their children for primary payment of the indebtedness. See Fla. Stat. Ann. sec. 673.3-415(5) (1966); *Beardmore v. Abbott*, 218 So. 2d 807 (Fla. Dist. Ct. App. 1969); *Central Trust Co. v. Manly*, 100 F.2d 992 (5th Cir. 1939). Accordingly, as in *Estate of Shedd*, and *Du Val's Estate*, the decedents' right of contribution would be used to offset any deduction (or exclusion) that the decedents would be entitled to. In the present cases the value of the property greatly exceeds the principal value of the mortgages. Also, the children appear solvent. Hence, applying sec. 20.2053-7, Estate Tax Regs., would require us to hold that the fair market value of the offset (or right of contribution) is equal to the value of the mortgages. Since the exclusion would be offset by this right of contribution, the value of the property includable in the decedents' gross estates would be each decedent's share of the entire value of the property, or \$45,000 (per agreement by the parties).

Rev. Rul. 84-42 involved the following facts:

In 1976, *D*, a resident of State X, gratuitously conveyed a remainder interest in real estate to *A*, retaining a life estate.

In 1976, a bank in State X loaned *A* 100x dollars and as security received a mortgage on the property signed by both *A* and *D*. Under the law of State X, *D*, was a guarantor and, as such, had a right of reimbursement against *A*, the primary obligor, in the event *D* was required to pay the loan directly or if *D*'s life estate was sold in foreclosure. *A* was solvent at the time of the loan transaction, and *D* had a reasonable expectation of reimbursement from *A* in the event *D* was required to pay the loan for *A*. At and after *D*'s death, *A* remained solvent and was expected to continue paying the loan.

D died in 1981. Because *D* retained a life estate in the transferred property, the value of property was subject to inclusion in *D*'s gross estate under section 2036 of the Code. The executor of *D*'s estate sought to deduct the mortgage balance alternatively under section 2053(a)(3) or (a)(4) of the Code.

Rev. Rul. 84-42 reasoned and held:

In Rev. Rul. 76-235, 1976-1 C.B. 277, the decedent gratuitously transferred property in contemplation of death. Subsequent to the transfer and one month prior to the decedent's death, the transferee obtained a loan mortgaging the property to secure the loan. The decedent received no proceeds from the loan, and neither the decedent nor the decedent's estate was liable for the loan.

The ruling holds that the full value of the transferred property is includible in the decedent's gross estate under section 2035 of the Code as in effect prior to amendment by the Tax Reform Act of 1976, and the amount of the mortgage is not deductible from the decedent's gross estate under section 2053 of the Code.

In the present case, the decedent made a transfer described in section 2036 of the full value of the unencumbered remainder interest. The property was encumbered after the transfer, and D received no proceeds from the loan. Furthermore, the encumbrance of the property had no immediate effect on D's continued retention of the lifetime enjoyment of the property. Other than as a guarantor, neither D nor his estate was liable for the loan. Therefore, in accordance with Rev. Rul. 76-235, the entire value of the property is includible in D's gross estate under section 2036 of the Code, and no deduction is allowed for the mortgage under section 2053(a)(4).

Unlike the situation in Rev. Rul. 76-235, in the present case D participated in the loan transaction as guarantor. However, where the decedent is a guarantor, and there is a right of reimbursement, the amount deductible under section 2053(a)(3) cannot exceed the amount the estate actually pays on the debt and is further limited by any expectation of reimbursement. See *Commissioner v. Wragg*, 141 F.2d 638, 640 (1st Cir. 1944); and *Estate of Duval v. Commissioner*, 4 T.C. 722, 726 (1945), aff'd, 152 F.2d 103 (9th Cir. 1945), cert. denied 328 U.S. 838 (1945).

If the executor of D's estate is not called upon to pay the indebtedness, the amount of the indebtedness is not deductible as a claim against the estate for purposes of section 2053(a)(3) of the Code. See Rev. Rul. 60-247, 1960-2 C.B. 272. If the executor is called upon and pays the indebtedness, the amount of the indebtedness is not deductible for purposes of section 2053 because A was solvent at that time and D's estate has a right of reimbursement. If, in the situation described above, A became insolvent subsequent to the loan transaction and was delinquent in making the loan payments, D's estate could deduct, under section 2053, the amount paid on the indebtedness reduced by the reasonable value of the right of reimbursement. See Rev. Rul. 60-247 and *Commissioner v. Wragg*, cited above, at page 640.

HOLDING

If D is guarantor of a loan to A, with a right of reimbursement, and the loan is secured by a mortgage on property D had previously transferred to A subject to a retained life estate, the entire value of the property, unreduced by the mortgage, is includible in D's gross estate under section 2036 of the Code. If D's estate is not called upon to pay the indebtedness, no amount of the indebtedness is deductible under section 2053.

First Interstate Bk. of Ariz., N.A. v. U.S., 57 AFTR 2d 86-1561 (D. AZ 1986), addressed first a guarantee that the debtor paid in part after the guarantor's death:

At the time of death, decedent was guarantor, with his wife, of the \$400,000 United Bank loan to the primary obligor T.G.K. Construction Company. Approximately four months after decedent's death, the primary obligor-T.G.K. paid off \$50,000 of the principal on the United Bank loan, leaving \$350,000 on the loan.

Plaintiff argues that T.G.K.'s subsequent payment of the \$50,000 is irrelevant to the amount of deduction arising from the United Bank loan. Plaintiff argues that the estate is entitled to a deduction equal to the decedent's one-half community share of the liability represented by the United Bank's claim, or \$200,000. Defendant argues that the deduction should only be in the amount of \$175,000 based upon the contingent liability of the decedent-guarantor after payment of the \$25,000 of the primary obligor-T.M.C.

Determination of the correct amount of deduction allowable to plaintiff turns on whether the post-death event of the payment by the primary obligor is to be taken into account.

“[A]s a matter of law, when claims are for sums certain, and are legally enforceable as of the date of death, post-death events are not relevant in computing the permissible deduction.” *Propstra v. United States*, 680 F.2d 1248, 1254 (9th Cir. 1982). Post-death events are relevant when the claims are disputed or contingent. *Propstra*, 680 F.2d at 1253. The real issue is whether, at the time of decedent’s death, the claim by United Bank against the decedent as guarantor was for a sum certain and legally enforceable or contingent and uncertain.

The ultimate liability of the decedent-guarantor was wholly contingent upon the ability of the primary obligor-T.G.K. to pay the amount due on the note. While in serious financial difficulty at the time of decedent’s death, Stipulation of Facts at 3, T.G.K. was not in default. The ultimate liability, therefore, was uncertain. Post-death events, such as T.G.K.’s payment of \$50,000 on the outstanding principal, should be taken into account in determining the deduction.

Consequently, the correct amount of deduction that the estate may claim is \$175,000, and the taxable estate was properly calculated by the Internal Revenue Service using the lesser amount.

First Interstate Bk. then considered the deductibility of a claim that, if unsecured, would have been invalid because the lender failed to make a claim against the estate. However, the guarantee was secured by the estate’s property, so the estate paid is (using other assets). The court upheld the deduction for the claim, reasoning:

... Decedent’s ultimate liability was contingent upon the ability of T.G.K. to continue construction without needing the construction bonds insured by Fireman’s Fund. While T.G.K. was in serious financial shape at the time of decedent’s death, Stipulated Facts at 3, it was still operating and continued to operate for almost six months after the decedent’s death. Since the claim was uncertain and contingent, post-death events should be considered and failure to comply with Ariz. Rev. Stat. Ann. § 14-3801 would appear to bar the deduction under 26 U.S.C. §2053.

However, Ariz. Rev. Stat. Ann. § 14-3814 provides, in pertinent part:

If any assets of the estate are encumbered by mortgage, pledge, lien or other security interest, the personal representative may pay the encumbrance or any part thereof ... whether or not the holder of the encumbrance has presented a claim, if it appears to be for the best interest of the estate.

In the instant case, Fireman’s Fund had a security interest in all of T.G.K. and the Knochenhauers rights under contracts, subcontracts, machinery and equipment and contract payments. See Plaintiff’s Response to Motion for Summary Judgment and Motion for Summary Judgment at 7. Defendant argues that Fireman’s Fund did not have a secured obligation. Defendant’s Reply Memorandum at 10. A “security interest” is no more than the right of a creditor to attach and perfect an interest in the property superior to the interest of any other creditor. *First Nat’l Bank of Arizona v. Carbajal*, 132 Ariz. 263, 645 P.2d 778, 783 (1982) (in banc). Fireman’s Fund had that right under the security-

indemnity agreement. As such, the payment of the encumbrance was allowable under Ariz. Rev. Stat. Ann. § 14-3814 as being in the best interest of the estate.

Estate of Cafaro v. Commissioner, T.C. Memo. 1989-348, allowed a deduction for a claim in part to the extent the estate actually paid. Next, the court determined that the decedent was only a guarantor and not a borrower under certain loans:

When the claims against the estate are based on the fact that the decedent acted as a guarantor or an accommodation party for the debts of another who has not defaulted, such claims are considered unmatured, potential claims, a secondary rather than a primary liability. *Estate of Theis v. Commissioner*, *supra*, 81 TC at 747-748. Thus, when the decedent is a guarantor for the debts of another, events that occurred after the decedent's death and that affected that secondary liability are considered by the courts. *Estate of Hagmann v. Commissioner*, *supra*, 60 TC at 468; *Estate of DuVal v. Commissioner*, *supra*, 4 TC at 726; *Schiffman v. United States*, 51 F. Supp. 728, 732 (Ct. Cl. 1943). In Illinois, a guaranty contract is extinguished when the primary obligor is released from the liability, since there is no longer any obligation to guarantee. *Rock Island Bank & Trust Co. v. Stauduhar*, 59 Ill. App. 3d 892, 375 N.E.2d 1383, 1389-1390 (1978). Events after the death of the decedent may be considered to determine whether an obligation exists and how much of it can be deducted from the guarantor's estate. *Estate of Du Val v. Commissioner*, *supra*, 4 TC at 726. The reasoning behind this is that if two guarantors to the same note died at the same time and outside events were not considered to determine whether the estate was actually required to pay the claim, both guarantors would be able to deduct this same debt from their taxable estates, neither of whom might actually ever pay the claim. *Estate of Du Val v. Commissioner*, *supra*.

With regard to the loans as to which the decedent signed his name along with either Associates Partnership, Ltd. or Executive Centers of America, Inc., petitioner claims that the decedent was the co-maker on the loans rather than the guarantor and so the estate may deduct the full amount of the claim. A guarantor or an accommodation maker is a party who signs an instrument in any capacity for the purpose of lending his name to it. Ill. Rev. Stat. ch. 26, par. 3-415(1) (1965); *Marcus v. Wilson*, 16 Ill. App. 3d 724, 306 N.E.2d 554, 559 (1973). The intent of the parties is the significant factor in determining whether the party is an accommodation party, and if no intent is expressed, the purpose or use of the instrument is a significant element. *Aurora Firefighter's Credit Union v. Harvey*, 163 Ill. App. 3d 915, 516 N.E.2d 1028, 1032 (1987); *Holcomb State Bank v. Adamson*, 107 Ill. App. 3d 908, 438 N.E.2d 635, 638 (1982). When a party receives no direct benefit from the execution of a note, including the fact that the party is not the one to whom the proceeds are given, that party will likely be considered an accommodation party. *Aurora Firefighter's Credit Union v. Harvey*, *supra*; *Godfrey State Bank v. Mundy*, 90 Ill. App. 3d 142, 412 N.E.2d 1131, 1136 (1980). The fact that the party may sign the note where makers normally sign does not mean that the party is not an accommodation party. *Holcomb State Bank v. Adamson*, *supra*.

Then, the court denied a deduction with respect to all loan guarantees that had not been called:

Since the decedent acted as a guarantor with regard to the three bank loans with respect to which the parties primarily liable had not defaulted, these claims are unmatured, potential claims. We conclude that events after the decedent's death may be considered to determine the validity and enforceability of the claims and how much, if any, may be deducted as a claim against the estate. Although the claims on the above

three notes were timely filed in the Probate Court, there is no evidence that any of the primary obligors ever defaulted on the debts and all three notes were paid by someone other than petitioner....

Letter Ruling 9321004 involved the following facts:

The decedent was the founder, sole shareholder, and president of an incorporated architectural firm specializing in interior design. The decedent's 100 percent stock ownership interest was included in his gross estate for federal estate tax purposes at its date of death value.

On December 31, 1988, the decedent executed a written guaranty, personally guaranteeing payment by the corporation of its obligations under an office lease. The obligations included payments for monthly rent as well as specified taxes and expenses. The landlord was not related to the decedent or his corporation. The guaranty covered four calendar years beginning with 1989. The decedent's liability was not to exceed \$150,000 for each of the first two years and \$75,000 for each of the second two years. Under the guaranty, the landlord could enforce against the decedent any claim it could enforce against the corporation without first enforcing the claim against the corporation.

On October 1, 1990, the decedent died. At his death, the corporation was solvent and not in default on the lease. However, after the decedent's death, the corporation's business contracted, and the corporation ceased operations about one year after his death.

Approximately five months after the decedent's death, based on the guaranty, the landlord timely filed a contingent creditor's claim in the local probate court against the decedent's estate. The claim was approved by the estate and allowed by the court. In September 1991, about 11 months after the date of death, the corporation defaulted on the lease. On October 15, 1991, soon after the corporation ceased doing business, the landlord terminated the lease, and subsequently demanded \$75,000 from the estate under the guaranty. In December 1991, approximately 14 months after the decedent's death, the estate paid the \$75,000.

Letter Ruling 9321004 reasoned and ruled:

Although there is some divergence among the courts concerning the relevance of post-death events in determining the deductibility of claims against an estate under section 2053(a)(3) of the Code,¹ there seems to be general agreement that post-death events would be taken into account if the claim is "contingent" as of the date of death. *Propstra v. United States*, 680 F.2d 1248 (9th Cir. 1982); *Estate of Cafaro v. Commissioner*, T.C. Memo 1989-348. In *Estate of Cafaro v. Commissioner*, the Tax Court considered the deductibility of claims for debts guaranteed by the decedent for primary obligors who had not defaulted as of the decedent's death. The Tax Court enunciated the following rules concerning decedent-guarantors:

When the claims against the estate are based on the fact that the decedent acted as a guarantor or as an accommodation party for the debts of another who has not defaulted, such claims are considered unmatured, potential claims, a secondary rather than a primary liability. *Estate of Theis v. Commissioner*, 81 T.C. at 747-748. Thus, when the decedent is a guarantor for the debts of another, events that

occurred after the decedent's death and that affected that secondary liability are considered by the courts. *Estate of Hagmann v. Commissioner*, 60 T.C. at 468; *Estate of Du Val v. Commissioner*, 4 T.C. at 726; *Schiffman v. United States*, 51 F.Supp. 728, 732 (Ct. Cl. 1943).

¹ See, generally, *Estate of Van Horne v. Commissioner*, 78 T.C. 728, 736-737 (1982), *aff'd.*, 720 F.2d 1114 (9th Cir. 1983), and the cases discussed therein. *Van Horne* held that post-death events are generally not considered in determining the deductibility of an annuity. The Eighth Circuit has found section 2053(a)(3) to require the consideration of post-death events in determining the deductibility of claims against an estate. In *Estate of Sachs v. Commissioner*, 856 F.2d 1158 (8th Cir. 1988), the estate claimed a deduction under section 2053(a)(3) of the Code for an income tax liability owed by the decedent at death which subsequently ceased to exist due to the post-death enactment of retroactive statutory relief. The court held that "an estate loses its [section] 2053(a)(3) deduction for any claim against the estate which ceases to exist legally, regardless of whether the nullification of the claim could have been foreseen." *Id.* at 1161.

The court stated that "the date-of-death principle of valuation does not apply to claims against the estate deducted under [section] 2053(a)(3)." Borrowing from its opinion in *Jacobs v. Commissioner*, 34 F.2d 233 (8th Cir. 1929), *cert. denied*, 280 U.S. 603, the court found that Congress intended the deduction of "actual claims, not theoretical ones." Stated the court, "It was, in our opinion, claims presented and allowed or otherwise determined as valid against the estate and actually paid or to be paid that Congress had in mind." *Id.* at 1160.

The court found that because post-death events are to be taken into account and because the estate never paid any amounts pursuant to the guaranty, the estate could not deduct any of the claims based on the guaranty.

In the present case, the decedent died during the second year of the lease, at a time when the corporation was solvent. At his death, under the guaranty, the decedent had a potential liability of \$150,000 for calendar year 1990, \$75,000 for calendar year 1991, and \$75,000 for calendar year 1992. At the time of death, the decedent's estate was subject to a contingent obligation incurred pursuant to a bona fide arm's length contractual arrangement entered into by the decedent prior to his death. Under the guaranty, the decedent's liability was enforceable directly against him if the corporation failed to meet its obligations under the lease. Thus, the estate's post-death payment of its liability under the guaranty was made pursuant to a personal obligation of the decedent existing at the time of his death. As the court explained in *Estate of Cafaro*, post-death events (*i.e.* the default by the primary obligor and payment by the estate) would be taken into account under these circumstances for purposes of section 2053(a)(3) of the Code.

Accordingly, in the present case, the estate may deduct, under section 2053(a)(3) of the Code, the \$75,000 it paid as guarantor of the corporation's obligations under the lease reduced by the reasonable value of any right of reimbursement. See Rev. Rul. 84-42, 1984-1 C.B. 194, holding that, if the primary obligor is insolvent and in default when the guarantor's estate pays a claim, the estate can deduct the amount paid reduced by the reasonable value of the right of reimbursement.

Conclusion

The decedent's estate may claim a deduction under section 2053(a)(3) of the Code for the post-death payment of the obligation under the guarantee agreement, even though at the time of the decedent's death the primary obligor had not yet defaulted.

In *Estate of Hendrickson v. Commissioner*, T.C. Memo. 1999-357, the lender never called the guarantee (arising from a loan that morphed from actual to nominal co-borrower), so no deduction was allowed:

As a result of these assumptions by the children (and their spouses), decedent effectively became a guarantor, rather than a co-obligor, with respect to most of the Land Bank loan. Because a guarantor's rights to contribution (or subrogation) are greater than a co-obligor's, it would be inappropriate to determine the value of decedent's contribution rights by reference to the number of obligors on the Land Bank loan. See *Estate of Theis v. Commissioner*, 770 F.2d 981 (11th Cir. 1985) (section 2053 deduction denied in its entirety where decedent was only secondarily liable, because decedent had 100-percent right of contribution from primary debtor), *affg.* 81 T.C. 741 (1983)

In *Estate of Theis v. Commissioner*, *supra*, we were required to consider the availability of a deduction for joint and several debt, where the security for the loan was included in the decedent's estate. We held that no unpaid mortgage deduction was allowable, because the decedent was in fact a guarantor or accommodation party, rather than a true co-obligor. See *id.* at 748-751.

As noted above, in this case: (1) The children and their spouses expressly assumed most of decedent's share of the Land Bank loan; (2) decedent had rights of contribution (or subrogation) against her co-obligors on the Land Bank loan, but we are unable to determine the value of those rights; (3) petitioner admits that most of the proceeds of the Land Bank loan did not benefit decedent, and there is little evidence that more than a de minimis portion of the proceeds benefited decedent; (4) payments have continued to be made on the Land Bank loan since decedent's death; (5) neither Garry's estate nor decedent deducted the interest on the Land Bank loan; (6) no claims were filed against decedent's estate with respect to the Land Bank loan; and (7) only a small portion of the security for the Land Bank loan was included in decedent's estate.

On the basis of all these facts and circumstances, we hold that petitioner is not entitled to any deduction for the Land Bank loan under section 2053(a)(4), even though a small portion of the security for the loan was included in decedent's estate. See *Estate of Theis v. Commissioner*, *supra*; *Estate of Courtney v. Commissioner*, *supra*; *cf. Estate of Fawcett v. Commissioner*, 64 T.C. 889 (1975) (Commissioner's determination that one-half of joint and several debt was deductible as an unpaid mortgage was not disturbed); *Estate of Scofield v. Commissioner*, T.C. Memo. 1980-470 (estate's unpaid mortgage deduction, reduced by value of decedent's right of subrogation, held proper where decedent guaranteed secured debt; property securing debt was distributed to decedent's son (the primary debtor) by the estate, subject to the mortgage; and the giving of the guaranty was not a gift).

III.B.1.a.ii.(c). Loan Guarantees Forbidden for IRAs

“Prohibited transaction” includes any direct or indirect “lending of money or other extension of credit” between a plan and a disqualified person.⁶²⁹⁸

If, during any taxable year of an IRA owner, that individual or his beneficiary engages in any prohibited transaction with respect to such account, such account ceases to be an IRA as of the first day of such taxable year.⁶²⁹⁹

III.B.1.a.ii.(d). Income Tax Consequences Involving Loan Guarantees

Generally, a guarantee is not considered to be a payment for income tax purposes. Instead, when the lender forces the guarantor to make a payment, the actual payment is a loan from the guarantor to the borrower.

Guarantees can play a role in certain C corporation debt-equity disputes: C corporation shareholders often prefer to treat advances to the corporation as debt, so that they can extract the money without the extraction constituting a dividend.⁶³⁰⁰ This has prompted disputes over whether advances are debt or equity.⁶³⁰¹ Along these lines, a shareholder’s guarantee of a corporation’s loans may be characterized as a loan to the shareholder followed by the shareholder’s contribution to capital if the corporation is thinly capitalized and the lender looks to the guarantor as the primary source for payment, in which case the corporation’s repayment constitutes a distribution to the shareholder that might be taxable as a dividend.⁶³⁰² If a corporation is thinly capitalized, the shareholder’s payment of the corporation’s bank loan pursuant to a guarantee is not deductible as a debt when the loan (really the shareholder’s

⁶²⁹⁸ Code § 4975(c)(1)(B).

⁶²⁹⁹ Code § 408(e)(2)(A). See part II.G.22 IRA as Business Owner, especially fn. 1874.

⁶³⁰⁰ See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property.

⁶³⁰¹ See part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

⁶³⁰² *Plantation Patterns, Inc. v. Commissioner*, 462 F.2d 712 (5th Cir. 1972) (*cert. den.* 409 U.S. 1076 (1972)), *aff’g* T.C. Memo. 1970-182. See Bittker & Eustice, *Federal Income Taxation of Corporations & Shareholders* (WG&L), ¶ 4.03[3][f][iii] Borrower identity: guarantees and back-to-back loans, stating in a footnote:

The leading case on this issue is *Plantation Patterns, Inc. v. Comm’r*, 462 F2d 712 (5th Cir.), *cert. denied*, 409 US 1076 (1972); see also *Casco Bank & Trust Co. v. United States*, 544 F2d 528 (1st Cir. 1976), *cert. denied*, 430 US 907 (1977), and cases cited therein; *In re Lane*, 742 F2d 1311, 1320 (11th Cir. 1984) (guaranties used as substitutes for infusion of more capital). But, for cases treating the corporation as the true debtor, see *J. Paul Smyers*, 57 TC 189 (1971) (fact that bank loan would not have been made without guarantee of shareholder does not, per se, make bank loan equity when corporation is not otherwise thin); *Murphy Logging Co. v. United States*, 378 F2d 222 (9th Cir. 1967) (corporation was not thin in either case); *Falkoff v. Comm’r*, 604 F2d 1045 (7th Cir. 1979) (corporation held to be true borrower); *Intergraph Corp.*, 106 TC 312 (1996), *aff’d*, 121 F3d 723 (11th Cir. 1997) (form of loan was to subsidiary; substance followed form; not a guarantor parent). Compare *Joseph Creel*, 72 TC 1173 (1979), *aff’d* sub nom. *Martin v. Comm’r*, 649 F2d 1133 (5th Cir. 1981) (on facts at issue, where corporation borrowed funds and loaned proceeds to guarantor shareholders, transactions recast as loan by third party to shareholders). The same issue arises in connection with S corporations, as discussed at ¶ 6.06[4][b]; see, e.g., *Bergman v. United States*, 174 F3d 928 (8th Cir. 1999) .

subrogation rights against an insolvent corporation) is more properly characterized as a contribution to capital.⁶³⁰³

However, that loan treatment does not extend to the S corporation arena for the purpose of creating basis to absorb loss; for that specific purpose, an actual loan and not a mere guarantee is required.⁶³⁰⁴ Only when the guarantor pays on the loan is the guarantor considered to have made a loan.⁶³⁰⁵

⁶³⁰³ *Titmas v. Commissioner*, T.C. Memo. 1995-267; *Peterson v. Commissioner*, T.C. Memo. 1997-377. Bittker & Eustice, ¶ 4.03[3][f][iii] Borrower identity: guarantees and back-to-back loans, Federal Income Taxation of Corporations & Shareholders, explains (footnotes omitted, except for one):

Use of shareholder-guaranteed corporate loans is sometimes suggested as a method of avoiding the thin capitalization problem. The theory is that if the corporation is organized with a minimum of equity capital and then borrows whatever funds it may need from a bank or other outside lender on notes endorsed by its shareholders, the interest paid by the debtor corporation to the lender should be deductible under § 163 and the repayment of the borrowed funds at maturity should not constitute a dividend to its shareholders. This recommendation of guaranteed loans as a solution to the problems of the thin corporation, however, underestimates the perspicacity of the courts. Just as a bond may not necessarily be a bond, a guarantor may not necessarily be a guarantor, and, for that matter, a lender may not necessarily be a lender. In form, the bank may have lent money to the corporation upon the shareholders' guarantee, but the substance of the transaction may be that the bank made the loan to the shareholders, who in turn passed the funds on to the corporation as—perish the thought—a capital contribution.¹⁷²

If a transaction is recast in this fashion, any payments by the corporation to the bank (whether labeled interest or repayment of loan) serve to discharge obligations of the shareholders to the bank and thus are disguised dividends. If the corporation becomes insolvent, however, the shareholders would suffer capital losses (long-term or short-term, as the case may be) under § 165(g), rather than short-term capital losses under § 166(d) as interpreted by the *Putnam* case. Similarly, where a loan is made by one party to an intermediary party who relends to a borrower that is related to the first lender (a so-called back-to-back loan), regulations may recast such transactions, under appropriate circumstances, in accordance with their true substance, namely, as a direct loan from the first lender to the related borrower.

Footnote 172:

The leading case on this issue is *Plantation Patterns, Inc. v. Comm'r*, 462 F2d 712 (5th Cir.), cert. denied, 409 US 1076 (1972); see also *Casco Bank & Trust Co. v. United States*, 544 F2d 528 (1st Cir. 1976), cert. denied, 430 US 907 (1977), and cases cited therein; *In re Lane*, 742 F2d 1311, 1320 (11th Cir. 1984) (guaranties used as substitutes for infusion of more capital). But, for cases treating the corporation as the true debtor, see *J. Paul Smyers*, 57 TC 189 (1971) (fact that bank loan would not have been made without guarantee of shareholder does not, per se, make bank loan equity when corporation is not otherwise thin); *Murphy Logging Co. v. United States*, 378 F2d 222 (9th Cir. 1967) (corporation was not thin in either case); *Falkoff v. ⁶³⁰⁵ Reg. § 1.1366-2(a)(2)(ii), reproduced in fn. 1205. Reg. § 1.1366-2(a)(2)(iii), Example (4) provides: *Guarantee*. A is a shareholder of S, an S corporation. In 2014, S received a loan from Bank. Bank required A's guarantee as a condition of making the loan to S. Beginning in 2015, S could no longer make payments on the loan and A made payments directly to Bank from A's personal

In the partnership arena, a guarantee does not constitute a liability,⁶³⁰⁶ but it can affect how debt is allocated among the partners, because generally debt is allocated according to who bears the economic risk of loss.⁶³⁰⁷ For more information, see part II.C.3 Allocating Liabilities (Including Debt), including when a guarantee may be disregarded in allocating liabilities; *Tribune Media Company v. Commissioner*, T.C. Memo. 2021-122, respected a guaranty, concluding.⁶³⁰⁸

We will not invalidate a collection guaranty simply because the lenders must seek payment from other potential sources before turning to the guarantor. Similarly, we will not invalidate a guaranty because the borrowing entity structured its debt to mitigate the risk of default. An entity may (and is perhaps encouraged to) create a debt structure that maximizes its ability to satisfy the terms of its debt agreements.

When a taxpayer makes a payment to discharge part or all the taxpayer's agreement to act as a guarantor where the agreement provides for a right of subrogation or other similar right against the issuer, treatment as a worthless debt is not allowed until the taxable year in which the right of subrogation or other similar right becomes totally worthless (or partially worthless in the case of an agreement which arose in the course of the taxpayer's trade or business).⁶³⁰⁹ Normally, a guarantor's payment on a debt will be deductible,⁶³¹⁰ either as a business bad debt⁶³¹¹ or non-business bad debt. Bad debt deductions apply only where the taxpayer received reasonable consideration for making the guarantee and provides that consideration received from a spouse or other defined family member must be direct consideration in the form of cash or property.⁶³¹²

funds until the loan obligation was satisfied. For each payment A made on the note, A obtains basis of indebtedness under paragraph (a)(2)(ii) of this section. Thus, A's basis of indebtedness is increased during 2015 under paragraph (a)(2)(ii) of this section to the extent of A's payments to Bank pursuant to the guarantee agreement.

⁶³⁰⁷ See also Reg. § 1.175-4(b)(2)(iv)(A).

⁶³⁰⁸ For an excerpt from the case with a complete discussion, see part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

⁶³⁰⁹ Reg. § 1.166-9(e)(2). *Intergraph Corp. v. Commissioner*, 106 T.C. 312, 324 (1996), held: Section 1.166-9(a), (d), and (e)(2), Income Tax Regs., properly read, stands for the proposition that where a guarantor does have rights of subrogation and reimbursement from the original debtor (regardless of whether or not these rights are expressly stated in the guaranty agreement), the provisions of section 1.166-9(e)(2), Income Tax Regs., apply, and the guarantor is not entitled to a bad debt deduction until the rights of subrogation and reimbursement are shown to be worthless. See *Howell v. Commissioner*, 69 F.2d 447, 451 (8th Cir. 1934), *affg.* 22 B.T.A. 140 (1931); *Martin v. Commissioner*, 52 T.C. 140, 143 (1969); *Rietzke v. Commissioner*, 40 T.C. 443, 451 (1963), *affd.* 424 F.2d 1368 (9th Cir. 1970); *Bradford v. Commissioner*, 22 T.C. 1057, 1069 (1954), *revd.* on other issues 233 F.2d 935 (6th Cir. 1956); *Standard Oil Co. v. Commissioner*, 7 T.C. 1310, 1323 (1946), *supplemented by* 11 T.C. 843 (1948).

⁶³¹⁰ See Blattmachr and Zaritsky, *Is the BDIT Ready for Primetime?* *Probate Practice Reporter* (University of South Carolina School of Law, ISBN 1044-7423), Sept. 2012.

⁶³¹¹ For a debt to be a business bad debt, it needs to be incurred in connection with the taxpayer's trade or business; furthermore, to be engaged in a trade or business, an individual must be involved in an activity with continuity and regularity, and the primary purpose for engaging in the activity must be for income or profit. *Alpert v. Commissioner*, T.C. Memo. 2014-70 (sustaining accuracy-related penalties when taxpayer could not produce credible evidence of the above).

⁶³¹² Reg. § 1.166-9(e); *Lair v. Commissioner*, 95 T.C. 35 (1990) (imposing penalties for deducting loss on guarantee of family member's obligation in light of that regulation).

When a guarantor becomes primarily liable on a debt and that debt is later forgiven, the forgiveness does not constitute cancellation of indebtedness income.⁶³¹³ That's because merely providing the guaranty does not increase the guarantor's assets.⁶³¹⁴ If a taxpayer who intended to be a guarantor mistakenly signs loan documentation as the primary obligor and the taxpayer never received the loan proceeds, never made payments, and never was looked to for payments, the taxpayer is recognized as a mere guarantor and does not realize income when

⁶³¹³ *Mylander v. Commissioner*, T.C. Memo. 2014-191, reasoning:

Under the guaranty petitioners were secondary obligors as to the Murray debt because they were obligated to pay the debt only if the Ledbetters—the primary obligors—defaulted. See *Restatement 3d, Suretyship & Guaranty*, sec. 1 (1996). When the Ledbetters defaulted, a cause of action against petitioners accrued to Mr. Murray which led to the State court judgment against petitioners and the subsequent covenant not to execute. Under the State court judgment, as well as the covenant not to execute, petitioners' secondary obligation became a primary obligation. See *Chevron Chem. Co. v. Mecham*, 536 F.Supp. 1036, 1043 (D. Utah 1982) (Default on the primary contract by the debtor ripens an unconditional guaranty into an actionable liability of the guarantor separate and apart from that of the principal debtor. The guarantor's obligation becomes absolute and is no longer secondary[.]).

Petitioners argue that even if they had become primary obligors on the Murray debt, they did not realize any COD income when the remaining debt was forgiven because they did not receive the benefit of the non-taxable proceeds from the loan obligation. We agree with petitioners.

⁶³¹⁴ *Mylander v. Commissioner*, T.C. Memo. 2014-191, reasoning:

Even though petitioners had become primary obligors under the guaranty, their situation remained similar to those of the taxpayers in *Hunt* and *Landreth*. We observed in *Landreth v. Commissioner*, 50 T.C. at 813, that where the guarantor is relieved of his contingent liability *** because of a release given him by the creditor, no previously untaxed accretion in assets thereby results in an increase in net worth. See also *Hunt v. Commissioner*, T.C. Memo. 1990-248, 59 T.C.M. (CCH) at 649-650 (quoting *Landreth v. Commissioner*, 50 T.C. at 813).

We do not see any material difference between the situation in *Landreth* and one in which a guarantor's contingent liability has ripened into a primary liability. Unlike a debtor who borrows funds, a guarantor who assumes a contingent liability does not receive an untaxed accretion of assets which is accompanied by an offsetting obligation to pay. This remains the case even after the guarantor becomes a primary obligor because of the debtor's default. Regardless of whether the guarantor is a secondary obligor or has become a primary obligor, when the debt is discharged the guarantor's net worth is not increased over what it would have been if the original transaction had never occurred. *Landreth v. Commissioner*, 50 T.C. at 813.

Petitioners did not receive any untaxed accretion of assets when they gave the guaranty. Nor did they receive any untaxed accretion of assets with respect to the guaranty when they later became primarily liable on the Murray debt as a result of the State court judgment. Therefore, when the remaining debt was forgiven petitioners did not realize an untaxed increase in wealth any more than had they remained secondary obligors.¹⁴

¹⁴ Respondent argues that, pursuant to our decision in *Hahn v. Commissioner*, T.C.

Memo. 2007-75, petitioners received an accession to wealth upon the discharge of the remaining debt. We find that *Hahn* is distinguishable because in that case the taxpayer was a debtor, not a guarantor, and received untaxed loan proceeds. *Id.*, slip op. at 2.

The court concluded:

Petitioners were initially secondary obligors on the Murray debt, under the terms of the guaranty. They did not receive any valuable consideration in exchange for the guaranty. Upon the Ledbetters' default, and the subsequent State court judgment and covenant not to execute, petitioners became primarily liable on the Murray debt. However, at no point did they receive an untaxed accretion of assets with respect to the guaranty. Accordingly, we find that, when the remaining debt was forgiven by Mr. Murray in 2010, petitioners did not have an accession to wealth and did not realize any COD income.

the loan is forgiven.⁶³¹⁵ A cash basis guarantor who issues a note to the lender does not thereby make a deductible payment.⁶³¹⁶

⁶³¹⁵ *Bullock v. Commissioner*, T.C. Memo. 2017-219, relying on the testimony of the taxpayer of her daughter-in-law (one of the intended borrowers), reasoned:

When petitioner went to the car dealership, she did not intend to be the primary obligor on the loan. In fact, she did not realize until trial that she had signed paperwork stating otherwise. She did not intend to personally repay the loan, and she made no payments on the loan. See *Monon R.R. v. Commissioner*, 55 T.C. 345, 357 (1970) (“The intent of the parties, in turn, may be reflected by their subsequent acts[.]”). The credit union also understood that petitioner intended only to be a cosigner; it was aware that petitioner’s son and daughter-in-law were responsible for the loan payments, and it never looked to petitioner for repayment. See *id.* Without an intention for petitioner to repay the debt, there was no bona fide primary obligation between petitioner and the credit union. See *PepsiCo P.R., Inc. v. Commissioner*, T.C. Memo. 2012-269, at *55, *88-91 (emphasizing the lack of intent to create a repayable obligation as a factor in holding that no debt existed).

Instead, petitioner, with the knowledge of the credit union, essentially operated as a guarantor for her son and daughter-in-law. Petitioner was merely promising to be responsible for her son and daughter-in-law in the event they failed to make the loan payments; she made no payments on the loan, and she never used the truck.

Because petitioner was merely the secondary obligor, her net worth was not “increased over what it would have been if the original transaction had never occurred.” See *Mylander v.*

Commissioner, at *18, *22 (holding that the taxpayers did not receive COD income for a debt that they had become primary obligors on via a guaranty (citing *Landreth v. Commissioner*, 50 T.C. at 813)). When the truck loan was forgiven, petitioner did not realize an untaxed increase in wealth. See *id.* at *23. Therefore, petitioner did not receive \$8,164 in cancellation of debt income...

PepsiCo P.R., Inc. v. Commissioner is quoted extensively in the text accompanying fn. 1841 in part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

⁶³¹⁶ *Helvering v. Price*, 309 U.S. 409 (1940), following *Eckert v. Burnet*, 283 U.S. 140 (1931), which held:

The facts of the transaction concerned were that the petitioner and his partner were joint endorsers of notes issued by a corporation that they had formed. There remained due upon these notes \$44800, that the corporation was unable to pay. In 1925 the petitioner and his partner in settlement of their liability made a joint note for that sum to the bank that held the corporation’s paper, received the old notes, marked paid, and destroyed them. The petitioner claims the right to deduct half that sum as a debt “ascertained to be worthless and charged off within the taxable year” under the Revenue Act of 1926, c. 27, § 214(a)(7), 44 Stat. 9, 27 (26 USCA § 955(a)(7)).

It seems to us that the Circuit Court of Appeals sufficiently answered this contention by remarking that the debt was worthless when acquired. There was nothing to charge off. The petitioner treats the case as one of an investment that later turns out to be bad. But in fact it was the satisfaction of an existing obligation of the petitioners, having, it may be, the consequence of a momentary transfer of the old notes to the petitioner in order that they might be destroyed. It is very plain we think that the words of the statute cannot be taken to include a case of that kind. We do not perceive that the case is bettered by the fact that some of the original notes years before were given for property turned over to the corporation by the partnership that formed it. For the purpose of a return upon a cash basis there was no loss in 1925. As happily stated by the Board of Tax Appeals the petitioner “merely exchanged his note under which he was primarily liable for the corporation’s notes under which he was secondarily liable, without any outlay of cash or property having a cash value.” A deduction may be permissible in the taxable year in which the petitioner pays cash. The petitioners says that it was definitely ascertained in 1925 that the petitioner would sustain the losses in question. So it was, if the petitioner ultimately pays his note. So was the tax considered in *United States v. Mitchell*, 271 U.S. 9, 12, 46 S.Ct. 418, 70 L.Ed. 799, but it could not be deducted until it was paid.

Factors determining whether a corporation may deduct guarantee fees paid to shareholders include: the fees must be reasonable,⁶³¹⁷ businesses of the same type and size as the payor corporation must customarily pay guarantor fees to their shareholders, shareholders must demand compensation in exchange for signing on as guarantors, the payment of guarantor fees suggests a constructive dividend if the corporation's profitability enabled it to pay a dividend and yet no dividends were paid out during the relevant tax year, and the courts give consideration to the proportional relationship between the amount of the payments and the shareholders' stock ownership.⁶³¹⁸ In deciding the deductibility of guaranty fees paid to a shareholder employee, courts consider:⁶³¹⁹

- (1) Whether, given the financial risks, the fees are reasonable in amount;

⁶³¹⁷ Bittker & Lokken, ¶ 79.4. Loans or Advances, *Federal Taxation of Income, Estates, and Gifts* (WG&L), when discussing Code § 482 implications of interest paid between related companies,

A related issue, which has not been directly litigated in the United States, is arm's length pricing of fees for guaranteeing a related person's debt. See *General Elec. Capital Canada Inc. v. Queen*, 2009 TCC 563 (Tax Court of Canada 2009); Breen, Evaluating the Arm's-Length Price of Financial Guarantees; A Review of the OECD Framework, 59 Tax Notes Int'l 869 (Sept. 13, 2010); Hales, Robinson, Axelsen & Ielceanu, Determining Arm's-Length Guarantee Fees, 39 Tax Mgmt. Int'l J. 445 (2010); Stewart, Officials Engage Practitioners on Pricing of Guarantee Fees, 127 Tax Notes 770 (May 17, 2010). See also Horst, How to Determine Tax-Deductible, Debt-Related Costs For a Subsidiary, 62 Tax Notes Int'l 589 (May 16, 2011); Miller, Federal Income Tax Consequences of Guarantees: A Comprehensive Framework for Analysis, 48 Tax Law. 103 (1994).

⁶³¹⁸ *Seminole Thriftway, Inc. v. U.S.*, 42 Fed. Cl. 584 (1999), after discussing *Tulia Feedlot, Inc. v. U.S.*, 513 F.2d 800, 804 (5th Cir. 1975); *Olton Feed Yard, Inc. v. U.S.*, 592 F.2d 272 (5th Cir. 1979); *Tulia Feedlot, Inc. v. U.S.*, 3 Cl. Ct. 364 (1983); and *Fong v. Commissioner*, T.C. Memo. 1984-402. *A.A. and E.B. Jones Co. v. Commissioner*, T.C. Memo. 1960-284, approved fees for guaranteeing surety bonds that were required to do business when the taxpayers proved that the payments were usual and were comparable to others in somewhat similar circumstances.

⁶³¹⁹ *E.J. Harrison and Sons, Inc. v. Commissioner*, T.C. Memo. 2003-239, citing:

See *Olton Feed Yard, Inc. v. United States*, 592 F.2d 272, 275-276 (5th Cir. 1979); *Tulia Feedlot, Inc. v. United States*, 513 F.2d 800, 803-806 (5th Cir. 1975); *Fong v. Commissioner*, T.C. Memo. 1984-402, *affd.* without published opinion 816 F.2d 684 (9th Cir. 1987); *Seminole Thriftway, Inc. v. United States*, 42 Fed. Cl. 584, 589-590 (1998) (the guaranty fee cases).

The court held:

Mrs. Harrison's loan guaranties represented one of her principal contributions to petitioner. They did not, as in the no-fee cases, merely supplement her performance of substantial managerial activities on petitioner's behalf. Therefore, we find those cases to be inapposite. Rather, we find that the factors utilized in the guaranty fee cases are properly suited to the task of determining what amount, if any, may be considered reasonable compensation for Mrs. Harrison's personal guaranties. Because (1) Mrs. Harrison was willing to issue the guaranties without compensation, (2) there is no evidence that businesses of the same type and size as petitioner customarily paid guarantor fees to shareholders, (3) petitioner had sufficient profits to pay dividends, but failed to do so, and (4) the evidence does not establish what amount, if any, would constitute reasonable compensation for her guaranties, we find that Mrs. Harrison's guaranties do not support the characterization of any amount she received from petitioner as reasonable compensation. Instead, we view the shareholder guaranties in this case as a means of protecting the shareholders' ownership interests in petitioner, not as a function of their employment by petitioner. See *Olton Feed Yard, Inc. v. United States*, 592 F.2d at 275-276 (stating that employee-shareholders' willingness to guaranty, without charge, the corporate employer's debt is evidence that such individuals "signed the guaranties in order to protect and enhance their investment in the corporation").

- (2) whether businesses of the same type and size as the payor must customarily pay guarantor fees to shareholders;
- (3) whether the shareholder demanded compensation for the guaranty;
- (4) whether the payor had sufficient profits to pay a dividend, but failed to do so; and
- (5) whether the purported guaranty fees were proportional to stock ownership.

Clary Hood, Inc. v. Commissioner, T.C. Memo. 2022-15, reasoned and held:

Petitioner's justification for Mr. Hood's higher compensation for the years at issue includes Mr. Hood's debt guaranties and surety bond guaranties during the review period. Guaranty fees may qualify as a deductible business expense under section 162(a). See *R.J. Nicoll Co. v. Commissioner*, 59 T.C. at 51-52; *A.A. & E.B. Jones Co. v. Commissioner*, T.C. Memo. 1960-284. This Court has taken into account some of the following considerations when deciding the deductibility of such fees paid to a shareholder-employee: (1) whether the fees were reasonable in amount given the financial risks; (2) whether businesses of the same type and size as the payor customarily pay such fees to shareholders; (3) whether the shareholder-employee demanded compensation for the guaranty; (4) whether the payor had sufficient profits to pay a dividend but failed to do so; and (5) whether the purported guaranty fees were proportional to stock ownership. *E.J. Harrison & Sons, Inc. v. Commissioner*, 2003 WL 21921049, at *14; *Fong v. Commissioner*, T.C. Memo. 1984-402, *aff'd without published opinion*, 816 F.2d 684 (9th Cir. 1987).

The record shows that it is customary for the owners of construction companies to guarantee debts and bonds, and that compensation for these guaranties is appropriate. Further, respondent's expert witness, Mr. Fuller, found that the compensation petitioner paid to Mr. Hood in the years at issue for his surety bond guaranties was reasonable.²⁸ We recognize that Mr. Hood historically did not seek compensation for the guaranties and petitioner had sufficient profits to pay a dividend during the years at issue; however, we place more weight on the customary nature and reasonableness of the fees.

²⁸ Mr. Fuller distinguishes the surety bond guaranties from the debt guaranties. He concluded that no compensation should have been issued with respect to the debt guaranties because petitioner also lent money and extended credit to Mr. Hood and his other businesses during the years at issue.

(Above we are focusing on compensating a shareholder for financial risk. For compensating a shareholder for services performed, see part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.)

When a savings and loan association engaged in the financing of residential mortgages, established a "pool" of mortgages, all of which are insured by the Federal Housing Administration, the Farmers Home Administration, or are insured or guaranteed by the Veterans

Administration, those who bought an interest in the mortgages⁶³²⁰ may deduct the servicing, custodian, and guarantee fees under Code § 162 or 212.⁶³²¹

Code § 102 (no income on a gift) trumps Code § 61(a)(2) (discharge of indebtedness is income income).⁶³²²

III.B.1.a.iii. Gift of Services

The gift tax applies to gifts of property, not services. Before *Dickman*, the courts generally concluded that the gift tax only applied to transfers of title or interest in property. This is clearly no longer true, considering how the court chose to define “property”: “[It] is more than just the physical thing – the land, the bricks, the mortar – it is also the sum of all the rights and powers incident to ownership of the physical thing. Property is composed of constituent elements and of these elements the right to use the physical thing to the exclusion of others is the most essential and beneficial.”⁶³²³

A pre-*Dickman* case held that donating one’s own services does not create gift tax liability relating to the value or profits derived from those services.⁶³²⁴ “The taxpayer is not under any duty to cultivate the fruits of his capital (or labor) and will not be taxed as if he had when he hasn’t.”⁶³²⁵ Also, *Dickman* states that the gift tax is an excise tax on transfers of property.⁶³²⁶ *Dickman* did not address gifts of services.

The IRS ruled that a timely waiver of fees for serving as executor was neither income to, nor a gift by, the executor, reasoning:⁶³²⁷

The crucial test of whether the executor of an estate or any other fiduciary in a similar situation may waive his right to receive statutory commissions without thereby incurring any income or gift tax liability is whether the waiver involved will at least primarily constitute evidence of an intent to render a gratuitous service. If the timing, purpose,

⁶³²⁰ Rev. Rul. 84-10 treated the pools as multiple owner grantor trusts, presumably having in mind the rules discussed in part II.D.4.a Investment Trusts, which is part of part II.D.4 Disregarding Multiple Owner Trust for Income Tax Purposes. Rev. Rul. 84-10 noted:

The Service has discussed the federal income tax consequences of similar pooling arrangements in Rev. Rul. 71-399, 1971-2 C.B. 433, amplified by Rev. Rul. 81-203, 1981-2 C.B. 137, Rev. Rul. 80-96, 1980-1 C.B. 317, Rev. Rul. 74-300, 1974-1 C.B. 169, Rev. Rul. 74-221, 1974-1 C.B. 365, and Rev. Rul. 72-376, 1972-2 C.B. 647 (concerning mortgage pools established by the Federal Home Loan Mortgage Corporation); Rev. Rul. 70-544, 1970-2 C.B. 6, and Rev. Rul. 70-545, 1970-2 C.B. 7, both modified by Rev. Rul. 74-169, 1974-1 C.B. 147 (concerning mortgage pools guaranteed by the Government National Mortgage Association); and Rev. Rul. 77-349, 1977-2 C.B. 20 (concerning a mortgage pool created by a commercial bank).

⁶³²¹ Rev. Rul. 70-544.

⁶³²² *Helvering v. American Dental*, 318 U.S. 322 (1943) (interpreting predecessors to these statutes); *Bosse v. Commissioner*, T.C. Memo. 1970-355 (not citing *Helvering v. American Dental* but rather determining the gratuitous nature of the forgiveness).

⁶³²³ *Dickman*, 465 U.S. at 336, quoting *Passailaigue v. U.S.*, 224 F.Supp 682, 686 (M.D. Ga. 1963).

⁶³²⁵ *Crown*, 585 F.2d at 236

⁶³²⁶ *Dickman*, 465 U.S. at 340.

⁶³²⁷ Rev. Rul. 66-167, followed *Breidert v. Commissioner*, 50 T.C. 844 (1968) (executor’s commission was claimed on estate tax return but was still deemed not income when executor refused to pay himself), Rev. Rul. 70-237, and Letter Ruling 7846049. *Breidert v. Commissioner* was distinguished in *O’Connell v. Commissioner*, T.C. Memo. 1980-432.

and effect of the waiver make it serve any other important objective, it may then be proper to conclude that the fiduciary has thereby enjoyed a realization of income by means of controlling the disposition thereof, and at the same time, has also effected a taxable gift by means of any resulting transfer to a third party of his contingent beneficial interest in a part of the assets under his fiduciary control. See [Revenue Rulings 56-472 and 225] and the authorities therein cited, as well as section 25.2511-1(c) of the Gift Tax Regulations.

The requisite intention to serve on a gratuitous basis will ordinarily be deemed to have been adequately manifested if the executor or administrator of an estate supplies one or more of the decedent's principal legatees or devisees, or of those principally entitled to distribution of decedent's intestate estate, within six months after his initial appointment as such fiduciary, with a formal waiver of any right to compensation for his services. Such an intention to serve on a gratuitous basis may also be adequately manifested through an implied waiver, if the fiduciary fails to claim fees or commissions at the time of filing the usual accountings and if all the other attendant facts and circumstances are consistent with a fixed and continuing intention to serve gratuitously. If the executor or administrator of an estate claims his statutory fees or commissions as a deduction on one or more of the estate, inheritance, or income tax returns which are filed on behalf of the estate, such action will ordinarily be considered inconsistent with any fixed or definite intention to serve on a gratuitous basis. No such claim was made in the instant case.

Commentators generally agree that, if the service provider clearly establishes intent not to charge for services before the service provider earned compensation income, then gratuitously rendering services will not constitute a gift, because no property has been transferred.

For services generating property interests benefitting donees, see part III.B.1.a.v Sending Business or Performing Services.

III.B.1.a.iv. Family Partnerships

III.B.1.a.iv.(a). Gift/Estate Tax Uses and Issues Regarding Family Partnerships

Generally, my materials do not cover valuation disputes, annual exclusion issues, or Code § 2036 cases. Code § 2036 causes estate inclusion when a decedent retained the right to income from or certain other rights to property that the decedent transferred except in a bona fide sale for adequate and full consideration in money or money's worth.⁶³²⁸ The Tax Court seems to employ a smell test when evaluating partnerships or other arrangements that generate significant discounts from the net asset (fair market) value of the entity's underlying assets.⁶³²⁹

⁶³²⁸ For a very brief summary of this issue and how using an S corporation instead of a partnership can avoid the issue, see fns. 91-92 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders.

⁶³²⁹ For example, see *Cahill* and related cases regarding intergenerational split dollar arrangements, described in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.

However, a decedent's rights over distributions from a Massachusetts business trust⁶³³⁰ did not implicate Code § 2036(a)(2)⁶³³¹ or 2038.⁶³³²

⁶³³⁰ The official Tax Court syllabus of *Estate of Cohen v. Commissioner*, 79 T.C. 1015 (1982), described: Over a period of about 28 months ending some 4 years prior to his death, the decedent transferred all of his common shares and 7,350 of his 7,500 preferred shares in a Massachusetts real estate trust to his children, grandchildren, and great-grandchildren. The primary function of the trust was to lease a store facility to the corporate retail business operated by the decedent and his three sons. The decedent and his sons were the trustees of the trust when the transfers were made and at all times thereafter until the death of the decedent. *Held*: The discretion accorded the trustees in the trust agreement in respect of the declaration and payment of annual dividends on the common and preferred shares was not unlimited under State law; it was conditioned at least upon a good-faith exercise of bona fide business judgment. Accordingly, in view of the substantial similarity between this real estate trust and a corporation, the trustees' dividend power did not constitute a "right" to designate possession or enjoyment of the income of the shares. *United States v. Byrum*, 408 U.S. 125 (1972), followed.

⁶³³¹ The court held:

In view of the perceived limitations on the dividend power in the trust agreement in question, and the apparent willingness of the Massachusetts courts to hold business trustees to a fair standard of conduct,³ we conclude that the decedent and his sons did not have the power to withhold dividends arbitrarily. Thus, they did not have an "ascertainable and legally enforceable" right to shift income between the classes of shareholders, and the dividend power does not require inclusion of either the common or preferred shares in the decedent's estate under section 2036(a)(2). We think *Byrum* is controlling.⁴

³ Moreover, we think that the Massachusetts courts would be even more alert to look into the existence of business judgment of the trustees where the exercise of the trustees' discretion might operate to the disadvantage of one group of beneficiaries in favor of another group.

⁴ The facts in this case make it a much weaker one for the Government than *Estate of Gilman v. Commissioner*, 65 T.C. 296 (1975), *affd.* 547 F.2d 32 (2d Cir. 1976). By reason of the unusual facts there presented, a sharp division arose within this Court. The dissenters were of the view that the decedent had retained the actual enjoyment of the transferred shares which made section 2036(a)(1) applicable. However, there was no disagreement between the majority and the dissenters as to the applicability of *Byrum* under sec. 2036(a)(2), and in view of the reliance by the majority upon *Byrum* in respect of both subsections (a)(1) and (a)(2), the controlling effect of *Byrum* in the present case follows *a fortiori* from *Gilman*. Here, there is no contention whatever that the decedent retained actual enjoyment of the transferred shares. Indeed, the record shows that he had long ceased to exercise any meaningful control over the enterprise, and that it had, in fact, reached the point where it had largely surpassed his comprehension. His role was primarily of a ceremonial nature without any real exercise of business control or even any significant participation in the business, which was, in fact, being run by his three sons.

The Government also contends that the power of the trustees to redeem the preferred shares at par value is a right to designate enjoyment under section 2036(a)(2). It is stipulated, however, that fair market value of these shares was equal to their par value at the decedent's death, and we fail to see how enjoyment of the shares would be diminished by the payment of fair market value in exchange therefor. This would simply give the beneficiary more freedom of action in respect of the transferred property, while section 2036 is designed to draw into the estate property of which the decedent has in some way kept control. The Government's contention must be rejected.

⁶³³² The court held:

The 1970 amendment which created the two classes of shares in no way purported to change the alteration provision or the termination provision, and in the absence of any persuasive indications to the contrary, we think that the amendment must be construed to leave intact such critical rights. A fair construction of the amended agreement is that the absence of a vote for the

In *Estate of Clyde W. Turner, Sr. v. Commissioner*, 151 T.C. No. 10 (2018), the Code § 2207B right of recovery regarding estate tax on Code § 2036 assets prevented that estate tax from reducing the marital deduction.⁶³³³

preferred shareholders is meant to exclude them from participation in the regular business affairs of the trust, but that their consent must nevertheless be obtained in respect of such fundamental matters as alteration of the agreement and termination of the trust. And this construction is consistent with the language of the amendment, which states that “The beneficial interests of the cestuis que trustent shall be represented by transferable shares which shall consist of two classes.” Thus, the two classes of shares *together* represent the “cestuis que trustent,” and these are the same “cestuis que trustent” whose consent is required. Therefore, even after 1790, the agreement could be altered or the trust terminated only with the consent of “all parties having an interest.” Because these provisions appear to add nothing to the rights of the parties under Massachusetts law (see *Ryan v. McManus*, 323 Mass. 221, 80 N.E.2d 737, 742 (1948); *Commissioner of Corporations, Etc. v. Second Nat. Bank*, 308 Mass. 1, 30 N.E.2d 889, 895 (1941)),⁵ section 2038 is rendered inapplicable here by section 20.2038-1(a)(2), Estate Tax Regs., quoted *supra*.⁶

⁵ These Massachusetts decisions were concerned with regular trusts rather than realty trusts. Nevertheless, they seem particularly relevant here, because the Mezuries shares were transferable and in each of these cases the Supreme Judicial Court stressed the connection between the assignability of beneficial interests and the power of the beneficiaries to alter or terminate the trust. For example, in *Commissioner of Corporations, Etc. v. Second Nat. Bank*, the court stated (30 N.E.2d at 895):

“The power conferred by law upon the beneficiaries acting together to terminate or modify the trust is closely analogous with respect to each beneficiary, to the power of such beneficiary to assign his interest in the trust estate.”

See also *Ryan v. McManus*, 80 N.E.2d at 742.

⁶ Even if the Government were correct in its interpretation of the amended trust agreement, so that the consent of only the holders of the common shares was required in order to alter the agreement or terminate the trust, the common shares transferred by the decedent in 1970 would in any event be excluded from his gross estate by reason of sec. 20.2038-1(a)(2), Estate Tax Regs.

⁶³³³ The court held:

Under section 2036 the gross estate includes the values of the section 2036 assets that Clyde Sr. transferred during his lifetime. The fact that property that might otherwise go to the surviving spouse would be used to pay the estate tax liabilities attributable to the section 2036 assets does not compel a conclusion that the marital deduction must be reduced. The estate is entitled to recover from the recipients of section 2036 assets during Clyde Sr.’s lifetime an amount equal to the liability attributable to the section 2036 inclusion that the estate pays. That recovery will enable the estate to distribute to the surviving spouse property value undiminished by the tax payments. Section 20.2056(b)-4(c), Estate Tax Regs., does not require a different result when the Federal estate and State death taxes have no effect upon the net value distributable to the surviving spouse. See, *e.g.*, *Estate of Gill v. Commissioner*, T.C. Memo. 2012-7 (marital deduction not reduced where marital deduction property does not bear the economic burden of the tax). Accordingly, we hold that the estate need not reduce the marital deduction by the amount of Federal estate and State death taxes it must pay because the tax liabilities are attributable to the section 2036 assets, the estate has the right to recover the amount paid under section 2207B, and the estate must exercise that right to recover to give effect to Clyde Sr.’s intention that Jewell receive her share of the estate undiminished by the estate’s tax obligations. Respondent makes an additional argument that focuses on the interest owed on the Federal estate tax liability. Respondent contends that under section 20.2056(b)-4, Estate Tax Regs., the estate tax interest expense is a transmission expense,¹¹ and therefore it reduces the residue and correspondingly reduces the marital deduction. However, under section 2207B(c), “[i]n the case

When a partner receives a capital account (or increases an existing capital account) by the fair market value of contributed assets (as is required by the regulations under Code § 704(b)),⁶³³⁴ the contribution to the partnership is not a gift.⁶³³⁵ However, if the partnership's income and loss are not proportionate to capital accounts, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Any part of the discussion below that relates to preferred partnership is subject to part III.B.7.b Code § 2701 Overview when considering how to structure a preferred return so that the preferred return is given effect for gift tax purposes (including whether a sale is for adequate and full consideration). Note, however, that using a preferred partnership may help avoid Code § 2036.⁶³³⁶

One problem with sales to irrevocable grantor trusts⁶³³⁷ is that neither the growth nor the value of the asset at the time of the sale receives a basis step-up at death; the same issue applies to gifts. Considerable growth is required for the estate tax savings to make up for the income tax benefits lost due to the lack of a basis step up.⁶³³⁸ See part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property). One way to obtain a basis step-up on the value of the gift or sold asset at the time of the transfer is to retain a preferred partnership interest and transfer the common interest.⁶³³⁹

III.B.1.a.iv.(b). Income Tax Aspects of Family Partnerships

Numerous provisions in part II Income Tax Flexibility discuss partnership income taxation generally. For an operating business, a robust structure is described in part II.E Recommended Structure for Entities. See also part II.Q.8.a Partnership as a Master Entity.

of penalties and interest attributable to the additional taxes described in subsection (a), rules similar to the rules of subsections (a) and (b) [of section 2207B] shall apply." Accordingly, the amount that the estate is entitled to recover from the section 2036 asset recipients includes applicable interest.

¹¹ Sec. 20.2056(b)-4(d)(1)(ii), Estate Tax Regs., defines estate transmission expenses as "expenses that would not have been incurred but for the decedent's death and the consequent necessity of collecting the decedent's assets, paying the decedent's debts and death taxes, and distributing the decedent's property to those who are entitled to receive it."

⁶³³⁴ See part II.C.7 Maintaining Capital Accounts, especially fn. 500.

⁶³³⁵ *Estate of Jones v. Commissioner*, 116 T.C. 121, 128 (2001), holding:

The contributions of property in the case at hand are similar to the contributions in *Estate of Strangi* and are distinguishable from the gifts in *Shepherd*. Decedent contributed property to the partnerships and received continuing limited partnership interests in return. All of the contributions of property were properly reflected in the capital accounts of decedent, and the value of the other partners' interests was not enhanced by the contributions of decedent.

Therefore, the contributions do not reflect taxable gifts.

⁶³³⁶ For the scope of this possible protection, see fns 2223-2225 in part II.H.11.a Basics of Preferred Partnerships.

⁶³³⁷ See part III.B.2.a Tax Basis Issues within part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

⁶³³⁸ See Stacy Eastland's materials at the 2015 Heckerling Institute on Estate Planning.

⁶³³⁹ See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

Code § 704(e) was amended in 2015;⁶³⁴⁰ now:

- If a partnership interest is created by gift, the donee's distributive share is includible in the donee's gross income, except to the extent that the share is determined without allowance of reasonable compensation for services that the donor rendered to the partnership, and except to the extent that the portion of that share attributable to donated capital is proportionately greater than the donor's share attributable to the donor's capital.⁶³⁴¹ In applying this rule, "an interest purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital."⁶³⁴²
- Regarding a capital interest in a partnership in which capital is a material income-producing factor, whether a person is a partner with respect to that interest is determined without regard to whether such interest was derived by gift from any other person.⁶³⁴³

Before these amendments, the following analysis applied:

Suppose a parent real estate entrepreneur makes a capital contribution to become the general and managing partner of a family partnership. The children all make capital contributions, as limited partners, in amounts greater than or equal to the parent's. The lion's share of the capital necessary to finance the project is borrowed from banks, presumably on the basis of the parent's good credit and standing in the financial community. If the transaction succeeds, the banks are paid back and the children are rewarded in proportion to their capital contributions. If the transaction fails, however, the banks and the parent, as general partner, are left holding the bag. This scenario is similar in some respects to *Carriage Square, Inc. v. Commissioner*.⁶³⁴⁴

In *Carriage Square*, the father, through his corporation, Carriage Square, Inc., contributed funds to a partnership (10% of total funds), while five trusts, for the benefit of his wife and children, each contributed the remainder (90%). The father became the general partner, while the trusts became limited partners. The father would then purchase land with borrowed money and sell the land to the partnership, with the partnership borrowing the necessary capital from the same bank on a guarantee by the father. The partnership would also take out a construction loan,

⁶³⁴⁰ RIA's history provides [some punctuation added]:

In 2015, P.L. 114-74, Sec. 1102(b)(1), deleted para. (e)(1), and redes. paras. (e)(2) and (e)(3) as paras. (e)(1) and (e)(2), respectively. P.L. 114-74, Sec. 1102(b)(2), substituted this subsection for this section in para. (e)(2) (as redes. by Sec. 1102(b)(1)). P.L. 114-74, Sec. 1102(b)(3), substituted Partnership Interests Created by Gift for Family Partnerships the heading of subsec. (e), effective for partnership tax. yrs. begin. after 12/31/2015.

Prior to deletion, para. (e)(1) read as follows:

(1) *Recognition of interest created by purchase or gift.* A person shall be recognized as a partner for purposes of this subtitle if he owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person.

⁶³⁴¹ Code § 704(e)(1), which further provides, The distributive share of a partner in the earnings of the partnership shall not be diminished because of absence due to military service.

⁶³⁴² Code § 704(e)(2), which further provides:

The family of any individual shall include only his spouse, ancestors, and lineal descendants, and any trusts for the primary benefit of such persons.

⁶³⁴³ Code § 761(b).

⁶³⁴⁴ 69 T.C. 119 (1977).

again guaranteed by the father. Once the real estate development became successful, the five trusts received 90% of the profits.

The *Carriage Square* majority held that the borrowed capital was not a material income-producing factor.⁶³⁴⁵ Code § 704(e)(1), a non-exclusive safe harbor, stated that a person shall be recognized as a partner for income tax purposes if he or she owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person. However, whether capital is a material income-producing factor in a partnership is for the fact finder to determine on a case-by-case basis. Essentially, the court believed the bank would not have loaned the money to capitalize the venture without the secured guarantees by the father.

The court held that the partnership was a sham designed to transfer tax-free income streams to the children. Because capital was not a material income producing factor, Code § 704(e)(1) did not apply. Also, the court held, the partners did not have a valid business purpose for forming the partnership, considering the 90% share of profits the trusts earned in light of their limited capital contributions and consequential limited risk (since they did not guarantee the loans). Because the partnership could borrow whatever amounts it needed based on the guarantees by the father, their capital contributions were not material. Further, because the father, through the general partner corporation, performed all the services necessary to operate the business, assumed all the risk of business failure, and used his contacts and community goodwill to secure the loans, the court held that the trusts were not partners.⁶³⁴⁶ Judge Tannenwald, in his dissent, instead of discounting the partnership interests of the trusts, raised the specter of the trusts' partnership interests having been acquired by gift under Code § 704(e)(2).⁶³⁴⁷

A family partnership in which capital is not a material income-producing factor may still be recognized as a valid entity and the persons within it as valid partners under the *Culbertson* standard.⁶³⁴⁸ Partners must show they had a good faith business motive for entering into the partnership. However, for income tax purposes, failure to satisfy Code § 704(e)(1) would preclude the partnership from passing the *Culbertson* hurdle.⁶³⁴⁹

Commentators have long questioned the *Carriage Square* holding.⁶³⁵⁰ The case, as the Tax Court admitted, was an egregious example of tax avoidance.⁶³⁵¹

For income tax purposes, Reg. § 1.704-1(e)(3)(i)(a) appears to respect allocating a preferred return to the donor but not allocating a preferred return to a donee:

⁶³⁴⁵ The court believed that Reg. § 1.704-1(e)(1)(i) prohibited the borrowed capital from being considered as an income producing factor because it was not contributed by a partner. *Id.* at 127. The production of income by a partnership is attributable to the capital or services, or both, contributed by the partners. Reg. § 1.704-1(e)(1). Here, the capital was guaranteed by a non-partner, the father.

⁶³⁴⁶ *Carriage Square, Inc. v. Commissioner*, 69 T.C. 119, 128.

⁶³⁴⁷ *Carriage Square, Inc. v. Commissioner*, 69 T.C. 119, 140-41.

⁶³⁴⁸ *Commissioner v. Culbertson*, 337 U.S. 733 (1949).

⁶³⁴⁹ Howard Zaritsky, ¶ 10.09 The Family Partnership Rules, *Tax Planning for Family Wealth Transfers: Analysis With Forms*.

⁶³⁵⁰ W. McKee, W. Nelson, R. Whitmire, *Federal Taxation of Partnerships and Partners*, ¶ 14.02 (3rd ed. 1997) (stating that establishing a recognizable capital interest is less onerous under Code § 704(e)(1) and Reg. § 1.704-1(e)(1)(iv) than *Carriage Square* believes).

⁶³⁵¹ *Carriage Square, Inc. v. Commissioner*, 69 T.C. 119, 131.

Where a capital interest in a partnership in which capital is a material income-producing factor is created by gift, the donee's distributive share shall be includible in his gross income, except to the extent that such share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the distributive share attributable to the donor's capital. For the purpose of section 704, a capital interest in a partnership purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital. The "family" of any individual, for the purpose of the preceding sentence, shall include only his spouse, ancestors, and lineal descendants, and any trust for the primary benefit of such persons.

Letter Ruling 9808010 included (highlighting added):

We conclude that the family limited partnership's allocations will satisfy the requirements of section 704(e)(2) if the donors' distributive shares of partnership income represent an equal or greater proportion of the total partnership income (computed without reduction for guaranteed payments) than the donors' capital represents of the total partnership capital. For this purpose, the donors' distributive shares of partnership income include guaranteed payments (as defined in section 707(c) and section 1.707-1(c)) that the donors are required to include in income for the taxable year and the donors' allocable shares (under section 704(b), but not section 704(c)) of the partnership's net income for the taxable year.

III.B.1.a.v. Sending Business or Performing Services

Code § 2501 taxes "the transfer of property by gift." Reg. § 25.2501-1(a)(1) also taxes only "transfers by gift of property." When a donor provides services – whether working full-time or merely sharing business connections – does that work constitute earning income and transferring the property earned from those services or is merely allowing the donee the opportunity to earn income herself/himself from her/his own exploitation of the opportunity or wise investment of her/his own assets? Merely rendering services is discussed in part III.B.1.a.iii Gift of Services. Part of the discussion below views certain employment benefits as merely incidental to working, along the lines of part III.B.1.i Transfers with Contingencies Based on Acts of Independent Significance; you will find below that this area involves a continuum, and where a situation falls sometimes is a judgment call on which experts may differ reasonably.

The first two subparts below describe cases in chronological order, and the final subpart evaluates the principles:

- III.B.1.a.v.(a) Purely Shifting Business Opportunities
- III.B.1.a.v.(b) Property Transfer Clearly Tied to Services
- III.B.1.a.v.(c) Evaluating the Continuum

III.B.1.a.v.(a). Purely Shifting Business Opportunities

In *Crowley v. Commissioner*, 34 T.C. 333, 345-47, *acq.* 1961-2 C.B. 4, a father owned a savings and loan. In addition to the traditional sources of income, the business generated income by means of appraisal fees, insurance fees, and title commissions. He created a partnership for his four children to handle these ancillary income streams for the S&L. One son was trained as an appraiser and insurance agent, handling the S&L's appraisal and insurance needs. The profits from this work were shared between the S&L and the partnership. The Tax Court held that the income was all taxable to the partnership and not to the father. Having determined that no income was attributable to the father, the court held that there were no gift tax issues.

The son could not have obtained the amount of appraisal work he did without the aid of his father. This was a business opportunity that the son (and his siblings) had not earned on the basis of individual ability. One author suggested that such nepotism would be extraordinarily difficult to tax and the IRS does not regularly pursue it.⁶³⁵²

With a slight nod to *Crowley*, the income tax case *Alabama-Georgia Syrup Co. v. Commissioner*, 36 T.C. 747, 767 (1961), *acq.* 1962-2 C.B. 3 held:

It is a fair inference that Louis directed business to suppliers for whom Katherine was broker, but this fact does not require a conclusion that the income from the brokerage commissions was in substance that of [Louis' corporation].

Bross Trucking, Inc. v. Commissioner, T.C. Memo. 2014-107, held that:

- Lack of non-compete precluded corporate goodwill regarding owner-officer's relationships.
- Owner's sons developed relationships with owner's customers when owner shut down owner's business due to regulatory hassles and sons started new corporation.
